SUSSEX COUNTY LUNATIC ASYLUM, HAYWARDS' HEATH.

FOURTH ANNUAL REPORT OF THE COMMITTEE OF VISITORS, 1862.

To Her Majesty's Justices of the Peace for the County of Sussex, assembled in Quarter Sessions, held at Lewes, in and for the Eastern Division of the said County, on Monday, the 5th day of January, 1863; and at Petworth, in and for the Western Division of the County, on Thursday, the 8th day of January, 1863. The COMMITTEE OF VISITING JUSTICES OF THE SUSSEX PAUPER LUNATIC ASYLUM, appointed at the Epiphany Sessions, 1861 and 1862, REPORT:—

THAT the general state and condition of the Asylum, so far as its present accommodation extends, has been exceedingly good and satisfactory throughout the year. Many alterations and improvements have been made, and the comforts of the Patients increased.

The Visitors have been able, since the last Report, again to reduce the cost of maintenance of the Pauper Patients from the different Unions; the Weekly Charge is now 10s. per

head, which the Visitors trust there will be no necessity to increase.

The Provisions supplied to the Asylum have been very good. The Water supply has been most ample, and the quality of the Water most satisfactory. The details of the numbers of the Patients, with their Discharges, Cures and Deaths, and the general sanitary condition of the Asylum, will be found stated in the Report of Dr. Robertson, the Medical Superintendent, whose care and management of the Patients have given great satisfaction to your Committee.

The Farm is in good condition, and has much improved in appearance and productiveness. It is a source of much benefit to the Patients, by whom the greater part of the work is performed.

The Chaplain, whose attention to his charge is very satisfactory, has made his Report, which we lay before the Court.

South on Mondon in Tak day of Jakasay, 1863;

ES OF THE ACSSEX PALITY

The conduct of the Officers of the Establishment, both Male and Female, has been generally good, and their care of and attention to the Patients satisfactory. Your Committee have been deprived by death of the assistance of the late Mr. Kell, who had been the Clerk to the Visitors from the time the erection of the Asylum was first considered; and from the loss of his valuable services and the regard felt for him by the Visitors, this has been the source of much regret. The Committee have appointed as his successor Mr. H. Jones, of Lewes, who has been many years the assistant of Mr. Kell, and who is thoroughly conversant with the details of the Asylum.

"By the 62nd Section of the Act for the Regulation of Lunatic "Asylums, the Committee of Visitors of every Asylum shall in every "year lay before the Justices of every County and Borough to which "such Asylum wholly or in part belongs, at the Court of General or "Quarter Sessions to be holden next after 20th December in every " year, for such County, a Report in writing of the state and condition " of such Asylum, and as to its sufficiency for the proper accommodation " of the number of Lunatics for whom it may be requisite to provide "accommodation. By the 30th Section of the same Act the Justices " of any County may direct the Committee of Visitors of any existing "Asylum to cause the same to be enlarged or improved. And in case "at any time it appears to one of Her Majesty's Principal Secretaries " of State, upon the Report of the Commissioners in Lunacy, that any " existing Asylum is inadequate for the proper accommodation of the "Pauper Lunatics of any County, it shall be lawful for such Secretary " of State, by writing under his hand, to require the Committee of "Visitors of any existing Asylum forthwith to enlarge or improve the " same in such manner as the Secretary of State may direct."

In pursuance of the provisions above mentioned, the Visitors made a Report to the Court of Quarter Sessions at the Epiphany Sessions in January last, in which, after reporting the general state of the Asylum, they stated that in their opinion, the Asylum was insufficient for the proper accommodation of the number of Lunatics for whom it might be necessary to provide.

When the existing Asylum was built, the Committee appointed to superintend the erection, after making inquiries in every quarter, and having returns made to them from the different Parishes in the County, considered that a provision for 400 Lunatics would meet the probable requirements, and instructions to that effect were given the Architects who were desirous of tendering designs for the erection, and these instructions were submitted to, and approved by, the

Commissioners in Lunacy. The Building was completed for the accommodation of 400 Patients. It was at first furnished for the reception of 300. And the first Patients were received in July, 1859.

In January, 1860, the number of Inmates amounted to 285, and the numbers steadily increased. In January, 1861, the number of Patients was 399. During the year 1861, many Patients from the County of Kent were necessarily removed from the Asylum. But in January, 1862, notwithstanding such removal, the Patients had increased to 459, and at the present time there are 500 Patients in the house, 258 of whom are Females.

The different Wards and Dormitories are inconveniently crowded, and on the Female Side beds are placed temporarily in places which were not intended, nor fit, for sleeping accommodation; and in the Day Rooms they are similarly inconvenienced. Many of the Offices of the Asylum, including the Wash-house, Laundry and Drying Rooms, which were originally provided for 300 Patients, are insufficient and require increase.

The insufficiency of the Asylum reported in January, 1862, is thus aggravated.

Before the time that the House was completely full, the Visitors under the powers of the Act of Parliament received as Patients several persons who were not Paupers, both Male and Female, who paid for their maintenance a larger weekly amount than Parish Paupers, and were a source of considerable emolument to the Establishment. This enabled the Visitors to keep the Weekly Charges to the Unions for

their Paupers at a much lower rate than would otherwise have been charged. When the number of Paupers increased, which increase was considerably greater on the Female Side, the private Female Patients were discharged, and there is only one now in the house, who was sent there by order of the Secretary of State, and notwithstanding the discharge of these Private Patients the Visitors have been unable to accommodate all the Female Pauper Patients who required admission. On the Male Side the increase has not been great, and there are now in the house 24 Patients from Boroughs, and 41 Private Patients who pay a larger sum for their maintenance than their actual cost, and who are therefore, as before stated, a source of considerable profit; the number of Male Pauper Patients is however increasing, and the Visitors anticipate it will not be long before some of the Private Patients must be discharged.

When the Report was made to the last Epiphany Sessions, some of these circumstances were adverted to. But no order was made as to any increase or addition to the Asylum.

Knowing it would be necessary at the present Sessions again to report on the inadequacy of the Asylum, the Visitors have considered if the difficulty could in any way be met. And it has been suggested that some relief of the crowded state of the House might be obtained by discharging 20 of the Female Patients who have been sent from the city of Chichester, and the boroughs of Hastings, Rye, and Seaford, which towns did not contribute to the erection of the Asylum. This, although it might be done by determining the agreements under which the Patients have been received, would not meet the evil, as there are now 258 Females in

the House, which was only built for 200, though 225 may be accommodated with a slight inconvenience, and the discharge of those 20 Patients would still leave 238, all Parish Paupers. And as these Borough Patients pay a larger sum for their weekly maintenance than the ordinary Parish Paupers from the County, it would deprive the Asylum of a source of emolument which the Visitors hope may prove in future to be a considerable aid to the County funds on the Asylum account. And it would also probably render it necessary to raise the Weekly Charge to the Unions for the maintenance of their Pauper Lunatics.

The Committee have therefore considered how it would be practicable to increase the accommodation, and what would be the probable cost. And though they have not come to any conclusion as to any particular plan, they believe that accommodation for an increase of 100 Patients might be obtained for a sum of about £5,000. In this inquiry the Visitors have been assisted by the Commissioners in Lunacy, who themselves visited the Asylum, and who afterwards sent their Architect, Mr. Donaldson, to give his opinion. The consideration the Visitors have given to this subject has brought them to the conclusion that this outlay may be beneficially and economically made. During the time the Asylum has been occupied it has been successfully managed, and, from the reception of Borough and Private Patients, a sum of money beyond the cost of management and maintenance has been received; and there is now a balance in favour of the maintenance fund at the Asylum which amounts to upwards of £3,000. This sum is not available for any purpose beyond the necessary working of the Asylum in meeting the current payments of Provisions, Clothing, Salaries, Wages &c., which are obliged to be made at the

end of every Quarter, and before the Accounts are made out to the different Unions for the maintenance of their Paupers. Some time necessarily elapses before these accounts are paid to the Asylum, and unless therefore a balance were immediately available, the business of the Asylum could not be carried on.

The Visitors believe that it will not be necessary to accumulate any further balance, and they consider, if a sufficient sum were granted for the necessary increase of the Asylum, it might be done, not only without any charge to the County, but on the contrary, with some relief; as the Interest on the advance and annual repayment of a portion of the Capital, and in addition probably something in aid of repairs and improvements, could be met by the surplus or excess of the money to be received for maintenance of the Patients beyond their actual cost.

The power of doing this is placed in the discretion of the Visitors by the 6th Section of the Act passed in the last Session of Parliament c. 91, intituled, "An Act to amend the law relating to Lunatics," which contemplates the possession of a surplus arising from such a source.

The Visitors beg to lay the whole of these circumstances before the Court, and recommend that a sum not exceeding £5,000 be granted for the increase of the Asylum.

(Signed) E. SMITH BIGG, Chairman of the Committee.

REPORT

OF

THE FARM COMMITTEE,

1862.

THE Farm Committee have great pleasure in again reporting a very considerable improvement in the condition and progress of the Asylum Farm during the past Year.

The net profits of the Farm, after paying rent and taxes, amount to £340 19s. 11d., being an increase on the preceding Year of £164 0s. 10d., the net profit for the Year 1861 having been £176 19s. 1d. only.

The substitution of Lunatic for Paid Labour is continued, and has been attended with complete success.

The Committee consider it is a matter of congratulation that the success of the Farm is now secured; and they do not doubt it will continue to be a source of considerable profit and advantage to the Asylum.

The Committee cannot conclude their Report without stating they conceive the present satisfactory condition of the Farm is chiefly owing to the careful attention of the Bailiff to his duties.

On the 12th September a Female Patient committed Case of Suicide. suicide by hanging. She was seen by the Medical Superintendent within fifteen minutes of the deed, but life was extinct. This is the only suicide which has occurred during the three and a half years the Asylum has been open. It is impossible always to prevent such morbid manifestations. In England and Wales the proportion of suicides is 6.7 to Annual Number of 100,000, and in Sussex 8.9. In the 42 English County Suicides in England and Asylums there are recorded the following number of suicides Wales and in the English since the opening of the Sussex Asylum, viz. :-

Asylums.

From these figures it would appear that every fourth year should bring its case of suicide in this Asylum.

Table VI. gives the average daily employment of the Employment of Patients. Patients, together with a money statement of its value. addition to the means of employment of the Male Patients has been made during the past year by the appointment of a Basket Maker. The work thus done under his supervision has commanded a ready sale in the neighbourhood, and the Medical Superintendent has thus been enabled to employ several Patients whom he could not have entrusted with agricultural implements. He hopes that the coming year may see a further extension of these safe means of employment in the introduction of Stocking Hand-loom Weaving. Each of the existing Workshops has hitherto been a source of actual profit to the House, as shown in Table VI.a. and b., independent of their priceless value in the moral treatment of the Patients.

Patients' Amusements. The usual amusements of the Patients, as the Weekly Ball in winter; the Christmas Dinner and Dance; the Summer Walks into the Country, and Outdoor Games; together with the Annual Commemoration of the Opening of the House on the 25th of July, have been steadily carried out under the immediate charge of Mr. Knox, the Head Attendant of the Male Department, whose zeal in organizing the amusements of the Patients the Medical Superintendent desires to acknowledge.

Commemoration Day.

On the Commemoration Day the Annual Sermon was preached by the Rev. W. Hutchinson, Vicar of Ditchling. Mrs. Prosser, of Brighton, contributed a Dramatic Reading to the day's entertainment. A notice of the Year's amusements would be incomplete without an acknowledgment of the brilliant entertainment given (gratuitously) on the 27th of February by Mrs. Macready,* of Boston, U.S., in token of her interest in the Insane poor.

Visits to Patients,

The Medical Superintendent has, in many instances, permitted Patients to spend the day with their friends, an indulgence which has in no instance been abused.

Continued increase of Female Patients,

In his Third Annual Report (Christmas 1861), the Medical Superintendent observed that "the steady increase in the Female Pauper Patients, belonging to the County, is a fact which requires the early attention of the Visitors."

On the 25th December, 1859, the number of Female Pauper Patients chargeable to the County was 149. In the

^{*} Mrs. Macready, during the London Season, gave similar Readings at Willis's Rooms.

following year (1860) it rose to 202; in 1861 to 223, and to-day (December 25th, 1862) their number is 258.

To accommodate this number the superficial feet allowed Injurious by the regulations of the Commissioners for each Patient are crowding. necessarily reduced both in the day and sleeping rooms, to the probable injury of the general health of the Asylum, and to the certain discomfort of the inmates.

In thus referring to the urgent demand for increased Asylum accommodation in this County, the Medical Superintendent desires also to remind the Visitors of the difficulty and pressure under which he has for the last eighteen months conducted an establishment fitted only and organized in the first instance for the accommodation and requirements of 300 Lunatics, and now containing 500, and whose apparent limits will not be bounded by 600.

Under this head he would desire to direct attention to Deficient the rooms provided by the Architect for the several Officers tion for the and Servants of the Asylum, at any time limited and ill- Servants of the Asylum. arranged, and which are now insufficient for the requirements of the Establishment. Moreover, some extension of the Stores, of the Workshops, and of the Kitchen and Extension of the Stores Laundry Departments, will be required when the enlarge- and Work-shops. ment of the Wards takes place. The Medical Superintendent is prepared to submit plans in accordance with these requirements for the consideration of the Visitors. believes that no such plan will be complete which does not want of Cotinclude Cottages for the Married Attendants. Looking to the Attendants. past heavy demands made on the Visitors for the necessary wants of the Patients, the Medical Superintendent has hitherto forborne pressing this want on their attention. He

believes that the time has now arrived for its consideration. An inspection of the lodgings, at an average cost of 3s. 6d. per week (to be paid out of a salary of £30 a year), which the neighbourhood affords to the Married Attendants, has strongly impressed on him the urgency of this want. At present the services of able married men cannot be permanently secured to the House, owing to the costly discomfort to which their families have to submit. It needs few words to prove that the Patients suffer in a most important matter -in the tone and mental standard of their Attendants-by this state of things, or that men living in discomfort at home are little fitted to improve the mental disorder of others; and the Medical Superintendent would neglect a plain duty were he longer to refrain from urging this question on the notice of the Visitors. And specially would be herein observe the manifest want of a cottage for the comfortable accommodation of the Head Attendant of the Male Department —an Officer whose duties are of the first importance to the well-being of the Patients; and who should by every fair means be induced to regard the Asylum as his home, and its work as his vocation for life. At present this Officer has to pay £15 out of his salary of £50 for a home for his family. These wants to the more complete organization of the Asylum the Medical Superintendent respectfully submits to the wiser judgment of the Visitors.

Cottage for Head Attendant (Male Department) suggested.

Opinion of the Lord Lieutenant. The Lord Lieutenant of the County, in a conversation with which, (when a member of this Committee,) he honoured the Medical Superintendent three years ago, on this question of providing Cottages for the Married Attendants of the Asylum, expressed his strong sense of the importance of such an arrangement.

The success which has attended the trial sanctioned by the The Erection Visitors,* with the approval of the Commissioners in Lunacy, Asylums of boarding six of the quiet and convalescent Female Patients with two of the Married Attendants points to how the erection by the County of Cottages for these servants may serve the further purpose of extending the accommodation and means of classification of the Asylum. If six such Cottages were built on the estate, each with an additional room for three Economy of such a plan. Patients, the whole cost of each Cottage would be defrayed by an expenditure which the cost of finding similar room in the Asylum would alone equal; for such a Cottage could be built for £150 including fittings, while no attempt at cheap Asylum extension has hitherto provided beds in the House at a lower figure than £50 each. Of the benefit which a certain class of Patients is likely to derive from this transfer doubted to the healthier influences of home life from the Asylum Patients. Wards, the Medical Superintendent entertains no manner of doubt. Indeed he believes that the present active discussion at home and in France and Germany of this question of Cottage-asylums as a means of meeting the constant increase of Lunatics in our public Asylums, will result in its adoption on a wider and more ample scale than he has ventured, on the present occasion, to suggest to the consideration of the Visitors, or than it has yet been thought practicable.

Annexed is the Balance Sheet for the Year, audited by Annual Bathe House Committee, as also a variety of Statistical Tables lance Sheet. setting forth the medical, domestic, and financial results of the Year.

*At the General Meeting held at Haywards' Heath, September 26th, under the provisions of the 16 and 17 Vict, c. 97. s. 79.

Conclusion,

The Medical Superintendent has, in conclusion, to record his continued approval of the services of the several Officers of the Asylum, and of the general good conduct of the Attendants in the performance of their often most trying duties.

(Signed)

C. L. ROBERTSON,

Medical Superintendent.

MEDICAL SUPERINTENDENT'S FOURTH ANNUAL REPORT.

THE Medical Superintendent has the honour to submit his Fourth Fourth Annual Report to the Committee of Visitors.

Report.

On the 25th December, 1861, the numbers in the Asylum Numbers on the 25th Dec., were 228 Male, 231 Female; Total 459.

The Admissions during the year have been, Male, 59, Admissions. Female, 70; total 129.

The Discharges during the year have been 22 Male, Discharges. 25 Female; total, 47.

The Deaths during the same period have been, Male, 23, Deaths. Female, 18; total, 41.

The mean Population, resident during the year, has been Mean Annual Population.

The numbers in the Asylum to-day (December 25th, 1862), Numbers this day, are 242 Male, 258 Female; total 500.

Numerical Results of also since the Opening of the Asylum.

These several numerical facts are summed up in the first the Year and Table in the Appendix to this Report. A similar statement of the total numerical results since the opening of the Asylum, will be found in Table II.

Annual per centages.

The numerical results of the year 1862 yield the following per centages :-

- a. The recoveries (including the cases discharged relieved) are 28.7 per cent. on the admissions of the year. Excluding those cases relieved, the per centage of recoveries stands at 23.4.
- b. The mean annual mortality is 9.5 Male, 6.8 Female: total 8.1.

Sanitary condition of the House.

The general health of the House throughout the year has been very good. There has been no diarrhoa, or other zymotic disease. The entire freedom of so large a population from disease is greatly to be attributed to the extreme purity of the water, and to the proportion of Iron which it contains.

Mr. Taylor's Analysis of the Well Water.

The water of the Artesian Well was analysed during the autumn by Mr. Taylor, of the Middlesex Hospital. sembles" (he says) "in its composition some of the best samples of New River water, save that it contains a notable quantity of Iron. Like the Thames and New River water, the greater proportion of its lime is held in solution by Carbonic Acid, and of this 5.81 gr. per gallon are thrown down in the form of Carbonate of Iron when the water is boiled. With regard to the Iron contained in the water, it exists partly in a state of solution, and partly in the insoluble state,

in the form of minute floating shreds or particles. In both states, viz., the soluble and the insoluble states, the Iron is in combination with organic matter (partly as a Crenate and a Apocrenate of Iron), and as but little Iron is thrown down from the filtered water by the act of ebullition, I am induced to believe that the Iron is not held in solution by Carbonic The insoluble floating matter precisely resembles, Acid Gas. and is doubtless similar in composition to, the ochraceous looking flocculent matter so frequently to be observed in most superficial chalybeate springs. It amounts to 0.54 in the gallon." The quantity of the water continues apparently to be unlimited. When the pumps are not in operation the well overflows at the rate of 100,000 gallons per day.

The following Table, compiled from the Registrar-General's Table shew-Weekly Returns, shows the comparative purity of the Hay- ing the comparative wards' Heath Well as compared with the London water. In purity of the Haywards' composition it is very similar to the well sunk at the Warren Farm by the Directors and Guardians of the Parish of Brighton :-

Heath Well.

* "The necessity of having a plentiful supply of water, prevented the opening of the Asylum as soon as otherwise it might have been. An Artesian well, which had been sunk to the depth of 217 feet, required longer time to complete, owing to the extreme hardness of the strata, than had been anticipated." - Sussex County Lunatic Asylum. First Annual Reports, 1859.

Table shewing the Total Impurity and the Organic Impurity per Gallon in the undermentioned Water, in the Month of October, 1862.

	Total Impurity per Gallon.	Organic Impurity per Gallon.

THE CHAPLAIN'S FOURTH ANNUAL REPORT.

THE Chaplain has the honour to lay his Fourth Annual Chaplain's Report before the Committee of Visitors.

Chaplain's Fourth Report.

The remarks which he made last year are again applicable Chapel Services. with reference to the orderly and devout behaviour of the Patients, both at the Sunday and Week-day Services. By the direction of the Medical Superintendent, a large number of the refractory Female Patients have been, of late, brought to Divine Service. The experiment, with scarcely an exceptional instance, has been successful.

A considerable proportion of that class now attend regularly the Chapel Service both on Sundays and Week-days. The average approximate attendance of Patients on Sundays during the year, has been—Males 161, Females 165; both sexes 326.

The Household Evening Service is now held at 8 p.m. on Fridays. As from that hour the time of the various members of the household is, generally, at their own disposal, the attendance, though not large, is yet voluntary, and, consequently, far more satisfactory than if it were merely official.

The Chaplain continues to hold a weekly Ward Service Ward Service and other for Male Patients on Fridays. He visits the Infirmaries Ministration.

generally three times, at least, in each week, and the other wards once; and he maintains the practice of seeing selected Patients in his room on Sunday afternoons.

Classes.

The Male and Female Classes have regularly assembled. During the winter Half-year both classes meet twice in the week. The Men in the evenings of Mondays and Fridays, the Women in the afternoons of Tuesdays and Fridays. When the lengthening evenings admit of Out-door amusements, the Men attend on Fridays only; and, from July to September, both Classes are suspended. An illustrated monthly serial, entitled "Pleasant Hours," has been lately read with much interest by both Classes. The average members in attendance are about, Males 17, Females 19.

Choir.

The Choir, which labours under disadvantage from the temporary disuse of the Harmonium, meet regularly for practice on Saturday afternoons, under the direction of the Chaplain. The valuable instruction lately given by Mr. Alfred White, of Brighton, is likely to be attended by satisfactory improvement in the character of the singing in the Chapel.

The Chaplain cannot forbear from alluding, in this place, with sincere regret, to the death, in October last, of Mrs. Mortlock, who, until prevented by illness, conducted the teaching of the Choir and the instruction of the Female Class. Her general good example could hardly have failed to exercise a beneficial influence on the establishment.

Burials.

During the year 26 Burials have taken place in the Cemetery. Among the number was that of Frederick J. L'Anson, late House Porter of the Asylum.

At a Confirmation held in April, by the Bishop of the Confirmation.

Diocese, in Cuckfield Church, six female candidates, from the household, were presented, after due preparation.

The Sermon at the Morning Service of the day of the Commemoration of the opening of the Building, was preached by the Rev. Thomas Hutchinson, M.A., Vicar of Ditchling.

During the Chaplain's absence in September, the Rev. Chaplain's Absence. Edward Simms, of Lindfield, officiated as his substitute.

Frequent interesting Missionary Meetings have been held Missionary In the course of the year. In January the celebrated Orientalist, the late Rev. Dr. Joseph Wolff,—in July the Rev. G. L. Towers,—and in November the Bishop Designate of Central Africa,—addressed large audiences in the Recreation Hall. The Bishop Designate, especially, expressed himself as being highly gratified with the attention and evident interest of his hearers. The Chaplain attaches no inconsiderable importance to these Missionary Meetings, as being calculated to enlarge the range of the sympathies of those who attend them, and to furnish subjects of profitable afterthought and conversation.

The Chaplain has, on three occasions, given "Readings" Secular Lecture for the purpose of affording some entertainment to the Patients. As a practical result of his last Lecture, on the "Cotton Famine," the Committee may be interested to learn that the Officers, Artizans, Attendants, and Servants of the Establishment have agreed to forward a weekly remittance, during three months, to Blackburn, in Lancashire.

Library.

The Library has received an addition of many volumes both of a religious and secular character.

Service to Members of Asylum belonging to "Foresters."

Several of the Male Attendants, &c., having become members of the Order of Foresters, the Chaplain considered that it might exercise a good influence upon them if an opportunity were afforded of attending Divine Service on their annual Feast Day. He accordingly read Prayers and preached a Sermon to some of the members, on that occasion, in the Chapel.

Conclusion.

The foregoing remarks include the chief topics of interest within the sphere of the Chaplain's duties, which he desires to bring under the notice of the Visitors at the close of another Year.

(Signed)

HENRY HAWKINS, Chaplain.

25th Dec., 1862.
