Secretes and soueraigne re- 1

ceptes well experimented and tryed by divers Authours.

Agaynst euery greese or payne of the head, except the Pockes.

Ake red Koles, Camomill flowies, Delilot, Calamint, Sothern wood, of eche two handfulles, seeth them in fourtye pounde of water a good wyne, butil half be consumed. And with this beyng hote let the Pacient washe his legges energy nyghte and moingnge, from the knees

bownewarde, and hys armes from the elbowe downed warde. Also he must not have hys stomacke full.

A preservative agaynste the fallynge syckennesse or epilepsia.

Take the beste castoreum, that you can fynce, and assa secida, of eche halfe a Dragme, rootes of Ptony wel beaten into pouder a dragme, aromaticum rosatum two dragmes, of all these beynge well mirte and mingled together with Syrope of Mynte, make seuen Billes, to be taken twyse or thryse a weeke when you goe to bed. It hath been often proued.

Agaynst the fallynge syckennesse.

The Pacient beynge tourmented with this disease it is good to make hym smell burnte fethers, or olde Shoes, for that reviueth and maketh them tome to them selves.

Another foueraygne remedye for the fame,

Take a hudged Swallowes, an once of castoreum, as much Myne as shall suffice, tof the best that can be found. Distil all together and gene the Pacient dynke thereof thre Dragmes fastyng. This water is also berye good for men that be apopleatique of they be wallhed with it.

Al thom Agaynfte the Palfey! To an am mut od a at ailing

Ake myarbe, maffir, of eche two dagmes franken fence a ogagme and a halfe, Cloues, Synamome, Buttmegge, Lignum Aloes, Bace of eche a bragme. Beate all thele into bery fine pouder . And the ponder bepng fpainkled with aqua bite, and baied againe pou mufte pet once fpainkle it againe , and continuinge fo fpainkling and baiengit foue tymes . Then beate it fmal againe. And with this ponder parfume a fore fkin laieng two dagmes therof bpon quick coles to the intent that the parfume be recepued through oute all the fkonne, and fo laied bpon the member that is infected. Dzels (whiche is better)let the fkinne poudered with the lande pouder, be laved whote bpon the paraliticke member and fo woone: And you hall fee a merueylous effecte, allo he must not have by a ligner for en estate

Another waye.

Ake a pounde of Aqua bite, the roote of iua, the roote of acorus, proote of flope, of ech two dagmes blacke Beper, Cloues, Butmegge, of echea Dragme, Bace half a bragme: All this you muft fampe well, & bynde it in a fyne lynnen clothe and let it fliepe in Aqua vite thre hole dapes, then drene oute the was ter, of this water take halfe an buce: water of ina and of Endine of eche three dragmes : gene it the Pacient to deinche in the breake of the dage, and let him not eate in fire houres after . The Pacient Chall feele a greater effect if the same day that he deinketh the water, he als so wathe the fore member with it.

mended Agaynst the francey, and that call a sould

De bodye beinge purged, it is good to haue the head, and to lave bpon the feame of the crowne of the bead quicke Digeons (hauing firft clefte them in the backe, and draiven out the entraptes) leaupnge them to byon his head untill they ware coloe: or els it. tle whelpes of a moneth oldetheir garbithe pluckt out: of if you will the lunges of lightes of a threpe of wes ther bote. But because one of the printipall causes of the fransie is the tourment of watchinge you must la-

bour to prouoke depe as much as you can, by remedies mete therefore: as with walhing bis legges from the knees bownewarde, and his armes from the elboine downewarde, with the decoction of biolet flowers, of Penuphar, of the ryne of Pandzageze rootes, and ans nopntynge his temples, the topntes of the arme even to the hande, and of the legge buto the foote with the ople of Benuphar and poplar mirt together.

A tryed remedye agaynste the greate payne, ryngynge and defnesse of the eares.

Ake the ople of Callozeum two buces, ople rofet, I and ople of better Almondes of eche an buce , of Aqua vite two bnces, mingle al together and feeth it butill the Aqua bite be confumed. Than enery night at euen whan he goeth into his bedde , baoppe foure droppes into his eares, and Coppe them with Cotton favourynge some what of Buske. It is a thenge pasueb.

Another remedy e well knowen and tryed. Ceth in some potte a pounde of Malnut ople, and I whan it smoketh, make the smoke enter into the pas cientes eares by a fonnell.

A remedye to stenche the bleedyng at the nose.

Ake the juyce of Plantaine, Hole water, and the belt Minaigre pou can, of eche foure bnces: pelkes of Egges well beaten two bnces : of acatia mirte with the fapde thonges halfe an buce: mingle al toges ther , and announte your fozebead with it and your thaote with some cloth.

Another for the same well proued, and of a meruey long if a , oftrengtbangena

De Dacient hall take the water of panis porcious as I much as that neede, & which he that take up at the nofe, a incontinent be that feele bim felfe bolpen.

Another fourraygne remedye. Thomas radion A Ake the blood of a man (that is to fay that bledeth at the note) an buce og two: and burne it bpon fome plate of iron, then make it into fine ponder, a blow it wto his nourelles, and he halbe well.

Another

Another for the fame.

Ake of the best Minagre you can get , Plantagne water of eche two pounde, wete certapne lynnen cloutes in it, and laye them to the foules of hys feete, and palmes of hys hands, and agaynut the lyuer, and the bloode that furth with Cent.

For the tooth ache, a remedye proued.

Hiera Picra to purge fleme and collor.

a medicine Take halfe an buce of Hierapicra : two Dagmes of Mythatoate, and halfe an buce of Aqua bite, and with all these mingled together, you hal often tie mes a dage announte the tooth that aketh and rounde the gomme that he ftandeth in : for this is lingular pf the ache comme of colo.

Anoher remedie whether the ache be by cold or heate.

Ake ftronge whyte Mpne halfe an bnce , of the rootes of lufquiame in Englythe whyte Benbane, an bnce : Let all be well fodden together , bntpil the thyed part of half of the wyne be confumed, wi this hote wone walh at the gomme of that tooth that aketh and keepe it a good whyle in your mouth, on the fyde where the tooth is.

Another for the fame.

Ake Sage flowers, Kolemary, Betony, Sticados ara bic, Bartozam, of eche a handefull and a halfe : of Nigella 02 melanthium in Englythe Geth, of perythrum in Engliche Pelytozye of eche two Dagmes . Let all this bee fobben together, in a lufficient quantitie of whyte wyne butil the halfe be confamed: then straine it and Campe thefe berbes, and make thereof a plaifer and laye it bpon the Jawe of the akynge tooth, & kepe the wone that is frained out in your mouth as whote as you mape endute it.

Another remedie.

American

A Lio, if the lapbe tooth be bollowe, mire halfe an bince of Ertacle together with Negella and pyrethrum of eche halfe an buce, and a Dagme of Aqua bite.

韓

Is a thing proued and tryed, and very good to take fallyng enery daye at the beginning of dinner, or els from day to daye an Alephangine pille.

A verye good gargarisme or gargelly nge of the throte agaynst the Quinley.

Take two pounde of Lycozous water, the suyce of Plantaines, the sucke of Dulberses, the sucke of Pyztelberrses, of eche two vaces: all this mirre together, seeth it well: than straine it and let it coole agayne, and than let the Pacient gargle & washe his throte slightly withall.

For the fame, in astain . auton

I Keede in hys throte fyne pouder of Plantayne leasues dryed.

Another for the fame, lyamer of median A

IT belpeth muche also to annount the sooze with the oyles of Camomille, of Moletts, of sweete Almonds, and

and of the greate of a Henne, as much of the one as of the other, miring it al together, and to annoynt therewith the foozeplace, with the application of newe thomas of builded wille.

An excellent plaister to soften or rype an impossume in the throte.

Take of Swallowes neffes a pounde, and make thereof a plaister with as muche Dyle of sweete Almondes, and of Camomille as sufficeth to make it, and laye it hote to the Pacientes theore.

Agaynst spytrynge of bloode commynge of the Lunges or Lyghtes.

QUE!

Another fecrete for the fame, certayne and experimented

Take the chelles of some rawe Egges, take awaye the lytle skinne that is within, and daye them so that they maye be made into pouder verye syne.

Than mire two Dagmes of this pouder with three vices of Plantayne water, and gene the patient of it ever whan he voydeth bloode, and you chall se that the Lunges wil be sounde. But if you wil that this medicine worke with more speede, and greater efficacie, mire it with two Dagmes of the sayde pouder, with halfe an vice of spape of daye Koses, halfe an vice of Purselane, and as muche of syapp of Wirtell, whiche thing you chal gene & Pacient sine vales together. And this thus taken he may be wel assured that from thence so warde the vagne wyll never breake more.

For the fame.

In is a remedie most certayne and proued as well to beale this sickennes chaunced to a man, as for to preferue one from it before it come, to eate energe more nyng fasting a scruple of Kubarbe rost.

statut agn Another forthe fame. and me strad sign ! !

Ederge daye at nyghte whan the Paciente woulde Aepe, let hym suppe a sponefull of mundified Bar, ley. Foz, at the last, the effect is very great, as well to preserve him, as to heale hym of it.

Agaynst the viceration of the Lunges or Lightes, and spettell full of matter and corruption.

Take a pounde of the tayles of tiver Crevices, and foure pounde of Cowe or Ewes mylke: and feeth all together butil halfe the mylke be consumed. And than Campe well the tayles of the Crevices or Crabbes, and discount them in good mylke, puttings to them halfe a handfull of Barley flower, and as much B.i. of

of amylum, of sweete Almonde milke soure baces, the yelke of a newe layed egge, and soure baces of Sugre very whyte: mengle all together, and set it on the syze to seeth, Aurring it alwayes softly, butil it be wel sooden. This doen let the sicke man eate of this composition at morninge and energy as muche as he thall thinke good: and he thall synde hym selfe very wel.

Another for the lame.

Ake vi. Dragmes of white Poppy sede, of Endive sede a dragme & a half, was much Sorrel sede, kernels of Dainces made cleane two Dragmes, the seedes of Delons, Gourdes, Extrons, Cowcumbers, of eche an once and a halfe, of Gomme Arabick, Tragacantha, of amyla, of eche a dragme, of his sugge of Licorous two Dragme, of the Lunges of a Fore a Dragme and a halfe, Penides the waighte of the whole, mire and burne al sightiye: Than make it into a fyne pouder, where you shal take two Dragmes, mingling it with an once and a halfe of the sprop of Juiubes, a thre was ces of the water of Snayles distilled. Than gene thes drinke luke warme to the Pacient in the breake of the daye.

Another for the fame.

Ingle halfe an once of verye whyte Sugre with fyre onces of the mylks of an Affe newe mylked, and take a lytle of it at the breake of the mozonyng, depinge a lytle open it, and at nighte whan you go to bedde, continuonge so a moneth at the springe, and twentye dayes together in Parues.

A remedye for short wynded men.

The an once and a halfe of Licozons made cleane, with as much Cetrac the graines of comes being taken away, Juiubes, & Sebesten of Mira of eche tenne, the roote of Emula campana purified of made clean halfs, an once, the roote of Foole foote of Horse hoose, called of the Apoticaries vagula caballina, two Dragmes

let al feeth in a sufficient quantitie of water, butil the halfe be consumed, than traine it, and dissolve with that which is trayned three unces of the best Hanna, or clies an unce and a half of the flowers of Accsis, and geve it to the Pacient at the syrst tyme when the pain taketh him, it is a thing tryed, so singuler that it wyll heale the sicke man, so that the Phisition shall bee no more troubled with him.

A drynke for the same disease, to be taken euerye daye thryse.

Seth wel and longe two baces of the Jupce of Emustarampana, with as much of the Jupce of Jope, and a pounde of the water of Foole loote of Horse hoofe: and make thereof a sprope with as muche Sugre as walbe necessary, of the which the Pactent wal take in the morning two baces without water, and as muche as at noone, and whan he entreth into his bedse: and as longe as the parorisme and sitte of his payne, it is good to put amonge it source droppes of gomme Arme, miack, with two baces of Opimel simple, and give the Pacient drynke of it.

Another tryed fecret good for poore folke.

Mire a pounde of wylve Pallowe oz marche Pals gether, towe rootes dried in the Hadowe, with foure pounde of fodden honnye well frommed: Aurre it byon the fyze untill it be lyke an Clectuarye, whereof let the Pacient take often tymes, and he shal fynd him selfe eased.

For the same, and good also for the poore sorte.

Take of cleare condite water two pounde, of Lecks
chopped very small thre vaces, of freshe butter two
vaces, of the best Sugre an vace and a halfe, and
the yelks of an Egge. All this being very well beaten
and styred by the fyre, shalbe genen to the Pacient at
values and supper.

A zemedy agaynft the plurefye.

Lung

I T is a thing wel tried that at the first assault or come ming of the payne of the spoe, it is verye good to be let bloode in the vayne called Basilica, of the opposite armerbut if the blood be let out at the fourth accesse or comming, or soone after, the Pluresse wyll by and by bopde away: not withstanding you must eneuer let the Pacient blood but his believe must spread and tosed, either with taking some cassa at the mouth, or els with some soft glister.

A decoction for the stomacke, verye good agaynst the Pluresye.

Defing let blood, as it appertagneth, take the sucke Doginge of Flope, capilorum veneris, Figges, Dates, Sebesten, dried Keasguges, mundified Barley, Lis corous made cleane, of ethe half a handful: seeth all in water as much as may suffice, t put for to disolve in it thre buces of grained Panna. But if the Pacient be a poore man take an unce and a half of Pulpa casia, whis the is the inner part of it called also Medulla, in stede of Panna, and give this drinke. prifis houres after hys letting bloode, and very earlye in the morning, it is a thing certaine that in proving this the Pacient shalbe healed, although he were not let blood but a little before the fourth accesse, because the matters and substance that nourished the disease in the larger condites are purged awaye.

Another remedye moste certayne agaynst all Pluresyes,

as proued as divine, for to preserve a man that he dye
not of it.

Make an oyntment of two vnces of Dialikes mirte with half an vnce of swete Almondeople, where with being hote annoynt the soze syde, callynge vpon it the pouder of halfe an vnce of Commin stamped very small and boulted. That doen, heate a Cabe bedge leafe vpon the hote coales, and spreade with old Butter but not salt, laying it hote vpon the griefer the payne will cease merueyloudge, and will resolve into matter

11.32

atto

odof lecretes dT 7

matter of an impostume, so that at the laste you hat have the honour of it, and the Pacient health. Det you must note that this remedie must not be vied but at the fourth accesse, ozels after. This remedy may also serve in enery great griefe disparsed thosolve oute at the bos dye beneth the head.

An eyntment to rotte of rype the plurelye. 6 .0103

Take two vaces of Ducilage or Ducaga of the sede of of Cabedge, with as muche Ducaga of the sede of Parche Pallowes, Ducago of Figges an vace, of Town milke three vaces, of freshe Butter two vaces, ople of sweete Almondes two vaces and a halfe: mire althis together, Aurryng it alwayes upon a smal spread and make thereof a soft oyntment with as much ware as that neede. This doen, spreade it upon newe shorne and unwashed Thulle, and laye it upon the griese, representing it in source and twentie houres three or source tymes.

A playster for the same.

Stes of well in a morter foure baces of the roos tes of welle Pallowes well sodden, putte to it an bace of Butter, an bace and a halfe of houng, of Pisgeons dunge two Dragmes: Mingle all together, and laye it bote right boon the payne, and soone after the corruption wil breake.

For the same.

with you hall annount the pacient morning and ever nying aboute the heart, before his meales, and he hall be well.

Another composition very good in the tyme of a plague as well to preserve as to heale.

Take an bnee of the best Ariacle, halfe bnce of the fuyce of Lemons, a scruple of Saffron, of the two fortes of Pearles, of redde Corall, and of Sorrell feede, of ethe halfe a Dragme: two Graynes of Camphyre: mingle all together very wel with two or three droppes of odoriferous whyte wyne, and make there of an opntment: a certaine quantitie whereof you shalforede von a crymson sike cloth, laying it hote von the Pacientes hearte, renewynge it morninge and evenynge.

Another owntment verye good, and principally for chyldren that are troubled with wormes.

Take halfe an unce of aloes epaticum, a scruple of Safs fron, two Deagmes of the tugee of Cytrons, a Deagme of pleasaunt whyte wyne: mire all well together, and speade it byon some linnen clothe, and lay it byon his heart.

A remedye agaynst the wormes in yonge children.

Take f flowze of bitter Lupines, aloes epaticu of eche thre Dragmes, of the tupce of wormewode two Dragmes, all wel mired together, let it be spredde byon some cloth or cloute, and laye it byon the chylocs Pauell.

A remedy agaynste the payne of the stomacke.

Take two buces of the cromme of the bread of Bran sprinkle it with the wyne of Pomegranettes bestwene sweet and sowre, and plaintaine water of eche foure buces: presse that harde, and give the wine tempered with the sappe water, but the Pacient: If the paine come of the continual and great burning of an ague, take this drinke an houre before it comme and T. i. you

pou halfinde it of a merueplous bertue. But if p pain be ercedinge, it halbe good to gene bnto the Bacient this Bolus folowing, at what houre fo euer it be that the vavne taketh bim.

Take thre Dragmes of the Clectuarie of Succo rofarum. two fcruples of Philonium romanum: Dire them and make

thereof a Bolus, whiche that greatly profite him.

Another remedye for the fame, whan all other wyll not profyte hym.

TAke fyzop of Roles, fyzop of Mozmewod of eche an buce and a halfe, a graphe of Opium, feeth them Aightlye one wamme, and ftirrynge it together with the buces of the both of a Denne, you hall gine the Pacient dainke.

> A vomentation or nouryshment verye syngular for the fame.

Ake redde Roses, the flowers of Camomille, of Mozmewod, of Mynte, of eche a handefull: beate the lapde herbes byon whote burning tyles frame kled with whyte wyne, and lays them often tymes by on his Comacke.

Another.

T is a thing treed against the payne of the fromacke Lo that it come not of colde, and also to bee preferued from the same, to take daye by daye before meales. two scruples of Pilles of wathed Aloes.

Another agaynft the fame. 3 401 15 61011 1100 2 ned

Ake halfe an once of walhed Aloes, and three one ces of honnye Kolet, feeth this in two pounde of water, butil there remaine but halfe, than ftraine it through a Arainer, & gene thereof buto & Wacient, every days early in the moznyng two buccs: this will beale and cure his grief, og els wil preferue him from it tibe be not already taken with it. Another remedy, man manager and amorantaget is

Take frue buces of Camomille water diffilled, and of Autmegges well beaten into pouver halfe an buce, if you give it whote buto the Pacient, whan the payne hath him, he halbe eased.

Anothez temedye proued

Take flowers of Camomille, Welflot, Went, Pules gruin, Calamynt, Southernewoode, Senegrene, feede of Lyne, of eche a handefull, red kofes, spica-fguinanti, of eche two Deagmes, Danci, carvi, Angle, Will, Fencl, of eche halie a handeful, Galingale, Zedoria, of eche two deagmes, Cloves, Putmegges, Liguralors Ware, redde Coeall, of eche a Deagme: let all feeth in a fufficient quantitie of water and odoeiferous whyte wyne until the thysde parte be confumed: than with a sponge seeped in whote lycoure nourishe there with his stomacke moening and evenyng before he eate, and this will bryng his somacke in good state.

A nourishment very good agaynst the same,

Take a pounde of ople of Spike mate in Balneo marie, warme it luke warme, and with newe thorne and but washed Mulle Reeped in it, nourish therewith the Comacke, and at the last binde it byon it.

A lytle bagge to carye aboute one agaynst the same

Take worme wod, Mint, Pulegium. Calamint, of eche halfe a handful, Putmegge, Clones, Dace, Lignum aloes, of eche adragme: make all into a fine pouder, and put it in a litle bagge, parfumpng it with odorifes rous whyte wyne, and than lay it boon your flomack: if you continue to carp it about you, you that feele your lelfe merueylous well.

C.ff. Adzinks

A drynke for the fame.

I have found my felfe alwayes very well, as well for being preserved from this payne of the stomacke, as delyvered of it, being troubled with it. To witte in takinge sire vnces of honnye rosat strained, a Dragme and a halfe of Autmegges, and two vnces of the beste water of a Tine, and seeth them altogether until the water of the Tine be consumed, and in taking fasting sucrye mornings three sponnes full of that whiche is strayned.

Another remedye to lay to the stomacke.

Take Pasticke, Cloues, Putmegges, of eche a diagone, halfe a Diagme of Pace, and as much of Synamome: make hereof a verye fyne pouder. Than tost the opper of neither crust of a lose of Branne, and dippett in whote Palmesey, Arowing opon it of flato pouder, and so layinge it opon your Aomacke whote, the payme will go away incontinent.

Another remedy well tryed and proued, and good, chiefely for yonge chyldren vexed with the payne of the ftomacke: which is knowen, yf they vomite or belche.

Take the crommes of Branne bread foure unces, rost or tost it, and beate it small into pouder, and after incorporate the pouder with the surce of mormewodde, and ment of eche as much as that suffice and put to it more a dragme of Putmegges. If althis being mirt together make an oyntment, and laying it by on your fromacke, it will ease and cease the pagne, the belching and the bomiting.

A remedy agaynst an apostume in the stomacke.

In is a thing wel tryed, that if the Pacient take eues try moznynge at the breake of the daye, fire buces of Camoinill water divilled, he thatbe cured and beasted of the impodume already began in him.

A Saintithe Crabbelyce that breede aboute the val-Luie members and boder the arme pyttes, annoynt those places with aspes layed in ople : but against those that Aicke in the epebrowes, take an buce of As loes, Cerule, Dilbanum, of eche five bnces: make all into pouder, and make of it an oyntment with larde cut small as muche as wal suffice.

Agaynst a Cankar.

NDte that the leaves of wploe Juie fodden in wyne, and layed to it are very good for it.

Against the litle wormes and itching of the hands or body.

A Sainft the itche and woames in what foeuer part dof the bodye that it be, but chieflye in the face and forehead, you must seepe weate in wyne with the

ponder of olibanum, and lay it byon the place as it were a playfter.

Against the swelling of the coddes.

Take Pallows, Wormwoode, Teruene, bismaluz or march Pallows, tansie, and two cabbedges, seeth all this in olde Arong wine, and bathing and walhing them twise or thrise a day. As for her her stampe them and seeth them in Ponnye, laying them by on the coddes with wyne.

For to make the wormes come out of the handes and feete.

Ake a hote tyle, and some bestell ful of water, then put fome feedes of lufquiamum bpon the red whote tyle, holding your handes or feete over the fmoke of it, you that fee the wormes fall into the water lyke lytle heares. Another waye: Burne Dte Arawe into alles, & put it into water as bote as you mape endure it, holding your handes and feete in it, and endurynge the heate untill it ware colde: than Araine and preffe it to harde butil there remaine no mooze water, feperas tyng it faire and foftly. Bou hall finde the wormes as it were little threades, which the smoke of the Jusquis am bath drawen out. If the place doe itche, and is eas ten with wormes, burne frame into albes, and toffe it and mingle it in water as bote as you can endure it: put in your hande or foote that hath the wormes. and they wyll come oute. Than afterwarde heale the knawing as you bo some other sooze.

A remedye for the deafnes of the eares.

The the fatte or greate of eeles new killed that swimmeth upon the decoction of them, the tayce of caprifolium, Barba louis, and a handfull of Antes or Pilmers egges, bray and fraine all, mixing it and ferthing it with oyle. The decoction made, put to it some Unaigre or wyne sufficiently, that it may be the more penitrative a persing this done, power some of it into the eace that is not desse, stopping the other that bath the

Take the leaves of red Cabbages, and their fredes, the rootes of great rubia tinctorum of eche an equall quantitie, braye all and feeth it well butill three partes be confumed: than firaine it, putting to it some bonnye. And feethinge it againe butill it be thicke. Whereof you hall geve the Pacient two spones full, morninge and evenynge.

For the scabbes of the handes.

Take Lapatium acutum, and fumitozie, making there, of as it were an opniment with hogges or iwines greafe and Paye Butter, wherewith announte youre handes.

A water of a great and meruelous effect, for to keepe mans body e from many infirmities and diseases.

Take foure pounde of diffiled Aqua vite, of verye good wyne, two pound of falt burned, two pound of quenched Brimstone, foure vaces of whyte Eartre, foure vaces of the woode of a Filberd tree. ist. vaces of rocke falte. Let all this be brayed, spited and mired together, powring upon the foresayde Aqua vite, and putting it in a Limbecke to diffil.

What operations come of suche distillations.

The first e distillation draweth but o it the powers of all the spirites of man, that no benimous best can approche or come nighe him: with it is kepte siethe and sishe as with baulme, it healeth and cleanseth lentils and other spottes of the face; it driveth as way all maner of scabbes from the body, and cleanseth watrynge eyes.

H.ii. The

The seconde disseth awaye impossumes, and othe superflutties of the bodye: it pulieth oute and healeth lose treth, and putteth awaye all swellings of the Lyuer.

The thyzde cleanfeth all spottes and scurfe, it hear leth Kinking of breathe, and purgeth all flegme of the

fomacke, as meate not bilgefteb.

The fourth putteth oute of the bodge, all colde and congeled bloode.

The fyfte belyuereth the bodge from the fallgnge

fpckenneffe.

The firte dequeth away all languithe and infirmitie come of the goute.

The fenenth putteth the goute from the fecte.

The eight ercelleth the Baulme, which you houlde keepe well.

The nynth, if you mire with it, and biffolue golbe in

it, is a preferuative for the lyver.

The tenth, if you put a droppe of it in any bestell of golde full of wyne, a frothe and skumme will swimme bron the wine whiche is verye golde in deede, so that what so ever you touche with it shalbe faire golde. Bet you must enote that after everye distillation you must kampe and spste the leese as at the first tyme.

Another water or Balfamum almost for the fame thinges.

TABE a pounde of Turpentine theise diffilled, a pounder of pounde of Aloes theise also distilled, a pounder of Amber rawe, Pascatum beaved by on a stone in maner of some liquide owntment, putting to all this a lytle oyle, and so incorporating it and distilling it nine tymes. It is a Bauline that may well be kepte, for it is so partite that it absorb first all triall of fyer & water.

Secondly, it wyl pearce thorow the hande.

Thirdlye, in annountinge your face it kepeth your pouthful colour.

Fourthly, it l'afteneth and consolidateth all incision of cuttinge.

cilian

fily,

Fiftly, it purgeth merneyloudy the eyes. Sirtly, annoynting all the bodye with it, it is layde that it thall never rotte or corrupte, nor ever breede wormes. This bath Hermes the Philosopher written and confirme it as most trewe, for as muche as I have proved and tryed it.

A pouder very good to conferue the fyght.

Ake Betony, Kue, Selandine, Sarifrage, Leuifici. Pulegium, Annice, Synamome Euphralia, in Englich evebaight, of eche a handful, Grani Paradifi, Binger. fennel, perap, Hope, Daganny, Offer of p mountains of eche a dragme, Valingale an unce, of Sugre an unce Make all this into pouder, and eate of it everye days with your meate: for the lighte is thereby preferned. And if your light be perithed or halfe gone, it wil heale ft and recover it perfitly againe. This pouder is found and thus ozderned by mailter Berarde, which trued it boon him felfe : for he bauing bled frectacles the frace of twelve peres together, and pet scant coulde see with them, not reade the greatest letters that were (fo much was his light perimed) after he bled this pouder but a whole Lent together, only in this fort as I have to loe pouthe recovered to his fighte agapne, that all the reft of his life after, he coulde read the smallest letter that ivas, very perfitly.

Agaynst the payne of the flankes or the pluresye.

Take a wilde Bozes to the of the byper Jawe, the greatest, and make thereof a pouder, whereof you shall give the Pacient to drinke with a litle broth, and he shalbe cured.

Against quartayne agues

Take the greafe or fatte that is bover the manes of borses, and seeth it in a new earth pot: and when you seele the ague come, announce the chyne of your backe, tyou shalbe healed in thre times so boing.

D.iii. To

To heale old woundes and cankers of the leggs.

ma

fall ti

dayth

and ti

Take cuttyngs or thearings of thomakers leather, and feeth them, and the greafe or fatte that you thail get of them, fet it by it selfe: than take of the berbe that groweth at the foote or roote of Willowes the finest that is, and the mose that loketh like Welsusting it well and make it into a ponder: and laye of it byon the wounde, and with the sayd greafe annoint round about the wound, and he shal shortly be whole.

Agaynst the scurfe.

Tanofeeth it with a glassefull of wine, and halfe a pound of Beane slower in maner of an opntment: than take beyne of pisse, and heate it as whote as you have tan endure it, where with you shall washe your head, and than annount it with the sayde grease, and it shall be whole within sistene dayes.

Agaynft ventofitie, collicke, or payne of the matrice;

Take a dragme of intrailes made in pouder, a dragme of Stecas, gene it the pacient to drinke in a newelayed egge, and the challe healed.

For the hardnes or brawne of the feete.

Deppe your feete in whote pile, a whan the hardnes of braune is molified, take a launcet of cylfours, and launce it rounde about: and than by and by put some insee of Syngrene byon it, and the nerte morowe it woll be well.

adt a a Tormake very perfire Vinaigre, and addit to all

101.00

Take the cromme of a inhote lose newe drawen out of the Duen, a graffe of strong Uinaigre, where, in you shal put some Ginger, Pepper, Pyzethrum of Leuant, Calamus aromaticus, the which thinges being brayed and stamped together, you shal put into Uinaigre: Than take the cromme of a whote lose, and put it so that it make recepue to it all the soresayde thunges

0.709

thinges. Than drie the layde lofe in an Onen, and make thereof a pouder, and put the layde pouder in a Hoggehead of wyne, and it will become verye perfite Minaigre.

Agayaft the fallyng fyckennes.

Take the Datrice of a Sowe, the whiche beinge made in pouder you hall gene to eate 02 to 02 inke but the Pacient, and as soone as he bath recepted it, the sickennes wil remove from the brayne, and speede into his singers endes, tormentinge him verye sometime but whereas the sayde matter thall assemble and tome together, make a rupture; and the matter will come out as pellowe as Sastron, and he halbe quicked be bealed.

For children that bee broke.

Take white paper, and chawe it well with your teeth, and make thereof a plaister, as great as will concrat the broke, binde thin a swade band with a linnen clothe: Whan lape it to his coddes, and make fast the swatching bande: but you must renewe energe day the paper chawed, and he shalke whole.

Agaynst the payne of the Splene.

Take of the longes or lightes of a Fore made into pouder, and vie to gene to the Pacient to drinke or to eate of in good white wine, the chalbe cured.

For to Renche bloode. 1911 mode desail dan sey

Take mans blood oried in the Sounne, and make it into pouder, e if it chauce that there be any vaine broken or hurte, whereby there commeth out a bundannce of bloode, lay of the laybe pouder byon it, and it halbe frenched.

For to heale in foure dayes the scaldynge with water, or anye other thunge, withoute syntments or Playsters. It hath bene tryed and founde trewe.

qui

Agaynst the cogh be it neuer so great.

Take Brimstone made in pouder, as muche as you can take by betwene your three fingers: Give the same but of the Pacient with an Egge half rosted, before breakefast, sque dayes together, if it be a man, but if it be a childe three morninges. And there is no cogh so behement, but it will heale it within the sayde tyme God wyllynge.

sanda a For one that hathifvallowed downe a blood Sucker.

Take Ulinaigre wherein there hath bene first quene theo some reade hote your and into the same put some butter, and heate it by little and little, and give it him to drinke, and it wil make the bloode sour ker come out. It hath bene proved.

Man - Magaynft an olde and inueterate cogh. 311 10 3031 313

Take quicke Bzimstone, and beate it into pouder, and waap it in olde Pogges of Barrowes greafe: And than the first day give thre Pilles thereof but to the Pacient, the seconde day two, and the three day one. And the saide Pilles must be made so that he may swallowe them downe.

Agaynst the bloody flyxe comming of the artere or synew

Take the roote of Conspic called Marquerites, washe it in colde water and scrappe it with a knife of guery 02 bone. Give but the pacient to drinke two buces 02 more of it, and as muche as he can eate. But note that he must not touche any Minaigre that baye, though

though it have greate vertue to staye the bloode, for frewely it taketh awaye the effecte and vertue of this roote, if you geve him any with it.

For to restraine a great and vehement vomitynge.

Take a litle quicke Brimstone, and as much of the feraping of a Hartes horne: all being brayed and made in pouder, mingle and temper it in a softe Egge, and drinke it, and it will stoppe the bomiting.

For them that can not kepe theyr meate in theyr stomack but vomite it vp agayne.

Ye hal take a little aloes and glue it them to drinke with colde water, and it wil make them kepe their meate in their homacke.

To quenche and affwage thrufte.

Ye hall take water and oyle mired together, and beate it a litle and byinke, and bomite it by againe by and by. And if neede be do so agains, and it will quenche your behement thruste.

Another waye.

Y Chall take the yelke of a Denne egge halfe rou, e mired with oyle, and swallowe it downe, and it will take awaye your thruse.

Another.

10

II

YE shall take a stone in a fountaine, and laye it quickely byon your tongue, and holde it so a while and it wyll quenche your thruste.

To stoppe the hycket.

Take a spone full of Ainaigre made of the Herbe Scilla 03 Squilla, and 03 inke it, and by and by the hicket B. iii. will

well ceafe, by the grace of almightye God. For to stoppe the hycket that commeth often.

T'Ake whote water, and put pour handes into it, and holde them there a good whyle, and the hice ket wil ceafe, it hath bene proued and found true.

A soueraine remedy for them that have wry necks by reason of shroken synowes: also for them that have the goute.

Take the Cones of a Beuer, called Castozeum, white Depper and Berfeley of eche equal quanti. ties:bzay al together & lift them. This bone, take a sponefull of it, and put in so muche honnye, and two mouthe fulles of whote water, and give it the Pacis ent to dainke befoze breakefalt, and he thalbe healed.

To take away the finelly ng vinder the arme hooles.

Ake bery olde Bengewine, and make it into pous ber, and fyfte it: and than rubbe your arme booles with it, and they hall smell well.

Against apostumes and swelling at the roote of the nailes. Take an akozne brayed with lope, and lay that byon it, and they hall be well.

To make a mannes nayles growe incontinent which be fallen of.

Ake the herbe that is called Pentaphillon 02 Quinques follium, in Engliche Cinkfoyle, and baage it with any greafe: and lay it byon the place and the nails will come againe incontinent.

Against the disease called Mentagra or Lichen , whiche is a foule breaking out or coneryng al the face with a scabbe and beginneth at the chynne.

Ake the freshe braunches of a figge tree, and feeth Them in Clinaigre, & than bear them well, with this annount the foose, and bnosubteoly be hall be cured and beated immediative. emies af squillegand cointices, eind by and be che chechet

43.

For to knowe a secret or hydden dysease of any man and to heale the same.

Take a yonge whelpe that yet sucketh, and let him lye nyght and day with the man the space of three dayes, duryng the whiche tyme the pacient chall take milke in his mouth, and spite in to the whelpes mouthe. Than take the sayde whelpe and cleave him in peeces, and you chal know the sicke part of the man by that of the dogge, which you chal see either infected or whole and sounde. For certainlye the whelpe draw weth to him self the secrete and bidden disease where of he dieth, and the man chalbe healed, and you maye burge the dogge.

For them that voyde blood at theyr fondement, and for those that have theyr bloode broken.

You hall take the ponge springes of nettels berge tender, braye them well in a morter, and take the supre of them, and give it the Pacient to drinke as some in the morninge, or with some fronge Minaigre and colde water, three dayes together, and there is none so corrupt bloode but it will purifie, nor no lare so greate but it will stoppe it.

Agaynst the wormes that engender in mens bodyes.

Y Du hall take the galle of a Bulle, and dippe some Mulle in it, and lay it byon the Panell, and it will make the wormes come out of the bodge.

Agaynst the gripping of the belive and defyre to go to the stoole and yet do nothing.

Take cowe milke fooden, and geue the Pacient oftentypies deinke of it and he chali be whole.

Agayoft the payne of the collicke.

1.111.

Take

Take the lytle by de called in Latyne Vpupa in Ensalishe a Lapwinge, and burne her whole with her fethers, and take of the ashes, and give it the Pascient to drinke in wine.

Against the vicers or fystules in the foundement of a man.

Take Date fiones and burne them and than make them into a fine pouder, a laye often tymes of the same upon the fitules or vicers, or upon the hole of the foundement, and he shalle whole.

For to heale the emorrodes, or those that lose their blood.

Take Leekes and braye them well, and take the supre of them, the whiche you had give the Pacient to brynke before breakefall, and the Emorrobes will soone rease by the grace of God.

Agaynst the vicers of the soundement, and agaynst the disease called commonly saince Fiacres syckennes.

Take the pylle or ryne of a Domegranade, breake it and feeth it in good wine, than bray it wel, and laye it boon the foore place lyke a plainer, and it will without faple heale the disease.

For to type or breake an apostume or swellynge in the grvne.

Take naffortium, and bear it with pitche, and lay it bp.

Anotherd (dille the smooth

Take bullekt lyme, two garlicke heades, the yelkes
of thre egges, mingle al together, and lay it byon
the lose place like a plaister: this wil put away all
the payme and swellinge of the apostume.

Against hurt or flawing of the skyn by chasing and going either of the seete or betweene the thighes.

Take

Take a moster of leade, and a pefile of the same, and put in the saide moster some ople roset, and the pelke of an egge: the which things you shal grinde butil thei become thicke: and till some of the leade be mingled with the said opniment. And when it is thick like a plaister, speede it whom a sync & soft linen cloth, and laye it whom the paine, and continue thus three dates butil the paine be whole.

Against the swelly ag and payne of the foles of the feete.

Take the Mosse that groweth in the water, but let it be greene, by ay it wel with oyle olyue, and laye it by on the place with a linnen clothe, and it will cease the payne, and take away the swelling.

To make warres fall of.

ŧ,

a,

虚

Take the Jupce of Sorrell berye cleare thre buces, of bitter or fowre Orenges, good whyte & cleare minagre, rose water, of eche an buce. Pake there, of a drinke, putting to it a lytle Sugre if you wil.

A drynke to cause one to sweate.

Take good triacle or Mythribatum a dragme, bole armenick of the best, or of the pouder of one of the herbes called cardiacx, afore discribed halfe a dragme: Scabiose water two buces: water of Dralis, Buglosse or Borage of eche an buce: and make thereof a drinke.

Another drynke eafye for poore folke.

Take the becoction of Scabiose, and of the sowers of redde Poppye a glassefull with a lytle Sugre.

De a Ptysane made with Bartey and Anne scede and the rootes of Bersley. Dest the decoction of Cyche peason, the rootes of Persley, the rootes of Succeeye: the one of the other decoction with sharpe Speop two buces, of with Sugre and a lytle whyte Usnaigre.

These deinkes must be taken whote, the Pacient beinge well coursed in his bedde. The Ariacle and My, the idea, although they be of great essicate in this best halfe, yet they are not meete for women with childe, nor so yonge children. The ble also of them ought not to be often, nor in greate quantitie, when the severis

great. Some mennes adulle is to mingle the mederine for sweating who some diffilied water, or with the decoction of herbes, concerning the part to the whiche the venimous matter bath his course. Powe of a man knowe that the matter goeth to the head, they woll that the pacient take it for to sweate who me diffiled water, or with the decoction of Betony: but if it go to the vitall parters or to the break and hart, with the waster or decoction of Borage, whiche is very Buglose. If it go to the belly and bowels, with lycour of More mewodde. If to the lyner, then with the decoction, or water of Agrimonie, which is the true expansion.

An epitheme or medecine to laye the region of the harte to coole it.

Take kole water foure vnces: water of Miolettes and of Rempher of eche thre vnces: water of Busgloffe, of Pralis, of wine of pomegranads of good Minaigre, of eche two vnces: of Coriander prepared three dragmes, redde Koles, flower of Pearles of eche a Bragme: of redde Sanders halfe a dragme: of bothe Coralles, of Camphyre, of eche a scruple: Saffron half a scruple, myngle them togyther. And make thereof an Cpitheme.

An Epitheme for the Harte good for poore folkes, whiche maye also serve for the Lyuer.

This made of twelve buces of a pounde of Role was
ter, of three buces of good whyte Ainaigre, puts
tynge to it in Sommer whyte and redde Sanders,
of eche a dragme. If it be in Minter, in fiede of Sanders you hall put to it Cloves, the flowers of Rarbus
celtica, or of Lauendar of eche a dragme.

An Epitheme or medecine for the Lyuer.

Take the water of Successe in Latine ambubeia. Cole water, of Oralis of ethe fours buces: whyte Ainaigre

of secretes.

50.

Tinaigre: wyne of Pomegranades of eche two buces: pouder of Diarhodon abbatis two dragmes: the pouder Diamargariton frigidum, whiche is a confection made with Pearles, one dragme: redde Sanders halfe a dragme: Camphier halfe a scrupie. Pake thereof an Epitheme.

Locall medecines, and fyrst a plaister or oyntment, for to drawe and disfolue.

Take the rootes of Narciffus, 03 of Flower beluce with his ople, and braye it with Honny. It is good for a delycate bodye, and easeth all the payne.

Another easye drawyng medecine.

Take Rue 02 Dogon brayed with Triacle, 02 Arf. acle alone, 02 of a Radiffe roote cutte into lytle rounde peeces, and laye on one after another, and chaunge it often tymes.

Another very good in maner of a plaister:

Take Diachylum, two bnces, Ammoniacum, Galbanum, of eche halfe an vuce and put them together.

Medocines of the kyndes that burne the skynne or fleshe called medicamenta caustica, or vesicatoria, whereof the fyrst is very stronge.

A plainer of Cantarides, and of buffecht lyme mire bed with oyle of Malnuttes in Acede of a lancet, fortoget out the swellinge.

Another plaister.

FINIS.

Here after folowe manye

which the second of the S. Te of to 6 the chief

goodly recepptes, touchynge the handelynge of dyners metalles, all well tryed and approved.

And fyrste for to harden yron.

And thereine, and bear it fialkes and all, and keepe the tuyce of it in some glade. Som when you will harden any you, put to the same tuyce as much of pille, with the inyce of a little worme called in Latyne spondilis, in Dutche Engherlincker. And let not your pron be to whote, but when you see that it is indifferent whote, quenche it in the saide mirion, and let it coole of it selfe untill you see lytle spottes byon it somewhat yellowe, and than put it to the sayde water. If it ware berye blewe, it is a sygns that it is not hardened inough.

For to harden knyues, and other fuche lyke, 11 1116 1131

The fyrst Booke

Take the marowe of a Hogle, wherein you hal coole your gron.

For to harden a fyle or other infrument of yron.

Take olde those and burne them, and make them into a pouder, and put to it as much falt: can this mirture upon and under the Fyles in a Cofer of these of you coursed with a cours of you: and lay the pouder so that it may bee as much aboue as under, the thickenes of a strawe. Court the sayde cofer with his couer, and put it into fiver until it be redde whote: after this let it fall into some colde water, a you shall have the Fyles good and very hard. Down may annoy not them also with oyle of Lyne of the Goates bloods.

To harden any other substaunce materiall.

Take the supce of Epnkefoyle, with the supce of Mormewodde, and put it in some Glasse, than take wormes which you shall stampe, and strapne thorowe a linnen clothe, and rubbe the whote you with all, and than quenche it in the sayde supces.

To make any inftrument of feele harde and sharpe.

Tak & the leaves and rootes of Bugloffe fodden in water, wherein you half quenche your infirm, ment of you.

Another

Take Deagontion with his rootes, and as muche Meruine: feeth this in cleare water, and lette it coole, and ware cleare, and so annoynte your instrument with it. Also take mannes posse mirte with cleare water, made luke warme: in this quenche your instrument. Also you may harden it in good Bustarde made with stronge Unaigre. Also when you wel harden any thing you must see that it be cleane neate and polithed.

To separate gold from syluer.

Cate small the spluer whering on thinke there is any gold, then cut it in small per ces: than you shall put aqua forcis, in a glas of separation upon a little fyer until it be bote, a cast up little bubbles like bolles. Then power the water out into a cuppe

of copper and let it coole and by this meanes the filuer will flicke about the cuppe, the which you must let day in the cuppe: and whe you have poweed the water out melt the spluer in a hollowe sharbe, and then take also the gold oute of the glasse of separation, and melte it in one.

Another waye. Principle it is a figure in

8

Į,

Tatile with leave, then turne it as then and as fine as you can be no me thing, then cut it in croked and wicthed peeces, and put it into the glasse of separation, powie in by on it into the glasse of separation, powie in by on it is a finger hight about it, stoppe the hole about that it breath not oute, then bold it by on a slowe her butil the seller be disclined in to the water, the gold remaineth in the bottom which is black: then cast oute this water into a cup of copper as before, and powie by on it some cleane water, and the spliner will beginne to gather into a curb and will gotto the bottome.

36. fitt

Than

The fyfte Booke

Than powie oute the water againe, and die the siluer with a sodayne heate. This done, put it in a croset or earthen pot, and melt it, and being molten powie it out, and do the lyke with the golde, and whan you put it into the melting pot, put to it a little Borar.

Another waye.

Take antimonium, and put it in a melting pot that is with a tharpe pointed bottom, and melt it. Lake also the Silver that the gold is in, and melt it and powze it into the antimonium, the golde will go to the bottom, and the silver will tarpe in the antimonium. Than take halfe an unce of copper, and two unces of lead, and the antimonium, let them melte together, and powze them into an earthen pot, the antimonium wylt burne the Copper, and the Sylver wyll abyde upon the pot.

For to seperate Golde or Sylver wythoute syer of

Take two partes of falt Armoniack, and one parte of B2imitone, beate them into pouder, than amount your bestel, dishe, o2 any other thinge his gylbed, fy2st with oyle olyue, and than disparse the said pouder by on it, e whan it is so fast byon it, set it to the sper, and beate it over a bestell of water, and the Golde wylt fail out of it.

To separate golde from Syluer with a pouder.

Take an. viii. parte of Boymstone, a. rbi. parte of falte . iti. buces of falte Armoniacke. it. buces of minium, and do as afoze is faybe.

To make golde fofter.

Take Percurp inblimed, falte Armoniacke of eche an lyke, make them into a pouder, than put your golde into

of secretes. 69.

into a melting pot, and whan it is molten, put to it a litle of this pouder and it wil be foft.

Another waye,

Take half an buce of Aitrioll, half an buce of Mer, bet, half an buce of falt Armoniacke, half an buce of burned Brasse: al being mingled with aqua fortis, let it so repose in the heate two dayes, and than let it harden: doe this three times with aqua fortis, and let it brie: make it in pouder, and put alwayes byon it half an buce of gold, a dragme of pouder, and powre it three tymes into it, and it wil be softer.

To make golde and filuer fofter,

Take Bonny and Dyle of eche alyke, and quenche your golde and silver, being whote and giowing, three or foure tymes in it, and it wilbe softer.

To soften all mettalles, and other thinges that are not foste, so that they shalbe softe and gentle to bee, wrought vpon or forged.

Take Patticke, Frankensence, Myarbe, Bozar, Mernix, of eche halfe an buce, make all into a pour ver together, and cast the bignesse of two or three person of it by on harde things, and they wil be soft and tender. Take what metall you will, heate it by on coales, and quenche it in the water of salt Armoniack and it will be softe.

An oyle that maketh all metalles fofte.

I f your spluer be not soft, melt it, and powze into it this oyle that foloweth. Take Saltpeter, Tartre, Salte, Merdet, boyle all together, butill the water be consumed, powze byon it pisse, and let it so consume, and you shall have an oyle of it, the which you shall be.i. put

The fyfte Booke

put into your filuer whyle it melteth, and you hall make it foft.

To separate golde from copper.

Ake a Forneyle with a hole, that you may put in a pegge of two, the whiche pour mape take oute when you will, and underneth in the bottome of the Forneple'a gutter or bole, that the king whiche is the golde maye remaine in it. Take thopfe or as much Lead as Copper, and put it byon the bole-oz gutter of the Forneyle, powring it alwayes butill there be no moze lead: Than take an pron mete for the purpofe to take away the fkynne of it, that it maye be cleare and neat, for than thall the copper be well prepared. This Done, take a quarterne of common falt, of baimftone a quarter, of faltpeter a quarter, of oppiment a quarter: stampe these fower well in a mozter, and power the said ponder upon the copper, whan it beginneth to run and melte, the gold wil go to the bottome, pluche the pegge oute, and the king will remaine in the hole oz gutter, take it out afterwarde with Lead oz Antimos nium, and you thall fynde the Golde.

Another waye.

Take Antimonium, and melt it with your Copper and being molten you mult ikimme it well, than power it into a dithe of stone, adding to it quickly as much quick silver, cover it w another dishe, thake it well together, the powder deaweth the golde but it and when it is colde agagne, open it, take the Hercusty out, and put it in another dishe, the which you shall set byon the fyer, that the Hercury maye go awaye in a smoke, and you shall fende your Golde in the bottom.

A pouder to separate golde.

Take falt Armoniacke, Merdet, of eche one parte, Saltpeter two partes, Antimonium as muche as all the refl together, make them into pouder, and

of secretes. 70.

do as before, and the Golde wyll go from the Copper. respected and resemble it book as der agreemen
