LONG LIVERS: A CURIOUS HISTORY

Such Perfons of both Sexes who have liv'd feveral AGES, and grown Young again :

With the rare SECRET of

REJUVENESCENCY

O F

Arnoldus de Villa Nova,

And a great many approv'd and invaluable RULES to prolong LIFE:

AS ALSO,

How to prepare the UNIVERSAL MEDICINE.

Most humbly dedicated to the Grand Master, Masters, Wardens and Brethren of the most Antient and most Honourable Fraternity of the FREE-MA-SONS of Great Britain and Ireland.

By EUGENIUS PHILALETHES, F.R.S. LONGER Author of the Treatife of the PLAGUE.

Viri, Fratres, audite me. Act. XV. 13. Diligite Fraternitatem, timete Deum, honorate Regem. 1 Pet. ii. 17.

LONDON:

Printed for J. HOLLAND at the Bible and Ball in St. Paul's Church-Yard, and L. STOKOE at Charing-Crofs. 1722.

TO THE GRAND MASTER, MASTERS, WARDENS and BRETHREN, OF THE Moft Antient and moft Honourable Fraternity of the FREE MASONS O F Great Britain and Ireland,

Brother EUGENIUS PHILALETHES Sendeth Greeting.

Men, Brethren,

Address my felf to you after this Manner, because it is the true Language of the Brotherhood, and which the primitive Christian Brethren, as well as those who

were from the Beginning, made use of, as we learn from the holy Scriptures, and an uninterrupted Tradition.

I present

I prefent you with the following Sheets, as belonging more properly to you than any elfe. By what I here fay, those of you who are not far illuminated, who stand in the outward Place, and are not worthy to look behind the Veil, may find no difagreeable or unprofitable Entertainment : and those who are so happy as to have greater Light, will discover under these Shadows somewhat truly great and noble, and worthy the serious Attention of a Genius the most elevated and sublime: The Spiritual Celessial Cube, the only true, solid and immoveable Basis and Foundation of all Knowledge, Peace, and Happines.

I therefore, my deareft Brethren, greet you most heartily, and am glad of this Opportunity to rejoice with you, inasmuch as it hath pleased the Almighty, One, Eternal, Unalterable God, to fend out his Light, and his Truth, and his vivifying Spirit, whereby the Brotherhood begins to revive again in this our Isle, and Princes seek to be of this facred Society, which hath been from the Beginning, and always shall be; the Gates of Hell shall never prevail against it, but it shall continue while the Sun and Moon endures, and till the general Confummation of all Things; for society of against us?

This

This being fo, I fhall fpeak to you a few Words on this important Subject; and perhaps I am the first that ever spoke to you after this Manner. I shall as briefly as I can, present you with a true and faithful Mirrour, a Mirrour which will not, which cannot flatter (Flattery be eternally banish'd the Brotherhood) wherein you may see, or rather be remembred, what you are: and then you need not be told very much how you ought to act. And in this I sour effential Difference, richly diftinguiss us from all others, and is indeed the very Soul and Spirit of the Brotherhood.

The Style I shall make use of is most catholick, primitive and Christian; it is what is extracted from the facred Scriptures. Remember that you are the Salt of the Earth, the Light of the World, and the Fire of the Universe. Ye are living Stones, built up a spiritual House, who believe and rely on the chief *Lapis Angularis*, which the refractory and disobedient Builders disallowed, you are called from Darkness to Light, you are a chosen Generation, a royal Priesthood.

This makes you, my deareft Brethren, fit Companions for the greateft Kings; and no wonder, fince the King of Kings hath

hath condeficended to make you fo to himfelf, compared to whom the mightieft and moft haughty Princes of the Earth are but as Worms, and that not fo much as we are all Sons of the fame one Eternal Father, by whom all things were made; but inafmuch as we do the Will of his and our Father which is in Heaven.

You fee now your high Dignity; you fee what you are; act accordingly, and fhew yourfelves (what you are) MEN, and walk worthy the high Profession to which you are called. But while I fay this, do not imagine I set up for a *Rabbi*, Master, or Instructor, who am one of the least of you, a meer Novice, a Catechumen, and know nothing. However, do not despise my Mite, which I throw into your Treasury, fince 'tis all I have; others may do more in Quantity, but not in Proportion.

Remember then what the great end we all aim at is; Is it not to be happy here and hereafter? For they both depend on each other: The Seeds of that eternal Peace and Tranquillity and everlasting Repose must be sown in this Life; and he that would glorify and enjoy the Sovereign Good then, must learn to do it now, and from contemplating the Creature gradually ascend to adore the Creator.

You

vi

111111

You know, no one is worthy to be of you that does not know, or at leaft love, one or more of the feven Liberal Arts, which in fome fort depend on each other; Mufick, Harmony, and Proportion run thro'all; but the grandeft and moft fublime of all is Aftronomy, by which it has been given to Men from above to do fuch Wonders, and has fo amply difplayed the Glories of the moft High. The Heavens speak forth the Glory of God, and the Firmament announceth the Works of his Hands.

This Earth which we inhabit is indeed a wonderful Piece of Structure, replenished with infinite Variety of rich Productions of Vegetables and Minerals, which all difcover a Divine Origin, as much as the Animal Kingdom; where a little Fly is as much the Wonder of the most penetrating Philosopher, as proud haughty Man, who plumes himself up with being Rational, and yet makes to bad use of his being to; stiles himself the Lord of the Creation, and like a true Tyrant devours one third (and that the most innocent part) of it, to keep up his Royalty. This little despicable Animal has all its proper Organs as regularly polited as the other ; its Members as justly proportioned and adapted; its little Eye has its Uvea, Retina, and crystalline Humour; and its biro Vi Body

viij The DEDICATION.

Body its proper Veffels, its Blood and Lymphæ. O Lord our God, how wonderful is thy Name in all the Earth!

But alas! my Brethren, what are we and our little Globe below, to that stupendous Celeftial Mafonry above ! where the Almighty Architect has firetch'd out the Heavens as a Curtain, which he has richly embroidered with Stars, and with his immortal Compasses, as from a Punctum, circumfcribed the mighty ALL; is himfelf the Center of all Things, yet knows no Circumference? who lets down his golden Balance, and weighs all Things according to eternal incorruptible Juffice, and where the Actions of the best of Men are frequently found too light; who has created infinite Worlds, for what we know, above us; and those vast Luminaries within our Ken, to which he has given Laws, and allotted them their peculiar Influences, Intelligences and Dæmons.

In these Contemplations the Royal Pfalmist was lost in Wonder and Amazement; these humble the proudest Spirits, and make the most haughty Philosopher own, that all he knows is, that he knows nothing. Can any then, who thinks after this manner, be an Atheist? No, my dearest Brethren, there never was such an hideous Monster in the 4. World.

World. Be not therefore carried away with every Blaft of Doctrine, or fondly imagine any one, who is fo unhappy as to be branded with this odious Appellation, to be what the deteftable Term imports. The best and most learned Men have not escaped the opprobrious Names of Atheists and Hereticks; it has ever been the Practice of poor narrow-foul'd Animals, when they meet with an elevated Genius, who, Eagle like, foars to the Sun, and contemplates that bright Luminary in all his Glories, which dazle and confound their weak Sight, when they are at a Lofs in Argument, vainly to perfuade their Audience (as wife as themfelves) by Noife and fenfelefs Clamour, and the everlasting Din of Herefy and Atheism. This I hint to you as a Caution not to run on with the unthinking Herd, or give into rash Judgment, whereby good Men have been too often injured; and the Slanderer, if ever he is fo happy as to reflect and look upwards, finds nothing but a troubled Confcience, and a perpetual Incapacity of making Reflitution for his Crime.

I hope none of the Brethren will ever lie under these Aspersions; but no one can answer for the Effects of the Folly and Malice of ignorant and designing Men. b However X

However, be not uneafy at Sounds which have no Meaning in them; for thus to affirm any one who believes in the Almighty, Eternal Father, and adores his divine and most glorious Attributes, to be an Atheist, is the most impudent, most abominable, and most unpardonable piece of Villany and Ignorance in the world, a flagrant Contradiction; for those two are as repugnant as Light to Darkness, and Heaven to Hell.

Those indeed who hold, or would perfuade the Vulgar that they hold, (what they themfelves know they do not believe) a Plurality of Gods, deferve infinitely more that charitable predicate; for a Multitude of Gods is utterly inconfistent with the Idea of the Divinity; it is the fame as a Multitude of First Beings, Nonsense the most blasphes mous and enormous; for he that believes there are many Gods, believes in no God at all. And who could ever have imagined, (had not Hiftory fo informed us) that the whole World, except the Brotherhood, fhould have been guilty of fo much Folly and Madness as to adore a wretched Company of Ribbalds, lewd Harlots, and their confecrated Baftards, with which holy Fry the Heathens peopled their Heavens, with a notorious Whoremaster at their Head, and of whose hopeful Issue the whole Band of puisne Gods

Gods (Magnum Jovis incrementum) were composed.

But if to cashier for ever out of our Creed this infinite ribble-rabble of spurious Divinities both he and fhe; if to own one cannot believe the eternal Magazine of holy Trumpery, and bend (like Ifacher's Afs) beneath the infupportable Luggage of Infidel and Pagan Legendary Superstition, the Reveries of pamper'd dreaming Enthulialts, whofe Brains, ever pefter'd with a thoufand fluttering inconfistent Ideas, and incoherent Phantoms, the Effects of the Fumes of Wine and indigested Luxury, who retail out their spiritual Haberdashery of small Wares and holy Baubles, to the childish unthinking Ideot Multitude : If to do all this, and believe only in one God the Father Almighty, Maker of Heaven and Earth, and of all Things visible and invisible, the most grand, effential, the prime, eternal, everlafting, fundamental Article of the most holy, catholick, univerfal, and Chriftian Faith (of which we are) makes one an Atheift; fuch, my deareft Brethren, are we all, and we glory in it. Let the Infidel and Pagan World fay what they will, we shall have the Suffrages of all Christians, under whatever other Denomination diffinguished, who cannot be fo inconfistent with themfelves, as to b 2 12000 take

XI

xii

take Umbrage at those who believe the prime Article of their (that is, our) holy Faith.

After this manner, thank our great God, have we learned Chrift, and after the Way fuch call Atheifin and Herefy (I speak in Brother St. *Paul's* Style) So worship we the God of our Fathers, who (we know) is but One as is our Faith. There is one God, one Faith, one Baptism, one Lord and Saviour of us all.

O thou Eternal ONE! thou Immortal UNITE! thou Incomprehensible MONAS! Never let us swerve from these everlasting Truths. Send out thy Light and thy Truth, that they may lead and bring us to thy holy Hill and thy Tabernacle. We are imprisoned, who shall deliver us from the Body of this Death? We are exiled Children from our Country, when shall we return? Here thou haft placed us as Novices and Probationers, when shall we be professed amongst those blessed Fraternities above, and be made free Denizons of the celestial Jerusalem, not built with Hands, and be re-inftated in our Innocence? Here we wander in the dark gloomy Vale of Tears and the Shadow of Death, where we remember nothing, and know nothing, and who dares fay What doft thou? Here haft thou

XIII

thou placed us for Reafons best known to thy Almighty Justice, and thy inferutable Counsels, into which the curious Pryer is struck blind by the radiant Majesty of thy Glories, thou inaccessible Light! thou eternal Power! Wisdom! Love!

Pardon me, my deareft Brethren, this Digreffion, which probably however may not be without its Profits, and into which my Meditation on this divine Science generally leads me, of which tho' I know nothing, yet perhaps I have faid too much. However, to acquire this, as well as any of the other Sciences, whereby you will come to know, love and honour God, a diligent Application is abfolutely neceffary, and that cannot be without inward Peace; to obtain which, you must avoid all Tumult, much Company, and the Hurry of all Publick Employment; for which Reafons avoid as much as poffible the Court, where a Man must indispensably be obliged to wear the Mask, and where the Language and Cuftoms very ill agree with the Simplicity of the Brotherhood; where the Baits to do Ill are fo many and enticing, and the Encouragements to Virtue fo few and cold, that a good Man has much ado to hinder himfelf from being carried away with the Torrent; and ten to one but all his honeft Endeavours

xiv The DEDICATION.

deavours to ferve his Prince and Country, are reprefented in a wrong Light, and his faithful Service repaid with Difgrace; there being ever about great Men fome fawning Sycophants whofe Intereft it is to keep honeft Perfons from them, left they come to know the Truth of Things. This is the State of all Princes; for let them be never fo good themfelves, they must fee through other People's Eyes, and hear through other People's Ears.

But if any of you should happen to be in any Employment which obliges your constant Attendance here; if your Prince, who knows how to diffinguish Merit, should cast his Honours on you unfought, unlookt for; exert your selves like Men. Be affable and courteous to all Men, and that not in Words only, but in Reality; and especially to the Brethren; it is your Duty particularly to be kind to them ; they will ask nothing unreasonable, they cannot do it; (Natura paucis contenta) and they leaft of all will envy your high Station. Alas! they are sensible the Heights of Honour are not only very flippery, but fhew you to all the World, where every one will fee youro Spots, but few found your Virtues. The Crowd indeed is pleafed with Show and Pageantry; all see your Pomp, but few aleffel as know

know your Sorrows. A true Brother (Heaven defend us, as from the blueft Plagues, from false ones) envies no one who is mounted on the high Battlements of State; he had infinitely rather live in Security than Grandeur ; the Pleasure in such losty Stations he knows (even of the few Good) can be but little, but the Ruine long, if they chance to fall. He would chuse to hide himself in the Clefts of the Rock, or fecurely pass his Days in some sweet quiet Shade, happy in Leifure and profoundest Obscurity. His Happinefs is, not to be taken notice of; and whilft others place all their imaginary Joy and Satisfaction in Noife and being popular, he desires (to use the Style of a great, but obfcure Philosopher) that his soft Minutes may glide away in Obscurity (like subterraneous Streams) unheard, unknown. And thus, when his Days are past away in Silence, would die a good, plain, honeft Man; knowing that Death cannot chufe but be to him a mightyTerror, who is popularly known to all the World, and dies only to himfelf a Stranger. Be wife therefore, ye great ones of this World, be learned, ye that are Judges of the Earth. Kiss the Son, left he be angry, and fo ye perifh from the right way; left he bruise you with his Rod of Iron, and crush you into Pieces like a Potter's Veffel .

Veffel: Remember you must die, and with her meaneft Sons pay that Debt of Nature, and be reduced to your primitive Earth, which then will be no ways different from that of the pooreft Cottager. Here the Weary reft from Labour, here the Prisoner fleeps in Peace, the Rich and the Poor, the haughty Monarch and the abject Slave lie promifcuous, undifturbed, and have no Diffinction in the cold filent Grave. This is the End of all human Glory. Do therefore Juffice, yet be merciful ; discharge faithfully your respective Duties, and then if you fall from your eminent Heights, you will carry Peace of Mind along with you, and a good Conscience; if you do not die rich, you will die honeft Men, and that is much better ; for a good Name is better than Riches.

The next Thing that I shall remember you of is, to avoid Politicks and Religion : Have nothing to do with thefe, as you tender your own Welfare; they will be destructive to your beloved Peace and Quiet, and have undone Millions; and therefore in these latter Days, happy are they who do not trouble themfelves about either. You know what I mean. But left the rafh cenforious World, or fuch into whose Hands this Book may fall, from hence fancy we have neither Religion nor Politicks, let fuch know

know their Error : Ours is the beft Policy, it is Honefty; it is the Policy of the holy Jefus, who never diffurbed Governments, but left them as he found them, and rendered to *Cæfar* the Things that were *Cæfar's*. Thus fhall Princes love and cherifh you, as their most faithful and obedient Children and Servants, and take delight to commune with you, inasimuch as amongst you are found Men excellent in all kinds of Sciences, and who thereby may make their Name, who love and cherifh you, immortal.

It is the fame thing in relation to the Religion we profes, which is the best that ever was, or will, or can be; and whoever lives up to it can never perifh eternally, for it is the Law of Nature, which is the Law of God, for God is Nature. It is to love God above all things, and our Neighbour as our felf; this is the true, primitive, catholick, and univerfal Religion, agreed to be fo in all Times and Ages, and confirmed by our Lord and Master Jesus Christ, who tells us, that on these hang all the Law and the Prophets. And now I have a convenient Opportunity, hearken to me a little in this Point. You know when the Almighty Architect, after framing this goodly Univerfe, had built up Man, he gave him a Law to walk C

xviii The DEDICATION.

walk by; this Law was absolutely perfect in it felf, for it was God's Law, and confequently wanted nothing to make it better than it was; this Law indeed Man tranfgreffed, and thence flowed all our Mifery. However, after he was put out of Paradife, we do not read he had any other to square his Actions by, no more than his first Sons, the two first Brothers in the World. And now the Infant World, confifting but of a very few People, lived in common according to this Divine Law, till the eldeft of the two (the first false Brother) growing fick of Virtue, and fwoln with Pride and Cruelty according to the Flesh, (as is after his Example usual in fuch Cafes) perfecuting him who was humble according to the Spirit, inhumanly murder'd his and our Brother. O dire Effects of the Luft of Rule and Empire!

However, God repaired this Lofs to our common Father, by his third Son Seth; while Cain, who by the Parricide of his Brother founded (as almost all ambitious Thirsters after Empire have fince done) his Dominion in Blood, and despissing the holy Law of Nature, and confiding in his own Strength, first usurped sovereign Sway; was the first who constituted arbitrary Government, and began to oppress with Force, Rapine, Servitude, and wicked Laws, Men created

created by God Free, and the Sons of a holy Generation, till thefe, God's Judgments being now alfo by them contemned, and all Flefh corrupted, begot those Giants in Iniquity who oppressed the Poor, raifed themselves to high Stations by Plunderings and Robberies : and, priding themfelves in their Wealth, made their Names famous, imposing them on Regions, Cities, Mountains, Rivers, Waters, and the Sea; whole first Parent (Cain) was malicious, envious, incorrigible by God's Correction, a diffembling Traytor, a Spiller of fraternal Blood, an accurfed Wanderer and Vagabond, and who added Blasphemy to his Malediction; in short, a FALSE BROTHER.

This wicked and impious Race (for the whole Creation groaned under their Impieties) the Almighty walhed off from the Face of the Earth by the Deluge, excepting Noah, a just Man in the Generations of Seth, with his Family. This good holy Man endeavoured, after the Flood, to reftore the Law of Nature which had been fo long obscured by the Pride and Impiety of those that perished. But his Sons and their Iffue following the Example of the Giants, began to domineer in like manner over their Inferiors, to build mighty Cities and form Kingdoms, fo that from Noah till Abraham

xix

C 2

XX

ham there is no mention made of any just Man; for till his Time these haughty Rulers continued most flagrant and enormous Examples of hardy and robust Improbity, Impiety, Confusion, tyrannick Power, Violence, Oppression, Hunting, Luxury, Pomp, and Vanity, and the like Wickedness and Folly, which the Sons of Noah had introduced ; amongst whom was Cham or Ham, who, as he was the most wicked of them, fo he obtained by Violence the largest share of Dominion. From him descended Nimbroth, whom the Scripture describes to be powerful in the Earth, and a mighty Hunter; he built Babylon, and was the Beginning of the Confusion of Tongues. This mighty Hunter of Men, as well as Beafts, made severe and rigorous Laws, instituted Degrees of Honour, and Offices, introduced Slavery, and laid heavy Taxes on the People, raised vast Armies, waged cruel Wars, and fet up Images and pompous Rites and Ceremonies in Worfhip, and was, as is believed, the Founder and Father of Idolatry.

In his Time too, it is highly probable, that bloody Sacrifices were invented. It was eafy to perfuade a Criminal against the Gods, that he might expiate what he deferved to die for, by the Death of a poor Beast; and if

if the Gods did not eat the referved Part of the Sacrifice, which was always the beft, theirMinisters orVicegerents(theSacrificators) who in all likelihood had hunted with their Grand Monarch, and loved his Roast-Meat, would eat it for them, and that was as well.

From this fame Cham proceeded Cufb, Mizraim, and Canaan, whence defcended the Ethiopians, Egyptians, and Canaanites, all great and most noble Nations indeed, but withal most wicked and abominable, and curfed by God, inasmuch as they contemned his Law, which he gave from the Beginning, and turned as fide from his true Worship, and transferred the Glory of the one immortal God to a thousand of his Creatures, to the Sun, and Moon, and Planets, and all the Host of Heaven.

In this condition was the World, when the Almighty chofe another juft Man, Abraham the Father of the Faithful, who by unerring Tradition had received the Divine Truths; for our Great God has always a Number of those who believe in him aright, and worship him in Spirit and in Truth, and write his Law, not in Tables of Stone, but in their Hearts, and who live in Quiet and Peace, private and unknown; as he told the Prophet afterwards, that he had 7000 who had not bent the Knee to Baal. This

xxii The DEDICATION.

This holy Patriarch and his Posterity persevered in their Justice till they were in Danger in Egypt to lose it by the Cruelty of a wicked Prince (who knew not Joseph) and their Conversation with the Professions of a pompous luxurious Idolatry : Then God raised up Moses, a great Astronomer, and a learned Man in Men and Things, who wonderfully freed them from their Servitude after having eased and despoiled their Enemies of their superfluous Gold.

These People he delivered from Servitude after a wonderful Manner from the Fury of an impious King. In the Defert they continued forty Years, tho' their Deliverer might have brought them into the Land of Promise in forty Days: But as this was a most excellent piece of Policy, and worthy the Forefight of Moses, fo it cannot be fufficiently commended ; he knew that a Company of raw undifciplined People, trained up for the most part in keeping of Sheep, would not be a Match for those warlike People, whose Cities and Kingdoms they were to take from them; befides that they might be in Danger of falling into Idolatry, to which by their long Refidence in Egypt, and their being acquainted with their Flefh-pots, Ragous, or made Difhes (probably deriving their Origin from

from luxurious Sacrifices) he had observed they were too much addicted.

Every body knows that the Egyptians (to whom we owe the Invention of the Zodiac) adored the Sun under those Symbols; fo because that glorious Luminary enters Aries in the Month of March, they worshipped him under the Symbol of a Lamb, or a human Figure with that Animal's Head, as they did in the following Month under the Symbol of a Calf, or young Bull. Moses, whose grand Defign was to bring them back to their original divine and most perfect Law, given Man by God Almighty in the Beginning, was refolved to bend all his Thoughts to efface those Tinctures of Idolatry that they had received in their Servitude, by conftituting a Religion wonderfully adapted to the prefent Occafion, with pompous Sacrifices, Rites and Ceremonies, magnificent Sacerdotal and Levitical Vestments, and a vast Number of mystical Hieroglyphics, as the Egyptians had; but with this effential Difference, that these mystic Shadows all tended to set forth the Glory of one God the Creator; whereas those were entirely subservient to the Worship of a Multitude of Creatures, an Opposition greater than which could never be.

The

XXIII

I

xxiv The DEDICATION.

The first publick A& then of Religion after their Deliverance was the Passover, or the Ceremony of eating the Paschal Lamb, which was in the Month of March; fo that, in that very Month that the Egyptians adored the Ram, the Israelites were roafting and eating up this their God, and that too after such a manner, being shod, girded, and with their Staves in their Hands, in a Hurry, and with bitter Herbs, as evidently shewed the highest Contempt and Disdain of this imaginary Deity.

However, as a Specimen of their Propenfity to Idolatry, one cannot give a more notorious Inftance than the fetting up the Golden Calf, which was made of those Earings and Ornaments they a little before had borrowed of the Egyptians. It is true, this piece of Pageantry lasted not long; the well-grounded Zeal of Moses, who had the Honour to discourse a long while very familiarly with God, put a Stop to their religious Mirth and Gallantry; the Idol was broken in pieces, burnt, and ground to Powder, and the Crime was no otherwife expiated, than with the Blood of 3000 Souls. It was now high time for Mofes to look about him; the Law then was form'd with all convenient Diligence and Expedition, and the Decalogue written over again, and

and that too (to speak in the Hebrew Style) by the Finger of God. And certainly, well may it be faid to be divinely penn'd, inafmuch as it comprehends whatever Man is to act in relation to his God and Neighbour. Whoever will give himfelf the trouble to read over Leviticus, will find what Rites and Ceremonies were superadded in order to keep up this external Pomp and Magnificence, fo neceffary at that time for the People, who could not at once be brought back to the pure worshipping of the most High in Spirit and in Truth. The eating of the Flesh of Animals was tolerated, as I have elsewhere observed *; but how many Restrictions this Toleration was attended with, every one that looks into the Bible may find; the most delicious Food was abfolutely forbidden, as Swines Flesh, and all Shell-Fifh; and the manner of dreffing was fuch as required the utmost Scrutiny in relation to the Life of the Animal, and the Blood, as the Life or Soul, was particularly prohibited.

The bloody Sacrifices too were likewife continued, and feveral other human Inventions, which in those Days God winked at, as he did at the Bill of Divorce; but from

XXV

^{*} Vid, my Treatife of the Plague, p. 16.
xxvi The DEDICATION.

the Beginning (I fpeak the Words of Chrift) it was not fo. By reafon of which external Acts, Symbols, Shadows and Hieroglyphicks (which Chriftians afterwards explaincd as Types of the Meffiah) this Law (quite oppofite to the Chriftian, which was called the Law of Freedom, and of Men) was called the Law of Children and of Slaves, for it grew fo troublefome and fo fervile at laft, thro' fuch a Multitude of Traditions of Men, that the Yoke was heavier than could be born withal; a Grievance which nothing but the Law of Grace and Liberty could effectually remedy, of which by and by.

And might it not have been reafonably expected after so much noble Industry and Care in instituting such glorious Laws, the Morality of which is incontestible, and all tend to Peace and Happiness, and the exterminating of Rapine, Violence and Oppreffion, Blood and Slaughter, that these People should have been good and happy ? but it was quite the contrary : So that this People of Ifrael, who were a leprous, itchy Race, had no Merit to recommend them to the Divine Favour, but chosen thro' mere Grace, made so little Use of those Benefits, that they grew the most ungrateful, wicked, bloody People on the Face of the Earth. Moses indeed, as meek as he otherwise was, had

had given them an Example, who growing angry at their fetting up the Golden Calf, punished their Guilt with the bleffed Slaughter of about 3000 of the People; for Moses had faid to the Levites, who flew every Man his Brother, Companion and Neighbour, confecrate your felves to day to the Lord, every Man upon his Son and upon his Brother, that he may beftow upon you a Bleffing this Day. And this Action, which was only upon an extraordinary Emergency, was made a Precedent for the future, and the Honour of God was the Topic for fucceeding Murders and Outrages. I pafs by the Judges and Captains of Ifrael, as also the Blood that was fled under them, as I do their Democracy, where they quarrell'd with each other till they had quite deftroyed the whole Tribe of Benjamin, excepting 600 Persons, as also (when they returned again to Aristocracy and Princely Government) the unnatural Murder of Abimelech, Gideon's Baftard, who by a folemn Slaughter of his 70 Brethren, the legitimate Sons of his Father, upon one Stone, obtained the Sovereign Sway in Shechem.

This Infection fhedding Blood reached alfo their Kings. David, a Man after God's own Heart, made fuch an ill Use of the Divine Grace, that he became the Man after d 2. the

XXVII

xxviii The DEDICATION.

the Heart of the Devil, and was guilty of Crimes the most horrid and enormous, Adultery and Murder; for after having schamefully debauched the Wife, he basely facrificed the Husband.

He had killed two hundred Philiftines in cold Blood before, to poffels himfelf of their Fore-skins, which he delivered in full Tale (a wonderful *Groupe*) to his facred Majefty King Saul, 100 more than he need to have done, but as it was a Dowry for his Miftrefs the Princefs *Michal*, it favoured well in those Days, and the doubling the Sum was probably looked upon as a piece of heroic Gallantry, which, had he lived now, the Ladies, I suppose, would not have thanked

To fecure himfelf the Kingdom he afterwards caufed the feven Sons of Saul to be hanged, fo that there were none left him to contend with but Mephibosheth, a lame, feeble Prince (well for him that he was fo) the Son of his Friend Jonathan, at whofe Death he made such a loud Lamentation. Well might he then have been called the Man of Blood, of which he himself was but too fensible, when he began to reflect and confess, that the Curfe of Shimei was very just upon him on that account, and came from God. Libera me fanguinibus (for

The DEDICATION. XXIX

(for he had fhed Rivers of Blood) was his penitential Song; for the Mercy of God did not forfake him for ever, and his Penitence was as remarkable as his Crimes. Hence one may learn, that the greateft Sinners fhould never defpair on a fincere turning to God, whofe Grace is not limited, and his holy Spirit breaths as it lifteth : This fhould learn us alfo not to pafs Sentence on the States of Men; for that may be a Veffel of Grace and Election, which we may fancy to be a Veffel of Wrath and Reprobation.

However, tho' God pardoned his Guilt, yet he would not remit his Punishment, so that he hardly ever could be faid to poffefs the Kingdom of Israel in Peace; for while he was living, his Favourite Son Absalom invaded his Kingdom in Hebron, after whole Death Sheba the Son of Bochri role up against him; and some time before he died, his Son Adonijah : Tho' indeed this Action of that Prince feems rather to have been to make his Succeffion fecure against Solomon, the Son of an adulterous Woman, and his youngest Brother, whom notwithstanding David appointed his Heir, so little regard had he to Primogeniture, or indefeafible Hereditary Right; and on his Death-bed commanded him to bring down Shimei's hoary

XXX The DEDICATION.

hoary Head to the Grave with Blood, altho' he had pardoned him before.

Thus Solomon obtained the Hebrew Monarchy, which he established by the Blood of his eldeft Brother Adonijah on the most trivial Pretence in the World: However this King, wife as he was, fell away from God into the groffeft Idolatry, for which ten Tribes revolted in Rehoboam his Son's Time, and set over them Jeroboam for their King, a very wicked Man of the Tribe of Dan, who poisoned all Israel with Idolatry; and fo wicked afterwards were the fucceeding Kings of Ifrael and Judah, that scarce four of them were really good, fo that God delivered them into the hands of the King of Babylon, where they remained a long while in a cruel Servitude; afterwards God taking pity on them, these wretched People returned to Jerusalem, where they lived some time very happy in a kind of Commonwealth, which was governed by the Priefts, the Nobility, and popular Magistrates, till Aristobulus the Son of Hircanus made himself King, and established himself in the Kingdom of the Jews by .. the Murder of his Mother and Brother; at last, after a great many Kings, it ended under Archelaus, that infolent and debauched

The DEDICATION. XXXI

bauched Prince, when all Judea became a Province to the Romans.

But, during this general Corruption, it must not be imagined but there were fome few who were not carried away with the Stream; the Brotherhood continued unfhaken, and kept their Integrity; amongst whom fome of the holy Prophets were inspired to denounce the heavy Judgments of God against these notorious Monsters of Impiety; but they were foon filenc'd for their unseafonable Babbling, by fome little harmless Corrections, as having their Brains knocked out, or being fawed asunder, and the like wholfome Severities.

But as the Laity continued in their Wickednefs, the Princes were not one jot the better, but rather much worfe; fo that the High Prieft's Office was bought and fold, and fought for, and at laft two Perfons executed that high Charge by turns.

Thus stood the Affairs of the Jewish Nation in the Time of Augustus Casar, when there was a profound Peace all over the World, which was never more polite, and perhaps never more vicious.

The Scepter having now departed from Judah, the Messiah, the Prince of Peace, came into the World, and came (as he himfelf fays) not to destroy but to fulfil: But how,

xxxii The DEDICATION.

how, my dearest Brethren, must that be understood? it is certain he came to destroy the Shadows, Types, Hieroglyphicks, the bloody Sacrifices, and the whole Ceremonial Law, or elfe his Difciples and Followers have led us in the dark. He came not then to deftroy, but to fulfil, what was couched under all thefe, and all what was delivered by the Prophets, in relation to his Kingdom; to be the Reftorer of corrupted Nature, and to bring back Man again to his primæval State of Integrity, which the Mofaick Law could never do; to deliver us from Bondage, and make us Free, to bring us from Darkness into Light, and to be our Lord, Master, Saviour, and Redeemer from utter Perdition and Ruine for ever. He came to beat down the Empire of Sin, and the Pomps and Vanitics of this wicked World; his Divine Sermons and Discourses were levelled against these, and the Pride, Hypocrify, Avarice, Luxury and Cruelty of the Scribes and Pharifees, Priefts and Levites, who of the Houfe of Prayer had made a Den of Thieves, and an Exchange for Ufurers and Extortioners. To these Orthodox Teachers of the Law, he prefers in the Parable of the good Samaritan, a tender-hearted charitable Heretick, who bound up the Wounds of a diffressed Traveller, T

The DEDICATION. XXXIII

veller that had fallen amongft Thieves, conveyed him fafely to a Lodging, and furnifhed him with Money, without making known his Name or Place of Abode; while the Prieft and Levite, inured to fhedding Blood, unconcerned at his piercing Groans, march ferenely by, and who when they vouchfafe to beftow an Alms, found a Trumpet, and do it in publick Places.

This is what these Devourers of Widows Houses, these whited Sepulchres, Generation of Vipers and Murderers (upon whom he charges all the Guilt of fhedding innocent Blood, from that of righteous Abel to the Blood of Zacharias, the Son of Barachias, whom they flew between the Temple and the Altar) could by no means bear, their Eves were dazzled and confounded with the Splendor of his Divine Doctrines, which were fo ftrong, nervous, and irrefragable, that some amongst them even owned he taught with Authority, and that no One ever spoke like him. These turbulent Spirits therefore acting like what they were, never rested till they had put him to Death for a Malefactor, an utter Enemy to Cafar (whom they themfelves believed to be an Usurper) and a Sower of Sedition, who was Meekness and Peace it felf, and whole Life was nothing but one continued Series

C

of

xxxiv The DEDICATION.

of doing Good. How Nature was startled at this diabolical piece of Ingratitude the World was too sensible; such strange Phoenomena startled the wife Men of the Earth, *Athens* was astonissid, and her Philosophy was now no more. This made the amazed *Areopagite* cry out, Either the God of Nature suffers, or the Frame of the whole World is dissolved.

Thus suffered our Great, our Immortal Master, who came into the World to do the Will of his Father which is in Heaven, and whose Brethren we are (as he fays himfelf) if we do fo too. If you ask me what this Will of his Father is, I answer, it is Chrift's Will, who is of one and the fame Will and Substance with his Father; and this I need not to repeat to you, it is as plain as the Noon-day Sun, to be found in what he himfelf fays, and whom alone if we hear, it is sufficient; his Precepts are clear and expressive, obvious to the meanest Capacity. And it would have been better for the Christian World, had they kept up to this Divine Rule, and not obscured his facred Religion with fo many fenfelefs impertinent Speculations, Aristotelian and Heathenish Distinctions, and the unintelligible Jargon of the Schools, by which they have almost distinguished all Religion out of the 14909 World;

The DEDICATION. XXXV

fo that too often we fee many a Venerable Profeffor pass many Years to acquire the Faculty of rattling out a company of barbarous Terms, that have no manner of Meaning in them, and by which, after so long a Study, they are not one jot the honester, and omit the easy and amiable Practice of the common Duties of Love and Charity.

You see now what is our Profession; it is the Law of Nature, which being almost lost, was endeavoured to be retrieved, or, at least some how kept up by the Shadows of *Moses*, but entirely restored by the Law of Grace, by Jesus Christ the Son of God.

You have been remembred, that under the Law of Nature Mankind had no Propriety, but lived in common, and as there was no Superfluity, fo there was nothing wanting; no anxious Cares then of heaping up Riches, or Solicitude for future Provifions diftracted their Repofe, or interrupted their fweet Contemplations. This way of Life continued in the Generations of *Setb*, who were called the Sons of God, till fome of them, allured by the Daughters of Men, the Children of *Cain*, corrupted themfelves, and fell into those extravagant Impieties that drew down the Deluge.

This fame way of living was revived by Noah after the Flood, till the Pride of his c 2 Poste-

XXXVI The DEDICATION.

Posterity, who ran into those tyrannic Proprieties which have undone the World, and almost destroyed it. It came however down by Tradition to Abraham and his Defcendants, who were Keepers of Sheep in the Land of Egypt for 430 Years. After their Delivery they lived in the fame manner, and tho' afterwards the Generality, when they began to live in Cities, abandoned it, yet this Spirit remained amongst their greatest Men for Wildom, and in the Colleges of the Prophets and their Sons, and which was brought in a more particular manner to its primitive Luftre by Jefus Chrift, who called and composed a Fraternity first of the Apoftles, who afterwards admitted others, whom they thought worthy, into the Society, where the Contempt of the World, and Money (no otherwife than it fubferved to the Neceffities of Life, and charitable Uses) was always kept up as a diffinguishing Mark of the Faithful, that is, the Brethren, for they were first called Christians at Antioch, fo that they were of one Heart and one Soul, neither faid any of them that aught of the Things which he poffeffed was his own, but they had all Things in common, neither was any among them that lacked; for as many of them as were Possessors of Lands or Houfes fold them, and brought the Prices of the AIR Things

The DEDICATION. XXXVII

Things that were fold, and laid them down at the Apoftles Feet, and Distribution was made unto every Man according as he had need. Avarice (the Bane of humane Society) was detefted, loathed, abhorred, as the Root and Foundation of all Evil; it was what, my dearest Brethren, ruined Judas Iscariot, and made him the first Falle Brother under the Law of Grace, who for a little fordid Pelf proved the most wicked Traitor in the World, the Horrors of whole Perfidy lay fo terrible on his Confcience, that he could not furvive them, but growing desperate, put an end to his Sorrows by an ignominious Death; he hanged himfelf, and burft afunder, and all his Bowels gushed out, and his Bishoprick another took. You may remember, that the next terrible Punishment of a False Brother was on Ananias, who had indeed a Defire to come into the Brotherhood and Apostolical way of Life; and accordingly (for this was a Prerequisite thereto) fold a Possession and kept back Part of the Price, and brought a certain Part, and laid it at the Apostles Feet, for which fraudulent Act he was ftruck dead by holy Brother St. Peter.

This living in common was looked upon as an effential Point among the Brethren (who, as I observed before, were at Antioch first

xxxviii The DEDICATION.

first called Christians) that the primitive Brethren kept it up for 300 Years successively after the Death of their Lord and Master, the Holy Jesus; and the Bissons of Rome, who were almost all of them martyr'd for the Religion of the Brotherhood or Christianity (which is the same thing) religiously maintained it.

These Bishops, or Overseers (as the Name imports) had the Care and Oversight of the common Treasury, then worthily called the Treasure of the Church, and dispensed to every one according to their several Necesstries. And Brother Lawrence, a Deacon to Bishop (or Overseer) Xystus, or Sixtus, was put to a most cruel Death, broiled on a Grid-iron, because, as the Tyrant thought, he mocked him, when he told him that there (pointing to some poor Brethren) he had disposed of the Church's Treasure.

Nor was this State interrupted till Conftantine the Great turned Christian, who rebuilt or repaired Byzantium to rival Rome, and called it, (as Romulus did Rome) after his Name, Constantinople; to which he tranfferred the Empire, and (in this too like the Founder of Rome) laid its Foundation in Parricide, in the Blood of his Sisters Hufband and Son, and that of his own Wife and Child.

The

The DEDICATION. XXXIX

The Courtiers and great Men, who always conform to the Example of the Prince, turned Christians too, and the Draught of Fishes was to very great, that the Net broke, and there were found infinitely more bad than good. The Truth of it was, the Church then grew at ease, and had certain Stipends fettled on her Priefts and Paftors, who now (fo true it is that the Blood of the Martyrs is the Seed of the Church) living at Ease and Plenty, forgot by Degrees their original Institution, and conversing with the Court, learned its Modes and Fashions, and took on themselves high Titles; the poor Pastors or Bishops swelled into Lords, and the humble Successor of St. Peter, the Servant of the Servants of God, from an Overleer grew into a Sovereign Pontiff, or PONTIFEX MAXIMUS, which meant no more amongst the antient Romans than Bridge-Master General. A great Number too of Pagan Rites and Ceremonics were introduced to make it a glorious Church, fit for Emperors and Kings, and People of Quality; but as these Titles were of little moment, and these Ceremonies innocent enough in themselves, and might conduce to outward Decency, they could not in the main be any Hindrance to Devotion, and confequently no Caufe of Separation.

But

But this was not all; the Philosophy of Aristotle, and dark obscure Terms and Sophisms were introduced into Christian Schools, with ridiculous Subtilities, vocal and nominal Controversies, chimerical Notions, Entia Rationis, Genereitas in Concreto, Ubications, Quandations, with all the confused barbarous Ribaldry, and venerable Gibberisch of nois, empty, positive, conceited, dogmatical, ignorant Pædagogues and scientifical Blockheads.

After these Reverend Fooleries, the whole World ran a whoring, as the Israelites did after. Gideon's Ephod ; and these learned Doctors and Magistri nostri, being thus employed in these sublime Speculations, things of greater Moment, forgot to inculcate the Practice of good Works, the Mechanical Part of Religion; fo that all Immorality flowed in like an irrefiftible Deluge, and there was more Wickedness and Impiety practifed amongst Christians, than ever amongst the Jews and Infidels; and nothing left but the very Names of Chrift and Christianity, which were often abused to carry on the Defigns of wicked, ambitious, and turbulent Men; so that the Religion of the Prince of Peace was made to patronize and countenance all forts of Violence, Rapine, Murders, Sacrileges, Tyrannics, and Rebellions,

Rebellions; and the holy Scriptures, as the Cafuifts knew how, were made a Nofe of Wax, and contending Parties, tho' never fo diametrically oppofite to each other, had God on their fide, with whofe most adorable Name all their feveral Parricides, Burnings, Maffacres and Plunderings were fanctified.

Neither did things reft here; People were to be dragooned into Religion; Whips, Wracks, Tortures, Burnings, Inquisitions, Star-Chambers, Spiritual Courts, Ecclefiaftical Cenfures, Excommunications (I aim at no Sect or Communion in particular, they were all alike) were fet up as wholfome, Soul-faving Engines to fcrew People into Peace of Conscience, while perhaps the poor Culprit, tho' he could not express himself in the uncouth Language of the Schools was as Orthodox as the spiritual inquisitive Bloodhound, who could notwithstanding be fo charitable as to change all Penalties into a pecuniary Mulct, if the Party could but provide a fufficient Quantity of that Catholicon which cures all things, tho' never fo inveterate, and is every where orthodoxly current.

<u>Auri facra fames !</u>

Good Men lamented these Calamities, f and

and the Brethren fighed to Heaven, and wifhed a Reformation. The feveral religious Orders in the Churches of *Rome* and *Greece* aimed at it, and had very good Notions and Defigns for that Work; and tho' amongft thefe Reclufes, Sciences have been in a great Meafure encouraged, and to thefe Bodies we owe feveral invaluable Treafures, yet becaufe their Fraternitys confift only of fingle Perfons, and lie under particular Reftrictions, they do not altogether anfwer the Ends of the Brotherhood, who cannot fubfift without being *Free*.

However, it is earneftly to be wifhed, that fome Prince or Great Men would (and they would if they knew us) caft on us a favourable Eye, by this means would they encourage Arts and Sciences, which have been always worthy the Care of the wifeft and beft of Men; this would open a glorious way to celebrate the wonderful Works of the Almighty, and to do good to Men (which is all our End and Aim) and of confequence fhould we moft cordially pray for our Noble and Illustrious Benefactors, and transmit their Name with Honour to remoteft Pofterity.

Drawing now towards a Conclusion, I shall beg your Attention to two or three things

xlii

Things more, before I take my Leave of you.

Avoid all Companies where ridiculing of Religion is thought witty, and more especially when the wretched Difcourfe is turned upon the adorable Mystery of the most HolyTrinity, which is an eternal Doctrine, believed by Wife Men in all Ages. The antient Philosophers, who had no revealed Religion, no other Light but the Light of Nature, taught and believed this most facred Truth, as I could fhew in a proper place as clear as the Sun. The Platonics, for Example, to inftance no more, acknowledge in the Godhead three Perfons; the first they called the Father of the Universe, or of all things; the fecond the Son and first Mind; that is, according to Plotinus and Philo, the Divine Intellect, flowing from God the Father, as Light from Light, or the Word that is spoken from the Speaker: Hence he was called the Aby G, VERBUM, or WORD, Light of Light, and the Splendor of God the Father; and the third they called the Spirit or Anima Mundi, wnich Dove-like fate brooding on the Face of the Waters, and with its celestial, amatorial, genial Heat, hatcht the Universe.

f 2

All

xliii

xliv The DEDICATION.

All this, and much more, could I fhew, if required, from a Cloud of Witneffes, abstracting from the commonly-received Doctrines of Christianity, which these witty Gentlemen (pretend what they will) seem to have very little regard to.

It is also well-becoming the Brotherhood to be very respectful to all Clergymen, especially those of the Established Church. In the next place, never on any account connive at what the Wits of the Age call roafting of a Parfon; which befides that it does no ways fuit with a Gentleman or honeft Man (which is the fame thing) is barbarous and cruel; it brings him that is thus baited into Contempt with the People, who are eafily carried away with flashy Wit and Ridicule (for nothing is fo eafy as to ridicule Religion) fo that by degrees, when People despise his Instructions, no body will go to hear him, which is a facrilegious Robbery of his good Name, according to all Divines, a Hindrance to his Preferment, and confequently to the better providing for his Family. There is no Tradefman but would think this Usage very cruel.

Take care also not to be concerned in your Dealings with litigious Persons, who on every Trifle are for going to Law; rather

ther make up your Difference, though you lofe by it. Remember the Words of your Divine Mafter; If any Man will fue thee at the Law, and take away thy Coat, let him have thy Cloak alfo. The Reafon is obvious, viz. left the Lawyer come with his Fieri facias, and ftrip thee to the Skin. I speak not of the good, for there are a great many very worthy Members of this Profession, Men of true Honour and Integrity, our Bulwarks against Oppression and Injustice ; but I speak of those poor, wretched, ignorant, pitiful Sollicitors, Cause-Pedlars, Sowers of Difcord, Pettifoggers, and Setters, those scandalous Vermin of the Law; those rapacious Harpies, infatiate Cormorants, Canibals and Devourers of Mankind, who tear out and gnaw our Bowels, and fuck our Blood and Vitals, and for a trivial, scandalous, little, sordid Lucre, bring frequently irreparable Ruine on fuch as are fo unhappy as to come in their way; regardless, like the deaf Adder, to the Tears of the helpless Orphan and Widow.

These are the very Dregs of Mankind, miserable abandoned Wretches, who as they live, so, without a miraculous A& of the Divine Goodness, die without Remorfe; or, if they reflect before they go hence, how

xlvi The DEDICATION.

how racking, how torturing must those dire and dreadful Reflections be, when they find themselves not able to make Reftirution for their distribute distributes, and without which it is impossible according to the best Divines to have any Hopes of future Happines? These Makebates, Incendiaries, and common Barreters, of all Men are most miserable, for they take fuch Care by their Rapacity (like some wretched Botchers) never to be employed twice, and are therefore ever poor, and the Scorn and Contempt (being indeed the Outcast and Offal) of Mankind.

But these Monsters can no more affect the Honour of the sage Administrators of the Law, than a prating, noify, nonsensical Mountebank the skilful Physician, or a false Brother our sacred Fraternity; that facred Fraternity, whose very Soul and Life is Charity, which is to love and honour all Men, to comfort the feeble minded, to sick, to help the Fatherless and Widow, and cover the Frailties of our Neighbour; for Charity (I speak in the Words of Brother Saint Paul) is kind, not easily provoked, thinketh no Evil.

Let

The DEDICATION. xlvii

Let us therefore, my dearest Brethren, never be eafily perfuaded to think Evil of any one, much less of a Brother, if we hear any evil Report of him; let us, according to the Divine Rules of Love and Charity, believe it not, but stifle the Viper in its Birth, and admonish our Brother; who, if we do it with a Spirit of Sincerity and brotherly Love, will thank us (nothing making Instruction so unacceptable as a haughty, dogmatical Utterance) fo shall we be a Stay and Comfort to him from malicious and envious Tongues, from whofe poifonous Effects the best of Men are not sure to be free.

O my dearest Brethren, let us love one another. This is the facred Advice of Saint John the Divine, that beloved Disciple of the Holy Jesus, our bleffed Master; for (fays he) Love is of God, and every one that loveth is born of God, and knoweth God: He that loveth not, knoweth not God, for God is Love. If a Man fay he loveth God, and hateth his Brother, he is a Liar; for he that loveth not his Brother whom he hath feen, how can he love God whom he hath not seen ?

O may our good and merciful God ever deliver and defend us from these Liars, thefe

xlviii The DEDICATION.

these Brother haters, these Sowers of Discord amongst Brethren, these Companions and Abettors of Calumny and Detraction, these Enemies of God and Man. And if any such have already crept in amongst us, thro' the Negligence or Ignorance of the Watchmen upon the Walls, hard is our Lot indeed. Our holy Brother St. *Paul*, though he suffered infinite Perils, as he recounts himself, yet the Perils among *False Brethren* were what seemed most to touch his righteous Soul; for most dangerous are a Man's Enemies, when they are of his own House.

These, my dearest Brethren, are Thieves and Robbers, and never entred into the Sheepfold by the Door, but climbed up fome other way. These make their Belly their God, and their little fordid Intereft their Idol; but Regnum Cælorum non est Cibus & Potus. These follow the Brethren as the Multitude did our great Lord, Master, and Exemplar, for the Loaves and Fishes, and like them would cry Hosanna to day, and to morrow Crucify, Crucify: They are unworthy Dogs, Animals which are not only to be debarred from eating the Childrens Bread, but to be shut out from licking up the Crumbs that fall from their Table. Let these be ever excluded the Congrega-

Congregation of the Faithful ; let their Names be rafed for ever out of the Book *M*, and be buried in eternal Oblivion, whofe Portion will be with Hypocrites, Makebates, Incendiaries, and Spillers of Blood, red, black and purple. And who all, unlefs they opportunely repent, will be overtaken by the rigorous Judgments of God for their Falfhoods and Perjuries, as were their Brother Caitiffs, those perfidious Traitors and Liars, *Cain*, Judas and Ananias.

And now, my Brethren, you of the higher Clafs, permit me a few Words, fince you are but few; and thefe few Words I shall speak to you in Riddles, because to you it is given to know those Mysteries which are hidden from the Unworthy.

Have you not feen then, my deareft Brethren, that flupendous Bath, filled with moft limpid Water, than which no Pure can be puter, of fuch admitable Mechanitm that makes even the greateft Philofopher gaze with Wonder and Aftonifhment, and is the Subject of the eternal Contemplation of the wifeft Men. Its Form is a Quadrate fublimely placed on fix others, blazing all with celeftial Jewels, each angularly fupported with four Lions. Here repofe our g mighty

xlix

mighty King and Queen (I speak foolifhly, I am not worthy to be of you) the King shining in his glorious Apparel of transparent incorruptible Gold, befet with living Sapphires; he is fair and ruddy, and feeds amongst the Lillies; his Eyes two Carbuncles the most brillant, darting prolifick, never-dying Fires; and his large flowing Hair, blacker than the deepeft Black, or Plumage of the long-lived Crow; his Royal Confort vested in Tissue of immortal Silver, watered with Emeralds, Pearl and Coral. O mystical Union ! O admirable Commerce! hoo and dana inglis pir Diguod I

Cast now your Eyes to the Basis of this celeftial Structure, and you will difcover just before it a large Bason of Porphyrian Marble, receiving from the Mouth of a large Lion's Head, to which two Bodies displayed on each fide of it are conjoined,a greenish Fountain of liquid Jasper. Ponder this well, and confider. Haunt no more the Woods and Forefts; (I fpeak as a Fool) hunt no more the fleet Hart ; let the flying Eagle fly unobserved; busy your selves no longer with the dancing Ideot, swollen Toads, and his own Tail-devouring Dragon ; leave these as Elements to your Tyroness of Wildord and transform Press bimin

The

The Object of your Wishes and Defires (some of you may perhaps have obtained it, I speak as a Fool) is that admirable thing which hath a Substance neither too fiery, nor altogether earthy, nor fimply watery; neither a Quality the most acute, or most obtuse, but of a middle Nature, and light to the Touch, and in some manner soft, at least not hard; not having Afperity, but even in fome fort fweet to the Tafte, odorous to the Smell, grateful to the Sight, agreeable and delectable to the Hearing, and pleafant to the Thought; in fhort, that One only Thing befides which there is no other, and yet every where poslible to be found, the bleffed and most facred Subject of the Square of wife Men, that is _____ I had almost blabbed it out, and been factilegioufly perjured. I shall therefore speak of it with a Circumlocution yet more dark and obfcure, that none but the Sons of Science, and those who are illuminated with the fublimeft Mysteries and profoundest Secrets of MASONRY may understand------ It is then, what brings you, my dearest Brethren, to that pellucid, diaphanous Palace of the true difinterested Lovers of Wildom, that transparent Pyra. GIThe mid

li

mid of purple Salt more sparkling and radiant than the finest orient Ruby, in the Centre of which reposes inaccessible Light epitomiz'd, that incorruptible celeftial Fire, blazing like burning Crystal, and brighter than the Sun in his full Meridian Glories, which is that immortal, eternal, never-dying PYROPUS, the King of Gemms, whence proceeds every thing that is great, and wise, and happy.

These Things are deeply hidden from common View, and covered with Pavilions of thickest Darkness, that what is facred may not be given to Dogs, or your Pearls cast before Swine, less they trample them under Feet, and turn again and rent you.

However, this will by no means hinder you from doing good where there are worthy Objects, and you know the Day is now far gone, and the Night approaches when no Man can work: Wherefore,

O my moît beloved and for-ever-bleffed Brethren, hear me, hear the Voice of your Brother.

CHAP. I. Of the Immortality of the First Man.

Tobau

HE Almighty One Eternal God, who during all Eternity was happy in * himfelf, refolved to form out of nothing Creatures capable to adore, and praise, and

Obedience.

love him: for this great and noble End he made Man; and this vast Universe, destined for his Use, was immediately subjected to his Dominion.

* Ante omnia erat Deus folus, & ipse sibi & mundus, & locus, & omnia. Tertullian.

Man

2

Man at the very inftant of his Creation was endowed with Immortality, whereby he might have fully poffeffed those good things the great Creator had so richly and abundantly provided for him, on Condition he had remained faithful in his Duty and Obedience.

This Immortality depended on the Innocence in which our first Father remained fome time. The Tree of Life, which was in the middle of the terrestrial Paradise, was to preferve it; it had Power to repair the Injuries of Time; its Virtue was capable to preferve Nature, which the Tree of the Knowledge of Good and Evil would inevitably deftroy: The wonderful Qualities of this Tree of Life was sufficient to guard him from Death.

Man notwithstanding was in this State of Innocence composed of Parts the Contrariety of which could hurt him: The natural Heat, by which he lived, devoured his radical Moisture; in vain did he make use of Aliment more nutritive than ours *; he was

* Corpus ejus cibo & potu egebat, nè fame afficeretur & fiti. Aug. l. 13. de Civitate Dei, cap. 20.

AVEGER.

under a Neceffity to repair the Diforders which this Fire that inwardly devoured him was the Caufe of; and as Providence did not abandon criminal Man afterwards, fo had it then provided the Tree of Life for him, when innocent, to defend him from that fecret Enemy, which by little and little confumed, and would at laft deftroy him.

This * Tree of Life preferving Man from that Deftruction caufed by Elementary Qualities which entred even his Food, removed him from that Languor, the contrary Caufes of which were infenfibly disposed to bring him to his End.

The Roots and Fruits he fed on, how excellent foever, could not prolong the Days of Man by their Goodnefs and Savour, which the new and frefh Earth communicated to its first Productions; they could not alone keep him in that Condition that was neceffary to preferve the Prerogatives of his Immortality.

To supply this Deficiency, Man was to make use of the Fruit of this Tree of Life,

* Habebat sustentaculum animali corpori, nè indigentia læderetur; de ligno autem vitæ, nè senectute perduceretur ad mortem. Aug. l. 1. contra Julian. cap. 14.

bati

3

4

as an agreeable and univerfal Medicine; this Fruit had the Virtue to renew his Forces, and maintain him in the eminent Qualities of his Creation, quite different from the Tree of Knowledge, which would bring him to Death.

As Prudence was natural to our first Father, he did not ftay till Years diminished his Vigour, or tarnish'd the Brightness of that perpetual Youth which he was to enjoy *; he opportunely made use of this celestial Fruit, so that neither the Agility of his Body, nor the Vivacity of his Soul, ever fuffered any Alteration; and this Fruit coming in as an Affiftant to his ordinary Food, which then confifted of Roots, Herbs, and Fruits (for in the golden Days of Innocence one part of the Creation did not live by the Destruction of another) banished from him all Fears of Sickness or the least Infirkeep him in that Condition that mity. fary to preferve the Prerogatives of his

In this happy Situation, where Man was employed only in praifing God that little Space it endured, this Man (always young)

* Ligno vitæ à mortis necessitate prohibebatur atque juventutis flore tenebatur. Augustin. Lib. 13. de Civitate Dei. cap. 20.

had all the Advantages of old Age * without experiencing its Miferies; his Reafon without Experience had Light enough to guide him; he did not weaken his Body by his Application to Study to render his Soul fuperior: For thefe two Parts, equally innocent, formed no Defires contrary to each other; both feemed to act in Concert for the Happinefs of the Creature.

One of the principal Wonders of the Tree of Life was to preferve Man from Death †; it fo clofely united the Soul with the Body, that the Number of Years could not feparate it, if Innocence had always fulfained their Harmony and Union, and prevented their Division.

O dreadful Division, the Cause of the fatal Error of the Father of Men! From this Moment his Crime made him mortal; his Eyes opened themselves and beheld his Misery; his Nakedness (till then innocent) made him sensible that he was now become criminal in eating the Fruit of the Tree of

Knowledge; he loft the rare Privilege of Immortality; he died. * The terrible Sentence pronounced against his Prevarication was executed, and his wretched Posterity are too sensible of its dolorous Consequences †.

cle two Parts, coually

As Adam was not immortal fo much thro' his proper Constitution ||, as by borrowed Succour, fo that the Neceffity of employing it, taught him that he owed this Advantage to the pure Liberality of his Creator; fo foon as this Succour was wanting, he was too weak to support himself by his own Power: Innocence having abandoned him, every thing concurred to his Destruction; his Perdition was adjudged; the exterminating Angel caft him out of the terrestrial Paradife; he loft his Authority over the whole Creation; even the very Brutes, whom he gave Names to, knew him no more. He became a Vagabond upon the Face of the Earth, a Fugitive, a Wretch. This Chief, this King and Emperor of all Nature, was foon its Slave; his Mifery even touched the Heart of that great BEING whom he had

* The Wages of Sin is Death, Rom. cap. vi. v. 23.

† Mors homini non accideret nisi ex pœnâ quam præcesserat Culpa, Aug. de verbis Apost. Serm. 172. Cap. 1.

|| Immortalitas ista ei præstabatur de Ligno Vitæ non de Constitutione Naturæ, Aug. lib, 6, de Genesi.

offended;

offended; the Bounty of the Almighty feemed alarmed; and left the Fruit of the Tree of Life fhould render the Miferies of Man eternal, by preferving him a long time from Death, his Life was then reduced to a fhorter Continuance, and thro' Compaffion to his Wretchednefs, his Immortality, as to his Body, was no more.

A jealous Demon, a curious Wife, a Spirit too complaifant, a forbidden Tree, caufed Adam's Crime; all deftroyed his Innocence, when he had tafted that which was to have been the Proof of his Submiflion; this Difobedience put Bounds to his Days, which had none before: It made him lofe his Sanftity and Juffice in which he was created, his Body ceafed to be immortal, tho' his Soul ftill continued to be fo.

Undoubtedly Man was not fenfible of the Value of that bleffed Immortality, till after he had loft it; and as Privation generally excites Defires, this Lofs foon gave him an eager Defire to recover what he had fo negligently parted with.

The Fear of Death, and Defire of Life, were after this sensible Loss, Passions most natural to Man; he has Apprehensions of losing 8

21 02 25

fing his Life as foon as he begins to be. He defires to perpetuate his Days without comprehending how few they are : And defpairing to bring this about himfelf, he tries at leaft to immortalize his Name by his famous Actions.

Thus Men defire Children, to live again in future Times by their Pofterity; Learned Men write to delude Oblivion by the Reputation of their Works; Princes build Palaces and Cities to make themfelves for their Magnificence famous after Death; and Conquerors make the World defolate, to eftablifh to themfelves Renown, furrounded with horrid Slaughter, and Seas of Blood. Thefe Scourges of Mankind ferve even as Ornaments to their dreadful Maufoleums*; and one might fay, they laboured to carry their bloody Remembrance to the moft darkfome Glooms of Futurity.

This is the Sentiment of Tertullian in treating of the Defires of our Soul to immortalize it felf †; he fays, That this Paf-

† Omnibus fere ingenita est Famæ post Mortem Cupido.

fion

0

a di marcel ficter

Man

fion which continues with it, of a continual Duration, is a certain Proof of its immortal Origin.

The Naturalists add, that Man having been created for Immortality, there still remains within him a Principle which cannot be destroyed. This Opinion persuades them that Man's Body has in it an inexhaussible Source of a Balm, capable to recover this long Life. They say, that it is in the Blood, in the Milk, in the Fat, in the Bones, Brain, Skull and Gall.

Beker the famous Phyfician maintains, That God having endued moft Beafts with an infinity of excellent Antidotes, as may be found in the Hart, Viper, Wolf, Hare, Fox; and even in Stones, in which one finds amuletic Virtues, fuch as the Jafper which ftops Blood, the Sapphire which preferves the Sight in the Small-Pox, and the nephritick Stone which comforts the Reins: It has pleafed the divine Goodnefs, plentifully to furnifh the Body of Man, and which as much furpafs those in Brutes, as the rational Soul furpaffes in Dignity the reft of the Creation.

Then

С

Man in Effect was deftin'd to be King of Nature, his Soul, his nobleft part, being immortal, and equalling the Angels, communicated to his Body that Majefty which yet fhines in his Countenance. It is this which demands fuch Refpect from all other animated Beings; they acknowledge and revere that facred TAU of Immortality, with which his Soul will be marked for ever.

This makes it believed, that Man's body muft have in it a thousand Virtues, the Remains of his ancient Prerogatives. Divines agree, that it contains in it a Principle of Life, being originally immortal: Sin, which afterwards subjected Man to Death, deprived him of this prime Privilege in relation to his Body, without destroying his Nature, or doing any thing in relation to the Immortality of his Soul.

Not that the Body was always to continue upon Earth, God having placed Man in the Garden of Pleafure, only to keep it and adore his Creator, and to work out his Sanctification, by his Fidelity and Adoration.

Then

II

Then confirmed in his Innocence, and penetrated with a defire of possessing his God, a fweet Ecstacy would have ravished him to Heaven, that shining Residence, which the Spirit, according to St. Paul, cannot comprehend. The Soul affifted by a superabundant Favour, would have glorified his Body; a Happiness now deferred us, till we have expiated the Tranfgreffion of the Law. A Proof that this Immortality is not abfolutely loft, the divine Mercies have only put it at a Diftance, in Refpect of those who shall reverse the Sentence given against our first Parents. So that the Prerogative of an eternal Duration was only interrupted, and not extinguished by Sin. The Sacraments of the Church renew Man every Day to Grace, in order to make him live again to Eternity.

But it must be owned, that Man in vain defires now this loft Immortality, all flies and paffes away with him; the Loss of his Innocence was the boundless Term of his Happiness. This Term gave a beginning to his Miferies, and was the Source and Fountain of his Misfortunes; Original Sin, which fince has infected the whole Mafs of C 2 Man-

+

12

Mankind, is only effaced by the unexpected Succour of Baptism.

Death however did not fo foon take away the first Inhabitants of the Earth, in as much as there were feveral who lived nine hundred Years and upwards.

It may indeed be faid, that then the Earth was new and young, and still sensible of the Benediction of its Creator, was animated with Spirits most lively, and replenished with Juices much more nutritive than after the Deluge; the Principles of her Fecundity were then entire, nothing had altered its Goodnefs; the Herbs and Fruits which were then the only Food of Man, had in them all the Virtues of their Species, Acorns along while furnished the Arcadians with wholfome Diet, it being impossible Bread could be made before the Invention of Mills, the Invention of which is attributed to Prince Mileta, Son to Lelez, first King of Lacedamonia, according to Herodotus, Paufanias, and Eufebius.

After the Flood the Earth having imbibed too much, her Salts being more diffipated than was convenient, and the Plants deriving their Substance from Principles the most

most changed and altered, by too long a Continuance of the Waters, had neither the fame Savour as before, nor the like Qualities; Man finding in these no longer a solid Nutriment, had recourfe to the Flesh of Animals, fay our Advocates for deftroying and devouring a great and most innocent part of the Creation. And to prove this, they quote a Passage out of Genesis, * where it is faid, that the great God then gave Man Liberty to eat of every moving thing that liveth. Which Passage, whether it be originally in the Hebrew I know not, but I am fure, it not only is quite different from what we find prescribed as Food to our first Parents by God himfelf, † and as much different from the Precepts of the Levitical Law afterwards.

However, be that as it will, it is certain, from the eating of the Flefh of Animals, arrived all the terrible Diftempers now raging in the World, and no Wonder if from hence the Term of our Life received a fhorter Date. For granting the Herbs of the Earth to have loft much of their former good Qualities, yet they never could

* Cap. ix. v. 3. † Genef. cap. i. v. 29.

224211

have

have been fo deftructive to Mankind, as the eating Flefh. For certainly Aliments composed of Flefh and Blood, must be lefs wholfome in relation to Bodies till that time only inured to Roots and Herbs.

The Diverfity of Meats is very dangerous to Health, their different Juices are hurtful to Digeftion, and carry along with them into the Veins a Principle of Corruption, which eafily becomes the Leaven of Diftempers the most acute.

Perhaps it was for this Reafon, that feveral Nations abstained entirely therefrom; the *Perfians*, *Greeks*, *Romans*, and the antient *Gauls*, Descendants of *Japhet* one of *Noah's* Sons, furnish us with certain Examples.

The greatest part of the People of the East feed only on Rice; the Scotch Islanders and Irish, live chiefly on Milk Meats; Athenaeus and Pliny say the same of several others. We know that the earthly Paradife being planted with Trees, the Fruits of which were to nourish Man, while he learnt not to live to eat, but to eat to live, it would be to arraign that sage Abstistice fruits

nence in which were employed only the Fruits of the Earth, Milk, Oyl, and Honey, to have recourfe to the Flefh of Animals. From hence it is true, great Flefh Eaters derive their Subftance and Strength, and one may add, that Ferocity and Savage Temper which fuch Nutriment must neceffarily communicate.

The famous Pythagoras, who lived in the LXI^{ft} Olympiad, in the Year 220 from the building of Rome, and 534 before Jefus Chrift, forbad his Disciples the Use of all forts of Flesh Meats; the Immortality of the Soul which he first taught by Metempsychofis or Transmigration of Souls, was the Cause of this Prohibition; he held it a Crime the most horrid and enormous, to enclose in one's Bowels the Vitals of another, and a lean Body to grow fat from devouring others, and that one living Thing should preferve its Life, at the Price of another's Death *.

But leaving Pythagoras and his Tranfmigration, with what may be faid upon that Head, it is certain, from this way of

* Heu! Quantum scelus est, in viscera viscera condi Congestoque avidum, pinguescere Corpore Corpus Alteriusque animantem animantis vivere leto. Ovid Metam. lib. 15.

living have proceeded, as has been observed, those cruel Distempers that plague unhappy Man *.

I fhall only obferve one thing more, and then clofe this Chapter, and that is, Since all Divines agree, that the Miferies of Man derive themfelves from the original Sin of our firft unhappy Parents, 'and that the Belief of this is the Foundation of all Religion, it is to be wifhed that they would be fo good as to inftruct us in what this original Sin confifts; that the Enemies of our Holy Religion may not triumph, and the Deifts continue their Raillery. They all fay indeed, it is eating of the forbidden Fruit, but what this Fruit was they have not yet informed us, and we are ftill entirely ignorant.

It is very much doubted, whether this Patriarch be yet dead: God, according to fome Authors, referves him to call the Juft together, after they shall be dispersed by Antichrist.

The 24th Verse of the fourth Chapter of Genesis intimates so much.

Methuselah lived 969 Years.

This was the only one of Mankind, whose Days the Allmighty extended to such a Duration, having lived a thousand Years wanting thirty one.

* It is faid that St. Jerom believed, there were other Creations before ours, and Berofus in his Fragments of the Hiftory of Chaldea collected by Josephus, is of the fame Opinion.

verfe, and to find out Arts and Sciences,

Lamech

Richand Poor, the Monards and the Ship-

Lamech lived 777 Noah arrived to

950 Noab caupioy ed. a hundred Y cars in baild-

19

About the end of this Age God refolved to exterminate human Race who had neglected his Worfhip. Man's Life by the fall of Adam being mortal, was much abridged by the Depravation of his Defcendents : The Destruction of Nature (fallen into Diforders and Idolatry) was refolved upon by the most High, who in some fort repented that he had made Man. His Love, affronted by the highest Ingratitude, according to Hugo de Sancto Victore, allowed a hundred and twenty Years to Men to quit their Crimes, or prepare to perish in a general Deluge. I staft abile prais guol

These fix score Years gave Rife to the Error of those, who would have it, that this Number of Years were to determine the Life of Man in general; whereas it was only for the Duration of the World at that time, to whom this fcanty Number of Years was allowed, that they might repent. Noah employed them by God's Order to the building of the Ark, which was to be the Confervatory of the reft of the World. From eight Perfons fhut up in this Ark, the D 2 Rich

meant no more; than that if the continued

20

Rich and Poor, the Monarch and the Shepherd, derived their Existence.

Moab arrived to

Noab employed a hundred Years in building it, its Length was three hundred Cubits, fifty broad and thirty high, every Cubit containing one Foot and an half: It had three Decks or Stories, the whole containing 42413 Tons, according to the Defeription of it given by Monfieur Pelletier of Rouen.

into Diforders and Idolatry) was refolved

In like manner God, by the Prophet Jonah, made it known to Nineveh, that it fhould only continue forty Days; which Menace we find was only conditional, fince that great City, by her remarkable Penitence, from her King to the meaneft Beaft, fubfifted a long time after that finall Space; and it meant no more, than that if fhe continued in her Diforders, fhe muft, when that finall time was expired, be inevitably deftroyed.

The Life of Noah, and of feveral of his Defcendents, incontestably shew, that the fix fcore Years regarded only the wicked Men of that time. Noah, the Restorer of Nature, as the facred Interpreters call him, was fix hundred Years old when the Flood came: After which he lived three hundred and fifty Years; a plain Proof that these fix

fix fcore Years related only to the Term allowed the Creation to repent of their Sins, and not to the Juft, or those not then born. In reality we learn from the Book of Genesis, that several, who lived after the Flood, far exceeded that Term, as will appear in the next Chapter.

convince them of this Error, I fhall fhew, that the Year was always composed of twelve Months, and the Month of thirty Days, according to the Course of the Sun upon the Zodiack, after having examined, whether these Years were of no longer Duration than one of our Months or Seasea fons, of a Greek Olympiad or Roman Lustrum.

1

CHAP.

LONG LIVERS.

27

CHAP.V.

That the Year of the Antients was not composed of one of our Months.

S O M E of those who, with 706, fay, that Man comes forth like a Flower, and dies as soon as born, maintain, that this long Course of Years of the Antients was regulated by the Lunary Movement of twenty nine or thirty Days.

To fupport this their Opinion, they interrupt the Course of the Sun exactly computed by Ptolemy, Cardan, Junctin, Argole, Clavius, Morin, Messieurs Touraine and Cassini. This Planet runs thro' the three hundred and fixty Degrees of the Zodiac in three hundred and fixty five Days, five Hours, forty nine Minutes, and twelve Seconds. This Year is called the Julian Year fince the Reformation of the Year by Julius Casar in his third Confulship with Marcus

Marcus Emilius, after the building of Rome feven hundred and eight Years.

This Course of the Sun, has nothing common with that of the Moon of three hundred fifty four Days, eight Hours, forty three Minutes, and thirty feven Seconds; this is only in use with the Arabians and Mussulmans; their principal Epocha is the Hegyra, or the Flight of Mahomet from Medina to Mecca, on Friday the 15th of July, in the Year of Chrift 622, under the Emperor Heraclius. These People formed their Years of twelve Moons; the beginning of which varies in fuch fort, that their Year ending eleven Days fooner than the Solar, it has been plainly found to differ one Month in three Years, two Months in fix, and fo on.

This Error proceeds from this, that the Arabians suppose that the Firmament of the eighth Heaven employs thirty two Years to perform its Courfe, though it finishes it every Day in twenty four Hours from the East to the West, by the violent Rapidity of the Primum Mobile, its contrary Movement from the West to the East is performed only in a hundred Years, according to the Tables of Argole. It

南

It is fo evident that the Years were never composed of one of our Months, that one has nothing elfe to do but confider that a Man in our Days who should live a hundred of our Years, according to this Calculation would live one thousand two hundred, and Methuselah, who is chronicled in facred Hiftory, to live nine hundred and fixty nine Years would have been no long Liver : And the fixfcore Years allowed Man by God before the Flood, would be no more than ten of ours. Varro fancied ten of the Years of the Ancients made but one of ours, and then the Life of the Patriarchs which was faid to be of fo long Continuance would be reduced toa very narrowCompaís indeed; fo that, as St. Augustine, who opposed this Error, well observes, after this Rate Mahalaleel, who is faid to have begotten a Son at seventy Years, must have been a Father before eight : And as not one of the Patriarchs arrived to a thousand Years, fo it must follow that they lived not to long as many of our times, who have arrived to an hundred and upwards,

CHAP.

CHAP. VI.

That the Years were never regulated by the Seafons, the Greek Olympiad, much lefs the Roman Luftrum.

houldnd two h

Rom reading Lactantius, and Plutarch on the Life of Numa, the fecond King of Rome, might be infinuated that the Year of the

Ancients was of no longer Duration than one of our Months, or at most one of our four Seasons. The *Chaldeans* and *Arcadians* followed this Use, as well as some other People, of whom *Macrobius* speaks in the twelfth Chapter of his first Book of *Satur*nalia.

The People of Caria and the Arcadians followed their Example. Justin fays, That they made their Years to confist of fix Months, but that these Months being only fifteen Days, the whole revolved into

into three folar Months, that is, one of our four Seafons.

Whereupon it is, moreover, very neceffary to obferve, that a Man, who, in our Times, fhould live an hundred of our Years, would arrive to four hundred of theirs. *Methufelah* then must have lived two hundred forty three Years, which is a fourth Part of nine hundred fixty nine, according to that Supputation of three Months to a Year: And farther, it would thence follow, that the hundred and twenty Years of Restriction, which those, who so ill interpret this Passage of *Genefis*, fo much dwell upon, in Relation to human Life, would be no more than thirty of our Years.

There is as little Appearance that the Ancients calculated their Years according to the Greek Olympiad, fo called from the Olympick Games, which they celebrated every four Years, about the Summer Solftice, near the Temple of Jupiter Olympicus in Elis, a Province of Peloponefus or Morea. This Country was taken from the Venetians by the Turks in the Year one thoufand feven hundred and five. ThisSyftem would be attended with as bad Confequences as the former.

31

Nor would the Supputation of the Year of the Patriarchs, according to the Roman Lustrum, undergo a better Fate, inafmuch as every Lustrum contained five folar Years compleatly revolved. At their Expiration, Servius Tullius, the fixth King of Rome, about the Year one hundred and eighty of its Foundation, inftituted the Cenfe, or general Review of all the Citizens of Rome, and their Faculties or Estates by Cenfors. This Cenfe flewed what every one ought in Equity to contribute to the indifpensable Necessities of the State. In Process of Time the Conquests of the Republick eafed the People of this Contribution; and it was abolifhed in Proportion as their Dominions were extended. But if this Account or Supputation of the Year be allowed, that is, that the Patriarchal Year confifted of five of ours; then Me. thuselab must have lived four thousand eight hundred forty five, which is incredible.

CHAP.

CHAP. VII.

That the Patriarchal Year followed the Course of the Sun upon the Zodiac.

HE Sun, wherein the most High has placed his Refidence *, was created the fourth Day of the Formation of the Universe. The Nature of the Activity of this Planet is fo, that one always fees it without any Diminution of its Light, and it finishes its daily Courfe with the fame Velocity and like Duration, according to Argole 7.

Sotton of the bear

This Author tells us that the Sun is the King of the Celeftial Bodies, and the Fa-

* In Sole posuit Tabernaculum ejus, which we ridiculously enough render, in them bath he fet a Tabernacle for the Sun. + In his first Book of Astronomics, Cap. viii. of Planets.

ther

33

34

the part

ther of the Day; that his Movement ferves for a Rule to, and is the Source from whence the Light of all the other Planets is derived: In Effect, that he is the Caufe of all natural Things. He animates, vivifies them, and his Operations reach even to the Center of the Earth; his Rays change there Earth into Gold, that Metal which the Covetoufnefs of Men has made more valuable than its Rarity: These coagulate Water into Chrystal in the Center of Rocks: Subtilize in their Mines the lympid Matter intoDiamonds, and passing even to the Bottom of the Sea, by their Heat harden and perfection Amber *, Pearls⁺, and Coral §.

* According to Pliny, Amber is the Gum of a Tree: Ambergrife, which is a good Cardiac, is found on the Coafts of the Seas of *Mufcovy* and *India*. The yellow Amber, made use of in Convulsions and Apoplexies, comes from the Coasts of the *Baltic*; and, with *Pliny*'s Leave, is rather a Rosin that melts by Fire, than a Gum diffolving in Water.

† The finest Pearls are the Oriental of the Red Sea, and the Fishery of Paravas near Ceylan, and which are dived for every Year about the fisteenth of March.

§ Coral is a Shrub which grows in the Red Sea, the Mediterranean, and the Seas of Africa; when it is ripe it is red, being worn, fay fome, (and it may be fo for what I know, for I never made the Experiment) by fick Perfons, it grows pale, and ferves to denote future Diftempers; that it ftops Blood, and is good againft Thunder; its Tincture is made by Juice of Lemon, which makes it as white as Snow after having let it fteep two Days: And it receives its former Colour by being wafhed with Bread foaked in Water, or by covering it with Muftard Seed.

It is therefore true to fay that the Order of the Life of Man is rather owing to the Luminary of the Day, than to that of the Night. Cafar, who fubjected to his Laws the greatest Part of the known World, after having vanquished three hundred Nations, taken eight hundred Towns and Cities; and made above 150 Millions of Souls fubmit to his Dominion; did not effeem it unworthy the Imperial Care to regulate Time, fo neceffary to Order and Government. To effect this, he corrected the Year, and refcued it from its Confusion; and in this he conformed himfelf to the Course of the Sun; and by the Counsel and Advice of the famous Aftronomer Sogigenes, fixed it to three hundred and fixty five Days and fix Hours, without Minutes or Seconds. This Defect of Minutes and Seconds till that Time, and fince the Period of the famous Aftronomer Methon of Athens, produced a great deal of Embarraffment and Confusion.

This Methon was he who gave the first Precision to the Year; the Athenians writ it in Letters of Gold in their publick Places; this was called the Golden Number; it ferved to make one know that the several Mutations which one finds between the Move-

ments
36

ments of the Sun and Moon were completed in eight and eleven Years, amounting in all to nineteen: After these Mutations these Planets repassed anew thro' the fame Tracts, to recommence a Course like the preceding.

These two Luminaries are different from the other Planets, Saturn, Jupiter, Mars, Venus and Mercury. Plato believes that the Sun and Moon, which the first Chapter of Genefis informs us were created to mark out the Times and Seafons, the Days and Years, will return, after fifteen thousand Years, to the fame Point they occupied at the Beginning of the World. Aristotle, on the contrary, that it will not be till thirty fix thousand: The Pagans would have it that then the World should renew itfelf, and Souls fhould refume their Bodies in Order to begin a new Life : Some others pushing their Ideas yet much farther, add, that these Revolutions, if made in the Sign of the Zodiac Capricorn, there will enfue another Universal Deluge; and if in Cancer a general Conflagration.

The Chinefe, who talk of a World much more ancient than ours, and the Duration of which they suppute by several long Periods

Periods of Time, each containing a hundred thousand Years, never calculated this long Chain of Days by the unequal Course of the Moon: The Movement of the Heavens was not fo much unknown to them, as to deprive that of the Planets, which beflow Light to others, of the Advantage of regulating Time, which Aristotle defines the Measure of Motion.

But without wand'ring to the extreme Parts of the Eaft, the Egyptians in the Dynasties speak no less than of a thousand Kings, who, according to Diodorus Siculus, believed they had no other Gods than these two Luminaries, and who never divided their Years according to the lunar Movement.

These People, the Inventors of Arts, rather divided them according to the Inundations of the Nile; whose Cataracts or Overflowings, so long time unknown, were made twice in every solar Year; they dispensed all along its Banks that Fertility, whence grew that vast abundance. The Egyptians were so very grateful for this Bounty, that they adored its Waters. According to Plutarch and St. Athanasius they facrificed to this River the most beautiful Virgin of the Country, whom they threw into it after having

38

ing apparelled her in the moft magnificent Manner they poffibly could. The Sun, the Nile, and their God Ofiris were the fame thing, if we may believe Atheneus: The neighbouring People addreffed their Vows and Prayers to the Waters of Nile, as to the Jupiter of their Country.

Herodotus, in his fecond Book, intitled Melpomene, affures us that we owe to the Egyptians the Invention of the Year; which they reprefented by a Serpent, turning himfelf round, and holding his Tail in his Mouth: This Year the Greeks called $E_{\tau \delta s}$ and $E_{\nu i \alpha \nu \tau \delta s}$, which fignifies returning in itfelf.

Aftronomy, that fublime Part of the Mathematicks, which elevates the Mind of Man to Heaven, which measures the vaft Immensity, the better to penetrate the wonderful Movements, which fathoms the secret Dispositions, in order to know more precisely the Elevation, Degree, and the Power of the Stars, which, Solomon says, are governed by the wise; this Science, which the Egyptians perfectly posses or Portions, and taught them, without Doubt, the Superiority of the Sun to the Moon.

Thefe

These same Egyptians followed the Hebrews in this Division, and made use of three hundred fixty Degrees, which the Sun ran thro' upon the Zodiac in the Space of oneYear. I speak now according to the Ptolemaic System : And it is believed that this Luminary never stood still but once only for about twelve Hours, to blazon forth the Victory of Joshua over the five Kings, who fought against the Gibeonites, whom he protected; nor ever went backward, but to assure a longer Date of Life, which God was pleased to grant to his faithful Servant Hezekiab King of Judab.

The Persians followed the Egyptians in the Division of the Year, after that Cambyses, Lord of Egypt, having destroyed the Tomb of Symmandius, found in it a Circle of Gold of three hundred fixty Cubits in Circumference: Every one of these Cubits marked the Days of the Year, by the Engraving made upon them of the rising and setting of the Planets, Signs, and fixed Stars of the first and second Magnitude. It is these which are so efficacious in the Conjunction of Luminaries, according to all Astronomers.

This

This Opinion is maintained by Quintus Curtius, who tells us that the Persians adored the Sun: These People caused to be brought before their King, a holy Fire kindled by the Rays of this beautiful and most glorious Planet. This Monarch was attended by three hundred fixty five young Noblemen cloathed in yellow Robes, who represented the three hundred fixty five Days of the Year of which the twelve Months were afterwards composed.

Des Landes, in his Travels of Afia, reports, that in one Quarter of the Town of Zulpha, on the other fide of the River Zendenid, upon which is built Ispahan, the Capital of Persia, there is yet to be feen a Village handsome enough, called Guediabal; which was the Habitation of the ancient Guebres or Gaures : It is faid that these were the first amongst the Persians who adored the Fire, and of Confequence the Sun, which is its Source and Principle. They were very different from those People, whom Vitruvius affures us were ignorant of its Use; witness Diogenes the Cynic, who was fo much a Stranger to it, that he devoured a Polypus quite raw. The Emperor of Monomotapa in Africa 19

.40

is fo far from this Ignorance of one of the principal Elements of Nature, that he caufes to be fet up every where near his Place of Refidence, a Tent, wherein is preferved a hallowed and perpetual Fire; not much unlike that mentioned in the Book of Leviticus, Chap. vi. Ver. 13. where it is faid, that by the Command of the Almighty, The Fire shall ever be burning upon the Altar; it shall never go out.

CHAP. VIII.

Effber, that Queen whom the P

That the Year was always composed of Twelve Months, and every Month above Twenty Seven Days, according to the Holy Scriptures.

HIS Division of the Year into twelve Parts, is as antient as the World: The holy Scriptures tell us fo; and one cannot call it in doubt, without Contempt of the Church, which has declared them Canonical. G onorance of one o

The eighth Chapter of Genefis takes notice, that the Waters of the Flood were dried up on the first Day of the first Month, in the fix hundred and first Year of the Age of Noah *.

The third Chapter of the Book of Efther + tells us, that on the first Month, amongst the Jews called Nifan, which anfwers to our March, Haman the proud Persian, the Favourite of Assures, caused the Lots for the Month and Day, on which the Jews (on account of the Indifference that Mardochaus, or Mordecai, Uncle to Esther, that Queen whom the Holy Scripture tells us was of an incredible Beauty) were to be deftroyed. The twelfth Month, named Adar II, answering to our Month of February, came out of the Urn, call'd Phur in Hebrew. By which one plainly fees, that the first and twelfth Month being afcertain'd, the other ten cannot be called in doubt, tho' their Names are not there mention'd.

In the fecond Chapter of the Book of Judith, we are inform'd of a Council held

* Verse 13. † Verse 7. || Ibid.

+ 011

21.

by Nebuchadonofor, the twenty fecond of this first Month, with his Ministers and Generals, to advise Means how to subdue this Country.

Moles, writing of the Flood, in the eleventh Verse of the seventh Chapter of Genefis, fays, that it began on the feventeenth Day of the fecond Month, which fecond Month was called Liar, and answers to our Month of April. Moses adds, in the eighth Chapter, Ver. 4. that on the feventeenth Day of the feventh Month, called Tifry, and which answers to our September, the Ark refted upon the Mountains of Ararat, (which is near the Town or City Erivan in Armenia;) and that on the first Day of the tenth Month * the Tops of the Mountains appeared on the Surface of the Waters. threes on the

This tenth Month was called Tebeth +.

The fame Author tells us in the fame Chapter, that in the fecond Month, on the feven and twentieth Day of the Month, was

2113

Mofes,

Moses (who from the Meadows of fethro his Father-in-Law, where he kept Sheep, was raised on the Mount of Horeb to the Dignity of the Law-giver, and the General of Israel) tells us *, in the fame eighth Chapter of Genesis, as has been just now observed, that on the first Day of the tenth Month, (called Tebeth, and which answers to our December) the Tops of the Mountains were discovered ; the Waters continually abating at the End of forty Days †, which must be about the tenth Day of the eleventh Month (called Schebat, and answering to our fanuary) Noah fent the Raven out of the Ark #.

The twenty fifth Chapter of the fecond Book of Kings III makes mention of this tenth Month, when Nebuchadnezzar (or more properly Nebuchadonofor) befieged Jerusalem.

This brief Enumeration of the Months of the Year, leaves us no room to doubt that their Number was twelve.

* Ver. 5. And the Waters decreased continually, until the tenth Month: In the tenth Month, on the first Day of the Month, were the Tops of the Mountains seen.

+ Ver. 6. || Ver. 7. |||| Ver. 1.

: Carlls

As to their Duration or Extent, Mofes fpeaks of a feven and twentieth Day, without mentioning the laft Day of the Month; it may therefore reafonably be prefumed, that the Month extended it felf to the thirtieth, as we reckon in four Months of our Year.

The Proof of these twelve Months may be drawn from the fourth Chapter of the first Book of Kings *; where we find, that the twelve Clerks of the Kitchen, or Pourveyors, divided the Year between them, to furnish Provisions for Solomon's Table, each one their Month. Abiscar † was their Chief, in Quality of Great Master of the Houshold. These twelve Officers pourveyed in the Provinces from Euphrates even to Agypt, the necessary Provisions for the Court, according to their feveral Spheres or Allotments.

The 24th Chapter of the fecond Book of Samuel authorizes this Division of the

* 1 Kings, Chap. iv. Ver. 7. And Solomon had twelve Officers over all Ifrael, which provided Victuals for the King and his Houshold, each Man his Month in a Year made Provision.

† Ver. 6.

46

Year 11;

Year $\|$; where the numbering of the People under *David*, amounting to thirteen hundred thoufand Men, Men expert in War $\|$, five hundred thoufand of whom were of the Tribe of *Judab**.

The Life of Solomon, written and dedicated to the late King of France by Monfieur l'Abbé de Choify, in the Year 1687 †, tells us, that of these, Men, three hundred thoufand were divided into twelve Bodies, each comprehending twenty five thousand Soldiers, commanded by a particular General; these twelve Generals received their Orders from a Generalisfimo, named Benaiah S.

These twelve Corps, or Bodies of Men, took their Turns in *Jerusalem* to guard the King's Palace, each their Month; at the End of the Month they were relieved, in order to pass the rest of the Year in their Garrisons, on the Frontiers of the Kingdom.

Thus the King and his People were in absolute Security, their Neighbours in Re-

|| Chap. xxiv. Ver. 8. |||| Ver. 9. Valiant Men, that drew the Sword. * Ibid. † Pag. 52, 53, 54. § 1 Kings, Chap. iv. Ver. 4.

tins, and, in thort, that of the Death

10

spect,

fpect, Strangers in Aftonifhment, and all in Admiration at this fage Conduct of a Monarch, who, by his Tendernefs to his People, an Attention full of Equity for his Allies, and vigilant, affable, wife and difinterefted Minifters, render'd his Reign fo glorious and happy.

The twentieth Verse of the fourth Chapter of the second Book of Kings observes, that the People of Judah and Israel were innumerable, as the Sands of the Sea, and that they lived in Joy and Abundance. These Maxims of Solomon are quite different from those of Machiavel, who pretends, that the Submission of the People depends on their Misery and Wretchedness.

Such a Cloud of Witneffes evidently fhew, that the Years were always composed of twelve Months, and the Months of more than twenty feven Days.

These Years began formerly (as ours still now do) on the 25th Day of March; this was the time of the vernal Equinox, the Epocha (according to some) of the Creation of the World, the Instant of the first Movement of the Heavens, and, in short, that of the Death of

48

of Jefus Chrift. The French Year alfo began at the fame Time, before Charles IX. and this Cuftom of beginning the Year (called fince the Old Style) was not abrogated till the Year 1564, by the Edict of Rouffillon, which fixed the Beginning of the new Year on the first Day of January.

In old Times, the French began their Year from the Feaft of St. Martin, in Honour of his Zeal in extirpating Idolatry, and deftroying Paganifm in France. Theodofius the younger, about the Year 423, compleated its Ruine. Theodofius the Great had begun that Work as foon as he came to the Empire, in the Year 392, according to St. Prosper and St. Augustine.

The Death of St. Martin happened in Cande, in the Diocefe of Tours, the feventh or eleventh of November, in the Year of Chrift 400. The French Monarchy began to form it felf out of the Ruines of the Roman Empire, not till the Year 418. The People and Army elected Pharamond for their General: This Officer, Son of Marcomir, a finall King of the Gauls, near the Town of Treves, had then the Honour of becoming the Head of a Nation, whofe H Princes î

Princes one Day were to be so troublesome to their Neighbours.

In this Election of one of their Fellow-Countrymen for their Chief, the Franks did not as the Spaniards did, who choofing Garcia Ximenes for King of Arragon, after the Expulsion of the Moors, in taking their Oath of Allegiance, made use of these Terms: We, who are as worthy as your felf, make you our King and Lord, on Condition you defend our Liberties, and not otherwise*.

The Beginning of the Year was no lefs uncertain amongft other Nations. A Paffage of the fifth Book of *Thucidides* tells us, that the Election of the *Ephori*, which was about the Winter Solftice, determined the first Day of the *Spartan* Year, and called it by the Name of the Eldest of the five *Ephori*, whom they chose to balance the Authority of their Kings.

Cleomenes was the only one who bravely opposed the immense Power which Xe-

nophon

nophon gave these Magistrates. Their Credit, without Bounds or Limits, destroyed the best of Governments; the People were worfe than Slaves; Truth groaned that fhe dared not shew her Face; wife Men retired, and left the Field open for Flatterers and Debauchees; these detestable Perfons reigned with Impunity; a too arbitrary Power put all Things into the utmost Confufion; and they had no other Law, but their own corrupted Paffions and Defires. This Prince, to revenge the Injuries done to his Throne and People, dispatch'd all these Epho? ri. Meursius maintains against Cragius, that they were entirely exterminated. Polybius, Josephus, and Philostratus will have it, that they were re-established after Cleomenes, and that the Years were called after their Names. The Athenian Year in like manner took its Name from that of their Archontes, the first or chief of their Novemviri, or Magistrates; the fecond of whom was called Bafileus, or King; the third Polemarchus, or Head of an Army, which Term at this Day is made use of by the Mareschals of France in all Latin Proceffes or Writings. The fix other Magistrates were called The (mothetes, or Legislators : All these, if they failed in their Duty, prefented the Publick with a Statue of Gold of the fame Size with them- H_2 felves

5I

52

felves; but if they honourably acquitted themfelves, they were admitted into the Senate of Areopagus, according to Plutarch, Solon, and Pericles.

But, which will put every thing out of Dispute in relation to there being twelve Months in the Year, is what we have in the seventh and eighth Chapters of *Genesis*; where it is written, that *Noab* was 600 Years old when the Flood began, and that he was 601 when he came out of the Ark; the saced Text reckoning very particularly ten Months and fifty four Days between his going in and coming out.

By which Calculation it evidently appears, that the Year of the Deluge was composed of twelve Months *, wanting only fix Days, and that the Years then were no fhorter than the Solar Years with us, except a few Minutes and Seconds, People not counting the Year with that Exactness and Nicety as now.

* The Bibliotheque Choisse of Mr. Le Clerc, Tom. 15. p. 215. makes it a complete Year, and even one Day more, in all 366.

Josephus makes the Year to confist of 371 compleat Days.

VAO

before this Author, according to Sleydan, be not a mere (tho' a beautiful) Fiction. However, Virgil in his Aneid has made fuch an agreeable Relation of it, that if Æneas had not made Dido sensible above 260 Years before she arrived at Carthage, the Truth of the History might have been admitted. No body doubts but the Latin Poet undertook this Work to celebrate the Emperor Augustus. This Emperor honoured Virgil with his Friendship, tho' of no better Extraction than the Son of a Potter near Mantua. So true is it, that the greateft Princes in the World have looked on Poely, that peculiar Gift of Heaven, sufficient to render its Possessons Companions for Monarchs; and that Merit and Learning are found amongst Persons of all Conditions, by those who know how to diffinguish them, and are not contented to celebrate them with fimple Praises, which discovers either their Avarice, or Indifference for good Things. This made Haillant, Historiographer to Henry IV. of France, tell that Monarch, that Historians had a Pen of Gold, which gave Immortality to him who knew how to find it Employment; but that they had also one of Iron, for him who did not think it worthy to change it into a Metal more precious,

It was this Neftor, who in the Iliad cooled the boiling Rage of Achilles, humbled the Pride of Agamemnon, tamed the Fiercenefs of Ajax, and fet Bounds to the Impetuofity of Diomedes; a fweet Perfuasion, which finds all eafy, flowed from his Lips like Rivers of Milk and Honey.

TARQUINIUS SUPERBUS, the laft King of *Rome*, lived in perfect Health 90 Years of Age, according to *Lucian**.

AGATHOCLES, King of Sicily, 95.

HIERO, King of Syracufe, 92.

ANTHEAS, King of Scythia, 90, and was killed in Battle against Philip, Father to Alexander the Great.

BARDYLES, King of the Illyrians, lived to the fame Age, and died after the fame Manner.

TERES, King of the Odrifians, 92.

* Lucian, Tom. 3. p. 118. translated into French by Abancourt.

ANTIGONUS,

ANTIGONUS, King of Macedon, furnamed One-eyed, 81 Years; he died fighting against Seleucus and Lysimachus in Phrygia.

PTOLEMY, Son of Lagus, lived 80.

ATTALUS, his Successor, 82.

MITHRIDATES, King of Pontus, 84.

ARIARATES, King of Cappadocia, 82; Perdiccas, who took him Prisoner, hanged him at that Age.

ARTAXERXES MNEMON, lived 94 Years.

SYNARTHOCLES, King of Parthia, came to the Throne at 80, and died at 87.

TIGRANES, King of Armenia, with whom Lucullus waged War, lived 85.

HISPESINES, King of the Caracians, near the Red Sea, the fame.

TEREUS, his Successor, 92.

I2

ARTABAZES,

60

ARTABAZES, Succeffor to Tereus, began to reign at 86.

MNASCIRES, King of the Parthians, died at 96.

MASSINISSA, King of Numidia, at 90: He had a Son at the Age of \$6; fuch a robust State of Health did he even at that Time enjoy.

A ZANDER, whom Augustus call'd King of Bosphorus, fought both on Foot and on Horseback at 90: He suffered himself to die with Hunger, for Vexation that he had displeased that Emperor.

GOESES, King of the Ommanians in Arabia Felix, died 115 Years of Age. For all these Lucian is my Author.

Tuisco, the first King of the Germans, according to Tacitus, arrived to 173.

Juvenal, in his tenth Satire 7, speaks of a Prince named Pilius, who lived several Ages.

Heu! nimium fælix, qui per tot Secula mortem Diftulit

Alexander

Alexander Cornelius and Pliny affure us, that a certain King of Illyria, named DAD-DON, lived 500 Years; and they add, that he never experienced any of the Inconveniencies of Old Age: Perhaps all owing to his Care to prevent them.

Xenophon is yet more liberal, in giving 800 to one of the Latin Kings, whose Father, he affures us, lived 600.

CYRUS the Great, King of Persia, compleated his hundred Years.

Anacreon reports, that CYNIRAS (that opulent King of Cyprus, which he ruined to enrich himfelf) lived to 160 Years of Age; and that ARGANTHONIUS, King of the Tarteffes in Spain, lived 150: Silius Italicus (how truly I cannot tell) allows him 300.

ELIUS PERTINAX was raifed to the Empire at 70 Years of Age, in the Year of Chrift 194.

GORDIANUS AFRICANUS was faluted Emperor after 80, in the Year of our Redemption 241.

61

Bonfinius

62

Bonfinius writes †, that A T T I L A, who lived in the fifth Age, arrived to 124 Years, and that he died of Excess the first Night of his second Nuptials with one of the most beautiful Princess of the World. He called himself the Scourge of God, quite different from Domitian and Caligula, who had the Folly to call themselves The most High God; and of Cosroes King of Persia, who would be stiled The Salvation of Men.

PRIMISLAS, a Villager, or Peafant, who, on account of his Marriage (by Lot) with Libussa Daughter of Crocus, Duke of Bohemia, about the Year 620, succeeded to that Duchy, which he sagely governed 50 Years, lived about 100, and was the first King of that Country.

PIAST, a Peafant of Crussicia in Poland, and who was elected Prince in the Year 824 (after Popel II. was eaten up by Rats, with his Wife and Children) lived 120 Years, and governed his Subjects with extreme Lenity. The Posterity of *Piast* did not extinguish but in the Person of Casimir II.

led the Great.

LUCIUS METELLUS, 104.

MARCUS PERPENNA fully compleated his 100 Years; he lived to fee the whole Senate changed, feven of that Order only excepted. *Romulus* gave Beginning to that Body, by an Affemblage of a hundred of the most confiderable Old Men of the fmall Country of *Latium*, which he conquered.

This was the Origin of those famous Romans, who afterwards gave Laws to the greatest Part of the World, and very often to the greatest Sovereigns; some of whom they disposses of their Dominions, and loaded them with Chains: Witness Perfeus, King of Macedon, the last Successor of Alexander the Great; this was to honour the Triumph of Paulus Emilius, who had conquered and taken the unhappy Perfeus Prifoner. The Children of this dethroned Prince perished with him, the youngest only excepted.

excepted. This Illustrious Unfortunate was conftrained for Bread to enter into the Service of a Magistrate in Rome: So true is it, that Places the most lofty and elevated are most liable to the greatest Ruines, and that Man is no more than a Ball in the Hands of Fortune, which she sports and plays with; whom she makes worth Millions, or nothing, according to her Caprice. A flagrant Instance of her Inconstancy, is the mighty Belissrius, whom, from a great General, she reduced to beg his Bread in the Streets.

The Ambitious indeed will fay, that happy are those who can have one Grain of her, rather than large Stores of Virtue and Merit: With these latter, it is true, one starves at the Gates of those who are foolis flar with their unexpected good Fortune.

There are moreover fome, who (like Sejanus, the infolent Favourite of Tiberius) inconfiderately boast that they are the Minions of this Inconstant, and participate of her greatest Favours. This raises her Rage, and in Revenge she implacably abandons them to the Mercy of others; being pleased with her Destiny to roam round the World K like

like an Adventurer, and never ftay with People of Merit, any longer than they have Strength to be her Superior, and offer her Contempt inftead of Incenfe: So that one may fay of her, as the Wife fay of Gold, fhe is the beft Servant, but the worft Mafter.

This indeed is the Language of the truly Wife, who laugh at Fortune, knowing Nature to be content with a few Things, and have no Regard to perifhable Gold, no other than as a meer Inftrument fubfervient to gain Science, in order to do Good, without Diftinction to Mankind, for whom they have a most extensive Charity, and are indeed the Salt and Fire of the Universe.

But to return.

66

Valerius Maximus prefents to us MAR-CUS VALERIUS CORVINUS, aged 100 Years, for a great Conful, an able Patriot, an experienced Labourer, an excellent Citizen, and, that which crowns all, the beft Father of a Family, according to Cato*.

* Cato de Re Ruftica.

It was in the Confulate of Corvinus, in the Year of Rome 488, and in the Time of the Victory of Sicily over the Carthaginians, that the first Sun-dial was carried from Catanea to Rome. Corvinus caused it to be set up before the Rostrum, or Pulpit for Harangues and Declamations. This Dial compleated the Ornament that the Antiates had there furnished after their Defeat in the first Sea-fight given them by the Romans. Camillus put an End, by the taking of Antium, the Capital of the Volscians, to a War of 200 Years. This Roman, to render his Triumph perfect, ruined Antium even to the very Foundation, as a Punishment for daring to put her felf in Competition with Rome; Rome, which brought her Neighbours by little and little to the utmost Desolation, passed the Seas to conquer Carthage, the Alps to ravage the Gauls, as well as the Pyreneans to fubdue the Iberians, by which means at last the came to see herself Mistress of the known World.

X ENOPHON, the General and Hiftorian of the famous Retreat of ten thousand Greeks (whom he brought from Persia into Greece, after the Death of Cyrus the Young, who was killed by his Brother Artaxerxes K 2 400

TIMEUS,

TIMEUS TAUROMENITES, 96. ARISTOBULUS OF Macedon, 90. He began his Hiftory at 84, according to the Preface.

The learned HIPSICRATES died at 92. POLEMON the Poet at 97. He could not help laughing to fee an Afs eat the Figs that were ferved up at his Table.

EPICHARMES lived as long.

ERASTONES the Grammarian, 82. LICURGUS, the famous Lawgiver of Sparta, 85. SOPHOCLES, the famous Tragic Poet of Athens, was choaked with a Grape-stone at 130. One of his Sons lived 85. SOCRATES, 106. GORGIAS LEONTINUS, 108.

ASCLEPIADES, a *Persian* Physician, might have lived much longer than he did, had not a Fall put a Period to his Days at 150 Years of Age.

He was fo certain of the Principles of his Science, (tho' founded on Conjecture and Experience) that he was contented to be taken for a mere *Ignoramus*, if he was attacked by any the least Indisposition. It was
was he who first of all employed Wine in his Medicines, quite contrary to Androcides, who wrote to Alexander the Great, that this Liquor indeed was the Blood of the Earth, but the Poifon of Man, when he made use of it more than Necessity required. Of this Truth Alexander made a fatal Experiment the 22^d Day of May, 303 Years before our Redemption. The Chaldean Aftronomers in vain forewarned him to fly Babylon, where he died at 33 Years of Age, doing nothing there, but eating, drinking, and fleeping. Coming one Day from a Feaft, where he drank exceffively (for Alexander was a great Prince, but one of the greatest Drunkards in the World) a Physician invited him to do him the Honour to come to his House, and taste his Wine. The Conqueror of Afia attacked with a Bumper of Wine, holding two Congii (three Pints at least) one Protheus, a great Drinker, tho' neither Swifs nor German : This Man, charmed with the Preference that Alexander gave him to all others of the Company, did his Majefty Juffice ; and, filling the fame Glafs again, challenged the King to repeat it : This great Monarch, refolving to conquer or die, drank it up; but his Stomach, not able to contain the Wine, which an unfeasonable Vanity had furcharged, *

72

furcharged, the fatal Goblet fell out of his Hand, a violent Fever feized him, which carried him off the twelfth Day.

JUVE NAL, a Latin Poet in the first Century, lived above 100 Years; he was 50 when he composed his 16th Satire against *Paris*, one of *Nero's* Comedians. This Emperor possessed the Empire in the fifty fourth Year of Jesus Christ. *Juvenal* died in the Year 128, under *Adrian*.

CRATINUS, another famous Poet, according to the fourth Satire of the first Book of *Horace*, lived near 100 Years, when he died of Grief, feeing a Barrel broke, and the Wine running about. This desperate Action certainly was very worthy a Poet.

ARISTARCHUS, of the fame Profession under Ptolomeus Philadelphus, died at 100 Years. It was he that faid, I cannot write what I would, and I will not write what I could-

PACUVIUS, Nephew to Ennius, died at Tarentum near 100 Years of Age.

VARRO, the most learned amongst the Romans, and an intimate Friend of Cice-L ro, 74

ro, to whom he dedicated his Book of the Latin Tongue, and which, it is faid, contained above 500 Volumes, lived alfo near 100. He died 28 Years before Jefus Chrift. The Conful of that Name (216 Years before our Redemption) was conquered by Hannibal at Cannæ in Apulia, in the Kingdom of Naples. Forty thoufand Romans remained in the Field, with the Conful Emilius. This Conqueror fent three Bufhels of the Rings of the Roman Knights to Carthage; fhe had deftroy'd Rome, had not the Pleafures of Capua, where they unfeafonably winter'd, inftead of purfuing their Victory, emafculated her Soldiers*.

CARNEADES, of Athens, whom Cicero and Cato effeemed the most eloquent Man in the World, poisoned himself at 90 Years of Age, for Sorrow on Account of the Death of Antipater. It was he who so much astonished the Senate of Rome, to whom he spake as Embassiador from the Athenians; they immediately sent him back again, so much had his Eloquence dazzled their Minds by the Subtilities of his Discourse.

Olaus Magnus speaks of DAVID, one of our Countrymen, an English Bishop, aged 170 Years. hundredeh

1 5

Osius,

Osius, Bishop of Corduba in Andalousia, the Honour of the Prelates of the Church of Spain, according to Mr. Du Pin, liv'd 101 Years, being born in the Year 257, and died in the Year 358. Monsieur de Tillemont will have it, that he lived 114. It was this great Bishop who was so much esteem'd by Constantine, that he made Choice of him to go into Egypt to appeale the Troubles, which the Opinions of Arius against the Divinity of Jesus Christ, and the different Sentiments about keeping Easter, had caused.

He presided in the second Council of Alexandria, in the Year 324; as he did in the first general Council of Nice, against Arius, in the Year 325. The fame Prelate also presided, under the Emperor Constantius, at the Council of Sardica, in the Year 347, where the Innocence of St. Athanafus was acknowledged. It is faid, that when he was 100 Years old, he fell into Arianism, having thro' Weakness in 357 affented to the fecond Arian Formula, or the third Council of Sirmich, and communicated with Urfaces, Valens, and Germinius, the Heads of that Party. However, Saint Athanasius his Friend assures us, that at his T.ROMIT Death

Death he protefted by his Will against this Error; and that he formally condemn'd the Herefy of Arius, into which the Emperor Constantius had thus unwarily made him enter.

Petrus de Natalibus fays, that SEVERIN, Bishop of Tongres, lived 375; that he was not confectated till he was 297 Years of Age.

St. KENIGERN, of whom Bollandus makes mention, on the 15th of January, arriv'd to 185 Years.

St. PAUL, the first Christian who retir'd into the Defert, the Prince of Holy Eremites, who preferred the Silence of the Rocks, the Tranquillity of Forests, and the Company of Beasts, to the Society of Men, the more favage of the two, did not die till he was 113 Years old. He arrived to this great Age, notwithstanding his continual Maceration and Fasting. His Retirement was in a Wilderness, where Water and some Dates, with half a little Loaf (from the Age of 63 Years) which Providence fent him daily, sufficed him for his Nourriture.

CRONIUS,

CRONIUS, his Companion, liv'd 125 Years.

St. ANTONY, that other Solitary, whom Egypt lov'd as her Child, Africa and Afia as their Citizen, liv'd to 105, and his Companion 110. Some think this was the Chief of the Macarii, of whom St. Jerom speaks in the Life of St. Paul the Eremite, and who, it was believ'd, about the Year of Jesus Christ 390, a long while after Saint Anthony, who died the nineteenth Year of the Reign of the Emperor Constantius, about the Year of our Redemption 356.

DANIEL the Prophet arrived also to 110.

Pietro della Valle, in the fourth Tome of his Relations, fays, that in the Year 1626, Father GASPAR DRAGONETTE, a Jesuit, aged near 120, was then fresh and strong: He had all his Teeth, used no Spectacles, and read daily his Lectures in one of the Colleges of *Rome*, with that lively and persuasive Eloquence, which finds nothing impossible, and which seems so peculiar to the Society. Saint SAMSOM, Abbot of *Dol*, liv'd in three Centuries; he was born in the Year of Christ 495, liv'd the fifth Century entire, and died in 607, the twenty eighth Day of *July*, at 112 Years of Age.

In the Time of *Thuatalus*, the fourth King of *Ireland*, who reigned in the Year of our Lord 540, died St. Mocheus, aged 300*.

Chrift 190, a long

Dom Felibien, of the Order of St. Benedict, in his Memoirs drawn from the fifth Age of the Acts of that Order, p. 502. takes notice, that TURQUETULUS, Coufin-German to Edward I. called the Old, after having been a long Time Chancellor of England without being married, became a Monk, and was thereupon made Abbat of the Monastery of Croyland, which the Normans had ruin'd about the Year \$20, fo that scarce five Religious could subsist. This great Man caused the Abbey to be rebuilt, and endow'd it with fix Farms, that he had referv'd out of his Estate, which he left to the King as his Heir. He had be-

fore,

fore, by publick Cryers, all over London, given Notice to his Creditors of his Retreat, and even to all those whom he might have wronged or injured, in order to make a threefo'd Reparation. After this, he gave himself up entirely to the re establishing and re-peopling his Monastery, which became much more flourishing than before; and, to bring up the Fervor of the Primitive Monks, this Venerable Abbat divided them into three Classes: The first, compofed of the young ones, till the twenty fourth Year of Profession, bore all the Burden of the Offices of the Choir and House: The fecond, till the fortieth Year, had fewer Obligations: But the third, to the fiftieth Year, which comprehended only the old Men, whom the Antients call'd Sympecta, had the Liberty to live in Peace, where they were not even discompos'd by Difcourse of any Affairs that might in the least interfere with their Quiet and Tranquillity. The five Monks above-named, whom he found in the Abbey, by this Means liv'd above their Century.

One of them, nam'd CLERAM-BAUT, lived 148 Another, call'd SWARLINGUE, 142 The third, call'd TUPGAR, 115 M Turguetulus,

by publick Cryers, all over Londa's Turquetulus perform'd their Funeral Obfequies, and liv'd himfelf 88 Years: He was born in the Year 887, and died in July 975. Ingulfus, his Successor, wrote his Life: The famous Dom Mabillon, fo well known for his vast Erudition, hath put it amongst his Works. Dom Thiery Ruinart, his Disciple, has told us, how long this learned Modern lived ; he died 75 Years old, by a Diftemper very ill understood. Stephen Mabillon, his Father, was above 108 when he died; and the Father of Stephen 116. They were all three Natives of Pierremont in Chamfecond, till the farrieth Ye pagne.

The Roman Catholicks fay, their Saint SIMON STOK liv'd 100 Years.

But the third.

I shall close this Chapter with taking Notice of the Death of a great Man, who died lately in the 89th Year of his Age; I mean the Right Honourable and Right Reverend Nathanael Lord Crew, the late Lord Bishop of Durham.

One of them, nam'd CLERRA

Another, calld Swarp LING

LONG LIVERS.

83

CHAP. XIV.

Of Persons of several Conditions, who have liv'd above an Hundred Years.

Guido Donatus observes, that in the Year 1223 he knew one RICHARD, aged above 400 Years: He was a Soldier by Profession, and might probably have born Arms under Charlemain. This Prince, who was surnamed the Great, was King of France, Germany, Italy, Holland, and Part of Spain, to the Ebro, of Poland to the Vistula, and of Greece even to the Confines of Dalmatia. It was in Favour of this great King of France, that Nicephorus, who by his Perfidy made himself Emperor of the East, confented (fearing a Train of Troubles) M 2

84

11 top

to the Difmembring of his Imperial Crown, in relation to the Kings of France only. The Germans had posses'd it fince the Year 913. This vaft Empire of the French then bounded on the North by the Baltic Sea, on the South by the Ebro, the East by the Vistula and Dalmatia, and on the Weft by the Ocean, comprehends scarce now one fifth Part. This Diminution was caufed by the Divisions, which the 1st and 2dRace of the French Kings introduced, contrary to their own Interefts. These Divisions began in the Time of the Sons of Lewis the Debonnaire, only Son of Charlemain. Hugh Capet being better advised, abolish'd them absolutely before his Death, which happen'd the twenty ninth of August 996. The Appennages revertible to the Crown in default of lawful Iffue Male, fucceeded those Divisions, so absolutely burdenfome to the Monarchy.

Cedrenus and Zonares fay, that the beautiful Irene, Widow to Leo IV. Emperor of Greece, who died in the Year 780, fearing the Neighbourhood of the King of France, then Master of Dalmatia in Greece, to rid her self of those Inconveniencies, amused him with Hopes of Marriage, and of yielding up to him the Eastern Empire. The Embassadors of Charles had very much advanc'd

advanc'd the Negotiation, when the impious Nicephorus, Chancellor of Irene, invaded her Throne, and caufed himfelf to be declared Emperor the last Day of October, in the Year 802. He immediately despoiled his Sovereign and Benefactrefs of her Royalty, and banish'd her into the Isle of Mytelene, one of those of the Archipelago of Greece. The Despair of such a Loss, or perhaps the Remorfe of having caufed the Eyes of her Son Constantine VIII. to be put out, that she might reign alone, made her die with Chagrin and Sorrow. Theophanes observes, that this Cruelty seem'd to have eclipfed the Sun over Constantinople for seventeen Days together; as if the Horror of a Deed fo unnatural had frighten'd, by its Barbarity, the higheft and most glorious Luminary of Heaven.

JEAN D'ESTAMPES, Equery to Charlemain, liv'd much the fame Time as Richard: He died in the Reign of Lewis the Seventh, firnamed the Toung, in the Year 1146. This Prince, divorcing Eleanor of Guyenne, returned to her, in Prejudice to 2 Daughters he had by her, a Portion which Law and Policy fhould have retained. A Reflitution fo ill concerted afflicted France with a cruel War for above 400 Years.

b'aig

In

In the Reign of the Emperor Claudius, a Citizen of Bologna in Italy, called FUL-LONIUS, liv'd 152 Years *.

LUCIUS TERENCE, of the same Town, in the Reign of Vespasian, liv'd 150.

Buchanan fays, that LAURENCE HUT-LAND liv'd 170.

Ovid fpeaks of his Father fresh and vigorous at 90.

TITIAN, the famous Painter, liv'd 99 Years in perfect Health, and probably might have liv'd much longer, had he not been fuddenly taken off by the Plague.

Pliny speaks, with Astonishment, of the happy and agreeable old Age of XENO-PHILUS the Physician, who was 130 Years old, and scarce appear'd to be 50; an Example which is indeed, according to this Author, miraculous.

Old Age was not in him, it seems, so difficult to be supported, as Euripides ima-

* Fulg. 1. 4. c. 14.

TIL

gin'd, who, in his Hercules Furens, fays, it was heavier than Mount Athos.

It was this, without doubt, which made Saint Gregory Nazianzen fay, that he labour'd under an old Age more heavy than all the Mountains of Sicily.

If these great Men had known the Treatife which Cicero dedicated to Atticus, they would have chang'd their Sentiments. Cato the Censor there proves so very agreeable to Scipio and Lelius, that Old Age weakens not the Mind nor Body, that it takes away neither the Gout nor Use of Pleasures, and that it is not threaten'd with an approaching Death; so that really one does not know, from this fine Piece of Roman Oratory, whether Youth be preferable to it.

When the Emperor Vespasian and Titus his Son (whom History, the faithful Mirrour of Princes, call'd the Delights of Human Kind, and who complain'd of losing a Day, if he had oblig'd no body*) numbred all Italy, they found in the Town of Vellejacium, near Placentia, fixty three Men aged each 110 Years, four 120 each, two

SS LONG LIVERS.

licated to dilleous, they

125, four 130, and as many 137, and three 140*.

The fame Author fays, that in Parma there were three who were each of them 120 Years old; and two of 130. At Placentia one of 131; and at Bolonia, LUCIUS TERENCE, Son of Marcus; and at Ariminium MARCUS APPONIUS, each 150.

VINCENT COQUELIN, Chief Chaplain, died at *Paris* in the Parish of St. Sulpice, in the Year 1664, at 112.

The Ordinary of Holland, of the third of April 1687, makes mention of a Man nam'd GALDO, travelling at that time thro' Venice; he had his own Picture with him; the Mafters in the Art knew it to be done by the Hand of Titian, who had been deceas'd then 130 Years. Galdo might have been about 30 Years old, when his Picture was drawn; which in the whole will amount to 160 Years, fuppofing that Galdo liv'd no longer than the faid Year 1687.

Guilleaume Roullé, in the third Part of the Pre-excellence of Gaul, reports, that

Daugt vont

* Pliny 1.7. c.49.

125

in the Parish of Ancines, near Alençon in Normandy, there died in his Time a Man aged 150 Years.

The fame Author fays, that PHILIP JOANNES, Father to one of his Brothersin-Law, was 180 when he wrote his Book.

Alexander Benedictus and Cardan, after Albertus Magnus, observe, that a Man of Samothracia was fresh and vigorous at above 104.

Every one knows the Story of THOMAS PARR, commonly call'd Old Parr, who was aged 152 Years and fome Months, when he was prefented to King Charles I. in the Year 1635.

This old Man was born in the Year 1483, and had feen ten Kings and Queens of England; viz. Edward IV. Edward V. Richard III. Henry VII. Henry VIII. Edward VI. Queen Mary, Queen Elizabeth, James I. and Charles I. Parr died (fixteen Years after he was prefented to the King) at London, the 24th of November 1651, without any Pain or Diftemper. When his Body was open'd, his Bowels appeared very found, only the Lungs floated a little N in 90

in Blood: The Physicians attributed this to the Groffnels of the Air of London, and against which he should have been blooded, which might have prolong'd the Life of this good old Man.

At 101 Years of Age he had a publick Penance imposed upon him at the Church-Porch for having got a Maid with Child; an infallible Sign of a strong and robust Temperament in so advanc'd an Age.

Much about the fame time the Countefs of Arundel prefented to the Queen a Midwife 123 Years old, who but two Years before exercifed her Profession.

At Lymmington in the County of Southampton, about 24 Years ago, liv'd JOHN MOORZE (generally call'd Shonny Moorze.) This Man, who was by Trade a Peddling kind of Ironmonger, was at that Time above 100 Years of Age, fresh and lively, and of a ruddy Complexion, almost bald, but a few Silver Hairs; yet have I frequently seen this very Man, in the Depth of Winter, in nipping frosty Mornings, come warm from his Bed, and dress himself (without a Hat) at the Street Door, unconcerned at the 4 Severity

91.

Severity of the Seafon, tho' the Lookers on fhiver'd for Cold.

In the County of Northampton died JOHN JAMES, in the Year 1705, about the End of the Month of July: He liv'd 128 Years, ftrong and in good Health, and had the Use of his Senses to the last.

FRANCIS SECARDI HONGO, furnamed Huppazoli, died aged 114 Years, 10 Months, and 12 Days, of the Gravel and Rheum, the twenty feventh of January 1702, in Smyrna, where he was Conful for the Venetians. He was born the 15th of March, 1587, at Cafal in the Montferrat, when Sixtus V. held the See of Rome. He wore the Caffock in the Time of Paul V. and Urban VIII. which he quitted to marry at Scio, in the Archipelago, the Daughter of a certain Nobleman, surnam'd Capra. He left behind him 49 Children by five lawful Wives, and a round Number of Concubines, his Slaves. He never was fick, without doubt on Account of Diet, which he always observ'd with the utmost Exactitude. His Sight, Hearing, Memory, and Agility, were surprising. He walk'd every Day eight Miles; at 100 his white Hair appear'd black, his Beard and Eye-brows were chang-N 2 ed cd to the fame Hue at 112; and, what is most to be admir'd, having lost all his Teeth at 110, he cut two large ones in his upper Jaw one Year before he died. He used for his Drink only Water of Scorzonera; never Wine, Strong-Waters, Sorbet, Coffee, nor Tobacco; he liv'd chiefly on a little Broath, and some little nice Thing roasted, and Fruit which he would always eat with Bread. He never would eat from Home, for fear of interrupting his Regimen of Life. He was a Man of much Honour, Wit, and Merit; his only Fault was, his being too much given to Women.

The 19th of *November*, in the fame Year 1702, died in the Village of *Vende*ville, in Lorrain, MATTHEW LITTARD, call'd La Ronce, or the Brier, at [118 Years of Age; he had ferv'd in the Wars in Italy, in the Reign of Henry IV. of France, Grand-father to Lewis XIV. the late King.

CHARLES PASQUOT, Mayor of the Burgesses of Joinville, died in the Month of January, at 111: He had sometime before shot at Marks with the Chevaliers de l'Arquebuze.

JOHN

JOHN NICOLAUD, of the Diocefe of Sifteron in Provence, departed this Life the nineteenth of the fame Month, at 106.

FREMINE RAMBAUT, who liv'd on the Fossez de St. Victor, at Paris, died the eighth of March at 105 Years, 6 Months, and 8 Days: She never used Spectacles, and went for fifteen Years every Day on Foot to Church to St. Genevieve du Mont. The late Duke of Berry allow'd her a Pension.

The fame Month of March, being Maunday Thursday, at the Ceremony of washing of the Feet, performed by the Emperor and the three Empresses at Vienna, the Number of the People was 48, who together made 3695 Years.

The Emperor washed the Feet of twelve old Men, whose Age together amounted to 976 Years.

The Empress Regent perform'd the same Ceremony to twelve old Women, making, 833 Years.

The Empress Mother did the same to twelve other old Women, making 916 Years.

The Empress Amelia to twelve more, amounting to 970. 4 Phlegon,

Phlegon, in his Opusculum upon those who liv'd a long Time, speaks of a great Number of People that arriv'd to 100, 120, 130, and 150 Years: He adds, that the Sybilla Erythraa, liv'd ten Ages, that is, one thousand Years. He speaks also of one Macroseiris*, who had completed 500 Years. But as the Translation from the Greek of this Author by the learned Meursus cannot warrant the Truth of this Fact, we shall say no more; tho' Berosus fays a great many Things much more incredible, in relation to the long Lives of abundance of People.

Monfieur l'Abbé Dupin has given us fomething in relation to these Macrobites, or Long Livers; he derives the Name (as indeed he can do no otherwise) from these Greek Terms µaxeo's long, and Bio's Life. He says, these are certain People of Africa, whom Pomponius Mela places in the Isle of Meroe; Pliny, in Ethiopia, near the cruel Kingdom of Macoco, where the People are Cannibals, or Man-eaters; such as the Leftrigons, mention'd by Homer † and Ovid #.

* Phlegon's Opusculum, Chap. 17.

t Homer's Odyffeis. || Ovid. 1. 4. Faft.

The

The Inhabitants of this barbarous Kingdom do not give Nature Time to produce Macrobites; the King of that inhuman Country Macoco, for a furprifing Ragout, caufes every Day in his Palace of Monfol, the Capital of his Kingdom, two hundred Criminals or Slaves to be killed, whofe Flefh they drefs and ferve up at his Table, and those of his principal Courtiers *.

The old Woman who had the Care of the Viscount de Mortain, in the Diocese of Orange, died in the Month of July at 102: She wrought at her Needle to make Linen the Day before she died, without Spectacles; aud five Women, whose Age altogether made 525, carried her to her Grave.

ANTONY CAPUAL, a Joiner, died in September at Mainsers, near Neufchatel in Normandy, died at 112.

LEWIS JOUAN, Labourer at Berville, in the Pais de Caux, the eighteenth of the fame Month at 108 Years and 6 Months: He held his Plow the Day before.

JAMES DEFERRERE, in the Diocese of Aire, died the second of November, at 110.

* D. Daper Histoire d'Afrique.

2769 Y

My

My Readers will eafily perceive, that most of these *Macrobites*, or Long Livers, are *French*: The Truth of it is, those People have been very curious in making Collections of fuch Persons who have lived to a great Age, and which yearly they presented to the late King. I shall conclude this Chapter with some who were living in *France* in this Year 1713, above 100 Years of Age.

Monfieur Durand, Curate of Hombourgla Forteresse, sent to Paris by Monfieur de la Tour, Commissary of War, a Certificate dated July the thirtieth in this same Year, by which he attessed, that the undernamed JOHN DIEDRICK and ANNE SCHEL, his Parishioners, were each of them 105 Years old, and appeared to be in good Health, and might live much longer. He adds, that ANNE DURAND, his Grandmother, died some time before at above 108.

PHILIP HERBELOT, who lodged in Paris, in the Cloyfter of St. Nicholas du Louvre, was another Macrobite then and fince living, and may yet be fo. By the Register of the Place where the was baptized, it was proved that he was then 112 Years

old, being born the first of January, 1602, at Doulevant near Joinville in Champagne. He was Pensioner to the late King; and it was he who prefented that Prince with a Nosegay on St. Lewis's Day at Marly, which was taken Notice of by the Publick News Papers.

CHAP

111

CHAP. XVI. now Rimmin nam'd TERTUL That Temperance contributes to long TOBETH, that being Widow who liew

HE Anachorets, or Eremites, living in vast and most wild Deferts, employed themselves in the Practice of Temperance, (the first of the Cardinal Virtues, which bridles all diforderly Appetites, trampling the World under Foot, to use the Terms of St. Ambrofe *,) that they might live many Years in perfect Health.

SIMEON STYLITES died in Asia near Antioch at above 100 Years of Age. Saint Ferom fays, that he liv'd 47 Years, standing upright upon a Pillar 40 Cubits high, in continual Prayer and extraordinary Fasting; where, it feems, he fasted once thirty nine Days, and (I have heard) standing upon

* St. Ambrof. in Luc. lib. 5.

one Leg too; but as this is no Article of Faith, we are in no Danger of our Salvation, if we do not believe it.

Even the Heathen Philosophers knew the Excellency and Value of Temperance; which, according to them, contributes to form a great Genius; they look'd upon it as the chief and prime Effect of the Study of Wisdom; they believ'd, that Justice, Prudence and Fortitude (and they had Reason) could not subfift without it.

APOLLONIUS THYANEUS preferv'd himfelf in all the Gayety of Youth, by Chaftity, Continence, and Sobriety, above 130 Years. These Virtues gave double Strength to the Athletes, Courage to Soldiers, Vigour to old Men, a certain Freshness to Virgins, and a strong Voice to such as appear in Publick.

DEMOCRITUS by Sobriety was in perfect Health at 109. Diogenes Laertius reports a particular Circumstance of his End; viz. that at the Desire of his Sister he kept himself alive three whole Days by only the Smell of hot Loaves; she was afraid the should not assist at the Feast of Ceres,

110 LONG LIVERS. Ceres, if her Brother died before that Solemnity.

POLYDAMAS, the famous Athlete of Theffaly, who ftopt a Chariot drawn by Horfes in full Career, and ftrangled a Lion on Mount Olympus; MILO the Crotonian, who carry'd an Ox upon his Back; THEAGENES, who carried running a Statue of Brafs as tall as himfelf; all thefe robust Men had no other Secret but Temperance to preferve themselves in a Strength capable to bring them to a long Life.

These Disciples of Vanity prepared themfelves in order to enjoy the Honours of a miserable Triumph; they abstained from all Pleasures; they confined themselves to a Regimen the most austere, to gain Strength; those who ran for the Goal * were temperate in all things, says St. Paul. Tertullian adds, that these Athletes, to double their Vigour, were continent and sober, even to Constraint, Violence and Torments II. They fed on nothing but Things dry, hard, and insipid, and imposed on themselves an

* Every one that firiveth for the Mastery is temperate in all things. I Cor. ix. 25.

|| Ut robori ædificando valeant, continentur à luxuriâ, à cibis, à potu; coguntur, cruciantur, fatigantur.

Abstinence

LONG LIVERS. III

Abstinence equal to Macerations the most penal and cruel.

GUILLEAUME [Or WILLIAM] POSTEL OF Normandy was fo temperate, that he liv'd above 100 Years : He was furnam'd The Abyss of Science of the fifteenth and fixteenth Centuries; he was Master of Lan. guages to fuch Perfection, that he prefum'd he could travel all the World over without an Interpreter. The Reputation of his great and rare Talents diminished on account of some extravagant Opinions which he maintain'd ; amongst which one was, that he held that Women were not redeemed by the Death of Jefus Chrift; a Legacy the Ladies have much Reason to thank him for. Animals, and drank no Wine

The Romans were furprized at the Strength and high Stature of the antient Gauls, who gave the Name of Gallia Tranfalpina to that Part of Italy which they conquer'd of the Romans, fince call'd Lombardy. They built Milan, Aquileia, Genoa, Verona, Sienna, Padua, Cremona, Placentia, Bergamo, Sinaglia, Brefcia, and Bologna. This was under the Conduct of Belloveze, Nephew to Ambigat, King of Auvergne, about the Year of Rome 164.

The

The fame Gauls under Brennus, 200 Years after, conquered the Romans a fecond time on the River Allia in the Sabines Country, the first Day of August, in the Year of Rome 365, and 390 before Jesus Christ. They took Rome by Assault; and had entred the Capitol, had not the Cackling of some Geese gave notice to Manlius, who prevented it with speedy Succour, and who, for that Action, was afterwards furnamed Capitolinus*.

The Gauls generally liv'd 100 Years, which was entirely owing to their Temperance and way of living: They labour'd much, eat little, and never the Flefh of Animals, and drank no Wine ; they rofe before the Sun; Inconftancy, Variety, and Changeablenefs, fo ordinary to their Defcendents were not then known, or agitated their Mind and Imagination. By a Regimen of Life like this did our Forefathers arrive to an extreme old Age: It was the only Step to be admitted into the Order of the Druids, or the Priefts and Religious of those Days.

* Tit. Liv. l. 5. Polyb. l. r.

Car OI 10000

The

The famous LEWIS CORNARO will be an eternal Monument of this Truth, who liv'd 104 Years found in Body and Mind, by pure Regimen. He died at *Padua* the twenty fixth of *April*, in the Year 1566, in his great Chair, by the only Failure of Nature; and a little before died his Wife, who was not much younger than himfelf.

His Abstinence and Sobriety were fuch, that in twenty four Hours he took only 12 Ounces of folid Nourishment, and 14 of liquid. The Infirmities of his lively and impetuous Youth made him observe a Regimen so just, that he fenced himself from all those Indispositions which threatned the Remainder of his Life; for this Reason he became mild, quiet, patient; the Interest of his Health perfuaded him, that a wise Man should do nothing precipitate, or violent.

As his Age advanc'd, he diminish'd infensibly the little Pittance of his Diet, till he came to take no more at each of his two Repass, but the Yolk of an Egg; and this too, towards the latter End of his Life, he divided into two Parts, as finding his Heat weaker as he advanced to it. So true is it that Nature is fimple, that it needs o but

114

but a few Things to fupport it, and that the Perfection it gives to its Works, depends entirely on a Treasure of Wisdom, which by one and the same Conduct satiffies infinite Views.

By fo fage an Attention he always preferved himfelf healthy and vigorous, his Mind found no Diminution of its Faculties, his Eyes and Ears knew no Alteration; and, what feems little credible, his Voice continued fo clear, fo ftrong, fo fonorous, and so beautiful, that he sung at 100 Years old with a Sweetness full of Harmony the most melodious in the World. This may affure us, that this Man become reafonable, according as the Divine Mercies prevented him by their Grace, verified the Words of the Son of Sirach, that He that is abstinent prolongeth his Life *; but fuch an abstinent Person, who governs himself with Prudence. Diftempers proceeding from an extravagant Diet being more dangerous, than those which are caused by fimple Repletion; for this is much more capable to excite infenfible Perspiration, which may cure them, according to the learned Sanctorius.

* Ecclus. c. xxxvii. ver. ult.

CORNARO,

CORNARO at 83, 86, 91, and 98 Years of Age, wrote four Treatifes upon Sobriety and voluntary Fasting, which he practifed from the Age of 36; in which one finds nothing but what is bright, and very agreeable to good Sense. Every thing there is agreeable to the Sentiments of St. Jerome, who faid that Fasting was not only a perfect Virtue*, but the Basis and Foundation of all other Virtues.

This illustrious Venetian faid, that Nature was contented with a little; that what exceeded Neceffity, was nothing elfe but the Source or Spring of all Diftempers, which makes us old before we have had the Pleafure of being young; that scarce 100 Years gave Wrinkles and Decrepitude to fober, Persons; that when Voluptuousness had less Empire over Men, they were stronger at 80 than now they are at 40; that the Flesh of Animals was useless to Health, and that one or two Repafts in 24 Hours, of Bread, Fruits, Herbs, Roots, Legumes, and Milkmeats, with Water, or a very small Quantity of Wine, were sufficient for those who did not reckon their Belly in the Number of false Gods; that he was al-

* Jejunium non folum perfecta virtus est, sed cæterarum virtutum fundamentum. Hieron de Jejunio a i Eustochiam.

Q 2

ways in pain to think how fome People, by abufing their Riches, could expose themfelves to die by too much Eating, while a Multitude of poor Wretches fell daily into a dreadful Neceflity of perifhing for Hunger.

A Deftiny quite contrary to that of those People, whom an effeminate way of Life has made invent the Art of poifoning themfelves by a refined and excellent Gout of those dangerous Dishes, which provoke the Appetite beyond its Occafions. It is thefe mortal Ragous, of which Monfieur de St. Evremont fays, that he who cats much of them will be fure to be very fick, and he that does not touch them be always in Health.

Persius, as obscure as he is, speaking of Old Age in his fecond Satire, is plain enough *: You pray (fays he) to have your Nerves strengthen'd, and not to experience the Inconveniencies of Old Age : Take heart ; but remember, that large Difbes and heavy Meats hinder the Gods to grant you this Petition ; they stop the Hand of Jupiter.

* Poscis opem nervis, corpusq; fidele fenectæ: Efto age; fed grandes patinæ tucetaq; craffa Annuere his Superos vetuere, Jovemq; morantur.

Our sage Venetian added, that Sobriety never left to Death any thing to deftroy us, but the Confumption of the radical Moifture; Nature, which form'd the Knots that tie our Days with our Body, fearing no longer (with this Virtue) their Diffolution, by the Contrariety of Humours furnish'd by Intemperance : that those who followed too much their unruly Appetite, were often deceiv'd when they had recourse to Diet as to a Medicine, after having despised it as a Precaution.

He call'd Sobriety a Divine Inclination, agreeable to God, a Friend of Nature, the Daughter of Reason, Mother of all Virtues, Companion of Chaftity. He faid, the was gay without Vapouring, modest without Constraint, fage without Artifice, and regular in all her Undertakings ; he proclaim'd her the Support of Life, Conferver of Health, and the most powerful Succour of a good Constitution : He gave her for her Foundation Laws most holy; he affures us, that the using her expell'd the Intemperies of Repletion, the true Caufe of all our Distempers.

He

He remark'd, in fine, that Happiness and Repose, which attended Sobriety, invited us to acquire it; that its Beauty engaged us, because it offer'd us the Duration of our Being, and preferved our Life.

In effect, this Virtue for are teaches the Rich modeftly to make use of their Riches; the Poor to pass without murmuring the hard Times of Necessity; old Men the Art to live, and young Men the Art to enjoy Life. It purifies the Senses, fortifies the Body, illuminates the Mind, redoubles the Memory, heightens the Reason, embelliss the Soul; it disensages us from those Chains which too much bind us to the Earth, and elevating us above our sources, makes us new Men, in proportion as it procures us new Days, to labour to arrive to the new Life of Eternity. Thus far the immortal Cornaro.

LESSIUS, in relation to his Health, impoled on himfelf a very fevere Abstinence; the Succels appear'd to him so favourable, that he undertook to shew, that by the Aid of this Virtue there were in all Ages, and of all Conditions, a great many People that liv'd to 100 Years. These surely did not imitate

imitate BUTHUS the Athlete, who, as Esichius the Milesian reports, devoured an Ox at one Meal.

This Buthus had quite different Sentiments from Plutarch; who, in his Book of preferving of Health, difapproves of all Flefh-Meats whatfoever, inafmuch as they caufe Crudities, which furnifh an infallible Fewel for all manner of Diffempers: an Opinion which Galen confirms in his Treatife on Aliments of good and bad Juice, where he fays, That a Man shall enjoy a perfect Health * the more he takes care to avoid Crudities; adding, that the grand Remedy against all Evils is Sobriety, Temperance, and Tranquillity.

Cardan affures us, that PANYGAROLUS the Lawyer preferv'd himfelf without any Indifpofition above 70 Years, by Sobriety and moderate Work. He took only 28 Ounces of Nourifhment a Day, 2 Ounces more than Cornaro, who notwithstanding lived a great while longer. He had read these Words in the Epidymion of Hippo. crates, That the most fure means to pre-

* Nemo morbo corripietur, qui cavet ne in cruditates incidat. Gal. de Aliment. boni aut mali fucci.

Serve

ferve Health, is to eat without being fatiated †, and to work with Moderation, as the Poor do; who are lefs troubled with Sicknefs thro' Want, than the Rich thro' Abundance.

The Solitaries of *Thebais* in the Lower, Egypt, liv'd upon four or five Dates for twenty four Hours; though the Trees of their Retirements furnish'd them with Profusion.

These Models in Aufterity had not probably fludied St. Basil, who fays, that one must not * so burden the Body, as to take from it the necessary Strength to perform its Duties. Providence will have us allow it its just Occasions to support \parallel , and manage it; which are indeed much greater in fome than in others, as we have seen in Cornaro and Lessar

It was this that obliged the Church, in the fecond Century, to condemn the Mon-

Monsteur de Rauce late Abbot of la Trappe, was of the same Opinion. See his Traite de la Vite Monastique.

tanists,

tanists whom Tertullian a Prieft of Carthage afterwards approved of; they were for having three Lents kept with the Xerophagies of the holy Week used thro' mere Devotion by the Christians of the first Ages: These were Days on which they fasted with Bread and Salt, taking for their Drink a simall quantity of Water; a little afterwards they added Legumes, Herbs or some Fruit: The Essents according to Philo, contented themselves with adding only to their Bread a little Hyssop.

However, to fhew that Fafting is not fo prejudicial as we think, even tho' it be accompanied with extreme Silence, Retirement, and continual Maceration, fuch as the *Carthufian* * Monks and Nuns in the Church of *Rome* obferve; who never fpeak to each other but twice a Week, and never eat any flefh of Animals but Fifh, are lock'd up from the World, and wear continually next their Skin hair Shirts. It was not many Years ago found on perufal of the Registers of their Order, that

* All Monks of every Branch of the Order of St. Benedict, (of which the Carthusians, or Monks of St. Bruno are one) are called Dom when they have received Priest's Orders, and the Nuns Domne, Donna, or Dame; according to the Languages of the Country.

CHAP. XVII.

three Years of which fits had paft in

Climates where People arrive to an extreme old Age.

HE East Indies, according to Pliny and Solinus, afford People that live four hundred Years,

their general Food being Vipers Flefh; these Reptiles which are not produced from an Egg as other Reptiles are, but come entirely formed out of the Belly of their Mother, are a sovereign Medicine to substitute fresh Spirits in Bodies that are weakened. The Viper is actually replenished with volatile Salts, which are rarefying, Sudorific, and aperitive Alchalis; These are Salts the most falutary, subtile, and most proper to purify the Blood : Charas has written of their Specific Properties, and before him, Francisco Reddi, and Pandolfo Collenuccio*. These Authors ob-

* Vid. Charas, Reddi and Collenuccio, on the Viper. ferve

ferve that the Effence of this Reptile, or an Ounce of its Water taken every Morning fafting for fifteen Days fucceflively every Year, especially in the Month of *April* or *May*, gives such perfection to Nature by its vital Balsam, that it repairs broken Constitutions, recalls Fecundity, and in a Manner reftores Youth.

Lucian abovecited, fays, that the SERES of Cathai by the Goodness of the Climate, and their drinking Water, liv'd 300 Years, and the ATHOTES, or Inhabitants of Mount Athos in Greece, 130. The CHALDEANS but little less; these last eat Barley Bread, which Lucian pretends clears the Sight, and makes the Senses more vigorous.

Anthony Pigafetta observes that in Brafil in the Verzine, People live to 140.

Lewis Barthema also affures us, that in Arabia Felix, they generally live 120.

Oneficrites, an ocular Historian of the Wars of Alexander, about the Year of Rome 400, repotrs that under the torrid Zone, there are People in the fame East Indies, who are seven Foot and an half high, that

that live to 130 Years without growing old, or at least appearing so.

Cteficas fays that the PANDORES who live in the Valleys, live to 200. they have this contrary to other Men, that in their Youth their Hair is white, but black when they are old.

Pomponius Mela agrees with Lucian, that those who live near Mount Athos, which Xerxes cut thro' to open a Passage into Greece on the Side of Macedonia, lived twice longer than other People.

In the Mountains of *Iucotam* near Mexico, human Life is very long, and that there, as well as in Arabia, to live 100 Years is very common; and in Lapland and Norway, where People live to a very great Age, their Hair is black to the laft.

In the West of Scotland in the Hebrides, the Inhabitants of those Islands live very long, infomuch that it has been reported (how true it is, I know not) that the People kill those whom after living 150, and 200 Years, they esteem on account of their extreme Decrepitude, useless to the World. Places fituated on a reafonable Elevation and open, where the Air is pure, with clear light Water, are most conducive to a long Life; for which reason the Situation of the Palaces of St. Germains, Meudon, and St. Cloud, in France are very happy, where they fay one fcarce hears of any fick, when the Neighbourhood all round are full of those who are so. This makes Montpelier also so healthy, to which the open Country round Winchester is not much inferiour.

Monfieur L' Abbe' de Vertot, of the Royal Academy of Infcriptions, has made fome curious Observations on the Atlantica of the famous Rudbek.

This Author, who was a Professor in the University of Upfal in Sweden, tells us that the Descendents of Japhat, the third Son of Noah, went into that Northern Country; that the Air is there so favourable, that People generally live to an extreme old Age.

He affures us, that befides the Fecundity which the Beauty of the Women, as well as the Coldness of the Climate produces, it being a very common thing there to see I twenty

twenty or thirty Children from the fame Mother, it appeared by the Registers of Baptism, and Bills of Mortality, sent to Rudbek by the Bishop of Arosen, or of Westeras his Brother, containing only the thirty feven Years of the last Century, that within the fmall Extent of twelve Parifhes, there were two hundred thirty two Men, most of whom lived to 140, and the rest margaren film 90 Years. heaithy, to which the open C

That two in particular lived, one to 156, and the other to 260, and that this laß had seen seven Generations; that in these twelve Parishes there were then above eight hundred fixty People, feventy and eighty Years of Age; that it was no furprizing thing in Sweden, to fee People of 100 Years old, and that in the only City of Upfal, the Governour, and Uncle by the Mother's fide to Rudbek, came near that Term, dying one at \$8, and the other at 99.

This Author at the fame Time defcribes the curious Manner, by which he pretends Noah peopled the World; he fays that one hundred Years after the Flood, and to avoid a fecond, the Men affembled together, making in all not above twenty thousand, when they

gan to build the Tower of Babel in the Land of Sennaar, near Euphrates in Afia; that fcarce had they built half of its Height, when their Defign was interrupted *; God having put the Workmen into the greatest Confusion, through Variety of Languages, that they were constrained to abandon their prefumptuous Enterprize †.

The Hebrew and the Vulgate shew, that this unexpected Division produced no more than 70 different Idioms, (the Septuagint Version says 72;) after this they divided themselves into as many Troops or Companies, and then separated to inhabit the Earth.

Rudbek with Philo Judaus adds, that Noah embark'd on the Euxine Sea, whence he vifited all the other Seas, leaving on each of their Shores one of these Troops or Companies, formed by the Division of Tongues. That he gave to the Sons of Shem the Coasts of Asia, from the River Tanais to the Nile; to the Sons of Japhet that of Europe, from Cadix to Tanais; and lastly to the Sons of Ham, or Cham, the

never

.b22601010

never troubles the natural Order of Things which he himfelf had eftablished; that he wills and fees them after the fame manner that they ought to be, according to the Nature of things, contingent contingently, and things necessary necessary.

Sentiments quite opposite to theirs who allow the Term of 120 Years to the Lives of all Mankind; it being certain, that there are Causes by which God permits that the ordinary Term of Life may be very often prolonged.

Experience proves too frequently, that it terminates before 120, where they have very improperly fixed it; otherwife there would be a Neceflity on the End of Life, which would limit it in all Men to the fame Extent; contrary to what we daily fee, fome dying fooner, fome later, according to the Conditions, Temperaments, Nourriture, and Climate, things which certainly may contribute to the lengthning or fhortning of our Days.

And in Reality, if there were a Neceffity on the Extent of our Life, which is the most confiderable Event, it would go very far to support the Opinion of those, who establish

1

establish an inevitable Fatality of Destiny over our Days, as well as every thing else relating to the Creature.

A Deftiny which Quintilian, a Heathen Orator, admitted, who faid, fick Perfons loft their Time in feeking after Remedies; What does it avail Men, faid he, unlefs it be to lull them afleep in their Miferies, while an irrevocable Fatality rules our Moments, and pronounces a decifive Sentence on our Death *?

An Opinion reproved by *Cicero* (all Heathen as he is) and at which St. *Augustine* afterwards laughed. The former of these thought the only Name of Destiny was full of Superstition \ddagger ; and the latter affures us, that he who believed a Destiny was no better than a Madman \parallel .

Not but that there are some Men whom one may assure, that there is a fatal Necefsity of Consequence, which makes one fore-

III Hippocrat. Aphorifm. 4. §. 2.

one may take it as an infallible Matter of Fact, that a great many People are neceffitated to die soon, by the ill use they make of Life.

The fixth Chapter of the Revelations declares, that God gave Power to Death to deftroy Mankind. Some are taken off with the Sword; Eleven hundred thousand Souls * perifhed in Ferufalem when it was befieged and taken by Titus the eighth of September, in the fecond Year of the Empire of Vespasian. It is faid, that Julius Casar cut in pieces twelve hundred thousand Gauls before he could fubdue their Country. The Spaniards propagated the Catholick Religion (the Religion of the Prince of Peace) to get Money with Seas of Blood, and destroyed Millions of Millions of Men to make themselves Masters of America, that part of the World unknown to Noah.

How many have been defiroyed by Famine? *Honorius* the Emperor was petitioned to give leave, that the old Men might be ftrangled, with the Women and Children, and a Price fet on their Flesh, to be exposed to Sale in the Butcheries of *Rome*.

+

Emperors

Emperors, by eating too much Melons. *Philibert* II. furnamed the *Handfome*, Count of *Brefcia*, and first Duke of *Savoy*, died by drinking too much of cool Liquors, in the Year 1504. This was the Case of the late Duke of *Beaufort* in *England*, and the Duke of *Berry* in *France*, supposing the latter had no foul Play, as it was suspected.

It is then most certain, that the pretended Restriction of our Lives did not fall precifely but upon the Duration of the World till the Flood, and not equally on the Lives of all Men.

This System being established, David* in the ninetieth Psalm, in which he fixes our Days at 80 Years, must be understood to speak of our ordinary Days only, and not of the extraordinary; God having granted fince the Flood above 80 to a great number of People, and above 120, the pretended Restriction. For

All these above 500 Years after the Flood; To whom one may add, Titus Fullonius, Thomas Parr, and many others.

So many Proofs that the Reftriction of 120 Years was limited to a certain Seafon, evidently fhew, that the Days of Man were never fixed to 70, 80, or 120 Years, becaufe God takes no Pleafure in the Death of Creatures, which he has defined to Immortality.

CHAP.

C H A P. XIX. The Sentiments of the Antients upon Death.

Eath being a Confequence of Sin, DEChrift was fent into the World to be its Deftroyer *, and the Death of Death it felf: She muft walk before him, to juftify the Saying of Habakkuk the Prophet † in his third Chapter, containing his Prayer, which was directed to his Chief Mufician to be fung on Shigionoth, or in a Concert of various-ftringed Inftruments; which by the way is a plain Demonstration that the Service of God was originally composed of the fublimest Poefy, and that the Prayers, as well as Thankfgivings, were fung.

* O Death, I will be thy Plagues; O Grave, I will be thy Deftruction. Hof. xiii. ver. 14.

+ Before him went the Peftilence, and burning Difeafes (which we ignorantly enough render burning Coals) went forth at his Feet. Chap. iii. ver. 5.

Solomon

Solomon, to shew how precious long Life is in the Sight of God, adds, that Old Age is the Crown of Life, that white Hairs make Men more Venerable, they give a Weight to our Advices, Confidence to our Defigns, Hope to their Undertakings, and preference to our Actions. Thou shalt rife up before the hoary Head, fays the God of Ifrael *, and honour the Face of the Old Man. Such are found often useful to the State by their wholfome Counfels. Old Age, which infpires them by Experience, makes them great Ministers. The Vivacity of a superiour and disinterested Genius to profound Meditations, the most certain Guide in Events, attends Grey Hairs.

If we believe the Antients, DEATH was a Deity, whom they adored as the moft implacable Goddefs; they made her to be the Daughter of Night, and the Sifter of Sleep. Some would have her to be one of the three Parca, or Fatal Sifters. They honoured her in Lacedamonia. The Phanicians built a Temple to her in the Isle Gadira, now Cadiz, as the last Afylum †

* Levit, xix. ver. 32.

† This last Afylum proves, that the Antients knew nothing of America.

Before him went third

of all Nature: They facrificed to her a Cock, her Robe was powdered with Stars, and her Wings were black.

They reprefented her without Eyes, not to fee Beauty, Riches, and Glory, that might corrupt and feduce her. She was painted without Ears, to fhew that fhe is deaf to all Vows, Sighs, and Prayers. They made her appear without Belly or Bowels, as being infenfible to Grief, Sorrow, and Affliction. In her cruel Hands fhe held a long Scythe, with these Words in a Scrowl proceeding out of her Mouth, I spare no one.

Chriftians are the only People in the World, to whom this Queen of Terrors has nothing in her fo dreadful, being penetrated with those important Truths which teach them, that Life fades away like a Flower, passes like a Shadow *, and vanishes like Smoke. They are persuaded, that it is Death only will make them enjoy Immortality, for which Man was created ; they believe that this last Moment will fulfil their Defires, in making of them enjoy the bea-

CHAP. XX.

Of Rejuvenescency, or growing young again; and if it be possible.

) grow young again is to re-enter that beautiful Seafon, which beflows on us all the Agreeableness and Vigour of the most brillant

33976123.

Youth.

It will be unneceffary here to treat of the Queftion, which fo many learned Men have fpent fo much Time about, to know if Art could be brought to that point of Excellence, as to make an old Man young again. Every one knows, that *Paracelfus* boafted, that by his *Mercury of Life* it was as poffible for him to metamorphofe an old 4 Man

Man into a young one, as to change Iron into Gold; and yet this very Man, who promifed to others the Age of the Sybils, the long Life of the Hart, or at least the 300 Years of *Neftor*, died at 37.

But however, shall we look upon Nature, which is fo wonderful in her Works, as a cruel Step-mother here, and not believe her capable of any thing but to stiffe her Productions, the very Moment she lets them see the Light ? Shall that Instinct which she gives to all Creatures to preferve their Life, be wanting to her felf? And while every Spring fhe feems to give new Youth to Trees and Plants, adorning them with a new Beauty of Leaves, Fruits and Flowers ; is it possible, that she should refule to Man, for whom all things were created, what fhe bestows upon Harts, Eagles, and * Serpents? We fee thefe quit hearly the fad Appanages of their Caducity, to reveft themselves with the Agreeablenesfes of the most lively, graceful and shining Youth.

Cruel Gods! cried out Tibullus, who defpoil Serpents of their old Age, who stop-

* Every Year the Hart sheds his Horns, the Eagle its Feathers, and the Serpent his Skin.

143
ping the Rapidity of their Days, delay their End, and reftore to them the tender Charms of the most beautiful Age; why is our Condition fo strictly limited *.

of Neltor, died at 3

Of the fame Sentiment was Runer; he complained with *Tibullus*, that Man's Condition was lefs favourable than that of a great many Animals, and they were both envious at the Rejuvenescency of the Serpents \dagger .

5021 102t

In reality, one does not find Art yet arrived to fuch Perfection, capable to reftore paft Youth to Man; but yet what the paft has not found out, the future may. This Prodigy one may the rather hope for, inafmuch as Nature has actually performed it feveral Times in a Number of People Hiftory informs us of.

It would also be proper to observe the Manner Nature has made use of to bring about such astonishing Miracles, in order

- Crudeles Divi! Serpens novus exuit annos, Formæ non ullam fata dedere moram;

suc-

fuccessfully to execute fuch an agreeable Metamorphofis. Art by this means would certainly arrive to that which has from time to time been known to happen to feveral Persons. Those of a good Temperament, as Mofes*, of whom it is faid, that during 120 Years which he liv'd, that his Sight failed him not, and in whom no Excels of Things, even permitted, made any Alteration; far from running into Destruction, they feemed to renew their Vigour in the most advanced Age, by the Effects of a good Conftitution. It is this which procures ordinarily a Health which might then attribute that Rejuvenescency promised in the Pfalms. The Royal Prophet there fays to God +, Thou shalt send forth thy Spirit; and they shall be created, and thou shalt renew the Face of the Earth. Sentiments which made the learned Vatable express himfelf in these Terms "; And he fills thy Mouth with Sweetness, that thou mayst recover thy Youth like the Eagle.

* And Moses was 120 Years old when he died; his Eye was not dim, nor his natural Force abated. Deut. xxxiv. Ver. 7.

† Pfal. cii. Ver. 2,

|| Et os tuum suavitate implet, ut recuperes juventutem

145

The

The Hart, Eagle, Hawk, and Serpent, grow young again. *Aldroandus* and *Gefner* treat of the Rejuvenescency of the Eagle; and *David* speaks of it in the *Pfalms*; he there excites his Soul to bless God, by Motives of the most lively Acknowledgment; he makes use of these Expressions, full of Tenderness and Affection.

Bless the Lord, O my Soul, and forget not all his Benefits.

tion :

of them 600 Years; and it is faid, that the Benedictine Monks of the Abbey of Saint Bertin, at Saint Omer's, have an Eagle now living 300 Years old.

This Rejuvenescency, or Renewal of Youth, has also descended to Animals of the Earth. No one doubts, but that the Hart repairs its Decays by Vipers and Serpents. The same *Pliny* affures us, that above 100 Years after the Death of *Alexander* the Great, there was taken several Harts or Stags, with golden Collars, which that Prince had caused to be put about their Necks, but the Skin grew over them.

There are Apes * about Mount Caucafus, who live by Pepper which is gathered in for the Inhabitants. The Flesh of these Animals is a sovereign Medicine for the Lion, who grows young in cating it.

The Hart which the Hiftory of the Kings of *France* takes notice of was taken in the Foreft near *Senlis*,, in the Reign of *Lewis* the Sixth, furnam'd *Le Gros*, which died in 1037, had experienced feven Renewals of Youth from the Time of *Julius Cafar*.

* Philostrat. 1. 4. c. 1. of the Life of Appollonius.

U 2

147

This Emperor reigned about forty Years before the Birth of Jefus Chrift; it is not unlikely, that as he paffed in order to invade England, then called Albion, he ordered a Collar to be put about his Neck; round which these Words were found in a Character conformable to the Time of the Common Wealth, Cafar gave me this *: By the Computation of Years, it feems this Stag must have lived near 1200Years.

Those who have written of the Elephant fay, that he generally lives 300 Years. Ceylan, in the Kingdom of Siam + (where was found that famous white Elephant, which was ferved in Gold Plate) and the Kingdom of Achem in the Isle of Sumatra, produce the most renowned. The King of Achem pays these Animals incredible Honours : It is faid, they have Senfe enough to make themselves perfectly understood. Their Docility, in relation to Instruction, equals their Genius. They fend a great number of these to stand before the Throne of Diamonds of the Great Mogul, during the five Days of his great Feaft, which begins upon his Birth day; thefe

* Cæfar hoc me donavit.

† Relation du Chevalier de Chaumont, Ambassador of France to Siam in the Year 1687.

Elephants

Elephants being richly cloathed, falute profoundly the Emperor, bending low their Trunks three Times, and throwing them as many over their Heads, make at the fame time loud Cries of Joy. This Throne shines like the Sun; the Jewels, with which it is thickly fet, are valued at about eleven Millions Sterling, or a hundred and fixty Millions of Livres French; and this Prince, one of the most powerful of the East, has his Mines of Golconda, Vifapour, and Bengal. Here was found that rare Diamond which he now has, weighing 279 Carats; there is none like it in the World, being valued at twelve Millions French, or 800000 Sterling. That which Monfieur Tavernier fold to the late King of France in the Year 1670, and what the Grand Duke of Tuscany now has at Florence, valued at three Millions of French Livres, or 200000 Pounds Sterling, which would be the most confiderable that ever arrived in Europe from the Mines of the Great Mogul, the richeft Prince in the World for Jewels, was not its Glory. eclipfed by that wonderful Diamond late in Possession of Mr. Pit, formerly Governour of Fort St. George, which has been fold (to the Shame of England) to the Regent of France.

149

being pichly cloathed, famili

From the Elephant let us turn our Eyes to the Horfe. Hiftory tells us, that in the beginning of the ninth Century, Raoul King of Burgundy, who had usurped the Crown of France from Lewis le Begue, King and Emperor, received the Homage of the Duke of Gascony*, who was mounted upon a Horfe 100 Years old, and which was then ftrong and vigorous. This is the only Animal upon the Earth + whofe Perfection confifts in participating of the Qualities of a Woman, Lion, Ox, Sheep, Mule, Hart, Wolf, Fox, Serpent and Hare, taking three Qualities from each of them; from Woman the Breaft, la Coupe, and Hair; from the Lion, the Looks, Boldnels and Fury; from the Ox, the Eye, the Noftrils, and Joints; from the Sheep, the Nofe, Gentlenefs and Patience; from the Mule, Strength, Conftancy in Labour, and the Foot; from the Serpent, Memory, Sight, and Turning; and laftly, from the Hare, the Running, Pace, and Supplenefs.

And to come from Terrestrial Animals to Aquatic, in the Year of our Lord 1497, in a Fish pond in Suabia near Huilprin in

* Abregè de Mezerai, Tom. 1. p. 401.

† Furetiere sur le Qualitez du Cheval.

Germany, they took a Carp of a prodigious Size, which had in his Ear a Ring of Copper, with these Words in Latin,

I am the first Fish that was put into this Pond, by the Hands of * Frederick II. Governour of the World, the fifth of October, 1230.

This Carp appeared to have lived 269 Years, and probably might have lived much longer, had he not been then taken.

The Crocodile, according to Marmol, is another Aquatic, which will live a long while on account of its Strength, there having been one known to have defended himfelf against thirty Men. He was thirty three Foot long, and the talleft Man might stand upright in his Mouth. It is faid, that his odoriferous Flesh, and which perfumed the Place where it is diffected, might contribute to his long Life. This may be known from the Inhabitants of the Ifle of Bantam in the Isle of Java in Asia; these People bring them up young, make them tame, and fatten them up, and afterwards make a very delicate Meat of Stature as would be necessary to formedt

* This was that Frederick II. who had fo many remarkable Differences with Honorius III. and Gregory IX. who excommunicated him: He died in December 1250.

Bodies of three common Mien.

From

From Terrestrial Animals, the Renewal of Youth has descended even to Reptiles. The Serpent which renews the Hart, renews likewise it self, in leaving its old Skin. Since therefore Nature renews it felf, in the inferiout Order of the Productions of God, it is not improbable, that the fame Prodigy may be found in the superiour Order of the same Productions, whence Man was formed; for in fhort, Man is not of a worfe Condition than the Beafts which he is to govern, according to these Words And the Fear of you; and the Dread of you shall be upon every Beast of the Earth, and every Fowl of the Air, upon all that moveth upon the Earth, and upon all the Fishes of the Sea; into your Hand are they delivered.

It is certain, that the Secret of Rejuvenefcency would be the Art at leaft to find out long Life; however one must allow, that it may be acquired without its Help: Nature may give to one Man as many Days as she has given to several, as well as, for Example, her giving to Giants as much Stature as would be necessary to form the Bodies of three common Men.

that his odcriferous Hicfar

|| Genef, ix. ven 2.

Moses reports that in his Time there was feen an Iron Bedstead of Og the King of Bashan a Giant *, which was nine Cubits, or thirteen Foot and an half long, and four Cubits, or fix Foot broad; this Size was very different from that of the Pygmies of the Streights of Magellan, or of the Laplanders in Sweden, who are only three Foot high: Such Dwarfs would be frightned at a Briareus, to whom the Poets allowed a hundred Hands. These Pygmies would also have thought Secundilla, who liv'd in the Time of Augustus, a Colossus. Solinus in his Collection of memorable Things, remarks that the was ten Foot high; a Statue much superiour to that of the famous Hercules of Thebes; this Man whom his thirty feven Labours made fo renowned, lived about one thousand two hundred Years before Jesus Christ, Nature having given that Hero of Antiquity, but feven Foot of height, according to that Author.

If we believe Ptolomy, Cardan, Junctin, Argol, Pagan and Morin, who have

* For only Og King of Bashan remained of the Remnant of Giants; behold his Bedstead was a Bedstead of Iron, is it not in Rabbath of the Children of Ammon? nine Cubits was the length thereof, and four Cubtis the breadth of it. Deut, iii. 11.

Such

154

Such were the favourable Influences of the Firmament at the Nativity of Lewis the 14th, late King of France, the genethliac Syftem may be feen in one of the Medals that compose the History of that Reign. The Gentlemen of the Academy Royal of Inferiptions have observed (without giving into the Uncertainties of Astrology) the precise Position of the Planets, at the Moment of the Birth of that Prince.

Round about this curious Medal one fees the twelve Signs of the Zodiac, forming the twelve Houses of this System, the seven Planets appear in the fame Degrees they occupied at that time; the Sun, which gives Perfection to the other Planets, is in the Mid-Heaven; Mars, the Lord of the Ascendant, in reception with Jupiter, the Protector of Life, and this is what they call the greater Fortune: Saturn, that Engmy of Nature, is in his Dignities, which makes him lefs malevolent; the Moon is in Conjunction with Venus and Mercury, in his little House of Predilection, to ten Degrees of the Sun out of Combustion, and enlightened by his Rays, gives a Superiority of Genius in the most difficult and most important Enterprizes, which his be-X z ing

ing in Quartile with Mars, is not capable to abate.

The Nativity of Lewis the 14th was figured in the middle of the Medal by a rifing Sun, the King is placed in the Chariot of that glorious Planet; of which Ovid has given us its Defeription *. This Chariot is drawn by four Horfes guided by Victory, the Infeription is in these Words, Ortus Solis Gallici, the rifing of the Gallic Sun, and the Exergue contains these other Latin Words, Septembris quinto minutis 38 ante Meridiem 1638, the 5th of September, 38 Minutes before Noon, 1638.

To explain the Secrets of the Hieroglyphicks of this learned Medal, we have not the Tarrutius of Varro, that learned Roman, who found out the very Inftant of the Foundation of Rome by Romulus and Remus; Spurma, who cautioned Julius Cæfar to beware of the Ides of March, † Nigi dius, who foretold the Empire to Auguftus, Trafillus to Tiberius, Tiberius himfelf to Galba, the Chaldeans to Nero and his Mother Agrippina; nor Afchetarian, who

* Ovid. Metamorph. lib. 2.

+ In Marth, May, July, October, the Ides are the 15th, in all the other Months, the 13th Day.

on the contrary prophefied Domitian's Death, as well as Bellancius to Picus Prince of Mirandola, the most learned Person of the last Century, nor in that of Cerezars, who certified Paul the 3^d, when Cardinal de Farnese, of hisElevation to the Papal Throne: He told him also the Extent of his Pontificate to such an exact Preciseness, as the Event evidently shewed an infinite Justice of Calculation.

Thomas Aquinas, whom the Roman Catholicks style the angelical Doctor *, pretends, upon the Principles of Ptolomey, the Prince of Astronomers, who lived 138 Years before Jesus Christ, that he who knows the Virtue and Strength of the Planets at the very Moment of a Nativity, may easily judge of the whole Life of such Person then born, the Heaven being a Book, according to Origen *, which God has

Peter Martyr in his Decades.

Y

Bengal 335 Years old, who had a very old Man for his Son according to the curious Phyfics of Gaspar Scot a Jesuit.

Lorichius tells us that a Man in a Fit of Sicknefs loft his white Hair, his Beard, and even his old Skin : His Surprize was very agreeable fome Months after, when he faw his Head covered with new fair Hair, and a fmooth Beard fprout out, with a Skin of the most lively Freshnefs : This Change made him eafily forget his old Age; he married a young Woman, and lived with her in perfect Health.

Aulugellus fays that there was a Woman whofe Name was Victoria, who at fourfcore loft her bad Teeth with her grey Hair, a little after came a new Set of fine and handfome Teeth, and a beautifulHead of Hair. It is to be wifhed that these Authors do not deceive us by writing fuch flattering Events.

Pliny has taken notice of a great many People, who in very advanced Ages have had new Teeth. He adds, that their white Hairs have been fucceeded by those of the finest black in the World.

Haet Hyles th

Postel, of whom we have already spoken, at

163

at a very great Age had the Hair of his Head and Beard turned black.

These Examples prove Rejuvenescency possible; from whence one might hope long Life for him who should discover the rare Invention : Happy, in the mean while, are those who enjoy with Wisdom the Things of Life; the Usage of which, according to St. *Paul*, is no ways blameable, but their Abuse.

Those People indeed who touch upon every thing which makes a fublime Genius, and who find nothing that they do not conteft, affect to be incredulous on the like Prodigies of Nature; they dispute her Power, and are not willing to allow that the can work as many furprizing things as the World offers to us; they would enter into her most fecret Counfels, or at least be called thereto when the acts thus wonderfully for these happy Mortals, whom the Latin Poet styles the Favourites of Jupiter *.

CHAP. XXII.

The Method of Arnoldus de Villa nova to be used in the grand Operation of Rejuvenescency.

H E celebrated Arnoldus de Villa nova, a Phyfician in France, towards the End of the 13th Century, having probably read of fuch People, whom we have mentioned above to have grown young; had a great Defire to invent a Method to bring about these Prodigies without going into foreign Countries, where were Fountains that contributed to it. To this End he left to his most intimate Friends the manner of the grand Operation, which he had found out, to work these happy Miracles.

He would have this wonderful Operation be renewed every feven Years upon Bodies naturally healthy, and well organized: In respect of those who are only too much or too

too little refferrez, he orders that they fhould be tempered with an Ounce of the Pulp of the best Cassia, to be taken between Meals once a Week before one begins his Method; Cassia being very good, according to this Physician, against all vicious Humours.

Immediately when you begin the Operation lay upon your Heart going to Reft, a Plaifter made with an Ounce of the beft oriental Saffron*, half an Ounce of red Rofes, two Drams of red Sanders, one Dram of *Lignum Aloes*, and as much of good Amber; thefe being all reduced to fine Powder incorporate with the beft Virgin Wax, and let them be macerated in a fufficient Quantity of Oyl of Rofes: When you rife take off the Plaifter and roll it up, which put into a leaden Box till you go to Bed.

This grand Operation confifts chiefly, in feeding fome time on Pullets prepared after a certain Manner; Sanguine Complexions during 16 Days, phlegmatic 25, and melancholy 30.

of Hair of hound

OOTO

* These are this Physician's Words; had he been acquainted with our Saffron, the Production of SaffronWalden (the best in the World) he would have talked otherwise.

Lave this wonderful ()peration

165

diants where

For this reafon you must have as many Pullets as the Complexion or Temperament of the Person requires; these must be put into a large open Place, where the Air is pure and clear, and in which there is no Grass or any thing else that they may eat but the Food prepared for them, which is after this Manner,

Take as many good Vipers as there are Pullets, whip them with a Twig in an earthen Veffel, that you may immediately cut off their Heads and Tails, then having taken off their Skins, put them into Vinegar, then rub them in Salt with a very coarfe Cloath, cut them into pieces, and throw them into a great Pot with half a Pound of well picked Rofemary Flowers, and the fame Quantity of Fennel, Calamint, and Anife, then add half a Pound of the Herb Cummin, the Pot being two thirds full of Water, let it boil gently till the Vipers are enough.

Then pour out a good Quantity of the best Wheat well picked, sufficient to feed the Fowl the time appointed. This must be boiled till it has quite fully imbibed the Quality of the Vipers, covering the Pot close

167

close the better to keep in the Spirits, and letting it stand on a Trivet where it may agitate equally on the Fire till it grows thick.

The Pot being taken off the Fire, fpread the Wheat to dry in an airy Place for fear of Corruption, and tho' it be warm yet you may give it the Fowl in little Pellets mixed up with Bran that has been foaked in the Broth.

These Fowl being fattened up after this Manner, the Person must eat one every Day, boiled in as much Water as is sufficient to make two Messes of Broth thickned up with the best and finest Bread two Days old at most.

At Supper let him take the Remainder of the Broth and Fowl left at Dinner, or if that be not fufficient, add two or three new laid Eggs boiled foft in Water as ufual, eating with them a little of that Bread, and drinking White-wine, or good Claret on Account of their Lightnefs.

This Operation is most advantagious in the Months of April and May, because of the Renewal then of Nature. When these Days are expired, the Person must bath thre three times a Week, that is, once every two Days in clear and warm Water mixed with a Decoction of Rofemary, and Elder Flowers, two Sthecas, Camomel, Melilot, red Rofes, and Nenuphar, or Water-lilly, of each one Pound; add to thefe the Roots of Biftorte or Snake-weed, Briony, Elicampane, Patience and Iris, of each an handful well picked and bruifed, put all thefe into a linen Bag to boyl in one or two Waters in a great Kettle of River Water; of thefe you muft make the Decoction.

You must bath fasting, fitting up to the Neck upon this Bag of Flowers an hour at least; this Bag will serve for three Bathings.

When you come out of the Bath you must swallow a Dram of good Treacle* in fix Spoonfuls of Wine of the Infusion of the Flowers of Rosemary and Cummin, and then go into a warm Bed to sleep.

If you sweat, it must be looked upon as a favourable Effect of this Remedy; and

* The best Treacle that I have found is at Mr. Warner's, an Apothecary at the Corner of Iron monger Lane in Cheapfide.

after having reposed, sweated and flept; eat moderately according to your Appetite.

To complete this Operation you must use for twelve Days successively at least, the Confection following after having bathed, viz.

Take four Ounces of Calx Auri diffolved philofophically, Lignum Aloes, and of the three Sanders, Seed Pearl, Saphires, Hyacinths, Emeralds, Rubies, Topazes, red and white Coral, the fineft Balm, Ivory Rafpings, of the Bone of a Stag's Heart, of each half a Dram ; of the beft Musk and Amber of each fix Grains.

Reduce the whole to an impalpable Powder, and incorporate them with Conferves of Lemons, Borage, and Rofemary, of each an Ounce; add to these one Pound of fine Sugar with Sugar of Roses to form this Confection as much as is sufficient, then put it into a *China* or *Delft* Jar to preferve it for your Use.

Of this you must take in the Morning fasting, and the last thing at Night going to Bed, about half a Spoonful, and in a little time you will be convinced of the Z Excel-

Excellency and high Value of this rare Medicine to repair a Caducity the most inveterate and decrepid.

The immortal uncreated Wifdom has only difcovered this admirable Effect to Men who are WISE and WORTHY.

This wonderful Secret, to re-eftablish Nature, is not in the Volume in Folio of the celebrated Arnoldus de Villa nova, printed at Lyons and Basil in the 15th Century. An ancient Latin Manuscript which fell(in the last Century) into the hands of Monsseur Poitier, chief Physician of the general Hospital of Tours, who lent it to Monsseur & Abbè de Vallemont at the Chateau de la Bourdaissere in Touraine is what this wonderful Secret of Rejuvenescency is taken from.

CHAP.

CHAP. XXIII.

Of things which may prolong Life.

T is an incontestable Truth, that Health is the Foundation of Life, and that it forms its principal Pleafures.

It is in like Manner true, that nothing in the World is fo frail and brittle as this fame Health, and that the leaft Irregularity diforders the whole Machine of which Man is composed. Its Mechanism discovers inconceivable Wonders *, as little as we make of those ferious Attentions it deserves.

This Frailty demands our Study to know the Variety of Humours, these are the Elements and Principles of Life; this Know-

* The Anatomies in Wax of Signor Zumbo a Sicilian Gentleman, are an evident Proof of this.

ledge

171

ledge would tame our Impetuofity, and maintain that peaceful Repose, on which depends our good Constitution.

This Repose would easily be kept in our Body, if we could discover the Remedies which may cure without hurting it.

Experience fhews that nothing is fo contrary to Life, as frequent letting Blood, and violent Medicines, which far from helping only defiroy us: If any one finds himfelf hereby, thro' the pure Effect of a good Temperament and Conflitution, any wife better'd, it must be allowed at the fame time, that an infinite Number have fuffered, and what is worst of all, when we have often imagined we have expelled one flight Indisposition, we unhappily find, in Lieu of it, another more confiderable grow upon us.

The true Means to prevent this Danger would be the Art to find things fo homogeneous to Nature, that may augment it without inflaming it, and support it without diminishing its Forces; the Progress of our Duration in this Life being to lafe continually till we have lost all.

It must also be acknowledged, that all Mixtures

Mixtures include fo many different Substances, as make it impossible but that their contrary Qualities must prejudice our Bodies inftead of being any wife advantageous to them; fome are hot, others cold, fome are moift, others dry, a great many laxative, and as many aftringent : What mad Effects must one not expect, when we make use of them without due Regard or Attention?

For Example, we find seven different Substances in the Distillation of the best Wine.

1. There appears at first a most burning Spirit.

2. Afterwards abundance of infipid Water.

3. At the Bottom of the Vessel a black and unctuous Matter like Pitch.

4. This black Matter being diffilled in a Retort gives a white Water not unlike Vinegar in its Tafte.

5. Take away the Fire and there will afterwards remain a yellow Oyl.

6. Applying a quick Fire, we shall perceive a black Oyl, and of a ftinking Smell, which will by no means mingle with the yellow Oyl, tho' it proceeds from the fame Substance.

173

7. And

7. And lastly, at the Bottom of the Veffel remains a Calx, whence one feparates the Ashes from the Salt.

These Kinds of Impurities proceed from Wine, other *Mixtures* are more loaden with them: Without the Secret of their Purification, to reduce them into an aerian Simplicity, one cannot have an entire Notion of their Virtues; these reside and are absolutely in their incorruptible Juice; this is the Soul and Propriety of every Mixture perfectly disengaged from its Faces, which cause Obstructions in our Body, and these Obstructions are again the Cause of Distempers the most dangerous.

In order to cure and prevent which, one muft know how to extract from every Mixture its pure Juice, and feparate it philofophically by natural Agents, which are Rainwater, the Air, and the Rays of the Sun; this Operation would reduce it to a pure incorruptible Subfrance, and fo exceedingly bright and luminous, that being put into a cryftal Phial with diftilled Water, and carried into a dark Place, it would caft out Rays of Light like Glow-worms.

This luminous Substance would have Qualities

lities fo vivifying, that it would open, unftop and gently cut through the Obstructions which daily concurr to destroy us.

A Diffruction which would entirely be evaded, if these Extracts and Quintessences of Mixtures were well conditioned, and enclosed within them nothing but their pure Spirits separated from their Fæces which corrupt their Goodness.

These Quintessences are drawn from Animals, Minerals and Vegetables, which have the greatest Conformity and Relation to the Principle of our Life, as being perfectly analogous or uniform to it.

The Perfection of these Quintessences confists in their Preparation; it is so different in the Operation, that very often those Essences seem not the same thing drawn from the same Principle.

There is Effence, for Example, of Vipers, which would preferve Health a great many Years, if it was truly prepared according to Art; this Effence is more falutary than the Powder of Vipers which contain in them all their terreftrial Matter.

175

The Effence of Myrrhe preferves from Corruption even things inanimate.

The balfamic Oyl of Sulphur, which, to fpeak in the Language of *Paracelfus*, permits nothing to corrupt either alive or dead: it does always good, but never harm, according to *Fioramenti*: When one has philofophically extracted the Salt, the Tincture and effential Oyl, one proceeds to the Operation of its balfamic Oyl.

The Oyl of Mars or Vitriol, extracted from its Salt and Oyl which being rectified and boyled together, produce the fixed Oil of Mars, the Virtues of which are not known to every Body.

The true Tincture of Coral drawn by the Rays of the Sun and Aqua Vitæ Cælestis, or the Juice of Lemons.

The Quintessence of Pearls so useful to fortify the Principle of Life against Poisons.

The Quinteffence of Ambergris for Health (not for Perfumes) which augments our natural Heat without inflaming, and foments it without refolving it; it reftores the loft

177

lost Strength of old Persons, by the univerfal Spirit with which it is replete.

The Quinteffence of Sugar (of which Ifaac Hollander has left us the Practice) which is fo favourable to all Temperaments: he pretends it fovereign against the Dropfy, Phthisic and Confumption, as well as Epilepsies and Lyings-in.

The Quinteffence of Honey, made of Dews and Flowers, which contains in it a Spirit truly Celeftial.

And, that we were as brisk as at

fr//019 bns b5017

The Tincture of natural Gold, reduced by feven Operations to the true Oyl or Tincture of Gold.

Of all these Essences in Tinctures is composed the Diaphoron, of which Bartholomew Korndorfer speaks in these Words:

" It would be difficult to explain the Virtues of the *Diaphoron* against all sorts of Distempers.

" If you mingle it with our Aqua au-" rata at every Dose, you will enjoy a most " vigorous Health.

" It is the Balm of Life. God has done Miracles by its Effects.

" A King of the Gentiles by it preferved his Life to 300 Years.

" I have so much re-established by it, my self, and a Friend of mine of \$9 Years of Age, that we were as brisk as at 20.

" I have given half a spoonful of it to dying People, who have thereupon revived and grown very well.

Thus far this Author.

CHAP

CHAP. XXIV. Rules for a long Life.

HE Italians, who are wife People, live in a continued Regimen of Health; it could be wifhed we followed them in fo falutary and laudable a Practice.

The learned Monficur Comiers of Ambrun has obliged the World with publishing Rules for a long Life; which, that we may join the Practice to those Secrets abovementioned, I shall here insert; viz.

It is certain, that a good Conftitution must necessarily be the Foundation of a long Life.

That the radical Moisture and natural Heat conform to each other, whence refults a fanguine Temperament or Complexion, the best of all.

That

179
That there be in a well-organised Body a Mind found and gay, yet sage withal.

That one should eat to live, and never eat to Satiety.

That one fhould act in every thing with Moderation, to keep the Body in a reasonable Activity.

That one should live chaftly, if one would live long.

That one must abstain from eating different Meats, and drinking several forts of Drink at the same Repast, left the heterogeneous Juices hurt the Stomach by their contrary Qualities.

That one chew perfectly what one eats. Maftication is the first Digestion; it is performed by the acid Humour which issues out of the falival Glands near the Eye-Teeth. Mastication, Digestion, and the Distribution of Aliments, form in us a Species of imperceptible Chymistry, without which we could not subsist.

That

That at Meals one cat alternatively moift Things after dry, fat after lean, fweet after fowre, and cold after hot, to the end that one may be corrective of the other.

That after having drank more than one fhould, one must eat dry Bread or Biscuit, and take Lemon-Juice, to free one from the Hoquet, which Repletion engenders as well as Inanition : That then especially one should take care not to drink Brandy, or other hot Liquors, which are rank Poyson after having drank too much Wine.

That one should never use one's self to any violent Exercise, but only in order to give a Colour *; but never to make one sweat.

That in an extraordinary Sweat one fhould not any wife in the leaft be uncovered; and that one fhould walk moderately when one is heated, for fear of catching cold, drinking then a little Wine, but no Water, unlefs first warmed, and that too drop by drop, to avoid the Pleurify or Rheumatifm.

* Ad ruborem, non ad fudorem.

That after coming out of Bed one fhould never go to look out of the Window, no more than to run to the Fire immediately coming out of the Cold; because every fudden Change is dangerous.

That one fhould eat very little of new Fruits at one time, that the Stomach may be accustomed thereto by degrees, and may also be freed from Fermentations, whence proceed most dangerous Fevers.

Let your Drink confift but of a little Wine; Water taken according as one has occafion to drink, is much more wholfom. Good Water is known by being limpid (or clear as Crystal) without any Smell or Tafte, which provokes fweet and quiet Sleeps, with clear Ideas inftead of Illusions and Reveries, caufed by the Heat and Fumes of Wine.

To Nero we owe the Invention of drinking Water purified by Diftillation, and cooled with Ice. This Liquor, natural, pure and fimple, which our Forefathers made use of for for many Ages, almost 1700 Years, is capable to destroy that Nurfery of Worms which Corruption engenders

genders in the Stomach of those who eat without Choice and Measure, and very often without Taste. Monsieur *Perraut* of the Royal Academy of Sciences, freed by this innocent Remedy a Nun tormented with the like Accident. So true is it, that it is not absolutely necessary to be a Physician to cure a Distemper.

Sleep being found to be a tender Invention of the Divine Mercy to repair exhausted Nature, Monsieur de Comiers (as Apollonius Thyaneus told Phraartes King of India) fays, one should not only sleep with the Eyelids, but even lay our Thoughts asleep likewife; which never will be the happy Lot of those who use Wine immoderately, and Liquors composed of Brandy and (what is much worfe) Spirit of Wine : Tho' two or three Spoonfuls of Brandy may fortify the Stomach, and help the Digestion of those who so much forget themfelves as to eat too much, and which in some cases it may be an excellent Topic. It has been observed, that its use as to drinking of it being introduced into America, the People there, as well as with us here, have shortened their Lives.

and this Jaice, in flowing about, prefler the

183

of those who cai

If after having flept, the Forces (which ought to be thereby corroborated) are weakened, you must have recourse to Sweat to comfort the Heaviness which too much nutritive Juice shall cause: To effect this, one must lie immoveable upon ones Back for an Hour in clean and warm Sheets, between two Feather-Beds, having only the Face uncovered, and one must not rise till an Hour after one has sweated.

cenders in the Stomach

One should fweat three times in the Year, in Autumn, Winter and the Spring, and be rubbed twice a week at least with hot Cloaths to excite Transpiration, so neceffary for Life.

If one has a bad Stomach one must keep Diet for 24 Hours, and walk in the open Air, to re-animate the natural Heat, loaded with too much nutritive Juice.

This Excess of nutritive Juices pushing with Violence the Blood to the Brain, causes there a Heaviness, which oftentimes is the Fore-runner of the Apoplexy; the most tender Branches of the Veins break, and this Juice, in flowing about, presses the Brain,

Those who will retain in these kinds of Boilings the volatile Salts of the Meat, which are the best part, would do well to make use of the Machine of Monssieur *Papin* to disfolve Bones. Thus far Monssieur *de Comiers*.

I shall conclude this Chapter with informing my Brethren, that I my felf have by long Experience, Solicitude and Care arrived to the Knowledge of a most incomparable Secret, which I have used with great Success; which on account of its most excellent vivifying Virtues and celestial Tincture call it TINCTURA VITÆ COELESTIS.

It wonderfully strengthens the Stomach, restores lost Appetite, comforts the Bowels, opens all Obstructions (the Cause of all our Evils, Destruction and Death) admirably advantagious in the Head-ach, strengthens the Memory, excellent in the Jaundice and Cholic, and gives a good Complexion if taken frequently; kills the Worms in Young and Old, is wonderful in the Scurvy, good to prevent the Plague, and every Contagious Distemper, and keep the Body in an entire Health, if taken often,

Bb2 CHAP.

CHAP. XXV.

Of the Universal Medicine.

IET and Sweating, which Monfieur De de Comiers thought certain Remedies, invited him to find out an Universal Medicine, which may be helpful and advantagious to them both.

In this view, by his great Penetration and Study he difcovered the Golden Tincture of Antimony, which is the first Effence of Gold, which, he fays, is so homogeneous to our Bodies, that if the Secret be not infallible, at least one cannot well dispense with one's felf in not making a Trial of what may procure us a Health capable of making us arrive to a very long Life; the Composition of which is as follows, viz.

The Composition of the Universal Medicine.

Take refined Salt-Nitre, melt it flowly in an Iron-Vessel; being melted, cast upon it a small

Nerves, and hinder the Distribution of the Spirits. Fernelius fays, that they are the Vehicle of the natural Heat, and that their Extinction causes Death ; this Inconveniency is remedied by immediately opening the Veins of the Arm, in order to diminish the Cause, and Sweating in Bed, the Veins of the Brain will by this means be mollified, and extend themselves without breaking. Change of the Place is very good, especially if the Patient be removed into an Air more fresh and reasonably fost.

Diet and Sweating are thus a Species of univerfal Medicine, capable of preferving our Bodies, and to acquire a long Life.

Diet restores Appetite; the Appetite moderately contented, augments Strength; Strength contributes to Health; and Health bestows Life.

Sweating difperfes ill Humours, and eafes Obstructions, whence proceed all our Diftempers.

The most violent of which are cured by repeated Sweatings; which are even very advantageous against the Palpitation of the Nerves: a Distemper cured likewise by drinking Bb

drinking three Months fucceffively between Meals, Water in which there has been infufed cold fmall-leav'd green Sage *, gently dried over the Fire on account of the little Worms which lurk there to feek their Cure : for Example, a handful of this Plant in a Quart of the pureft cold River-Water, where the Salts will by no means fix, but remain volatile; contrary to warm Water, where the Salts foon fix themfelves.

To this ready and fimple manner of Cure, Monfieur *de Comiers* would have one add a Nourriture moft eafy of Digeftion for fick People, which is made of good Meat cut into little Pieces, with the Bones (including the Marrow) broken very fmall, and pounded in a Marble Mortar; this being boiled over a flow Fire (always having prepared every thing to facilitate Repofe, keep the Body open, and make the Tafte capable of alluring the Appetite) ftrain through a white Linen Cloth, and this fort of Panada the Sick may make use of for Meat and Drink, by making it more or less Liquid according to their Liking.

* This Secret has been approved to be abundantly conducive to Health.

+

anizanits.

Thofe

LONG LIVERS. 191 Operations, to draw the Effence of Antimony as often as you will.

Put your Spirit of Wine into an Alembic of Glass, distil it gently, till there remains at the Bottom only the fifth Part, which will retain the Tincture of Antimony, or very well distill all the Spirit of Wine, leaving only at the Bottom the Essence ofthe Antimony.

Thus will you have in Liquid the Universal Medicine, which will cure, or preferve from, all Diftempers.

The Dole is five or fix Drops in Wine or Broth, according to the Indisposition.

A stronger Dose will do no harm, the third Dose effects the Cure; but if the Distemper be very stubborn, take it three times a Week.

This Medicine cures all manner of Diftempers, internal and external; as Wounds and Gangrenes, applying it as a Balfam; it comforts the Head and Stomach, being a true *Aurum potabile*, or potable Gold: It operates by infenfible Transpiration, often by Sweat and Urine, seldom otherwise, and almost

almost never by Vomit. Its Effects are natural and without Violence; on which Account it may be used at all Times by all Ages and Complexions.

To this Univerfal Medicine we will add a curious and most valuable Secret to repair lost Strength, and cure all Lassitude.

How to recover Strength, a curious and most valuable Secret, never before published.

Put a Cock into a Coop, feed him fifteen Days with good Wheat, and let fix Pullets with another Cock feed round him; this will fo much provoke the Prifoner, that he will eat thro' Jealoufy and Rage, which will inflame him in the higheft degree; after thefe fifteen Days are expired, kill him, and diftill him in his Blood, pouring over him three times the Water that fhall iffue from the Lees: Take of this Water, in which drop three Drops of the following Oil of Ambergrife, a Spoonful for fifteen Days in the Morning fafting.

How to make the Oil of Ambergrife.

Take half an Ounce of Ambergrife, which diffolve in four Ounces of the best Spirit

fmall Quantity of Charcoal made of foft Wood (as Willow) well powdered: This Coal will immediately confume, upon which you must add more by little and little, till the Nitre after its Detonation, becomes fixed, and has a greenish Colour, and this will appear when the Coal does not rife as before: then pour out your melted Nitre into a Marble Mortar very hot; when it is cold it will be white as Alabaster, and as brittle as Glass; pound it immediately, and fpread the Powder on an Earthen Difh, and having cover'd it for fear of the Dust, expose it declining a little while in the Air, but in a Place where neither the Sun, Rain, nor Dew may come at it; put under it an earthen Veffel to receive the oily Liquor that will run from it; for the Humidity of the Air refolving the Nitre in a few Days, you will find double the Weight of the Oil to that of the Nitre, if the Operation be performed in mild Weather, which will attract the invisible Nitre which we respire with the Air.

This Oil being rectified, is a most powerful Dissolvent to extract the Essence of all Sorts of Mixts.

man and the first

Take

189

Take four or five Parts of this rectified Oil, with one part of the best Antimony, which you will know by certain red Streaks which it takes from Gold, near the Mines of which it is formed; the Antimony being reduced into very fine Powder in a Marble Mortar, put it into a great Glass Vessel, pouring the Oil of Nitre upon it, leaving two thirds of the Vessel empty; stop the Veffel fo clofe that nothing may transpire, put it into Digeftion with a gentle Fire, or over a Lamp, till the Oil, which will fwim at top, appears of the Colour of Gold, or Rubics; then draw off your Oil, and having filtred it through Paper, put it into another Glass Vessel with a long Neck, and pour over it as much of the best rectified Spirit of Wine: two thirds of the Veffel being empty, put it into Digestion with a flow Heat for fome Days, till the Spirit of Wine has drawn all the Colour of the Oil in the Tincture of the Antimony in fuch manner, that the Oil of Nitre remain at the bottom very clear and white; upon which will fwim the Spirit of Wine impregnated with the Tincture of the Gold of Antimony. Draw off the Spirit of Wine, and separate it by Decantation; the Oil of Nitre will always ferve for other Opera-

Spirit of Wine (fuch as will fet Gunpowder on fire) with which you have mixed three or four Drops of the Spirit of the Flower of Mercury, when you put it into Digeftion; then diftil the whole in a Retort, and having let what paffes into the Recipient fettle, your Oyl in twenty four Hours will remain fixed, which may eafily be feparated, as fwimming on the top.

To these Remedies drawn from Minerals and Animals, we will add one drawn from Vegetables the most excellent, such as Bread, Wine and Juniper; from these one may draw a comfortative Essence, which is most exquisite, inasmuch as Bread is the best of Aliments, Wine the readiest of Cordials, and Juniper the most efficacious of all Simples.

How to make the Comfortative Essence of Bread, Wine and Juniper.

Take good Bread well baked, without being burnt, made of the fineft Flower of Wheat of a Year old, which is the time of its perfect Maturity (Immaturity of Aliments being a Species of Poyfon;) cut the Bread, both Cruft and Crumb into Slices; let these be toasted before a clear Fire, to make them dry without burning; reduce these Toasts $C \in$ into

into a gross Powder, throw them into a Cucurbite of double Glass, with four Ounces of Juniper Berries very ripe and dry, and kept till after the Winter; add to these two Pounds of fimple Aqua Vita, extracted from twenty Pounds of the best Burgundy Wine, kept likewise till after the Winter, that it may be the more mature; cover the Cucurbite with a very large Veffel, but fo luted, that there may remain fmall Passages made with a Pin, to let the Spirits evaporate, which might otherwife break the Vessels: put the Cucurbite for forty Days into a Horfe Dunghill; when that Time is expired, let the Cucurbite be perfectly luted, putting thereon a Head with a Beak or Spout, exactly luted, instead of the other Vessel you took off; let all the Substances, after having past through the Spout into a large Vessel well luted thereto, be diffilled with a gradual Fire to the laft Degree of perfect Siccity, without Torrefaction or Ustion; after that, separate by Rectification, secundum Artem, the Spirit, Phlegm, and Oyl, which you must keep apart; put the fame upon the Caput mortuum in a new Digestion for ten Days, then pour out all the Liquor by Inclination into another Cucurbite, to have the Salt; repeat the Operation till the Caput mortuum yields no IO into

195

no more Salt, and becomes intirely infipid, which throw away as a ufelefs Excrement, and keep the Phlegm to ferve for a Vehicle, put again the Spirit, Oyl and Salt in Digestion for forty Days.

Then you will have a Sovereign Effence, capable of fortifying Nature fo powerfully, as to repair the Decays of old Perfons the most exhausted, and fo re-animate the Spirits as to recover them out of an Agony.

The Dofe in Extremities is from 20 to 30, 40, 50, and 60 Drops, in a Spoonful of its proper Flegme, or in a Vehicle proper to the Diftemper, having due Regard to the Age, Temperament, and Condition of the Patient, continuing it Morning and Evening in a fuitable Broth, till the Recovery be perfected.

One may alfo take the fame Dofe in common Broth for 15 Days in the Morning fasting, three or four times a Year, when you use it as a Preservative.

IS PAR OF VEW

Animals, Vegetables and Minerals do not only contain excellent Remedies (as Paracelfus affures us of the latter of these, who says, rhat the only Virtue of Lead cured 200 C c 2 Species

, of an Acouv.

Dole in com.

Species of Diftempers, and avers, that no one Thing acts fo powerful on the radical Moifture, as the first Effence of Copper; and that there is nothing fo agreeable and proper to strengthen Life, as the Sulphur of Vitriol, inasmuch as it represents the Sulphur of the Philosophers, but thro' an Effect of the Graces of Divine Providence, Nature has shut up even in Stones certain sceret Virtues which are wonderful.

Such was the famous Butler's Stone, of which Vanhelmont has composed a Treatife; it is one of the most furprizing of all Remedics; touching only the tip of the Tongue, it cures quite different Distempers, and such too as have been thought incurable; inveterate Megrims, old Eristipelas, Gouts the most racking, most obstinate Fevers, too much unweildy Fatness, all give way to its Sovereign Touch.

And undoubtedly there are great and wonderful Virtues in Stones, efpecially the Precious. These Virtues, as well as their Colours, proceed from Minerals, which affect with their Qualities the pure and simple Water, which coagulates in issuing out of the Mines by a specifick Salt, which at last reduces them into Crystal. The Ruby, Carbuncle

buncle and Grenat [or Garnet] take their Colour from the Fire of the Sulphur of Gold; the Sapphire its celeftial Blue from Silver; the Emerald owes its fine Green to Copper; the Topaz, which is Yellow, has its Tincture from Iron.

What Virtues foever these Stones may have when employed in Medicine, they never will come near to Butler's Stone. This Gentleman was a Native of Ireland, and much effeemed by King James I. Vanhelmont has so precisely described the Composition of this sovereign Remedy, that the curious of this Art have nothing else to do but to have recourse to that Author to be fully fatisfied in its admirable and extranatural Effects.

The fame is faid of the Stone of Fire, the Preparation of which *Bafil Valentin* has defcribed in the Commentary of his Triumphal Chariot of Antimony, which the *Virtuofi* and Curious may confult.

The late Monfieur l'Abbé Rouffeau hav ing described how to make the Effence of Vipers, composed of medicinal Reptiles, mixed with the principal Parts of a Hart, the most perfect of Animals; to which one must 198

fun

must add the superfluous Salt and the Sulphur of Man*, all incorporated with the true Bezoar-Stone, which is to be taken in *Cananor* and *Malabar*, out of the Animal Pazan, quite different from that of *Persia*, *Germany* and *Peru*, and that of the Chymists; I shall refer my Readers to that Book, which describes its Wonders; there they may learn its Use, and that the Dose is only five or fix Drops in a Vehicle proper for the Person who may make use of it in all present Distempers, and against all future.

They will also at the fame time know, that this Effence is perfect fecundum Artem, when it has no nauseous Stinking, or cadaverous Smell, but on the contrary agreeable and balfamic: Then one may flatter one's felf to have found out a Remedy mild and eafy, and of an Efficacy ready and certain to re-eftablish broken Constitutions, purify the Blood, substitute new Spirits, re-animate those which are exhausted, and in short of a universal Quality. So that one may attend that otherwise unhop'd for Rejuveness cency, or Recovery of Youth, which would terminate in the bleffed Immortality to which

* Those who know what Adam's Earth is (mentioned in my Treatise of the Plague, p. 80.) will understand this.

Man

Man was created. This, my deareft Brethren, is the Object of all our Vows and most ardent Defires, with the Subject of this little Work.

Deus est Amor, amate vos invicem.

FINIS.

A DVE RTISEMENT.

HAving of late been importuned by feveral Perfons of Distinction to publish my TINCTURA VITE COELESTIS, described in this Book, p.187. I hereby give Notice, I shall do it accordingly with as much Expedition as it will allow of, to be had only where this Book is sold.
