NATURE'S REMEDY

FOR THE RELIEF AND CURE OF

**INFLUENZA, COLDS, HAY FEVER,
CATARRH, CHILLS.**

IT is now universally acknowledged and accepted that Influenza is a disease communicated from one person to another, chiefly spread by air-borne microbes and also by personal contact.

Chills, damp and fatigue will produce suitable conditions for the incubation of the Influenza microbe. The serious epidemics of recent years prove the susceptibility of most persons to insidious attacks. The highly infectious nature of Influenza is repeatedly demonstrated by the manner in which it is passed from one member of a family to another until it has run through the household.

CINNAMON.

INFLUENZA.

INFLUENZA is a catarrh which attacks the air passages, and is very apt to settle in the lungs and develop into pneumonia. That is why it is so dangerous to fight. It is almost always the people who won't give in at first who are obliged to give out at last; they are overtaken by pneumonia, and however strong and healthy they may originally have been, it is very few who survive pneumonia consequent on influenza. The man who has once had the disease recognises the hand of his enemy at once, and immediately gives in, for he knows that however important his engagements may be, it is futile to attempt to keep them. He will not be able to do so, and if he tries two dangers will await him. The one pneumonia, is the more serious, but the other is only less so. That other is the prolongation of the period of convalescence, with its discomforts and inconveniences, which are multiplied a hundredfold by failure to submit, and the after-effects are intensified.

Properly treated by immediate submission to a course of "Langdale's Concentrated Medicinal Essence of Cinnamon," Influenza can be Prevented and Cured.

AN ABSOLUTE SCIENTIFIC FACT.

DURING the year 1892 it was clearly proved by M. Chamberland, of the Pasteur Institute, Paris, after innumerable experiments, that the moment the aroma of Concentrated Cinnamon came in contact with microbes in a test tube they fell in shoals to the bottom, either stupefied or killed. He observed the same thing happen, but much more slowly, if the tube was exposed to brilliant sunshine.

The daily use of

LANGDALE'S

Medicinal

Essence of Cinnamon

OR

Compressed Tablets

will carry out in the human system the convincing fact demonstrated by the Assistants of the Pasteur Institute.

HOW TO PREVENT **CATCHING COLD!**

AN ABSOLUTE SCIENTIFIC FACT!

TEN to fifteen drops of LANGDALE'S Concentrated Medicinal ESSENCE OF CINNAMON in a cup of warm milk, upon retiring at night strengthens and stimulates the system and renders the organs of the body less liable to the attack of chills, damp, cold winds, sudden changes of temperature, &c.

TO CURE A COLD.

GENERAL SYMPTOMS.—Cold shivers, headache, a tired languid feeling, slight feverishness, extremities cold, copious discharge from eyes and nose, and hoarseness.

If possible stay in an even temperature; administer twenty drops of LANGDALE'S Concentrated Medicinal ESSENCE OF CINNAMON every three or four hours in a teacupful of milk as warm as the patient can take it; rub the chest and back well with Camphorated Oil. A severe cold and its consequent serious ailments will often be prevented if the above simple directions are carried out.

INFLUENZA.

GENERAL SYMPTOMS.—Severe headache, cold shivers, dull aching pains in the limbs, dry hacking cough, followed by increase of temperature, and great depression and prostration.

This terrible complaint can be prevented by taking

Langdale's Concentrated Medicinal Essence of Cinnamon

A few drops in a little wine or water each night and morning will ensure against attack.

During the first stages of this disease it is recommended by the medical faculty that the patient be kept warm and in as even a temperature as possible, the dose of ESSENCE OF CINNAMON being slightly increased and administered every three hours. A light diet should be adopted.

As a Preventive of Infectious Disease.

It was discovered in the Laboratory of M. PASTEUR, of Paris, that the Microbe or disease germ of Influenza, Small Pox, Scarlet Fever, Dysentery, Cholera, and Typhoid Fever is rendered inert by this Essence.

It can be taken in safety by the most delicate persons or children.

A small quantity of the Essence or a Compressed Cinnamon Tablet should be taken before going into the infected area.

This is largely practised by Doctors, Clergymen, Missionaries, Visitors, Nurses, &c.

The most convincing Testimonials have been received to its efficacy from the highest members of the Peerage, House of Commons, Church, Army, Navy, and Civil Service.

LANGDALE'S

CONCENTRATED MEDICINAL

ESSENCE OF CINNAMON.

THE Aromatic and Stimulating properties of Cinnamon have long been known and held in high esteem by the leading Medical authorities. Our forefathers used it freely during the terrible epidemics that scourged our land in the early and middle centuries; nearly every monastery had its stock of **Cinnamon Water** stored ready for use. The Monks by whom it was dispensed frequently gave it in cases of Low Fever, Scarlet Fever, Dysentery, Cholera, Typhoid Fever, and other contagious diseases. It was not, however, till recently that it was discovered in the laboratory of **M. PASTEUR**, the eminent Chemist and Specialist of Paris, to have the power of absolutely destroying all **DISEASE GERMS**, and to **KILL THE MICROBE or Disease Germ of Influenza**.

Read the following.

From the "Daily News" of Jan. 8th, 1892.

"There would pretty certainly be a Cinnamon boom if the experiment made with that spice by M. Chamberland in M. Pasteur's laboratory were generally known. - Our ancestors, it appears, hit upon the best preservative from the infectious microbe when they used to drink mulled wines and other beverages in which strong doses of Cinnamon were infused. - M. Chamberland now says that **NO LIVING DISEASE GERM CAN RESIST** for more than a few hours the antiseptic power of **ESSENCE OF CINNAMON**. He looks upon it as not less effective in destroying microbes than corrosive sublimate. Even its scent kills them, and it does no harm to human beings. A decoction of Cinnamon is often good to drink in localities where typhoid fever or cholera is rife."

IN the distillation of this Essence the greatest care is taken to select the finest Cinnamon Bark, *Laurus Cinnamomum*, freshly imported from the Island of Ceylon, no other variety being of any use in the preparation of this most valuable medicine, it is highly concentrated and evaporated in vacuo in order to procure the greatest effect with the minimum dose.

For Large Employers of Labour

LANGDALE'S

CONCENTRATED MEDICINAL

Essence of Cinnamon

will be found the most efficacious remedy and cure, having had its merits fully tested by the Members of His Majesty's Civil Service, the Army, Navy, Police, and many of the largest manufacturing firms. Twenty-five to thirty drops given in a little water or on a piece of sugar has often prevented a serious attack.

To be obtained of all Chemists, Drug and Grocery Stores throughout the United Kingdom.

Essence Concentree de Cannelle Medicinale de Langdale.

INFLUENZA—GRIPPE.

Symptômes généraux.—Maux de tête, frissonnements, douleurs passagères dans les différentes parties du corps, toux intermittente suivie de sueurs et en général grand abattement ou prostration.

VOUS vous assurerez la guérison de cette insupportable maladie en prenant de l'**Essence de Concentree de Cannelle Medicinale de Langdale.**

Quelques gouttes de cette essence dans un peu d'eau ou de vin prises matin et soir vous garantiront des attaques de cette maladie.

Les médecins de différentes Facultés recommandent que pendant les premières périodes de cette maladie, le malade soit tenu à une température aussi égale que possible, la dose d'**Essence Concentree de Cannelle** étant légèrement augmentée et prise régulièrement de trois heures en trois heures.

Tout rhume de cerveau sera promptement guéri en prenant une petite dose d'**Essence Concentree de Cannelle** matin et soir.

Contre la Toux. Une tablette d'**Essence de Cannelle** compressée qu'on devra laisser fondre dans la bouche calmera et fera disparaître la toux la plus irritante.

En temps humide ou de brouillard quelques gouttes d'essence ou une tablette vous garantiront souvent d'un rhume.

Essence Concentree de Cannelle

Medicinale de Langdale.

LES propriétés aromatiques et stimulantes de la Cannelle ne font aucun doute et sont connues depuis longtemps déjà. Elles ont toujours été tenues en haute estime par toutes les autorités médicales. Nos aïeux même en faisaient un usage très fréquent à l'époque des grandes épidémies qui ravagèrent notre pays au Moyen Age. Presque tous les monastères avaient leur stock d'eau de Cannelle prête à être employée à la première occasion.

Les religieux qui l'employaient le plus fréquemment la donnaient dans des cas de fièvre chaude, de fièvre scarlatine ou de dissenterie, de cholera, de fièvre typhoïde et un grand nombre d'autres maladies contagieuses.

Plus récemment encore il a été établi dans le laboratoire de Pasteur, l'éminent chimiste, que l'**Essence de Cannelle Concentree** avait le pouvoir de détruire absolument tous les germes de maladie et de tuer le microbe ou le germe de l'influenza.

Opinion de la Presse.

Extraits du "Daily News," 8 Janvier, 1892.

"Il est certain que si l'on connaissait les résultats des expériences faites sur la Cannelle par M. Chamberland dans le laboratoire de l'émminent Pasteur, cette épice serait un remède universellement accepté.

Il est établi que nos ancêtres connaissaient déjà la cannelle et qu'en conséquence ils avaient déjà mis la main sur le meilleur préservatif contre l'infectieux microbe et qu'ils mélangeaient ce préservatif avec les vins épicés ou d'autres boissons en y laissant infuser de grandes quantités de Cannelle.

Monsieur Chamberland démontre maintenant qu'il est impossible qu'aucun germe vivant de maladie puisse résister plus d'un petit nombre d'heures à la force antiseptique de l'ESSENCE DE CANNELLE.

Il considère cette essence comme tout aussi effective que les sublimés corrosifs destinés à la destruction des microbes et il ajoute même que cette essence les tue sans affecter aucunement l'organisme.

Une petite quantité d'ESSENCE DE CANNELLE est souvent d'une grande utilité à titre de boisson dans les localités où la réignent fièvre typhoïde, le choléra, ou toute autre maladie de ce genre."

Langdale's Concentrated Medicinal Essence of Cinnamon.

Supplied by Royal Command.

UNDER the distinguished patronage of
H.I.M. The Empress of Russia,
H.I.M. The Dowager Empress of Russia,
H.I.M. Prince George of Greece,
