# THE **REAL** Dandelion **Coffee**

**F**OR many years numerous mixtures of Chicory, Date Stones, Acorns, and other rubbish have been foisted on to the public under the name of Dandelion Coffee. Such mixtures have no right to the term "Dandelion Coffee," seeing that in many cases there is neither Dandelion nor Coffee in their component parts and their sale has caused the **REAL** and genuine article to come under a cloud. The counterfeit has passed for the true, proved useless as a digestive beverage as well as nauseous to the taste, and in consequence the people have become disgusted with every preparation sold under this name. This is a **TREMENDOUS PITY**, because genuine Dandelion Coffee is undoubtedly one of the finest dietetic drinks for dyspeptics and the most healthful substitute for Tea and Coffee. Properly prepared, it makes a most palatable beverage, and may be taken for Breakfast, Tea or Supper.

**Dr. Thompson's Dandelion Coffee** is guaranteed absolutely pure. It contains neither Chicory nor ordinary Coffee, but is made by a special process from pure English Dandelion Root only.

**Dr. Thompson's Dandelion Coffee** is a natural beverage without any injurious effects. Both Tea and Coffee are known to exert a deleterious influence on the Nerves and Digestive Organs. This Dandelion Coffee, however, exercises a stimulating influence over the whole system, helping the Liver and Kidneys to do their work, and keeping the Bowels in a healthy condition.

Its advantages to Dyspeptics and to all suffering from weakness of Digestive Organs are unequalled.
