Explanatory Note	(i)
--------------------------	-----

SECTION I

TABLE 1—Mid-year estimated population of registration areas by urban-rural classification and by sex for 1950	1
TABLE 2—Births in rural and urban areas	2
TABLE 3—Deaths in rural and urban areas	6
TABLE 4—Births by months during the year 1950	10
TABLE 5—Births by months in rural areas during the year 1950	11
TABLE 6—Births by months in urban areas during the year 1950	12
TABLE 7—Deaths by months during the year 1950	13
TABLE 8—Deaths by months in rural areas during the year 1950	14
TABLE 9—Deaths by months in urban areas during the year 1950	15
TABLE 10—Deaths by age and sex during the year 1950	16
TABLE 11—Deaths by age and sex in rural areas during the year 1950	18
TABLE 12—Deaths by age and sex in urban areas during the year 1950	20
TABLE 13—Infant mortality in rural and urban areas	22
TABLE 14—Infant mortality rate in certain towns in India during the year 1950	26

SECTION II

TABLE 15—Deaths and rates per milie from certain causes or groups of causes of mortality	30
TABLE 16—Deaths and rates per mille from certain causes or groups of causes of mortality in rural and urban areas during the year 1950	35
TABLE 17—Deaths from cholera by months, number of inoculations performed and villages infected during the year 1950	37
TABLE 18—Deaths from smallpox by months and deaths in children during the year 1950	38
TABLE 19—Deaths from plague by months and number of anti-plague inoculations performed during the year 1950	39
TABLE 20—Deaths from fevers including malaria by months and reported malaria deaths in rural and urban areas during the year 1950	40
TABLE 21—Deaths from dysentery and diarrhoea by months during the year 1950	41
TABLE 22—Deaths from respiratory diseases by months during the year 1950	42

SECTION III

TABLE 23—Maternal death rates per 1,000 of live and still births for certain towns in India during the year 1950	44
TABLE 24—Maternity and Child Welfare centres in rural and urban areas during the year 1950	46

SECTION IV

TABLE 25—Expenditure on public health by Central and State Governments during the year 1950-51	48
TABLE 26—Distribution of health services in rural and urban areas during the year 1950	49

(ii)

SECTION V

	Page
TABLE 27—Vaccination statistics relating to some States in India for the year 1950	52
TABLE 28—Number of municipal towns and villages in the different States in which Compulsory Primary Vaccination Act against smallpox was in force during the year 1950	53
TABLE 29—Number of municipal towns and villages in the different States in which Compulsory Revaccination Act was in force during the year 1950	54

SECTION VI

TABLE 30—Number of towns having protected water-supply during the year 1950	56
TABLE 31—Expenditure on public health by municipalities during 1949-50	58
TABLE 32—Expenditure on public health by district boards during the year 1949-50	59

EXPLANATORY NOTE

Vital statistics and statistics relating to certain aspects of public health for the year 1950 are presented in this volume. The form of presentation does not differ materially from the one followed during earlier years. The system of registration of births and deaths is not quite satisfactory in all parts of the country. There are wide variations in completeness and coverage from State to State. It is more or less satisfactory in all Part A States and in some of the other States. In certain other parts of the country, however, it is unreliable and at some places, no arrangements exist for the registration of vital events. As the information in respect of most of the Part B States and some of the Part C States is fragmentary and unreliable, only vital statistics for Part A States and the three part C States of Ajmer, Coorg and Delhi are included in this volume. We hope that in the coming years the data will be more complete. In the light of what has already been stated it will be necessary to take into account the limiting factors in the interpretation of the published figures particularly in making inter-State comparisons or while considering the mortality caused by specific diseases or groups of diseases. The downward trend in mortality may be ascribed, mainly to public health measures undertaken in the States. A similar trend noticed in birth rates does not, however, lend itself to a simple interpretation.

Statistics regarding antimalarials distributed, sickness and mortality among prisoners and various types of cases of tuberculosis treated in hospitals, hitherto published in this volume, have now been left out. However, these will be incorporated in the relevant chapters of the main report.

EXPLANATORY NOTE

Vital statistics and statistics relating to certain aspects of public health for the year 1929 are presented in this volume. The form of presentation does not differ materially from the one followed during earlier years. The system of revision adopted for this and health is not quite satisfactory in all parts of the country. There are wide variations in completeness and coverage from State to State. It is more satisfactory in all States than in the other States. In certain parts of the country, however, it is negligible and at some places, certain contents exist only in a very few of vital events. As the information in respect of most of the States and some of the Part C States is fragmentary and incomplete, vital statistics for Part A States and the three parts of Part C States and Delhi are included in this volume. The data for the preceding years the data will be more complete. In the light of what has already been stated it will be necessary to take into account the limiting factors in the interpretation of the published figures particularly in making inter-State comparisons or with consideration the mortality caused by specific diseases or groups of diseases. The downward trend in mortality may be ascribed, partly to public health measures undertaken in the States. A similar trend noticed in birth rates does not, however, lend itself to a simple interpretation.

Statistics regarding antimorbidity, sickness and mortality among prisoners and various types of cases of tuberculosis treated in hospitals, hospitals published in this volume, have now been left out. However, these will be incorporated in the relevant chapters of the main report.

Year	Month	Day	Time	Place	Remarks
1901	Jan	1	10:00	San Francisco	Left for New York
1901	Jan	2	10:00	New York	Arrived New York
1901	Jan	3	10:00	New York	Left New York for Philadelphia
1901	Jan	4	10:00	Philadelphia	Arrived Philadelphia
1901	Jan	5	10:00	Philadelphia	Left Philadelphia for Washington
1901	Jan	6	10:00	Washington	Arrived Washington
1901	Jan	7	10:00	Washington	Left Washington for Baltimore
1901	Jan	8	10:00	Baltimore	Arrived Baltimore
