Ittle Piece, which is partly an Abridgment of what was thought most valuable in a longer Work, and partly Original appears in the World: Abstracts of this Kind in all Arts and Sciences are commonly more serviceable than bulky and prolix Volumes, in Regard to the Capacities, Conveniencies, and Purses of the Readers: In which Respect long Treatises, like long Bills and Prescriptions in Physic, are calculated

more for Pride and Avarice, than Health.

To be in an emment Degree, just, useful, benevolent and generous, which are thining Parts of your Character, without the least Adulation, constitute the Man of Sense and Merit, the Gentleman, the English man, and the Christian; make him the most perfect and happy in himself, and the Friend, the Ornament, and delight of his Species: The Christian Legislator, who came to restore and exalt right Reason and moral Virtue, and in that Light only is the Bishop of Souls, (making other Bishops and Priests a Contraste called Anti-Christ) went about doing good, bealing Diseases; sympathing with our Infirmities, and bearing our Sicknesses and Sins, as, in the Jewish Phrase, they were Punishments of Sins, and he, a good and an bonest Physician, a Saviour from them: But he did not demand Tall Fees, nor drive a Chariot over Heaps of Slain: He was a Difpenser, not of Death but Life: His Cures were speedy, true, and easy, therefore faid to be from God and Miracles, though there is not a Word in Scripture that strictly means a Miracle; by what appears, his visible Subsistence was the Practice of Physic, Healing is translated Salvation in the Acts, and had we his physical Recipes, we should no more want Physicians, than we really do Parfons, being possessed of his religious Recipes: In short, he made Charity in general, and this Exercise of it, in particular, his Law and Practice: the Word, Souls, in the Gospel said to be bis, (for he wrote none, and those we have are ----) means utually the Lives or Persons of Men.

Luxury, Covetousness, and Ambition. made Physic an Art, which, according to its very Word, was Nature: Hence a Shilling is given for the Worth of half a Farthing, and a Physician lately had five Guineas for prescribing a Quart of Sack Whey: Whatever be a Patient's Disease, his Pocket is surely in a Consumption; in the Civil Law, Medicaments are called Poisons, Venena: And Distempers, in St. Luke, (who was a Physician, one being sufficient to make all the other Disciples Martyrs,) are call'd Devils: This relation of Poisons without to Devils within obliges our Priests to be, as their Ancestors were, Phy-

ficians

DEDICATION.

ficians too, that they may give some valueble Cosideration for their Fees, and in part satisfy the Reason of the Common Law

for their Revenues:

From an Art it was an easy Transition to make Physic a Crast and a Trade: And there is as much Popery in Physic as in Divinity: The President and College are Pope and Cardinals, the Practisers are Missionaries, and the Dispensatory is Forms of Prayer, Rubricks and Canons: A Physician's Fortune depends as much on the Leading Men, as the Perferment of a poor Levite does on our Prelates, who damn him, if he does not damn others, just as they would have him.

Mankind: This Epitome begins it in a Way suited to the plainest Apprehensions and lowest Circumstances; it owes many judicious Remarks, Sir, to your Pen; this, among others, 'That Physic ought to be in a known Tongue as well as Law and Religion.' Some Person may, perhaps, take the Hint from this Suggestion to compose a Physical Family Dictionary, in the Size of this Pamphlet, explaining all the learned (as they are called) Terms in Physic; it is Pity, that all the Frauds of this, and all other Professions, were not to be concisely and easily unmasked to the Wold, in the like Manner. In the Name of the Intelligent and the truly Humane, I persume to give you the Tribute of Thanks and Gratitude, and am, S IR,

Your most devoted, and most faithful Servant.

The Editor.

NOTE.

Which is Troy-weight, is 12 Ounces, the Druggist and Grocer's Pound, Averdupoix, is 16 Ounces; an Ounce is 8 Drams, a Dram is 3 Scruples, a Scruple is 20 Grains. Measures, a Pint, in most watry Liquors, is 12 Ounces; 2 Quarts is a Pottle, 2 Pottles is a Gallon, a Fascicle is an Arm sull, an Handfull is as much as a moderate Hand can take up; a Pugil is the Eighth Part of an Handfull, as much as you can take up with your Thumb and two next Fingers. Observe, that Roots, Barks, Woods, Small Fruits, Berries, Seeds, Gums, and Rosins, are set down by Weight. Herbs by Handfulls and Fascicles; Flowers, and the Tops of some Herbs by Pugils.

Some Characters in Physic. 16, a Pound or Pint, 3 an Ounce, 3 a Drachm, 9 a Scruple; Gr Grains; ss, half of any Thing; Cong. a Gallon: Cochl. a Spoonfull; M. an Handfull; P. a Pugil; S. V. R. CHEAP, SURE, and READY GUIDE to

HEALTH, &c.

CHAP. I. On the Abuses of Physic. The best Physicians against them. The Apothecaries, and great Fees, the Cause. The Vanity of costly Medicines, and of many Others. What Life is. It's Support and Restoratives.

H E Medicines, which this Nation affords in great Plenty, are with held from the Poor by the exorbitant Prices; and are not beneficial to the Rich, from their being vitiously prepared, or administer'd for Gain in dangerous Quan-

tities. The Glory of God, the welfare of Mankind, the Satisfaction of doing Good, and the generous Defign of preferving all from the Cruelties of private Profit, which knows no Bounds, are the Motives of this little Piece. If any Phyficians or Apothecaries endeavour to decry it, it is, because it may leffen their gaining by Mischief; but exposing the Abuses of Physic, and securing Health at less Cost, outweigh all Cavils: There should be no Mystery in Physic, any more than Religion: We have Religion and Law in a known Tongue, and should have Physic in the same. Dear Medicines are not so utefull as the cheap ones; and half the Remedies in the Shops are good for nothing, and ought to be thrown away: Too many Medicines are given in all Diftempers: And the Forms of many are too naufeous to the Mouth and Stomach: Many have recovered by fewer and more pleasant ones: and others have been kill'd by the Quantities of Physic they have been forc'd to take; though, in so many, one Error may prove Fatal. This has been confirmed by Patients on their Death beds, and by their Attendants.

Many of the College of Physicians have been sensible of all this, and that none ought to advise the Die of Medicines;

多月华

who have Interest in the Vending of them: This will revive the Reputation of Physic: It will take away the Opportunity of cheating and gratifying the Patient at the same Time, by a deceitful Appearance of greater Care, and doing all that can be done, by costly or too frequent Remedies; it will destroy the Mode of long Bills, spending Medicines apace, and bribing the Favour of the Apothecaries, whose

Interest it is to employ the mest liberal Consumer.

The Apothecaries, and their Apprentices, are numerous; and the Physician must be tray his Patient to make them live; When the Attendance of a Physician or an Apothecary is wanted, chuse the former your self, and pay the latter for his Visits separately. No Exception is here taken at the Rates of proper Physic sold by the true Apothecary, who Compounds the Medicines himself, and attends in his Shop to sell them to his Customers: Custom has fixed the Prices, they are moderate, and by that, the best Doses may be had

for one Penny.

You may every Day compute your Fees for them, for Advice and Attendance, when you know the Rates of the Simples, the Compounds and the Mixtures, and pay them diffinctly, in Boles, Powders, Draughts, &c. The best Medicines have been deny'd to Patients, because they are cheap: Juleps of the hot Compound-waters, (made of the Spirits of Sugar and Malt) and Boles of unwholfome Conferves, & Syrups have been pressed on Patients, because they bring vast Profit, being mixed immediately without Trouble in the Shop; but Physicians never have, nor will, communicate their Skill and best Medicines to the practifing Apothecary; and when they are advited with at the End of Distempers, after too many of the vitious Juleps and Boles have been taken, they have often no way to recommend themselves, but by long Bills, or by false Presumptions of great Cures in easy Distempers, which they pronounce to be Malignant, or they neglect the more difficult Difeases.

The only Remedy is here, by shewing the intrinsick Value of Medicines, and preventing Gain from more than ne-

ceffiry Dofes.

In Foreign Parts, the Fees of Physicians, and the Number, Business, and Payment of Apothecaries, are more regulated than here: The Physicians Thoughts are to be fixed only on the Nature of the Disease, and the proper Method and Medicines to be used. The Apothecary is to select the Drugs,

[3]

Drugs, prepare them faithfully according to the Appointment of the Faculty, and make up the Doses with a just Regard to the Life of the Sick, that all Suspicion of the least Mistake may be prevented in the Weight, Measure, and Number of the Drops, &c. The Prices are moderate, when demanded by the Ounce or smaller Quantities, and paid for in ready Money; and the Apothecary ought never to leave

the Compounding Part to an unskilful Apprentice.

When a Physician first appears in the World, he observes, that Families are much under the Direction of their Apothecary, and is enslaved to their Vogue of Practice, tho' the Sophistications of Drugs are as well known, as the brewing of Wines. Dale, in his Treatise of Simples, gives many Instances: And Compound Medicines are not only subject to Alteration, (as in comparing the London Dispensatories you will find) but Select Simples may be more effectual, as the Bark, Purging-Salts, Rhubarb, Volatile-Spirits, &c. are best unmixed: Nature herself teaches the Methods of Health and Cure, by proper Sleep and Exercise, Air and Dyet, and by Indications of her own.

The Vanity of costly Medicines is feen in the Case of Bezoar, Pearl, Gold, Silver, Precious-Stones in Medicines, and fome Exotic Vegetables, as Sarsaparilla &c. Bezoar has been cry'd up here though exploded abroad: Dr. Guybert wrote the Cheats of Bezoar laid open: Trading Physicians, returning from the Indies, extolled it, and fold it dear, as an Antidote to all Poisons and malignant Distempers: Whereas Poilons differ, some are corrosive, others inflaming, others cold and coagulate the Blood, and stupify the Spirits. Experience and the Confession of the best Physicians have proved they have been deceived in it, yet the Rich would not be pleased without it; it is proved not to move the Blood or Spirits; and the Leewarden Dispensatory has left it out of their Gaf oin's Powder: we cannot fay, that Bezoar powder'd will be diffolved in the Stomach, especially when diseased: Saffron, Wines, Aromatic-Spices, are better Cordials: Waters, Confections, and Boles called Bezoardic, are dear, yet a Grain of Bezoar is worth about a Halfpenny or three Farthings; and the three Grains in Gascoin's Powder, about two Pence.

PEARL is a Disease in a Shell-Fish, as the Bezoar-Stone is a Disease in the Body of an Indian Goat, starving on the Mountains; yet neither that, nor Metals, which have no Taste or Smell, have any Cordial Virtue, nor are equal to Vegetable

A 2

Alexia

Alexipharmacks: The Shell of the Fish it self is as good an Animal Alkali; and other Shells of Fish, Claws of Crabs, Stones of the Craw Fish, the two Corals, Chalk, Marls, Absorbent Earths, and even Egg-Shells, are used with as good Success; but if these, or Pearl, be used so, as not only to imbibe, but consume the Acid in the Stomach, they spoil Appetite and Digestion; and the Scruple of Pearl is worth but two Pence.

Gold, neither acts, nor is acted upon in the Body, nor alter'd nor dissolved, so of no Effect: The Aurum Potabile is of no Operation: The Fulminating Powder is too rough, violent, and dangerous. Silver and the Lunar Pills are useless. Precious Stones have pass'd through the Stomachs of Birds without Change, and do not alter the Blood. Stones of an open Texture, as the Hematites and Calamy, may be of Use, especially in outward Applications; the rest useless,

and yet worth only a Penny a Dofe.

Some Exotic Vegetables, that have been in Repute, are unnecessary; as Sarsaparilla, which has gained Credit by being prescribed with cheap Drugs, of the greatest Virtues, as Guiacum, Sassafras, China, and the Seeds of many of the most useful Plants: If it has been by itself beneficial in the West-Indies, it has lost its Qualities in its Passage into colder Climates. If you boil it in Water, it does not after it: Half an

Ounce is about a Penny or Two-pence.

Such Parts of Animals, as, after their Death, are void of Spirits or Oils, and are a dry and unactive Earth, are vainly put in the Catalogues of Simples; as Mummy, which was in high Mode; whereas the Spices, the odorous Babfams and Gums, the Fætids, which Nature presents, as, Assa-fætida, Myrrh, Galbanum, Camphire, &c. are ready, cheap, and useful. The dry'd Hearts of Animals, Livers, Spleens powder'd, Skins of the Stomachs or Guts of Cocks; Worms, the dry'd Lungs of Foxes; the dry'd Bloods of Quadrupeds, have been used in vain: Eventhe Powder or Trochs of Vipers, (or the Cake of that Powder made with Salt and Meal) or Powder of dead Men's Sculls, are much of the fame Ule: So the Horns, Hoofs, or Bones of many Creatures, Swallow's-Nefts and Caftoff Skins of Serpents; may go with them; and Amulets to People who have the Hypo, Eagle Stones and those for the Cramp, Convulsions, and Colic, with a thousand other Nostrums and Secrets, may follow the rest.

Life

Life is the Preservation of the Tone, Texture, Motion, and Powers of the Solids and Fluids of the Body; which, if found, makes a found Mind, and both together are Physic, Religion, and Happiness; and render Physicians, Apothecaries, Bishops and Parsons needless. Nature can often separate and throw off the offending Matter, and recover it felf; poor Men and Others have recovered of Dysenteries, Fevers, and even Plagues, without taking any Remedies: Prudence in Eating and Drinking, moderate Labour and Exercise, a chearful Spirit, a good Conscience, a contented Mind, Prudence, Justice, Courage, Temper, and good Nature, moderate and timely Rest and Sleep, Experience of what is hurtful or useful, Command of Passions, avoiding Extremes and sudden Changes and Accidents, Hardiness of Living and of the Body, Free-thinking, Reason and Contempt of Pleasures, and no Fear or Anxiery are Preventives of Diseases: Warm Gruel, Broths with a little Nitre, one Dish at the Great-meal, with warm Water, Wine or warm Beer, little Supper, White-wine Whey, are the like.

When the Spirits are weak, Aromaticks raife and enliven them; when turbulent, and moving impetuoufly into the Mufcles or Parts, without the Direction of the Mind, they are restrained and quieted by Opiates and Fetids: When they are irritated by a Humour or a Flatus, Revultions are made by Blisters, Plaisters or Unguents; or the Vapours are subdu'd and expelled by Diaphoreticks and Carminatives, and opening the Passages of the Natural Secretions: In the Ebullitions of Fevers, even to Frenzy, the supple soft Emulsions, or the temperate and refreshing watry Decoctions, or the cooling Acids, or cooling and fixing Salts, and all that tends to separate and secrete the Matter of the Disease, and support Narure's Operation in preserving Life, are useful. Vomits, Acids, bitter Herbs, fixt Salts, Abstinence and Air restore the Stomach, Alcali Powders and Earths, Animal Parts calcined, Oily Bitters and Aromaticks, foft and fweet Gumms, Turpentine Balfams, all that is gently temperate and mucilaginous, or what has a natural Jelly or kind of foft Varnish; all these contribute to remove a corroding Pain in the Stomach, too craving an Appetite, a precipitate Digestion, sharp Humours, or Pain from Grit in the Paffages of the Urine, &c. The Volatile Scorbutical Hot Plants break and move the Blood, when too gross and fluggish: Bitters, Balsamic and Restringent, preserve and strengthen the right Mixture and Union of the Blood, and help to separate it properly. Bitters, as Hops, Gentian, Broom,

oce.

[6]

&c. which preserve the Spirits of Beer and Wine, and by fubduing their Acid hinder their fouring, do the like by the Blood. The Life, or natural Mixture of all Liquid Compositions confifts in the equal Powers of their Parts, ballancing each other, and defending the Whole; so that such Medicines are best, as are able to hold together the different Parts of which the Blood is an Aggregate or Compound, in their due Proportions of Quality and Quantity; or to restore them when changed, which Change is the Difeafe. Evacuatory Remedies help the Secretions; when there are any Dregs, or Curdling of the Blood: Vomits and Purges expell the Phlegmatic, and Fibrous Part, with the Choler from the Liver, &c. Diureticks discharge the overflowing watry and serous Humour, mixt with Salts and Earth, that float in the Body and the Blood: Diaphoreticks or Sweaters difmiles the watry Parts by the Pores; and also the acid and volatile Salts, and the Lumps of fætid Sulphur, or oily Parts, that coagulate in the Blood. But the Choice, Quantities, Times, and Use of Medicines, must be known by the History and Experience of their Effects, hurtful or uleful; for if taken too largely, too often, too long, unfeafonably, or when the Effect is excessive, oppofite, or defective, Remedies become Diftempers. The cautious Application of proper Remedies to the Conditions of the Blood and Spirits, alter'd and vitiated, therefore making unnatural Impressions on the Liquids, Parts and Motions of the Body, is the Art of Physic.

But it may be query'd, if there be above four Things in a Medicine, whether the Quality of one does not destroy the other?

CHAP. II. Of the PRICES of SIMPLES. Herbs, Flowers, Roots, Seeds, Spices, Gumms, Balfams, Drops, &c. And of PREPARATIONS, Galenical and Chymical, in the Shops of Apothecaries and Druggists.

SIMPLE MEDICINES either naturally grow here in great Plenty, or are imported in bulky Quantities, and are Cheap, in the little Doses or Quantities in which they are to be administer'd to the Patient, at one Time: The Preparations are easy, to be taken either in Powder, or Cut, or Bruised; to be insused in a Liquor, to extract their Virtues, as a menstruum, in which they are to be steeped or dissolved; which are Springwater, distilled simple Milk-water, the several sorts of Wine, and the Spirits either of Wine, or those most frequently used,

of Molosses, or Malt, or corrupted fermented Fruits: the Price of your Ingredients, Time, Fire, Vessels will be easily reckoned.

Sir John Floyer has given us a Catalogue of Simples according to their sensible Qualities: the Herbs are mostly of our English Growth, and commonly fold for one Penny or less,

the Handful.

I. The Acrid Aromatick. Cinamon, Mace, Cassia, Sassaphras, Nutmegs, Cloves, Pepper, Cubebs, Cardamums, Zedoary, Ginger, Cyperus, Costus, Calamus Aromaticus, Galingal, Winterane Bark, Stæchas, Clove July Flowers, Saffron, Edler Flowers, Angelica, Hyssop, Lavender, Lovage, Baum, Mint, Rosemary, Marjoram, Masterwort, Spignal, Savery, Burnet, the Peels of Citrons, Oranges, Lemons, the four Carminative Seeds: From Animals, Cochineal, Chermes, Musk, Civet: Gum Labdanum, Ammi, Benjamin, Carranna, Tacamahaca, Elemi, Styrax, Balm of Tolu, Balm of Gilead, of Peru, Capivi, Liquid Amber, Ambergrease.

The Herbs of our growth are bought in the Market, a Penny the Handful. The Roots at the same Price, the Ounce. The

Flowers and the Seeds at the double Value.

If then Mace, Nutmegs, Cloves, Costus, Cinnamon, the Cardamums, be six Pence, or one Shilling or two the Ounce, shall the Dose be more than one or two or Three-pence? But Cassia, Sassaphras, Galingal, Calamus Aromaticus, Zedoary, Ginger, Stechas Flowers, and the Carminative Seeds, are but one, or two, or three Pence the Ounce, the Doses of which are below a Penny or a Farthing.

Labdanum at fix Pence, Caranna at half a Crown the Dunce, Gum Ammi, and Elemi at four Pence, Tacamahac at fix Pence, Benzoin and Styrax at eightPence theOunce, will afford many Doses at the lowest Rates, a Farthing, or a Penny.

If Saffron be accounted fix Pence the Dram, Cochineal fix Pence the Dram, Syrop of Chermes at fix Pence the Ounce, Balfam of Capivi one Penny, of Tolu two Pence, and of Peru our Pence the Dram, you may compute the value of the Dose.

Balm of Gilead at twelve Pence the Dram, will cost you out proportionable to the number of a few Drops taken at

ne Time.

Ambergrease, four Pence the Grain, Musk, one Penny, livet, two Pence, which are rarely us'd, and then only few Frains in the Dose.

H. The FETID. The Roots of Bryony, Birthwort, Peidny, the Herbs, Rue, Clary, white and black Horehound, Penny-Royal, Feverfew, Orach, Savin, Southernwood, Castor. The Gums, Opopanax, Sagapenum, Camphire, Asafetida, Galba-

num, Ammoniac, Opium, Petroleum, Amber.

The Roots are of two Pence the Ounce. And the Herbs of the low Values commonly known. The Russia Castor in Substance is in the Dose about Three-pence, in the Tincture one Farthing. The Gums Ammoniac, Sagapenum, Asafetida, Galbanum, and the white or yellow Amber, are six Pence, Camphire, eight Pence, and Opopanax, one Shilling by the Ounce; one Farthing in these exceeds the value of several Doses. Opium, which is rarely us'd but in one, two, or three Grains, at three Shillings the Ounce, bestows many Doses for one Farthing.

III. The BITTER ACRID. Serpentaria Virginiana, Contrayerva, Gentian, Elecampane, greater Celandine, Carduus, Centry, Tarragon, Dragons, Thyme, Misseltoe, Wormwood, Camomil, Agrimony, Mugwort, Betony, Calaminth, Germander, Millfoil, Alexanders, Melilot, Solomons-Seal, Primrose, Woodsage, Soapwort, Tansy, Coltsfoot, Vervain, Speedwel, Berries of Winter-Cherries, of the Bay Tree, Seseli-Seed, Flowers of the Lilly of the Valley, Nephritick-Wood, the Fe-

fuits-Bark, Myrrb.

The Prices of the Herbs, are as the other, which the Fields

and Gardens produce.

The Virginian Snake-weed, is but Six pence the Ounce, and though esteem'd an excellent Cordial, is but two Farthings in the usual Dose. Contrayerus, but Six pence the Ounce, and therefore below a Farthing, Berries of Alkakengi, Four pence the Ounce. The Flower of Lilly of the Valley, one, two, or sometimes five Shillings the Ounce. Nephritick-wood, but Two-pence the Ounce, Myrrh, at one Shilling, is a Farthing in the Dose. The fesuits-Bark, at one Shilling the Ounce, gives a large Dose for Two-pence.

IV. The BITTER ASTRINGENT. Bugle, Dodder, Eyebright, Archangel, Mousear, Saxifrage, Scabious, Meadowseet, Rupture wort, Alkanet, Maudlin, Dock, Pomegranate-

Flowers, red Roses, red Sanders, Acacia.

Pomegranat-Flowers and red Roses, at Four-pence the Ounce, red Sanders, One-penny the Ounce, with the other cheaper Ingredients make an Insusion or Decoction of many Doses. Acacia is at Nine-pence the Ounce, the Dose of it in restringent Pills or Boles, may be valued at half a Farthing. V. The

19]

W. The BITTER MORE ASTRINGENT. The Roots of Bistore, Burnet, Tormentil, Bark of Pomegranaia, Oak, Tamarisk, Mastick, Fruit of Medlar, Berries of My tie, Galls, the Bramble, wild Tansie, Heath, Ferns, Horse tail, Cinquefoil, Moss.

VI. The ACRID HOT. Seurvy-Grass, Water Cresses, Rocket, Chivers, Arsmart, Lesser-Celandine, Hedge-Mustard, common Whitlow-grass, Flixweed, Garlick, Onion, Squills, China-Root, Turmerick, Rhodian Root, Orris, Horseradish, Dittander, Mustard, Guiacum Wood, and Bark, Capers Root

and Bark.

Squills, Six pence the Pound. Turmerick, as much more. Orris, One penny the Ounce. Caper-root Bark, Two pence. Guiacum Wood, less than a Farthing the Ounce, the Bark of it is a Penny. These and other Ingredients cannot make the

Decoction of more than the lowest Value.

VII. The VULNER ARIES OF THE TURPENTINE KIND The Firr and Pine Trees, Cypress, Ground Pine, Ground Ivy, Saint John's wort, Juniper Tree, Liverwort, Sanicle, Valerian, Oak of Jerusalem, All heal, Monywort, Celtick and Indian Spicknard, the Crane Bills, St Peter's-wort, Pistaches, Turpentine, Olibanum, Mastick, Resin, Colophony, Gum of Juniper, Pitch, Tart.

Turpentine of Chio, One penny the Dram. Of Cypress as much. Of Venice Two pence the Ounce. Mastick, Six-pence the Ounce, Olibanum and Gum of Juniper, Two-pence, Colophony and Resin, of Six pence the Pound. Wax, Two pence

the Ounce. Pitch and Tarr, of the lowest Value.

These therefore, though they rival the sam'd Virtues of the more admired Balms from the remoter Parts, are in the Dose

of the lowest value.

VIII. The Sweet Astringent. Polypody, Hartstongue, Whithowgrafs with the Rue-Leaf, Ladies-Mantle, Broom, Liverwort, Spleenwort, the Maidenhairs. The Japan Barth is the Extract of Vegetables, at One-penny the Dram.

IX. The SWEET AROMATIC. Chervil, Saxifrage, Golden Rod, Pansies, Juniper-Berries, Seeds of Parsnips, Dau-

cus-Seeds, Roots of Eringo, Nettles, Butchers-Broom.

X. The Acids. The Juice of Citrons, Lemons, Oranges, Sorrel, Tamarinds, Prunes, Currants, Wood forrel, the lesser Daisie, Plantane, Knot-grass, Hips, Barberry: The Juice of Hypocistis, and of Barberries.

R

XI. The

XI. The WATRY MUCILAGINOUS. The five Emollisment Herbs, Marsh-mallow, common Mallow, Beet, Mercury, Violets. The four Cordial Flowers, Borage, Bugloss, Roses, Violets. The four great cold Seeds, of Citruls, Cucumber, Gourd, Melons. The four less cold Seeds of Succory, Endive, Lettice, Pursain. The white Poppy-Seeds, Liquorice, greater Comfry, Strawberrys, Vine-Leaves, Vipers-Bugloss, Jews-Ear, Selfbeal, Spotted Lungwort, Elm Bark and Leaves, Scorzonera-Root, Mulberries, Sebestens, Jujubs, Figs, Pulp of Cassia.

Juice of Liquorice, English and Spanish, Three-pence and Two-pence the Ounce. Scorzonera-Root, Sebestens, Jujubs,

Pulp of Cassia, may be reckon'd at the same Price.

XII. The WATRY BITTER. Wild Succory, Fumitory, Burdock, Dandelion, Pellitory of the Wall, white Mullen, the

great Houseleek, Brooklime.

Gum Arabick, of Cherry Tree, Sarcocol, Dragons-Blood, are given to the same Purposes, and to incrassate the Blood, by mixing their gummy Parts with it. The last is one Shilling the Ounce, the other are One or Two-pence.

XIII. The SWEET OYLY. Oyl of fiveet Almonds and of Linfeed, at Three-pence the Ounce, and Oyl-Olive of Two-pence. Barley, Oats, &c. to be boil'd in Spring-Water.

The Fats and Marrows and Sperma-Ceti, are us'd outwardly and inwardly to the same Purposes. The Dose of the last

will be a Penny.

The vegetable Vomits are Elder-Bark decocted. The Decoction of Carduus. The Infusion of Squils in Wine. The Leaves of Asarum juic'd or boil'd.

The Root Ipecacuana, the Dose of which is now fold for

Three-pence.

The Purgers. Manna, at Eight-pence the Ounce, the cominon Dose is double that Quantity, and is the dearest Medicine us'd in Physick. Cassia, Four-pence the Ounce.

Spring Water to as good purpose, is One-penny the Dose.

Mechoacan, at Four pence the Ounce makes many Doses, at

the Expence of one Farthing.

Rhubarb, fold at three Pounds ten Shillings the Pound, &c. but the Dose in Powder to Children is of the value of Two or Three-pence.

Sena, at Six-pence the Ounce, when taken in Powder,

makes the Dose less than One-penny.

Falap,

[tr]

Jalap, at One-penny the Dram, makes three Dofes.

Scammony, corrected, and then term'd Diagrydium, at Four-

pence the Dram is sufficient for fix Doses.

Shillings the Dram, the Dose being of few Grains is of low value.

After the Plant syou may take a View of the Medicines that are taken from Animals. The Shells of Fishes, Crabs-Eyes and Crabs-Claws, Cuttle-Fish, Pearl, Mother-of-Pearl, Oyster shells and Egg shells. The Shavings of Hartshorn and Ivory, and both calcin'd, and the Crabs-Claws and the Mother-of-Pearl, and the others, are of the lowest Rates, that One-penny purchases many Doses. If the Crabs-Eyes are Twelve pence the Ounce, One-penny affords the Dose.

The Bees, Millepedes, Snails, and Earth worms, are bought in the Market as cheap as the Herbs. The Cantharides, as One-Shilling the Ounce, do not raise the Price of the Blister-

ing Plaister above Three-pence.

The Sea gives us the white and red Coral, and Coralline to the same Ules, as Pearl. At Six-pence the Ounce, the Dose

will be about two Farthings.

The Earths are Bole Armoniac, Chalk, Lemnian and Samian-Earth, Ocher, Lime, Irish-Slate. Their Prices are of the lowest Degree, many Doses not making the Expence of a Farthing.

The Salts are Nitre, Vitriol, Alum, Salt Armoniac, Boras.

Amber and Sulphur, and the Stones, the Blood stone, Calamy-stone, are of the lowest Value, only Amber may demand two or three Farthings for its Dose. Antimony at eight Peuce the Pound. Iron and Copper and Lead and Tin, will give their Filings, Verdigreece, Tutty, Litharge, Ceruss, Minium, and the other Preparations at less than one Farthing the Dose. Quick silver, at Six pence the Ounce. The Cinnabar made in Imitation of the Natural is Nine-pence the Ounce. This admir'd Medicine shall make its Dose for One or Two-pence

PREPARATIONS

GALENICAL and CHYMICAL, now in Use; with the Prices in the Apothe-cary's Shop.

ANY are to amuse the People, and support their Reputation by the Rates they are valued at when mixt; and hid from the Knowledge of the Patient in the Dose, and cover'd by the affected Encomiums of the Terms of Art in the Bill.

The SIMPLE WATERS. Of these Waters one hundred and sifty are appointed to be Distilled. The greatest Part of them are not now prepared. The Physicians are very often passing their Censure upon them, that they are of no Use, but to increase the Bulk of the Julep with the Hot and Compound Waters. The Milk Water is now usually order'd for that Design, and because as much Money can be procur'd from the Patient from it, as from all the vast Varieties of the Others, this in the usual Practice almost supplies the Place of all the others.

They corrupt in a little Time, which they discover by their being musty or mothery: Others are kept open and unstop'd, and presently lose all the small Virtues they are pretended to have, at their first drawing. They are as Cordial and Spirituous, as the Water stagnating in the Ditch, or as dead Beer, or Wine, which has some Months been

expos'd to the Air.

All the bitter and restringent Plants cannot communicate any Virtue to the Water, for these Qualities are not to be forc'd to rise in these or the Hot Waters; as Rhubarb, Aloes, Jalap, or the Jesuits Powder, will not give a Water impregnated by Distillation with their Purgative or the other Qualities.

The cooling Acid Plants will not make the Water of any. Use to cool or extinguish the Heat of Fevers. The Water will be heated by the Fire, and cannot pretend to equal the Water from the Spring.

The Mucilaginous-Plants have their Gelly broken by Di-Ailling, and are as useless, as the formerly pretended Waters from T 13]

from Snails, or Vipers, or from the Flesh of Capons and Phea-

fants.

As they are not able to preserve themselves many Months, they are by being Elementary and Simple without Mixture ungrateful to the Stomach, vappid and palling to it. They remain there crude and oppressive, and cannot afterwards move themselves from the Blood either by Sweat or Urine.

The Aromatick and Acrid, and the Hot Scorbutical Plants, and the Fetid will make the Simple Water taste a little of those Qualities. But they are an Amusement and Imposition, which shall be more fully treated of in another Place, and do not equal either in Smell, Taste or Virtue, the Tinsture of these Plants made by Insusan either Cold or with Heat,

in the Water of the Spring.

The late corrected Dispensatories of Holland and Paris advise but sew Simple Waters, as of Carduus, Fennel, Hyssop, Marjoram, Baum, Spear Mint, Parsty, Penny Royal, Rue, of the Flowers of Lavender, Roses, and the Lime Tree. If you add Orange Flower-Water, of Camomil Flowers, of Cowslips, Elder-Flowers, Meadow-Sweet, Black Cherries, Mugwort, you will have a large Collection to please your Fancy in Compounding Juleps; but the Stomach, the Blood and Spirits shall be better pleas'd and strengthed with the Insusions or Tinestures made in the Water of the Foun ain.

The Simple Milk Water may be drawn sweet and well scented at any Time of the Year, to serve as a Vehicle for the other Waters of the stronger Sorts, or to receive any

Spirits, Tinetures, or Oyls diffelved in Sugar.

The Price of all, except two of them, is very low, be-

ing bought at Six pence the Pint.

The Compound Waters. There are Twenty eight appointed. Whereof there are now in Use those of Gentian, Worm wood, Angelica, Horse Radish, Peiony, Plague Water, Hysterical, Mirabilis, Steven's, of the Earth worms, Snails, Treacle Water, the Bezoardick, and of Lavender. They are sold in the Shop at Two Shillings the Pint, except the two last at a greater Value, but you may compute your Expence, if you will Charge your self with more than one Penny at a Time, by the Number of the Ounces you will take.

They

[14]

They are now made of the Spirits of Molasses or Mali, instead of Spirits of Wine, the Differences of which are not yet fully determin'd, but they give you no Part of the Virtues of many of the Ingredients, and of the others only a small part of the Oyl, which divided by the Spirits of fends the Stomach, and make the Wind and Flatulencies the Waters are taken for and pretended to subdue.

The Spirits. They are the Spirits of Molasses and Malt distilled from Wormwood, and Angelica; Baum, Mint, Rosemary Flowers, Clary, Caraway Seeds, Juniper-Berries, the

Peels of Citrons, Oranges and Lemons.

They are fold at Two-Shillings the Pint, and warm the Julep and the Stomach in small Quantities. But the Tincture of them in Simple Milk-Water or Wine or the Spirit of Wine, will afford a Cordialness, which will revive the Spirits and the Blood, and support the Stomach much longer, and prevent the necessity of returning so soon to the Use of them.

The TINCTURES. The Tinctures of Saffron and Cafor are fold, the first Six-pence, the other One Shilling the Ounce, in which there are Five hundred and fixty Drops, which discovers the Price of twenty, thirty or forty Drops.

MEDICATED WINES. The Steel Wine at Three-shillings

the Pint, the others are disus'd.

The Vomitive Infusion at the same Price.

MEDICATED VINEGARS. There are Seven appointed but they are now neglected, because the strong Acid of Vinegar depresses and destroys the Virtues of the Aromatick and Volatile Plants, and is of a Quality directly opposite to the Plants, which overcome the sharp Humours in the Stomach, and raise the Heat and Ferment of the Blood.

DECOCTIONS. The Decoction of Epithymum, and the Traumatick or Vulnerary, are not now effected, the latter giving Place to the Decoctions of the Woods, in which fewer

Ingredients are prescrib'd to better Purpose.

The common Decoction for Glysters is made of the most

common Herbs and Flowers and Seeds.

The Pectoral Decoction is made of the cheapest Ingredients, as is the Purging Decoction of Gereon, and the Stomachick bitter Infusion without, or Purging with Sena. The trouble of the boyling makes in these the greatest Pretence to the Price.

The

The SIMPLE ALTERATIVE SYRUPS. There is a large Rabble of about Forty of these brought together, Use has dis-

banded the greatest Part of them.

They are hardly allowable in the Practice of Physic, being made of Sugar, which is clogging and windy in the Stomach, fermentative in the Bowels, and the greatest Corrupter of the Blood, even in Health, if too often us'd.

They are recommended for this Reason, that a Powder or other less pleasant Ingredient may be cover'd, and better swal-

low'd in a Syrup.

Their foftness and sliminess makes them tolerable in small Quantities in the Distilling sharp Catarrhs, and the fresting of the Salts or Gravel in the Kidneys and Bladder, but there are other Medicines more beneficial and less injurious, than Syrups will prove if too long continued.

The Heat of the Fire evaporates and wasts the Virtues of the volatile and finer Parts of the Cordial and Spirituous

Simples.

The Effects of the Bitter Medicines are destroyed by the

Sweetness of the Sugar.

The Astringent are made of no Use from the Laxative and

Purging Qualities of the Sugar.

The stronger Acids and the stronger Mixtures of the Spicy and Aromatick will retain their Tastes and their Powers; but all the other are overcome and subdued by this vegetable Salt, as the Flesh is corroded, and wasted by lying (in the long Voyages) many Months in Salt.

There are now in Use, Rasberries, dry'd Roses, Ground-Ivy, Vinegar, Barberries, Maiden Hair, Clove-July-Flowers, Red-Poppies, Pomegranates, Quinces, of the Juices of Citrons,

Oranges, Lemons and their Peels, Cinamon, Coral.

They are us'd in Juleps to give the Colour, but the Eye of the Attendant is more pleas'd than the Palate or Stomach of the Patient, who, especially in Fevers, nauseates the sulsome

Sweetness of many of them.

They are fold at Four Shillings the Pint, except Coral, Cinamon, Quinces which are something dearer. You may observe, there are Thirty-two large Spoonfuls in a Pint, and consider how many you will take to make the Expence troublesome to you.

The COMPOUND ALTERATIVE SYRUPS. Of these there are Forty prescrib'd, but Twelve now retain in Service.

viz. of Gum Ammoniack, Mugwort, Betony, Quinces, Jujubs, Poppies, Baum, Mint, Myrtle-Berries, Mousear, Peiony, and

of the five Roots.

They are as useless, and are as hurtful as the Simple Syrups, and may have good Effects, when they are given with another very good Medicine.

They are fold at the same Rates with the other.

The PURGING SYRUPS. There are Ten Compound purging Syrups appointed, which with many of the Simple

have given Place to two or three.

Most of them lose all their Virtue, before the Seasons of making them return, as the Syrup of Peach Flowers, and Roses-purging, and Violets: The powerful Qualities of the Buckthorn support it against the Sugar. This is fold at two Pence the Ounce, as the Roses and Violets are at three Pence, and that of Peach Flowers fix Pence, as of Rhubarb, when the Price is dear. But this of Rhubarb, and the Syrup of Sena, which may be made at all Seafons, will make the other, which are more corruptible, unnecessary and disas'd.

The Honies. There are Sixteen of these; but we only use that of Rasberries and Roses in Gargarisms, and the Simple

Oxymel, and with Squills at three Pence the Ounce.

JUICES EVAPORATED TO THE CONSISTENCE OF HONEY. There are Twelve of these Robs, but that of Quinces and Elderberries are at this Time only esteem'd. Prices as of the Syrups.

Lohocs, There are Nine of these Mixtures made with Syrups and Honey, but the Healing Lohoc only retains its Use.

The Price about two Shillings the Pound.

ROOTS, AND PEELS, AND FLOWERS CONDITED. A very large Catalogue of these is order'd to be preserv'd by Sugar, but this belongs rather to the Confectioners Trade, of whom they are all usually bought. The Physicians advise them chiefly to cover an unpleasant Medicine. The Sugar destroys the Virtues of all of them, which are not strongly tasted or Aromatick. Those of most Use are Eryngo-Roots, Angelica, Elecampane, Ginger, Zedoary, the Peels of Citrons, Oranges, Lemons, and some of the Seeds.

The Prices do not much exced the Value of the Sugar.

When you Estimate their Use in Physic, you must obferve how much of the Flavour, or Taste remains.

The

[17]

The Conserves. Of the Forty-eight, these only have any Value at this Time, viz. of Wormwood, Scurvygrass, Eyebright, Flowers of Betony, Borage, Marigolds, Clove-July-Flowers, Rosemary, Cow-slips, Damask and Red Roses, Sage,

Lilly of the Vallies.

The Herb or Flower is only the fourth Part of the Mixture. When you have consider'd after Tasting it, how long the tender Flower shall retain any Goodness, when it has lain salted in so much Sugar, you may judge if they are as useful, as they are dear. You may purchase any one from one Penny to two Pence the Ounce, except Rosemary-Flowers, and the

Lilly of the Vallies at four Pence.

There are some Authors, who have accus'd all the Medicines made with Sugar, and earnestly argued their Expulsion or Banishment out of all the Dispensatories. It would prove a very difficult Task to answer the Arguments of that Side, and defend the Syrups, either Simple, Alterative, or Compound, or Purging, or the Condited, or the Conserves, from being concluded Superstuous and Useless, except in the little Qualities, when they are Vehicles to receive and convey the good Medicines with less Disgust through the Mouth into the Stomach.

SUGAR OF PEARL. It may be only observ'd, That in a

Dram of it, there are only three Grains of the Pearl.

The Powders. There are Prescriptions of Thirty-three Powders. The now us'd are the Aromatick with Roses, about fix Farthings the Dose. The Gascoin-Powder, worth about two Farthings the Dose, if you take it without Bezoar and Pearl, which add nothing to its Virtue, and to its Price only three or sour Pence.

The Powder of Arum Roots, at one Penny the Dose, as is the Compound-Orrice. That of Ambergrease is four Pence or fix Pencethe Dose, but when its appointed without the offen-five and disturbing Persume, one Penny the Dose. The Powders of Gum Tragacanth, and the three Sanders, and Haly, are made almost of the same Ingredients, to which Sander-Powder may be added on Occasion, and are worth one Penny the Dose.

The Purging Powders. They are made of Sena, and the Spices to warm the Stomach, and are pretended to prevent Griping, but the Value of the Sena is not more than two Farthings the Dose, and the Spices are of equal Dearness, with those of the Kitchen. Of the five Purging Powders on-

The state of the s

Ly

ly one is of general Use, the other are either little different, or may be improv'd with Diagrydium in the Proportion judg'd necessary. The Powder is one Penny the Dram.

The Warwick powder may be Vomitive when kept too long from the Diaphoretick Antimony, and is worth one

Penny the Dram.

The ELECTUARIES. Of Twenty-seven, none are us'd but the Confection of Chermes, the Dose three Pence: Of Sassafras, the Dose below a Penny: Of Bay Berries, at two Farthings: Of Hyacinth, an absurd Composition of Stones, three Pence. The Treacle of the Four Ingredients, below one Farthing. Venice Treacle, Diascordium, Mithridate, London-Treacle, Philoneum Persicum, and Romanum are but one Penny the Dose, or about six Pence the Ounce.

ELECTUARIES PURGING. Of the Twenty-five, Seven are retain'd. Caryocostinum is fold at six Pence the Ounce. Diaprunum, at three Pence. Catholicon at the same; as Hamech and Lenitive, and of the Juice of Roses. Hiera Picra, at eighteen Pence the Ounce, that is in the Dose about two or

three Farthings.

Purging Pills. There are the Receipts of Thirty three. The Aleophangine, Aloes-Rosata, the greater and lesser Cochy-Pills, of the Iwo Ingredients, the Fetid, Mastich, of Rudius, Russus, the Stomach with the Gums, of Amber and of Tartar, are sold at sour Pence the Dram, and at the lowest Price in a larger Quantity.

The OPIATE PILLS. The Styrax-Pills and Laudanum are of the lowest Value; the first of five or ten Grains, the other of one or two make the Expence of two Farthings.

The TROCHS. They are defign'd to preserve the Powders they chiefly are made of, from exhaling their Vertues. They are mixt with Gums diffolv'd, or Syrups or Sugar difsolv'd. Of the Thirty two the White and Black are sold at two Pence the Ounce: The white Trochs of Rhases, at one Penny the Dram. Of Winter-Cherries, Amber, Gordonius, Myrrh, Hysterick, at two Pence the Dram.

OYLS BY EXPRESSION. The Oyl of Sweet and Bitter

Almonds, and Linseed, are three Pence the Ounce. Of Mace, Nutmegs, are four Pence the Dram.

SIMPLE OYLS BY INFUSION AND DECOCTION. Of almost Forty the present Practice contents it self with the Oyl of Roses, Wormwood, Camomil, St. Johnswort, Jasmin, Earth-

[19]

worms Myrtleberries, Water Lillies, Rue, Savin, Elder-

Flowers, which are fold at two Pence the Ounce.

The COMPOUND OYLS. Of Twenty-three two only remain in Use, the Exeter and Compound St. Johnswort, at two Pence the Ounce.

Lucatellus's-Balfam, at four Pence the Ounce, makes the

Dose two Farthings.

Balsamum Polychrestum, at eighteen Pence the Ounce, if the Sarsa shall be rejected as an useles Ingredient, the Gum Guiaci being a very cheap Medicine will afford the Dose at one Penny.

The Unguents. Of Thirty about Twelve are us'd, at

the Rate of two Pence the Ounce, some more.

The MORE COMPOUND OINTMENTS. Of Twenty-five,

Seven are made and fold at the same Price.

PLAISTERS. There are Fifty-one prescrib'd, but only Sixteen are thought useful or necessary. They are fold at two Pence the Ounce, except the Blistering Plaisters at three Pence, and the Oxycroceum at eight Pence.

The OYLS BY DISTILLATION. They are of Wormwood, four Pence the Dram: Of Marjoram, of Mint, of Sage and Savin, eight Pence the Dram; of Rue, Lavender, Camo-

mil Flowers, at one Shilling and fix Pence the Dram.

The Oyl from the Seeds of Anise, Caraways, Fennel, Juniper-Berries, are three Pence the Dram. Of Cloves eight Pence.

The Oyl of Rhodium, at three Shillings the Dram, of Saf-Safras three Pence the Dram; of Cinamon two Pence a Drop. The Oyl of Guiacum is fix Farthings the Dram, of Amber

two Pence.

The Dram of Oyl contains one hundred Drops. They are very Volatile, Hot, or rather a Flame Condens'd; and they are therefore advis'd in Boles or Juleps, being dissolved by Sugar in the small proportion of one, two or three Drops.

The Doses therefore of all these Oyls except that of Cinamon are of the lowest Value imaginable: You may use them

often within the Expence of a Penny.

You may run over the vast Numbers of these Galenical Preparations and Compositions, as they are improperly styl'd. They are almost Seven Hundred, to be kept till they corrupt, and be view'd as the old rusty and rotten Weapons of an antient Armory. They are now reduc'd to, and the Shop is lupfuppos'd to be made up with about one hundred and fifty. But if the infipid Simple Waters, and the fiery ungrateful Compound Waters thall be thrown afide; and fimple Milk-Water, with five or fix Cordial Tinctures shall be kept for Use, and the other Tinctures appointed by the Physician, with Respect to the Circumstances of his Patient. If only three or four Syrups, and Conserves, and Powders, and Pills, and Oyls, and Ointments, and Plaisters in that Number, in Imitation of the Prudence and Integrity of the Foreign Physicians, who have contracted their Dispensatories, shall be order'd in the most rational and efficacious Forms, to receive the Additions of all the natural Powders, Balsams, Gums, or the Chymical Medicines; The Apothecary will have his Trouble and Expence very much lessen'd, the Patient will have his Diseases much sooner cur'd, and his Life much better preserv'd.

The CHYMICAL MEDICINES. They are the Remains of a prodigious Number of Chymical Preparations, which have been, after they had deluded and destroy'd the greatest Numbers of the Afflicted with all the different Distempers,

referv'd as the most Innocent or the most Useful.

They are of great Use in the Hands of a Physician, who knows what Effects they will have in small Doses on the Sto-

mach, the Spirits and the Blood.

Their Uses are very considerable to amuse the Minds of the People, with an assur'd Expectation of Relief from the magnificent pretended Powers of the Preparations by Fire against all the Feebleness of the Spirits, and the last concluding Coldness of Death. And their Titles are very necessary to keep up the Fallacy of the Dearness of Medicines: Every Chymical Grain or Drop are the Bezoar and the Pearl, to deceive the People into an Opinion of their Value.

But you will be able to comprehend. That the Price of the Dose of Manna will furnish you with Twenty Doses of many Chymical Medicines, and those too the most valued and ad-

mired for their Goodness and Effects.

The Spirits and Tinctures afford from the Ounce four hundred and fifty Drops. If they are advis'd to Ten, Fifteen, or Twenty Drops in one Dose, you will discern, whether your Cost rises to the Value of a Farthing.

The SPIRITS. Spirits of Hartshorn. One Shilling the

Ounce.

The Volatile Oleofe Spirit, the Spirit of Salt-Armoniack

Distill'd with Salt of Tartar, the same Price.

The ACID SPIRITS. The Spirits of Nitre, Salt, and Vitriol, and Sulphur Plain, and the Spirit of Tartar, are each fix Pence the Ounce; or Dulcified one Shilling.

The VINOUS SPIRITS. Spirit of Wine rectify'd, three

Pence the Ounce.

Hungary-Water, and the Spirit of Saffron, and that of Ca-

ftor, one Shilling each the Ounce.

The TINCTURES. The Tinctures of Castor, Saffron, Steel, Salt of Tartar, the Elixirs Proprietatis, are of one Shilling the Ounce.

The Tinctures of Myrrh, Balsam of Sulphur with Turpentine, and the Sacra with Spirit of Wine, are but eight

Pence the Ounce.

The Tinctura-Sacra, with Sherry or White-Wine, are

three Pence.

The Tincture of Opium, or Liquid Laudanum, with Spirit of Wine or Canary, are of the Value of one Shilling the

Ounce, and a Penny the Dofe.

The VOLATILE SALTS. Are of Hartshorn, Sal Armoniack, and Amber, at one Shilling the first, and six Pence the second the Ounce. The last is of one Shilling the Dram. If the Dose in this shall be two Pence, the two other may be

computed at two or three Farthings.

The PLOWERS. Those of Sal-Armoniack, are one Shilling the Ounce. Those of Sulphur one Penny. Those of Benjamin two Shillings the Dram. The Dose of the last may be four Pence, of the first one or two Farthings, the other as the greatest Part of the most useful Medicines, afford many Doses at the Expence of a Farthing.

The FIXT SALTS. The fixt Salt of Tartar fix Pence, and Wormwood and Broom, are at one Shilling the Ounce, and are

of the Number of the Penny Dose.

Calcin'd Hartshorn and Ivory, may be plac'd with those at one Penny the Ounce, the latter at thrice as much. They make the white Decoction, which can be lessen'd in its Value, from no other Regard but its Cheapness.

The SALTS. Nitre purify'd and sal Prunelle, at one or two Pence the Ounce, makes the Dose very much below a

Farthing.

The Salt of Vitriol at nine Pence the Ounce, makes the Dose about one Penny.

Creme

[22]

Creme of Tartar, at two Pence the Ounce, is one of the Farthing Doses.

The Salt of Lead, at one Shilling the Ounce, is in the Dofe

very cheap, being given to eight or ten Grains.

The Tartar Vitriolate is fix Farthings the Dram.

The Tartar with Steel, at one Penny the Dram, serves for three Doses or more.

The EXTRACTS. That of Bark, is fix Pence the Dose. That of Saffron, about fix Pence. Of Gentian, Centry,

three Pence the Dram.

The RESINS. Those of Jalap and Scammony, at nine Pence the Dram, the fixth part of which may be the Dose, but the Resin of Guiacum is cheaper.

The PREPARATIONS OF ANTIMONY. Bezoar mine-

ral at nine Pence the Dram, or two Pence the Dofe.

Diaphoretick-Antimony, at two Pence the Dram, makes

three Doses.

Emetick-Tartar, at one Penny the Dram, makes fix or eight Doses.

The Powders of Mercury. Æthiops mineral, at

two Pence the Dram, makes five or fix Doses.

Cinnabar at two Pence the Dram, makes four or fix Doses. Calomel or Mercurius dulcis, at two Pence the Dram, makes three or four Doses.

The White Precipitate, and the Red, and the Turbith, of two, three, or four Pence the Dram, make about eight or ten

Doses.

The Powders of Steel. Steel prepar'd with Vinegar, or with Sulphur, three Pence the Dram. The Doses of all which are not of many Grains, or of the Value of one Farthing.

The Preparations of Tin, Lead, Copper, are of the vilest

Prices.

These Simples and Preparations may be join'd and mixt together by any careful Hand, and some innocent Vehicle rendred pleasant to the Stomach, although no Apothecary be at Hand.

A fmall Collection of

PRESCRIPTIONS

Which may be Compounded by the Family.

The Proportions of the Ingredients are not set down, because that must be regulated according to the Age and Constitution of the Patient.

A CEPHALICK DRAUGHT. Water of Black Cherry, of Rue, Peiony Compound, with Tincture of Castor, and Spirit of Lavender, make a Haustus to excite and actuate the Spirits. The Expence two Pence.

A CARDIAC HAUSTUS. Baum-water and Barly, Cinnamon and Plague-water, make a Draught to raise the Mo-

tion of the Blood.

An ALEXITERIAL HAUSTUS. A Milk-water with Tincture of Saffron, and the Tincture of Contraverva, to

support the Spirits and Blood in malignant Fevers.

An ANTI-FEBRILE HAUSTUS. Damask Rose-water, Rhenish-wine, Juice of Orange, with Cinnamon water; to temperate the Heat in Inflammations and bilious Fevers. These may be valued at one or two Pence a-piece.

To the same purpose Spring-water boiled, Syrup of Violets, or Wood-Sorrel, with some Drops of the Spirit of

Sulphur; at a lower Price.

A RESTRINGENT HAUSTUS. The Decoction of burnt Harts horn, Mint-water, Cinnamon-water, Syrup of dry'd Roses, Diascordium, make a Draught to moderate the violence of Diarrheas.

Milk-water, Barley, Cinnamon compound, Gentian and Wormwood, Syrup of Lemons, and Salt of Wormwood, with

Liquid Laudanum, to cure violent Vomitings.

A

A Milk-water, Penny-royal, Hyffop, with Tincture of Liquorice and Saffron, and Oyl of Aniteeds diffolv'd in Sugar, to allay the hot sharp Defluxions. These do not exced the Price of the former.

Red Poppy-water, and the Syrup with Sal Prunellæ, to allay the Thirst and to abate the Pain in Pleurisies, of the

lowest price.

Elder-flower-water, Gentian and Earth-worm-water, Tincture of Salt of Tartar, Spirit of Scurvy-grass and Elixir Proprietatis tartariz'd, to correct the acid Humours of the Stomach.

Sherry, Mirabilis water, Syrup of Quinces, Oyl of Cloves and Nutmegs, with Venice-Treacle, to strengthen the Stomach in Vomiting and Loss of Appetite, the Dose one or two Pence.

A Milk-water, Oxymel of Squills, to cool the Heat of the

Blood, and promote Expectoration.

Juice of Chermes, Syrup of Clove-July- Flowers, Oyl of Nutmegs and Cloves, mixt with Sugar, make a Mixture to

be taken to one Spoonful, to revive in Faintings.

Cinnamon-water, Syrup of Myrtles, Bole Armoniack, Diafcordium, Oyl of Cloves and Laudanum, to strengthen the Bowels, compose the Disorders of the Spirits, and by opening the Pores divert the Humours in violent Purgings.

Red Coral powder'd, Salt of Wormwood, and Juice of Lemons, with strong Cinnamon-water, against the most violent Vomitings, two or three Spoonfuls is the Dose. The Expence

in these will be about a Penny.

MIXTURES. Water of Lime-tree flower, Syrup of Stechas, Diascordium, Spirits of Sal Armoniack, to repress the violent Disorders of the Spirits, and discuss the Flatulencies in Convulsive Cases.

Tincture of Afafetida, of Galbanum, and Castor, and Spirit of Sal Armoniack, or Harts-horn, Oyl of Amber; make a Mixture, of which twenty or thirty Drops to be given in the

hysterical Disorders.

Oyl of Juniper-berries diffolv'd in the Yolk of an Egg, with Balfamick Syrup, one spoonful to be given in Colicks, for the Stone or Gravel, to compose the flatulent Convulsions of the Intestines, and cleanse the Kidneys and Ureters.

Oyl of sweet Almonds, Syrup of Althea, Barley-water, Sal-Prunellæ, to correct the pungent salt Humours, and give

a more free Passage to the Urine.

F 25]

Spirits of Scurvy-grass, of Compound Lavender, of Castors Elixir Proprietatis tartaris'd, chymical Oyl of Sassaphras, Nutmegs, Cloves. Thirty Drops in a proper Wine to attenuate the Blood, give a stronger Motion to the Spirits, and remove the Obstructions of the Nerves. The Dose not above a Penny.

BOLES. Gascoin Powder, Saffron powder'd, Syrup of the Rinds of Oranges, if without Pearl and Bezoar, the price may

be two pence.

Extract of Steel, Balm of Gilead, Conserve of red Roses, to strengthen the Stomach, and make the Blood more florid. The price two pence.

Rhubarb, Oil of Cinnamon, Diascordium; the fam'd Me-

dicine in a Diarrhea. This may be valued at four pence.

Powder of Jalap, Mercurius dulcis, Oyl of Anise-Seeds, Lenitive Electuary, the most efficacious Purge, at two or three pence.

Root of Firginia Snakeweed powder'd, Venice-Treacle, Oyl of Nutmegs, Liquid Laudanum, the most Alexiphamack

Sweetner, at two Pence.

The Conserve of red Roses, of Quinces, of Nutmegs condited, Syrup of Chermes, Syrup of Coral, Crocus of Steel, to prevent Abortion, at two pence.

Conserve of red Roses, Diascordium, Bole, Dragons-Blood, Pomegranate-Flowers, Syrup of dry'd Roses, to the same

purpose, at one Penny.

Mr. Boyles, of the Seeds of white Poppy, of Henbane, Syrup of red Poppies, and Conferve of red Roses, to mollify and incrassfate the sharp thin Serum in spitting of Blood; two or three of these Boles are one Penny.

Conserve of Rue, Venice-Treacle, Camphire, Oyl of Amber, in the disorder'd Motions of the Spirits, the Dose one Penny.

The Conserve of the Rind of Oranges, Ginger condited, Sassaphras Electuary, the Syrup of Chermes, chymical Oyl of Nutmegs, to warm and corroborate the Stomach, and raise the Motion of the Blood, the Dose one Penny.

Peiony Root powder'd. Cinnabar of Antimony, Nutmeg condited, compound Syrup of Peiony, chymical Oyl of Rose-mary or Sage, to confirm and raise the Spirits, the Dose two

Pence.

Conferve of Wormwood, Crabs-Eyes, Chalk. Oyl of Mint, D Syrup Syrup of Quinces, to correct the Crudities of the Stomach,

when it nauseates or vomits, the Dose one Penny.

Conserve of red Roses, the common, Balsam of Sulphur Terebinthinate or with Anise-Seeds; in Catarrhs, when salt and sharp, the Dose one Penny.

Conserve of Rosemary-flowers, Ginger condited, Millepedes powder'd, Orris-roots, Honey, to move the thick viscous Phlegm, and promote Expectoration, the Dose one Penny.

Sena powder'd, Creme of Tartar; Pulp of Prunes, Syrup

of Roses solutive, the Dose one Penny.

Conserve of Wormwood, Scurvy-grass, Ginger condited, Rust or Steel powder'd, Oyl of Cloves, or Sassaphras, Syrup of Orange Peel, to raise the Blood in Cachectical Diseases, the Dose one Penny.

The Jesuits Powder, Japan Earth, Balsam of Peru, Oyl of Nutmeg, Syrup of red Poppies. In Agues, the Dose two or

three Pence.

Conserve of Scurvy-grass, the Pulp of Currants, Arumpowder compounded, Winterane-Bark, Oyl of Sassaphrass, Syrup of Elder. In the cold Scurvy, to invigorate the Blood, and expell its Impurities by Perspiration and Urine.

Conserve of Hips and Wood-sorrel, red Coral powder'd with Ivory, and Harts-horn, Salt of Tartar, Syrup of Coral. In the hot Scurvy, it temperates the Blood, the Dose of these

one Penny.

Vomits. The Emetick Infusion, or Turbith Mineral, or the Emetick Tartar with a Syrup, are each but one penny

the Dofe.

PILLS. The Pills of Ruffus, Rudius, Tartar, and Cochy may be improved with Calomel, Refin of Jalap and Scammony, and aromatized with two or three Drops of a chymical Oyl, at the lowest Expence in the Dose, of one or two pence.

Fetid Pills, Refin of Jalap, Castor, Salt of Amber, and Oyl of Amber, Spirit of Lavender compounded, to make Revulsions from the Brain in Lethargies, Palsies, &c. The Dose of these may be three pence.

The Pills of the two Ingredients, with Mercurius dulcis Laudanum and Diacodium. In Colicks, in the obstinate stop-

page of the Intestines, the Dose two pence.

Gambogia dissolv'd in Vinegar, Oyl of Juniper, Mithridate. In the Dropsy of the Belly, the Dose one penny.

Bole Armoniack, Dragons-Blood, red Coral, Amber, Mastich,

[27]

Mastich, Crocus of Steel, Oyl of Cinnamon, Turpentine. To cure Fluxes of the Bowels, and give the Blood a more firm Consistence. The Dose two Pence with the Oyl, without

it many Doses at that Rate.

Millepedes, Gum Ammoniack, Flowers of Benjamin, Saffron powder'd, with Balfam of Peru, made up into a Mass of Pills with common Balfam of Sulphur to be us'd in Chronical and Scrophulous Coughs. The Dose may be valued at two pence.

Gum Ammoniack, Aloes, Steel in Rust, or prepar'd with Juice of Lemons, Oyl of Anise seed, Elixir Proprietatis to make up the Mass. They remove the Impurities from the Stomach, and make Blood more Balsamick and Florid. The

Dose at one penny.

Root of Virginia Snakeweed, Contrayerva, Camphire, made into Pills with Diascordium, to be us'd in malignant Fevers.

Many Doses do not cost one penny.

Crabs Eyes, Sal-Prunellæ, Salt of Amber, Mustard Seed, Oyl of Anise-seeds with Turpentine, to cleanse the Urinary Passages of Gravel. The Dose without the Salt of Amber will be a Penny, with it four pence.

Camomil Flowers, Diaphoretick-Antimony, Salt of Wormmood, Gum-Tragacanth dissolv'd in Camomil-Water to make Pills of Use in many intermitting Fevers. Many Doses

cost not one penny

Flowers of Sulphur, Juice of Liquorice, Sugar-Candy, Balfam of Sulphur; are Poterius's fam'd Pills in sharp and

thin Catarrhs. The Dofe not a Farthing.

Savin powder'd, Dittany of Crete, Myrrh, Galbanum, Gum-Ammoniack, Asta-Fetida, with Syrup of Mugwort made into Pills, to revive the Motion of the Blood, and promote its Despumation. Many Doses cost not one penny.

Cinamon, Nutmegs powder'd, Cloves, Volatile Salt of Sal-Armoniack, Oyl of Amber, made with Sprup of Chermes into Pills, to support and raise the Spirits in Faintings. The

Dose one penny.

PURGING POTION. Jalap Root powder'd, Ginger, Creme of Tartar in White-wine, with Syrup of Buckthorn, worth

two pence, befide the Wine.

The PURGING SYRUP OF RHUBARB. Rhubarb powder'd one Ounce, Cinamon, white Tartar, each one Dram, infuse them twenty four Hours in half a Pint of Spring water,

D 2

ftrain

strain it and add half a Pound of Sugar, to be gently heated

into a Syrup.

The Purging Syrup of Sena. Sena two Ounces. Anife-feeds and Rhenish-tartar each half an Ounce, Spring-Water one Pint. Insuse them twelve Hours, then boil it gently, strain it and add one Pound of Sugar to be heated into the Syrup. The Cost of this will be about eight Pence; of the other, as the present Price of Rhubarb.

BALSAMICK TINCTURE. Balm of Gilead, of Capivy, of Toulu and Peru, with Spirit of Wine, dissolve them in a moderate Heat. The Dose is thirty Drops in a proper Liquor, to heal the Lungs and the Passages to Urine, when corroded

by the Saltness of the Humours.

Juice of Liquorice one Ounce, Cochineal two Scruples, to be digested in a Quart of Canary, to promote the Expectoration of Phlegm. Your Ingredients will cost you six pence.

Gentian Root four Ounces, a Quart of Canary. The Infufion strengthens the Stomach, and removes Cholical Pains, the

Gentian costs four pence.

Sena three Ounces, Rhubarb one Ounce, Scammony a Dram and half, to be infus'd in two Quarts of Spirit of Wine.

Rhubarb two Ounces, to be infus'd in a Quart of Canary or

Spirit of Wine. The two fam'd Medicines in Cholicks.

INFUSIONS IN WINE. Of Sena two Ounces, Tartar three Drams, White-wine a Quart, with four Ounces of Spi-

rits of Wine. Purging. The Ingredients fix pence.

Two Ounces of Filings of Steel, the Juice of eight Lemons and Oranges; after twenty four Hours Infusion, add two Quarts of White-wine, with half an Ounce of Cinamon, two Drams of Cloves, one Dram of Mace. For opening Obstructions.

The Roots of Elecampane, Turmerick, Sugar and Currants each four Ounces, to be infus'd in two Quarts of White-wine. For Jaundice.

Scurvy-grafs, Horse-radish-roots, Winteran-Bark, to be in-

fus'd in Sherry. Alterative.

Of Cloves, Galingal, Cubebs, Mace, Nutmegs, Saffron, each one Dram, Cochineal half a Dram, to be infus'd in three Pints of Canary. Alexipharmack.

An AROMATICE BITTER DECOCTION. The Root of Calamus-Aromaticus, Gentian, Galingal, Centry, Worm-wood.

[29]

wood, Camomil and Stechas-Flowers, to be boil'd in a Quart of Water.

An ASTRINGENT DECOCTION. The Bark of Pomegranate, Tormentil, and Briftol-Roots, with burnt Harts-horn

n Spring-water.

A CEPHALICK DECOCTION. Guiacum, Sassafras, Peinny-Root, Sage dry'd, Marjoram, Betony, Stechas-Flowers, The low Prices will be observed from the Rates of the Ingrelients.

The SCARLET DECOCTION. Nitre half an Ounce, Cobineal one Scruple. Boil them gently with a little Liquoish in three Pints of Spring water, to be us'd in Inflama-

ory Fevers.

The Roots of Grass, Fennel, Parsley, each one Ounce, of Dandelyon two Ounces; of Currants one Ounce and an half, to be boiled in a Quart of Water, adding two or three Drams of Sal Prunella, to be us'd in Pleurisies and the common Putrid Fevers.

For INTERMITTING FEVERS. Camomil-Flowers, two Dunces, Cochineal, one Scruple: To be boiled in a Quart of Water, adding two Drams of Salt of Wormwood. These three

ire of the lowest Value.

The DECOCTION OF THE JESUITS POWDER. Two Dunces of it to be boil'd in three Pints of Water to a Quart, with three Drams of Balfam of Tolu, and half a Dram of Co-bineal. This may cure the Ague at the Expence of two shillings.

The DECOCTION for a LOOSENESS. Boil two Drams of Diascordium in a Pint of Spring-water, adding one or two

Dunces of Cinamon-water, and Diacodium.

The DECOCTION for sharpness of URINE. Gum-Arabick, three Ounces, boil'd in a Quart of Spring-Water, adding four Ounces of Syrup of Althea.

A PTISANE. Pearl-Barly, Raisins of the Sun, each two Dunces, Anise Seeds two Drams, to be boil'd in three Pints

of Spring Water.

The Decoction for MALIGNANT FEVERS. Serpentaria-Root fix Drams, Cochincal half a Dram, to be boil'd in a Pint and half of Water, adding Venice-Treacle or Diafcordium.

Temperating Decoctions in Fevers. Pearl-Barly one Qunce, Scorzonera-Root, two Qunces, Sorrel one Qunce, Wood

[30]

Wood-Sorrel one handful, in three Pints of Water to two, with Syrup of Lemons and Rasberries.

Tamarinds two Ounces, Raisins of the Sun one Ounce, in

three Pints of Water to two.

A Purging A.E. The Roots of Sharp dock twelve Ounces, Polypody four, Horse-radish two, Ground-Ivy, Water-Cresses, Brook-lime, Scurvy-grass, each two handfuls, Sassaphrass, Juniper-Berries, Coriander seeds, Liquorice, each one Ounce, Sena six Ounces, Raisins ston'd half a Pound, for four Gallons:

The Infusion for Children. Rhubarb slic'd two Drams, Liquorice, Anise seeds, each two Scruples, twenty Raisins

ston'd in a Quart of Ale.

The Emulsion most in Use is made of blancht Almonds, Cucumbers, and white Poppy-Seeds, each half an Ounce, Sugar-Candy one Ounce. To these beaten to a Paste, add a Quart of the Decoction of Barly.

Mixtures for a Cough. The white Troche and Powder of Haly, with Oyl of sweet Almonds and Syrup of Althea.

Conserve of red Roses two Ounces, of Hips one Ounce, Lucatellus's Balsam three Drams, with Syrup of red Poppies.

Syrup of red Poppies, Linfeed-Oyl, each two Ounces, Oil

of Anise-seeds two Drops, Sugar- Candy three Drams.

Gargarisms in Fevers and Quinsies. Decoction of Barly, Honey of Roses, with Sal Prunella, or Spirit of Vi-

triol, to give a Sharpness.

And if you estimate in this Place your Expence, you will eafily, or with the Affistance of an Accomptant discover, that, after Manna, the dearest Medicine, all others which pretend to exceed the penny in the Dose, are comprized in a small Number, because they are us'd in the Dose in the lowest Quantities of five, ten, twenty or thirty Grains. If Castor or Pearl shall be five shillings the Ounce, you will have eight Grains for a penny; or if as sometimes seven shillings, yet the Dose shall not amount to above three pence. If twenty shillings the Pound, as Rhubarb some Time fince, or Cochineal, you will have thirty two Grains for one penny. You may begin to apprehend, that Bezoar and Pearl, are not better than Crabs Eyes and Coral. You may be informed, that Balm of Gilead will not ferve you to as good purpose as Lucatellus's Balsam, of the finest Turpentine; and that Saffron and Salt of Amber are given in the Dose but to very few Grains. That the Syrup of Chermes will

[31]

will be offensive to the Stomach, if you take many Spoonfulls, and repeat it often. You may then afford your Regard to all the Flowers, Seeds, Leaves, Barks and Roots, to the Gums, Balfams, Alkali-Powders, Earths, which have all distinct and specifick Virtues prepar'd by the natural Chymistry; and discern, that if taken in Substance, or cook'd into any Form, they will be in the Dose as low in their Prices, as their Powers have been raised by the Characters of their Cures of the most difficult Diseases. The Chymical Preparations are ready for immediate Use. The Spirits of all the Kinds, the Tinctures, the Oyls, the Salts in the sew Drops or Grains, are below the least of our Coin, if you will afford the Vehicle or Liquor to take them in Simple Milk-Water, or that of the Fountain, or Wine.

You may reflect on the Surgeons Application to the various Cases he treats. Does he deny you the Service of the most sovereign and healing Plants, or Gums and Balsams, or Chymical Powders and Tinctures? Their Virtues are to pass into you from the Fomentations, Unguents, Plaisters, by the more numerous Paffages of the Pores, and the Network of all the Skin. The Circulation receives them, and carries them into every Part. They are apply'd sometimes to the divided Vein. or the wounded Nerve, and join themselves instantly with the Blood and Spirits. The Limbs might renew the old Quarrel against the Stomach, if all the high priz'd Medicines were preserv'd for its Use, and they who labour to provide its daily Nourishment, were to be contented with the cheaper and the viler fort. He never importunes you with the sudden rise of the Value of the Drug, and the Preparations of this or the other Remedy. You never blame or suspect him, that he is sparing in the use of them, when he suffers the Cataplasms or Plaisters to lye on the Tumour, or the Dreffings in the Ulcers and Wound, till so many Hours are past.

Not many Years fince, the Town had discover'd, that their topping Physicians ply'd all the Patients in all Distempers with one or other of the five Remedies, the Bark, Steel, Opiates, the Preparations of Mercury, or the Acids. What Success they had, Time and the Grave have prevented the present Enquiry. Your Bill may have out-liv'd the Treatment; but of the sirst you cannot expend more in the Day than to the value of fix-pence; of the Steel two pence; of the Opiates, about one penny; of the Mercurial to the same proportion. Nor will the Acid Method from the Acid Spirits,

or White Wine-Vinegar, or Cream of Tartar, or the neutral Salts exceed the Penny. The charge of the Juice of Citrons, Lemons and Oranges, may be computed by themselves.

You may, being now in Health, and having the perfect Use of your Reason, adjust and determine the proportions of Medicines you will be able to bear in Sickness; how many Times in a Day you will take the Thirty Grains, and as many Drops of each respective Galenical or Chymical Preparation, to increase your Heat and Thirst, and restlesness in a burning Fever. What Advantage you may receive from the infipid distill'd Waters, or the frequent Doses with them of the hot compound Waters and Spirits. We will allow you frequent Draughts of the cooling and temperating Tifanes and Emulfions, or the strengthning and gently warm Infufions or Decoctions. You shall have your Caudles with the Tharp acidulate Wine, or the Canary Poffet. But if you are to be heated and fweated in your natural Temper, you may confider how often you would take dry Powders, or the restless volatile Spirits, or the chymical Tinctures, made with the Spirit of Molasses and Malt, of which you can bear only twenty or thirty Drops in the Dofe. If you are to cool and extinguish the Heat, how many Spoonfuls of the Juice of Citrons, Oranges, or Lemons, and how many Drops and how often the Acid Spirits of Nitre, Vitriol or Sulphur. If you use the more temperate Quenchers of the Fire of the feverish Blood, the Sal Prunelle, or the Cream of Tartar, You may confider, if you can expend in these one pennyworth of either in the four and twenty Hours. You may debate with your felf, how often you can use the Drops of Laudanum, or the Spoonfuls of Diascordium, &c.

CHAP. III. Titles of Simples most useful and general: Connexion of Diseases on which a Key to Physic: And to know a Disease.

THERE are five Emollient Herbs, or fostening; Mallows, Marsh-Mallows, Violets, Mercury, Pellitory: Four greater Hot Seeds, Annise, Fennel, Carraway, Cummin: Four lesser hot Seeds, Ammi, Amomum, Smallage, Daucus: Four greater cold Seeds, Cucumber, Cucurbit, Citruis, Melon, Four lesser cold Seeds, Endive, Scariola, Lettice, Pursane: Five greater opening Roots, Smallage, Fennel, Asparagus, Parsley, Butcher's-Broom: Five lesser opening Roots, Grass, Madder:

Madder, Eringo, Capers, Cammock: Four cordial Flowers,

Borage, Bugloss, Roses, Violets.

There is a Connexion of Diseases, by which they are a kin to one another, rife from a like Cause, proceed to a like Effect, and to be treated and cured in some Measure by the like Medicines. - As Aches, Pains, Gout, Sciatica, Rheumatism. - So all Acrimony of the Blood, Scurvy, Jaundice, Dropfy, Itch, Scab, King's-Evil, Schirri, Pox, Leproty, Scald-Head, and all Foulnesses of the Skin, Tetters, Freckles, Pimples, Morphew, Ringworm, Shingles, Gonorrahea, Gleet, Whites, &c. - So Fever, inflammatory, or hot, Intermitting or an Ague, Hectic or Consumptive; Nervous, which is fometimes with a Delirium, or Frenzy, Madness, Maniacal Affections, that is, Qualities of Madnets, Hypo, Spleen, Melancholy, Vapours, Fainting, Flatus, Wind: And to Fever. with Convulsions, Vertigo, Swimming or Megrim in the Head, Hiccup, Apoplexy, Head ach, Lethargy, with loss of Memory, Epileply or falling Sickness, Hysterical Affections or Disorders proceeding from the Womb, or Fits of the Mother, Palpitation, Fear, Sadness, Despair, &c. - Which like the other Passions, are Distempers, none being without Perturbation and Disturbance; so that the best Physic is the best Divinity, Morality and Philosophy; that is, what is naturally or physically best for the Body is best for the Mind. - Reducible to convultive Fevers is also the Nervous Cholic. Belly-ach, dry Gripes and Iliac Passion, Slime in the Bowels. Worms, Joint-worms; and to the Hectic, Consumptions, and Sweating too much; and to Convulfions, Numbness, Cholic; and to Hystericks, Spleen, and Hypo; and to Fever with Acrimony of the Blood, Measles and Small Pox; and to Nervous Fever, the Plague, and to Fevers, Poison. NOTE. FEVER is the most general Denomination and Accident or Symptom of all Disease; for it is the encreased or lessened Motion of the Blood out of Time, from its being too thick, thin, too much or little in Quantity, or the like; and also of those Humours, which are from the Blood; the Knowledge of Fever with that of Convulsion, and of the Acrimony or Sharpness of the Blood, &c. is the most general Key to Physic.

To proceed in the Connection of Diseases: To St. Anthony's-Fire, Erysipelas, Inflammations, Issues to cool, Quinsy, fore Throat or Mouth, Thirst, Hoarseness, Heart-burn,

Burns,

[34]

Burns, Scaldings .- To Appetite loft, weak Digestion, Vomiting .- To Dysentery, Diarrhea, Whites, Sterility, Impotency, Seminal-weaknesses, Looseness, Bloody-Flux, bloody, hor, or involuntary Urine, bleeding of the Womb, &c. - To Wounds, Ulcers, external and internal, Bruises, Sprains, or Contusions without or within, Buboes, Boils, Pox, Whitloe, Felons, Impostumations internal and external, Pleurify, Asthma, Warts, Shortness of Breath, Phlegm, Stitches. --- To Defluxion, Rneum, Catarrh, Distillation on any Part, Cough, Chincough, Eyes inflamed, Flux of any Humour, Diarrhea, &c - Mentes to provoke or restrain, Delivery, After-birth, Green-sickness .-- To Disorders of the Blood, Hæmorthage, Blood-spitting, Bloody-Flux, &c. as above, Hæmorhoids, Piles, &c .-- To Glandulous Obstructions, Jaundice, Propty, &c .- To Nervous Obstructions, Apoplexy, Palfy, &c .-- To Obstructions in the Kidney's, Gravel, Stone, Strangury, Stone in the Joints, or Gout, Sickness of Head and Stomach as above, &c.

It would require a very particular and distinct Discourse, to consider, how this Chain and Connection of Diseases operates in the whole Body, or the several Parts of it; and would afford a Clue for the most noble and practically useful Command of Physic: Nor has any Physician given so concise and

methodical a View of it.

Every Distemper is to be treated, as if some Fever attended it: Every Person ought to study and know his own Body, his Infirmities, and the Times and Occasions of the Alteration of his Body: Fluids, or Humours, are seperated from the Blood, and those Separations are the Spring of all the living Actions of the Body: Experience also, or a Knowledge of the Histories, real Facts, or Descriptions of Diseases, is to be added: Reasoning on them may deduce the Nature and Seat and Cure of a Distemper, with its Signs, or Diagnosticks: Which are a Collection of particular Symptoms, and Indications of Cure are our Conclusions from those Signs and Hittories: In which lies the Truth of Physic: Nature, assisted or not, cures Diseases: And the best Physician follows her best: There are Seasons in which also Diteases appear, and to know one Epidemical Distemper is to know others: The Point is, to fee what Difeases are near a-kin, or like to, each other: And by this, any Man of Judgment may be an Hippocrates and a Boerhaave: We are not to rest in the mathematical and mechanical Rules, for there is a vital Force, a

[35]

concurrent Operation of Nature, within and without, that exceeds those Rules, as known, and yet is not beyond Matter and Motion, as Effluvia from the Earth and Air, and the In-Ruence of the Sun and Moon and Stars, and the Changes in the Atmosphere of our own Bodies and others, have great Effects: To time, to dose, to proportion Remedies well, is necessary: To know the next immediate Cause of the Difease, and what always accompanies it, the Part of the Body that is affected, the Ways and Passages, through which the Evil takes its Course: The inseparable Signs of the Distemper, the Symptoms, or Appearances, that commonly go along with it, and distinguish them from the Disease itself: As, in the Tooth-ach, the Periosteum is violently stretch'd by some Humour, which Membrane, forced out of its natural Form and Situation, gives the Pain: That Pain is the Mark of the Disease, the Humour is the Cause, the Inflammation, Fever, swelled Face, &c. are Symptoms, proceeding from the Pain, and its Cause: The true Signs begin, grow up, decline and vanish, with the Disease: Such Symptoms are Diagnosticks, or Marks of the Diftemper: The Quantity and Intenseness of the Disease, the Strength of the Sick, the Power of Medicines are to be confider'd: The Symptoms of a Disease being given, we may discover its Nature, as, from the Phænomena of Motions we trace the Forces of Nature, and then from those Forces, may demonstrate the other Pnænomena: The evident and conjunct Causes give the Indications of Cure: And Observation of the Appearances in the feveral Stages of the Distemper leads to the Knowledge of thote Causes: The Symptoms are the Effects of some Cause or Number of Causes, which pervert the natural Actions of one or more Parts, So that by explaining them, we are a jprised of the perverted Action, we discover the Disease, for nothing can be the Cause of a Disease, that does not produce the Symptoms, in which the Nature of the Dilease confifts : Hence are the Ways and Probabilities of Cure, and to judge what is incurable, and to change the diffempered Condition of the Parts affected; The secondary, casual, and foreign Symptoms must be distinguished from the primary, constant, and permanent: The false Symptoms are most commonly the secondary; the Cure must not be taken from precarious and supposed Causes; but we must collect the most constant Symptoms and Effects; we must know the peculiar Ways, in which the Medicines will act, to find, when one Method and and Medicine is most proper: To know the Distemper, and thence the Way of Cure, and the Efficacy, Time, and Dose of Medicines in the Variations of a Disease, is all: When to

continue or change the Medicines.

Thus many talk, and much of it is right; but Dr. Pitcairn, &c. fays, there is no Art or Method of curing, but only the Practice of it: And that Remedies were found by Chance not Design: That Physic therefore is the Remembrance of these Things, which Use has shewn to be an effectual Remedy for such and such Distempers: That the Nature of those Bodies which flow and refide in the Veins is not known: That many cure what cannot be cured by others who try the lame Way, which therefore cannot be called a Method or Air of Cure, but more from Chance and some Experience, than formal Defign: That Physic is often a Jest. a Whim, a Humour, a Fancy, a meer Fashion, that Fees, a Charlot, Money, Figure and Bufiness is the Purpose: That a few make or marr others in the Faculty: That the Compounds or Mixtures are usually bad, and come from the Aabians; that the plain simple Things of each Climate ate best; that Degrees and Doctors are quite from the Papacy: that Anatomy, which the young Fellows in Physic and Surgery talk of fo much, has hardly advanced us one Jot nearer a Cure in either: For Nature varies, and the Vessels have not always the fame Situation in feveral Bodies, as in some Bodies is only one pyramidal Muscle, (for two) and in others, none: So that there is more Shew than Truth, Cost than Worship, in Physic: Notwithstanding the Vogue, which depends on Whim and Interest, one Physician is e'en as good as another, Surgeons are not less knowing, Apothecaries may be as good as any, and any Man of common Sense and a little Confideration may toon be his own Physician, as well as his own Parson.

This is an Age of Pleasure, therefore scandalous, degenerate, and unmanly: He that would preserve his Health, which is the greatest Pleasure, must beware of other Pleasures: Let the Patterns of long Life be study'd, Cornaro, Lessius, &c. Let each know himself, be used to Hardiness, Severity, and some Pain, and remember, that no Man is scarcely sit to live at all, whatever be his Rink, who is not always prepared to live like a Foot Soldier in Time of War.
