(pub. £10 10s) now offered at £2 5s

Since its first publication in 1836, this book has been recognised as a standard and authoritative account of the Indian Tribes, written and illustrated by men who had long personal experience and acquaintance with the subject. The historical narratives and the biographies necessitated the expense of vast labour and research, and could have been compiled only by those who had opportunities of meeting the Indians and estimating their character. The Editors have added to and corrected the text in the light of recent research and notes have been given from later sources of information. The 123 portraits in colour are taken from authentic drawings in the Indian Department, Washington. In this edition the plates are accurately reproduced from the original edition and include three extra portraits which were discovered later. The portraits of McKenney and Hall are reproduced in photogravure, and the coloured maps show "The Localities of the Indian Tribes in 1833," and "The Indian Reservation in 1906."

"The Archæological results of my seven expeditions to Central America are published in 'Biologia Centrali Americana,' necessarily a costly work, which is not likely to find its way into many private libraries. It was suggested that I should publish a less expensive volume, giving an account of new travels as well as some description of the ruins visited."—*Preface.*

- 217 Pijoan (Joseph) HISTORY of ART, *profusely and very finely illustrated, some plates coloured*, 3 vols, roy. 8vo., 1933 (pub. £5 5s) £1 15s
 Amongst the numerous histories of art that have appeared, there is none that can compete in scope or wealth of detail with Professor Pijoan's monumental work. This is no mere compilation for reference, but the crystallisation of centuries of scholarship, archaeological research and critical study.
 The work may justly be said to represent the whole volume of human knowledge on its subject at the present time, from the earliest records of pre-historic man down to the achievements of the present day.
 Some idea may be gained of the immense scope of the book from the fact that each of the volumes contains from five hundred to six hundred pages of text and on an average over 800 illustrations. These alone form an unique gallery of the course of the fine arts throughout history. Its impeccable accuracy, mass of information and detail and profuse illustration recommend it to scholars, students and connoisseurs. . . . An epitome of a whole library of reference on the fine arts.

Captain Edwards' report of the voyage of the 'Pandora' is here printed for the first time. Surgeon Hamilton's account is reprinted from the scarce original, which was published at Berwick in 1793.

Sir John Barrow in "The Eventful History of the Mutiny, etc., of H.M.S. 'Bounty,'" published in 1831, stated that "The only published account of this voyage is contained in a small volume by Mr. George Hamilton, the Surgeon, who appears to have been a coarse, vulgar and illiterate man more disposed to relate licentious scenes and adventures, in which he and his companions were engaged, than to give any information of proceedings and occurrences connected with the main object of the voyage."

This criticism is hardly fair to the author, as many of his remarks display observation and good sense, although it must be admitted that he relates certain adventures ashore with shameless gusto.
