## AN ACCOUNT

OF THE

# FIRST FESTIVAL

OF THE

# ROYAL JENNERIAN SOCIETY

FOR THE

EXTERMINATION OF THE SMALL-POX;

#### ON THURSDAY, MAY 17, 1803.

### EXTRACTED FROM THE GENTLEMAN'S MAGAZINE.

Nichols and Son, Printers, Red Lion Paffage, Fleet Street.

MR. URBAN, May 23. Irefpect your Mifcellany too highly towith it to be made the vehicle of any ordinary Feftival; but, when the important object of the Royal Jennerian Society for the Extermination of the Small Pox is contemplated, and that millions of millions of lives depend upon its fuccefs, no apology is requifite for my requesting to record, in your valuable pages, the first Festival of this Society, which was held on the 17th inftant, to commemorate the birth-day of Dr. Edward Jenner.

At five o'clock about 300 noblemen and gentlemen affembled at the Crown and Anchor Tavern in the Strand, to partake of an elegant dinner, under the direction of the following flewards:

Earl of Egremont, Lord Carrington,

Right Hon, the Lord Mayor, Sir Walter Farquhar, Bart. John Coakley Lettfom, M. D. Thomas Baring, efq. Henry Cline, efq. Henry Hoare, efq. Robert Thornton, efq. John Furnell Tuffen, efq. William Vaughan, efq. David Pike Watts, efq.

44970

After dinner, Non nobis, Domine, was delivered in a grand ftyle; which was fucceeded by,

1. The KING, the PATRON of the Society; and immediately a fong in grand chorus,

"God, fave the King," fucceeded by

2. The QUEEN, the PATRONESS of the Society.

3. His Royal Highnefs the Prince of WALES; and the other Royal Vice Patrons and Patroneffes.

The Chairman, Lord Egrement, then read

" Carlton Houfe, May 14, 1803. " My Dear Lord,

"The Prince of Wales has commanded me to affure your Lordfhip of the great pleafure and fatisfaction he fhould perfonally feel in taking the chair at the Jeonerian Society, were it not that it had been adjudged contrary to etiquette in his Royal Highnefs's flation to do fo; that he had been obliged to decline the application of feveral great and National Inftitutions on fimilar occafions.

"The Prince additionally regrets the firifinefs of this etiquette, becaufe, in the enthufiaftic admiration he feels for fo valuable a difcovery, his Royal Highnefs cannot but combine the higheft effeem for the worth and character of its respectable zuthor.

" I have the honour to remain, my dear Lord, with great refpect and regard,

"Your obliged and faithful fervant, " J. Mc MAHON.

" Earl of Berkeley, Sc. Se."

4. The health of her Royal Highness the Princess of WALES, which was drunk with the more enthusias, being also her Royal Highness' birth day.

5. The NAVY of Great Britain.

This was received with long and reiterated plaudits; and encouraged by an appropriate fpeech from the chairman, who obferved, that the Society was founded in an aufpicious moment, when we were upon the eve of war, which would be more than compenfated by the number of lives faved to the community by the extension of the Cow Pock; which he aptly illustrated, by comparing its fuccels to the nature of a finking fund of uleful fubjects faved to the pation: this produced the popular fong of, "Rule, Britannia."

6. "The ARMY of Great Britain" was received with great ardour, and followed by "Britons, Strike home."

7. The Duke of BEDFORD, Prefident of the Society.

8. Dr. |ENNER.

This toaft was received with an impreffive enthuliafm we never before witheffed. After the room was ready to burft with reechoing of repeated plaudits, Dr. Jenner attempted to fpeak; but Lord Gwydir repeating the toaft, which Lord Egremont had previoufly given, the loudeft acclamations enfued, and reverberated from every part of the room, for a confiderable period before Dr. Jenner could be heard; when he modefully expressed his grateful feelings for the honour and approbation he had experienced, from the Sovereign on the throne, to his fubjects in every department of the empire. Overcome and oppreft as he appeared to be with the unanimous and diffinguished approbation of the company, he confeffed that he had not words to express the gratitude of his heart, or the extent of happinefs they had conferred; an equal, and if poffible a fuperior degree of which, he wifhed might fill the bofom of every individual prefent, and of every friend of humanity throughout the Univerfe. After repeated and loud applaufes had fucceeded this addrefs, T. F. Dibdin, efq. late of St. John's College, Oxford, delivered the following fpeech :

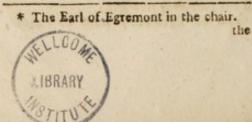

" Mr. Chairman,

"We are met to celebrate, on this day, the triumph of Vaccination, the birth of its Founder. Let Joy and Benevolence reign unbounded in our bofoms !

" Gentlemen, it is needlefs to defcribe to you, in glowing colaurs, the ravages of that horrid difeate, which has deprived many of us of parents, relations, or friends. -You yourfelves have witneffed its progrefs-have witneffed the difafters which feldom fail to attend it .- Let us exult in the confoling reflection, that its terrors are fhortly to ceafe. To Dr. Jenner, and to every medical gentleman prefent, worthy affoclates in the caufe, we owe this peculiar bleffing, which now feems diffuled to almost every civilized part of the globe .--Without prefumption, therefore, we may conclude, that it has been directed and fupported by the interpolition of Heaven.

" Gentlemen,-I flated to you, that the Small-pox was about to take its departure from fuffering humanity-Yes, like the shades of night before the morn, it has hid its abhorred face, and fled the prefence of Vaccinal From the Severn to the Ganges, the mild virtues of the Cow-pock have been feen, felt, and acknowledged-along the fhores of Afia, in the cot of the Hindoo, and in the temple of the Bramin, it has been contemplated with rapture, and che-rifhed with adoration 11 This enlightened country, this glorious ifland (for glorious it will be, in fpite of every effort of a proud and implacable foe), has given birth to a bleffing which has operated to the prefervation of thoufands. Happy thought ! confoling reflection ! We are now affembled under the fanction of a Monarch, who, with his royal offspring, have dignified the Inftitution with their patronage; and we have also to boaft of the support of some of the brighteft characters in the realm. When I look to the Chair, I fee, with peculiar fatisfaction, how our feaft is ennobled \*.

"Gentlemen,-We fhall live to view a rifing generation of beauty and perfection;

the fon preferved to his father, the daughter inheriting the bloom and lovelinefs of her mother—the tear of forrow about to be wiped away, and the pang for premature death no longer to be felt!! What profpects are thefe to contemplate! What joy and confolation ought they not to infufe!!

"Let us, therefore, Friends and Countrymen, indulge a fervent wifh for the prefervation of that life which has been inftrumental to fuch bleffings; and let us hope that Time itfelf thall ceafe, ere the name of JENNER be forgotten !!"

After the warm and repeated plaudits which focceeded began to fubfide, the Chairman propofed

IX. Succefs to the ROYAL JENNERIAN SOCIETY! and to the extermination of the Small-pox!

This was likewife received by loud and enthufiaftic applaufes; and was followed by an Addrefs to Dr. Jenner, on his birth-day, written and recited by Ifaac Brandon, efq. "THE wreath of Conqueft, and the voice

+ Some Chiefs of the Cherokee Indians attended the prefidency of the United States of America. They had heard (as they expressed it) " that the Great Spirit had gifted a white man, over the Great Water, with a power to prevent the Small Fox."—Eagerly enquiring, and being informed of the fact, they received the infection on their arms, and carried it into the midft of their tribes. It is a pleasing reflection that these untutored Savages have spread it throughout their country, and that they are eminently expert in the practice of the new Inoculation; they are preparing their rude but fincere prefents to Dr. Jenner, a token at once of their admiration and their gratitude.

Here the enthufialm of the company again burft forth, with acclamations of

every voice in the room, till Dr. Bradley addreffed the company with an elegantly condenfed hiftory of the progress of Vaccine Inoculation; and particularly alluded to the fuccefs of Doctor de Carro, of Vienna, in transmitting the Cow-pock, by the route of Bafforah, to.India, where the Small-pox had broke out among the Gentoos, the believers in Brahma, among whom nearly nine out of every ten perfons fell victims to this dreadful difeafe. The Brahmins, who venerate the Cow as a facted animal, received the Cow-pock with religious zeal; and the pious Gentoos were thus preferved by the opportune arrival of this providential bleffing. The fame means had been extended to Ceylon, and 7000 lives had already been faved by the introduction of the Cow-pock.

Dr. Bradley's health was then drunk by the company, with thanks for his valuable remarks.

BENJAMIN TRAVERS, efq. one of the earlieft inflitutors of the Royal Jennerian Society, now proposed the health of, and thanks to, " Lord EGREMONT, the noble Chairman." He expatiated, in an elegant fpeech, on his Lordship's public and private virtues; which led him, although exempted, by his rank and fortune, from feeling the wants of the poor, to devote his patronage and purfe to mitigate their miferies, and to promote their comforts. He then delivered a most imprefive eulogy on the views and the probable fuccels of the Jennerian Inftitution, and congratulated the company on the heartfelt fatisfaction they would experience in reflecting noon the millions they would prove the means of faving by perfevering in the laudable work they had begun; thus imitating their great Mafter, who declared, that " he came into the world, not to take away men's lives, but to fave."

His Lordfhip returned thanks for the honour conferred upon him, in placing him in a flation which ought to have been filled by one of the Royal Vice-patrons. He rejoiced in the foccefs of the Society, which he compared as a finking-fund of population and frrength to the State.

ROBERT THORN TON, efq. M. P. drank to the VICE-PRESIDENTS. With this tooft he united the VICE-PATRONESSES; obferving that, by the virtuous union of the fexes, fubjects of Vaccine Inoculation would ever he afforded to exercise the talents of a Society, which would tend to fave more lives than even the loffes by war would occafion.

The Earl of BERKELFY, as one of the Vice-Prefidents, returned thanks to the diftinguished Commoner who proposed the toaft; and hoped, that the union he recommended would ever prove productive to the individuals, and profperous to the Nation.

Lord CARRINGTON, as one of the Vice-Pre-

# First Festival of the Royal Jennerian Society.

Prefidents, also addreffed the company, and paid many elegant compliments on the character and virtues which diftinguished the noble Vice-patroneffes.

When the BOARD OF DIRECTORS WAS proposed as a toast from the Chair, JOHN TOWELL RUTT, efq. in an animated speech, gave an account of the formation and progress of the Society; and rejoiced in the gratification it afforded them, in witneffing its unparalleled utility and fuccels.

Then followed the thanks to the MEDI-CAL COUNCIL; to which Dr. DENMAN returned an appropriate fpeech, which was followed by the Chairman's drinking to

"The Right Hon. the LORD MAYOR, BENJAMIN TRAVERS, efq. and JOHN JU-LIUS ANGERSTEIN, efq."

This again called up Mr. TRAVERS, who expatiated with his ufual animation on the rapid formation of a Society, which in fix months had acquired the highest fplendour, confirmed by the appearance of one of the most numerous and respectable meetings ever convened together; and whole fublime object, joined to the united endeavours of fo many illustrious characters, afforded the bright profpect of being crowned with fuccefs. He concluded with highly complimenting Dr. JOHN WALKER, the refident Phyfician of the Society's Central House, who early united in the formation of the Inflitution, and, before its eftablifhment, had devoted his time and attention to gratuitous Inoculation ; and, after propoling his health, the Doctor role, and hinted at his fuccefs in flopping the progreis of the Small-pox, which had broke out in the army and novy with Gen. Abercrombie in the Mediterranean, as well as in Malta, Palermo, and Egypt; which he effected by means of the Cow-pock.

The Chairman next proposed "the health of Dr. WILLIAM WOODVILLE, and the reft of the friends of the Cow-pock (for the extermination of the Small-pox) in every part of the World."

This called up Dr. LETTSOM; who informed the company, that Dr. Woodville had juft left the room ; and, in his abience, he would offer fome remarks upon the Docto 's d flinguished and independent con . duct. In confequence of being at the head of the Hofpital for the Small-pox and inoculation, his experience was deemed to fuperior to every other medical practitioner, as to induce the first professional men to call him into confultation upon every difficult and important cafe, as being decidedly the most competent to the subject. He had, neverthelefs, as foon as the Cow-pock was promulgated by Dr. Jenner, embraced the difcovery, and encouraged it in his public and private capacity; and had probably inoculated more perfons with it, in confequence of his public fituation, than any other individual, Dr. Jenner excepted ; and had thus, with great difintereftednefs, facrificed the extensive prospects of private emolument to public good. At this time, of the multitude who applied to him at the Small-pox hospital, only two patients were in the Hofpital under the Small-pox, and not one for feveral weeks previoufly; which might be afcribed to his fuccefsful exertions in promoting the Cow-pock. Among other friends to Vaccine Inoculation, Dr. Lettfom could not pafs by Dr. De Carro, of Vienna, who had forwarded the Cow-pock to India; and particularly to Dr. Waterhoule \*, the Jenner of America, who first introduced it into that Hemifphere. He concluded this animated addrefs with an eulogy to the Faculty, who had almost unanimously united their endeavours to exterminate the Small-pox, one of the most lucrative fources of emolument; and elucidated this independent conduct by remarking that, as about 3000 perfons had died asnually in London by the Small-pox. it might be calculated that 30,000 perfons must have been attacked with this difeafe; and admitting that each might devote for medical aid only three guineas, the fum of 90,000 guineas would thus be facrificed by the Faculty at the altar of public good. He apologized, as a profeilional man, for offering fuch an eulogy for an unparalleled difintereftednefs ; but he truited that his period of life would exempt him from any cenfure on this ground.

Toward the close of the evening, Lord Egremont withdrew; and Dr. Jenner, who fat at his right hand during the day, accepted the Chair, and preferved to a late hour rational conviviality, chaftened and refined by the fublime fentiment of refening from the grave more human beings than ever was even fuggefted by the warmeft imagination could poffibly refult, from the inftitution of any other Society, in the records of hiftory or time; a fentiment readered ftill more highly gratifying by the prefence in the Chair, on the prefent aufpicious occafion, of that man, without whole difcovery the Society would not have exifted; and by which, millions of rifing generations, upon whom the future muft neceffarily depend, are faved to enrich the State, to implore bleffings on the Difcoverer, no lefs diftinguifhed for his
