HOSPITALS STATISTICS :—

TABLE

I.— Technical Work done at all Ophthalmic Hospitals during 1937	11
II.— List of diseases	12
III.— Causes of optic atrophy	15
IV.— List of operations	16
V.— Number of new patients treated and operations performed at all ophthalmic hospitals during 1937	18
VI.— Average number of Monthly Operations at all ophthalmic Hospitals during 1937	20
VII.— New patients treated according to the age at which they sought treatment	21
VIII.— New patients treated Monthly	21
IX — Average Temperature	22
X.— Synopsis of work of all ophthalmic hospitals since 1933	22
XI.— Causes of blindness	23
XII.— Total percentage of blindness in one or both eyes since 1937	23
XIII.— Blindness among out-patients since 1909	27
XIV.— Yearly percentage of blindness among ophthalmic hospitals patients since 1909	28
XV.— Primary Glaucoma	28
XVI.— Incidence of primary glaucoma since 1925	29
XVII.— Pathological Report	30
XVIII.— Wassermann Test	31
XIX.— Result of examination of Diphtheria Specimens	31
XX.— Number of beds at all ophthalmic hospitals	32
XXI.— Cost of Uniform Diets for the in-patients of the ophthalmic hospitals during 1938 excluding Cost of rations for Employés	33
XXII.— Sources of provision of ophthalmic hospitals	34
XXIII.— Actual expenditure 1937, General Administration	35
XXIV.— Actual expenditure 1937, Government Ophthalmic Hospitals (In general)	36
XXV.— Actual expenditure 1937, Government Ophthalmic Hospitals (per Unit)	36
XXVI.— Actual expenditure 1937, Provincial Council Ophthalmic Hospitals (Per Unit)	37
XXVII.— Comparison of the Cost of Maintenance of a permanent Ophthalmic Hospital in 1914 and 1937.	38

STATISTICS OF OPHTHALMIC TREATMENT IN SCHOOL, 1937-1938, *Index of Ophthalmic*

TABLE	PAGE
I.— (a) Condition of Conjunctiva (Beginning of the year)	40
(b) Condition of Conjunctiva (End of the year)	41
II.— (a) Effect of Treatment on Serious Stages of Trachoma .	43
(b) Stages of Trachoma at beginning and end of School Year	43
III.— (a) Trachoma and its relation to School year (Beginning of the year)	44
(b) Comparison of Serious Stages of Trachoma I and II (Beginning of the Year)	45
IV.— Vision of all Pupils without spectacles	45
V.— Spectacles ordered	46
VI.— Number of pupils ordered spectacles not greater in strength than ± 6 Diopters and by their use got good or fair vision .	46
VII.— Condition of Cornea before treatment	47
VIII.— Comparison of Corneal Opacity among pupils of Tanta Primary Schools in the years 1914-1915 and 1937-1938	47

37	XXVII.— Comparison of the Cost of Maintenance and Treatment Ophthalmic Hospital in 1937 and 1933

CLINICAL WORK

The following table shows the clinical work done in the year 1937 as compared with that of 1936

TWENTY FIFTH ANNUAL REPORT

increase in 1937	1937	of 1936
7	187381	for 1937
8	5083	
9	301130	
10	150101	FOREWORD

New Units

During this year for ophthalmic branches were opened in the General Hospitals at Kafr el Dawar (Behera), Samannoud (Gharbia), Dishna (Qena) El Badari (Assiut) and No. 13 T.O.H. (Beni Suef). Thus the number of the ophthalmic units reached 78 (of which 63 are permanent and 15 travelling).

This number shows an increase of five units over that of 1936, and 55 units over that of 1923. They are shown in detail in table No. 22.

(1) *Project under consideration*

- a. Ophthalmic Hospital at Kafr El Sheikh.
Building expected to be completed in 1937-1938.
- b. Ophthalmic Hospital at Khalifa Quarter (Cairo).
The construction of this unit will be completed in the near future.

(2) *Enlargement of Ophthalmic Hospitals.*

The enlargement of Fayoum Ophthalmic Hospital has been completed, the available beds reached 51.

PROJECTS PROPOSED IN THE BUDGET 1938-1939

(1) *New Ophthalmic Branches in the General Hospitals.*

Among the proposals in the budget of 1938 - 1939 ophthalmic is proposed in 2 new ophthalmic branches in the present General Hospitals.

(2) *Ophthalmic Clinics in the Primary Government Schools.*

Among the proposals in the budget of 1938 - 1939, two ophthalmic clinics are proposed for the Primary Government Schools at Cairo and Alexandria.

(3) *Enlargement of Ophthalmic Hospitals.*

The number of patients attending the ophthalmic hospitals being so large that the in-patients sections have become inadequate to accomodate the largest number of the attending patients, whose condition necessitates special care. The Ministry has decided to enlarge these hospitals gradually whenever the budget permits.

It was requested in the proposals of the Budget of 1938 - 1939 to increase some more beds in the ophthalmic branches, where there is adequate - so that it could be possible to admit more in-patients.

CLINICAL WORK

The following table shows the clinical work done in the year 1937 as compared with that of 1936.

	1936	1937	Increase in 1937
New patients	1133599	1213781	7 %
In-patients	35246	38042	8 %
Operations	344661	351136	2 %
Out patients attendance	7741226	7891461	2 %

BLINDNESS

The number of patients who were found to be blind in one or both eyes, excluding cataract cases causing blindness, was 68613 or 5.5 of all patients examined at the Ophthalmic Hospitals. By adding the cataract cases causing blindness, the percentage becomes 5.8 %.

The pathological causes of blindness are detailed in table no. XI where it is shown that acute ophthalmias form 80 % of all causes. The gonococcus is still the predominant factor of infection with acute ophthalmias-its percentage to total of microbes being 40 %.

AGE OF PATIENTS

Out of 1213781 new patients treated, 78598 or 6.4 % were under the age of one year 348702 or 28.7 % from one to 15 years of age- 333054 or 27.4 % from 15 to 30 years of age; and 681756 or 56.1 % from one to 30 years of age. This fact shows that the mass of people recognises the importance of seeking ophthalmic treatment for infants, children and youths.

SCHOOL CLINICS

Ophthalmic examination, inspection and treatment are, at present, carried out in 38 Primary Government Schools. Details of ophthalmic work in schools are given in a special section at the end of this report.

12075 pupils were examined, of whom 99 % were found to be suffering from trachoma in its various stages. About 41% of these were in the serious stages of the disease (trachoma I & II). As a result of ophthalmic treatment the latter percentage fell to 19 %.

In this connection it is to be noted that in Government schools, the most correct percentage, of the prevalence of trachoma among school pupils, can be obtained.

This is due to the fact that the examination and treatment are carried out in such schools regularly and permanently on pupils who are under the supervision of treating doctors.

pupils of 64 other primary schools and Kuttabs belonging to the Provincial Councils in Markazes (Districts) where permanent or travelling ophthalmic hospitals exist received ophthalmic treatment at hospitals. 7948 pupils were examined. Minor Operations were operated upon to 1748 pupils, while 31 Major operations were operated to others and 127 spectacles were prescribed.

EXPENDITURE

The annual cost of maintenance during the year 1937 including the cost of administration and expense of ophthalmic clinics in Primary Schools amounted to L.E. 102705 as shown in the detailed tables appended to this report which are significant of proper economical management. The expense per day for the out-patient was 13. M/M. The in-patient costs in addition 22 m/m daily for food. The source of provision of all ophthalmic units are shown in table XXII.

ACCOMMODATION

The number of beds reached 1747 i.e. there is an increase of 178 beds over last year.

POST-GRADUATE COURSE OF OPHTHALMOLOGY

During April 1937 the number of Medical Officers who have undergone post-graduate teaching in ophthalmology was 39, of these 6 were inspected in the preliminary clinical course and 4 of them passed, 17 were inspected in the final clinical course and 11 of them passed.

During October their number was 29 of whom 17 were inspected in the preliminary course and 8 of them passed 8 were inspected in the final clinical course and 7 of them passed. Those who failed for the second time were transferred to other branches of the Ministry.

INTERESTING CASES RECORDED

A monthly list of interesting cases seen at the various units of the Section is drawn up. About 590 cases have been recorded as interesting during 1937. The following list shows some such cases that are not frequently seen in every day's work in Egypt :

1. Traumatic cataract & subluxation of lens.
2. Buphthalmos.
3. R. & L. Post neuritic optic atrophy.
4. R. Perivasculitis (probably of tuberculous origin)
5. Embolism of central artery of retina & retinal haemorrhage.
6. Round Cell sarcoma in the region of the lt. lacrimal sac.
7. R. Optic neuritis ? pregnancy toxæmia.
8. L. Congenital coloboma of iris.
9. L. Total detachment of retina (traumatic)
10. R. Facial Paralysis, rheumatic in a specific patient.
11. Primary optic atrophy Tabes dorsales.
12. L. Congenital opaque nerve fibres.
13. Syphilitic ulcer of the lid. positive (+)
14. L. Microcornea & congenital coloboma of iris.
15. Orbital cellulitis & post neuritic optic atrophy.
16. Polypoid angiomatous granuloma of conjunctiva.
17. Choroiditis disseminata.
18. Melanotic sarcoma of L. lid.
19. Epithelial hyperplasia of R. Cornea simulating epithelioma.
20. T. B. ulceration of lid (pt. had pulmonary tuberculosis).
21. R. and L. Optic atrophy secondary to papilloedema due to hydrocephalus.
22. Retention cyst of a pseudo gland at limbus.
23. R. Persistent pupillary membrane.
24. R. Retinitis Albuminurica.
25. Capillary angioma of eyelid.
26. High Myopia & choroidal atrophy, & detached retina after L. Cat. Ext.
27. Spring catarrh palpebral and bulbar.
28. Epithelioma of lid.
29. Retinitis pigmentosa.
30. R. & L. Microcornea & persistent pupillary membrane and coloboma of the choroid.
31. Hyaline degeneration of conjunctiva.
32. Filariasis, subconj.
33. Membranous conj. positive for D. B.
34. Symblephron & L. ptosis mechanical after ophthalmia.
35. R. Ext. Rectus paralysis. (? Cause)
36. Pigmented naevus of conjunctiva.
30. R. and L. Retino-choroiditis & optic atrophy syphilitic.

38. Interstitial keratitis.
39. Congenital coloboma of iris and choroid.
40. Epithelial hyperplasia of cornea.
41. Embolism of the central artery of retina.
42. R. Streptothrix of conj.
43. Chronic syphilitic irido-cyclitis.
44. Gangrene of Upper lid due to B. proteus.
45. Fly-blown orbit.
46. Colob. of both optic discs. R. Macular changes.
47. Primary optic atrophy (syphilitic)
48. Leprotic keratitis.
49. Epithelioma of limbus.
50. Acute iritis (focal infection) (Tonsils and nose)
51. Malignant papilloma of limbus.
52. Microphthalmos congenital col. of iris and choroid.
53. Palpebral spring catarrh
54. Epithelial hyperplasia ? Malignant.
55. R. Orbital cellulitis due to periostitis.
56. Bilateral heterochromia iridis (congenital).
57. Fibroma of eyelid.
58. Rodent ulcer of L. Eyelid.
59. R. Lipo-dermoid of conj.
60. L. Dermoid of Limbus.
61. Granuloma of the cornea in the process of fibrosis.
62. Cavernous haemangioma of conjunctiva.
63. R. & L. Microcornea & congenital post cortical cataract.
64. L. Cavernous lymphangioma of bulbar conj.
65. R. Conical Cornea (Congenital).
66. Traumatic cellulites of orbit & secondary optic atrophy.
67. L. Palpebral emphysema produced by fracture of frontal sinus.
68. L. Dendritic ulcer of cornea.
69. L, Traumatic mydriasis iridodonesis and subluxation of lens.
70. Papilloma of lid margin.
71. Dislocated lens in A.C.
72. Granuloma of lachrymal sac.
73. High myopia & degeneration of macula.
74. Trach. of lid & bulbar conj.
75. L. Malignant papilloma of limbus.
76. Degeneration cornea superficialis disseminata.
77. Disseminated choroiditis (syphilitic)
78. R. Acute orbital cellulitis probably due to ethmoidal sinusitis.
79. Dermoid cyst at limbus.
80. Granuloma of papilla lachrymalis.
81. R. & l. Optic neuritis (syphilitic) & proptosis of R. globe due to-gumma of R. orbit.

82. Cong. Opacities of cornea & Cong. Coloboma of iris.
83. Vitreous & Retinal haemorrhages and rupture of choroid including macular region.
84. R. Central senile choroiditis.
85. L. Syphilitic total ophthalmoplegia.
86. R. Cong. coloboma of lid.
87. Chorio retinitis in a tuberculous patient.
88. Bilateral congenital apparent anophthalmos.
89. Gangrene of the lower lid after measles.
90. Sub-conjunctival dislocation of lens (traumatic).
91. Erysipelas of face and lids.
92. Sclero Keratitis & iritis tuberculous.
93. Deep Keratitis syphilitic.
94. R, Tuberculous conjunctivo-sclera.
95. Keratitis profunda of a striate type caused by a sting of a wasp.
96. R. & L. Optic neuritis after malaria.
97. Indirect traumatic rupture of R. cornea due to fall from a height.
98. Macular degeneration (cause "sinusitis").
99. Cavernous haemangioma of R. bulbar conj.
100. Pigmented naevus of border of Upper lid.
101. Gumma of R. Upper lid.
102. Macrocornea & Enlarged globe.
103. Left polycoria, congenital.
104. Post-neuritic optic atrophy & hemiplegia (syphilitic meningitis)
105. Lipoma of conjunctiva.
106. Sebaceous cyst on caruncle.
107. Congenital ptosis.
108. Lamellar cataract.
109. L. Chronic irido-cyclitis (cause sinusitis).
110. Coats exudative retinitis & L. Detachment of retina.
111. R. Sympathetic ophthalmia, L. Chronic irido cyclitis (after operation).
112. Syphilitic scleritic & sclerosing keratitis.
113. External ophthalmoplegia Wasserman +) Basal lesion totally cured under treatment.
114. Congenital coloboma of macula & persistent hyaloid artery.
115. L. Orbital cellulitis after erysipelas of face.
116. Kerato- Globus.
117. R. Diabetic retinitis,
118. R. & L. Choked discs due to brain tumour (epithelioma of brain).
119. Rapid & Severe R. proptosis, L. Congestive glaucoma in a child due to tumour in sphenoidal region.
120. Bilateral optic atrophy after fractured base (W. R.++++)
121. R, Traumatic mydriasis and subhyaloid Haemorrhage.
122. Scleritis & Sclero-keratitis & uveitis tuberculous.
123. Congenital total aniridia & coloboma of lenses.
124. Fungus infection of orbit of ? nature.

125. R. Acute Iridocyclitis (gonorrhoeal).
126. R. & L. Congenital ptosis, (microcornea and colobomata of iris, choroid and optic disc.
127. Proptosis of R. Eyeball due to ethmoidal tumour.
128. R. Gummatous periostitis of infero orbital margin of orbit & fistula.
129. Expulsive haemorrhage.
130. Epithelial cyst of caruncle.
131. R & L. Fuch's coloboma of optic. nerve
132. Pituitary tumour & marked papilloedema.
133. L. Thrombosis of central retinal vien.
134. L. Episcleritis.
135. R. & L. Arteriosclerosis with degenerative changes in the retina.
136. Superficial punctate keratitis.
137. Senile papilloma of limbus.
138. Synchronis Scintillans.
139. Ophthalmia neonatorum.
140. Tuberculosis of the lachrymal glands.

THE OPHTHALMOLOGICAL SOCIETY OF EGYPT.

The annual meeting of this Society was held on Friday and Saturday 25th and 26th March 1937, at Giza Memorial Ophthalmic Laboratory. 84 Members attended, the majority of whom being Medical officers of the Ophthalmic Hospitals. The following are the leading topics of the most important communications delivered in the meeting.

1. The aetiology and pathology of retinal detachment.
2. How does detachment of retina begin.
3. The incidence of posterior detachment of vitreous in detachment of retina.
4. Detachment of retina, some predisposing factors.
5. Treatment of Detachment of Retina.
6. Operative treatment of detachment of retina after Weve.
7. Congenital familial cataract with cholestrin crystals.
8. Capillary angioma of eyelid in a case of Xeroderma pigmentosa.
9. Keratitis filamentosa elicited in a case by alcoholic injection.
10. Old adherent leucomata act sometimes as a safeguard against primary glaucoma.
11. A case of glioma exophytum.
12. A case of melanotic sarcoma of choroid.
13. Tubercular periostitis of R. orbital margin.
14. Movable ivory globes.
15. Some observations on X-Ray treatment of Sellar and supra-sellar tumours.
16. Promising treatment of optic atrophy.
17. Notes on the treatment of dacryocystitis.
18. Acute hypotension.
19. Cases of hysteria in eye.
20. Hospital based on its statistical returns.

XV. CONCILIUM OPHTHALMOLOGICUM.

It was referred in last years report to the activities of the Local Organising committee.

The Congress was held in the date previously fixed (from 8 - 14 Dec, 1937) as per following programme :—

XV. CONCILIUM OPHTHALMOLOGICUM.

Congress Programme December 1937

TUESDAY, 7th 8.30 :—

Opening of "Bureau " at the Semiramis Hotel.

WEDNESDAY, 8th, 10.00 :—

Official opening of the Congress by

HIS MAJESTY THE KING OF EGYPT.

At the Grand Hall of the Egyptian University, Gizeh. 12.00—13.00

• Opening of Scientific and Industrial Exhibitions at Semiramis Hotel.

15.00—19.00 : 1st Official Subject of Symposium :—

"ARTERIAL HYPERTENSION OF THE RETINA"

Report I. Keith and Wagener (Introduction),

• II. Bailliart (Clinical Aspect).

• III. Koyanagi (Pathological Aspect).

Communications and discussions in connection with this Symposium.

21.00 : At Semiramis Hotel : Introductions.

Soirée de Gala (Evening Dress).

THURSDAY, 9th, 8.30 - 10.30 :—

Communications and discussions in connection with the Symposium.

"ARTERIAL HYPERTENSION OF THE RETINA" (continued).

• 10.30 - 13.00 : Free communications.

• 9th. 15.00 - 18.00 : Free communications.

RECEPTION AT THE ROYAL ABDIN PALACE (Soirée).

FRIDAY, 10th, 8.30 :—

Meeting of the International Association against Trachoma.

• Reports, discussions (continued).

20.00 : Banquet given by the presidnet of the Local Committee.

Shepherd's Hotel - (Evening dress).

SATURDAY, 11th, 8.30 - 10.30 :—

Meeting of the International Association for the Prevention of Blindness.

• 12.00 - 13.00 : Demonstration meeting.

• 15.00 - 19.00 ;

Excursion to the Pyramids, Sphinx, etc.

Tea at Mena House Hotel offered by the Ophthalmological Society of Egypt.

SATURDAY 20.00 :—

OFFICIAL BANQUET at Semiramis Hotel (Evening Dress)

SUNDAY, 12th, 8.30 - 13.00 :

Visit to the Ophthalmic Hospital and Laboratory at Gizeh, also to Kasr-El-Aini and Fouad I. Hospitals.

Visit to the Egyptian Museum, Amr Mosque, Coptic Museum and Church in old Cairo.

◀ 15.00 - 18.00 :— Free communications.

MONDAY, 13th, 8.30 :—

Visit to the No. 1 Travelling Ophthalmic Hospital at the Citadel.

Visit of the Citadel, the Mosques of Mohamed Aly, Rifai and Sultan Hassan and Arabic Museum.

Visit to the Ophthalmic Hospital at Kalawoun.

◀ 13th. 15.00 - 19.00 : 2nd Official Subject of Symposium :

“ENDOCRINOLOGY AND THE EYE”

Also communication and discussions in connection with it.

Report I. Snapper (Introduction).

◀ II. Von Szily (Thyroid and the Eye).

◀ III. Von Imre (Sexual organs and the Eye).

◀ IV. Jendelize (Hypophysis and the Eye).

◀ V. Lo Cascio (Parathyroid and the Eye).

22.00 :—

Soirée de Gala offered by H. E. The Prime Minister.

(Semiramis Hotel Evening dress).

TUESDAY, 14th, 8.30 :—

Visit to the Ophthalmic Hospital at Rod-El-Farag, Lunch at the Delta Barrage.

◀ 17.00-18.00 : Meeting of delegates of the Federation.

◀ 18.00-18.30 :— Meeting of the Council.

◀ 18.30 : General Meeting.

Choosing the city for the meeting of the next International Congress and closing of the congress.

During and by the inauguration of the congress the following publications were distributed to the congressists :—

Two official subjects Volumes.

Report of the Ophthalmic Hospitals Section year 1936. Guide book and map of Cairo.

Report of the Egyptian Ophthalmological Society 1936.

Invitation cards.

Memorial Medals and emblems of the Congress.

The Congress transactions are under print and will be distributed among the members of the congress and the Medical Bodies all over the world.

It is pleasant to record that the congress was a real success as confirmed by the delegates and Professors who attended it.

TABLE I. WORK DONE AT ALL OPHTHALMIC HOSPITALS DURING 1937.

1.—IN-PATIENTS : TOTAL NUMBER (Number of available beds 1747).	38,042
Number of diets issued	<u>510,037</u>
2.— OPERATIONS :—	
I. Major :—	
(a) Senile cataract	1,858
(b) Soft cataract	369
(c) Trichiasis or entropion	111,976
(d) Other operations	<u>25,773</u>
TOTAL	139,976
II. Minor (including mechanical treatment of trachoma)	<u>211,160</u>
GRAND TOTAL, major and minor operations = number of operations, Page 14.	<u>351,136</u>
3.—OUT-PATIENTS :—	
I. Incurable ⁽¹⁾	2,319
II. Postponed	9,565
III. Tickets issued, <i>i. e.</i> new cases	1,213,781
IV. Old cases	6,665,796
V. Visits made by patients to hospital for treatment = (I+II+III+IV)	7,891,461
VI. Average number of visits made to hospital by each patient under regular treatment (old cases + tickets issued) ÷ tickets issued.	
The factor of incurable cases is neglected	6.4
VII. Discharges :—	
(a) Cured	992,954
(b) Relieved	229,287
(c) Incurable ⁽²⁾	3,486
(d) Spontaneously ceased to attend after having attended only once	72,159
(e) ◀ ◀ ◀ ◀ ◀ more than once	101,683
VIII. Trichiasis cases seen among new out patients :—	
(a) No previous operation having been performed	88,535
(b) Previous operation performed unsuccessfully (not at an Ophthalmic Hospital, but probably by some charlatan).	6,466
IX. Spectacles ordered	2,783
X. Constant wash cases (number of days' treatment)	1,976,032
XI. Ages of patients examined :—	
Under one year	78,598
From 1 to 5 years	133,352
◀ 6 ◀ 10 ◀	120,649

(1) Incurable cases do not receive tickets, but are recognized as soon as seen by the surgeon as both incurable and devoid of surgical interest.

(2) Incurable cases include those which are recognized as soon as seen by the surgeon as incurable but are given tickets for statistical or other purposes.

TABLE I. WORK DONE AT ALL OPHTHALMIC HOSPITALS DURING 1937 (Cont.)

3—OUT-PATIENTS (Contd):—		
Form 51 to 55 years		42,656
< 56 < 60 <		38,198
< 61 < 65 <		27,972
< 66 < 70 <		19,012
Over 70 years		10,253
TOTAL (equal tickets issued)		<u>1,213,781</u>
XII. Origin of patients :—		
Patients from :—		
(a) Town in which hospital is situated		406,521
(b) Markaz in which hospital is situated		439,744
(c) Other Markazes of same Mudiriya		234,958
(d) Other Mudiriyas or Gevernorates		132,558
TOTAL (equal tickets issued)		<u>1,213,781</u>

TABLE II.—LIST OF DISEASES.

AMETROPIA :—		
Hypermetropia		1,750
Myopia		2,550
Astigmatism		1,587
Presbyopia		2,598
CONJUNCTIVA :—		
Conjunctivitis, gonococcal		55,682
< Morax-Axenfeld		6,145
< Koch-Weeks		29,251
< pneumococcal		3,562
< diphtheritic		14
< membranous		491
Other organism or negative and unclassified		29,992
Trachoma I		95,443
< II a		162,046
< II b'		19,820
< II b''		2,294
< II c		5,283
< III including post-trachomatous degeneration		739,613
< IV		51,951
Phlyctenule		47,597
Pterygium		10,988
Pinguecula		3,034
Xerosis		4,200
Symblepharon		438
Dermoid		42
Other conditions :—		
Argyrosis		4,132
Colloid and hyaline degeneration		177
Hypertrophied caruncle		580
Injuries (foreign bodies, burn, etc.)		1,123

TABLE II.—LIST OF DISEASES. (Cont.)

CONJUNCTIVA (Cont.) :—	
Cyst	455
Fibroma	20
EYELIDS :—	
Pediculus ciliaris	3,464
Trichiasis and entropion	101,080
Distichiasis	149
Ectropion	2,302
Lagophthalmos	1,168
Blepharitis	119,498
Hordeolum	3,859
Wart	883
Chalazion	4,759
Eczéma	2,167
Rodent ulcer	29
Dermoid	135
Ptosis	1,065
Erysipelas	14
Herpes	91
Chancre	2
Epithelioma	17
Other tumours	237
Leucoderma	69
Injuries and abscesses	2,618
LACRIMAL APPARATUS :—	
Lacrimal fistula	571
Stenosis of the duct	735
Dacryocystitis, acute	737
« chronic	12,435
Cyst of lacrimal gland	104
CORNEA :—	
Ulceration, simple	55,254
« hypopyon	2,773
« perforation	11,757
« special forms	1,853
Pannus	98,269
Keratitis, interstitial	62
« trachomatous	10,203
Nebula or leucoma	37,8674
Adherent leucoma	125,321
Totally opaque cornea	17,058
Staphyloma	9,695
Xerosis of cornea	2,127
Abscess of cornea	59
Conical cornea (Congenital)	30
Keratitiasia	3,766
Injuries (burn, foreign bodies, etc.)	3,571
LIMBUS :—	
Tumours	43
Dermoid	54
Epithelioma	28

TABLE 11.—LIST OF DISEASES (*Cont.*)

IRIS :—		
Anterior synechia		10952
Posterior „		5878
Inflammation		2335
Iris bombé		36
Irido-dialysis		104
Congenital coloboma		63
Aniridia		17
Persistent pupillary membrane		107
Iridodonesis		1210
Various		142
SCLEROTIC :—		
Ciliary staphyloma		3323
Episcleritis		54
Injuries		93
CHOROID :—		
Coloboma		19
Rupture		8
Disseminated choroiditis		17
Choroido-retinitis		29
Atrophy of choroid		91
Tumours		9
Albinismus		37
RETINA :—		
Retinitis, albuminuric and diabetic		14
„ syphilitic		16
„ pigmentosa		47
Detachment of retina		117
Embolism and thrombosis of retinal vessels		5
Glioma		12
Other conditions		42
Night blindness (in which retinitis pigmentosa is absent)		386
OPTIC NERVE :—		
Neuritis		35
Atrophy (See table of causes of Optic Atrophy, page 11)		141
Opaque nerve fibres		37
Other conditions		5
LENS :—		
Cataract, senile		4579
„ soft		474
„ traumatic		204
„ lamellar		25
„ anterior polar		3732
„ posterior „		134
„ dislocated, traumatic		259
„ „ operative		26
„ „ congenital		5
Aphakia		2801
Secondary cataract		412
Ectopia lentis		4

TABLE 11.— LIST OF DISEASES (cont.)

VITREOUS :—		
Opacities		354
Foreign bodies		2
MUSCLES :—		
Strabismus, alternating		2,808
" convergent		23,015
Strabismus divergent		22,749
Heterophoria		149
Nystagmus		2,968
Paralysis		39
GLAUCOMA :—		
Primary, acute	} Including absolute glaucoma caused by acute, sub- acute or chronic glaucoma.	216
" sub-acute		656
" chronic		7,823
Secondary		12,465
GLOBE :—		
Shrunken globe		23,667
Buphthalmos		56
Exophthalmic goitre		32
Panophthalmitis		436
Microphthalmos		54
Anophthalmos		9
Injury		249
ORBIT :—		
Tumours		43
Cellulitis		45
Tenonitis		7
Periostitis		16
Injuries		85
Cyst, frontal		3
" ethmoidal		3
Contracted socket		138
Fly-blown		15

TABLE III.—CAUSES OF OPTIC ATROPHY.

OPTIC ATROPHY :—		
A ⁽¹⁾ Primary :—		
The spinal diseases causing the condition are :—		
G.P.I.		7
Tabes		

(1) Patients are accounted blind who cannot count fingers at one metre.

TABLE III. CAUSES OF OPTIC ATROPHY (cont.)

Disseminated sclerosis	—
Lateral sclerosis	—
Spastic paraplegia	—
Lebers hereditary optic atrophy	—
Congenital optic atrophy	—
Unknown	33
It may also be caused by :—	
Arterio-sclerosis	1
(2) Compression of the optic chiasma or of the optic nerve by a tumour or injury by a projectile or bony fracture may produce optic atrophy of a primary type	
(3) Retro-bulbar neuritis :—	
The acute form causes atrophy of the optic nerve, primary in type, not infrequently.	
The chronic form more rarely.	
Acute retro-bulbar neuritis. The causes are :—	
a) Sepsis (dental, periostitis, middle ear, accessory sinuses)	1
b) Acute fevers (including syphilis and rheumatism)	27
c) Intoxications (alcohol, lead)	—
d) Nervous diseases (disseminated sclerosis, acute myelitis)	—
Chronic retro-bulbar neuritis may be caused by tobacco, alcohol, diabetes, iodoform, opium, etc.	
B. Post-neuritic :—	
The causes of optic neuritis, all of which may be followed by post neuritic atrophy, are as follows :—	
a) Sepsis (dental, periostitis, middle ear, accessory sinuses)	11
b) Acute fevers (including syphilis and rheumatism)	41
c) Intoxications (kidney disease and diabetes alcohol, felixmas)	1
d) Nervous diseases : Diss. sclerosis, G.P.I., epilepsy	1
e) Anæmia	1
f) Unknown	17
Total	141

TABLE IV.—LIST OF OPERATIONS.

EYELIDS :—	
For trichiasis and entropion :—	
Snellen's	96146
Anagnostakis	806
Snellen-Anagnostakis	4468
Canthoplasty	2676
Grafting mucous membrane	7463
Electrolysis (minor)	7294
Excision of lash (minor)	1192

TABLE IV. LIST OF OPERATIONS (cont.).

Other operations	417
For Ectropion :—	
Plastic	30
Mac Callan's	—
Kenneth Scott's	2
Kuhnt's	22
Other operations	64
For ptosis	29
For symblepharon	121
For hordeolum and chalazion (minor)	5317
Cyst removed	187
Wart excised (minor)	366
Restitching wounds (minor)	109
Opening abscesses (minor)	2725
Various	334
CONJUNCTIVA :—	
For trachoma :—	
Expression or Mechanical Treatment (minor)	110283
Combined excision of Heisrath	967
Post-trachomatous degeneration (minor)	79047
Other operations } (minor)	463
} (major)	397
Pterygium	5399
CORNEA :—	
Foreign body removed (minor)	2718
Sæmisch's section	198
Cautery	452
Various	136
IRIS :—	
Iridectomy for adherent leucoma	3809
« visual	473
« for glaucoma	1473
« preliminary for cataract	242
Cystoid cicatrix	9
Division of anterior synechia	8
Various	135
LACRIMAL SAC :	
Excision	7326
Various (minor)	1646
LENS :—	
For senile cataract :—	
Extraction with iridectomy	1543
« after previous iridectomy	315
For membrane after extraction :— Discission	619
For soft cataract :—	
Extraction	195
Discission	174

LIST OF OPERATIONS (cont.)

Curette evacuation	238
Paracentesis	22
For membrane after evacuation :—	
Discission	43
Capsulotomy	1
GLOBE :	
Trephining of cornea-sclera with iridectomy	1,231
Trephining	44
Excision	478
Evisceration	475
Paracentesis	507
ORBIT :—	
Exenteration	9
For tumour	43
For dermoid	21
For cellulitis	75
For cyst, frontal	—
" ethmoidal	—
Tenotomy and advancement	—
Other major operations	139
Trial with magnet :—	
Positive	3
Negative	12
TOTAL = total number of major and minor operations, page 1	351136

September	119538
October	115121
November	89113
December	46425
Total	1213781

TABLE IX.—AVERAGE TEMPERATURE

The average temperature was arrived at by taking one place in Lower Egypt (Gemeiza) one place in Cairo (Giza) and one place in Upper Egypt (Assiut) and obtaining an average figure from the mean temperature at each place on each month. This is shown in appended table, the reading being in degrees.

Months	Gemeiza	Giza	Assiut	Average
January	11.7	10.4	10.5	10.3
February	13.0	13.7	14.0	13.6
March	15.4	16.4	18.0	16.6
April	19.0	20.3	23.0	20.3
May	23.8	23.2	27.0	24.0
June	24.4	25.6	27.4	25.8
July	25.8	27.6	29.2	27.5
August	26.2	27.2	29.0	27.5
September	25.2	25.5	27.8	26.2
October	22.4	22.8	24.5	23.2
November	19.0	19.0	19.4	19.1
December	13.6	13.0	13.8	13.5

N.B.—It is noticed in this table that the percentage of blindness varies in one hospital in different years. This is most probably due to several reasons ; the important of which are : that the same blind patient might have visited the same hospital several times, that the patient might have visited several hospitals, that the surgeons of the same hospital are changed and also due to the amount of care exercised in booking those cases.

TABLE XIII.—BLINDNESS AMONG OUT-PATIENTS SINCE 1909

YEAR	Total Number of Patients examined	One eye including cataract cases		Both eyes including cataract cases		One eye and both eyes including cataract cases		One eye excluding cataract cases		Both eyes excluding cataract cases		One eye and both eyes excluding cataract cases
