MEDICINAE STUDIOSIS

HIERONYMUS DAVID GAUBIUS.

Uum alteram Methodi meae concinnandi medicamentorum formulas editionem pararem, forte ad me accessit Bibliopolarum nostrorum aliquis, ostenditque, quem nuper ex Italia missum accepisset, D. PAULI ANDREAE PARENTI Librum de Dosibus Medicamentorum, dicens, videri sibi operae pretium se facturum esse, eum si suis describendum typis curet, ac Medicinae Studiosis facile parabilem eademque, quae mei foret libelli, forma, exhibeat, ut huic adjungi commode possit. Quod cum propositum non improbassem, ille etiam institit, vellem Praefatione quadam mea istam vobis opellam indicare. Itaque perfuafu

MEDICINAE STUDIOSIS

fuafu ejus inductus non equidem in animo habeo multis exponere, quam utile ac necessarium sit in concinnandis remediorum formulis, atque adeo in faciunda feliciter Medicina, accurate cognovisse, qua quantitate, quam Dosin vocant, materies quaeque medicinalis ad falutem aegrorum efficacissima sit, tutissimeque adhiberi queat. Quamquam enim & hoc nunquam fatis inculcari Medicorum Filiis potest; adeo manifestae tamen est veritatis, ut ne minimum quidem dubitationi locum relinquat. Istud tantum monuisse Vos sufficiet, nullam plerumque Disciplinae Medicae partem aeque, ac hanc, a Tironibus negligi, & ab illis etiam magis, qui, cum in laboribus suis virili potius judicio, quam memoria puerili uti consueverint, inter dignissimos Artis Filios numerari merentur. Nimirum Academici quoque Doctores eam saepiuscule, quasi exigui sit momenti, aut perfunctorie tractant, aut & plane praetermittunt. Inest praeterea in ejus studio ficcum aliquid & sterile, quod altiora praesertim ingenia absterret; quando in illa certe parte, quae

HIERONYMUS DAVID GAUBIUS.

in generalibus versatur, & citra Praxin est, addiscenda nec judicii admodum, nec ratiocinii, sed solius memoriae exercitatio locum habet. Quod cum molestiae taediique plenissimum opus plerisque videatur, mirum non est, Pharmacopoeorum famulos, ob quotidianum formularum usum, Junioribus Practicis in ista cognitione saepius antecellere. Tanto igitur majorem a Vobis gratiam iniisse censendus est Vir Industrius, Indicis hujus Autor; qui, quod Vestrum fuerat injucundi laboris pensum, susceperit confeceritque ita, ut ad Vestra commoda appositius vix desiderare positis. Plerorumque enim omnium medicamentorum, tam simplicium, quam compositorum, quae in Europa nostra hodie usitata sunt, doses, diversis & aetatibus & formulis accommodatas, ex optimis Scriptoribus praxique praestantium Medicorum collectas, atque brevissimo compendio ac ordine facili digestas, exhibet. Tirones, si quod a gravioribus studiis otium habent, Enchiridion hoc pervolvant; ita fensim & absque ulla molestia istam fibi scientiam comparabunt: cum in praescribendis

MEDICINAE STUDIOSIS &c.

formulis sese exercent, idem ad manum sumant, quo fibi in determinandis legitime quantitatibus consulant. Nec minorem ex eo fructum reportabunt in praxi Novitii, quibus per negotia impeditis, aut praecipite agendi occasione pressis, cum non semper liceat diffusiores de Materie Medica libros adire, iftius Indicis ope, brevissimi temporis jactura, suis se dubiis exsolvere, quin & claros invenire Scriptores poterunt, quorum autoritate, quae recte adhibuerunt, contra obtrectatores tueantur. Quapropter Opusculum tam eximiae utilitatis Vobis & gratulor & commendo: mihi autem una gaudeo, qui videam ex pluribus unum mei libelli defectum, cui tollendo nec otium, nec, fateor, natura parem me fecit, aliena opera suppleri. Valete!

LECTORI BENEVOLO

PAULUS ANDREAS PARENTI.

Edicamentorum æque doses atque delectum a Medicis diligenter cognosci
oportere nemo, ut arbitror, quisquam insiciabitur. Dissicile est autem Scriptorum libros, in quibus eæ continentur, ad manum omnes
habere; dissicilius etiam singulas memoria complecti.
Quapropter medicæ facultatis studiosis commodum acceptumque inprimis fore existimavi, si multo locupletiorem, quam adhuc apparuerit, dosium tam ad simplicia, quam ad composita medicamenta pertinentium
indicem evulgarem; eamque insuper curam adhibe-

rem, ut quas ex aliorum scriptis colligere minime pos-

sem, eas ex communi præstantium Medicorum praxi,

qua possem, diligentia ac fide supplerem. Factum

LECTORI BENEVOLO P. A. PARENTI.

proinde est, ut Authorum nomen, a quibus dosiumi notitiam acceperim, medicamentis apponerem: ubit Author nullus suppeteret, verbum Praxis. Porros autem in nominandis Authoribus non illud mihi sumpsi, ut ex iis, qui doses tradiderint, omnium primos, vel peritissimos afferrem; quem immensum plane laborem haud parem utilitatis fructum consecuturum esse videbam: tantum animus fuit nullam dosium; qua a nobis proponitur, sine gravi aliquo testimonio, ubi id sieri posset, adducere. Cinnabaris sactitia vid. Cinnabaris in simplicibus C.

Cinnabaris artificialis Cathart. Paracelfi.

Beguinus. gr. ij. gr. iij. gr. vj.
Cinnabaris vulgaris, factitia dicta anteponenda est aliis
Cinnabaribus, loquente Friderico Hossmanno, pag.
273.

Quum itaque evinci possit, quod sulphur antimonii à sulphure vulgari ratione indolis, & virium, nullo modo differat, recte ex bisce colligitur, cinnabarim antimonii, que cum magno labore, & pretio etiam non mediocri praparatur, cinnabari vulgari, qua ex depurato argento vivo, I sulphure vulgari stillatitio facili, & compendioso labore conficitur, non præstantiorem ratione usus, & virium esse, & buic optime substitui posse, quod etiam ipsa experientia, atque attenta observatio multis ab binc annis mihi confirmavit. Taceo quod Cinnabaris vulgaris pulchriori colore etiam se se commendet, quam cinnabaris antimonii.

Hec que de factitia cinnabari ritè à Pharmacopolis parata tradit Hoffmannus, non ità facile adaptari possunt vulgari cinnabari, que in officinis vulgo venalis prostat quamque speciosioris coloris gratia adjecto arsenico vel minio reddunt deteriorem.
