SPECIFICATION

OF

ALLAN STEWART.

ABDOMINAL BANDAGE.

LONDON:

PRINTED BY GEORGE E. EYRE AND WILLIAM SPOTTISWOODE,

PRINTERS TO THE QUEEN'S MOST EXCELLENT MAJESTY:

PUBLISHED AT THE GREAT SEAL PATENT OFFICE,

25, SOUTHAMPTON BUILDINGS, HOLBORN.

1865.

THE HISTORY OF THE

REIGN OF

CHARLES THE FIRST

A.D. 1865, 10th APRIL. N^o 1016.

Abdominal Bandage.

(This Invention received Provisional Protection only.)

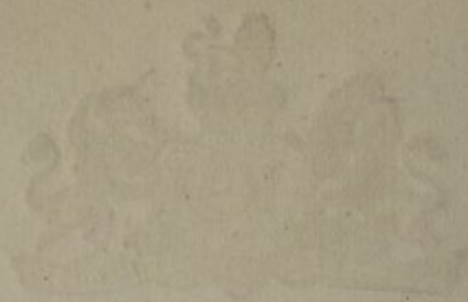

PROVISIONAL SPECIFICATION left by Allan Stewart at the Office of the Commissioners of Patents, with his Petition, on the 10th April 1865.

I, ALLAN STEWART, of 23, Talbot Terrace, Westbourne Park, in the County of Middlesex, do hereby declare the nature of the said Invention for "**AN IMPROVED ABDOMINAL AND SCROTAL BANDAGE**," to be as follows:—

My Invention has for its object the support of the lower abdominal muscles, the penis, and the scrotum. The abdomen is supported by a bandage buckled round the pelvis, held in situ by a brace, which pulls up the front only of the bandage. The scrotum is held above the level of the perinæum by a case attached to the abdominal supporter kept in situ by a tubular elastic strap running in a case attached at each side of the perinæum passing round the thigh to fasten on the front of the abdominal bandage. The penis is supported by a flap which is a continuation upwards of the scrotal case, and fastening upon the abdominal bandage.

Abdominal Bandage.

(This invention received a provisional Protection only.)

PROVISIONAL SPECIFICATION for an Abdominal Bandage, in the Office of the Commissioners of Patents, with his Majesty's Patent Office, 10th April 1865.

I, ALAN SYMMER, of 28, Fleet Street, London, do hereby declare the nature of the said Invention for "An Improved Abdominal and Respiratory Bandage," to be as follows:—
My Invention has for its object the support of the lower abdominal muscles, the penis, and the scrotum. The abdomen is supported by a bandage buckled round the pelvis, held in situ by a strap, which passes up the front only of the bandage. The scrotum is held above the level of the perineum by a strap attached to the abdominal supporter, kept in situ by a tubular elastic strap running in a case stretched at each side of the perineum passing round the thigh to fasten on the front of the abdominal bandage. The penis is supported by a strap which is a continuation upwards of the scrotal cord, and fastening upon the abdominal bandage.
