INTRODUCTORYCITY OF PIETERMARITZBURG.PUBLIC HEALTH DEPARTMENT.

To  
His Worship the Mayor  
and Members of the Council of the  
City of Pietermaritzburg.

Ladies and Gentlemen,

I have the honour to present the Annual Report on the Health and Sanitary Circumstances of the City of Pietermaritzburg, for the calendar year 1960.

Infectious disease figures were a little lower than last year. Tuberculosis incidence increased in Non-Europeans, while Poliomyelitis incidence was again low. Infantile Mortality worsened in Coloureds, but was much lower in Natives. Death rates were a little higher in all races, Cancer deaths in Europeans being double last year's total. Birth rates were unchanged in Europeans, but rose in all the Non-European races.

245 Council houses were built for Asiatics at Northdale. The building of a new Administration Block at the Abattoir was commenced during the year, the Abattoir again experiencing a record year of slaughtering.

It is with deep regret that I have to record the death shortly after retiring through ill health, of Mr. G.B. Lupton. Mr. Lupton served in this department for 43 years and was Abattoir Manager for 30 years.

I wish to express my thanks to all members of the Staff for the high level of efficiency maintained in the Department throughout the year.

In conclusion, I wish to record my appreciation of the support readily given to me at all times by the Mayor, the Chairman and members of the Public Health Committee, and of the cordial co-operation of the various Municipal Heads of Departments.

I have the honour to be,

Ladies and Gentlemen,

Your obedient servant,

M. Maister,

MEDICAL OFFICER OF HEALTH

THE UNIVERSITY OF CHICAGO  
PHYSICS DEPARTMENT

THE UNIVERSITY OF CHICAGO  
PHYSICS DEPARTMENT  
5720 S. UNIVERSITY AVENUE  
CHICAGO, ILLINOIS 60637

PHYSICS DEPARTMENT

I have the honor to acknowledge the receipt of your letter of the 15th of October, 1954, in regard to the application for a position of Lecturer in Physics.

Your curriculum vitae and the letters of recommendation from the University of California at Berkeley and the University of Wisconsin are being reviewed by the Department. I am sure that you will find the results of this review to be most favorable.

The Department is pleased to hear that you will be returning to Chicago in the fall of 1955. We are sure that your presence will be a great asset to the Department.

It is with great regret that I have to report the death of your father, Mr. J. Edgar Smith, on October 10, 1954. My sincere sympathies are extended to you and your mother.

I am sure that you will find the results of this review to be most favorable.

In conclusion, I wish to thank you for your letter of the 15th of October, 1954, and for the information you have given me regarding your present position and your plans for the future.

Very truly yours,

Robert Serber

Chairman, Department of Physics

5720 S. University Avenue

Chicago, Illinois 60637

BIRTHS AND DEATHS ARE CORRECTED FOR OUTWARD TRANSFERS ONLY.

(1) VITAL STATISTICS:POPULATION:

This is an estimate of the population as at December 31st, 1960, calculated for Vital Statistical purposes. This estimate is based on the Government Census of May 8th, 1951, and the Government Census of September 6th, 1960.

	European	Native	Coloured	Asiatic	All Non-Eur.	All Races
Male	18,600	16,890	2,270	11,000	30,160	48,760
Female	19,940	10,310	2,341	10,590	23,241	43,181
PERSONS	38,540	27,200	4,611	21,590	53,401	91,941

These figures differ quite considerably from the estimates previously made on the basis of the Municipal Census of 1946 and the Government Census of 1951, and illustrate the need for a regular census.

On the basis of the old figures the estimated population for 1960 would have been as follows:-

	European	Native	Coloured	Asiatic	All Non-Eur.	All Races
Total Populn.	43,500	33,190	5,603	35,020	73,813	117,313

TOTAL BIRTHS REGISTERED(A) RESIDENTS

	Male		Female		Persons			Percentage of Illeg. to all Births	Birth Rate per 1,000 Population
	Leg.	Illeg.	Leg.	Illeg.	Leg.	Illeg.	Total		
European	362	2	385	4	747	6	753	0.8%	19.5
Native	127	239	102	235	229	474	703	67.4%	25.8
Coloured	95	14	90	11	185	25	210	11.9%	45.5
Asiatic	370	1	374	3	744	4	748	0.5%	34.6

DEATHSTOTAL DEATHS REGISTERED (RESIDENTS)

	Male		Female		Persons	
	Deaths	Rate per 1,000 Male Population	Deaths	Rate per 1,000 Female Population	Deaths	Death Rate (per 1,000 Population)
European	176	9.5	142	7.1	318	8.3
Native	122	7.2	88	8.5	210	7.7
Coloured	25	11.0	14	6.0	39	8.5
Asiatic	109	9.9	53	5.0	162	7.5
ALL NON-EUR.	256	8.5	155	6.7	411	7.7
ALL RACES	432	8.9	297	6.9	729	8.0

DEATHS: (Pages 5 - 7).

Death rates were higher this year in all races.

The death rate for all races was 8.0 as compared with 6.4 last year.

The following figures indicate the percentage of deaths occurring below the age of 45 in the various races:-

European	:	13.8%	(16% last year)
Native	:	13.3%	(76% last year)
Coloured	:	51.3%	(48% last year)
Asiatic	:	48.8%	(57% last year)
All Non-European	:	61.6%	(67% last year)

These figures once again show how much better the expectation of life is for Europeans than for Non-Europeans. The table on page 7 also indicates that Cardiac and Circulatory System disease far outweighs all other causes of death among Europeans. Among Non-Europeans, Respiratory Diseases was the main cause of death.

TABLE 1

UNIT WEIGHTS OF CONCRETE

Type of concrete	Wet weight		Dry weight	
	lb/cu ft	kg/cu m	lb/cu ft	kg/cu m
Normal weight concrete	145	2320	140	2240
Light weight concrete	120	1920	115	1840
Structural concrete	150	2400	145	2320
Mass concrete	160	2560	155	2480

TABLE 2

Approximate values for unit weights of concrete

The unit weights of concrete are given in Table 1. The values are based on the following assumptions: 1. The concrete is of normal weight. 2. The concrete is of standard strength. 3. The concrete is of standard curing conditions.

Concrete type	Wet weight (lb/cu ft)	Dry weight (lb/cu ft)
Normal weight	145	140
Light weight	120	115
Structural	150	145
Mass	160	155

These values are based on the following assumptions: 1. The concrete is of normal weight. 2. The concrete is of standard strength. 3. The concrete is of standard curing conditions. 4. The concrete is of standard curing conditions.

## DEATHS AND DEATH RATES (PER 1,000 POPULATION) : VARIOUS CAUSES.

(2) INFECTIOUS DISEASE

There were 242 notifications of infectious disease as compared with 265 in 1959. (See page 8).

ISOLATION HOSPITAL (EUROPEAN INFECTIOUS DISEASE) (Page 54).

Altogether 156 patients were admitted during the year 1960, 116 Borough and 40 Out-of Borough. Figures for previous years were:-

1959 : 202; 1958 : 184; 1957 : 180; 1956 : 243; 1955 : 147; 1954 : 117;  
July-December, 1953 : 90; 1951-1952 : 222; 1950-1951 : 204.

Cases of Puerperal Sepsis, Typhoid Fever and Tuberculosis, are provided for usually at Grey's Hospital - the Provincial General Hospital - and King George V - Springfield Hospital for Tuberculosis in Durban. Europeans needing hospitalisation for Venereal Disease are sent by arrangement to Wentworth Hospital, Durban. Cases of Anterior Poliomyelitis are now admitted to the Isolation Hospital for the first 3 weeks (the presumably infectious period) of their illness, and then transferred to the General Hospital or to the Uplands Orthopaedic Home, for further treatment in the case of Europeans, or to the General Hospital Wards or Out-Patient Departments in the case of Non-Europeans.

NON-EUROPEAN INFECTIOUS DISEASES HOSPITAL (Page 54).

Admissions during 1960 totalled 339, 105 Borough and 234 Out-of-Borough cases, a decrease on last year's total of 384. Admissions during previous years have been as follows:-

1959 : 284; 1958 : 400; 1957 : 381; 1956 : 414; 1955 : 331; 1954 : 256;  
July-December, 1953 : 130; 1951-1952 : 223; 1950-1951 : 304;

AMBULANCE.

The following figures have been furnished by the courtesy of the City Engineer:-

- 1) Total number of cases removed : 4,929
- 2) Infectious cases removed : 835

LABORATORY WORK.

Laboratory work done by the Pathologist, Dr. D. G. Cowie:

Swabs for Diphtheria Bacilli .....	150
Swabs for Haemolytic Streptococci .....	225
Smears and swabs for Gonococcus, organisms, etc. ....	2
Cerebro-spinal Fluids .....	19
Blood (Vi, Sugar and other examinations) .....	0
Blood (Counts, Smears) .....	10
Cough Plates .....	0
Sputum and Pleural Fluids (T.B. etc.) .....	0
Stools (Parasites, T.B., S. Typhi, etc.) .....	14
Urines (Chemical, microscopic, diastatic index, etc.) .....	11
Milk - for Bacterial Count .....	74
Milk - Phosphatase Test .....	112

THE UNIVERSITY OF CHICAGO  
DEPARTMENT OF CHEMISTRY  
CHICAGO, ILLINOIS

REPORT OF THE COMMITTEE ON THE  
PROGRESS OF CHEMISTRY IN  
1954

The following report was prepared by the  
Committee on the Progress of Chemistry  
in 1954. It is a summary of the  
work done in the Department of  
Chemistry during the year.

The work done in the Department of  
Chemistry during the year 1954  
has been summarized in the  
following report.

The following report was prepared by the  
Committee on the Progress of Chemistry  
in 1954. It is a summary of the  
work done in the Department of  
Chemistry during the year.

The following report was prepared by the  
Committee on the Progress of Chemistry  
in 1954. It is a summary of the  
work done in the Department of  
Chemistry during the year.

LABORATORY WORK Cont'd.

Laboratory work done by Municipal Bio-Chemist:

Milk - for Phosphatase Test .....	75
Water - for Bacteriological Count .....	45

Work done in Departmental Laboratory:-

No. of Mosquito larvae examined	:	361
No. of Mosquito adults examined	:	0
No. of Snails examined	:	228
No. of Physopsis identified	:	14

NOTIFIABLE INFECTIOUS DISEASE.

- (a) ANTHRAX. No cases notified.
- (b) SMALLPOX. No cases were reported this year.

VACCINATION.

Every Native registering at the Municipal Pass Office is vaccinated when he is medically examined. (See page 23).

In addition, vaccination of infants (all races) has been carried out at the Municipal Infant Welfare Clinics, and adults applying to the Public Health Department are also vaccinated. This service serves to supplement the free service available to the public through the Public Vaccination carried out by the District Surgeon.

The Registrar of Vaccination has supplied the following figures of total vaccinations in Pietermaritzburg, reported to the Registrar of Vaccination.

Successful Vaccinations (under 2) .....	148
Successful Vaccinations (over 2) .....	33
Insusceptible to Vaccination (under 2) .....	5
Insusceptible to Vaccination (over 2) .....	3
Exempted from Vaccination .....	0

The number of vaccinations carried out by this Department at its Clinics during this period was 2406 (Eur. 668; Nat. 339; Col. 286; As. 1113).

(c) DIPHTHERIA.

The total number of cases notified in 1960 was 17 (including 2 "carriers"), as compared with 33 last year, and 1 European and 1 Native died from this disease. Both the deaths occurred in non-immunised children.

The immunisation history in 14 known cases (confirmed by Virulence tests) admitted to our hospitals during 1960 was as follows:-

Immunised	Non-Immunised
Total cases : 2 (2 Eur.; 0 Non-Eur.)	Total cases : 12 (6 Eur.; 6 Non-Eur.)
Deaths : Nil	Deaths : 1 (1 Non-Eur.)

2,322 Immunisation courses against Diphtheria were completed at the Infant Clinic Sessions, a small increase on last year's figure of 2,254. (Eur. 596, Nat. 197; Col. 243; As. 1,296.

THE UNIVERSITY OF CHICAGO  
DEPARTMENT OF CHEMISTRY  
CHICAGO, ILLINOIS

TO THE DIRECTOR OF THE UNIVERSITY OF CHICAGO  
FROM THE DEPARTMENT OF CHEMISTRY  
DATE: 1954

RE: [Illegible Title]

The following information was obtained from the  
analysis of the sample submitted to the Department of  
Chemistry, University of Chicago, on [Illegible Date].  
The sample was found to contain [Illegible] and [Illegible].  
The results of the analysis are given in the table  
below.

Element	Found (%)	Calculated (%)
Carbon	68.5	68.0
Hydrogen	10.2	10.0
Nitrogen	11.3	11.5

The above results are in good agreement with the  
calculated values for [Illegible].

The sample is identified as [Illegible].

Prepared by [Illegible]	Checked by [Illegible]
Date [Illegible]	Location [Illegible]

Very truly yours,  
[Illegible Signature]

- \* Includes 8 carriers.
- " Includes 6 carriers.
- o Includes 2 carriers.
- Includes 1 carrier.

No figures are available of the number of persons immunised by private practitioners, but many European children are being immunised by private practitioners.

(d) SCARLET FEVER.

49 Cases were notified as compared with 53 cases last year. The disease continued to be mild.

(e) CEREBRO-SPINAL MENINGITIS. ...../

(e) CEREBRO-SPINAL MENINGITIS.

4 Cases were notified during the year, as compared with 3 last year.

(f) ANTERIOR POLIOMYELITIS.

Only 6 Cases (5 Eur. and 1 Nat.) were notified this year, as compared with 4 last year. There were no deaths amongst these cases. 2 Of the European cases were non-paretic.

As vaccine was freely available, it was possible to offer the vaccine to the numerous adults up to the age of 40 who applied to the Department, as well as to children. Oral vaccine was also issued in November to persons between the ages of 3 months and 30 years. This vaccine was a Type I vaccine only.

Reactions to the vaccines were few in number and in no case became serious. During 1960 this Department administered the following Anti-Poliomyelitis inoculations:-

	First Inoculations	Second Inoculations	Third Inoculations	Fourth Inoculations	Total
Europeans	1,148	1,225	950	1,015	4,338
Natives	93	73	37	-	203
Coloureds	400	277	222	161	1,060
Asiatics	1,347	891	443	162	2,843
TOTAL :	2,988	2,466	1,652	1,338	8,444

ORAL POLIOMYELITIS VACCINATION.

Europeans	: 9,160
Natives	: 2,434
Coloureds	: 2,143
Asiatics	: 5,534
<u>Total</u>	<u>: 19,271</u>

The annual incidence of Poliomyelitis in Pietermaritzburg is shown in the following table of notifications:-

1941 - 0;	1942 - 12;	1943 - 2;	1944 - 15;	1945 - 7;
1946 - 0;	1947 - 2;	1948 - 32;	1949 - 4;	1950 - 1;
1951 - 11;	1952 - 3;	1953 - 3;	1954 - 25;	1955 - 20;
1956 - 51;	1957 - 20;	1958 - 4;	1959 - 4;	1960 - 6;

Poliomyelitis cases are treated in the Municipal Isolation Hospitals for a period of three weeks and then transferred to the Provincial Hospitals or to the Uplands Orthopaedic Home for further orthopaedic treatment when required.

(g) ENCEPHALITIS.

No cases of Infective Encephalitis were notified (as compared with 7 last year). 2 Brough cases of Measles Encephalitis were admitted to the Isolation Hospital.

(h) ENTERIC FEVER.

4 Cases were notified, 2 European, 1 Native and 1 Asiatic, as compared with 10 cases last year.

Date	Description	Amount	Balance	Total	Remarks

1913	Jan 1	500.00	500.00	2950.00	Deposit

(h) ENTERIC FEVER. (Cont'd.)

50 Persons were immunised (18 Europeans, 16 Natives, 10 Coloureds, 6 Asiatics), contacts of patients suffering from Typhoid Fever. (See also page 21, section (10) Milk Supplies). In addition, employees of the City Engineer's Department at the Sewerage Farm and in the Water Section are immunised yearly. (17 Europeans, 53 Natives).

(3) TUBERCULOSIS. (Pages 38-39).

Notifications of Pulmonary Tuberculosis totalled 140, a small increase on last year's total of 133, 8 of these being of Europeans. Notifications of Non-Pulmonary Tuberculosis totalled 5 (all Non-European), as compared with 7 last year.

61 Borough cases (44 Natives, 5 Coloureds and 12 Asiatics) were admitted to our Non-European Infectious Diseases Hospital.

Responsibility was accepted for the treatment of Pietermaritzburg cases of Pulmonary Tuberculosis at other hospitals as follows:-

Grey's Hospital	: Eur. 1; Col. 3.
King George V / Springfield Hosp.	: Eur. 9; Nat. 5; As. 4.
Edendale Non-European Hospital.	: Nat. 19; As. 6.
S.A.N.T.A. Doris Goodwin Centre	: Nat. 12.
F.O.S.A., Durban	: As. 1.
Other Hospitals	: Eur. 1; Nat. 5; As. 1.

The Natal Anti-Tuberculosis Association rendered assistance to 49 families in Pietermaritzburg (2 European, 33 Native, 11 Coloured and 3 Asiatic).

The following tables illustrate the trend in notifications and deaths from this disease over the period 1934-1960:-

\* Includes 1 case also notified as Pulmonary Tuberculosis.

There was a very slight improvement in the European notifications of this disease this year, but the Non-European total rose again due mainly to an increase in the Asiatic notifications. The total of deaths was the same as last year. Approximately 26% of the total expenditure by this Department was under the head "Anti-Tuberculosis Measures".

MINIATURE MASS RADIOGRAPHY.

In 1954 the City Council installed a 70 mm. Miniature X-Ray set (a fixed unit) in the Public Health Department.

The following table indicates the type of patient coming to or being referred to the unit for a Miniature X-Ray:- (See page 45 for detailed breakdown of these figures).

	European	N-European	Total
Referred ex Native Pass Office med. exam.	-	14,059	14,059
Referred for Pre-employment X-Ray	99	289	388
Referred by Employers	54	950	1,004
Referred by Doctors	242	1,082	1,324
Referred by Health Visitor	201	584	785
Applied Voluntarily for Miniature X-Ray	293	332	625
Follow-up X-Rays of cases attending Municipal Clinics or in T.B. or other Hospitals	52	941	993
<b>Total Persons X-Rayed</b>	<b>941</b>	<b>18,237</b>	<b>19,178</b>

REVENUE

Year	1900	1901	1902	1903	1904	1905	1906	1907	1908	1909	1910	1911	1912	1913	1914	1915	1916	1917	1918	1919	1920
...	...	...	...	...	...	...	...	...	...	...	...	...	...	...	...	...	...	...	...	...	...

The following table shows the revenue for the year 1920. The total revenue for the year was \$1,000,000. This was an increase of 10% over the previous year. The revenue was derived from various sources, including taxes and fees. The following table shows the breakdown of the revenue for the year 1920.

Source	Revenue
Taxes	\$800,000
Fees	\$150,000
Other	\$50,000
Total	\$1,000,000

(3) TUBERCULOSIS Cont'd.

The final results of investigations carried out on cases suspected to be suffering from Pulmonary Tuberculosis as a result of the Miniature X-Ray revealed the following:-

	<u>European</u>	<u>Non-European</u>	<u>Total</u>
Active cases of Pulmonary T.B.	3	124	127
Arrested cases of Pulmonary T.B.	4	43	47

With the Miniature X-Ray plant available, contact examination at the T.B. Clinic has been reduced considerably, as a routine Miniature X-Ray of all contacts is now taken and only when abnormalities are noted are the contacts referred for closer investigation at the Clinic. Routine follow-up X-Rays of T.B. Patients at the Clinics and our hospitals are to a large extent being done by this Miniature plant with an occasional large plate for confirmation.

All Natives passing through the Municipal Registration Medical Examination have a Miniature X-Ray as a routine. This year's figures show that 187 out of a total of 14,059 Natives (i.e. 1.3%) were referred from the Pass Office for further investigation at the T.B. Clinic.

THE TUBERCULOSIS CLINIC (Page 44).

Staff: Medical Officer (Part-time), a European Health Visitor (Full-time), and a Native Health Assistant (Full-time).

During the year there were 2,279 attendances at the Clinic (including 1,103 Out-of-Borough cases), as compared with last year's total of 2,570. All contacts are now referred first of all to the Miniature X-Ray Clinic or Mantoux tested in the case of children and only brought to clinic if found to be abnormal, whilst patients for Streptomycin injections only occasionally attend the clinic sessions as well, being supervised from the Streptomycin Clinic.

An increasing number of notifications of infants under the age of 2 has been noted and most of these cases came from the Native Womens' Hostel in the City and from the Sobantu Village.

NOTIFICATION OF INFANTS WITH PRIMARY TUBERCULOSIS:-

	<u>European</u>	<u>Native</u>	<u>Coloured</u>	<u>Asiatic</u>
1957	3	18	-	-
1958	-	19	2	3
1959	-	16	-	2

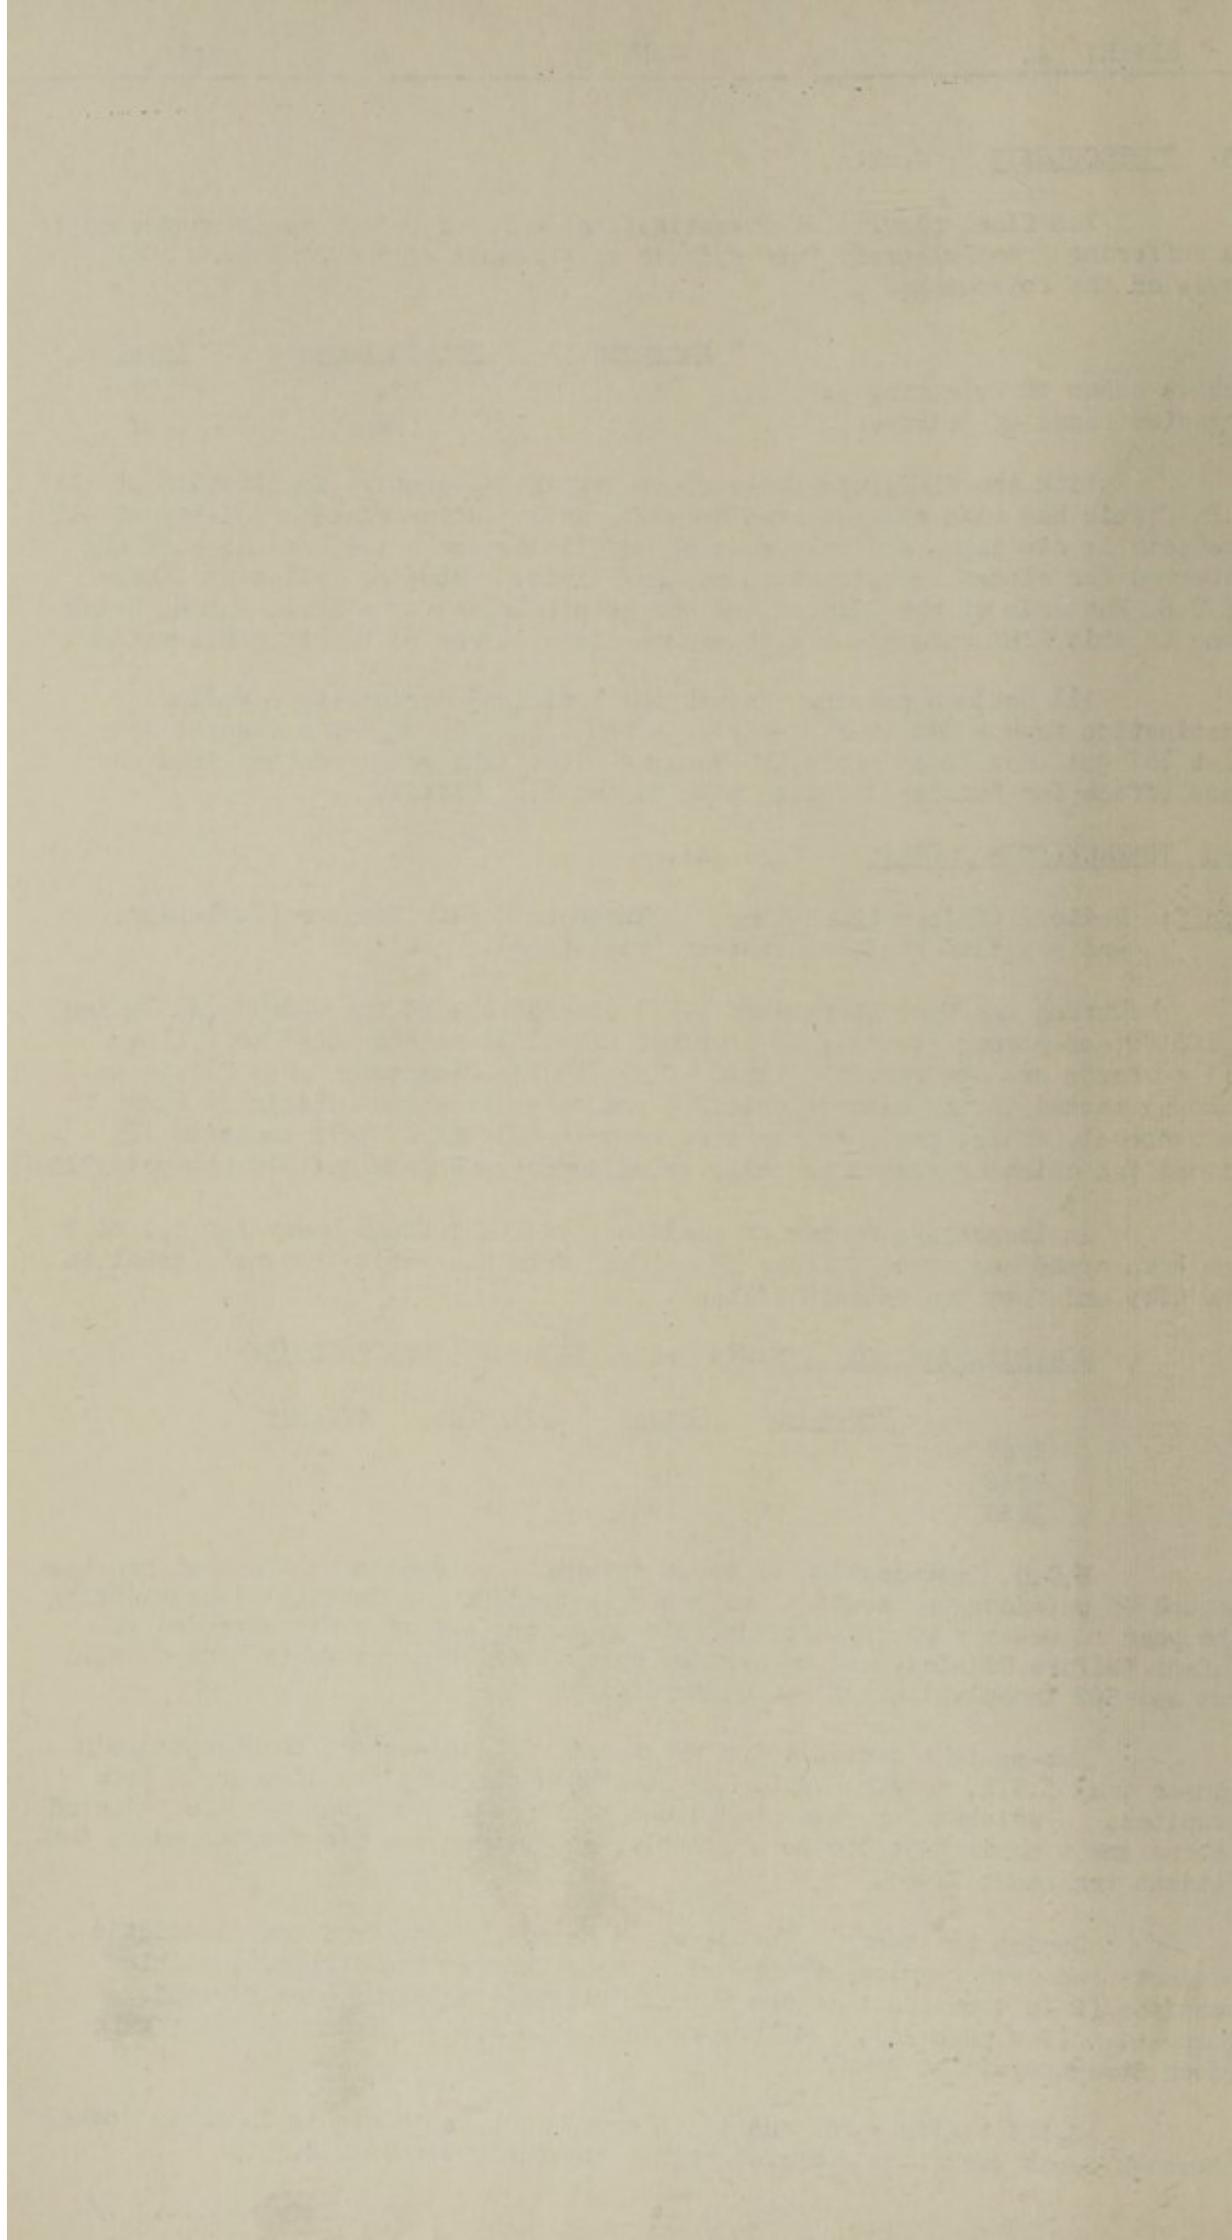

B.C.G. immunisation of these infants appeared to be the most practical method of providing protection and was commenced at the Sobantu Village during the year on newly born infants, infants up to the age of 2 who attended our Infant Welfare Clinics, and on contact cases. 620 Mantoux tests were carried out and 307 inoculations of B.C.G. were given.

Out-patient continuation treatment with injections of Streptomycin and/or Oral I.N.H. and/or P.A.S. has been used for patients discharged from hospital. Patients for whom no bed can be found in hospital are also started on treatment until beds become available, and some cases are maintained on Out-Patient treatment alone.

During the year 10 European, 54 Native, 8 Coloured and 21 Asiatic patients received regular Streptomycin injections at the 4 special clinic sessions (2 in town and 2 at the Sobantu Village) held per week for this purpose. (See page 44). 4 European patients and 1 Coloured patient were given Streptomycin at home.

3,104 Visits were made to tuberculous and contacts in their homes, (Borough cases only), as compared with last year's total of 3,030.

The following ...../

THE TUBERCULOSIS CLINIC Cont'd.

The following notified cases were on our Tuberculosis Register as at 31st December, 1960. (1959 figures in brackets for comparison):-

	<u>Eur.</u>	<u>Nat.</u>	<u>Col.</u>	<u>As.</u>	<u>All N-Eur.</u>	<u>Total</u>
Pulm. T.B.	118 (109)	591 (500)	80 (70)	238 (206)	909 (776)	1027 (885)
N-Pulm. T.B.	7 (7)	24 (21)	8 (6)	34 (33)	66 (60)	73 (67)

The Pietermaritzburg Tuberculosis Hospital : (Non-European only).

Admissions totalled 120, 61 Borough cases (44 Native, 5 Coloured and 12 Asiatic) and 59 Out-of-Borough cases (50 Native, 6 Coloured and 3 Asiatic).

1950-1951	Annual Admission Rate per Bed	.....	1.7 patients
1951-1952	" " " " "	.....	1.5 "
1952-1953	" " " " "	(including temporary beds)	.. 1.7 "
1954	" " " " "	"	.. 2.1 "
1955	" " " " "	"	.. 2.6 "
1956	" " " " "	"	.. 3.3 "
1957	" " " " "	"	.. 3.4 "
1958	" " " " "	"	.. 2.9 "
1959	" " " " "	"	.. 2.5 "
1960	" " " " "	"	.. 1.8 "

There has been no undue delay in securing the admission of European cases to King George V Hospital for Tuberculosis in Durban, there being no Tuberculosis beds available for Europeans in Pietermaritzburg.

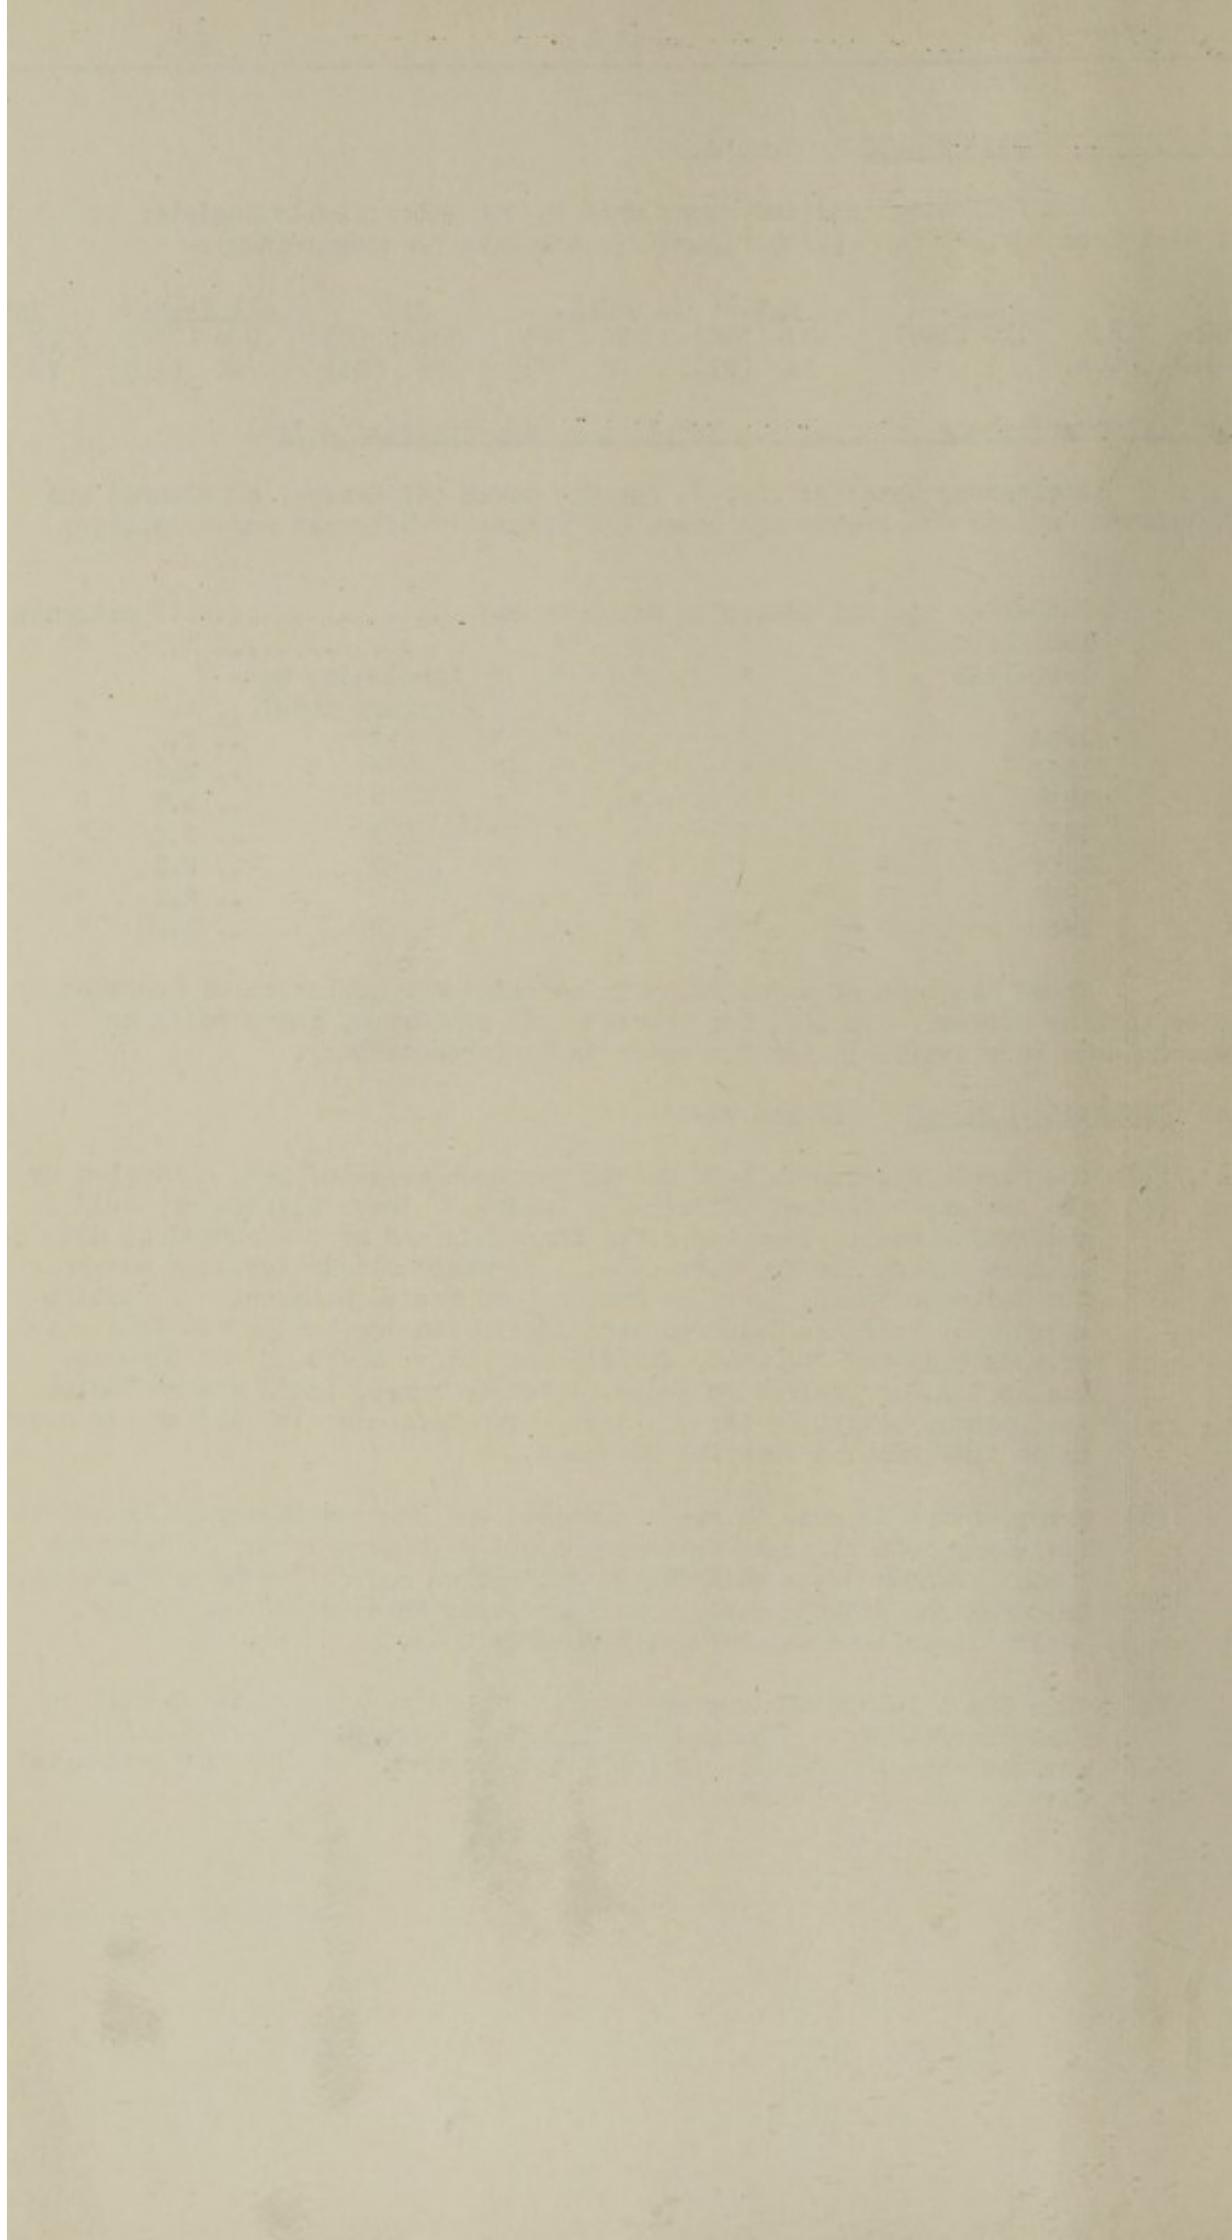

(4) VENEREAL DISEASE (Pages 49-53).

(a), (b) One Clinic Session is held weekly for each race and sex, conducted by and (c) the Assistant Medical Officers of Health. These Clinics are held in the Public Health Department for Europeans and at the Municipal Clinic in East Street for Non-Europeans. Separate Clinic Sessions are held for European Males, European Females and Native Females. A combined session is held for Coloured and Asiatic Females, and a combined session is held for Coloured, Asiatic and Native Males. One European Health Visitor (half-time only), 1 Native Nurse, and 2 Native Health Assistants, assist at the Clinics. Two Native Health Assistants devote their full time to Venereal Diseases.

(d) Every effort is made to trace contacts and sources of infection and to follow-up defaulters to ensure completion of treatment. A European Health Visitor deals with the investigation and follow-up of European, Coloured and Asiatic cases, and supervises the work of the Native Health Assistants who deal with Natives only.

(e) This Local Authority does not conduct the Ante-Natal Clinics held in Pietermaritzburg. The Medical Superintendent, Grey's Hospital, advises that the results of routine Wassermann Tests at the Ante-Natal Clinics are as follows:-

Europeans ...../

" 1960 - " 1960	346	5.8%	-	-	286	9.1%	1,111	4.8%

\* Figures for 1953 - 1954 incomplete, owing to closing down of Mayor's Walk Hospital in Pietermaritzburg, and its transfer to Edendale. Native Ante-Natal Clinics have been transferred to Edendale Hospital and are no longer held in Pietermaritzburg.

A small Ante-Natal Clinic is held in the Sobantu Village for Natives who are to be confined at home by the Municipal Midwife, and the Ante-Natal figures for that clinic are as follows:-

No. of Tests : 107.

WRs. Positive : 12 (11.2%)

- (f) The average annual attendance of patients suffering from Venereal Disease at the Clinics was as follows:-

	EUROPEAN				NATIVE				COLOURED				ASIATIC			
	Bor.		O/B.		Bor.		O/B.		Bor.		O/B.		Bor.		O/B.	
	M	F	M	F	M	F	M	F	M	F	M	F	M	F	M	F
1950-51	5.4	7.5	-	2.3	6.4	6.9	4.1	4.1	5.7	6.2	3.8	7.4	5.2	5.6	14.0	2.2

1956	2.5	3.3	0	0	3.7	4.4	2	2.6	3.7	4.4	1	2.7	2.3	2.6	-	-
1957	3.5	8.5	0	0	3.8	4.2	2.3	2.4	1.7	4.0	1	4	3.0	5.0	1	4.4
1958	2.3	4.1	0	0	3.2	4.7	2.5	2.6	2.5	6.0	1.1	3.8	2.7	4.7	-	1.6
1959	2.3	3.4	0	0	3.0	4.0	1.7	2.7	1.9	3.4	1	1	2.1	4.7	1	3.5
1960	3.8	3.0	0	2	2.8	3.4	1.3	1.8	1.8	4.0	1.6	1.8	3.1	2.9	2	2.6

These figures are arrived at by dividing the total number of Clinic Attendances for the period by the number of patients who attended the Clinics during that period.

- (g) There was a decrease in Clinic Attendances for 1960, there being 2,704 attendances during the year, as compared with last year's total of 3,210. 464 Home Visits were paid to cases of Venereal Disease, as compared with the 1959 total of 412 during the year.

EPIDEMIC HOSPITAL (Non-European V.D.)

Admissions to this hospital totalled 456, a small decrease on last year's total of 460, but indicating the decrease in this disease that has been taking place in recent years, e.g. 1,312 in 1951-2, 561 in 1954, and 358 in 1955. The daily average of in-patients totalled 7, as compared with 8 last year, and 20 in 1954.

The ...../

Year	1900	1901	1902	1903	1904	1905	1906	1907	1908	1909	1910

Wisconsin	2,500,000	23,000	109
Wyoming	500,000	97,000	5

The following table shows the population of the United States in 1910, by State and Territory, and the population per square mile. The population of the United States in 1910 was 102,000,000. The population per square mile was 150. The population of the United States in 1900 was 76,000,000. The population per square mile was 100. The population of the United States in 1905 was 90,000,000. The population per square mile was 120. The population of the United States in 1910 was 102,000,000. The population per square mile was 150.

VENEREAL DISEASE Cont'd.

The re-admissions for this period numbered 41, i.e. 9% of admissions as compared with 5.7%, 13.8%, 13.4%, 9.3% and 6.8% the preceding five years. An analysis of patients' reasons for re-admissions and for failure to continue treatment, is given in the following table:-

	<u>Male</u>	<u>Female</u>	<u>Total</u>
1) No reason given for failure to continue treatment .....	4	0	4
2) Patients thought themselves cured after only a few follow-up injections .....	2	0	2
3) Irregular follow-up treatment only .....	1	0	1
4) Patients stated no facilities for further treatment available near their homes .....	0	0	0
5) Patients unable to pay transport to obtain treatment .....	0	0	0
6) Patients unable to pay doctor for further treatment .....	0	0	0
7) Patients stated employers would not allow them to attend for further treatment or that could not leave work .....	0	0	0
8) Patients re-admitted suffering from forms of V.D. other than that originally admitted for .....	1	5	6
9) Relapsed though attended clinic fairly regularly .....	3	2	5
10) Reinfected after discharge .....	11	12	23
11) Goalred and received no further treatment ...	0	0	0

(4) PLAGUE

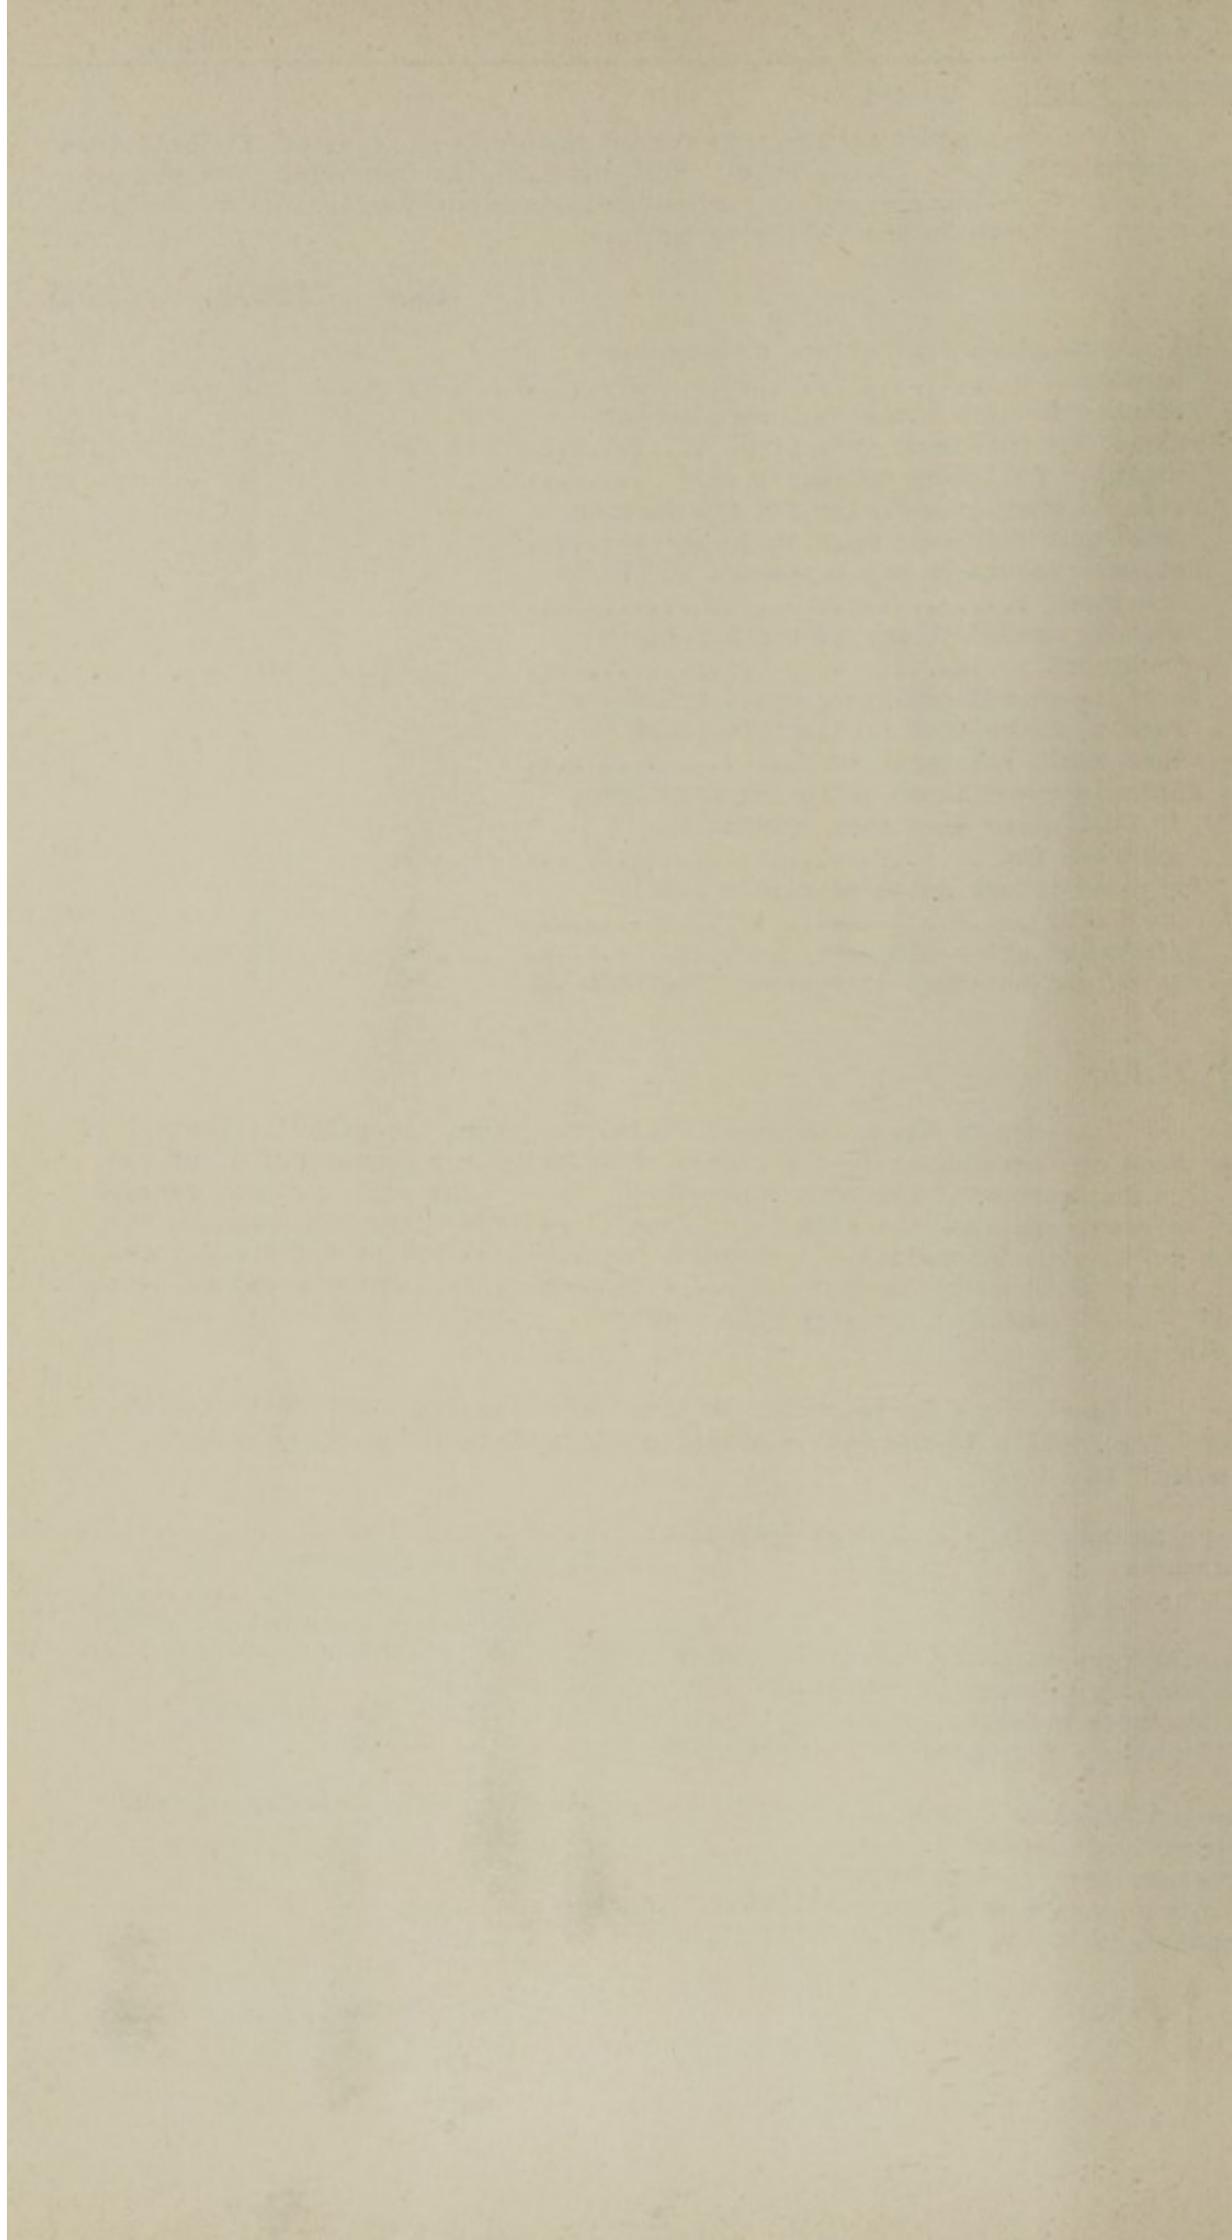

No cases of Plague occurred during the year. Regular inspecting of new shops and warehouses in the course of erection has been carried out and their rodent-proofing has been supervised. No rodent work has been carried out on commonage, but the rodent-proofing of existing infested premises has been dealt with intensively. A single Departmental Rodent Officer devotes all his time to anti-rodent measures, rodent-proofing, trapping and poisoning (with Zinc Phosphide) and also with "Sorex". Cyanogas pumping is also employed.

There are 3 Grain Stores in the City; all are now rodent-proofed. There are 2 mills in the City - additional rodent-proofing measures were required in both.

Trapping operations by Rodent Inspector: 11. Rodents trapped ..... 21  
 Poisoning " " " " : 161. Rodents Poisoned:  
 (Bodies recovered) ..... 52  
 (Amount of Poison meal used) .. 110lbs.  
 Gassing operations by Rodent Inspector : 17. Bodies recovered ..... 49  
 16 Dwellings completed rodent-proofing - 45 inspected  
 85 Business premises, shops and stores rodent-proofed - 163 inspected.  
 Stables - 5 inspected ; 1 Rodent-proofed.

New buildings in course of erection supervised for rodent-proofing : 42.  
 Vacant Lands gassed : 4.  
 Premises inspected prior to demolition : 18.  
 Premises gassed prior to demolition : 11.  
 Premises poisoned prior to demolition : 9.

(6) OTHER ...../

(6) OTHER COMMUNICABLE DISEASES:(I) MALARIA

Control by spotting of larvae and spraying of selected breeding spots has again been carried out in the Borough. No malarial mosquito vectors were discovered inside the Borough and no new infections of malaria occurred within the Borough. 3 Imported cases of malaria (from Rhodesia) were notified.

Permanent work in the way of wide open drains with grassed sides and a concrete invert, was continued in the off season.

Spraying was carried out to keep down the Anopheline population in known breeding areas and to deal with Culicine breeding which was causing a nuisance, D.D.T. suspension being used with satisfactory results.

(II) BILHARZIA

Regular surveys were carried out for the identification of snails. Copper Sulphate was used for the treatment of streams where Physopsis Africana were identified with a resultant rapid and considerable reduction in the number of snails found, treatment being repeated at 2 monthly intervals. No cases of Bilharzia were reported this year.

Snails examined	:	228
Physopsis Africana identified	:	14.

Warning notice boards have been erected at the various spots used as bathing spots.

(III) ENTERITIS in infants under the age of one year accounted for 21 deaths, (10 Native, 2 Coloured and 9 Indian), as compared with 31 last year.

(IV) MUMPS

This disease was only moderately prevalent in European children during the year, 14 cases being admitted to the (European) Isolation Hospital. Complicating encephalitis was seen in 1 case admitted to the Isolation Hospital.

(V) MEASLES

This disease was fairly prevalent in school children this year, 32 European and 18 Non-European Borough cases being admitted to the Isolation Hospitals. 4 Native and 3 Asiatic deaths from this disease were recorded. One (European) case of Measles Encephalitis was admitted to Hospital.

(VI) GERMAN MEASLES was only moderately prevalent this year.

(VII) CHICKEN POX

This disease was only moderately prevalent, 12 European and 9 Non-European cases being admitted to the Isolation Hospitals. One case was complicated by Encephalitis.

(VIII) WHOOPING COUGH

This disease was not very prevalent during the year, and no deaths were reported. Immunisation was carried out at the Infant Welfare Clinics, using a combined Whooping Cough and Diphtheria Vaccine. (See page 22-23). 15 Cases (all Natives) were admitted to our Infectious Diseases Hospitals from outside the City, and 2 European and 2 Native cases were admitted from the City area.

(7) WATER SUPPLY. (See page 58)

The water supply of Pietermaritzburg is under the control of the City Engineer's Department. It is derived from streams coming from hilly country lying to the west of the town. From the Storage Dam at Henley the water is piped to the Purification Works, where it is treated with Aluminium Sulphate Lime, before filtration. After filtration, the water is treated with Chloramine before being distributed to the six service reservoirs. New covered service reservoirs at Hathorns Hill and Bisley of approximately 5 million gallons capacity each have recently been completed.

The supply from the Purification Works and each of the service reservoirs has been bacteriologically examined each week by the bio-chemist in charge of the Purification Works. All employees at the Purification Works are Vi-tested and immunised against Typhoid Fever at the same time. No water-borne outbreaks of disease have occurred during the year. Regular bacteriological sampling of swimming bath waters has also been carried out throughout the year, and samples of well and tank waters have also been examined. It has been found that the Pietermaritzburg water supply contains no fluorine.

The water supply had proved inadequate for the expanding needs of the City, and restrictions had been imposed on the use of water. Metering was introduced and has substantially reduced the total consumption of water in the City. Consumption dropped by 21% on the introduction of this measure. It was also decided to raise the walls of the impounding dam at Henley by 23 feet so as to approximately treble the capacity of this dam and this work has now been completed, increasing the total storage capacity of the dam to 1,420 million gallons and providing an assured daily yield of 8 million gallons. The present use in Pietermaritzburg is about 5.5 million gals per day.

(8) NIGHTSOIL AND DISPOSAL

The administration of this work is in the hands of the City Engineer. The greater part of the Town and Suburbs is served by water-borne sewerage, although the conservancy system is still in use in certain outlying areas. Disposal is on the sewage farm about 3 miles from the centre of the Town. The City Council acquired adjoining land, in order to extend the area available for sewage disposal, and a modern filtration plant was completed in 1956.

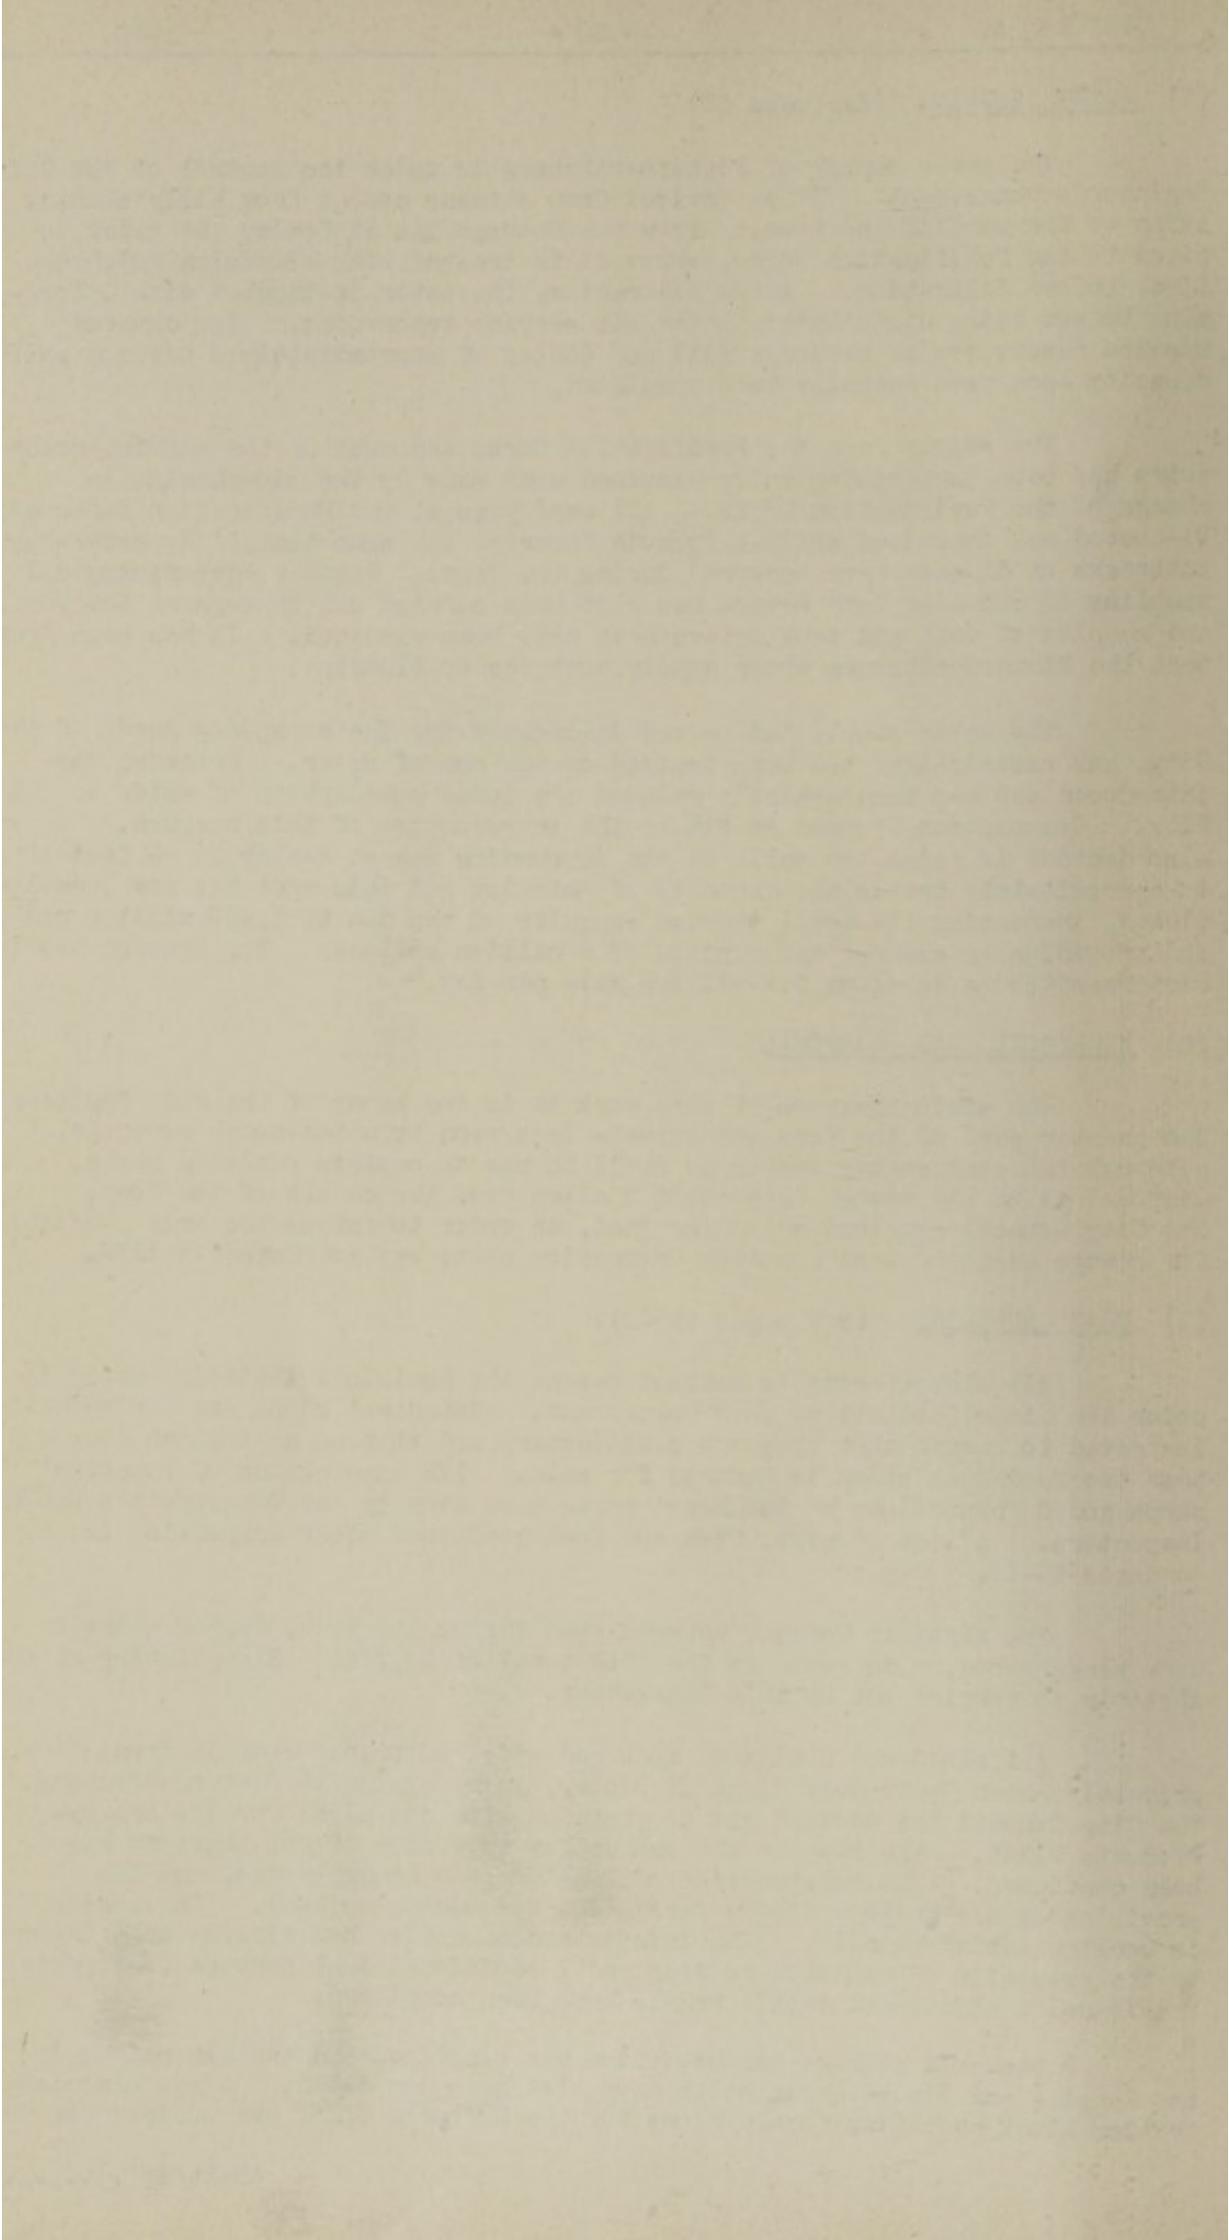

(9) MEAT SUPPLIES (See pages 61-63).

All slaughtering is carried out at the Municipal Abattoir, which is under the direct control of this Department. Butchers' shops are periodically inspected to ensure that they are satisfactory and that no meat which does not bear the Municipal stamp is exposed for sale. 178 inspections of butchers' shops and 8 inspections of Butchers' carts were made by the Department's Health Inspectors. A list of meat, fish and fowl condemned after inspection is shown on pages 59-60.

The Abattoir Manager reports that during the year, 94,652 animals were slaughtered, a increase on the 1959 total of 92,775. Slaughtering at the Abattoir is carried out by this Department.

All blood and condemned meat and offal is transported in drums to a privately owned By-Product Plant at Bisley, just outside of Pietermaritzburg. The City Council has decided not to continue with its plans for its own By-Products Plant. The rest of the scheme for expansion of the Abattoir has been continued. The construction of Non-European change-rooms, and the provision of new Railway Siding facilities has been completed. The siding is working satisfactorily. The lairage accommodation has already been improved by the provision of asbestos roofing and 7 additional dual purpose (sheep/pig) kraals and 6 additional cattle kraals have been completed.

New cold storage accommodation was completed and the extensions of the hanging and slaughtering halls have also been completed. A new administration block providing change rooms for the European Staff and offices for the

(9) MEAT SUPPLIES Cont'd.

Abattoir Staff, the Meat Board Staff, the Graders and the Agents was commenced during the year. Health Inspectors from the Department have had to help out by carrying out Meat inspection duties at the Abattoir owing to absence of Abattoir staff. A qualified European Slaughterman supervises the work of the Native Slaughter Gang.

ANTHRAX, etc. No cases were reported during the year.

CYSTICERCUS BOVIS AND CELLULOSAE ("MEASLES").

The following table shows the number of carcasses infected with "Measles" during the last 10 years:-

1960	17,165	8.3	1.6	3,410	3.7	1.6	5,833	1.9	1.7

(10) MILK SUPPLIES

The milk supply has been carefully controlled throughout the year. It was derived from 43 producer-distributors, 12 in the Borough, and 31 Out-of-Borough, and 80 producers, 3 Borough and 77 Out-of-Borough, who send their milk to one pasteurisation plant in the Borough, from where it is distributed after pasteurisation. All these dairymen are registered with this Department and their premises are inspected regularly. Approximately 74% of the milk sold in Pietermaritzburg was pasteurised.

There are 15 cream suppliers, of whom 7 are in the Borough and 8 outside the Borough.

During the year the routine Vi-testing of dairy employees was continued. Specimens, which are taken at the dairies or at the Health Department, are sent by pullman transport to the Durban Government Laboratory for examination, thus reaching the laboratory the same day as taken.

797 Vi-tests were done on dairy employees, 9 of these being check retested, but finally not found to be positive. 482 Dairy personnel (446 Natives, 8 Coloured and 28 Asiatics) were immunised against Typhoid Fever, 837 inoculations being given.

(11) OTHER FOOD SUPPLIES (Pages 57-60)

Inspection of foodstuffs exposed for sale at the Market and elsewhere has been carried out regularly, and a considerable quantity of unsound food has been condemned (pages 59-60). Condemned foodstuffs are removed to the refuse tips, made unusable, and disposed of by dumping.

Details of all licence applications dealt with by the Department are reflected in the Table on page 64. Careful attention is paid to storage conditions, particularly to rodent-proofing, and there is a considerable improvement in this connection. 314 Inspections of the Borough Market and 2,589 inspections of other premises manufacturing or handling food were made. (Pages 65-66).

(11) OTHER FOOD SUPPLIES Cont'd.Food and Drugs Act. (Pages 57-58).

Under the Food, Drugs and Disinfectants Act, 76 samples were taken, and the results of the analyses were as follows:-

Milk: 35 Samples: 1 Sample not in accordance with requirements in regard to Fat, and 3 samples (including the one also deficient in Fat) not in accordance with Solids-not-Fat requirement.

Ice Cream: 2 Samples : Both in accordance with standards laid down.

Cream: 6 Samples: All in accordance with standards laid down.

Mince Meat: 23 Samples: 21 Samples in accordance with standards laid down; 2 samples contained preservative.

Sausage: 8 Samples: All in accordance with standards laid down.

Boerewors: 1 Sample: In accordance with standards laid down. (deficient in Fat)

In the case of one of the defective Milk Samples prosecution resulted in a fine of £2. Prosecution in the case of the adulterated mince meat samples resulted in a fine of £2 in each case. A letter was written to the dairyman in the case of the samples of milk defective in Solids-not-Fat.

Outbreaks of Food Poisoning.

3 Outbreaks of food poisoning were reported. One occurred in a boarding school. Out of 84 boarders and 13 staff 49 children and 3 staff members became ill with the usual gastro-intestinal symptoms. None of the suspected food could be obtained for examination. Haemolytic Coagulase positive Staph. Aureus and a Paracolon group organism were isolated from stools. A second outbreak involved 5 adults, but the suspected foods showed Haemolytic Streptococci and Haemolytic Staphylococci, while the stools showed Proteus B. In the third outbreak one person was involved. The suspected food (Biltong) showed Strep. Albus and B. Subtilis, but only B. Proteus was recovered from the patients stools.

(12) MATERNITY AND CHILD WELFARE (Page 56).

The European Infantile Mortality Rate of 23.9 showed a small increase on last year's figure of 20.6.

The Coloured Infantile Mortality Rate of 47.6 was nearly double last year's figure of 24.3.

The Native Infantile Mortality Rate was 98.2, a considerable improvement on last year's figure of 147.6.

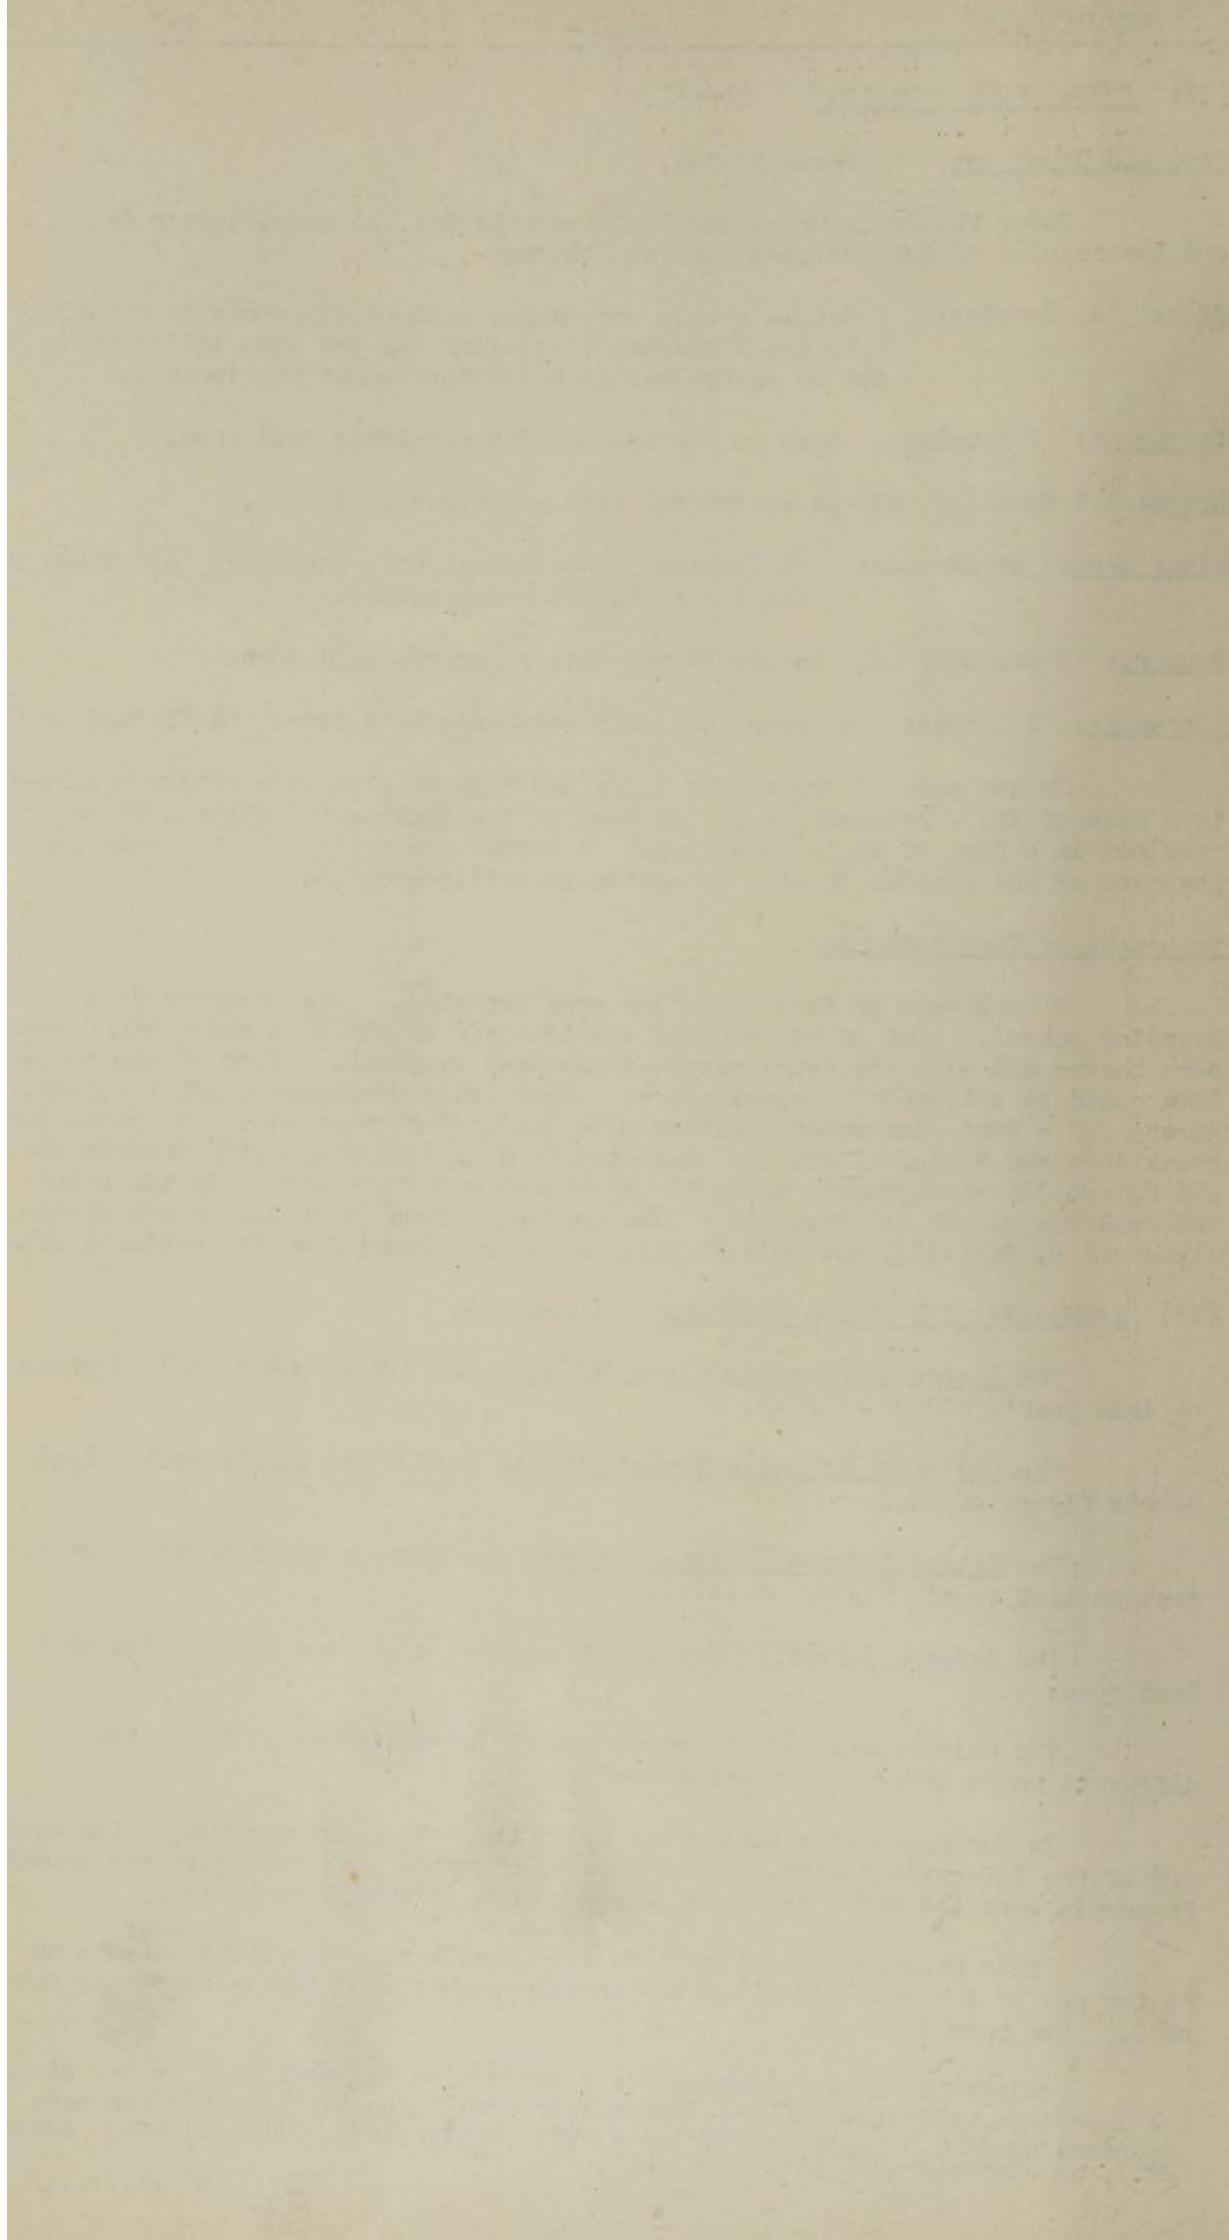

The Asiatic Infantile Mortality Rate was 45.5 as compared with 40.6 last year.

The main causes and age groupings of Infantile Mortality in the different races are shown on pages 36-37.

In Europeans prematurity was again the main cause accounting for over 50% of the Infantile deaths. Prematurity, Diarrhoea and Enteritis and Broncho-Pneumonia were the chief causes of Non-European Infantile Mortality.

This Department continued to supply milk to necessitous infants up to the age of 2 years, and also to a certain number of children below the age of 5. See page 56.

Diphtheria and Poliomyelitis immunisation was continued as one of the important activities of the Infant Welfare Clinics. 2332 Children were immunised against Diphtheria (European 596; Native 197; Coloured 243; Asiatic 1296), as compared with 2254 last year.

(12) MATERNITY AND CHILD WELFARE Cont'd.

Of the total given above 206 European, 72 Native, and 70 Coloured infants were immunised against Whooping Cough at the same time as against Diphtheria. Asiatics were generally not given the combined vaccine on account of the difficulty experience in persuading them to attend for the full course of 3 injections. (See page 11).

Child Welfare Clinic attendances have been as follows:-

	<u>European</u>	<u>Native</u>	<u>Coloured</u>	<u>Asiatic</u>
1950 - 51	7,671	3,798	1,776	4,324
1951 - 52	8,068	4,230	1,989	5,164
1952 - 53	8,211	5,115	1,921	5,580
1954	6,577	4,674	1,743	4,872
1955	5,926	7,023	1,984	6,012
1956	7,054	7,764	1,984	6,514
1957	6,884	6,928	2,245	6,870
1958	7,798	7,408	2,052	7,673
1959	8,946	8,864	2,701	8,544
1960	8,406	9,592	2,601	9,756

The Registrar of Vaccination reports the following total of Vaccinations for Pietermaritzburg:-

Successful Vaccinations (under 2 years)	:	148
" " (over 2 years)	:	33
Insusceptible to Vaccination (under 2 years)	:	5
" " " (over 2 years)	:	3
Vaccinations Postponed	:	-

Vaccinations carried out by this Department at the Infant Clinic sessions totalled:-

Eur. 668; Nat. 339; Col. 286; Asiatic : 1113; Total : 2406

Maternal Mortality.

No deaths were recorded from this cause.

The Midwifery Training School at Grey's Hospital provides midwifery services for Europeans, Coloureds and Asiatics in the wards of Grey's Hospital, and district Midwifery Services in Pietermaritzburg for Europeans, Coloureds and Asiatics. In addition, Ante-Natal Clinic Services for those races are provided. The Native Maternity Wards and Ante-Natal Services have been transferred to the new Edendale Hospital. Native District Midwifery is carried out by the Municipal Native Midwife in the Sobantu Village.

The following figures have been supplied by the courtesy of the Medical Superintendent of Grey's Hospital:-

Borough Cases:(a) Ante-Natal Clinic Attendances

Europeans	:	2,241
Coloureds	:	1,912
Asiatics	:	<u>2,411</u>
<u>TOTAL</u>		<u>6,564</u>

(b) District Midwifery Visits:

Europeans	:	996
Coloureds	:	1,551
Asiatics	:	<u>6,297</u>
<u>TOTAL</u>		<u>8,844</u>

(c) District Confinements.

Europeans, 33; Coloureds, 67; Asiatics, 312: Total, 412.

The Municipal Native Midwife conducted 86 confinements and paid 1,500 visits in connection with confinement cases (555 Ante-Natal and 945 Post-Natal).

In ...../

Faint, illegible text, possibly bleed-through from the reverse side of the page. The text is arranged in several paragraphs and appears to be a formal document or report. The content is too light to transcribe accurately.

Maternal Mortality Cont'd.

In addition, an Ante-Natal Clinic was held at the Sobantu Village Dispensary for these patients:-

No. of New Patients	Ante-Natal Attendances	W.R.'s taken	W.R.'s Positive	Rh Positive	Rh Negative
131	349	107	12	97	10

6 Patients were sent to hospital for confinement because of abnormalities of Labour.

Pietermaritzburg is a "Prescribed Area" under Section 39 (b) of the Medical Dental and Pharmacy Act No. 13 of 1928, within which no person other than a Medical Practitioner or a midwife registered under the Act, shall attend any lying-in-woman for gain. There is one untrained midwife (an Asiatic) "listed" in Pietermaritzburg, and she conducted 7 confinements. 2 Midwives' bag inspections were made.

(13) BY-LAW NOTICES AND PROSECUTIONS (Pages 65-67).

3,357 Notices and formal letters were served regarding breaches of the Borough By-Laws. 29 Prosecutions were initiated in the Magistrate's Court, as detailed on page 65. The total of inspections carried out this year was 19,110 as compared with 18,136 last year. Health Inspectors were also diverted to the Abattoir to assist with Meat Inspection duties because of shortage of staff.

(14) OTHER MATTERS OF HEALTH AND SANITATION.

Nursing Homes: The Registration and Inspection of Nursing Homes in Natal is now carried out by the Provincial Administration.

Complaints from Burgesses: 58 Complaints were received and dealt with.

Medical Examination of Natives:

Number Examined	Referred to TB Clinic after Min. X-Ray (See p.48)	Rejected V.D.	Rejected Other Causes	Vaccinated
Male : 19,581	187	51	5 (4 Scabies)	
Female : 32	-	2	-	
TOTAL : 19,613	187	53 (0.3%)	5 -	19,195

The number of Native female domestic servants coming forward for voluntary examination remains extremely low. Every person appearing at the Pass Office who does not possess evidence of recent successful vaccination, is vaccinated (a single insertion only). A Miniature X-Ray is taken of every Native attending the Medical Examination sessions, unless they have been recently X-Rayed.

Sobantu (Native) Village Dispensary.

The Out-Patient Dispensary is conducted by this Department. Three sessions are held each week, attended by the Assistant Medical Officer of Health, while a full-time Native Nurse, who lives at the Village, assists at the Clinic, does the necessary dressings and follow-up treatment, and visits patients in their homes.

The first part of the report is devoted to a description of the general situation in the country. It is followed by a detailed account of the various departments and their activities. The report concludes with a summary of the results achieved during the period.

The second part of the report deals with the financial aspects of the work. It contains a statement of the income and expenditure for the year, and a comparison of the actual results with the budget. The report also includes a list of the various projects and the amount of money spent on each.

The third part of the report is devoted to a description of the various projects and the work done on them. It contains a list of the projects, a description of the work done on each, and a list of the various people who have been involved in the work.

Project	Amount	Actual	Budget
Project A	1000	1200	1000
Project B	2000	1800	2000
Project C	3000	3500	3000
Project D	4000	4200	4000
Project E	5000	5500	5000
Project F	6000	6200	6000
Project G	7000	7500	7000
Project H	8000	8200	8000
Project I	9000	9500	9000
Project J	10000	10500	10000

The fourth part of the report is devoted to a description of the various projects and the work done on them. It contains a list of the projects, a description of the work done on each, and a list of the various people who have been involved in the work.

Sobantu (Native) Village Dispensary. Cont'd.

Number of New Patients attending Dispensary	:	2,689
Re-attendances at Dispensary .....	:	450
Home Visits .....	:	1,736
Surgical Dressings .....	:	6,807

The Council's trained Native District Nurse carried out a total of 4,318 Home Nursing Visits, 707 New Cases being registered this year.

Health Propaganda:

Our Envelopes all carry Diphtheria immunisation slogans. Considerable publicity was obtained through the press when the first Oral Poliomyelitis Vaccine Campaign was conducted.

\* \* \* \* \*

REPORT B.(1) HOUSING.

The City Council completed 245 dwellings for Asiatics at Northdale, and commenced a Coloured "Economic" Housing Scheme of 50 houses (3 bedroom type) at Woodlands.

Powers under the Borough By-Laws have been exercised sparingly in dealing with insanitary dwellings, owing to the acute housing shortage. 29 dwellings were condemned for demolition under Public Health By-Law 17. (19 of these being demolished by the end of the period under review), and 48 dwellings were voluntarily demolished mostly to make way for new buildings. The availability of new dwellings at Northdale has permitted a step up in Departmental activity in securing demolitions of slum dwellings.

Plans.

All plans of new buildings are submitted by the City Engineer to this Department for our observations.

	Approved Outright	Approved Subject to Alterations	Disapproved	Referred for additional information	Total Submitted
1960	500	84	31	74	689

New Buildings.

The City Engineer reports that 120 dwellings and 137 flats (8 blocks) were completed for Europeans, 9 flats (1 block), and 23 dwellings were built for Non-Europeans (4 Coloureds, 18 Asiatics, and 1 Native). These dwellings were provided by Private Enterprise.

(2) HOUSING OF NATIVES, NATIVE OR ASIATIC LOCATIONS OR BARRACKS.

The Pietermaritzburg Sobantu Village, situated about 3 miles from the centre of Town now contains 1,091 occupied houses and various public buildings, with an estimated population of 9,000. Water is supplied by communal standpipes from the Corporation Water Supply, and sanitation is by the pail system, separate from each house. Communal ablution blocks and laundries are provided. Provision for hot baths at a small charge has been made in the recently constructed ablution blocks, and this has proved very popular.

Although there is still room available at the Sobantu Village, the Government will not permit the extension of this scheme and the Economic Houses constructed 4 years ago are the last houses to be built at this Village. All the houses at the Sobantu Village have been built by Native labour, under European supervision. The Council has under consideration a scheme for a new Native Village at Slangspruit.

There are three Corporation Hostels for single Natives. For Males there is a newly extended East Street Hostel (and annexes) now housing 2,300 Natives, and the Ortman Road Hostel with a capacity of 102. The Women's Hostel in Church Street houses 430 women, and an additional Women's Hostel housing 200 Natives has been established at Oribi to serve the Government Village mainly. These Hostels are under the control of the Department of Bantu Administration, and two European Superintendents are employed. The scheme for a new Women's Hostel to house over 700 has been shelved owing to the very high tender figures received when the contract was offered. 576 Temporary Licences were granted during the year to house unexempted Natives under the Natives (Urban Areas) Act, pending the provision of more accommodation.

Text block, continuing the document's content.

(2) HOUSING OF NATIVES, NATIVE OR ASIATIC LOCATIONS OR BARRACKS. Cont'd.

The Council has also provided the following Native Compounds:-

Wattles Department : 4 (Cement-block) buildings for males (housing 80 Native males); and  
3 (Cement-block) buildings for females (seasonal labour, housing 60 Native females).

City Engineer's Department - Sewage Farm : 2 (brick) buildings housing 53 Native males.

About 60% of the Natives resident in the Town live in quarters provided on the property of their employers. These quarters are the subject of inspection by this Department and in general are satisfactory.

Asiatic Housing.

The Corporation owns one compound housing sewage farm workers. This compound consists of 26 houses and 6 rooms, well constructed in brick, and houses Asiatic Labourers, together with their wives and families, totalling 308 persons.

The Council has appointed a Woman Housing Manager, trained under the Octavia Hill Scheme, who operates under the Estates Manager in the City Treasurer's Department.

(3) REMARKS AND RECOMMENDATIONS, AND HOUSING MATTERS OF SPECIAL IMPORTANCE REQUIRING ATTENTION.

The following estimates of housing needs based on recent surveys of the housing needs of the City have been supplied by the Estates Manager:-

A. Coloured Housing.(1) Economic Housing:

Size of House Required	:	No. required
One bedroom type	:	5
Two bedroom type	:	42
Three bedroom type	:	62

3. Asiatic Housing. Cont'd.

The estimated housing needs for the Native population (figures supplied by the Director, Department of Bantu Administration) are as follows:-

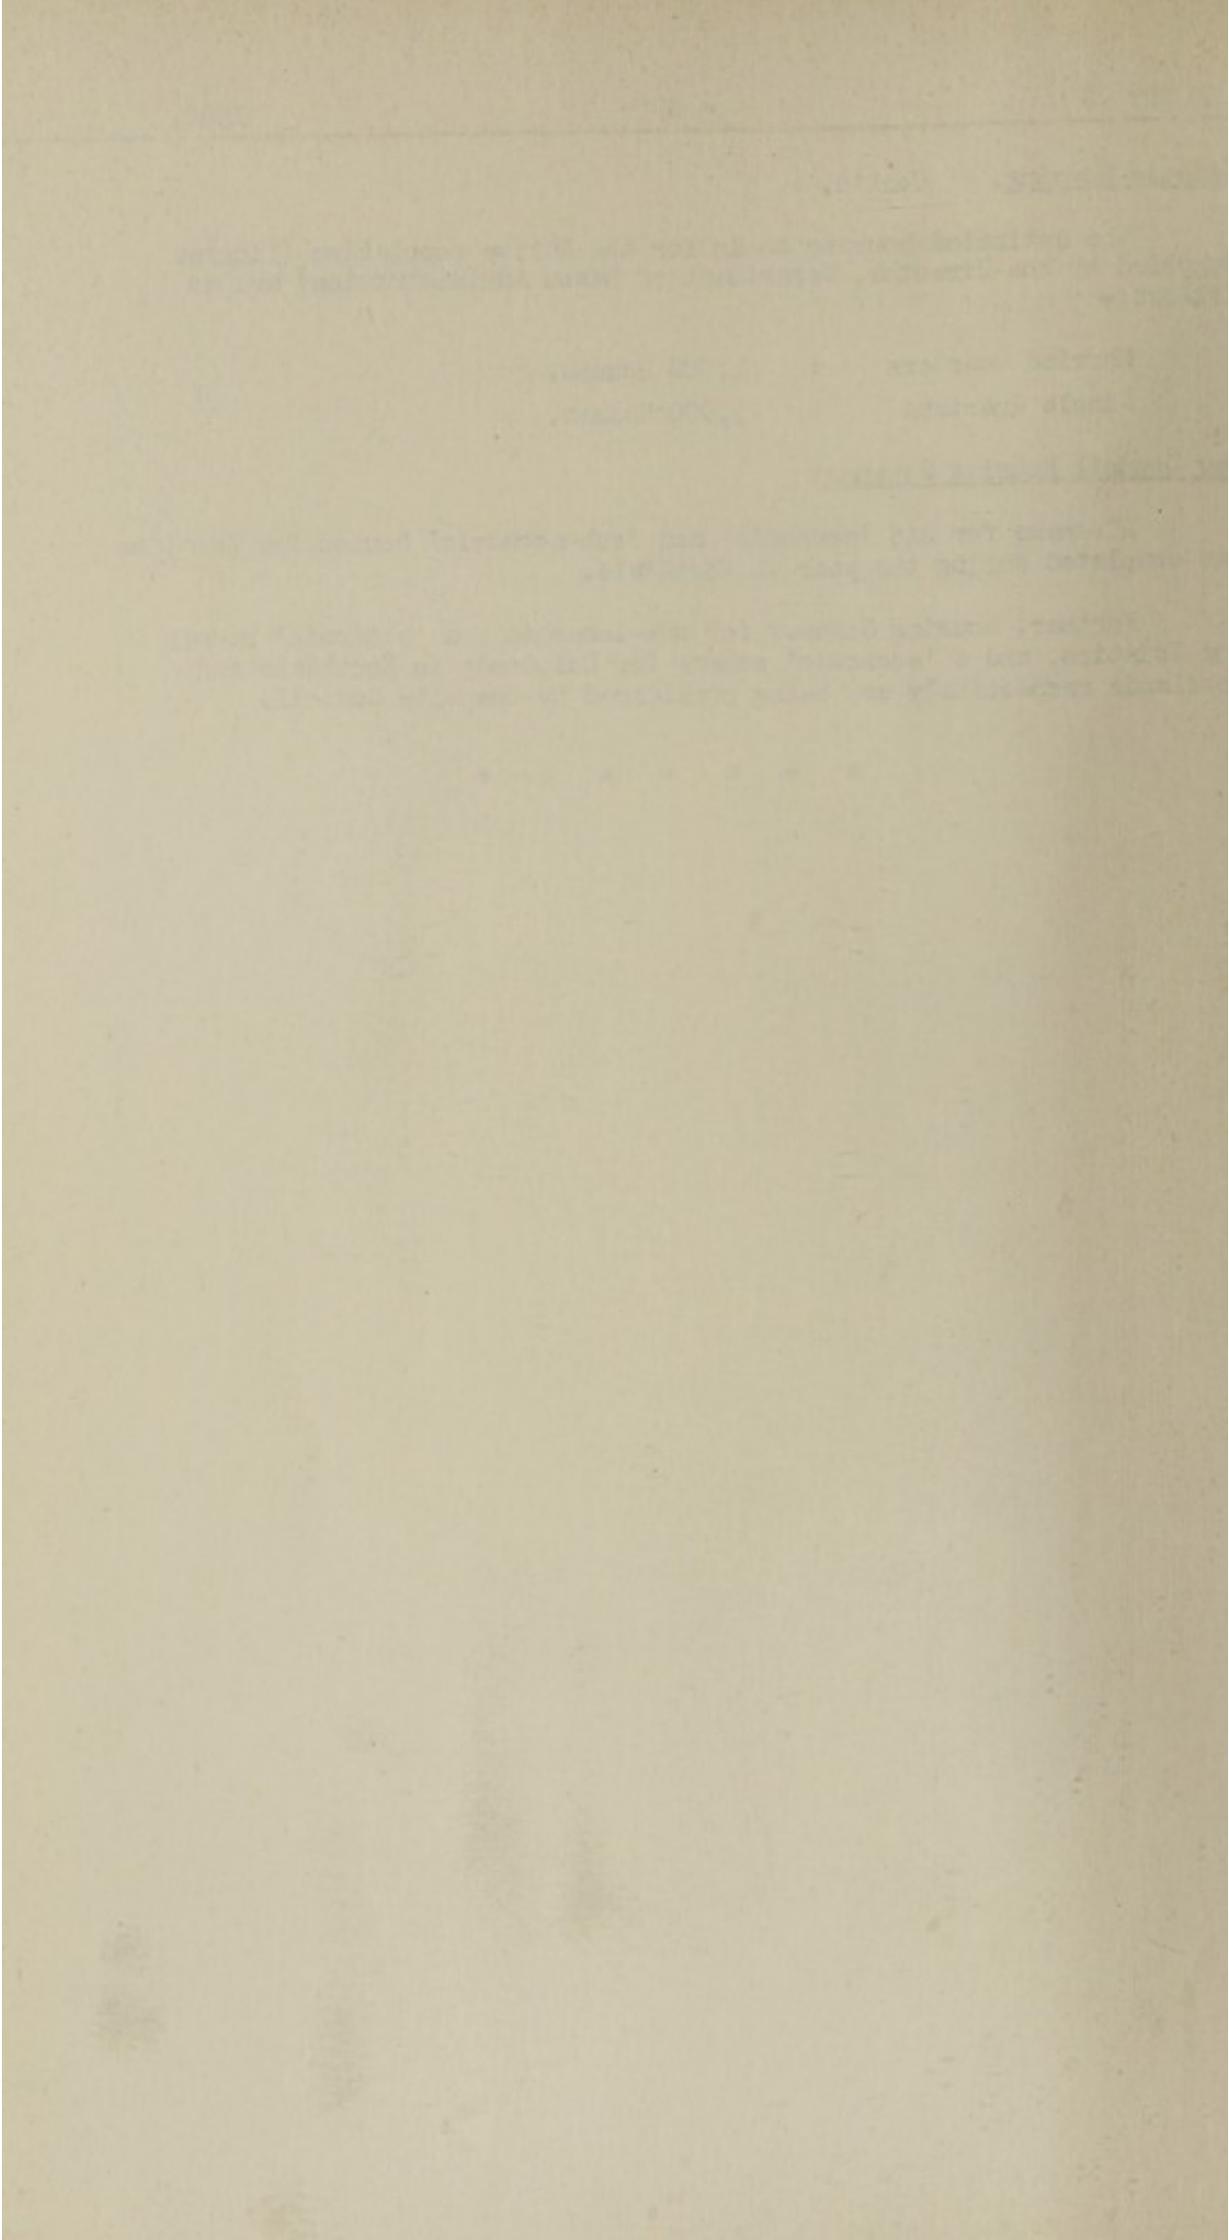

Married Quarters	:	1,000 Houses.
Single Quarters	:	3,000 Houses.

New Council Housing Schemes:

A scheme for 245 'economic' and 'sub-economic' houses for Asiatics was completed during the year at Northdale.

Further, Housing Schemes for sub-economic and 'economic' houses for Asiatics, and a 'economic' scheme for Coloureds in Northdale and Woodlands respectively are being considered by the City Council.

The following table shows the results of the experiments conducted during the year 1912-1914. The data is presented in a tabular form, with columns representing the months of the year and rows representing the different trials. The total results are given at the bottom of the table.

The results show that the experiments were conducted under various conditions, and the data indicates that the results were generally consistent across the different trials. The total results are as follows:

Total Results: 0

ISOLATION HOSPITAL AND NON-EUROPEAN INFECTIOUS  
DISEASES HOSPITAL

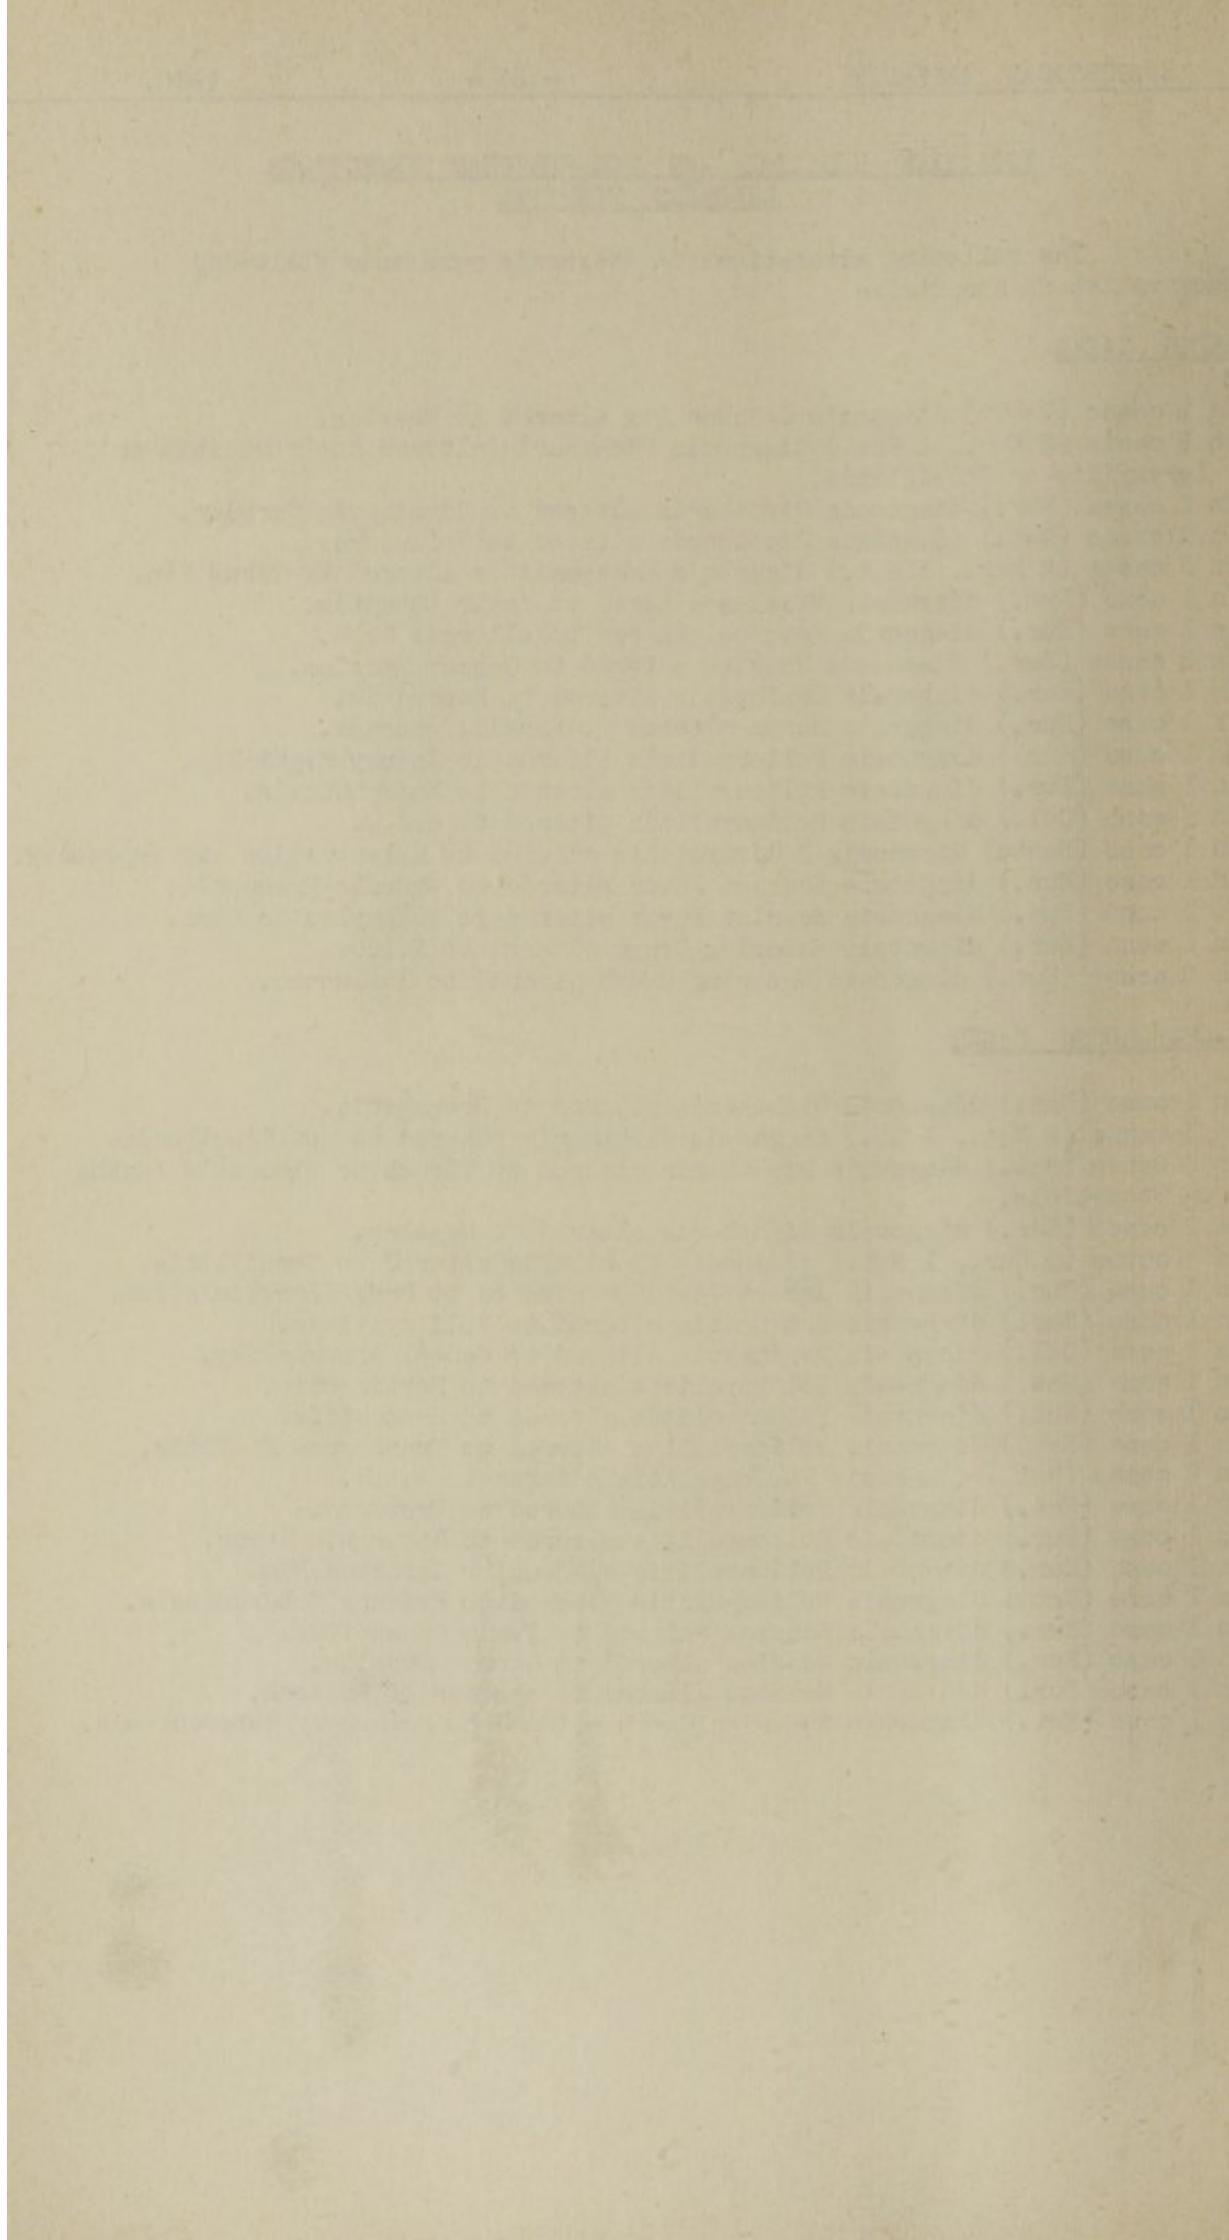

The following alterations in diagnosis were made following observation in hospital:-

BOROUGH CASES

- In 2 cases (Bantu) diagnosis Chicken Pox altered to Measles.
- In 3 cases (2 Eur., 1 Nat.) diagnosis Diphtheria altered to Tracheitis or Laryngitis or Tonsillitis.
- In 2 cases (Eur.) diagnosis Diphtheria altered to Diphtheria Carrier.
- In 2 cases (Nat.) diagnosis Diphtheria altered to Influenza.
- In 3 cases (2 Eur., 1 Nat.) diagnosis Encephalitis altered to Virus Flu.
- In 1 case (Eur.) diagnosis Measles altered to Acute Osteitis.
- In 1 case (Eur.) diagnosis Measles altered to Allergic Rash.
- In 3 cases (Eur.) diagnosis Measles altered to German Measles.
- In 1 case (Eur.) diagnosis Meningitis altered to Nephritis.
- In 1 case (Eur.) diagnosis Mumps altered to Parotid Abscess.
- In 1 case (Eur.) diagnosis Poliomyelitis altered to Injury Right Hip.
- In 1 case (Eur.) diagnosis Poliomyelitis altered to Encephalitis.
- In 1 case (Col.) diagnosis Poliomyelitis altered to N.A.D.
- In 1 case (Bantu) diagnosis Poliomyelitis altered to Malnutrition and Hypotonia.
- In 1 case (Eur.) diagnosis Scarlet Fever altered to Broncho-Pneumonia.
- In 1 case (Eur.) diagnosis Scarlet Fever altered to Anaphylactic Rash.
- In 1 case (Eur.) diagnosis Whooping Cough altered to N.A.D.
- In 2 cases (Eur.) diagnosis Whooping Cough altered to Influenza.

OUT-OF-BOROUGH CASES

- In 1 case (Nat.) diagnosis Diphtheria altered to Bronchitis.
- In 3 cases (2 Nat., 1 As.) diagnosis Diphtheria altered to not Diphtheria.
- In 3 cases (Nat.) diagnosis Diphtheria altered to Thrush or Vincent's Angina or Stomatitis.
- In 2 cases (Eur.) diagnosis Diphtheria altered to Measles.
- In 4 cases (3 Eur., 1 Nat.) diagnosis Diphtheria altered to Tonsillitis.
- In 1 case (Eur.) diagnosis Infect Jaundice altered to Drug discolouration.
- In 1 case (Eur.) diagnosis Meningitis altered to Poliomyelitis.
- In 1 case (Col.) diagnosis Meningitis altered to Mental Abnormality.
- In 1 case (Nat.) diagnosis Poliomyelitis altered to Septicaemia.
- In 1 case (Nat.) diagnosis Poliomyelitis altered to Bronchitis.
- In 1 case (Nat.) diagnosis Poliomyelitis altered to Transverse Myelitis.
- In 2 cases (Nat.) diagnosis Poliomyelitis altered to N.A.D.
- In 1 case (Nat.) diagnosis Poliomyelitis altered to Hysteria.
- In 1 case (Eur.) diagnosis Poliomyelitis altered to Rheumatic Fever.
- In 1 case (Eur.) diagnosis Poliomyelitis altered to Infected Hip.
- In 1 case (Nat.) diagnosis Poliomyelitis altered to Primary Tuberculosis.
- In 1 case (Eur.) diagnosis Measles altered to Toxic Dermatitis.
- In 1 case (Eur.) diagnosis Measles altered to German Measles.
- In 1 case (Eur.) diagnosis Measles altered to Abscess of Buttock.
- In 1 case (Nat.) diagnosis Whooping Cough altered to Pulmonary Tuberculosis.

FOODSTUFFSSAMPLES TAKEN AND SUBMITTED FOR ANALYSIS1. MILK(a) Bacteriological Examination - Breed Counts:

Samples with less than 30,000 bacteria per c.c.	:	29 (inc. 1 Pasteurised)
Samples with between 30,000 and 200,000 bacteria	:	
per c.c.	:	26
Samples with more than 200,000 bacteria per c.c.	:	<u>13</u>
<u>TOTAL</u>	:	<u>68 (inc. 1 Pasteurised)</u>

(b) Bacteriological Examination - Plate Counts:

Samples with less than 30,000 bacteria per c.c.	:	34 (inc. 3 Pasteurised)
Samples with between 30,000 and 200,000 bacteria	:	
per c.c.	:	25
Samples with more than 200,000 bacteria per c.c.	:	<u>11</u>
<u>TOTAL</u>	:	<u>70 (inc. 3 Pasteurised)</u>

(c) Bacteriological Examination - Faecal B. Coli:

Samples with Faecal B. Coli absent	:	50 (inc. 4 Pasteurised)
Samples with Faecal B. Coli present 1/10 c.c.	:	49
Samples with Faecal B. Coli present 1/100 c.c.	:	43
Samples with Faecal B. Coli present in less than	:	
1/100 c.c.	:	<u>38</u>
<u>TOTAL</u>	:	<u>180 (incl. 4 Pasteurised)</u>

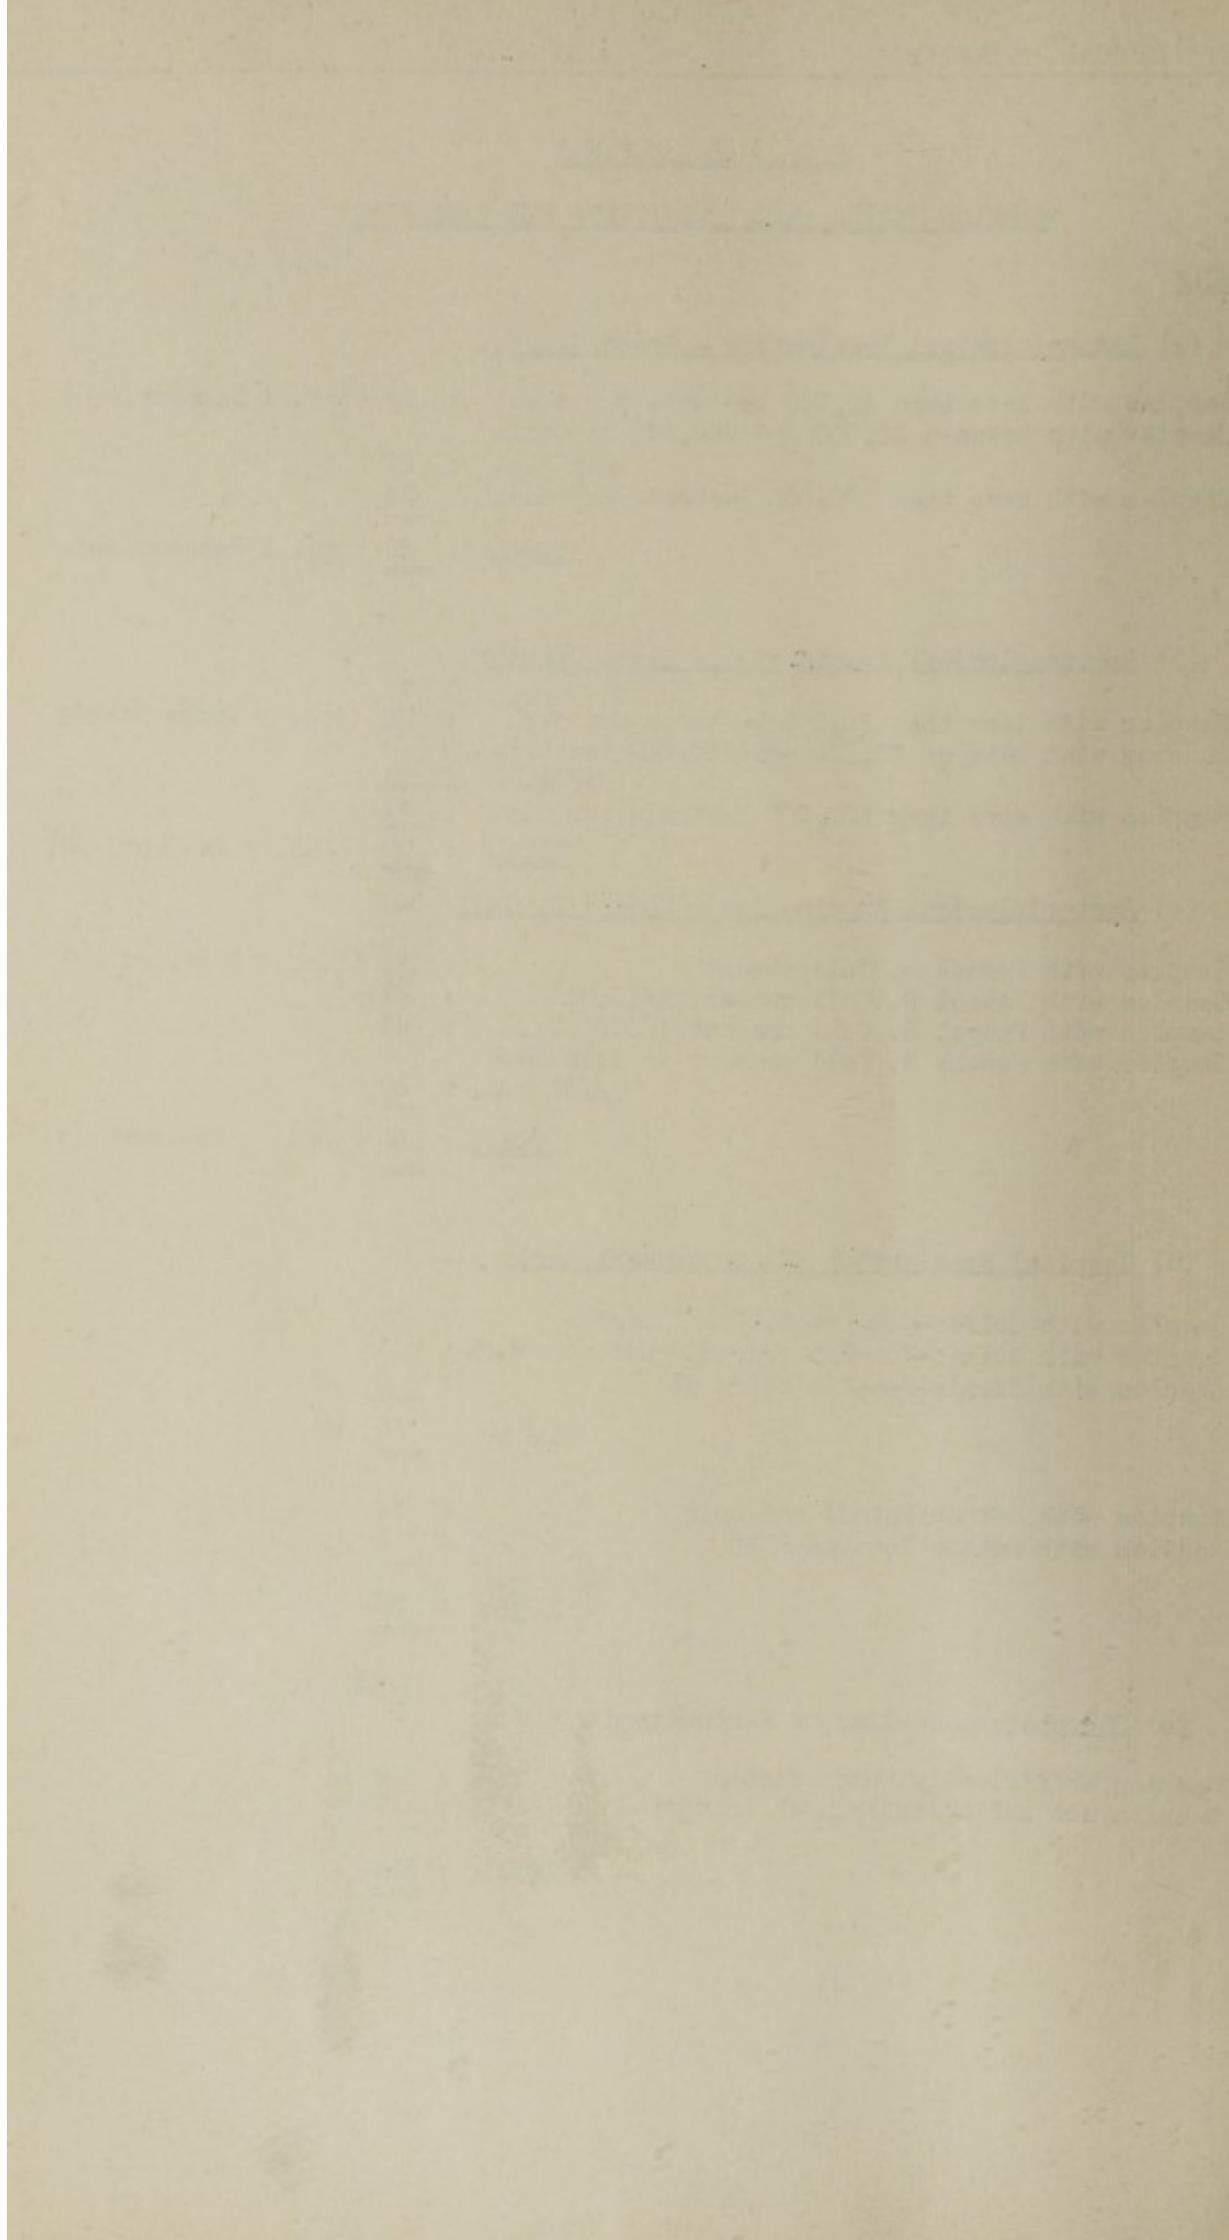

(d) Chemical Examination (By Government Analyst).

Samples with Solids-Not-Fat 8.5% and over	:	32
Samples with Solids-Not-Fat over 8% and under 8.5%	:	3
Samples with Solids-Not-Fat below 8%	:	<u>0</u>
<u>TOTAL</u>	:	<u>35</u>

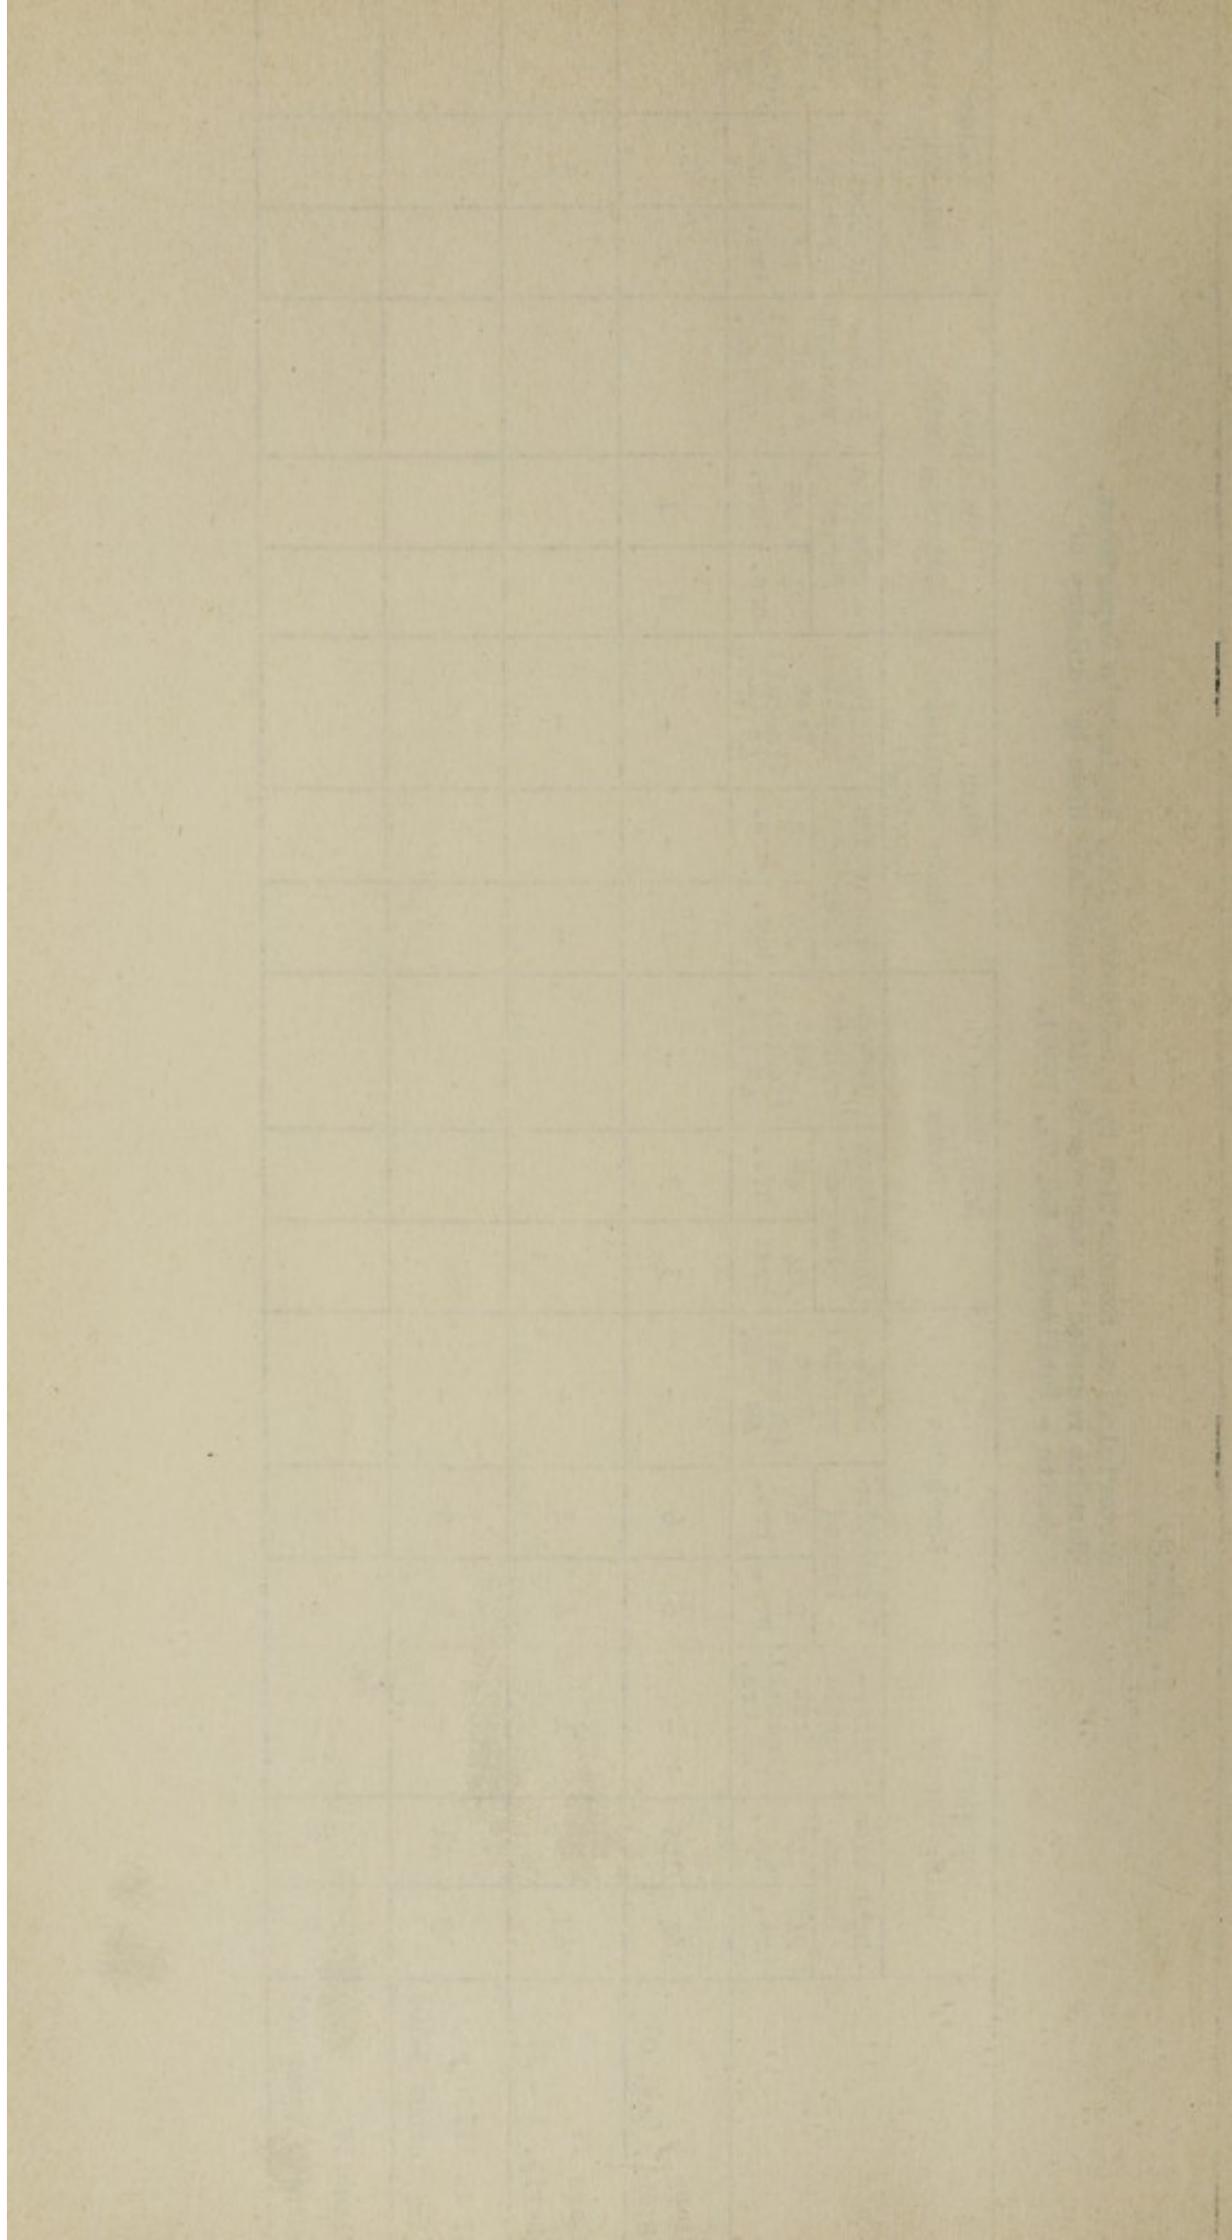

Samples with Butter Fat 3% and over	:	34
Samples with Butter Fat under 3%	:	<u>1</u>
<u>TOTAL</u>	:	<u>35</u>

(e) Phosphatase Testing of Pasteurised Milk:

Samples sufficiently heat treated	:	349
Samples not sufficiently heat treated	:	<u>9</u>
<u>TOTAL</u>	:	<u>358</u>

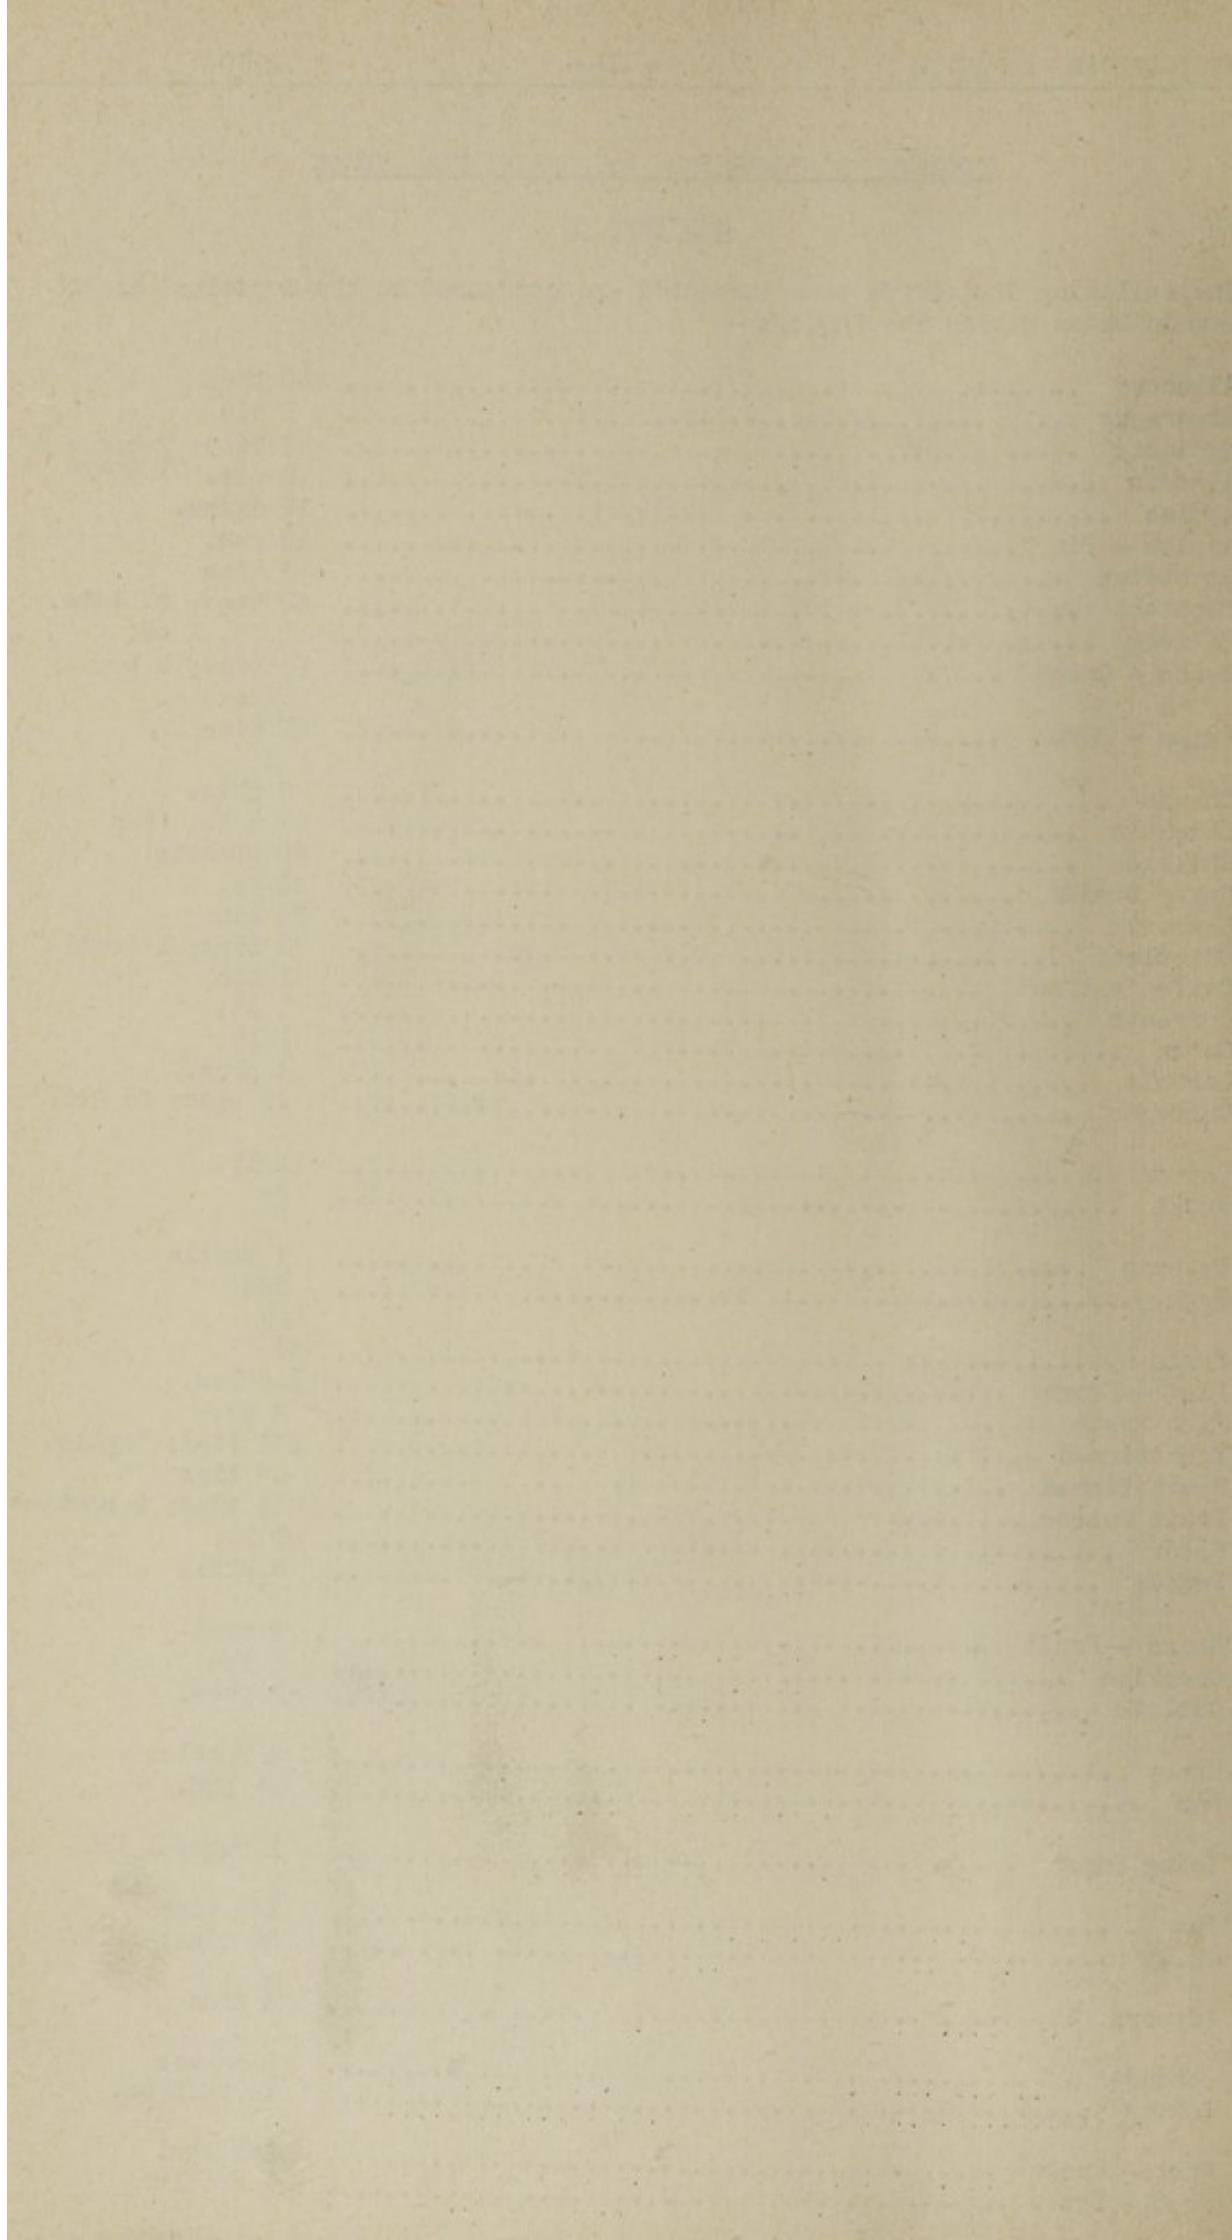

FOODSTUFFS CONDEMNED AS UNFIT FOR HUMANCONSUMPTION

The following foodstuffs were inspected and condemned in the Municipal Market and in Shops within the Borough:-

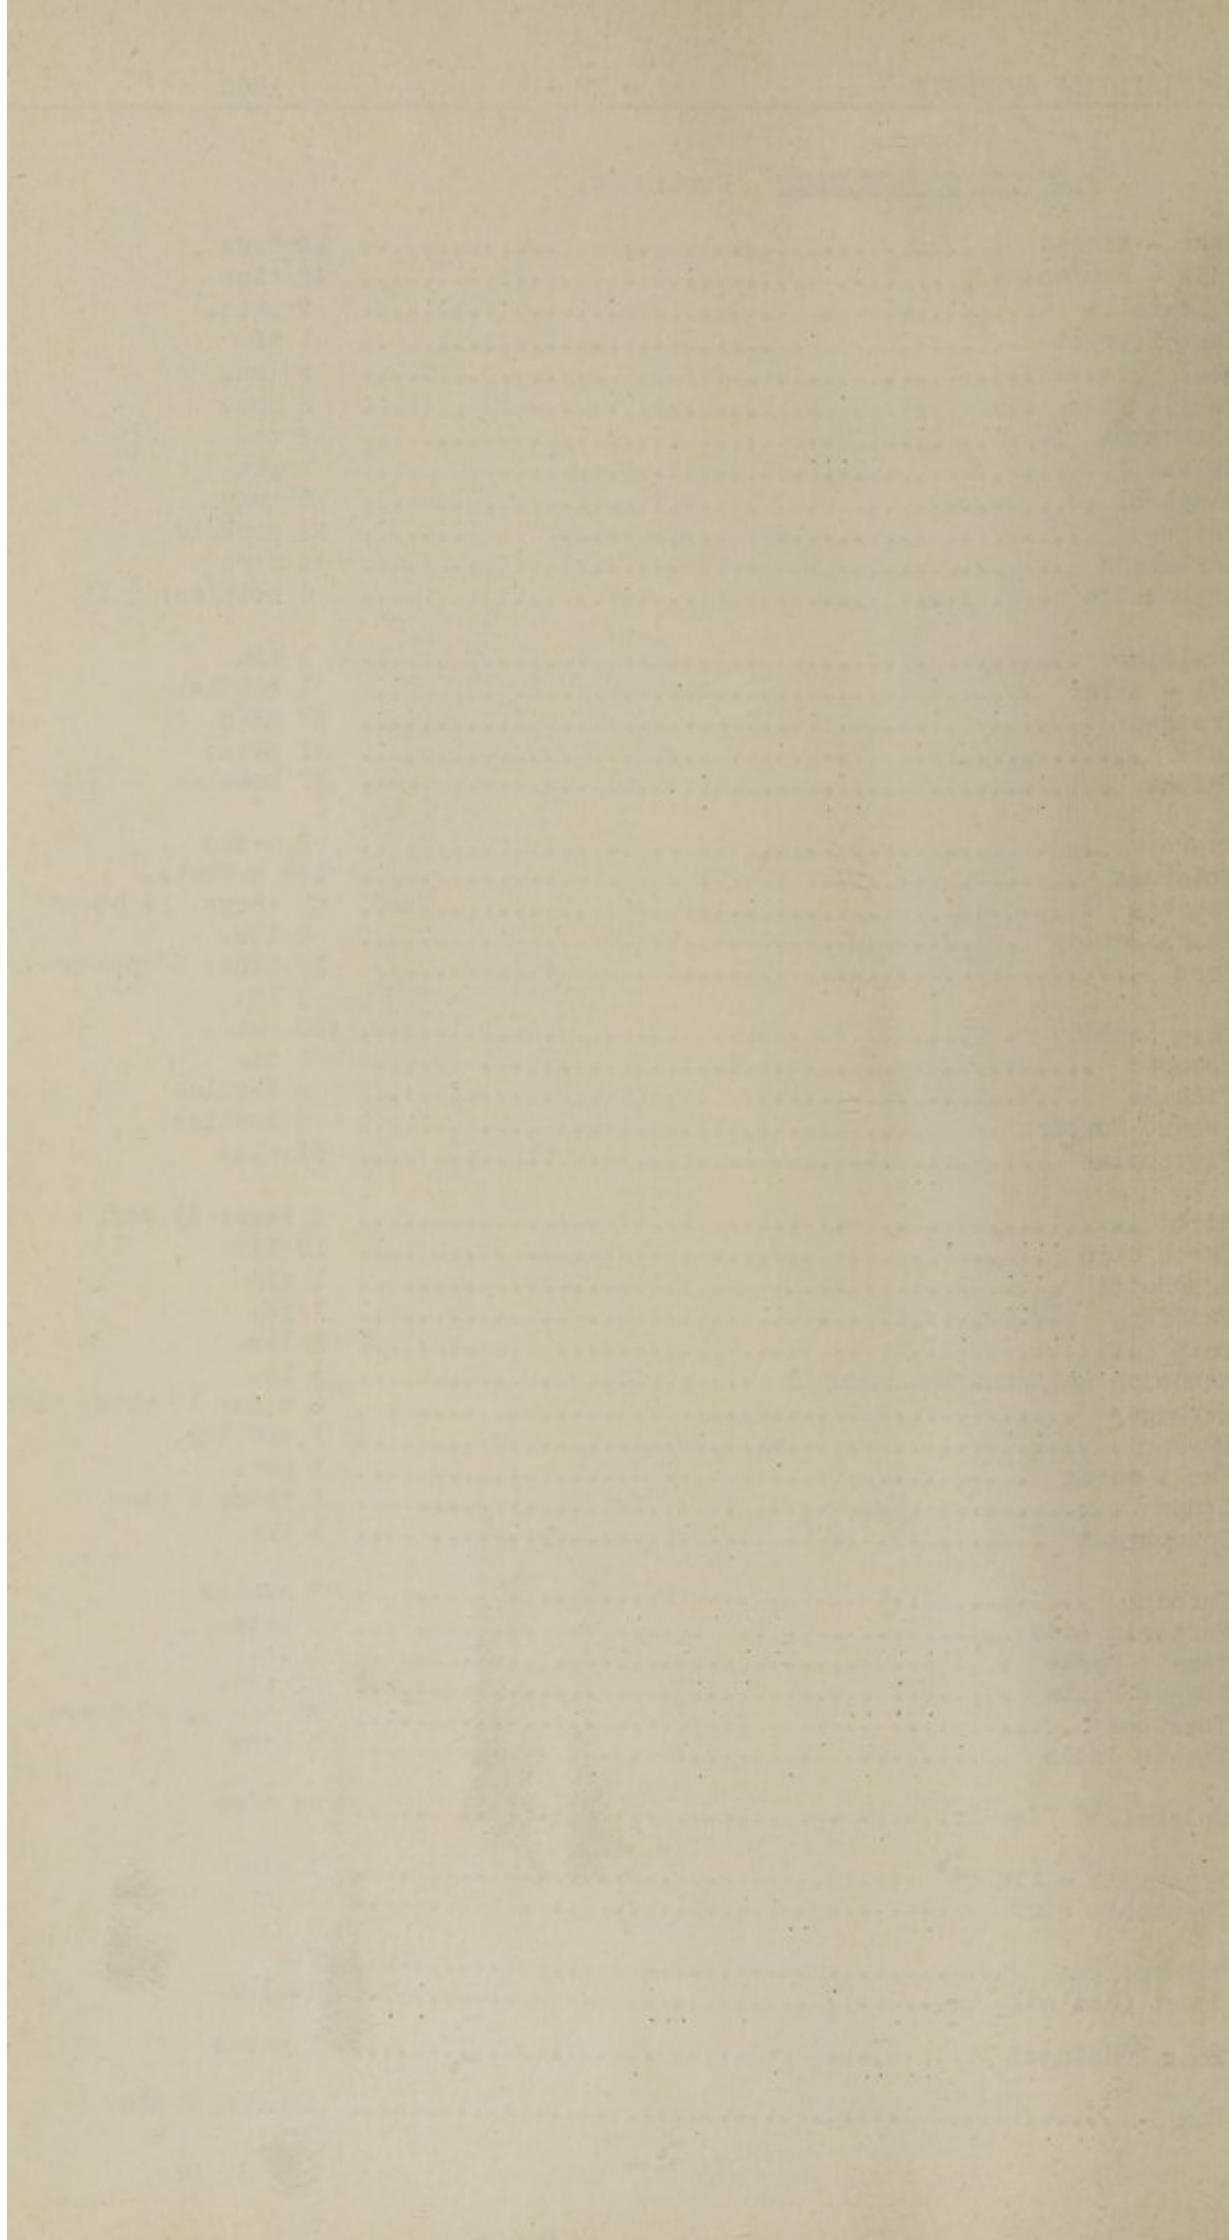

Albacore .....	30 tins
Asparagus .....	1 tin
Apricots .....	3 tins; 7 boxes &
Almonds .....	8 ozs. 61 trays
Apples .....	12 cases.
Apples - Pie .....	15 ozs.
Anchovies .....	9 tins
Beetroot .....	38 tins; 26 lots.
Biltong .....	1 lb. 1 oz.
Beans - Green .....	58 tins; 5 boxes;
	6 bags
Beans - Baked .....	85 tins
Cheese .....	2 pkts.
Chickens .....	6 x lb. tins
Chillies .....	30 pockets
Curry Powder .....	46 oz.
Cherries .....	33 tins
Chocolate .....	9 tins; 1 bottle
Coffee extract .....	1 tin
Currants .....	1 lb.
Cream .....	$\frac{1}{2}$ lb.
Cereals .....	4 pkts.
Cabbages .....	45 bags; 53 lots
Dates .....	1 lb.
Ducks .....	2
Essence .....	1 bottle
Eggs .....	244
Fowls .....	46
Fish - Fresh .....	115 lbs.
Fish Paste .....	4 oz.
Fish tinned .....	331 tins; 7 pkts.
Fruit tinned .....	66 tins
Fruit Juices .....	38 tins; 2 bottles.
Flour .....	1 lb.
Farfel .....	6 pkts.
Grape - Fruit .....	2 tins
Gherkins .....	1 tin
Giblets .....	9 pkts.
Honey .....	4 bottles
Ham .....	$1\frac{1}{2}$ lbs.
Icing Sugar .....	1 tube; 1 lb.
Jam .....	135 tins
Jelly .....	29 tins; 1 lb.
Kippers .....	4 tins
Lettuce .....	5 crates
Lemons .....	44 pockets.
Meat - Fresh .....	501 lbs.
Meat - Paste .....	1 bottle

/Meat-tinned .....

FOODSTUFFS CONDEMNED Continued.

Meat - tinned .....	14 tins
Milk - condensed .....	42 tins
Maltabella .....	2 pkts.
Meat Extract .....	1 tin
Meal .....	5 lbs.
Mealie Rice .....	5 lbs.
Mushrooms .....	12 oz.
Matzos .....	1 pkt.
Mangoes .....	8 trays
Marrowes .....	23 pockets
Marmalade .....	44 tins
Mayonnaise .....	6 bottles; $\frac{3}{4}$ lb.
Ovaltine .....	1 tin
Oil - salad .....	1 bottle
Oranges .....	37 pkts.
Oats .....	21 pkts.
Onions .....	12 bottles
Pears .....	4 cases
Potatoes .....	147 pockets.
Peaches .....	47 trays; 15 boxes
Pearl Barley .....	2 lbs.
Peas .....	15 tins; 30 pockets
	1 lb.
Peas (split) .....	482 pkts.
Peanuts .....	1 tin
Pickles .....	9 bottles
Peanut Butter .....	4 bottles
Pineapples .....	55 tins
Rice .....	2 bags; $4\frac{1}{2}$ ozs.
Sweet corn .....	19 tins
Spaghetti .....	1 tin
Stuffing .....	1 lb.
Salt .....	5 lbs.
Sandwich and assorted spreads .....	$\frac{1}{2}$ lb.
Sausages .....	5 tins; 10 pkts; 6lbs.
Sugar .....	1,400 lbs.
Sweet corix .....	1 pkt.
Soups .....	2 pkts; 2 tins
Sauerkraut .....	1 tin
Turnips .....	3 crates
Tartaric Acid .....	7 pkts.
Tomato Puree .....	1 lb.
Tomato Paste .....	45 tins
Tomatoes .....	36 boxes; 50 trays
Tomato Juice .....	3 tins
Unlabelled Tins .....	68 tins
Vegetable - tinned .....	1 tin
Vegetable Soup .....	1 tin
Watermelons .....	708
Wheat (Rolled) .....	10 lbs.
Xmas Puddings .....	2 cases
Yeast .....	5 pkts; 2 lbs.

ABATTOIR

1. ANIMALS SLAUGHTERED:

Cattle	:	17,165
Calves	:	3,410
Sheep	:	68,131
Pigs	:	5,833
Goats	:	113
<u>TOTAL</u>		<u>94,652</u>

2. ANIMALS EXAMINED AFTER SLAUGHTER IN OTHER ABATTOIRS:

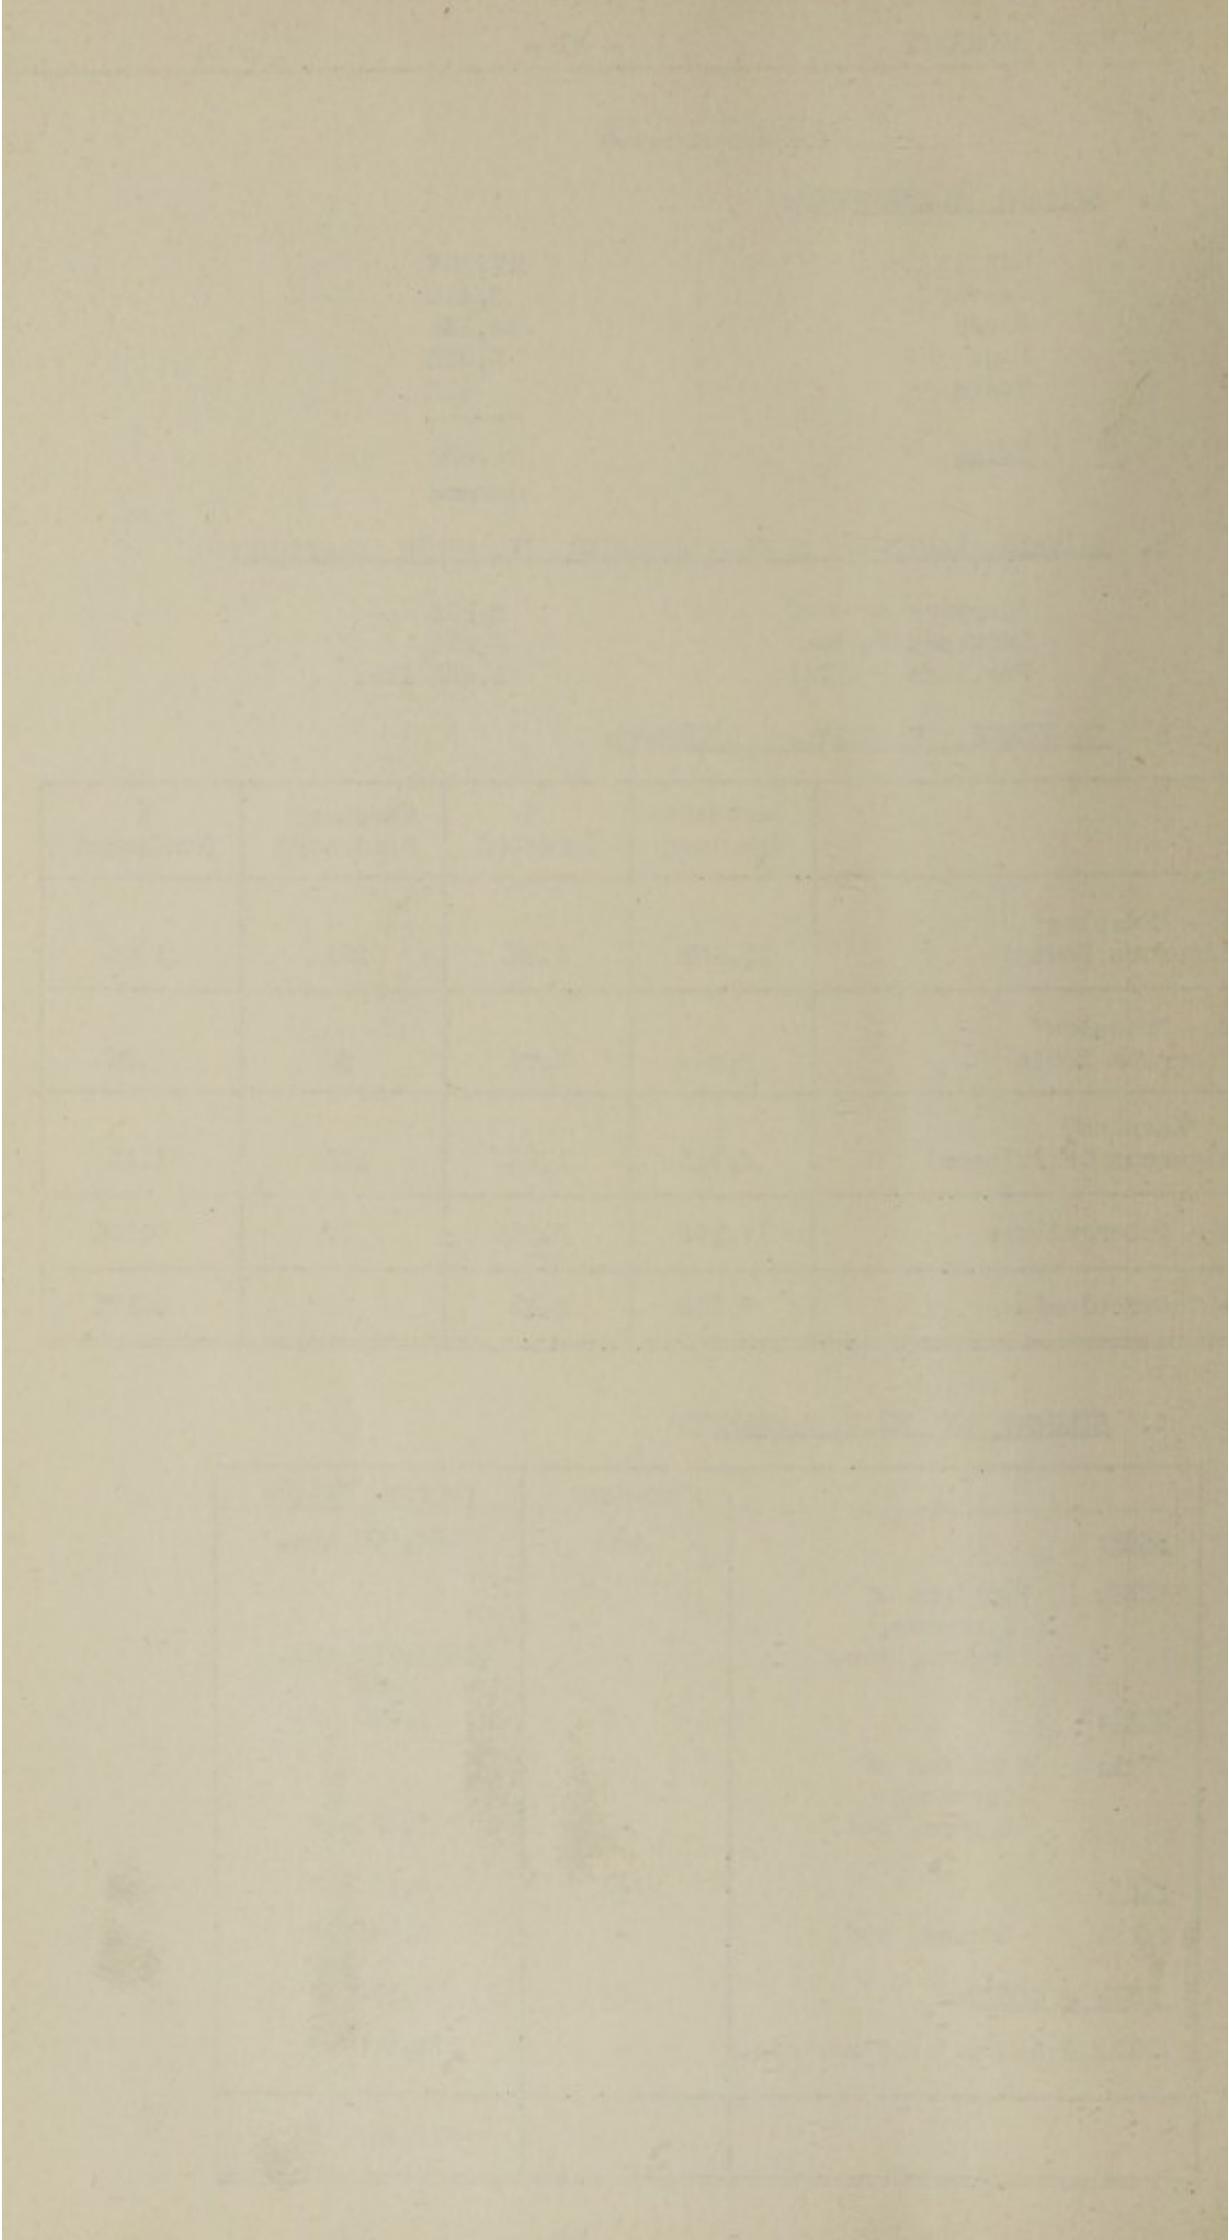

Quarters of Beef	:	2,163
Carcases Mutton	:	1,678
Portions & Offal	:	1,452 lbs.

3. INCIDENCE OF CERTAIN DISEASES:

	Carcases Examined	% Infected	Carcases Condemned	% Condemned
CATTLE - "Measles" (Cysticercus Bovis)	17,165	8.3%	271	1.6%
CALVES - "Measles" (Cysticercus Bovis)	3,410	3.7%	56	1.6%
