### Plasters.

*(Provisional Protection not allowed.)*

**PROVISIONAL SPECIFICATION** left by Ernest Seyd at the Office of the Commissioners of Patents, with his Petition, on the 1st November 1871.—A communication from abroad by Benjamin Brandreth, of the City of New York, in the United States of America.

- 5 I, ERNEST SEYD, of Princes Street, in the City of London, do hereby declare the nature of the said Invention for "IMPROVEMENTS IN MEDICAL AND OTHER PLAISTERS," communicated to me from abroad by Benjamin Brandreth, of the City of New York, in the United States of America, to be as follows :—
- 10 The object and intention of this Invention is to prevent the two sides of plaisters from sticking together when packed or rolled up. It is proposed to effect this by covering the prepared or adhesive side of the plaister with any suitable woven or textile fabric manufactured in the usual way from cotton, flax, or other fibrous substance, thereby pre-
- 15 serving the plaister from injury. It is simply necessary to apply the aforesaid fabric to the prepared side of the plaister to which it will adhere by gentle pressure, and when the plaister is required for use the aforesaid

*Seyd's Improvements in Plasters.*

fabric can easily be removed therefrom by the application of moisture thereto, thus leaving the prepared side of the plaster perfect and intact and the medical and other properties unimpaired.

The above method of preserving plasters will be found of great service to large hospitals, army and navy surgeons on service, field hospitals, 5 travellers, and the public generally.
