A pleasant and compendious history of the first inventers and instituters of the most famous arts, misteries, laws, customs and manners in the whole world, together, with many other rarities and remarkable things rarely known, and never before made publick. To which is added several curious inventions, peculierly [sic] attributed to England and English-men. The whole work alphabetically digested, and very helpful to the readers of history / Licensed October 29th, 1685. R.L.S. [Anon].

The PREFACE

TO THE

READER

Eader the Work I have undertaken is great, as it is useful, a Sub-ject worthy the perusal of the Ingenious, and such a one as till now one Vollum Comprehended never: In this small Treatise you will find the Original of those Arts and Sciences which have not only made the memories, of their Inventors gratefull to Posterity, but inviched the World, and rendered Mankind more Aselebrate, such as may be termed the ain distinguish ment between us and Creatures Irrational; for as heat and moisture are the genuin products of things below; so Arts and Sciences are those that elevate our Souls and make them more refined; raise us above the common level to an improvement of that knowledge which the Divine Wisdom has implanted in us,

The Preface to the Reader.

nor were they found out and brought to perfection without a studious Industry extraordinary care and vigilence, not only of privat men, but of Kings and Princes, who finding means to retire from the grand affaires of State, brought forth Births of Ingenuety worthy the Travels of their Royal Parents, nor have the greatest Men on Earth been less proud to own and Exercise them, whose names amongst those of other Famous Inventors, you will find Recorded in the following Pages, with the time and place; digested into the most taking Method, and Alphabetically desposed the readier to be found on all ocvasions. So that, as in a Mirror may be seen by whom, when, and through what Inducements all Sciences, Arts, Crafts or Trades of Manufacture Ge. were brought out of the Gloomy recess of Un-original night, and exposed in their Perfection to the Sons of men; Sure his Spirit must be mean who is not desirous to be satisfied from whence that Occupation was derived by which he does subsist, and how from thence it has been handed down, and much Improved to bis advantage. Men are desirons greatly to know their Pedegree

HE

THE

INTRODUCTION.

Rts are the only helps towards Humane Perfection. Those therefore which are the helps towards the easiness, maturity, and perfection of Arts, deserve best of Mankind. Whence it is that God would not suffer the first devisers, so much as of Shepards Tents, of Musical Instruments, of Iron Works, to be unknown to the World: The last whereof, even Heathen Antiquitie bath in common judgment continued without much difference of Name, tell this day; although I cannot believe that any of the Heathen Gods were so ancient. Yea hence it is, that the Holy Ghost challengeth the faculty of manuary skill, to his own gift; as being too good for nature, and too meritorious of men. That Bezalell and Aholial could work curiously in Gold

and Silver, for the material Tabernacle is from Gods Spirit, and not theirs: How much more is this true in those sciences which are so Essential to the firitual House of God. I subscribe therefore to the judgment of them, that think God was the first Author of Letters, whether by the hand of Moses, as Clement of Alexandria reports from Eupolemus, or rather of the ancient Progeny of Seth, in the first World, as Josephus. Wherefore we cannot but think them worthy, that have applyed themselves wholly to adorn and garnish this mortal Life with their Inventions, and to accomplish the feeble indigence of our condition, by the diligence of their Provision: as they that have excogitated and imagined any Art whereby the Common Wealth of the World is preserved; or any other Misteries or Crasts to the maintenance, and comfort of the Body. Howbeit they are worthy to have greater commendations, that by their subtle devices have found out the Liberal Sciences, whereby the Divine and Imperial part, called the Soul of Man, is beautified: yet we may not therefore forget Writers of meaner things, but are out of duty

duty bound to make some worthy memorial of their benisits, declaring our kindness towards them; to the intent that others might be incouraged, to interprise the atchievement of like endeavours to the great aid and preferment of the Common wealth, considering that such devices shall be Registred to perpetual fame and renown, and to the profit of many, and ease of all men, it were therefore in my Opinion both a point of detestable unkindness, and a part of extream inhumanity, to defraud them of their praise and perpetual memory, that were Authors of so great a benisit to the universal World. In consideration for the further compleating of our English Touth, I was moved to take in hand, to draw into a brief and easie Alphabetical Table, what I have in my Reading found copiously gathered together, without any Such method, in several Authors of the first inventors of such arts as are never to be forgotten.

invited to a Noble Mans House called Scopa, it chanced that he was fent to speak with two young men at the Gate, when immediately the Banquering-House fell, and destroyed all the Guess. Then he, because he remembred in what order and place ever; one fate, delivered every one his Friend to be Buried, by which he perceived the order of the Art of Memozp. Cyrus King of Persia, excelled in Memory, who could call every Man in his Army by his Name. Cyrus the Embassador of Pyrrhus, the day after he came to Rome, faluted every order of Nobles by their proper Names. Mithridates could speak Twenty-two Languages. Julius Ceaser could read, endite, and hear a Tale at the same time.

Altrology, the occasion of the inventing of this Art was, that in it Learned men through their observation of the Celestial Bodies, wherein the whole moveable course of the Heavens, the rifing, going down, and order of the Planets might be comprehended. Some put the invention of this Art on the Agyptians, others on Mer-

Mercury, but Fosephus concludes, that Abraham instructed them and the Chid: dees in it, and thence it came into Greece, as Phericides, Pythagoras, Thales acknowledges, that they were Difciples to the Egyptians. Pliny will have Atlas to be the first Founder or contriver of it, which occasioned the Poets to feign that he beareth Heaven upon his Back. Sernius would have Promethem to find it out. Nevertheless all these (as I suppose) were the beginners of this faculty, every man in his own Countrey where he dwelled: for even from the beginning of the World, the Sons of Seth devised first the science of the Stars, and for as much as they feared least their Art should perish, before it came to the Knowledge of men (for they had heard their Grand-Father Adam fay, that all things should be destroyed by the Univerfal Flood) they made two Pillars, one of Stone, the other of Brick, to the intent that if the Brick wasted with Water or Storms, yet the Stone should preserve the Letters whole and perfect, and in their Pillars they Graved

ved all that concerned the Observation of the Stars. And therefore 'tis probable that the Agyptians and Caldees learned Astrology of the Hebrews, and so consequently, it spread it self amongst other Nations. Endimion was the first that found out the course of the Moon, the reason of her being Eclipsed, Pythagoras observed the course of Venus. Archimedes found the

nse of the Sphere.

Alchimiaor Alchimp, signisieth infusion or steeping; for Chimia in Greek, denotes Infused. There is a great controversie when Alchimy was invented: For neither Pliny (though he was otherwise a most diligent Author) nor any Greek or Latine Author make any mention of it, but I believe that it is very ancient; for Suidas writeth that the Art of Alchimy endured till the time of the Argonantes, when Jason went to take away the Golden Fleece; which was nothing else than a certain Book that taught to turn other Mettals into Gold: for those that invented that story, conceating its name invented the: B 5

the Golden Fleece. The Agyptians professed this Art very much, in the Reign of the Emperour Dioclesian, who hating them because they made an infurrection, Burned their Writings concerning their destilling of Gold and Silver, least (as he feared) they being made Rich by this Art, and having gotten good store of Wealth, they should Rebell againe. The Emperour Dioclesian was Created in the year 287; so that this Art was rather re-

newed than new.

The Authors of the first Pames of Countreps, were, some of the most eminent of them, as followeth, Arphaxad was the first Founder of the Arabians. Lud of the Lidians: of the Children of Cham were Chus, that named the Æthiopians; and Mesre the beginner of the Agyptians. Changan of whom the Cananites had their name: The Linnage of Chus was Seba, whereof the Sebees came; and Evila of whom came the Evilites. And in the like manner we must believe, that of them came all other Nations and People of the World, which are now encreased, that

that they can fcarcely be numbred. Of or from the Aire Anaximenes supposeth all things to have had their beginning. Metrodorus affirmeth the Universal World to be Eternal, without beginning or end. Epicurus one of Democritus Disciples, putteth two causes Attomes, or Motes, and vacuity and. emptiness, of these he saith the four Elements come. These are the Opinions of the Phylosophers that were men without the knowledge of God: But (as Moses and Josephus record) the Scripture concludeth, that in the ginning God made all things of nothing; as St. John faith, all things were made by him. And therefore (as Lactantius writeth) let no man be curious in fearthing, of what material God made these great and wonderful Works, for he Formed them all of nothing, by the power of his mighty Word. Of the same Opnion is Plato in his Book called Timeus:

were certain places, as Scaffolds with Pentifes, wherein the People of Athens food to behold the Enterludes that were

were shewed: and they were made like half a Circle, with Benches one above another, that they might without any impediment see the Playes; Dionysius did first institute them in Athens: in the midst of the Scaffold or Theatre stood the Stage, wherein Comedies, Tragedies, with other Shews were exhebited to the common fort. Of whom the Romans took example, to make fuch Scaffolds. Cains Curio, at his Fathers Burial, Builded two Theatres of Timber after such a fashion, that they might in time of Enterludes stand one contrary to another; in such wise that neither Play should disturb one the other: And when it pleased him he turned them together, and made an Amphitheatre, which was a round Scaffold full of Benches of divers heights; wherein he set forth a Game of Sword Players. Cains Julius Colsar Builded the first Amphitheatre in the Field consecrated to Mars; In which were fet forth shews of Wild Beasts, and Sword Players, for the custome was that such as. were condemned to Dye, or taken Prifoners in War, should be cast there to the

flain. It was strewed with Sand, least the Blood of those which were slain should defile them that fought, or discourage them: and therefore, there were certain appointed for to toss and strew about the Sand.

Books, which contain the monuments of ingenious Wits, and a Register of all valiant Prowess, as Laertius expresses, were first published at Greece. Gellius saith is was Pistratus that made the first Book, and exhibited it to be Read openly. But Josephus writes that it was the Hebrews and Priests of Egypt and Chaldee that first set them forth. The Athenians multiplyed the number of Books, which Xerxes carried from thence into Persia; and Seleucus King of Macedony caused them (many

years after) to be conveyed to Athens again, after that Ptolomeus King of Egypt collected together 70000. Books, which were all Burnt at the

Battle of Alexandria.

Tell Building, men at the first lived like wild Beasts, in Caves, and also Fed on Fruits and Roots of the Earth: but after they perceived the necessary use of Fire against the vehement extreamity of cold: some began to edifie Cottages of Boughs and Trees, and some digged Caves in the Mountains, and by often experiencing such means, they attained to a greater perfection in Building with Walls, that they did get up with long Props, and did wind them about with small Rods, and so daubed them: and to keep out the Storms, they covered them with Reeds, Boughs or Fen-fedges,. -Thus. in process of time they came to the Art of Building, which as Diodorus faith, is ascribed to Pallas: But we are rather to believe, that either Cain or Jubal, the Son of Lamech, found out this Art.

Bells

Bells came first from the Hebrews, where the High Priest or Bishop had in the skirts of his uppermost Vestments little Bells to Ring, when he was in the Holy place within the Vaile.

Banquets and delicate Diffes, were begun in Jonia, and after that Gluttonous custome was taken up in other Countreys; though that there were Laws made in Lacedemonia by Lycurgus, and in Rome by Faunius, for the abolishing of such excessive Feasting. But I could wish there were some good Law prescribed for good Hospitality: For I believe there was never so little as is in these times.

Baths, of which those that were hot, were used first privately of all men, according to their degree and ability, for the preservation of their Health: but in process of time they builded common Baths and Hot-houses for to Sweat in; and the Noble did Bath and Wash with the Common; and at last men and women were permitted most Laciviously to Bath together. Most notable Baths were they

Fondage or Slavery, I find that it began amongst the Hebrews, and had its Original proceeding of Canaan the Son of Cham; who, because he had Laughed his Father Noah to scorn, as he lay dissolately when he was Drunk, was punished in his Son Canaan with Bondage and Thraldome. The order of Manumission in old time was in this manner: The Lord or Master took the Bondman by the head, or some other part of his Body, faying, I will this Fellow be-free, and so dismissed him. Pliny was of opinion, that Bondage began in Lacedemonia.

Barbers, to shave and round, were instituted by the Abantos, because their Enemies in War should have no occasion to pluck them by the Hair. P.Ticinius Mena brought them into Rome the 354th year after the Building of the City, before they were unshaven.

C

Coln, of what Mettle foever it was made (as appears by Fosephus) is very ancient; and Cain the Son of Adam was very covetous in gathering together Money. Herodorus affirmeth that the Lydians first Coined Silver and Gold to buy and sell with. For before the Seige of Troy, as Homer sings, men used to change one Commodity for another. Yet in the time of Abraham there was Money currant, for he bougt the Cave to Bury his Wife Sarah of the Hittie, Ephron, for 40 Shekels of Silver which was before the Seige of Troy many years.

Writeth, was first invented by Badalus with these following Tools, the Saw, the Axe and Plumline, whereby the evenness of the squares are tryed, the Augore or Wimble, the Square, the Line, the Shaving-Plain, the Pricker or Punch, were devised by Theodore a

Samian; Ovid writeth, that Talus, Dadalus Sisters Son invented the Compass, and Fashioned the Saw in imitation of the Back-bone of a Fish; but Dadalus envying that a Boy being his Apprentice, should excell his Master, cast him down out of a Tower (as Ovid writes) and slew him. Pythagoras a Samian, devised another manner of Rule then this that we commonly use, fit for all manner of Buildings, as Victrnuius declaireth in his 9th Book of Archetecture. Though in my judgment the invention of this Art ought rather to be referred either to the Hebrews which used such Arts before Dadalus time, and more especially in the curious Building of the Tabernacle; or else to the Tyrians who were reputed in this mistery to have excelled the Hebrews. For which cause Solomon wrote to the King of Tyre for Work-men to Build the Temple.

The Common-wealths adminifiration, was after three several ways, as Plato divideth it; Monarchy, where one Ruleth. Aristocracy, where the most eminent Persons Govern. De-

mocracy.

mocracy, or Popular State, where the common People have a stroke in Ruling of the Publick-weale. Principality or Regal Government was first begun by the Agyptians, who could not long fubfift without aKing or headRuler: There Reign:d first as Herodotus writes, Menes; and their manner was to choose him amongst the Priests of their Religion: and if it Fortuned that any stranger obtained the Relme by conquest, he was compelled to be confecrated a Prieft, and fo was the Election Legitimate, when he was King and Prieft. The Diadem which was the token of the Honour Royal. had its first institution from Libes Bacchus. The Athenians ordained the state of a Common-wealth, that was Governed by the whole Commons as Pliny writes, although they also had Kings, whereof Decrops Diphyes which Reigned in Moses time, was the first. For as Justine writes, every City and Nation had at the first a King for their chief Governour; which attained to that dignity by no Ambition or Favour, but by his fingular defert. As concern-

Touncils, the custome of assembling of them, to take deliberation of things doubtful, or of serious Affairs, are of great Antiquity, as well amongst the Hebrews as other Nations: They either called for Humane or Divine Affairs, for the latter, by such a manner of Council Matthias surrogated and substituted in the Stead of Judas, into the number of the Apostles. And by Council holden at Ferufalem, the Apostiles discharged the Gentiles of Moses Law. Cornelius was the first, that called together any Council; and that was in Rome, of 600 Bishops and as many Priests, with a great multitude of Deacons.

Thains, or the manner of the driving Evil Spirits out of Persons that were possessed with them, King Solomon taught, as Josephus witnesseth, and he saw it done by Eleazar in his

time,

time, before Vespation the then Emper- Die our, writ the manner of Healing them.

Consuls in Rome took their beginning from the Banishment of Tarquinius, for the horrid Crime and notorious Rape of Lucretia, committed by his Son Junius Brutus, and Lucius Targuinius Collatinus were the two first that had the Name and Title of Confuls, of the confultation and the provision that they made for the Common-wealth. They rul'd the Empire, conducted Armies; and by these Officers because they were annual, the year was counted.

The Chattering of Birds, was first observed by Caras. The Divinations by looking on their Feeding, was devised by Theresius a Theban, and Pythagoras understood the mistery of

their flights.

Chrustal is a stone that is congealed of pure Waters, not with cold but by a power of Divine heat, whereby it doth retain its hardness, and never giveth again or melteth, but receiveth divers colours, this is the opinion of

or T

with Silver or Golden Leaves, and full consequently there were invented several forts of Crowns, as the Triumphant Crown, that the Emperour or first grand Commander ware in his Triumph; this was first made of Olive, and afterwards of Gold. The Murall and Wall Crown, that was given to him that first scaled the Walls. The Camp Crown, that was the reward of him that first adventured Valiantly into the Camp of his Enimies. The Navall or Sea Crown, that was fet on his Head, that first Boarded his Enimies Ship. And all these were of Gold. The Obsidional Crown, that was worn of him that delivered a City Beseiged, it was composed of Grass. There was also a Civill Crown, which was a Sovereignty which a Citizen gave to him, that had valiantly preserved him from his Enemies; this was made of Oken Branches. And this manner of Crown the Athenians did first devise, and gave it to Pericles. There were moreover Crowns of Pearls, French Crowns, and Garlands composed of the Ears of Corn, which as Pliny writeth, were first

first in use amongst the Romans, Garlands made of Cinnamon, Woven and Embossed with Gold; Vespasian did first consecrate in the Capitoll, in the Ti. Temple of Peace. In some space of Olive, time, the excess of Crowns grew to be Miral fuch, that the Grecians in their Banohim quets, Crowned both their Heads and Camp their Cups also, whereof the Jonians him were Authors. Pliny writes that with to the one of these sorts of Crowns, Cleopaall or tria empoisoned Amonie. And Artax-Head, erxes is also said to have used Crowns

Ship. of Garlands in his Feasts.

Brit

ell. Citties, the occasion of Building him of them is thus reported. For when men, as is said before, had gathered alloa themselves into several Cottages, they reign-lived in distinct Houses, which made that them begin to think of gathering mhis wealth for the support of their Fami-Oken lies. But seeing themselves daily robrown ed and spoil'd by those that were gave stronger, they were forced to joyn cover themselves together in a Company, and and to dwell within a certain compass of of ground, which they either Walled, were or Trenched about. Afterwards it is

faid that Cecrops built Athens, and by his own name called it Cecrepia. Phoroneus built Argos, though the Agyptians affirm that Diopspolis was long be-Trason first made Walls and fore. Towers. But Fosephus fays that Cain was the first that built a City, and called it Enochia, after the name of his Son Enoch; and after the dayes of Noah by the advice of Nimrod, there were certain men that built a very high Tower, which was called Babel. Tents were invented by Jabal the Son of Lamech. Among the Phenicians they were found out by Seculus. Houses of Clay were first invented by Doxins the Son of Gellius, who took his example from the Swallows Nests. Brick building was invented by Eurialus and Hyperbolus brethren at Athens, though others attribute it to Resta the Daughter of Saturn. Tile and Slate were the invention of Synarus of Agriopa in the Isle of Quarries were invented by Cyprus. Cadmus in Thebes: But the invention of fuch Arts is more fitly thought to be referred to Cain, or the posterity of Seth, who made two pillars, one of Brick,

reckoned to be of two forts; the one Natural, the other Artificial, Natural, is that which is occasioned by a natural commotion or Airring of the mind, which happens fometimes to men when they are afleep; fometimes by a kind of fury or rapture of the mind, as it was with the Sybils; of the same nature were the oracles of Appollo and Jupiter Hammon. Artificial those which proceed from conjectures, old confiderations and observance of the entrails of Beasts, flying of Birds, casting of Lots, Gr. The inspection of the Bowels of Beasts was invented by the Hetrurians, which chanced thus. It happened that a man going to Plow, chanced to raise up a deeperFurrow then he was wont to do: One Tages upon a sudden arose out of the Earth, that taught them all the misteries of Sooth-saying. Divination by looking on Birds was found out by Tiresias the Theban. Orpheus added Divination by other Beasts. Numerius Suffusius was the first that invented the casting of Lots. Areams,

them, Pliny ascribes to Amphichon. But Trogus assigns it to Foseph Son to Facob. Element writes that the Telmesians were the first interpreters of it, 'tis no great matter who were; for the little credit that is to be given to them.

Dedication of Churches is of great antiquity: For Moses did fanctifie the Tabernacle; and Solomon confecrated the Temple that he builded at Ferusalem. And Esdrus after, when they return'd from the captivity of Babilon, new hallowed the Temple again. From them we receive our Rite of dedicating of Churches. I cannot be so positive as to write certainly, where the first Church of the Christians was built, but by all conjectures, it was edified by the Apostles in Athiopia, where St. Matheno Preached; or in the lower India, where St. Bartholmew taught; or in Scythia where St. Andrew Preach'd the Word of God, where they doubtless either caused new Churches to be edified, or else transposed the Idols of the C 4 Temples.

The

Temples, abolishing superstition, and Planting the true Religion of Jesus Christ. Although it is not against reason to suppose there was a Temple or House of Prayer appointed by St. James at Jerusalem. In Rome the first that I Read of, was confecrated by Pius Bishop of Rome, in the Street called Patricius, at Novatus Baths, in honour of the Virgin Prudentia, at the request of Praredis her Sister. And after Calitus built a Temple to the Virgin Mary, in a place beyond Tyberis, and instituted a Church-Yard in Appius-Street.

Wedlock was not so sincerely and reverently observed of the Romans; which although it be an occasion that Women should more earnestly keep their chastity, yet our Religion doth scarcely permit it. One Spurius Servilius, the year after the City of Rome was Founded 522. (Marcus Pomponius, and Cain Papyrius being Consuls) first sued a divorce from his Wife, because she was Barren: For which Fact, although he affirmed openly before the

the Cenfors that he did it only because he would have iffue, yet was he for it scandalized and evil spoken of, by the common People. This decree of divorcing was taken out of the Laws of Moses, which made the first constitution of that Statute; yet was there this. difference. For by Moses it was only Lawful for the Husband to forfake his. Wife; but the Romans decree gave

them both like liberty.

Thats was first found out by a Milesian amongst the Lacedemonians, which declaired the hours by the shaddow of the Hand. It was a good while ere that they were used in Rome; but in the twelve Tables, there was only rehearfed the rifing and going down of the Sun; and a few years after, Noon or Mid-day was found. And this was only on clear days, when they might perceive the course and altitude of the Sun. The first Dyall was set up on a Pillar openly, which stood behind the common Pulpit, or Barre, called Rostra, at the charge of Valerius Messala,, then Conful in the first Punick Battle. The water Dyall was first used in Rome CS

Junerals, or the manner and rices of Burials in feveral Countreys, were of fundry and various Fashions: as the Massegetes and Derbians, judged them that dyed in Sickness to have been very wretches; and therefore when their Parents and Kindred were Aged, they strangled them and Eat them, fuppoling that it was better that they should devour them than the Wormes in the Earth. The Alban's that dwelt by the Mount Cancasus, took it for 2 mortal crime, once to name those that were departed. The Thracians kept folemnly the Funerals of the Dead Corps of men, with great joy and folace, for that they were discharged by Death from humane miseries, and rest in eternal Felicity; and contrariwise at the Birth of their Children they expressed great forrow and lamentation, because of the calamities that they must sustain in this miserable Life. The Women in Judia, take it for a great honour and triumph to be Buried with their Husbands, which priviledge is granted to her that loves him best. There are other divers manners of Burying

rying amongst the Pagans and Heathens, which forasmuch as they exceed the bounds of humanity, and have in them no hope of a Resurrection, I shall here omit. The Romans, because theDeadCorps that were killed in Battel, were after their buryal digged out of the ground; instituted the manner of burning the carcasses of men departed; which rite was Executed on Sylla, chief of all the Honse and Kindred of the Cornelians, who feared least he should be served as he had used Marius. They had also in Rome a manner of defying or hollowing of their Emperours bodies, after this manner: when the Emperour was dead, and his body reverently buried, with great exequies, they Formed an Image of the Emperour, pale, as though he was fick, and layed it at the Gate of the Pallace, in a bed of Ivory; and the Physicians reforted thither to the bed fix days continually: the Lords of the Senate, and Noble Ladies and Matrons standing on every fide of the bed. The feventh day the young Lords and Nobility, bare him on their Shoulders in the bed, firk

first into the old place of Judgments, called Forum Vetus, and then into the Field, called Campus Martius, where ave in they chose their Magistrates and high on, I ecause Officers, where they layed him in a o Bat-Tent built for the fame purpose, like a Tower, and filled it with dry Wood and sweet Oyntments, and after they had finished the Rites and Ceremonies of their Law, he that should succeed inthe Empire, put a Fire-brand to the Tent, and then others did the like. And after all was burned they let fly an Eagle out of the top of the Turret, which, as they supposed carried the Soul of the Emperour to Heaven, and from thenceforth they honoured him as a God. Commendations to the honour of the dead bodies at Funerals, Valerius Publicolia first made in praise of Brutus, and that was long before the Greeks had any, notwithstanding Gelliw writeth that Solon ordained that Law in Athens, in the time of Tarquivius Priscus. The Romans used to praise the Women at their Burials, because they were once contented to give their Golden Jewels to make a Boule to fend

to.

to Delphus, to the God Appollo. Honatius the Poet and Servius write, that the Romans used customably after a Burial, to renew the Sacrifices and Solemn Rites of the Funeral, which they named in Latine, Novem Diales. The Massilians in France passed and spent the day of their Burials, with private Oblations and Feaftings of their Kindred, without any manner of Lamentation or Sorrow. In Burials the old Rite was, that the dead Corps was bourn before, and the People followed after, as one should say, we must all dye, and follow after him, as their last words to the course did express. For they used to say, when it was Buried, these words, Farewell, we shall come after thee: and of the following of the multitude, they were called Exfequies. Although used at Kings and Noblemens Funerals, to go before with Tapers and Torches, which custome we keep still.

G

RACE, or the Hollowing of the Tableand Meat is derived and was begun from the imitation of our Saviour Christ, when he used the same way of fanctifiing of the five Loaves in the Wilderness, and at Emaus also, where he did consecrate the Table in the presence of his Disciples: So was likewise he form of faying Grace after Supper, taken from that custome which Christ commonly kept at his Suppers. The manner to Read a part of the Bible before or after Dinner time or Supper, hath also been of a long continuance, and did prooceed from the Godly Doctrine that Christ instructed his Disciples in, at all times, but chiefly at his last Supper, wherein he Treated of the Mi-Iteries of our Religion. From whence our Fathers, to keep in memory fuch a wholesome institution, did introduce duce this manner of Reading the Scrip-

ture before or after Meat.

were ordained by Iginius Bishop of Rome, for to be witnesses of the Sacrament of Baptisme that it was received.

Dood and bad Angels, according to the Ancient received opinion, are not only to every man, but also to every fingular place and Family, were allotted two Angels, by some called the Borus vel malus Genius; whereof the one went about to endamage Mortals, the other with all its endeavour, studied to do them good. These are faid to invade particularly every Family, to convey themselves into humane Bodies, to imbezell and destroy their Health, to procure Diseases, to their Hearts with Pannical and Phantastical Visions and horrid Dreams.

Etaumat, next the invention of Letters ordinarily succeeds, both because it is the Foundation and Ground whereon all other Sciences rest, and for as much as it taketh the name of

Let-

Letters; for Gramma in Greek signiieth a Letter in English. Grammar is in Art that doth confift in Speaking ind Writing without Fault or Errour, o that every Word have his due Letreceiers, and as Quintilian determineth, s devided into two parts, the way to peak congruously, and declairing of oets; as Tully writeth, there is reuired in a Grammarian the dedication Were if Poets, the knowledge of Histories, he exposition of Words, and a cerain utterance of Pronounciaiton. Mor Frammar took its beginning from narking and observing what was most it and unfit in communication, which hing men counterfeiting in their peech, from thence this Art took its fife, even as Rhetorick was perceied; For it is the duty both of the Frammarians and Orators to have a reard and respect how to speak. Hernipus faith that Epicurus first taught the ion of Grammar, and Plato espyed and the perceived first the commodity and prot of it. In Rome it was nothing steemed till one Crates Malotes was ned ent by King Attalus to teach it betweeu

Let

tween the fecond and third Battels of the Punicks, a little before the death of Eunius the Poet. It is of all other Sciences the most useful, for it sheweth a way to attain all the rest of the liberal Sciences. Neither can any man come to attain to any eacellency in any Art, unless he have first his principles of Grammer, perfectly known, well digested and throughly perceived. Therefore in old time ertai Grammarians were called Judges and allowers of all other writers, and for that cause they were called Critici. In this Art excellent Didymus, and Antonius Enipho, unto whose School Marcus Cicero resorted divers times after his affaires in the Law were ended: Nigidius, Figulus, Marcus Varro, Marous Valerius Probus, and the arrogant Palemon, with many others of the covere Greeks, of which Aristarchus, Aristotle, percei and Theodoces were the chief.

Greek old Letters. were the fame that the Romans use now, as Pliny conjectureth by a certain Brass table that came from Delphos, which was dedicated and hanged up in a Library in the

Temple

OUL

orter

emple of Minerua at Rome in his time. hey were brought into Italy by Evanr, and the Arcadians which came in-Italy to Inhabit there; of the Greans Xenophon, Thucidedes,, Herodotus,

beopompus, flourished most in writing istories.

Sting, which of all other Instruents of War have been most destructed to Man-kind, were invented by a creatin Almain, whose name is not nown, he found them out after this nd for nanner: it chanced that he had in a lorter, powder of Brimstone that he Anto ad beaten for a Medicine, and cover-Mar 1 it with a stone, and as he struck ire, it Fortuned that a spark fell inthe powder: suddenly there arose great flame out of the Morter, and Maria fred up the stone wherewith it was of the overed, a great height: which he erceiving, he made a Pipe of Iron, nd tempered the Powder, and so finishthis deadly Devilish Engine, and aught the Venetians the use of it, when ney Warred at Candius Dyke against edica ne Genvates, which was in the year four Lord 1380. For this invention he

rempl

he received this benifit, that his Name was never known, least he might for this Abominable device, have beer wars evil spoken off and cursed, whilst the ward world lasts.

to have first invented. This Art con-a hor taineth the description of Lengths, is was Breadths, Shapes and Quantities. In this knowledge Strabo excelled, in the meetime of Tiberius and Ptolomie. In the bank time of Trajan and Antoninas Measures and Weights were found out by Sydo-me, nius, about that time Procus Reigned in Internal Alba, Aza in Israel, and Feroboam in Israel, ferusalem.

mongst the Greeks were the Olym-Agor piads, which were kept every fisch from year in the Mount Olympus, and in-wole stituted by Hercules in the honour four of Jupiter. In this Game Corylus and Arcadian won the first prize; though some others say Herculus was the first that was won it: there was Wrastling, Run-green ning with Horses, and on Foot, Journalist nying, Leaping, Coursing with Charlest riots, the contention of Poets, Rheto-with

ricians

Name cians, disputations of Phylosophers. ht for he manner was there to proclaim been Vars, and enter Leagues of Peace; Athere reward of the Victor was a Garnd of Olives. The fecond Shews loried ere those called Pythia, which were ton I honour of Apollo, in memorial of gths, is vanquishing of the great Dragon s in ytho, that was fent by Juno to persein the ite his Mother Latona. The third In the same was the Isthiny, devised by Theafures us in the worship of his Father Nep-Side ine, environed with a dark Wood of ed in irch Trees, they that won the Victohad a Garland of Pine Tree. The burth was the Nemei, named of the em a orrest of Nemea: This Feast those of Olym Irgos kept folemnly in reverence of fill lercules that slew the mighty Lyon, in those Skin he wore for a Coat of Aronour lour. Pyrrhus Dance, was a Dance an nat the Lacedemonians practifed with outh, as foon as they came to be five that ears of Age, as a prepairation to Run reater affairs in War. It was first four. aftituted in Creet by one of the Sybills Charriefts; they Danced in Armour, and ith Weapons on Horse-back. Naked cians

ked Games were invented by Lycaon Hers. Funeral Playes by Acastus, Wrestling by Merany, Dice, Tables, Tennis and and Cards were found out by the Lidi wher ans, a people in Asia, and began nei and s ther for Gain nor Pleasure, but forther the good of the Common-wealth For there being a very great Dearth Care and want of Provision in the Countrey fo that the people having not enough to supply their necessities, were forced one day to take their Meat moderately, and another day by course they apply. ed themselves to such sports, to drive away the tediousness of the Famine Cheffe was invented in the year 3635 by a certain wife Man named Xerxes. to shew to a Tyrant that Majesty and Authority without strength and assistance, without the help of Men and Subjects, was casuall to many calamities. There is a Game also that is play'd with the Postem-bone of the hinder Foot of a Sheep, Goat, Fallow or a Red Dear, it hath four chances, the Ace-point, and he that cast that, laid down a Penny, or as much as was concluded by the Gamefters,

(43)

ters, the other side was called Vetus, resulting and he that threw it won Six, or as nd he that threw it won Six, or as such as was laid down before; the ther two fides were called Chius nd Senio, he that threw Chius was hree, and he that threw Senior was our. Some ascribe the finding out f Cards and Chessa to Palamades.

JERBS, doubtless Nature, the Mother and Governess of all things (as faith a Learned Author) did produce Herbs, as may appear by many examples, partly for the delection, and partly for the health and preservations of Men's Bodies. Axanthus an Histiographer (as Pliny recordeth, writes how a Dragon revived his young Faun that was flain, by vertue of an Herb called Balin: and the Hechewall tis reported of her, if a Wedge be driven into the hole of her Nest, (for she maketh her-Nest in the hollow or hole of a Tree, that she worketh with her Beake, till she makes it fall out, with an Herb that she geteth for that purpose: &tis not to be difputed but that some of the Indians at this day, live only by Herbs. Appianus writeth that the Parthians, which AnAnthony put to flight, constrained by extream Famine; they chanced to sat a certain Herb, whose nature was to make them that eat it to forget all other things, and only to dig up stones, as if they would do some great matters; but after some extream Lapour they dyed. Though we acknowed edge an inexpressible virtue to be in them Herbs: not to discourse further of such trange or wonderful stories, we shall only express that most Authors agree that Chyron Son to Saturnus, was the irst inventer of such Medicines, as were made with Herbs.

n, by low in use, according to St. Hierom's pinion, were invented and devised by is a Sdras: For before that time the Heroscher rews and the Samant's used all one

eff in Characters.

As

The harp, It is said to have been ound by Mercury; who as he walked y the River Nylus, after an Ebb, he ound a Tortoise all withered, and nohing remaining but the Sinnews; which as he fortuned to strike on hem, made a certain sound: after the D form

form of which, he fashioned a Harp, and according to the three times of the years, Summer, Winter, and Spring, he put to it three strings, a Treble, a This Instrument Base, and a Mean. he gave to Appollo, and Appollo delivered it to Orpheus: some think Amphion found it. I find that the Harp hath feven strings, to resemble the feven Daughters of Atlas; whereof Mara, Mercury his Mother, was one. And then after that, were the other two added to represent the nine Muses. Some referr the Original of the Harp and Pipe to Appollo, for his Image in Delos (as they write) had in the right Hand a Bow, & in the left the Goddesses of Favour, whereof one had a Harp, another a Shalume, the third a Pipe.

the Egyptians by Dionysias, amongst the Greeks by Triptolemus, In Italy by Saturn, though Virgil will have Ceres to be the first inventer of it; Pilulnus taught them to Bake and Grind, Triptolemus and Briges the Athenian, were the inventers of the Plough; and Dionisius was the first that Yoaked Oxen to draw it. menu

ments of Husbandry were first invented by Ceres. Wine was found out by Dionisius, for he is said first to perceive the Nature of the Wine, and that he taught men how to make use of it, and to press the Wine out of the Grape. Others fay that Icarius the Father of Penelope found it out first in Athens, who was afterwards flain by the Husbandmen when they were Drunk. Dencalion first found out the Wine above Mount Aina in Sicilie. Aruntus a Tyrant being Banished out of his Countrey by Lucimon, whom he had bred up of a Child, carried Wine first into France. Wine Taverns were first set up by the Lydians, a People of Asia. Stopbilus was the first that informed men to mingle Wine with Water: Ale is faid also to have been invented by Bacchus, who taught it to the Northern Nations, to Supply the want of Wine. In Greece Pallas found out the Olive, and the way of making Oyl. Aristem gathered the Curds of Milk, and made Cheefe: he found out the way also of making Honey. Cherry Trees were brought out of Pontius D 2

by Lucullus, the year of the City 680 Zizipha and Tuberes, two kinds of Apple Trees St. Papinins conveyed out of Syria and Affrick, into Italy in the time

of Augustus.

Hillogies of all other writings, are the most commendable, because they inform all forts of People, with notable examples of living, and do excite those that are Noble to pursue such heroical enterprises, as they read to have been done by their Ancestors; and alfo they do discourage and Lame wicked Persons from attempting any hainous deeds or crime, knowing, that fuch acts shall be registred in perpetual memory, to the honour or infamy of the doers, according to the defert or undefert of their endeavours. Pliny Says that Cadmus Milesius first writ Histories amongst the Grecians, which contain the Actions of Cyrus King of Persia. Albeit Josephus supposeth it to be probable, that Histories were begun by the old writers of the Hebrews; as in the time of Moses, who wrote the Lives of many of the most ancient He= brews, and the Creation of the World:

IRON and BRAS (as Strabo writes)a certain People named Thelchines first wrought on. The Smiths Forge some think the Calybians found, and some suppose they were the Cyclops Vulcans Smugs, which first used the Smiths craft. Diodorus is of opinion, that the Iclei Dastyli and Vulcan were the first inventers of Iron, and of all Mettalls that are wrought with the Fire. Sothering of Iron Glancus found. as I take it, that all these before named, found the use of such things in their own Countries. For tis not to be questioned but that the use of all such Mettalls was perceived in the beginning of the World by Tubal-cain which was Son to Lamech, expert and exercifed in the Smiths craft. Clement referreth the tempering of Iron to The Delas.

The institution of the Anointing of Kings and Priests, was to lignify, that they were espe ially favoured of God, and like as Oyl lyeth aloft in the Water, or other Liquor, so the Office of a Priest, and Dignity of a Prince, furmounts all other degrees of Ministers, both in the active and alfo contemplative life. When Moses had builded the Tabernacle, he was commanded to make a confection of holy Oyntment, wherewith both the work and Vessels of Priests, and also of Kings, which were called to that Office or Dignity, ought to be Anointed: so that it came to pass, that the Anointing was the very token and difference, whereby Kings were known amongst the Hebrews, as the Emperours in Rome were known by their Purple Robes. Auron and his Sons were the first Anointed Priests; and Samuel Anointed Saul first King over Israel, and fo consequently it grew into a custome that Priests and Kings were Anointed.

L

He Lam is a constant and perpetual good thing, without which no House, no Citty, no Countrey, no Estates of Men, no Natural Creature, nor the World it felf, can confift firm and stable: For it obeyeth God; and all other things, Aire, Water, Land, and Men, are in obedience to it. Chrysippus calleth it a knowledge of all Divine and Humane Affairs, commanding equity, and expulling wickedness and wrong. There are of Laws three one Natural, that is not kinds: only appropriated to man, also it concerneth all other living things either in the Earth, Sea, or Aire; as we perceive in all kinds of living Creatures, naturally a certain familiarity of Male and Female, procreation of Kind, and a proclinity to nourish

nourish the same; the which proceedeth from a Natural Law engrafted in them: Nature her felf, that is God was the Author of this. The fecond is Named the Law which all men use generally throughout the World; as to shew a man the way, to communicate to men the commodity of the Elements, Water and Aire; to this kind appertaineth the Law of Armes; and it is called in Latine Ius Gentium. Civil Law is of every Country or Citty, as of the Romans, Lacedemonians, Athenians, &c. This consisteth in decrees of Princes, Statutes, and Proclamations. The chief and principal Laws were promulgate by God, confirmed after the most pure and perfect manner, stable, constant, and subject to no transmutation. After the example of these, Man hath invented Laws to defend and preserve good men, and to punish and keep wicked Persons in good Order. Such Laws Ceres made first, as Diodorus writes: but others suppose it to be Rhadamantus; and afterwards others in divers Countreys devised and ordained Laws: as in Asbens DS

Athens, Draco and Solon, in Agypt Mercury, in Creet Minos, in Lacedemonia curgus, in Tyre Tharandus, in Argos Phoroneus, in Rome Romulus, in Iltaly Pythageras; or after the mind of Dionisius, the Arcadians that were under Evander as their Soveraign Lord and chief Captain. Notwithstanding the very true Author of Laws is God, which (as hath been faid) first planted in us the Law of Nature; and when it was corrupted by Adam and his posterity, he gave the Written Law by Moses to reduce us again to our first state and true instinct of Nature, which was before all other, as Ensebius declaireth.

Lotts, the casting of them Numerius Suffusius devised first at Preneste.

Looking Glasses, in the time of Pompey the Great: there were also invented Looking-Glasses of Steel, Lead, Christal-Glass, which one Sydon is reported to have been the first inventer of. Glass was found out in Phenicia, being ingendered in the River which is called Belus; and it happened on this occasion: A Merchants Ship being fraighted

fraighted with Salt-peter, came to that place, and as they were prepairing their Meat on the Sands, they could not find Stones to bear up their Vessels, so that they were fain to lay great pieces of Nitre under them, which being set on Fire, and mingling with the Sand, there appeared great slakes of melted Glass.

Lamps and Hanging Lights began of the Candles, that Moses set up to

burn in the Tabernacle.

Laws of Mourning, of Obit's, Funeral Exequies that are performed: over dead Bodyes, were the institution of Polugius, although Isidore ascribeth the Original of it to the Apostles, and he himself did augment the Rites, that we use at this time. Ambrose supposeth that Mourning proceeded from the Custom of the Hebrews which Lamented Jacob Forty days, and Moses the space of Thirty days, for that time was but counted sufficient for the Wife to weep in. It was also the custom of the antient Romans to mourn. For Numa Pompilius assigned Oblations to the Infernal Gods for the dead, andi

and did inhibite that a Child under the age of three years should be bewailed, and that the elder fort should be mourned no more months then he had lived, if any were married within that space again it was counted for a great reproach: Wherefore Numa ordained that fuch as left of Mourning before the day limited thould offer a Cow that was great with calf for expiation. If that Rite were used now adayes, and namely in England, we should have small store of Veals, there be fo many that Marry within the fpace of time prescribed. Plutarch writeth that the Women in their Mourning laid afide all Purple, Gold, and Sumptuous or rich Apparral, and were cloathed both they and their kindred in White Apparrel, like as at that time the dead body was wrapped in White cloaths. The white colour was thought fittest for the dead, because it is Clear, Pure, Sincere, and least defiled, and when the time of their weeping was expired, they put on other Vestures. Of this Ceremony (as I take it) the French Queens took occasion,

be occasion, after the death of their Huspands the Kings to wear only white cloathing, and when there was any fuch Widdow, she was commonly called the White Queen. The Jews ended their Mourning after Thirty days. The Englishmen use altogether Black, which they use for the most part to wear a whole year, unless it be because of a general Triumph of a New Magistrate, or when they are towards Marriage. The Manner of washing the bodyes of the dead especially of the Nobler fort and the annointing of them, was received from our Ancesters which used to wash the bodyes of the dead, and it was the Office of them which were neerest of the Kindred, to do it.

Lead was brought by Miducritus out of the Islands against Spain, called

Custirides, as Strabo writes.

Letting of Blood was Learned of the Water-horse in Nylus: For when he was weak and distempered, he used to seek by the River side for the tharpest stalks of Reeds, against which he stroke a Veign of his Leg, with great great violence and so eased his Body by that means of the corrupt and superfluous blood: and when he had so done he covered the wound with the Mud.

Letters, concerning the first inventors of them; Authors are at some variance, Diodorus faith they were found by Mercury in Egypt, others fay one Menon an Agyptian devised them. Instead of Letters the Egyptians used to declaire and signifie the intents and conceits of their minds by the Figures of Beafts, Fishes, Fowls, and Trees. Pliny faith that he thought that the Assirians excogitated the Letters which Cadmus brought out of Phe-

nicia:

Abra Writi

lat hich

micia into Greece, which were but fixteen in number. Abcdegilmnop r s t u. To these Palumedes in the Battell of Troy added four more. Aristotle faith that there were 18. Hermolaus is fupposed to have added the Letter v. Herodotus writeth how that the Phenicians that came with Cadmus to inhabit Thebes, brought Letters into Greece, which were never feen there before. Some will have the Athiopians to have invented them, and then to have taught them to the Egyptians, that were one of their Provinces. But Eumolphus writes very wifely, that the Original of Letters were from Moses, who was long before Cadmus dayes, that he taught the Jews Letters, & that thence the Phenicians received them, and the Greeks Leared of them, which thing is conformable to Pliny's opinion: For Jury is a part of Syria, and the Jems were Syrians. Nevertheless I have it from Josephus, that writing was before Noahs Flood, for the Sons of Seth (as we have expressed) wrote in two Pillars, one of Brick and another of Stone, the Science of Astronomy;

my; whereof that of Stone in the time of Josephus remained in Syria. Philo ascribeth the inventions of them to Abraham. Numbers were used to be written with these seven Letters, J. I. D. L. M. U. X, or with these Figures, 1.2.3.4.5.6.7.8.9. which because they are so Familiarly used, we shall not need further to declaire. efore Letters were first brought into Italy by o have Evander, and the Arcadians which ame into Italy to Inhabit there, as Ivid writes in his Book de Fastis, the Tetrurians also had a form of Letters by themselves, wherein the Youth of Rome were instructed, as well as in the Greek Letters, which one Demeratus & tha Corinthian taught the Hetrucians. them and like as the Grecians had enlarged which he number of their Letters, so the opini talians following their example, put to heirs, f. k. q. x. y. z. h. which h. is heles o Letter, but a sign of aspiration: riting they received of the Aolians, which oth amongst the Romans and Æolians ad the same sound and pronounciation, hat p. with an inspiration hath, hich we use in writing Greek words; And

have

at the

dano

TODA

DY

And afterward Claudius Cesar as Quintilian writeth, appointed that it should be taken in the place of u. Consonant, as fulgus for vulgus, fixet for vixit; and even so our English men use to speak in Essex, for they say Finegar for Vinegar, Feal for Veal, and contrariwise, a Vox for a Fox, Vour for Four: and in process of time it was used for ph. in Latine words k. was borrowed of the Greeks, but any eminent Author seldome useth it in writing Latine. q. was added because it hath a groffer found then c. The Letter x. we had also out of Greece (although as Quintillian judgeth) we might well forbear it, forasmuch as that they either used for it cs. or gs. Likewise y. and z. were sent from the Grecians, and are used of us only to write Greek words. In Letters are contained the Treasure of Knowledge, by them the most notable things are preserved in fresh remembrance.

Libraries, which are the Monuments of ingenuous Wits consist in Books, which were first published in Greece. Gellius saith it was Pisistratus

ONE Y was first Coined in Rome, 547 years after the Citty was uilt, the first Coin was named a Ducat. beaon began Silver Coin in the Isle of Egina, which was Minted in Rome 54 after the Citty was Built, the rint of it being a Charriot with two orfes. Janus caused Base Coin be made, with a Face to the one de, and a Ship on the other, that he light gratifie Saturne who arrived nere in a Ship by perpetuating his mepory to posterity. Serius Tullius Coind Brass with the Image of a Sheep and a Oxe.

Marriage or Matrimony, Antinity reports that Cecrops King of Athens first ordained; and therefore ne Poets feigned him to have two Faes. Notwithstanding the customes of

Mar-

Marriage were not alike in all Countreys, nor kept after the same man ner. For amongst the Indians, Numi. dians, Agyptians, Hebrews, Persians Parthians, and almost all the Barbari. ans, every one Married according to the fubstance or riches which they enjoyed The Seythians, Scots, and Athenians at first used the Women in common publickly like Beafts: the Massager. Married their Wives, but they also used them in common. Amongst the Arabians, it was the custome that a the Kinsmen should have but one Wife and he that came to meddle with her should set his Staffe at the Door. Assyrians and Babilonians bought their Wives in the Market for a price which custome still remains among the Arabians and Saracens. The Na zomons when they are first Married use to suffer their Wives to be Layn withall the first Night by all their Guests, and after that, keep them entire to themselves. There were certain People of Affrick that wer wont to offer fuch Maids that were to be Married to the King of their Religion

zion, to deflowre such as he pleased. t was also the custome amongst the Scots, that the Lord of the Manner was to Lye with the Bride the first Night, which custome remained till t was abolished by Malcolme the third. Marriage amongst the Romans was tept inviolable till divorcement began. The Rites of Marriage were various in Rome; and the manner was that two Children should Lead the Bride, and a hird bear before her a Torch of White-Thorn in honour of Ceres, which custome was also observed here n England, faving that in place of the Torch, there was carried before the Bride a Bason of Gold or Silver; a Garland also of Corn Eares was set upon her Head, or else she bare it on her Hand; or if that were omitted, Wheat was scattered over her Head in Token if Fruitfulness; also before she came to Bed to her Husband, Fire and Water were given her, which having power o purifie and clease, signifyed that hereby she should be chast and pure in er Body. Neither was she to step over the Threshold, but was to be bourn

ioye enia mmo Jago y al gft ii hat a Will ha he Ti

arrio)

bourn over, to signifie that she lost her Virginity unwillingly, with many other superstitious Ceremonies, which are too long to rehearse. Marriage began first in Paradise, where God joyned Adam and Eve together, before they knew Sin, that by the congression and company of these two Sexes and Kinds, their issue might be enlarged to

replenish the World.

Mahomets Sect, questionless is one of the most Diabolical of all other, as well for the filthiness of all unlawful Lusts, as also for other outragious naughtiness that it is so strangely possessed with, to the great mischief of Christendome, and encrease of their own infidelity. this most superstitious Sect, Mahomet, Born in Arabia, or as some report in Persia was the Author: his Father was a Heathen Idolater, and his Mother an Ismaelite, which caused her to have the more infight into the Law of the Hebrews. This wicked Plant brought up and fostered under his Parents, and instructed like a Mungrell in either of their Laws, became expert, being of

first made of Cranes-legs afterwards of a great Reed. Dardanus Tezenius used first to play on them, Pan found out the Pipe of small Reed, to delight and please his Mistress, Syrinx Timarias was the first that playd on the Harp and Lute with Ditties; and Amphion was the first that sung to the Lute. The Troglodites, a People of Athiopia, were the first that found out the Dulcimer. Pises, a Tyrrhen, or Tuscan found out the brazen Trumpet, and the Tufcans were the first that used it in War. Others fay that it was Dyrcaus an Athenian, who taught it the Lacedemonians, who maintaining a long War against the Messenians, had this answer from the Oracle of Appollo, that if they would win the field, they must have a Captain of Athens. The Athenians in despight sent them Dyrcaus; a lame fellow, with one eye, who notwithstanding did receive him and made use of his Counsel, who taught them to play on Trumpets, which were fo dreadful to the Messenians, because of the strangness of the noise, that they fled, and so the Lacedemonians be-

Acts of the Apostles testifies, because he was a Fervent and Zealous Witness of the Truth. This Stephen did two years continually, after Christs Death, dispute with all the Learned men of Alexandria, Cyrene, Cilicia, and Asia, and by Heavenly Wisdome confounded all their Worldly Reason and Humane Learning, for which they were so poisoned with Malice against him, that they violently Thrust him out of the Citty, and then cruelly stoned him to Death. Thus Stephen was the first open maintainer and defender of our Christian Religion. Afterwards St. Luke the Evangilist found such bitter and sharp persecutions did burst out against the Christians that were in Ferusalem, that they were enforced to stray abroad, and were scattered throughout all Jewry and Samaria, faving that the Apostles remained and Sojourned at Ferusalem. Notwithstanding this perfecution was a great furtherance of the Gospel, by reason they ceased not, but Preached still the Word every where to the great advance, and augmentation of the number of the Faith-E. 4.

full. Amongst the Heathen Nations Nero in the 13th year of his Reign, was the first that persecuted our Religion universally, and put St. Peter and St. Paul to Death, and confequently many other Innocents were flain cruelly: For out of a Bloody mind he had, he could not spare his own Countrey; but either for difpleasure of the ruinous Houses, which he was exasperated to behold, or else defirous to fee a resemblance of the Burning of Troy, he fet on fire the most part of the Citty of Rome, with to huge a flame, that it burnt fix Days and fix Nights continually, to the Impoverishing of many Thousands of the Cittizens. Then to mitigate that shamefull and abominable Crime, he forged false Witnesses, that the Christians were guilty of that Enormious Fact; and fo, Thousands of Innocents for Religion were most cruelly put to Death for the Tyrants pleasure; and to obdurate and harden himself in mischief, he proclaimed an open Perfecution against all that professed the Name of Christ. mitian in the 12th year of his Reign renewed another Persecution; he caused St. Fohn to be put into a Vessel of burning Oyl, whereof he received no hurt. Trjan raised a third. The fourth Marcus Antonius, Lucius Anrelius Commodus stirred up. The fifth Persecution was under the Emperour Severus. Maximinius procured the fixth. Decius the seventh. The eigth Valerius. The ninth began under the Emperour Aurelianus. The tenth was by the Command of the Emperour Dioclesian and Maximianus Herculeus: this Perfecution was far more cruell and general then any of the rest; insomuch, that Dioclesian in the occient, and Maximinian in the occident, destroyed all the Churches, and tormented the Christians with most horrid Cruelties. The Books of Scripture were Burned, Churches plucked down, Christian Magistrates that were in any Office were deposed, Souldiers were enforced to deny their Faith; or else to be deprived of their Estates, or loose their Lives. Neither were the three cruel Tyrants, Mezentius, Lici-27715.

he had newly ended his Prayers and was lifting up his hands to Heaven by the Alter, by the Appointment of the King of that Countrey, certain Villains came behind him, and run him through with their Swords. Judas called Thaddens after the Ascention of our Lord, was fent by Thomas to heal Albagar King of Edissa: Afterwards he Preached in Pontus, and Mesopotamia, and converted many cruel and barbarous People. Lastly he came to Persia where for confounding of their Idols, he was suddenly run upon, and murdered by the Pagan Bishops of that Countrey. He was buried at Netre a City of Armenia. Simon, called Chananeus, Brother to Thaddeus, and fames the less; after he had Preached in Agypt, returned to Jerusalem: Whereof by the confent of the Apostles, he was made Bishop after the death of his Brother James. As touching his Martyrdome some fay, that he suffered with his Brother Judas Thaddens in Persia, others that he was through the envy of the Hereticks, accused before the Conful

Conful Atticus, and therefore Crucified as his Master was. Mathyas after the Ascension of our Blessed Lord and Saviour, was chosen by the Apostles to supply the room of Judas; he was born at Bethlem, and was descended of the Tribe of Juda. He Preached for the most part in Judea, where at last he was falsy accused of his enemies for Perjury, and was therefore condemned to be stoned to death by two men: after which torment one cut him with a Hatchet, which sinished his Martyrdome.

fore

The four Monarchies of the allogio, were in successive order as followeth, the First was of the Assirians, by Ninus, about the year of the World, 2220. augmented by the Queen Semiramis, and afterwards it endured the Term of 1300 years, it was translated by Arbastus to the Medes: and there having endured 350 years, it was left by Astyages, and exterpated by Cyrus. The Second Monarchy was of the Persians, the year of the World, 3425 which after it had endured 191 years, was lost

lost by Daryus, and extirpated by Alexander the Great. The Third Monarchy was of the Grecians, founded by Alexander the Great, in the year of the World 3634, and before Christ, 320 years, and the death it was divided amongst the Prefects, which in his life time he does not appointed in divers Countries: by which division Selenius King of Assyria, Ptolomeus King of Ægypt, Antigonus King of Afia, Cassander of Macedonia and Greece: all which Countries were after fubdued by the Romans. The Fourth Monarchy or Empire was of the Romans, founded by Julius Casar, in the year of the World 3914, after the building of Rome 706 years, and before Christ 47 years. This Monarchy flourished about the space of 470 years, till that after the death of Theodosius the Great, it was divided by his two Sons into two Empires: Arcadius was Emperour of Constantinople, which Empire endured (though afterwards much diminished by the Invalions of Barbarous Nations) untill

THE Dath called Jones Stone, Which the Antients swore by and Held so Sacred, was after this manner, he that swore was to hold in one hand a stone, and then to pronounce these Words. If Knowingly I deceive, Jupiter cast me from my Gods, from my Countrey, and from all happyness, as I cast away this Stone.

The Divers of Chivalry, most whereof continue at this day amongst Princes are as followeth. The First and antientest of these Orders of Chivalry or Knighthood, is the Order of the Garter, Instituted in the year of our Lord 1348 in Burdeaux, chief City of the Dukedome Guyne in France, by Edward the Third King

colo

Velv

Blew

Garr

abou

Cou

dour

of R

faid

Duk

King of England, and then possessor of the Dukedome: which order he confecrated and dedicated to St. George: though the motive of the institution thereof, proceeded from the Loss of a Garter, which he supposed to have been the Countess of Salsburies. And it happened in this manner: As one day he was entertaining her with pleafant Discourse, a Garter chanced to unloofe and fall down, at the Kings indeavouring to take it up, the Noblemen were supprifed with a suddain Laughter: At which the Countess Blushed, to perceive her self rendered so Rediculous, and withall being difpleased at some more than seemingly Familiarity that had passed, she said sharply to the King, and the rest, Honi soit qui maly pense: which in English, is, Evil to him that Evil thinketh. King to pacifie the Countelles displeafure, said, that before it were long, those Noble-men which had made a Jest, and Laughing at the Garter fallen down, should esteem themselves much honoured to wear it for a mark of Chivalry, and thereupon ordained the

the faid Order, and confecrated it to St. George, and made thereof Twentyfix Knights, and ordained that they should wear their Cloakes of Violetcolour Velvet; their Hoods of Red Velvet, and under the left Knee a Blew Garter, Buckled with Gold, Garnished with precious Stones, and about it Wrought those words of the Countess of Salsburies; to this Splendour he added a collar of Gold, full of Red and White Roses, with the Image of St. George hanging thereon: and about those Roses were also Written the same words in the Garter. There are of this order (as hath been faid) Twenty-fix Knights, of which the Kings of England are Soveraigns: and it is so much esteemed for its Excellency, that Eight Emperours, Twenty-two Forraign Kings and Dukes, and divers other Noble-men have been of it. About their Necks these Knights wear a Blew Ribbon, at the end of which hangeth the Image of St. George, upon whose day the installation of the new Knights is commonly celebrated, being the Twentythird

third of Aprill. And although it was first ordained at Bourdeaux, yet King Edward determined the place of the folemnization thereof to be at the Church of Windsor, here in England; where at the same time he Founded Cannons, or a Cannonry, for the better prosperity and greater flourishing of

the Knights of the Order.

St. Red Our The second Deder of Antiquity. is of the mnnunciation, instituted Anno Dom. 1356, by Amide the fixt of that Name; Duke of Savoy Sur-named the Green Knight. The Knights of this Order wear a great Collar of Gold, made winding, with three Laces, wherein are enterlaced these words, Fert, Fert, Fert, every Letter importing its Latine word, thus, F. Fortitudo, E. Eins, R. Rhodum, T. Tenuit That is, his force hath Conquered Rhodus: At this Collar hangeth the Image of our Lady, and an Angel faluting her; from whence tis called the Order of the Annunciation. The Collar is Fifteen Links, to shew the Fifteen Misteries of the Virgin, each Link being Interwoven one with the other,

upor that

other, in form of a True-Lovers-Knot. The number is Fourteen Knights, the Solemnity is held annually on our Lady Bay, in the Castle of St. Peter in Turin. This Duke ordained this Order in Memory of Amide the great Duke of Savoy, who succoured the Knights of St. John, when they took the Ille of Rodes from the Turks, in the year of

our Lord 1310.

The fifth Deder, is that of the Holy Ghost, instituted by Henry the Third, King of France, on Newyearsday, in the year 1579. It was called by the name of the Holy Ghost, because this Henry was on a Whitfonday chosen King of Poland. Of this Order is written a Book, containing the Articles whereunto the Knights thereof were bound. Among which I have principally noted one, that is, to defend and, Instain the Clergy: For that the King doth give to every one of them the Rent of certain Abbies, Religious Houses, or other Spiritual Lands, whereof they shall allow a certain Stipend, to the entertaining of such a number of Religious persons in every Religious house under him, and for that benifit are fworn at the entring into the faid Order, always to defend the Spirituality, and to maintaine the Clergy in their priveledges; but how they keep their Oath, it is easily to be discerned in every place of their spiritual possessions: with which I have been often times very much distatisfied in, (for having oftentimes tryed

Dintments, Pliny is of opinion, that they were used long before the Battel of Troy; for Facob fent to his Son Joseph in Agypt Ointments: and Moses that was three hundred and fifty years before the Siege of Troy, maketh mention of Ointments, concerning the Sanctification of the Tabernacle, and the Priests of the Old Testament. Pliny and Solinus report, that Alexander, when he conquered the Army of Darius, found amongst other Jewels, spoiles and things of value a Casket of Ointments, that he highly esteemed of. But Herodotus affirms that they were frequently used long before Davius time. For Cambyses Son to Cyrus fent Ambassadors to Æthiopus King of the Macrobians, with great presents, whereof a Box of Ointments was one. It is not certain when they first were used in Rome: but but I find in Pliny, that the five hundred fixty fifth year of the City, Antiochus being Vanquished, P. Licinus Crassus, and Julius Cesar, then Cenfors, commanded that no Forraign or Strange confection of Ointments should

be fold in the City.

were by divers Nations Deified, and fundry people after divers manners chose them for Gods, and with great reverence Worshiped them. These spirits of the Air that gave such doubtful answers to them that euquired any question of them, were at the comming of our Saviour Christ all destroyed. For when he was carried into Egypt, which was a Countrey full of Superstition and Idolatry, all the Idols of that Nation were overthrown and Fell to the ground at his comming. And in the time of Adrian the Emperour, both their wicked Sacrifices were abolished, and also the Oracles of Appollo at Delphos, of Jupiter Hammon in Agypt, with the like vanities were subverted.

The Printons of the Philose phers, concerning the birth of Man, Were divers (Diodorus recordeth) that they spake of two sundry manners of birth, and first stock of Mankind: for they which contend that the World was not generate and without any danger of Corruption, say also that Man hath been in a cer-

tain Perpetuity, without Beginning. Of this Opinion were Pythagoras, Xenocrates, and Aristotle, with other Peripateticks, affirming that all things in the Eternal World, which have been, or shall hereafte come to pass, are by Generation endless, and without Beginning, and have only a circuit or course of Generations, wherein both the Birth, and natural resolution of things may be perceived. Others suppose this World had both an Original cause of Being and shall also end by Putrefaction, they hold Opinion that Man had a time of his Generation.

HYSICK, some referr the invention of it to Appollo, because the moderate heat of the Sun, feems to be the repeller of all Sickness. Others attribute the finding of it to the Agyptians; but the enlarging of it to Asculapius, who, besides other more rare Experiments, found out the way of drawing of Teeth. In Rome, Archagathus of Peloponesus was the first Physitian. In Agypt and Babylon they used no Physitians, but brought the Sick Persons into the Streets & Publick places, that so the Passengers might tell them what manner of Medicine or Dyet was good for them: neither was it Lawful for any Man to pass by, till that he had spoke with the Patient. Afterwards the Agyptians did so di-Aribute

Bribute the Art of Phylick, that every . Disease had a distinct Physition to look after it; one for the Head, another for the Eyes, others for other parts according as they excelled. Of Medicines made by Herbs, we have already in another place in part discoursed. Chiron the Son of Saturn as he was reported to have been fo knowing in the ein virtue of Herbs, may be Accounted to have been one of the first inventers of Rems Salves for Wounds and Sores: he hers found out the Herb called Centaurie, wherewith he cured the Wound that he had received from Hercules's Arrows falling on his Feet as he was handling of his Quiver. Mercury found out the use of Moly, and Achilles the virtue of Yarrow. Medicines made with Honey, were from Sol the Son of Oceanus: feveral Herbs also very necessary for Medicines; were discerned from those cures Beafts out of an instinct of Nature made on themselves. Dittany by the Hare, which being Wounded with an Arrow, by the suddain Eating of it, is faid to drive it out of her Body. Celandine, which is an Herb which is much

sight, was first perceived by the Swallow, that uses to Heal the Eyes of her Young-ones with it. The Boar in his Distemper cureth himself with Ivie. The Storke first taught men the use of Glisters, who finding her self very sull, purgeth with her crooked Bill in her Fundament. The Weesel in combate with the Serpent preserveth it self with Rue, and the Stork with Origany; and in the same manner, Nature hath taught other Creatures particular Me-

and

ted

dicines for their Distempers.

painting, as Pliny expresses, Gyges a Lydian did first invent, he devised
Portrature in Agypt. In Greece Phyrrhm the Cousin of Dadolm, according
to Aristotles mind. But Theophrastms
saith, that Polignotus an Athenian was
the instituter of it: yet Pliny neither
agreeth with Theophrastms nor yet with
himself; for in the Thirty-fifth Book
he saith, that Polignotus a Thalian,
did first Paint Women in single Apparrel, and trimed their Heads with Kalls
of sundry colours. The Agyptians
say that they had that Art Six-hundred
years

years before it arrived at Greece: And the Greecians affirmeth that it was begun by the Siconians, and some of the Corinthians. Albeit, the most Authentick Authors affim it took its original from the drawing of a man with Lines, in the process of time it was made more glorious with colours. Drawing of Pictures with Lines and Shaddows Philodes an Agyptian, or Cleanthes a Corinthian devised. Telephanes a Siconian, and Ardices of Corinthus found this Art first, without colours; and Cleophantes of the same Countrey invented colours: Appollodorus was highly esteemed for the Pensil. In the fame expertness Timageras, Pythyas,
Polignotus, Aglaophon, with others that Pliny reciteth in his Twelft Book exwas celled. And Baphael Sanctus, as also ther Vrbinate was very lively in expressing of the Face: fince many others that stood on their Shoulders have perpetuated their Names.

ear

but

the

xan-

eaten

MICE

gunce, by one John Cuthenbergus a Knight; he invented also the Ink that PRINTERS Use, sixteen years after Printing, which was in the year of our Lord 1458. One Conradusan Almainefirst brought it into Rome: Nicholas Johnson a French-man, did very much polish it, and now it is dispersed through most parts of the World. This Noble Art was first to Print Letters in Tin, Lead, and other mixt Mettall; 'tis a Divine and Heavenly invention: but it would have been more Marvellous if it had not been fo common. It is strange and scarcely to be spoken, but Pris as true as truth it felf, that one Printer may Print so many Letters in one day, that the swiftest Scrivner or Writer is not able to do so much in a year. This Art was at the beginning in great Admiration, and of no lefs Lucre and Profit. It was first undertaken with more boldness and confidence then any certainty, and it was about Eeighteen years afterwards, before it was common in Italy. But by the industry of man's Wit, it grew to that perfection, that it is now arrived

to. Truly it had gone ill with all good Discipline (if it were now to have its beginning, seeing that for the most part people are grown so effeminate, and fuch epicures, for here Learning is not Al-a-mode, many of our Gentry will scarce take up Books if they lay in the High-wayes, which in times past were valued more then if every Leafe had been in Beaten Gold, that the greatest sums of Money would have been given for them. If this Art had not been found out in a convenient and happy time, the Noble Acts of all Nations had never been lo manifest to the Word: In like manner the memory of Ancient antiquity had not been so restored, and the Divine Wisdome of the Phylosophers had been in danger of being lost, whatsoever hath laine obscure in a few written Copies these many Ages is now by this Art set forth to all immortality.

Poetru is a most excellent Art, for it comprehends all other Sciences: This Art is only given of Nature by a Divine inspiration, without which De-

mocritus

the

DOW

Hehr

mocritus affirmeth there could never be excellent Poets; for it proceedeth not for much from Art or Precepts, as from the Divine inspiration and Spiritual power; and therefore Ennius called Poets Holy, because they have a special prerogative. The beginning of this Art is very Ancient, and as Ensebimore us faith, it flourished first amongst the Hebrews, that were long before the one Greeks. For Moses the great Captain of the Jews, at that time he led the Children of Israel out of Egypt into the Land of Promise, passing the Red-Sea, which by the power of God gave place to them, inspired by the Holy Ghost made a Song of Hexameter Verses, to render thanks to God for that had deliverance. And David the Holy Prophet of God, after he was dispatched and freed from all his troublesome and dangerous affairs in War, and had restance of the Assaults and Conspiracies of Treason, living in happy and prosperous times of Peace, devised many pleasant Tunable Hymnes for the praise of God in fundry kinds of Meter. For as St. Hierome faith, the Pfalter of David

CTITIES

David is in as good Number and Meafure, as either the Greek Planudes, or the Latine Horace: fometimes in Alcens Numbers, Sometimes in the Metre of Sappho, fometimes with half mea-What is more flately and high fures. then the Song of Moses in Deutrinomy, and of Haiah? more ancient then Solomons? more perfect then Job? we may more highly ascribe the invention of it to the Hebrews: 'tis nevertheless to be acknowledged that Orpheus and Linus, and after them Homer and Hefied did publish and adorn this Art with all manner of rich Furniture. Romans received it not till of latter times; for Livius Andronicus (as Tully writes) in the year 513, after the City was Builded (Cains Claudius Cento, and Marcus Tuditanus being Confuls) fet forth the first Enterlude or Fable, a year before Ennius was Born. fore those days it was so despicaple, that if one had professed himself to be a Poet, he was imagined to be as bad as a Murtherer. The Author of Meter was Almighty God, who proportioned the World, with a certain order as it were

Ora

were a Meter: For there is none(as Pythagoras taught)that can possibly doubt, but that there is in things Heavenly & Earthly, a kind of Harmony; & unless it and described number, including and described number, including that we poscess, are all fashioned by a manner of Measure. Diodorus assigneth the invention of Meter, which the Poets by a Spiritual influence used in their Works, to Jupiter, to the Almighty God. Of Meters there are dimensional instance in the poets of were govern'd with a formal concord of the thing that is described therein, (as Heroical Meter is fo called of the Wars of Noble men that are conteined in it) wherein also Appollo gave his Oracles, therefore Pliny saith we have Oracles, therefore Pliny saith we have that Meter of Pythius Oracle, or of the inventour as Asclepiadicall, or of the quantity of Jambicks, because it confisteth of a short and long, which Archilocus sirst invented, of the number of Feet as Hexameter and Pentameter, which is also called Elegaical. The which is also called Elegaical. The Shepards Song Daphus the Son of Mercary was first expert in : others in process

ction

Phylosophy, like all other Sciences, fprung amongst the Hebrews, and from them the Greek Phylosophers, which were a Thousand years after Moses, which derived their Knowledge from them. Phylosophy, the Name of it was not used amongst them till the time of Pythagoras, for he called himfelf a Phylosopher, and the studdy of Wisdome Phylosophy: whereas formerly it was named Wisdome, and they that professed it had the Title of Wise men. There are three parts of it, one called Natural, another Moral, and the faculty of disputing called Logick: The Natural is of the World and the contents thereof, which Archelaus brought out of Jonia into Wisdome Phylosophy: whereas for-Athens. Moral reformeth the Life and Manners of men; this part Socrates traduced from Heavenly things, to the use of Life, to discern good and bad. Logick inventeth reason on both parts; it was first said to have been found Write out by Zeno Elianes: others devide Phylosophy into Five parts, Natural, Supernatural, Moral, Mathematical, and that Logick.

R

HETORICK (Diodorus faith) was invented by Mercury: But Aristotle affirms that Epedocles was the first Author of the Oratorial Art. We may be fure, that not long after men were Formed, they received from God the use of Speech, wherein, when they perceived some words to be profitable, and some to be hurtful in uttering of them; they appointed and compiled an Art of Speech or communication, called Rhetorick. Rome was the Seat of Eloquence, where it was never forbidden, but in process of time (as it was found to be profitable & honest) was had in such high estimation and so many partly for their defence, Glory and Ambition, employed their studies in it with such earnest endeavours

CO

vours, that very many of the Commonalty were promoted into the degree of Senatours, and atchieved much honour by it; Cornx and Thisias, being Sicilians, gave the first precepts in Writing of this Science, and their Counthey-man Leontinus Gorgias succeeded them: Demosthenes was the principal amongst the Grecians: amongst the Romans M. Tullius Cicero, who had no fellow. Now as touching the effect and property of it, there are in it (as Cicero writes) five parts; first to invent Matter to speak, then for him that is to deliver his fpeech, formally to order his devices, next to polish it and furnish it with Elegant terms and choise words, to have his speech and oration in perfect memory; and last of all, to utter and express it with a comely gesture and posture, in such a manner as to delight; with the convenient and pleasant treatableness of it, which should as it were teach and plainly declare the things, and move the passions and affections of the Auditors and Judges, either to pitty or favour; or if the cause them either to mirth, or to a grave severity, as the occasion shall require. In terms of this faculty, we make this difference, we call him that defendeth matters, and pleadeth causes an orator. A Rhetorition, is he that teacheth and professeth to be a School-master in that Art. A Declamator, he that is employed in seigned causes, either for his own exercise, or to

instruct others therein.

Ringing of Bells, were first ordained by Sabinianus that the people might be assembled together to hear Divine Service at certain hours of the day: and John the 22d decreed, that Bells should be tolled every day three times Morning or Evening, that every one should say three

times the Ave-Maria.

Royal Dinaments of the Romans, were Fardels of Rods, the Axe, the Garland of Gold, the Chaire of Ivory, the Kyrtil or Cope, Charriots, Trapped Horses, Mantles of State, Embroidered Gowns, with all other Royal Apparel, the Tuscanes were very early in their choice of rich Habits, whom Tarquinius Priscus subdued.

Rome, hath been taken Gight times; First by the Gaules under the conduct of Captain Brennus, the year of the Foundation of the City 365, and the year of the World 4835 and the year before Christ 364. This Brennus is by the Brittaine and English Chronicles reported to have been a Brittain, and Brother to Belinus, King of Brittain; but neither the Chronicles of Rome nor of Gaule do express any such matter. Rome was the Second time taken by Alaricke, King of the Gothes, after he had held his Seige before it for the space of two years: Which befell the year of the Foundation of the City 1164, the year of our Lord 412, and the 25 year of the Emperour Honorism. It is written in the Chronicles of Conftaminople; and in other Histories, that as Alarick (being a Christian) Marched with his Host towards Rome, a certain Monke, of a Holy Life, came to him, who having Audience admonished and conncelled him to break off that evil purpose, and to remember that he was a Christian.

and that for Gods fake he would moderate his Wrath, and that he would not take pleasure in the shedding of Christian Blood, fince that Rome had not in the least respect offended him: anto whom Alricke answered, thou must understand, Man of God, that it proceedeth not of mine own will, that I goe against Rome, but contrarily ile affure thee that every day there commeth unto me a Man, which constraineth and importuneth me thereunto, faying unto me hasten thee, goagainst Rome, destroy it utterly, and make it defolate. At which words the Religious Man being aftonished durst not reply, and so the King perfued his enterprise. Rome was Thirdly taken by Genserick, King of the Vandals, the year of the Foundation of the City 1208, the year of Christ 456, who Sacked and Burnt it in many places, this was in the Emperour Marcians time. Rome was Fourthly taken by Totila King of the Goths, who because he could not obtain peace of the Emperour Justinian, commanded the Citizins to avoid the City, and afterno-

afterwards burnt, and facked, all the whole City; defaced the Walls, and the Capitol, and rendred it almost defolate, infomuch that it could never fince be repaired according to the first Form, although a while after, Bellifarius Peopled and repaired a Great part thereof. And recalling the old Inhabitants, very much Fortifyed and Strengthened the Walls. This defolation happened the year after the Foundation of the City 1300; after Christ 548, in the 21st year of the Emperer Justinian. Rome was the Fifth time taken by the same Totila King of the Goths; after that Belifarius had repeopled and repaired it. It was the Sixth time taken by the Moores and Sarazens followers of Mahomet in his Law, which in great Multitudes came into Italy, and in the year of our Lord 333, Gregory the Fourth then fitting in Rome, and governing the Empire, Lewis the First beseiged it, took and Sacked the City, prophaning the Temple of St. Peter: Lading their Ships with Plunder and Prifoners. Rome was the Seventh time taken

the

taken by Henry the Fourth of that name Emperour of Germany, Gregory the Seventh then fitting in the Chaire: this time Rome was also most cruelly Destroyed, by reason that both the Armies of the Pope and the Emperour Skirmished, and Fought for a long time within the City, and the Capitoll, which was then again repaired; this was in the year of our Lord 1082: Anthony writes that Rome was very much endamaged at this time also, by reafon of the lamentable execution performed by the Normans on the Popes side, and the Germans for the Emperour. Rome was last taken by Charles Duke of Bourboun: who being flain as hescaled the Walls at the first Asfault, the Souldiers being without a head, in revenge, committed all manner of Enormities, and Barbarous cruelties, faving that they burnt not the Churches, though they spoiled and robbed them without any confideration of their Holiness: For a great part of the Army were Germans, and most of the Germans Lutherians, this ruine happened in the year of our Saviour

viour 1527, Clement the Seventh, then sitting in the Chair.

S

SATYRE, is a Poem that Marply rebuketh Vice, not regarding of any Persons. There are two kinds of Satyrs, the one which was both amongst the Greeks and Romans, in Antient times used for the diversity of Meters much like a Comedy, but that it is more wanton. Demeirius of Tharsus and one Menipus a bond-man, whom Marcus Varro did counterfeit, were expert in this way The Second manner of of writing. Writing of Satyres was railing, only ordained to enveigh against Vice, they were devised of the Romans upon this

this occasion. When the Poets that wrote the old Comedies, used to handle for their Arguments not only feigned matters, but also things really done, which although at the first was tollerable, yet afterwards by reason that they were so sharp and bitter, against every one that they pleased to have a fling at, there was a Law made, that no man should afterwards reprehend any person by name. mans in the place of these Comedies, substituted such Satyres, as they had newly invented: afterwards began the new Comedi, which concernes generally all men of mean estat; and hath less bitterness and railing, but is more pleasant and full of pastime for the Auditors. Of these Comedies Menander and Philemon were Authors, who abated of the tartness and crabbedness of the old writings, of them Cacilus, Nevius, Plautus and Terentius, learned to compile Comedies, although (as Quintilian will have it) they never arrived to the least proportion of their Patrons, because as he writes they never attained to the least proportions

portion of their Patrons, because the Latin tongue is not so sit to receive the Ornaments of Eloquence, as the Greek tongue is. The Satyres had the names of Barbarian Gods that were Rude, Lascivious, and Wanton in behaviour; In this form of writing Lucilius, Horatius, Persius, Juvanal, were

the most eminent.

accomplished, they will remember me, and call me not false Prophetes, but the Prophetels of the Almighty God. The Sixt was Samia, Born in the Isle of Samos; the faid, he being rich shall be Born of a poor Maid; the Creatures. of the Earth shall adore him, and praise him for ever. The Seventh was called Cumana, because she prophesied at Eumas, a Town of Campania in Italy; her prophelie was, that he should come from Heaven, and reign here in poverty; he should Rule in silence, and be Born of a Virgin. She is affirmed to have Written nine Books of the Sybils, they were all presented by an old Woman to Tarquinius Superbus, but he not willing to pay so great a Sum of Money as was demanded, denied them: whereupon the old woman being vexed, Burned three of them, requiring as much Money for the other fix, as for all: which being denied, she also Burned the other three, asking as much for the other three remaining as for the rest, which Superbus amazed, gave, and the old Trot vanished. The Books contained manifest prophesies of the me,

the Blessessed Kingdome of Christ, his Name, his Birth, and Death: they were burned by the Arch Traytour Stilico, fo that those Prophesies which are now extant, are only fuch as are extracted out of other: Writings. The Eight was Helle-spontica, Born at Marmisea, in the Territory of Troy; her Prophesie was, that a Woman shall descend of the the Fews, called Mary, and of her shall be Born the Son of God, Named Jejus, and that without Carnal copulation; for she shall be a Virgin before and after his Birth, he shall be both God and Man, he shall fulfill the Laws of the Jews, and shall add his Law thereunto, and his Kingdome shall remain for ever. ninth was of Phrygia, and Prophesied in the Town of Ancire: one of her fayings were, The Highest shall come from Heaven, and shall confirm the Counsell in Heaven, and a Virgin shall be shewed in the Valley of the Desarts. The tenth was Albunea, Surnamed Tyburtina, because she was Born at Tyber, Fifteen Miles from Rome; her Prophelies was that the invilible Word shall

dri

ma

not

TOU

shall be Born of a Virgin; he shall converse amongst Sinners, and shall of them be despised. Lastantius Finuianus rehearfed divers of their Prophesies, without making any particular mention of them: it is the opinion of some that they are to be referred more especially to Sibylla Samberta, who Wrote Twenty-four Books in Verse, chiefly Treating of the comming, miracles and life of Christ, whereunto the sayings of all the other Sybils are conformable. St. Austine likewise in his Twenty-third Chapter of his Book de Cinitate dei, reciteth these Prophesies as followeth: Then he shall be taken by the wicked hands of the Infidels, and they shall give him Buffets on his Face with their facrelegious Hands, they shall Spit upon him with foul and accursed Mouths. He shall turn unto them his Shoulders, suffering them to be whipped; yea he shall hold his peace, not speaking one word, to the end, that none shall know from whence his Words proceed. He shall also be Crowned with Thorns; and they shall give him Gall to eat, and Vinegar to drink:

drink: Behold the Feast that they shall make him, infomuch that the ignorant and blind People shall nevertheless not know their God converling amongst Men: But they shall Crown him with Thorns, mingling for him Gall and Vinegar: then the Vaile of the Temple shall be rent, at Mid-day it shall be dark Night for the space of three hours. So the Just shall dye the Death, and this Death or Sleep shall continue three dayes: and when he shall have been in the Bowels of the Earth, he shall rise again and return to Life. Lastantius, Lib. 4. Chap. 15. rehearfeth these Prophesies of them: He shall raise the Dead, the Impotent and Lame shall walk and run nimbly, the Deaf shall hear, and the Blind shall see, the Dumb Shall speak: and that with five Loaves and two Fishes, he should nourish in the Defart Five-thousand men, and the fragments thereof should be sufficient to satisfy many more. Many other things were foretold by these Sybils, as well of the ruins of great States, as of what they predicted of Christ. The Eleventh they called Epyrotion: fome were of opinion

opinion that she should be the same that Phrigia was, the came from Troas to Dodona, where she Prophesied, and was like the other denominated from the place: others write that she led was called Phaenni, fo writes Johannes he Tsetses: she Prophesied that the true Wat word should proceed from a Virgin, Were how he should willingly come down was from Heaven, and feem poor to the mad World: yet should govern all things, that whose Rule and Kingdom should never Rule cease, and that he should be both God &Man, and that this his Kingdom should principally reside in the Souls of Men; whom he would govern and fave to another life, thus Lalius Cleophassis, and others affirm. Colophonia Lampusia was the Twelfth, she came out of Greece, from Colophonia a City of Jonia, the Prophesied of the changes of Kingdoms, and Inundations, Earthquakes, and of Wars: she said that God was only to be adored, that he was angry at Vice, and punished it; that he did delight in holy and upright men: She Prophesied also, that the whole World should be Burnt, and wish-

ed them to adore that God while they lived here, which could punish them so severely

hereafter for their contempt.

pose it to be the Samotracians, and iome Atlas that found it. Jason made the first Galley, which Sefostrias King of Ægypt used after him, Æytheus invented the Barge with two order of Oars on a side; Amocles of Corinib, that with three course of Oars on a fide; the Carthaginians that with four Oars on a side; and Nesichthon of Salamis, that with five Oars on a side, which the Romans made in the first Punick Battell; Zinagoras-a Syracusan devised that with fix rows of Oars. Hippins a Tyrian conceived the making of the Lighter. The Cyrenians invented the Hoy or Gallion. The Phenicians the Keel or Demy-Bark. The Rhodians the Brigantine. The Cyprians compleated the Bark. The Germans the Boats of one piece. The Illyrians the Cock-Boat or Lighters. ders were invented by the Copians, the broad Oars the Plateans devised. Sails Icarus found the use of, but Diodorus faith it was Aolus. Dadalus invented the Mast, and the Cross-piece whereunto the Saile is fastned. Ferry-Boats the Athenians or the Salamimans

nians are said to have found: Close Galleys were invented by the Thasians. The Tyrrhenes devised the Anchors, and Eupalamus made it with two points of Teeth; but some refer it to Anacharsis, who also invented the Tackle of a Ship. The Stern of a Ship Piseus devised. Tiphis found out more perfectly the use of the Stern after the example of the Kite, which in her flying turneth all her Body with the turning of her Taile. Minos Fought the first Battell on the Sea. Merchandise was first instituted to furnish men with Necessaries, by way of Exchange: but after when Money was Coined, it was made use of more for mens private Wealth, then for any common profit, and for that cause, Cicero calls it a Servile Craft: Although Plutarch writes that Thales, Solon, Hippocrates and Plato were occupied and employed in this Art. The Carthaginians as Pliny expresses in his feventh Book, were very early in it, but Diodorus will have Mercury to be the first that was cunning in it. Pliny in his tenth Book, faith that Liber other-H 2 wife

Trade of Merchandise. And therefore it may be imagined that the Carthaginians Learned the Trade of Merchandise of Dionysius: But the Hebreus
(as Josephus affirms) used Buying and
Selling in the time of Noah; and Joseph-was Sold to Merchants, and carri-

ed into Agypt.

Saluting with Killes, this cofrome is very Amient, for it was the manner of the Hebrews to kiss strangers at their first meeting, as Jacob kissed Rachel, before he expressed that he was of her kindred; and Laban, after he knew him to be his Sisters Son, embraced him with his Arms and kiffed him. The Romans custome was to kiss their kinsfolk, but afterwards it was extended to further familiarity, and is now too often used Laciviously; Although in Rome it was an Ordinance, that the women should kiss their kindred, because that if she had drank any Wine, contrary to the Law made against womens drinking of Wine, by that means she might be discovered, and made ashamed of her intemperance. EMPLES or, as they were afterwards called Churches as Diogenes supposeth, were caused first to be built by Epimenides in Crete. But Victruvius affirmeth, that one Ptthius a Carpenter, made the first Temple in Priene, in the Honour of Pallas. Herodorus saith the Æ yptians Instituted Temples first. In Rome, Romulus builded the first Temple, to the worthip of Jupiter Feretrius. To Almighty God Solomon the King of the Hebrews, builded the first Temple 3102, years after the Creation of Adam in Jerufal lem. Amongst other Temples that of Ephesus, built in a noble City so called was very famous. It was in the Countrey of Jonia, it was built in the 32d. year of the Reign of King David, by

sale may be worken

Androchus the Son of Codrus King of Athens. The Amazons and most part of Asia, did contribute to the Erection of it in honour of Diana; the like whereof was not in all the World; and therefore it was accounted amongst the feven wonders of the World: it was building 215 years. It was placed in a Miry ground for the better avoiding of Earth-quakes: There were 127 Pillars in it, made of their Kings one by one, which were in height 60 Foot; whereof 36 were caried with most admirable workmanship. The length of the whole Church was 425 Foot, and the breadth 220. All that took this Church for Sanctuary had great immunities and priviledges: there were also so many Gifts and Monuments given to this Church from all Natians and Cityes, that none in all the World might be compared to it for Wealth. St. Paul Preached at Epefus three years, and Converted many to the Faith. St. John also, the Evangelist dyed in this City. But this sumptious building was destroyed and set on fire in the Reign of Galienus

Ciniveus, was Crowned with Lawrell and carried in a Charriot with four Horses, entered into the City of Rome Triumphantly, and dedicated his prey and spoyls to Jupiter, as Dionysius writes. Although, Eutropius faith, that Tarquinius Priscus first Triumphed after his conquest of the Sabines. Camillus was led in a solemn Triumph with white Horses in a Gilded Charriot, his Browes incircled with a Garland of Gold, all the Captains following the Charriot, with Chains and Fetters about their Necks; and the Senate going before into the Capitoll of Jupiters Temple, where they offered a white Bull, and then returned. It was Lawful for none to Triumph, but fuch as were Dictator, Conful, or Pretor. Although, Cneus Pompeius, (as Cicero writes) Triumphed, though he was but of the Order of Knights.

Truce, which was called a covenant of Peace for a Season, was instituted by Lycaon; it was made sometimes for years, as the Romans made a Truce with the Veientes for Forty years; with the Cerites for a hundred:

fometimes a Truce was made for hours, as Caius Pontius a Samnite, required of the Dictator of Rome a Truce for fix hours. Leagues of Peeace Theseus is said to have ordained in Greece; Diodorus assigns them to Mircury; but the truth is, they were in frequent use long before that time in Assyria and Agypt, and namely amongst the Hebrews, for Jacob made a League with Laban; and Moses offered conditions of Peace to the Princes of the Countries, by whom he passed: and after him Joshua confirmed a Bond of Peace with the Gibeonites. The ceremonies and manner of the making and confirmation of the Leagues of fundry Nations, were diverfifyed according to their feveral customes.

Transities and Commedies, had their beginning of the oblations, as Diodorus writes, which in old time men devoutly offered for their fruits to Bacchus. For as the Altars were kindled with fire, and the Goat laid on it, the Quire in honour of Bacthus fung this Meter called a Tragedy; it

was named so, either because a Goat, which in Greek is called Tragos, was the reward appointed for him that was Author of the Song, or because a Goat is so noysome and hurtful to the Vines, whereof Bacchus was the first inventer, which Sacrificed to Liber; or of the Grounds or Dregs, which in Greek is called Tryx, with which the Stage-Players used to Paint their Faces, before that Aschylus devised Visards. But the first inventer of them after the mind of Horace, was Thespis. Quintilian saith, that Æscylus set forth the first publick Tragedies, though he acknowledges that Sophocles and Euripidus did adorn and furnish them more gallantly. In Rome Livius Andronicus made the first Tragedy, wherein Accius, Paccunius, and Seneca excelled. The Concedies began at what time (the Athenians being not yet assembled into the City) the Youth of that Contrey, used to Sing solemn Verses at Feasts, abroad in the Villages and High-wayes, for to get Money: They were so named of the Greek word Comes, for a Banqueting, or Come

Come a Street, and Ode a Song, yet it is uncertain amongst the Grecians who invented them first. In this kind of Writing, Aristophanus, Eupolis, and Cratinus were the most eminent; in a Tragedy, Noble Persons, as Emperours, Kings, Princes, Dukes, Lords, &c. are brought in with a high Style. In a Comedy, Amorous dalliances, Love affaires, Diversitie, several Tunes, Cheats, &c. are most concerned.

RITING, after the manner of the Ægyptians, was instead of Letters, by Herogliphicks to make use of the Images of Beasts, Birds, &c, declaring their minds by the shapes and sigures of them: As by the Bee they signified a King Ruling his Commons and Subjects with great moderation and gentleness; by the Golhauk, they meant a speedy performance of their affaires, and so for other things.

first appointed by Palamedes. Watch-words were first used in the Battell of Troy; at the same time when Simon

found out Beacons and Fires.

Vine (Diodorus writes) that Dionysius did first perceive the nature of it, and taught

taught the Grecians to Plant it, and to press the Wine out of the Grape, as Saturn did in Italy. Some would have it to be Icarins the Father of Penelope, that found the virtue of the Grape in Athens; who is reported to have been flain by the Husbandmen when they were Drunk. Atheneus in one place writeth, that Orestus Son to Dencalion, first discovered the Vine about Mount Atna in Sicily. In another place he fayes, that it was found in the City Plinthina in Agypt. Aruntes a Tirrhen, banished out of his Countrey by Lucinon, whom he brought up of a Child, carried the first Wine into France. But before all these, Noah was the first that either Tilled the Land, or Planted the Vineyard; and when that he had tasted too much of the Fruit of the Grape, he was Drunk. Wine Taverns were fet up first by the Lydians, a people of Asia, which also found out and invented divers Games. Staphylus (as Pliny faith) was the first that allayed Wine. But for all these generally entertained Opinions the Poets will have Bacchus to be the first diviser

put Hops and called it Beer.

The dilinds were first observed by Aulus, as 'tis reported from the prognostication of the Inhabitants of the Islands about Sicily, who by the smoak of the faid Isles three dayes before, were faid to know what Winds they should have. Alolus for his great inlight into the Nature of them, hath by the general confent of Poets, the Dominion over them attributed to him. The Winds as some divide them, are faid to be four, according to the four principal Regions of the Aire; those that are more curious in their fearch and inquiry of their Natures, will have them to be no less then eight. And especially one Andronicus Corestes, who Builded a Terret in Achens, and set on every fide of it, the Images of the Winds graven, against the Rigion whence the Winds came, they were placed on Pillars of Marble, and in the middle he fet a Brazen Image of Triton,

Triton, which he had made so, that it would turn with a Gust and stand with its Face towards the Wind that blew, being so devised as to point with a Red to the Image of the said Wind; which hath been since imitated and used in most Countries; for its an usual custome to set up Weather-cocks or Fans, to show out of what Quarter the Wind bloweth.

The seven While Wen of Greece, who lived (as one saith) when there was a scarcity of Wisedom, were as solloweth, Bias he was born in the Haven Town of Prieane, in the Countrey of Jonia. Solon was of the Island of Salamine: Chilo was of Lacedemonia; Clebolus had his birth at Lindus in the Isle of Rhodes: Pittacus was of Mitylene in the Isle of Lesbes: Thales received his first breath at Miletum in Greece: the last of them was Periander King of Corinth.

The manders of the Mold, were reputed seven of the same number of the Wise men of Greece. The first were of the Walls of Babylon built by Semeramis of Stone joyned together

with a strange kind of slimy and gluish Morter, which grew in the Mines of those Countryes; and especially in the Lake, where stood in time past Sodome and Gomorrab, now called Asfatilda. These walls according to the Town, were built in a quadrangle, and contained in circuit (as faith Fliny in the 26th chapter of his fixt Book) 60 miles; fo that every square was fifteen miles long, they were 200 foot high, and 15 foot thick. To build thefe walls were hired by Semiramis, out of divers Countryes for a long space 300000 men. The Second was the Pillar of the Sun, offered by the Gentiles unto Jupiter. This Pillar stood in the Isle of Rhodes, and was made of Iron in the form of a man, of incredible greatness, infomuch that a man could scarce Fadom the great finger thereof. After it had stood 56 years, it fell down by reason of an Earthquake, and so lay till the Island was won by the Souldan of Ægypt, who carried as much mettall away as loaded 900 Camels. Third, were the Obelisci or the Piramids of Egypt of which we have already

ready discoursed. The Fourth was the Mansoleum of Mansolus King of Caria, Husband to Artimesia: this woman for the great love she had to his Memory, burnt his body, drunk his a shes beaten to a powder, thinging no Sepulcher fo worthy of him as her own body, the remainder of the powder which she found it impossible for her to drink, she buried in his Famous Tomb. This Monument was of a most excellent kind of Marble, it was 411 feet in circute, and 25 cubits high, it was invironed with 36 Pillars, most curiously carved. The Fifth was the Temple of Diana at Ephesus of which in 'its proper place we have also discoursed more at large. The Sixt was the Image of Jupiter Olympus, in Achia all of Porphyry, an infinite number of little pieces being wonderfully joyned together: this Statue or Image besides the excellency of the work, was more especially admired for the greatness thereof, and was the more Famous, by reason that the Games called the Olympiades were there kept. The Seventh was the Tower Pharos, nigh to Alexandria in Ægypt.

Agypt; built by Prolomens Philadelphus King of Agypt, to direct the
Passengers which way to approach the
Haven thereabouts, by burning of
pitch or other light materials: This
Tower was of a marvelous height,
and of singular Workmanship; the
buildin gwhereof cost according to our
Money 4800000 Crowns, some Authors
set down for the Eight Wonders, the
Gardens and Orchards upon the walls
of Babylon.

FIN

In the Tenth year of Queen Elizabeths Reign, Richard Dryer brought into England the Invention of making Earthen Fire-pots, Furnaces, transportable Ovens for baking Earthen ware, and had the first sole profit by Pattent, in the year 1555.

Making of Copperas, was first pra-Etised in England by Cornelius de Vossa

Merchant, in the year 1587.

William Saunders a Fishmonger was the first that brought our Calestial and Terestial Globes to perfection.

William Mathews in the Fifth year of Queen Elizabeth, was the first English Artist

Artist, that made fine Knives and Hasts, marked with the Half Moon for the Propriety of which, he had

the Queens Paten.

About the fame time, the way of making Ping, was found out by the English which before were brought in by Strangers, to the value of 60000 Pound a year.

One Bourass made first the Engine,

for Ecale-Boards.

One Ross, is reported to have made the first Fantone in England, and to this day that called the Ross Viol, is accounted the best.

The Engine for Clock-Wheels is an English Invention of about one hundred years standing, as likewise that for the speedy cutting down Wheels for Watches.

Chaines for Matches, is said to be the Invention of one Mr. Tomackee.

The First Inventor of Knitting of Worsted Stockings in England, was William Rider a London Apprentice, who in the Reign of King James the First, presented a paire of his own Knitting to the Earl of Pembrooke.

The

The late serviceable Moddel of Shipping, is affirmed to be the Invention or Direction of the Famous
