Cannot hide Arts.

HEIRE of thy Fathers goods, and his good parts,
Which both preserveſt, & augment'ſt his ſtore,
Tracing th' ingenuous ſteps he trod before:
Proceed as thou begin'ſt, and win thoſe hearts,
With gentle cur'tſie, which admir'd his Arts.
Whiſt thou conceal'ſt thine own, & do'ſt deplore
Thy want, compar'd with his, thou ſhew'ſt them
Modesty clouds not worth; but hate diverts, (more.

NOTE.

WALTER STONEHOUSE, *the composer of foregoing verses and anagrams, was a member of Wadham College and a Fellow of Merton. The original copy in his own handwriting, from which the type was set, is preserved among the manuscripts left by Ashmole at the Bodleian Museum. These verses are Stonehouse's first printed work, and were not published until 1656, the year after his death at the age of fifty-eight.*

Honoris ergo

D. Dq;

To the Ingenious
READER.

FOR some *reasons* I apprehend my self engaged to give an *account* of *two* things, that refer to the ensuing *piece*: The one, for not *publishing* this *Catalogue* untill now: The other, of the *mode* & *manner* thereof, being partly *Latine* and partly *English*.

About three years agoe,

To the ingenious Reader.

goe, (by the perswasion of some *friends*) I was resolved to take a *Catalogue* of those *Rarities* and *Curiosities* which my *Father* had scedulouſly collected, and my *ſelfe* with continued diligence have augmented, & hitherto preserved together: They then pressed me with that Argument, *That the enumeration of these Rarities, (being more for variety than any one place known in Europe could afford) would be*

*an honour to our Nation,
and a benefit to such ingeni-
ous persons as would become
further enquirers into the
various modes of Natures
admirable workes, and the
curious Imitators thereof: I
readily yeilded to the thing
so urged, and with the as-
sistance of two worthy
friends (well acquainted
with my design,) we then
began it, and many exami-
nations of the materialls
themselves, & their agree-
ments with severall Au-

thors *compared*, a *Draught* was made, which they gave into my hands to examine over. Presently thereupon my *onely Sonne dyed*, one of *my Friends* fell very *sick* for about *a yeare*, and my *other Friend* by unhappy *Law-suits* much disturbed. Upon these accidents that *first Draught* lay neglected in *my hands* another year. Afterwards my *saide Friends* call again upon me, and the *designe of Printing*, a-new *contrived*,

To the ingenious Reader.

ved, onely the prefixed *Pictures* were not ready, and I found my kinde friend Mr *Hollar* then engaged for about tenne Moneths, for whose hand to finish the *Plates*, I was necessarily constrained to stay untill this time.

Now for the *materialls* themselves I reduce them unto two sorts; one *Naturall*, of which some are more familiarly known & named amongst us, as divers sorts of Birds, foure-

footed Beasts and Fishes, to whom I have given usual *English* names. Others are lesse familiar, and as yet unfitted with apt *English* termes, as the shell-Creatures, Infects, Minerralls, Outlandish-Fruits, and the like, which are part of the *Materia Medica*; (Encroachers upon that faculty, may try how they can crack such shels.) The other sort is *Artifici-alls*, as Vtenfills, Householdstufte, Habits, Instruments

riofities of Art, &c. These
are also exprest in *En-
glish*, (saving the Coynes,
which would vary but
little if Tranflated) for the
ready satisfying whom-
soever may desire a view
thereof. The *Catalogue*
of my *Garden* I have also
added in the Conclusion
(and given the names of
the *Plants* both in *Latine*
and *English*) that nothing

FINIS.

The last of the Tradescants died in 1662.

On March 20, 1683, twelve cartloads of his rarities arrived at the Ashmolean Museum in Oxford, just one week after they had been shipped on to a Thames barge in London. The opening of the new Museums in the nineteenth century, one for Science and one for Art and Archaeology, resulted in the temporary abandonment of the parent Museum, and in the loss of many of its treasures. Now, after the lapse of thirty years, the oldest Science Museum in Britain is again housing a Collection of Rarities, and the purpose for which it was specially built is restored.

This reprint of the Musaeum Tradescantianum,
the Garden List excepted, was prepared by
R. T. Gunther for the Opening of the
Old Ashmolean Museum for the
Lewis Evans Collection on
May 5, 1925, and is now
printed by Frederick
Hall, printer to
the University
of Oxford
