Apparatus for Supporting the Womb.

*(This Invention received Provisional Protection only.)*

**PROVISIONAL SPECIFICATION** left by Pierre Marius Philip Bourjeurd at the Office of the Commissioners of Patents, with his Petition, on the 16th February 1859.

I, PIERRE MARIUS PHILIP BOURJEAURD, of Davies Street, in the County of Middlesex, late Surgeon in the French Navy, do hereby declare the nature of the said Invention for "**AN IMPROVED APPARATUS FOR SUPPORTING THE WOMB,**" to be as follows:—

My apparatus consists of a mushroom-shaped vessel in caoutchouc, with an aperture through the centre thereof, and connected to india-rubber or other straps for securing to the body of the wearer. The vessel is hollow, and may be permanently sealed, or it may be connected with a pipe fitted with taps and an air-bag, for the purpose of inflating and letting out the air from the mushroom-shaped vessel, as circumstances may require.
