Lately published,

In One large Volume 8vo. Price 9s. in Boards, or 10s. 6d. on Superfine Paper,

The SECOND EDITION, considerably enlarged and improved,

LECTURES ON DIET AND REGIMEN,

Being a Systematic Inquiry into the most rational Means of preserving Health and prolonging Life; together with Physiological and Chemical Explanations, calculated chiefly

FOR THE USE OF FAMILIES;

In Order to banish the prevailing Abuses and Prejudices in Medicine.

By A. F. M. WILLICH, M. D.

CONTENTS of the WORK.

Introduction, or a general View of the whole Work, and its practical Tendency. Chap. I. On the Means of preserving Health and prolonging Life—II. Of Air and Weather—III. Of Cleanliness—IV. Of Dress—V. Of Food, Drink, and Spices—VI. Of Exercise and Rest—VII. Of Sleeping and Waking—VIII. Of Evacuations—IX. Of the Sexual Intercourse—X. Of the Affections and Passions of the Mind—XI. Of the Organs of Sense—XII. On the Treatment and Preservation of the Eyes—Conclusion, recapitulating useful Precepts.

N. B. Among a variety of new subjects, the present Edition contains a concise investigation of the following, viz. Arrow Root—Artichokes—Beet Root—Cow Pox—Consumption—Exercise—Game—Lobsters—Manna Grass—Metallic Tractors—Oil—Olives—Salt—Small Pox—Tamarinds—Vinegar, &c. &c.

To which is added, a Postscript, containing a Series of Queries, addressed to those Patients who are anxious to give an accurate and satisfactory Account of their Disorders, when consulting Medical Men.

London: Printed for T. N. Longman and O. Rees, Paternoster-row.

The First Edition of these Lectures having received the public sanction, the Author has corrected and improved every page of the Work, while he has enlarged and rendered it as complete as the limits of a single Volume would admit. The following passages are extracted from different criticisms:

“This work is not only a valuable accession to Medical Science, but must prove an inestimable accommodation both to families and individuals situated at a distance from regular advice. For this reason we heartily wish it may be soon domesticated in every family in England, and that every member of society may reap the advantage it is calculated to confer. We particularly recommend to the deliberate perusal of all sedentary and literary people the last chapter, which contains more practical advice on the care of the eye than is to be found in any other work in our language.

“The author aims at an explicit interpretation of the various theories physicians have adopted in the course of their practice, for ameliorating the sickly condition of our nature. In this laudable pursuit he develops the radical principles of physiology, and an elegant flow of popular and perspicuous language, reduces every thing valuable in a science hitherto almost wholly unknown, to the level of ordinary capacities.” *New London Review for February 1799.*

“We are much gratified in having it in our power to recommend a book of such utility as these ‘Lectures’ to our fair readers. Their seclusion, for the most part, from the more laborious and active duties of society; their sedentary habits and domestic occupations renders whatever relates to the economy of health a concern to them peculiarly familiar and interesting. The Lectures under consideration will prove a source of the best information to them on every medical subject. And though Dr. W. discusses whatever falls under his notice in a very scientific manner, he studiously avoids the use of hard words and abstruse terms. He is so clear so perfectly intelligible, as must render him everywhere very popular. To families, particularly at an inconvenient distance from the faculty, his advice must often prove at once acceptable and salutary.” *Ladies Monthly Museum for February 1799.*

“To those who may wish to obtain more accurate knowledge respecting Diet and Regimen, the Lectures published on these subjects by Dr. Willich will be found highly useful.” P. 499. *Medical Admonitions addressed to Families; By James Parkinſon. Two Volumes. 8vo. 1799.*

BOOKS *printed for* T. N. LONGMAN *and* O. REES,
No. 39, *Paternoster-Row.*
