"These sketches are by way of enabling a twentieth-century lover of country pursuits to realise the place that they held in the life of our Ancestors. The collection of old-world books on sport and horsemanship upon which they are founded had its origin in an attempt to extract from them something by which light might be thrown on Shakespeare's modes of thought and forms of expression. Many of the works contained in this collection were written in the sixteenth century when the literature of the chase attained to general popularity."
