History and Chronology,
Practical Levelling and Surveying.
as in the first year. French, twice a week.

LATIN DRAMA.	GREEK LYRIC POETRY.	GREEK DRAMA.	GREEK DRAMA.	PHYSIOLOGY.
CHEMISTRY, GALVANISM & ELECTRICITY.	CHEMISTRY, MAGNETISM & ELEC. MAG.	OPTICS WITH EXPERI- MENTS.	OPTICS WITH EXPERI- MENTS.	CRYSTALLO- GRAPHY.

English Literature. Electricity, Galvanism, Chemistry, Magnetism, etc.
Composition by Classes once in two weeks through the year.

CENTRAL FORCES. ASTRONOMY.	ASTRONOMY.	MORAL PHILOSOPHY.	PRINCIPLES OF GOVERN- MENT.	EVIDENCES OF NAT. & REV'D RELIGION.
METAPHYSICS.	METAPHYSICS.	CICERO DE OFFICIIS.	PRINCIPLES OF RHET. AND FINE ARTS.	EVIDENCES OF NAT. & REV'D RELIGION.

Political Economy. Chemistry, Anatomy, Physiology. Hist. of Philosophy.
Disputation weekly, by divisions through the year.

Private classes may be formed, during the two last years, in the Hebrew,
HISTORY will be given in connection with the College of Natural History.

University of Vermont, Nov. 1835.

REMARKS, &c.

ADMISSION.

Candidates for admission to the University must produce satisfactory testimonials of good moral character, and sustain before one or more of the Faculty an approved examination in the following studies:—Common Arithmetic, Elements of Algebra, Elements of ancient and Modern Geography and English Grammar. Those, who propose to pursue the department of Languages, must also exhibit an accurate knowledge of Latin and Greek Grammar, and be able to translate with facility Jacob's Greek Reader, and six books of Homer's Iliad; Jacob's Latin Reader, Sallust or Cæsar's Commentaries; Cicero's Select Orations and Virgil. The Authors here mentioned are preferred; but the amount of knowledge will be regarded rather than the particular books from which it has been acquired.

The regular times for the admission of students into the University are on the day preceding Commencement, and that preceding the first day of the autumnal Term.

The parents or guardians of such as become members of the University, or the students themselves, are required to pay the term bills, from year to year, in advance, or to give bonds to the Treasurer for the payment of the same.

Commencement is on the first Wednesday in August. There are two vacations—one of four weeks from Commencement;—the other, of eight weeks from the first Wednesday in January.

Classes are formed in the University according to the several topics or authors, which arise in the course of instruction. Any student may, at the same time, subject to the advice and control of the Faculty, pursue the studies of one, two, or more departments in any of the classes thus arranged. But in no case is a student allowed to join an advanced class in any department, without exhibiting a satisfactory ac-

quaintance with all the previous studies in that department. The classes are divided whenever it is necessary, into sections according to the relative attainment and progress of the members. Such divisions are made regularly at the close of each examination; but a student may be transferred at any time from one section or class to another, if the circumstances of the case render it expedient.

The students are examined at the close of each study, by the Faculty; and also annually by the Faculty and a committee, during the three weeks immediately preceding commencement, in all the studies pursued under the direction of the Faculty. The examinations are intended to be exact and thorough, and in each case the attainments of every student are noted and recorded, and these records invariably form the basis of all divisions within the classes.

EXPENSES.

Tuition, (per annum)	\$25,00
Incidentals, including ordinary repairs, catalogues, fires and other expenses of recitation rooms, &c. say,	\$4,00
Rooms in the College building, per year.	\$2,00
Board, from \$1,00 to \$1,50, per week, Average for 40 weeks,	\$50,00
Total annual expenses,	\$81,00
Average price of wood from \$1,75, to \$2,00, per cord.	

The text books in the department of Languages, though more numerous than in most Colleges, are not more expensive, as the cheap German editions are used. Entire authors are preferred to collections of extracts. The use of these, it is believed, furnishes an inducement to the student to retain his Classics and to pursue the study of them beyond the immediate demands of the recitation room.

In the department of Mathematics and Physics, Bourdon's Algebra; Legendre's Geometry; Conic Sections, Trigonometry, Topography, Calculus and Mechanics from the Cambridge course; Brewster's Optics; Herschell's Astronomy, are used for the current year; but changes in the list of Text books are made whenever the good progress of the scholar can be promoted by it.
