Primitive Physick :

EASY AND NATURAL

METHOD

OF CURING

MOST DISEASES

By JOHN WARRI

T H E

P R E F A C E.

WHEN MAN came first out of the Hands of the great Creator, cloath'd in Body as well as in Soul, with Immortality and Incorruption, there was no Place for Physick, or the Art of Healing. As he knew no Sin, so he knew no Pain, no Sicknes, Weaknes, or bodily Disorder. The Habitation wherein the angelick Mind, the *Divinæ Particula Auræ* abode, although originally formed out of the Dust of the Earth, was liable to no Decay. It had no Seeds of Corruption or Dissolution within itself. And there was nothing without to injure it: Heaven and Earth and all the Hosts of them were mild, benign and friendly to human Nature. The entire Creation was at Peace with Man, so

long as Man was at Peace with his Creator. So that well might the Morning Stars sing together, and all the Sons of GOD shout for Joy.

2. But since Man rebell'd against the Sovereign of Heaven and Earth, how entirely is the Scene changed? The incorruptible Frame hath put on Corruption, the Immortal has put on Mortality. The Seeds of Weakness and Pain, of Sickness and Death, are now lodged in our inmost Substance: Whence a thousand Disorders continually spring, even without the Aid of external Violence. And how is the Number of these increased, by every Thing round about us? The Heavens, the Earth, and all Things contained therein, conspire to punish the Rebels against their Creator. The Sun and Moon shed unwholesome Influences from above; the Earth exhales poisonous Damps from beneath: The Beasts of the Field, the Birds of the Air, the Fishes of the Sea, are in a State of Hostility: The Air itself that surrounds us on every Side, is replete with the Shafts of Death: Yea, the Food
we

we eat, daily saps the Foundation of the Life, which cannot be sustained without it. So has the LORD of All secured the Execution of his Decree, "*Dust thou art, and unto Dust shalt thou return.*"

3. But can there Nothing be found to lessen those Inconveniencies, which cannot be wholly removed? To soften the Evils of Life, and prevent in Part the Sicknes and Pain to which we are continually exposed? Without Question there may. One grand Preventive of Pain and Sicknes of various Kinds, seems intimated by the great Author of Nature, in the very Sentence that intails Death upon us: "*In the Sweat of thy Face shalt thou eat Bread, 'till thou return to the Ground.*" The Power of Exercise both to preserve and restore Health, is greater than can well be conceived: Especially in those who add Temperance thereto; who if they do not confine themselves altogether to eat either "*Bread or the Herb of the Field,*" (which GOD does not require them to do) yet steadily observe both that Kind and Measure of Food, which Experience shews

to be most friendly to Health and Strength.

4. 'Tis probable, **PHYSICK**, as well as **RELIGION**, was in the first Ages chiefly traditional: Every Father delivering down to his Sons, what he had himself in like Manner received, concerning the Manner of Healing both outward Hurts, and the Diseases incident to each Climate, and the Medicines which were of the greatest Efficacy for the Cure of each Disorder. 'Tis certain, this is the Method wherein the Art of Healing is preserved among the *Americans* to this Day. Their Diseases indeed are exceeding few; nor do they often occur, by Reason of their continual Exercise, and ('till of late, universal) Temperance. But if any is sick, or bit by a Serpent, or torn by a wild Beast, the Fathers immediately tell their Children what Remedy to apply. And 'tis rare, that the Patient suffers long; those Medicines being quick, as well as generally infaillible.

5. Hence

5. Hence perhaps it was that the Antients, not only of *Greece* and *Rome*, but even of barbarous Nations, usefully assign'd Physick a Divine Original. And indeed it was a natural Thought, That He who had taught it to the very Beasts and Birds, the *Cretan* Stag, the *Egyptian* Ibis, could not be wanting to teach Man,

*Sanctius his Animal, mentisque capacius
altæ :*

Yea sometimes, even by those meaner Creatures : For it was easy to infer, " If this will heal that Creature, whose Flesh is nearly of the same Texture with mine, then in a paralled Case it will heal me." The Trial was made. The Cure was wrought. And Experience and Physick grew up together.

6. And has not the Author of Nature taught us the Use of many other Medicines, by what is vulgarly term'd Accident ? Thus one walking some Years since in a Grove of Pines, at a Time when many in the neighbouring Town were afflicted

afflicted with a Kind of new Distemper, little Sores in the Inside of the Mouth, a Drop of natural Gum fell from one of the Trees, on the Book which he was reading. This he took up, and thoughtlessly applied it to one of those sore Places. Finding the Pain immediately cease, he applied it to another, which was also presently healed. The same Remedy he afterwards imparted to others, and it did not fail to heal any that applied it. And doubtless numberless Remedies have been thus casually discovered in every Age and Nation.

7. Thus far Physick was wholly founded on Experiment. The *European*, as well as the *American*, said to his Neighbour, Are you sick? Drink the Juice of this Herb, and your Sickness will be at an End. Are you in a burning Heat? Leap into that River, and then sweat'till you are well. Has the Snake bitten you? Chew and apply that Root, and the Poison will not hurt you. Thus antient Men, having a little Experience, joined with common Sense, and common Humanity,

manity, cured both themselves and their Neighbours, of most of the Distempers to which every Nation was subject.

8. But in Procefs of Time, Men of a philosophical Turn, were not satisfied with this. They began to enquire, How they might account for these Things? How such Medicines wrought such Effects? They examined the Human Body, and all its Parts; the Nature of the Flesh, Veins, Arteries, Nerves; the Structure of the Brain, Heart, Lungs, Stomach, Bowels; with the Springs of the several Animal Functions. They explored the several Kinds of Animal and Mineral, as well as Vegetable Substances. And hence the whole Order of Physick which had obtained to that Time, came gradually to be inverted. Men of Learning began to set Experience aside; to build Physick upon Hypotheses; to form Theories of Diseases and their Cure, and to substitute these in the Place of Experiments.

9. As Theories increased, simple Medicines were more and more disregarded
and

and disused; 'till, in a Course of Years, the greater Part of them were forgotten, at least in the politer Nations. In the Room of these, Abundance of new Ones were introduced, by reasoning, speculative Men; and those more and more difficult to be applied, as being more remote from common Observation. Hence Rules for the Application of these, and Medical Books were immensely multiplied; 'till at length Physick became an abstruse Science, quite out of the Reach of ordinary Men.

10. Physicians now began to be had in Admiration, as Persons who were something more than human. And Profit attended their Employ, as well as Honour; so that they had now two weighty Reasons for keeping the Bulk of Mankind at a Distance, that they might not pry into the Mysteries of the Profession. To this End, they increased those Difficulties by Design, which began in a Manner by Accident. They filled their Writings with Abundance of Technical Terms, utterly unintelligible to plain Men. They affected

fected to deliver their Rules, and to rea-
 son upon them, in an abstruse and philo-
 sophical Manner. They represented the
 critical Knowledge of Anatomy, Natural
 Philosophy (and what not? Some of them
 resting on that of Astronomy and Astro-
 logy too) as necessarily previous to the
 understanding the Art of Healing. Those
 who understood only, How to restore the
 sick to Health, they branded with the
 name of Empiricks. They introduced
 into Practice, Abundance of compound
 Medicines, consisting of so many Ingre-
 dients, that it was scarce possible for com-
 mon People to know which it was that
 brought a Cure: Abundance of Exoticks,
 either the Nature nor Names of which
 their own Countrymen understood: Of
 Mysticals, such as they neither had Skill,
 or Fortune, nor Time to prepare: Yea,
 and of dangerous Ones, such as they could
 not use, without hazarding Life, but by
 the Advice of a Physician. And thus both
 their Honour and Gain were secured; a
 vast Majority of Mankind being utterly
 off from helping either themselves or
 their Neighbours, or once daring to at-
 tempt it.

II. Yet

11. Yet there have not been wanting from Time to Time, some Lovers of Mankind, who have endeavoured (even contrary to their own Interest) to reduce Physick to its antient Standard: Who have laboured to explode out of it all Hypotheses, and fine-spun Theories, and to make it a plain intelligible Thing, as it was in the Beginning: Having no more Mystery in it than this, "Such a Medicine removes such a Pain." These have demonstrably shewn, That neither the Knowledge of Astrology, Astronomy, Natural Philosophy, nor even Anatomy itself, is absolutely necessary to the quick and effectual Cure of most Diseases incident to Human Bodies: Nor yet any Chymical, or Exotick, or Compound Medicine, but a single Plant or Fruit duly applied. So that every Man of common Sense (unless in some rare Cases) may prescribe either to himself or his Neighbour, and may be very secure from doing Harm, even where he can do no Good.

12. Even in the last Age there was something of this Kind done, particularly

by the great and good Dr *Sydenham* : And in the present, by his Pupil Dr. *Dover*, who has pointed out simple Medicines for many Diseases. And some such may be found in the Writings of the learned and ingenious Dr. *Cheyne* : Who doubtless would have communicated many more to the World, but for the melancholy Reason he gave one of his Friends, that prest him with some Passages in his Works, which too much countenanced the modern Practice, “ O Sir, We must do something to oblige the Faculty, or they will tear us in Pieces.”

13. Without any Regard to this, without any Concern about the obliging or disobliging any Man living, a mean Hand has made here some little Attempt, toward a plain and easy Way of curing most Diseases. I have only consulted herein, Experience, common Sense, and the common Interest of Mankind. And supposing they can be cured this easy Way, who would desire to use any other? Who would not wish to have a Physician always in his House, and one that attends

without Fee or Reward? To be able (unless in some few complicated Cases) to prescribe to his Family, as well as himself?

14. If it be said, But what Need is there of such an Attempt? I answer, The greatest that can possibly be conceived. Is it not needful in the highest Degree, to rescue Men from the Jaws of Destruction? From wasting their Fortunes as Thousands have done, and continue to do daily? From pining away in Sicknes and Pain, either through the Ignorance or Knavery of Physicians? Yea, and many Times throwing away their Lives, after their Health, and Time, and Substance?

Is it enquired, But are there not Books enough already, on every Part of the Art of Medicine? Yes, too many, ten Times over, considering how little to the Purpose the far greater Part of them speak. But beside this, they are too dear for poor Men to buy, and too hard for plain Men to understand. Do you say, But there are enough of these Collections of Receipts. Where? I have not seen One yet, either
in

in our own or any other Tongue, which contains only safe and cheap and easy Medicines. In all that have yet fallen into my Hands, I find many dear and many far-fetch'd Medicines: besides many of so dangerous a Kind, as a prudent Man would never meddle with. And against the grater Part of those Medicines there is a further Objection; They consist of too many Ingredients. The common Method of compounding and decomposing Medicines, can never be reconciled to common Sense. Experience shews, That one Thing will cure most Disorders, at least as well as twenty put together. Then why do you add the other nineteen? Only to swell the Apothecary's Bill: Nay, possibly, on Purpose to prolong the Distemper, that the Doctor and he may divide the Spoil.

But admitting there is some Quality in the Medicine proposed, which has Need to be corrected: Will not one Thing correct it, as well as twenty? It is probable, much better. And if not, there is Sufficiency of other Medicines, which need no such Correction.

How often, by thus compounding Medicines of opposite Qualities, is the Virtue of both utterly destroyed? Nay, how often do those joined together destroy Life, which single might have preserved it? This occasioned that Caution of the great *Boerhaave*, against mixing Things without evident Necessity, and without full Proof of the Effect they will produce when joined together, as well as of that they produced when asunder: Seeing (as he observes) several Things, which separately taken, are safe and powerful Medicines, when compounded not only lose their former Powers, but commence a strong and deadly Poison.

15. As to the Manner of using the Medicines here set down, I should advise as soon as you know your Distemper, (which is very easy, unless in a Complication of Disorders, and then you would do well to apply to a Physician that fears God) First, Use the first of the Remedies for that Disease which occurs in the ensuing Collection; (unless some other of them be easier to be had, and then it may do
just

just as well.) Secondly, After a competent Time, if it takes no Effect, use the second, the third, and so on. I have purposely set down (in most Cases) several Remedies for each Disorder; not only because All are not equally easy to be procured at all Times and in all Places: But likewise because the Medicine which cures one Man, will not always cure another of the same Distemper. Nor will it cure the same Man at all Times. Therefore it was necessary to have a Variety. However, I have subjoin'd the Letter *I.* to those Medicines, which are said to be infallible.—Thirdly, Observe all the Time the greatest Exactness in your Regimen, or Manner of Living. Abstain from all mixt, all high-season'd Food. Use plain Diet, easy of Digestion: And this as sparingly as you can, consistent with Ease and Strength. Drink only Water, if it agrees with your Stomach; If not, good clear Small-beer. Use as much Exercise daily, in the open Air, as you can without Weariness. Sup at Six or Seven on the lightest Food: Go to Bed early, and rise betimes. To persevere with Steadiness

B 3

ness in this Course, is often more than half the Cure. Above all, add to the rest, (for it is not Labour lost) that old, unfashionable Medicine, PRAYER. And have Faith in GOD, who “ *killeth and maketh alive, who bringeth down to the Grave and bringeth up.*”

16. For the Sake of those who desire, through the Blessing of GOD, to retain the Health which they have recovered, I have added a few plain easy Rules, chiefly transcribed from Dr. *Cheyne*.

I. 1. The Air we breathe is of great Consequence to our Health. Those who have been long abroad in Easterly or Northerly Winds, should drink some thin and warm Liquor going to Bed; or a Draught of Toast and Water.

2. Tender People should have those who lie with them, or are much about them, sound, sweet and healthy.

3. Every one that would preserve Health, should be as clean and sweet as possible in their Houses, Cloaths and Furniture.

II. 1. The

II. 1. The great Rule of Eating and Drinking is, To suit the Quality and Quantity of the Food to the Strength of our Digestion; to take always such a sort and such a Measure of Food, as sits light and easy on the Stomach.

2. All pickled or smoaked or salted Food, and all high-season'd is unwholsome.

3. Nothing conduces more to Health, than Abstinence and plain Food with due Labour.

4. For studious Persons, about eight Ounces of Animal Food, and twelve of Vegetable in twenty-four Hours is sufficient.

5. Water is the wholsomeft of all Drinks; quickens the Appetite and strengthens the Digestion most.

6. Strong, and more especially spirituous Liquors, are a certain though slow Poison.

7. Experience shews, there is no Manner of Danger, in leaving them off all at once.

8. Strong

8. Strong Liquors do not prevent the Mischiefs of a Surfeit, nor carry it off so safely as Water.

9. Malt Liquors (except clear Small-beer of a due Age) are exceeding hurtful to tender Persons.

10. Coffee and Tea are extremely hurtful to Persons who have weak Nerves.

III. 1. Tender Persons should eat very light Suppers; and that two or three Hours before going to Bed.

2. They ought constantly to go to Bed about Nine, and rise at Four or Five.

IV. 1. A due Degree of Exercise is indispensably necessary to Health and long Life.

2. Walking is the best Exercise for those who are able to bear it, Riding for those who are not. The open Air, when the Weather is fair, contributes much to the Benefit of Exercise.

3. We

3. We may strengthen any weak Part of the Body by constant Exercise. Thus the Lungs may be strengthened by loud speaking, or walking up an easy Ascent: The Digestion, and the Nerves by Riding: The Arms or Hams by strongly rubbing them daily.

4. The Studious ought to have stated Times for Exercise, at least two or three Hours a Day: The one half of this before Dinner, the other before going to Bed.

5. They should frequently shave, and frequently wash their Feet.

6. Those who read or write much, should learn to do it standing; otherwise it will impair their Health.

7. The fewer Cloaths any one uses, by Day or Night, the hardier he will be.

8. Exercise, first, should be always on an empty Stomach; secondly, should never be continued to Weariness; thirdly, after it, we should take Care to cool by Degrees: Otherwise we shall catch Cold.

9. The

9. The Flesh-brush is a most useful Exercise, especially to strengthen any Part that is weak.

10. Cold-bathing is of great Advantage to Health. It prevents Abundance of Diseases. It promotes Perspiration, helps the Circulation of the Blood, and prevents the Danger of catching Cold. Tender People should pour Water upon the Head before they go in, and walk in swiftly. To jump in with the Head foremost, is too great a Shock to Nature.

V. 1. Costiveness cannot long consist with Health. Therefore Care should be taken to remove it at the Beginning: And when it is removed, to prevent its Return, by soft, cool, opening Diet.

2. Obstructed Perspiration (vulgarly called catching Cold) is one great Source of Diseases. Whenever there appears the least Sign of this, let it be removed by gentle Sweats.

VI. 1. The Passions have a greater Influence on Health than most People are aware of. 2. All

2. All violent and sudden Passions dispose to, or actually throw People into acute Diseases.

3. The slow and lasting Passions, such as Grief and hopeless Love, bring on chronical Diseases.

4. 'Till the Passion which caused the Disease is calm'd, Medicine is applied in vain.

5. The Love of GOD, as it is the sovereign Remedy of all Miseries, so in particular it effectually prevents all the bodily Disorders the Passions introduce, by keeping the Passions themselves within due Bounds. And by the unspeakable Joy and perfect Calm, Serenity and Tranquillity it gives the Mind, it becomes the most powerful of all the Means of Health and long Life.

POSTSCRIPT.

1. **I**T was a great Surprise to the Editor of the following Collection, That there was so swift and large a Demand for it; that three Impressions were called for in four or five Years; and that it was not only re-published by the Booksellers of a neighbouring Nation, but also inserted by Parts in their publick Papers, and so propagated through the whole Kingdom. This encouraged him carefully to revise the whole, and to publish it again, with several Alterations, which it is hoped may make it of greater Use to those who love common Sense and common Honesty.

2. Those Alterations are still in Pursuance of my first Design, To set down cheap, safe, and easy Medicines; easy to be known, easy to be procured, and easy to be applied by plain, unlettered Men. Accordingly, I have omitted a considerable Number, which, tho' cheap

cheap and safe, were not so common or well known; and have added almost an equal Number, to which that Objection cannot be made: Which are not only of small Price, and extremely safe, but likewise easily to be found, if not in every House or Yard, yet in every Town, and almost every Village throughout the Kingdom.

3. It is because they are not safe, but extremely dangerous, that I have omitted (together with Antimony) the four Herculean Medicines, Opium,* the Bark,* Steel,* and most of the Preparations of Quicksilver. Herculean indeed! Far too strong for common Men to grapple with. How many fatal Effects have these produced, even in the Hands of no ordinary Physicians? With regard to four of these, the Instances are glaring and undeniable. And whereas Quicksilver, the fifth, is in its native Form, as innocent as Bread or Water, has not the Art been discovered, so to prepare it, as to make it the most deadly of all Poisons? These, Physicians have justly termed edged Tools. But they have not yet taught them to wound at a Distance: And honest Men are under no Necessity of touching them, or coming within their Reach.

4. Instead of these, I have once more ventured to recommend to Men of plain unbiassed
 C Reason,

* Except in one Instance of each.

Reason, such Remedies as Air, Water, Milk, Whey, Honey, Treacle, Salt, Vinegar, and common English Herbs, with a few foreign Medicines, almost equally cheap, safe and common. And this I have done on that Principle, whereby I desire to be governed in all my Actions, "Whatsoever ye would that Men should do unto you, the same do unto them".

5. At the Request of many Persons, I have likewise added plain Definitions of most Distempers; not indeed accurate or philosophical Definitions, but such as are suited to Men of ordinary Capacities, and as may just enable them, in common, simple Cases, to distinguish one Disease from another. In uncommon or complicated Diseases, or where Life is more immediately in Danger, I again advise every Man without Delay to apply to a Physician that fears GOD.

BRISTOL, Oct. 16, 1755.

LONDON, Nov. 10, 1760.

DURING the Observation and Experience of more than five Years, which have passed since the last Impression of this Tract, I have had many Opportunities of trying the Virtues of the ensuing Remedies. And I have now added the Word *tried* to those, which I have found to be of the greatest Efficacy. I believe many others to be of equal Virtue: But it has not lain in my Way to make the Trial.

In this Course of Time I have likewise had Occasion to collect several other Remedies, tried either by myself or others, which are inserted under their proper Heads. Some of these I have found to be of uncommon Virtue, equal to any of those which were before published: And one, I must aver, from personal Knowledge, grounded on a thousand Experiments, to be far superior to all the other Medicines I have known; I mean, Electricity. I cannot but intreat all those who are Well-wishers to Mankind, to make full Proof of this. Certainly it comes the nearest an Universal Medicine, of any yet known in the World.

One grand Advantage which most of these Medicines have above those commonly used is this: You may be sure of having them good in

their Kind; pure, genuine, unsophisticate. But who can be sure of this, when the Medicines he uses are compounded by an Apothecary? Perhaps he has not the Drug prescribed by the Physician, and so puts in its Place "what will do as well." Perhaps he has it; but it is stale and perished: Yet "you would not have him throw it away. Indeed he cannot afford it." Perhaps he cannot afford to make up the Medicine as the Dispensatory directs, and sell it at the common Price. So he puts in cheaper Ingredients: And you take neither you nor your Physician knows what! How many Inconveniencies must this occasion? How many Constitutions are ruined hereby? How many valuable Lives are lost? Whereas all these Inconveniencies may be prevented, by a little Care and common Sense, in the Use of those plain simple Remedies, which are here collected.

A
COLLECTION
O F
RECEIPTS.

1. *Abortion, (to prevent).*

1. **U**SE daily a Decoction of *Lignum Guaiacum.*

2. *For an Ague.**

2. Go into the *Cold Bath* just before the Cold Fit.

3. Or, take a Handful of *Groundsell*, shred it small, put it into a Paper Bag, four Inches square, pricking that Side which is to be next the Skin full of Holes. Cover this with a thin Linen,

C 3 and

* An *Ague* is, An Intermittent Fever, each Fit of which is preceded by a cold Shivering and goes off in a Sweat.

and wear it on the Pit of the Stomach, renewing it two Hours before the Fit:—Tried.

4. Or, apply a Handful of *Yarrow* in like Manner:
5. Or, a large *Onion* slit:
6. Or, boil *Yarrow* in new Milk, 'till it is tender enough to spread as a Plaister. An Hour before the cold Fit, apply this to the Wrists, and let it be on 'till the hot Fit is over. If another Fit comes, use a fresh Plaister: This often cures a *Quartan*.
7. Or, drink a Quart of *cold Water*, just before the cold Fit. Then go to Bed and sweat:
8. Or, make six middling Pills of *Cobwebs*. Take one a little before the cold Fit: Two a little before the next Fit: The other three, if Need be, a little before the third Fit. I never knew this fail:
9. Or, two Tea-spoonfuls of *Sal Prunellæ* an Hour before the Fit. It commonly cures in thrice taking:
10. Or, a Tea-spoonful of *Spirits of Hartshorn*, in a Glass of Water:
11. Or, eat a *Lemon*, Rind and all:
12. Or, drink a Pint of Decoction of *Camomile*, sweeten'd with Treacle. Take it warm in Bed, and sweat two Hours.

☞ It is proper to take a gentle Vomit before you use any of these Medicines. If this is taken two Hours before the Fit is expected, it generally prevents that Fit, and sometimes cures an *Ague*: Especially in Children.— It is also proper to repeat the Medicine (whatever it be)

be) about a Week after, in order to prevent a Relapse.
Do not take any Purge soon after.

3. A Tertian Ague.*

13. Boil a Handful of *Ribwort* in Whey. Drink this warm an Hour before the Fit comes, and lie down and sweat.
14. Or, apply to each Wrist, a Plaister of *Treacle* and *Soot*:—Tried.
15. Or, use the *Cold Bath*. (Unless you are of an advanced Age, or extremely weak.) But when you use this, on any Account whatever, it is proper,
 1. To bleed or purge, before you begin :
 2. To go in cool ; to immerge at once, but not Head foremost ; to stay in only two or three Minutes, (or less, at first.)
 3. Never to bathe on a full Stomach :
 4. To bathe twice or thrice a Week at least, 'till you have bathed nine or ten Times :
 5. To sweat immediately after it (going to Bed) in Palsies, Rickets, and all Diseases wherein the Nerves are obstructed :
 6. You may use yourself to it, without any Danger, by beginning in *May*, and at first just plunging in, and coming out immediately. Tho' many have begun in Winter, without any Inconvenience.

4. A

* That is, An *Ague* which returns every other Day.—In this use light and sparing Diet on the Day between.

4. *A Quartan Ague.**

16. Apply to the Suture of the Head, when the Fit is coming, *Wall July Flowers* beating together Leaves and Flowers with a little Salt. Keep it on 'till the hot Fit is over. Repeat this, if Need be.
17. Use *strong Exercise* (as Riding or Walking, as far as you can bear it) an Hour or two before the Fit. If possible, continue it 'till the Fit begins. This alone will frequently cure:—Tried.
18. Or apply to the Wrists a Plaister of *Turpentine*: Or of bruised *Garlick* :
19. Or, of bruised *Pepper*, mixt with *Treacle*.
20. Or, apply *Oil of Turpentine* to the small of the Back, before the Fit.
21. For a *Tertian* or *Quartan*, Vomit an Hour after the Cold Fit begin's. Then go to bed, and continue a large Sweat by *Lemonade*, (that is, Lemon, Sugar, and Water) for six or eight Hours. This usually cures in three or four Times: If it does not, use the *Cold Bath* between the Fits.

5. *St. Anthony's Fire. †*

22. Take a Glass of *Tar-Water* warm, in Bed, every Hour, washing the Part with the same.

☞ *Tar-water is made thus—Put a Gallon of cold Water to a Quart of Norway Tar. Stir them together*

* That is, An *Ague* which misses two Days, coming on *Monday* (suppose) and again on *Thursday*.

† *St. Anthony's Fire* is a Fever attended with a red and painful Swelling, full of *Pimples*, which afterwards turn into *small Blisters*, on the Face or some other Part of the Body. The sooner the Eruption is, the less Danger.—Let your Diet be only *Water Gruel*, or *Barley Broth*, with roasted Apples,

ther with a flat Stick for five or six Minutes. After it has stood cover'd for three Days, pour off the Water clear, bottle and cork it.

23. Or, drink just so much *Sea-Water* as does not vomit or purge, every Morning for seven Days: This is the proper Measure, in whatever Case it is taken. It seldom fails.

24. Or. take a Decoction of *Elder-Leaves*, as a Sweat.

25. Or, of *wild Thyme*, applying to the Part a Cloth dipt in *Lime-Water*, mixt with a little *comphorated Spirits* of Wine.

☞ *Lime-water* is made thus.—Infuse a Pound of good quick Lime, in six Quarts of Spring Water for twenty-four Hours. Decant and keep it for Use.

26. Or, take two or three gentle Purges. No acute Fever bears repeated Purges better than this, especially when it affects the Head.

27. Or, (using the Internal Medicine at the same Time) apply a Plaister of *Venice Treacle*:

28. Or, wash it with Water wherein Bran is boiled:

29. Or boil a Handful of *Sage*, two Handfuls of *Elder-Leaves* (or *Bark*) and an Ounce of *Allum* in two Quarts of Forge Water, to a Pint. Anoint with this every Night.

6. *The Apoplexy.**

30. To prevent, use the *Cold Bath*, and drink only Water.

31. In

* An *Apoplexy* is, A total Loss of all Sense, and voluntary Motion, commonly attended with a strong Pulse, hard Breathing and Snorting.

31. In the Fit, blow Powder of *White Hellebore* up the Nose, and fix a *Cupping Glass*, without scari-
fying, to the Nape of the Neck, and another to
each Shoulder. But send for a good Physician
immediately.
32. If the Fit be soon after a Meal, do not bleed,
but vomit.
33. Rub the Head, Feet, and Hands strongly, and
let two strong Men carry the Patient upright,
backwards and forward about the Room.
34. A *Seton* in the Neck, with low Diet, has often
prevented a Relapse.

7. *Canine Appetite*.*

35. "If it be without Vomiting, is often cured by a
small bit of Bread dipt in Wine, and applied to

13. If it lie heavy, put a little *Salt* in it; if it curdle, *Sugar*. For bilious Persons, mix it with *Water*.

148. *Nervous Disorders.*

514. Are of two Kinds; 1. Those which proceed from the Nerves being compress'd by the Swelling of the muscular Flesh: Or, 2. When the Nerves themselves are disorder'd. In the former Case, Temperance and Abstemiousness will generally cure: In the latter, when the Nerves perform their Office too languidly, a GOOD AIR is the first requisite. The Patient also should rise early, and as soon as the Dew is off the Ground walk: Let his Breakfast be *Mother of Thyme Tea*, gather'd in *June*, using half as much as we do of common Tea. It should be drunk with the finest Sugar; and Cream may be added if he please: Coffee must be avoided. When the Nerves are too sensible, let the Person breathe a proper Air. Let him eat Veal, Chickens, or Mutton. Vegetables should be eat sparingly; the most innocent is the French Bean whilst young, and the best Root the Turnip. Wine should be avoided carefully: So should all Sauces. Sometimes he may breakfast upon a Quarter of an Ounce of the Powder of *Valerian-root* infus'd in hot Water, to which he may add Cream and Sugar. Tea is not proper. When the Person finds an uncommon Oppression, let him take a large Spoonful of the Tincture of *Valerian-root*.

☞ The Tincture should be made thus. Cut to Pieces six Ounces of wild *Valerian-root* gather'd in *June*, and fresh dried. Bruise it by a few Strokes in a Mortar, that the Pieces may be split, but it should not be beat into a Powder: Put this into a Quarter of strong white Wine: cork the Bottle and let it stand three Weeks, shaking it every Day; then press it out and filtre the Tincture thro' Paper.

515. Take also as much as will lie on a Shilling of the Powder of *Mistletoe*, twice a Day, when the Stomach is most empty, fasting two Hours after it; then once a Day, and afterwards every other, or every third Day, 'till there is no more Need of Medicines.

☞ Let this Plant be gather'd in May, and the Leaves and Bark dried carefully in the free Air, without Sun, 'till they are brittle. Let them then be reduced to a fine Powder, and kept in that Form.

Dr. Hill.

516. But I am firmly persuaded, there is no Remedy in Nature, for Nervous Disorders of every Kind, comparable to the proper and constant Use of the *Electrical Machine*.

149. *An old stubborn Pain in the Back.*

517. Steep Root of *Water-Fern* in Water, 'till the Water become thick and clammy. Then rub the Parts therewith Morning and Evening.

150. *The Palsy.* ||

But in all Cases where the Nerves are obstructed,
 (such as those marked thus*) you should go to Bed
 immediately after, and sweat.

'Tis often useful, to use the *Hot Bath* a few
 Days, before you use the *Cold*.

Wise Parents should dip their Children in cold
 Water every Morning, 'till they are three Quarters
 old; and afterward, their Hands and their Feet.

N. B. No Child should ever be swath'd tight.
 It lays the Foundation for many Diseases.—'Tis
 best to wean a Child at about seven Months old.
 They should lie in the Cradle at least a Year. No
 wise Parent should suffer a Child to drink any *Tea*;
 (at least, 'till it is ten or twelve Years old, or to
 taste Spice or Sugar. Milk, Milk-porridge, and
 Water-gruel are the proper Breakfast for Children.

Nor have I yet known one single Instance,
 wherein it has done Harm: So that I cannot but
 doubt the Veracity of those which have affirmed
 the contrary.

Fasting Spittle outwardly applied every Morning,
 has sometimes relieved, and sometimes cured

Blindness,
 Contracted Sinews, from a Cut,
 Corns, (mixt with chew'd Bread and applied
 every Morning)
 Cuts, (fresh)
 Deafness,
