## HONORARY CONSULTING MEDICAL AND SURGICAL STAFF.

### Physicians:

RICHARD SANDERS ROGERS, M.A., M.S.,  
M.D.  
SIR JOSEPH C. VERCO, K.B., M.D., F.R.C.S.

WILLIAM T. HAYWARD, C.M.G., LL.D.,  
L.K.Q.C.P., M.R.C.S., &c.  
HARRY SWIFT, M.D., Cantab.; M.R.C.S.,  
Eng.

### Surgeons:

PROFESSOR ARCHIBALD WATSON, M.D.,  
F.R.C.S.  
ARTHUR E. SHEPHERD, D.S.O., O.B.E.,  
L.R.C.P. & S., Edin.; L.F.P. & S.  
WILLIAM ANSTAY GILES, M.B. Ch.M.

JAS. A. G. HAMILTON, M.B., L.R.C.S.  
ARTHUR F. A. LYNCH, M.B., B.S.  
GEO. A. FISCHER, M.B., B.S.  
A. W. HILL, M.D., M.R.C.S., L.R.C.P. (from  
21.12.22).

### Bacteriologist:

THOMAS BORTHWICK, M.B., Ch.M.

### Radiologist:

WILLIAM RAY, M.B., B.S., Adel.

## HONORARY MEDICAL AND SURGICAL STAFF.

### Honorary Physician:

EDWARD ANGAS JOHNSON, M.D., Ch.D.  
Gottingen; M.R.C.S., Eng., L.R.C.P.,  
Lond.  
C. T. C. DE CRESPIGNY, D.S.O., M.D., Melb.  
WILLIAM RAY, M.B., B.S., Adel.  
FRANK S. HONE, M.B., B.S., Adel.

### Honorary Surgeon:

ARTHUR M. CUDMORE, M.B., B.S., Adel.;  
F.R.C.S., Eng.  
W. R. CAVANAGH-MAINWARING, S.E.,  
F.R.C.S., Eng., &c.  
HENRY SIMPSON NEWLAND, C.B.E., D.S.O.,  
F.R.C.S., Eng., &c.

### Honorary Gynaecologists:

T. G. WILSON, M.D., Ch.M., Sydney; F.R.C.S., Edin.  
W. A. VERCO, M.B., B.S., ADEL.

### Honorary Gynaecologist Pre-Maternity Clinic:

T. G. WILSON, M.D., Ch.M., Sydney; F.R.C.S., Edin.

### Honorary Ophthalmologists:

A. W. HILL, M.D., Brux.; M.R.C.S., Eng.; L.R.C.P., Lond. (Resigned 20-12-22).  
H. F. SHORNEY, M.D., Melb.; F.R.C.S., Eng.

### Honorary Clinical Assistants to Ophthalmic Department:

JOHN JAMES O'GRADY, L.R.C.P. & S., Edin.; L.F.P. & S., Glas.  
JAMES BROOK LEWIS, M.B., B.S., Melb.

### Honorary Surgeon for Ear and Throat:

HUBERT M. JAY, M.B., B.S., Adel.

### Honorary Clinical Assistant, Ear and Throat:

WILLIAM C. SANGSTER, M.D., Melb.

### Honorary Dermatologist:

ROWLAND E. HARROLD, M.B., Ch.M., Edin.

### Honorary Assistant Physician to Infectious Diseases Block:

ALBERT RAY SOUTHWOOD, M.D., Adel.

### Honorary Assistant Physician to Neurology Department:

H. KENNETH FRY, D.S.O., M.B., B.S.

### Honorary Pathologist:

JOHN B. CLELAND, M.D., Sydney.

### Honorary Clinical Pathologist:

DOUGLAS L. BARLOW, M.B., B.S.

## MEDICAL OFFICERS, 1922—*continued.*

### Honorary Radiologist:

HARRY CAREW NOTT, M.B., B.S., Adel.; D.M.R.E., Camb.

### Honorary Assistant Physicians:

J. WALTER BROWNE, M.B., B.Ch., Irel.	SAMUEL ROY BURSTON, C.B.E., D.S.O.,
D'ARCY R. W. COWAN, M.B., B.S., Adel.	M.B., B.S.

### Honorary Assistant Surgeons:

BRONTE SMEATON, M.B., B.S., Adel.; M.R.C.S., Eng.; L.R.C.P., Lond.

JOHN CORBIN, M.B., B.S., Adel.

MALCOLM L. SCOTT, M.D., M.S., F.R.C.S.

### Honorary Assistant Gynaecologists:

RUPERT E. MAGAREY, M.B., B.S., Adel.	H. ARTHUR PCWELL, C.M.G., M.B., B.S.,
	Adel.

### Honorary Anaesthetists:

G. ROY WEST, M.B., B.S., Adel.	P. SANTO MESSENT, M.B., B.S., Adel.
GILBERT BROWN, M.B., Ch.B., Liverpool.	

### Medical Officers Night Clinic (Venereal Diseases):

#### Males:

GLEN H. BURNELL, M.D., Adel.

#### Females:

PHOEBE CHAPPLE, M.B., B.S., Adel., succeeded by HAROLD RISCHBIETH, M.D., F.R.C.S.

### Honorary Consulting Masseuse:

JOHN MILLIKIN, Esq. F.S.Sc.

### Resident Masseuse:

ENO M. ASHTON.

### MEDICAL SUPERINTENDENT.

Shepherd, A. E., Dr., H.M.O.	Hoggarth, J. M., charge nurse.
Rogers, R. S., Dr., H.M.O.	

## EXTRACTS FROM RULES AND REGULATIONS.

### ADMISSION AND DISCHARGE OF PATIENTS.

1. *Admission.*—Every contributor of £2 shall have the privilege of recommending two indoor or 12 outdoor patients within a year of date of such contribution; and of £5, five indoor or 30 outdoor patients within the year; of £10 annually, the privilege of having always one patient in the Hospital. A subscriber of £20 or over becomes entitled to Life Membership.

2. It is to be distinctly understood that these recommendations are only to be issued by the contributors to persons who cannot pay for medical treatment elsewhere. Hour of attendance of out-patients at the Out-patients' Department, Adelaide Hospital, 9 a.m.

3. Life contributors to have the same privileges in proportion; their donations being estimated as annual contributions of one-tenth.

4. It is optional for contributors to have indoor order-forms supplied in lieu of outdoor forms, at the rate of one of the former for six of the latter.

5. It is to be distinctly understood that these recommendations are *only to be given to persons who, on account of their financial position, are proper subjects for Hospital treatment.*

6. Applicants for admission to the Hospital shall, unless possessed of means sufficient to pay for medical advice, make a declaration, on a form printed for that purpose, to the effect that they are unable to pay for medical advice, and stating whether they are entitled to medical attendance from any benefit society or lodge.

7. Every member of the Board of Management and every legally qualified medical practitioner may likewise recommend patients for admission; severe accidents and cases of real emergency may be admitted at all times by the Resident Medical Officer on duty.

8. No female for the purpose of confinement shall be deemed fit for Hospital treatment; and no children under 10 years of age or infant shall be admitted on account of the condition of the mother alone, except with the advice of the Honorary Medical Officer. Infectious cases other than typhoid or tuberculosis are admitted to the Infections Diseases Block, the Boards of Health representing the various municipalities being responsible for the isolation of such cases at a cost of 4s. 4d. per day per patient.

9. The proper hours for patients to present their recommendations for admission to the Hospital are from 10 a.m. to 4 p.m., except in cases of emergency or accident.

10. Any case which can be treated at the Out-patients' Department, or which is obviously incurable, cannot be admitted, except by special order of a visiting Medical Officer.

11. No patient shall be discharged from the Hospital without the consent of the visiting Medical Officer, except as provided for under the regulations or in cases of misconduct.

### ADMISSION ON PAYMENT OF FEES FOR MAINTENANCE.

1. Persons seeking admission, whose means will not enable them in any other way to procure such medical attendance as their cases may require, may be admitted into the institution upon payment of maintenance fees at the rate of from 3s. to 6s. per diem, and upon a

patient or a responsible person making an agreement with the Secretary guaranteeing the payment during the time the patient remains in the institution.

2. Every person making a declaration or statement in writing when applying for admission to the Hospital that he is unable to pay for medical advice, and that he is not entitled to any benefit from any lodge, shall, nevertheless, be liable to pay to the Board the sum of £2 2s. for each week, and a proportionate sum for any part of a week, during which he receives medical attendance at or from the Hospital.

#### VISITORS.

1. Friends desirous of visiting patients, may, unless prohibited by the Resident Medical Officer, be admitted to the institution (by tickets only, to be procured in the wards) for that purpose on Tuesdays, Thursdays, and Sundays, between the hours of 2 and 4 p.m., and shall leave the wards punctually at the latter hour—a bell will be rung five minutes before the time for departure—but no more than two visitors to each patient are allowed on any one day, unless specially authorised. Exceptions to the above rule will only be allowed by special permission of the Resident Medical Officer or Medical Superintendent in favor of near relations, friends of patients in a dangerous state, or to Jews on their Sabbath. Visitors are strictly forbidden, on pain of expulsion from the wards, to introduce food, drink, or refreshment of any kind whatever without the sanction of the Resident Medical Officer in charge of the patient; and to ensure the perfect observance of this rule all parcels, &c., must be opened in the presence of the nurse on duty in the ward.

#### VISITING PATIENTS BY NIGHT.

In order to obviate certain difficulties to relatives of the patients in the Adelaide Hospital, who cannot for business reasons visit by day, the Hospital authorities have inaugurated a scheme which will, it is hoped, be satisfactory both to the public and the Hospital.

A special night visitor's card, signed by the Medical Superintendent, will be issued to eligible persons within 24 hours of the admission of a patient to the Hospital. This card, on presentation at the Hospital, will enable the person to visit his or her sick relative at the times stated thereon.

Special permission without cards will be given to relatives of patients who are dangerously ill.

#### MORAL AND RELIGIOUS INSTRUCTION.

1. Patients are at liberty to receive the visits of ministers of the religious denominations to which they respectively belong.

---

## ANNUAL REPORT, 1922.

---

The Board of Management of the Adelaide Hospital, in accordance with section 12 (1) of the Hospital Amendment Act, 1921, has the honor to submit for the information of the Minister the fifty-third annual report of the condition and progress of the Institution for the year ended December 31st, 1922.

Under the Hospital Amendment Act of 1921, which came into operation on March 1st, 1922, the Board of Management, appointed in accordance with paragraph 4 of the Hospitals Act, 1867, retired at the expiration of its term on February 28th, 1922.

The following were appointed members of the new Board under the Hospitals Amendment Act:—

Dr. B. H. Morris (Inspector-General of Hospitals),  
Chairman.

Mr. J. Wallace Sandford.

Mr. W. G. Coombs.

On the death of Mr. W. G. Coombs (which is referred to elsewhere), Mr. C. R. J. Glover was appointed.

Mr. J. Wallace Sandford was granted four months' leave of absence from the 14th April, 1922.

The new Board assumed office on the 1st March, 1922.

Thirty-five meetings were held by the new Board during the remainder of the year, and frequent visits and inspections were made by individual members, in addition to the ordinary meetings.

For a considerable portion of the period of Mr. Sandford's leave of absence, the late Mr. Coombs was also absent on account of illness. There not being a quorum, no meetings could be held during this time, the Institution being administered by the Chairman.

### PROPOSED ADDITIONS AND ALTERATIONS.

The Board has given very careful consideration to the plans, which were prepared in accordance with the recommendations of the Adelaide Hospital Extra Accommo-

dation Committee, of proposed additions and alterations to the Hospital. Portions of the plans were approved after many alterations and improvements were decided upon, and the Board trusts that the work will be proceeded with as expeditiously as possible.

The early provision of the proposed additions is essential, in view of the overcrowded condition of the Hospital, and the impossibility of admitting patients without delay, owing to the inadequate accommodation.

Portions of the existing building are quite out of date, the replacement of which with modern lavatory and bathing facilities, lifts, &c., should not be delayed.

In view of the long time that must necessarily elapse before improved accommodation is available for use (even if the new buildings are commenced at once), the immediate renovation of the present buildings is imperative.

#### REGULATIONS.

The Board is preparing a complete set of new regulations for the more efficient management and working of the Hospital.

A new system has also been inaugurated for the issue of and checking of dietary and other stores. This new system has already resulted in a considerable saving in the issue of provisions, notwithstanding that the patients' dietary scale has been much improved.

#### FINANCE.

*Revenue.*—The revenue received for patients' fees, Adelaide Hospital, shows an increase of 59.40 per cent. on the amount received during the previous year.

A system has been approved by the Board for the payment of a small fee by patients in a position to pay for attendance at the Outpatients' Department.

The increase shown in the patients' fees does not include revenue from this source, as the new system will not operate until 1923.

*Expenditure.*—The total expenditure for the maintenance of all Departments of the Institution for the year amounted to £78,293 11s. 8d., a decrease of £1,003 14s. 5d. on the total expenditure for the previous year.

The expenditure for the Adelaide Hospital proper was £2,284 15s. 2d. less than last year, notwithstanding that the daily average number of patients was higher than for the year 1921.

The annual cost of each inpatient shows a reduction from £157 14s. 9d. to £142 5s. 2d., being £15 9s. 7d. less for each patient during 1922 than during 1921. The annual cost of each patient is the lowest recorded since 1918. The number of cases admitted to the Hospital is the highest on record.

#### APPOINTMENTS.

The following Honorary Officers were appointed during the year:—

*Honorary Consulting Ophthalmologist.*—Dr. A. W. Hill was appointed in appreciation of the many years of valuable service rendered by him as Honorary Ophthalmologist.

*Honorary Medical, &c., Officers.*—Dr. A. M. Cudmore, reappointed; Dr. W. R. Cavanagh-Mainwaring, reappointed; Dr. H. S. Newland, reappointed; Dr. A. W. Hill, reappointed; Dr. H. F. Shorney, reappointed; Dr. Bronte Smeaton, reappointed; Dr. M. L. Scott, reappointed; Dr. John Corbin, reappointed; Dr. H. K. Fry, reappointed; Dr. Helen Mayo, reappointed; Dr. J. Brook Lewis, Dr. J. J. O'Grady, Honorary Clinical Assistants to Ophthalmic Department.

*Medical Superintendent.*—The Medical Superintendent, Dr. Chas. T. Turner, M.C., M.B., B.S., whose term of appointment expired in July, 1922, was reappointed for a further period of three years.

*Bio-Chemist.*—The Government has approved the appointment of a whole-time Bio-Chemist, who will take up duties early in 1923. Half salary is to be paid by the University.

*Medical and Surgical Registrar.*—Approval has been obtained from the Government for the appointment of a Medical and Surgical Registrar, half salary to be payable by the University.

By this appointment early in the New Year, it is expected that the proper grouping and collating of the Medical and Surgical records will be effected.

The Registrar, as Senior Medical Officer, will also assist the Medical Superintendent, and act for the latter officer in his absence.

*Assistant Matron and Sister Tutor.*—Approval has been received from the Government for these appointments. The provision of much needed assistance for the Matron and for a responsible official to take charge during the Matron's absence will now be provided for.

The Sister Tutor will be responsible for the proper working of the Nurses' Home, thereby releasing the Housekeeper for the better supervision of the Domestic Staff at the Hospital. The Sister Tutor will also assist the Matron in the training of Nurses.

#### RENOVATIONS AND FURNISHINGS.

The Board is commencing a complete renovation of the Hospital, and the present Ward furnishings are being gradually replaced by more modern furniture.

The quarters of the Resident Medical Staff and portions of the Nurses' Home have been provided with improved furnishings.

By arrangement with the Commissioners of Charitable Funds, a sum of money has been made available for renovations, structural alterations, and provision of balconies and lifts, which are being proceeded with.

#### LIGHTING.

Arrangements have been made for the substitution of electric light in place of gas throughout the old buildings. This will be a much safer and more efficient service.

#### FIRE APPLIANCES.

Regular inspections and reports are now made monthly by the Chief Fire Officer on the condition and utility of the fire appliances.

#### X-RAY DEPARTMENT.

Approval has been obtained for the purchase of additional X-ray apparatus at an approximate cost of £1,000. Proper facilities will now be afforded for up-to-date X-ray treatment.

## GOLD MEDALS.

The following Nurses passed first class in the examinations during their probationership, and were each awarded a gold medal:—

Bessie G. Tuckwell.

Amy Scott.

## CONTRIBUTIONS.

Hospital Reports—From kindred institutions in and out of the Commonwealth.

Books, Magazines, Clothing, Produce, Flowers, &c.—Various Church Societies and kind friends.

Band Concerts—By the Military, Vice-Regal, O.B.I., Eastern Suburban, Adelaide City, Red Cross, and others.

Fruit and Flowers—Director, Botanic Garden; Experimental Orchard, Blackwood.

Newspapers—The proprietors of the *Observer*, *Church Guardian*, *M.A.N.*, *War Cry*, *Patriot*, *Critic*, and *Barrier Daily Truth*.

Linen—Many parcels of linen were received from various donors.

Receipt is gratefully acknowledged of a piano, which was presented by the residents of Kensington and Norwood for the use of the inmates of the Consumptives' Home.

## OBITUARY.

*Mr. W. G. Coombs, Member of the Board.*

Mr. Coombs had been a member of the old Board for a period of 25 years, and was for 14 years its Chairman, during which time he rendered most valuable service to the Institution. His devotion to duty and his strong personality gained for him the respect of all.

*Mrs. Bessie Moore, Housekeeper.*

The late Mrs. Moore was appointed to the position of Housekeeper in July, 1921. During her period of office Mrs. Moore carried out her duties in a conscientious and painstaking manner.

## TRAINING OF NURSES.

The Board has approved of adopting the training and examination of Nurses in this Hospital, as prescribed by the Nurses' Board under the Nurses Registration Act.

During the year 57 probationer nurses were admitted for training.

The nurses' examinations held during the year resulted in 169 passes.

Attached are statistics and report.

I have the honor to be,

Sir,

Your obedient servant,

BEDLINGTON H. MORRIS, M.B., B.S.,

Chairman.

---

## APPENDICES.

---

# APPENDIX No. 1. HOSPITAL STATISTICS FOR THE YEARS 1870 TO 1922, INCLUSIVE.

Year.	Number of Cases Admitted.	Number of Deaths of In-Patients.	Average Daily number of Patients in Hospital.	Average number of Days Patients Discharged during the Year have been in Hospital.	Annual Cost of each In-Patient, i.e., per Bed *Occupied.	Number of Attendances of Out-Patients Treated.	Total Annual Expenditure. †	Amount of Fees Received for Maintenance of Patients. ‡	Fees received towards Maintenance (based on total average of Patients, and not deducted in calculating "Annual Cost of each Patient").
					£ s. d.		£ s. d.	£ s. d.	£ s. d.

† The cost per head is arrived at by making allowance for attendance and medicines supplied to the out-patients, &c.  
 \* The total expenditure does not include Consumptives' Home, £6,136 6s. 3d.; Infectious Diseases Block, £4,883 6s. 3d.; Bacteriological Laboratory, £3,186 4s.; and Department of Dentistry, £1,945 14s.  
 † The fees received do not include Consumptives' Home, £754 8s. 11d.; Infectious Diseases Block, £3,069 15s. 3d.; Bacteriological Laboratory, £2,528 1s.; and Department of Dentistry, £106 7s. 9d.

The total number of deaths (460) does not include Consumptives' and Cancer Home (106) and Infectious Diseases Department (14).

The statistics for the year as compared with those of 1921, show the following:—Increases—Annual contributions, £165 12s.; Number of admissions, 409; number of deaths, 11; average daily number of in-patients, 26; attendances of out-patients, 834; patients' fees, &c., £1,562 9s. 4d. Decrease—Annual cost of in-patients, £15 9s. 7d. Expenditure, £2,284 15s. 2d.

Three hundred and forty-five (345) patients have been sent to the Convalescent Hospital, Semaphore, at a cost to this institution of £52 9s. 2d. The Da Costa Fund, created by Miss Da Costa, to assist convalescent patients leaving Hospital, bore the expense of much the greater portion of this number.

The number of cases of enteric fever treated, showing percentage of mortality over same:—

In 1887 there were 161 cases and 19 deaths = 11·8 per cent.

The return of prescriptions made up for other departments during the year is as follows, viz. :—

Destitute Department .....	1,906
Adelaide Gaol .....	528
Consumptives' Home .....	3,100
Infectious Diseases Block .....	2,426
Bacteriological Block (solutions, &c.) .....	504
State Children's Department .....	197
Dental Hospital .....	46
Total .....	8,707

Subjoined is a list of the honorary and paid staff of the Hospital, including the Consumptives' Home, and Infectious Diseases Block; Bacteriological Block, and Department of Dentistry :—

Honorary Consulting Physicians and Surgeons .....	13
Honorary Physicians .....	4
Honorary Surgeons .....	3
Honorary Gynæcologists .....	2
Honorary Ophthalmologists .....	2
Honorary Clinical Assistants to Ophthalmic Department .....	2
Honorary Dermatologist .....	1
Honorary Pathologist .....	1
Honorary Surgeon for Ear and Throat .....	1
Honorary Clinical Assistant for Ear and Throat .....	1
Honorary Clinical Pathologist .....	1
Honorary Radiologist .....	1
Honorary Anaethetists .....	3
Medical Officers Venereal Clinic .....	2
Honorary Bacteriologist in charge Vaccine Department .....	1
Honorary Assistant Gynæcologists .....	2
Honorary Assistant Physician, Infectious Diseases Block .....	1
Honorary Assistant Physicians .....	3
Honorary Assistant Physician to Neurology Department .....	1
Honorary Assistant Surgeons .....	3
Honorary Consulting Masseuse .....	1
Honorary Biochemist .....	1
Assistant Biochemist .....	1
Honorary Dental Surgeons .....	5
Medical Superintendent .....	1
Resident Medical Officers .....	11
Lay Superintendent .....	1
Storekeeper .....	1
Storekeeper's Clerk .....	1
Inquiry Officer .....	1
Clerks .....	2
Typiste .....	1
Dispensers .....	3
Telephonists .....	2
Matron .....	1
Superintendent Department of Dentistry .....	1
House Dental Surgeon, Department of Dentistry .....	1

*List of the Honorary and Paid Staff—continued.*

Dental Mechanics .....	2
Clerk, Department of Dentistry .....	1
Matron Infectious Diseases Block .....	1
Matron Consumptive Home .....	1
Surgical Mechanic .....	1
Surgical Mechanic's Assistant .....	1
Assistant X-Ray Department .....	1
Director Bacteriological Department .....	1
Deputy Director do .....	1
Assistants do .....	5
Typist do .....	1
Resident Masseuse .....	1
Assistant Masseuse .....	3
Charge Nurses (day) .....	24
Charge Nurses (night) .....	3
Nurse Operation Room .....	1
Charge Nurses (Out-patients' Department) .....	2
Charge Nurse (X-ray Department) .....	1
Probationer Nurses .....	157
Housekeeper .....	1
Seamstresses .....	2
Housemaids and Wardmaids .....	60

## APPENDIX No. 4.

## OPERATIONS FOR 1922.

## OPERATIONS ON EAR, NOSE, AND THROAT.

For relief of cleft palate.....	2
Removal of adenoids or tonsils .....	187
Drainage of antrum of highmore .....	13
Nasal polypus, removal of .....	16
Excision of turbinals .....	6
Operation for deflected septum .....	62
Operation on mastoid antrum .....	18
Nasal spine .....	18
Aural polypus .....	8
Unclassified.....	8
Laryngectomy .....	—
Drainage of ethmoidal cells .....	52
Oesophagoscopy .....	2
Tracheotomy.....	5

## OPERATIONS ON THE EYE.

Operations for—	
Cataract .....	17
Strabismus .....	21
Lachrymal obstruction .....	6
Tarsectomy .....	21
Excision .....	17
Evisceration .....	2
Corneal section.....	7
Peritomy .....	2
Iridectomy .....	8
Entropion and ectropion .....	12
Canthoplasty .....	3
Chalazion .....	—
Curettage .....	5
Pterygium .....	13
Posterior sclerotomy.....	7
Unclassified.....	4
Removal of foreign body .....	3
Trephining for glaucoma .....	12
Discision .....	14

## OPERATIONS ON THE THORAX.

Drainage of empyema.....	19
Plastic thoracotomy for empyema .....	2
Thoractomy for pulmonary abscess .....	3

## OPERATIONS ON THE ABDOMEN.

Laparotomy for—	
Gastrectomy .....	3
Appendicostomy .....	1
Appendicectomy or drainage.....	394
Gastro-enterostomy .....	50
Cholecystotomy .....	22
Other operations on bile ducts and gall bladder.....	17
Cholecystectomy .....	17
Colotomy.....	19
Relief of intestinal obstruction .....	9
Enteroanastomosis .....	3
Exploratory laparotomy .....	80
Gastrostomy .....	5
Ruptured gastric ulcer .....	5
Ruptured duodenal ulcer .....	3
Drainage of subphrenic abscess .....	3

## GYNÆCOLOGICAL OPERATIONS.

Inductory of labour .....	3
Caesarean section .....	2
Operation for ectopic gestation .....	88
Operations for uterine displacements .....	133
Hysterectomy—	
Total .....	11
Sub-total .....	17
Salpingo-oophorectomy or salpingectomy .....	118
Ovarian and parovarian cysts—Removal of .....	33
Plastic operations on cervix and perinaeum .....	142
Posterior colpotomy .....	82
Curettage .....	447
Vaginal examination .....	11
Unclassified .....	25
Myomectomy .....	8
Anterior colporrhaphy .....	30
Removal of urethral caruncle .....	2
Relief of vesico-vaginal fistula .....	1

## MISCELLANEOUS OPERATIONS.

Suturing of wounds and tendons .....	27
Removal of foreign bodies .....	8
Drainage of abscesses .....	35
Breaking down adhesions .....	—
Operations for bursitis .....	2
Examinations under anæsthesia .....	4
Skin-grafting .....	24
Examining sinuses .....	1
Removal of enlarged lymphatic glands for various causes .....	29
Tenotomy .....	4
Removal of toe nail .....	2
Unclassified operations .....	23
Nerve suture .....	3
Incisions for cellulitis .....	4
Removal of gasserian ganglion .....	3
Plastic operation on face, jaw, and scalp .....	4
Bone grafting .....	2
Excision of carbuncle .....	12

## OPERATIONS ON BLOOD VESSELS.

Removal of varicose veins .....	11
Other operations on blood vessels .....	4
Blood transfusion .....	9

## OPERATIONS FOR DISEASES CAUSED BY ANIMAL PARASITES.

## Hydatid disease of—

Lung .....	—
Liver .....	9
Brain .....	1
Kidney .....	1
Other organs .....	5

## OPERATIONS FOR REMOVAL OF TUMORS.

## Malignant tumors of—

Face and neck .....	5
Skin .....	20
Lips .....	28
Tongue .....	12
Jaw .....	4
Penis .....	—

OPERATIONS FOR REMOVAL OF TUMORS.—*continued.*

Malignant tumors of—	
Rectum and anus .....	2
Breast .....	21
Other organs .....	—
Benign tumors—	
Dermoid .....	—
Goitre (including exophthalmic) .....	16
Papilloma of bladder .....	1
Adenoma .....	3
Fibroma .....	—
Lipoma .....	3
Cysts .....	7
Other tumors .....	16

## X-RAY DEPARTMENT.

The work in the X-ray Department continues to increase, as is evidenced by the number of radiographs taken during the year, viz., 6,999, as compared with 3,295, in 1921. Radiographs being distributed as follows:—15 x 12, 2,157; 12 x 10, 375; 10 x 8, 3,570; 8½ x 6½, 756, 6½ x 3½, 63; total, 6,999.

## MEDICAL ELECTRIC DEPARTMENT.

The number of patients treated were:—	1922.
In-patients .....	66
Out-patients .....	63
Treatments given .....	2,612
Daily average .....	16
Separate cases treated, 132, made up as follows:—	
Reactions tested .....	23
Paralysis .....	27
Neuritis .....	13
Fracture .....	8
Rheumatism .....	29
Muscular weakness .....	4
Various .....	23
Synovitis .....	5
Patients under treatment in Hospital, December 31st, 1922—In-patients, 7; Out-patients, 10 .....	17

## MASSAGE DEPARTMENT.

The number of patients treated were:—	1922.
In-patients .....	233
Out-patients .....	159
Total .....	392
Average number of patients each day (3 days a week) ..	42
The actual treatment given numbered .....	8,501
Patients under treatment in Hospital, December 31st, 1922 (18 in and 30 out) .....	48
Cases treated were as follows:—	
Fractures .....	203
Loss of muscular tone .....	14
Sprains and injuries .....	52
Paralysis .....	28
Rheumatism .....	45
Neuritis .....	10
Various .....	40

## CHARITABLE FUNDS COMMISSIONERS.

---

*REPORT re ADELAIDE HOSPITAL, 1921-22.*

---

## ADELAIDE HOSPITAL, TOWN ACRE 86.

The Commissioners hold on account of the Adelaide Hospital Endowment Fund the freehold of town acre 86, situated on the south-western corner of Rundle and Pulteney Streets, with the buildings thereon, which are leased to various persons at an annual rental of £3,015. All the premises have been inspected by the Commissioners during the year, and notices for certain repairs and renovations were forwarded to several of the lessees. With one exception, the necessary repairs were carried out, but the Commissioners are hopeful that the neglect on the part of these lessees to attend to the requirements of the Commissioners will not be continued, as on May 2nd, 1922, they wrote stating that the work would be done as soon as possible.

Two of the leases, representing a frontage of 58ft. to Rundle Street, will be determined early in 1923, and the Commissioners have arranged with the well-known architects, Messrs. English & Soward, for the preparation of the necessary plans and specifications for the erection of first-class modern business premises on this frontage. The Commissioners have the necessary funds; and the authority to expend moneys vested in them for the purpose of buildings and improvements on freehold lands, with the consent of the Controlling Minister, was granted to them by section 7 of Act 1209 of 1915. The preliminary plans and estimates for the proposed buildings were submitted to the Hon. the Chief Secretary on the 13th, and approved in Cabinet on the 20th ultimo. The new buildings will have a frontage of 58ft. to Rundle Street and a depth of 100ft. to a private road at back, with an elevation of four storeys above the basement. The structure will be constructed on the most modern lines, and contain three large shops on the ground floor, and about thirty (30) rooms for offices, etc., above the shops. The architects' estimate that the work can be completed in about 12 months, and that the

return from rents should bring in at least 11 per cent. on the capital outlay, which is estimated not to exceed £20,000.

In their ninth annual report, dated July 11th, 1921, to the Hon. the Chief Secretary, the Commissioners stated that they had in several of their annual reports referred to the very considerable increase in income that could be obtained by the erection of first-class business premises on town acre 86, in lieu of the present old and obsolete buildings. The delay in carrying out the proposed improvements has been caused through the high cost of building during the last six years, but prices have now become much less expensive, and the Commissioners have been advised by their architects, Messrs. English & Soward, that by the end of this year the cost of material and labor will probably reach reasonable rates, which will then be fairly firmly established.

*Purchase of Surrender of Leases, &c.*—Under the Public Charities Fund Amendment Act of 1921, the Commissioners are empowered, subject to the consent of the Controlling Minister, to borrow money for the purpose of making improvements on any freehold land vested in them; and to mortgage such lands as security for the money so borrowed. They are also authorised by the same Act to purchase the surrender of any lease, given by them, in order to obtain greater benefits by effecting improvements on such lands. These powers are absolutely essential to enable the Commissioners, from time to time, and as opportunities arise, to execute their proposals for the improvement of town acre 86, and the increase of the income derived therefrom.

#### ADELAIDÉ HOSPITAL.—ENDOWMENT FUND.

The balance in the Treasury to the credit of this fund on June 30th, 1922, amounted to £18,920 5s. 7d., which represents the sum of £2,500 annually set apart and reserved in quarterly instalments since January 1st, 1916, with compound interest thereon, under authority of Act No. 1209 of 1915. The Commissioners also set apart and reserved, by virtue of the same statutory power, the freehold of town acre 86, which is partly subject to certain leasehold encumbrances of long tenure. In January, 1916, the estimated unimproved value of the Rundle Street frontage of 210ft. of this town acre was less than £200 per foot; but since then property in Rundle Street has risen so considerably in value that the price per foot at the present can safely be estimated at £400, or an increase of 100 per cent. in six and a half years. The Act quoted limited the

establishment of the endowment fund to 35 years, and probably this limitation is desirable as regards the accumulation of money, but should not apply to town acre, which ought, in the opinion of the Commissioners, to be set apart and reserved in perpetuity, so that the Hospital would continually be benefited by the appreciated value of the property and the incomes derived therefrom. At a recent interview with the Commissioners, the Chief Secretary stated that the advantages to be secured by a perpetual, instead of a limited, endowment were most important in connection with town acre 86, and that he would be willing to obtain the necessary amending legislation to enable this to be legally effected, with the almost certain probability of ultimately securing, to a great extent, an independent financial position for the Institution.

#### ADELAIDE HOSPITAL.—BEQUESTS AND DONATIONS.

The amount received by the Commissioners on account of legacies and donations during the year ended June 30th, 1922, was £1,697 17s. 11d., the details of which are as follows:—

	£	s.	d.	£	s.	d.
Thomas George Wright, late of Synagogue Place, Rundle Street, who died on August 31st, 1919, left a legacy of £25, of which £8 was received in 1920-1 from the Executor, Trustee, and Agency Company of South Australia, and the balance of £17, with 13s. 6d. interest was received in July, 1921	—			17	13	6
Robert Wolfe, late of Carrington Street, who died at the Adelaide Hospital on September 16th, 1921, bequeathed his estate to the Hospital. The Public Trustee collected the sum of .. .. .	105	0	0			
And after payment of—						
Funeral expenses .. ..	£9	10	0			
Adelaide Hospital for maintenance fees ..	24	12	0

The balance was paid to the Commissioners on June 19th 1922 . . . . .	—			478	10	7
Thomas Francis Hyland, late of Vic- toria, bequeathed the sum of . . .	—			1,000	0	0
To be invested in Government Stock of South Australia or Vic- toria, and the income to be applied in perpetuity for the benefit of the Hospital. The amount was received by the Com- missioners on May 1st, 1922, and has been invested by them in S.A. Inscribed Stock at 5 per cent. . . . .						
Amount of legacies . . . . .	—			£1,646	7	5

To which has to be added the sum of £51 10s. 6d. for sundry donations, making the total for Bequests and Donations £1,697 17s. 11d. for the year as stated above.

#### ADELAIDE HOSPITAL.—DEPARTMENT OF DENTISTRY.

In their report for the year ended June 30th, 1920, full particulars are given in reference to the establishment of this department, and the appropriation of £15,000 out of moneys contributed by the British Red Cross Society. The amount was paid into the Treasury on June 26th, 1920, to a special trust account to the credit of the Commissioners of Charitable Funds, to bear interest at 5½ per cent. The following statement shows the position of the account on June 30th, 1922:—

	£	s.	d.
Contribution from the British Red Cross Society	15,000	0	0
Interest at 5½ per cent. to June 30th, 1922 . . . . .	1,604	8	10

Payments towards the cost of the new building on Frome Road . . . . .	£3,352	6	8
Other expenses . . . . .	53	18	3
	3,406	4	11
Balance in the Trust Account on June 30th, 1922 . . . . .	£13,198	3	11

## REPORT OF DEPARTMENT OF DENTISTRY

---

The work of the Department has been carried on in temporary premises on Frome Road throughout the year. The premises and their equipment being for the most part obsolete, there has been no attempt made to undertake any but simple and necessary work, although the public patronage is increasing both in numbers and in the class of work demanded. As regards admission of students to the courses provided, the Department was with considerable difficulty able to cope with requirements, but cannot do so in 1923 until the new building is available.

### OFFICERS.

On September 1st, 1922, the office of Dental Superintendent was made a full-time appointment and applications were called for throughout Australia and New Zealand. Dr. Arthur Chapman received the appointment.

The position of Dental House Surgeon has been finally classified and T. D. Campbell, Esq., B.D.S., was appointed.

### NURSING STAFF.

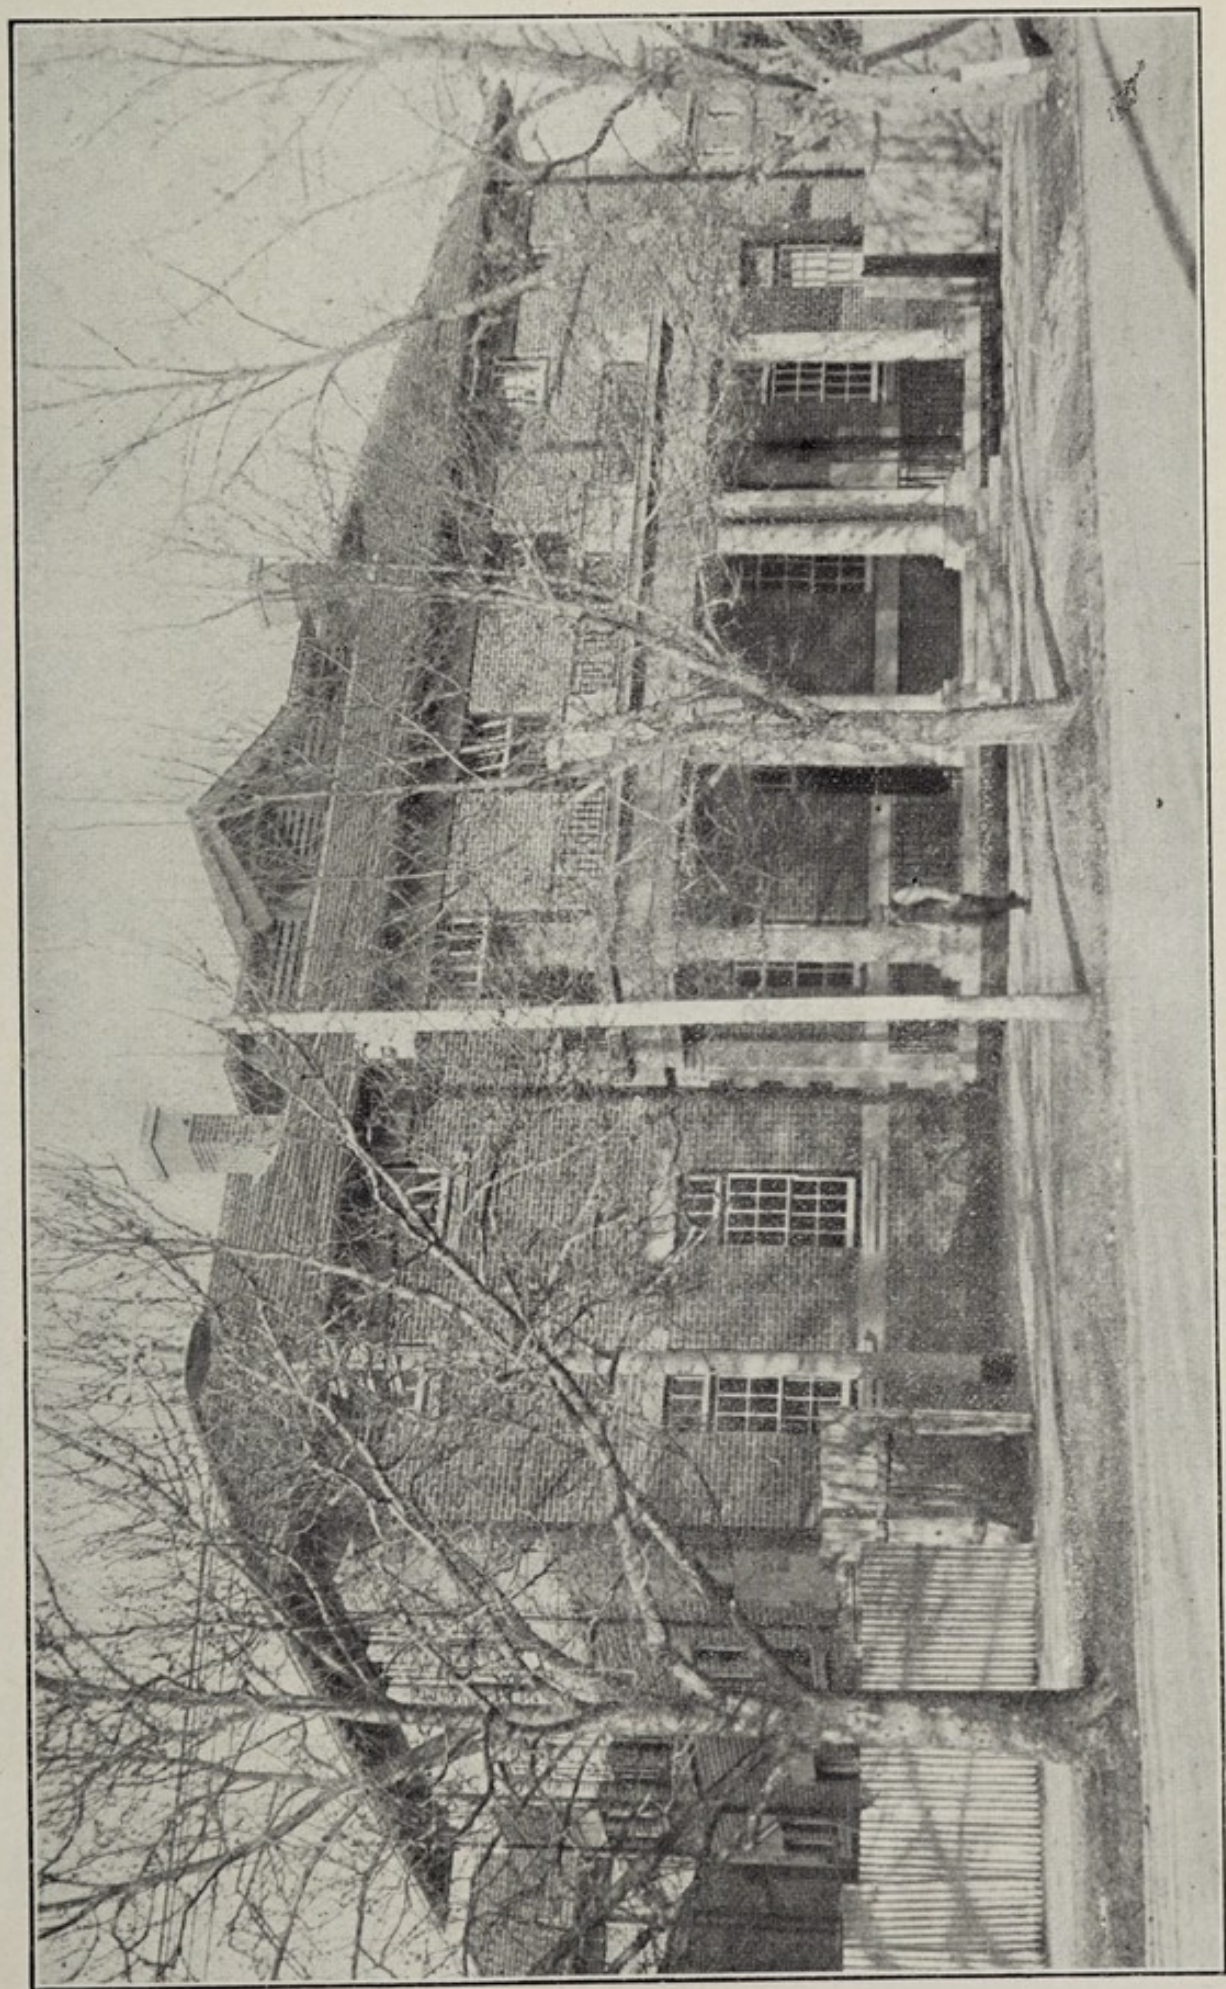

The nucleus of a nursing staff was effected during the year. This action has supplied a very long-felt want. Sister W. D. Priest, in charge of the Outpatients' Department, was appointed Sister-in-Charge at the Dental Department. This position will carry the responsibility for discipline and duties of nursing attendants (female) and charge of instruments, linen, &c., in all operatoria.

### PROSTHETIC DEPARTMENT.

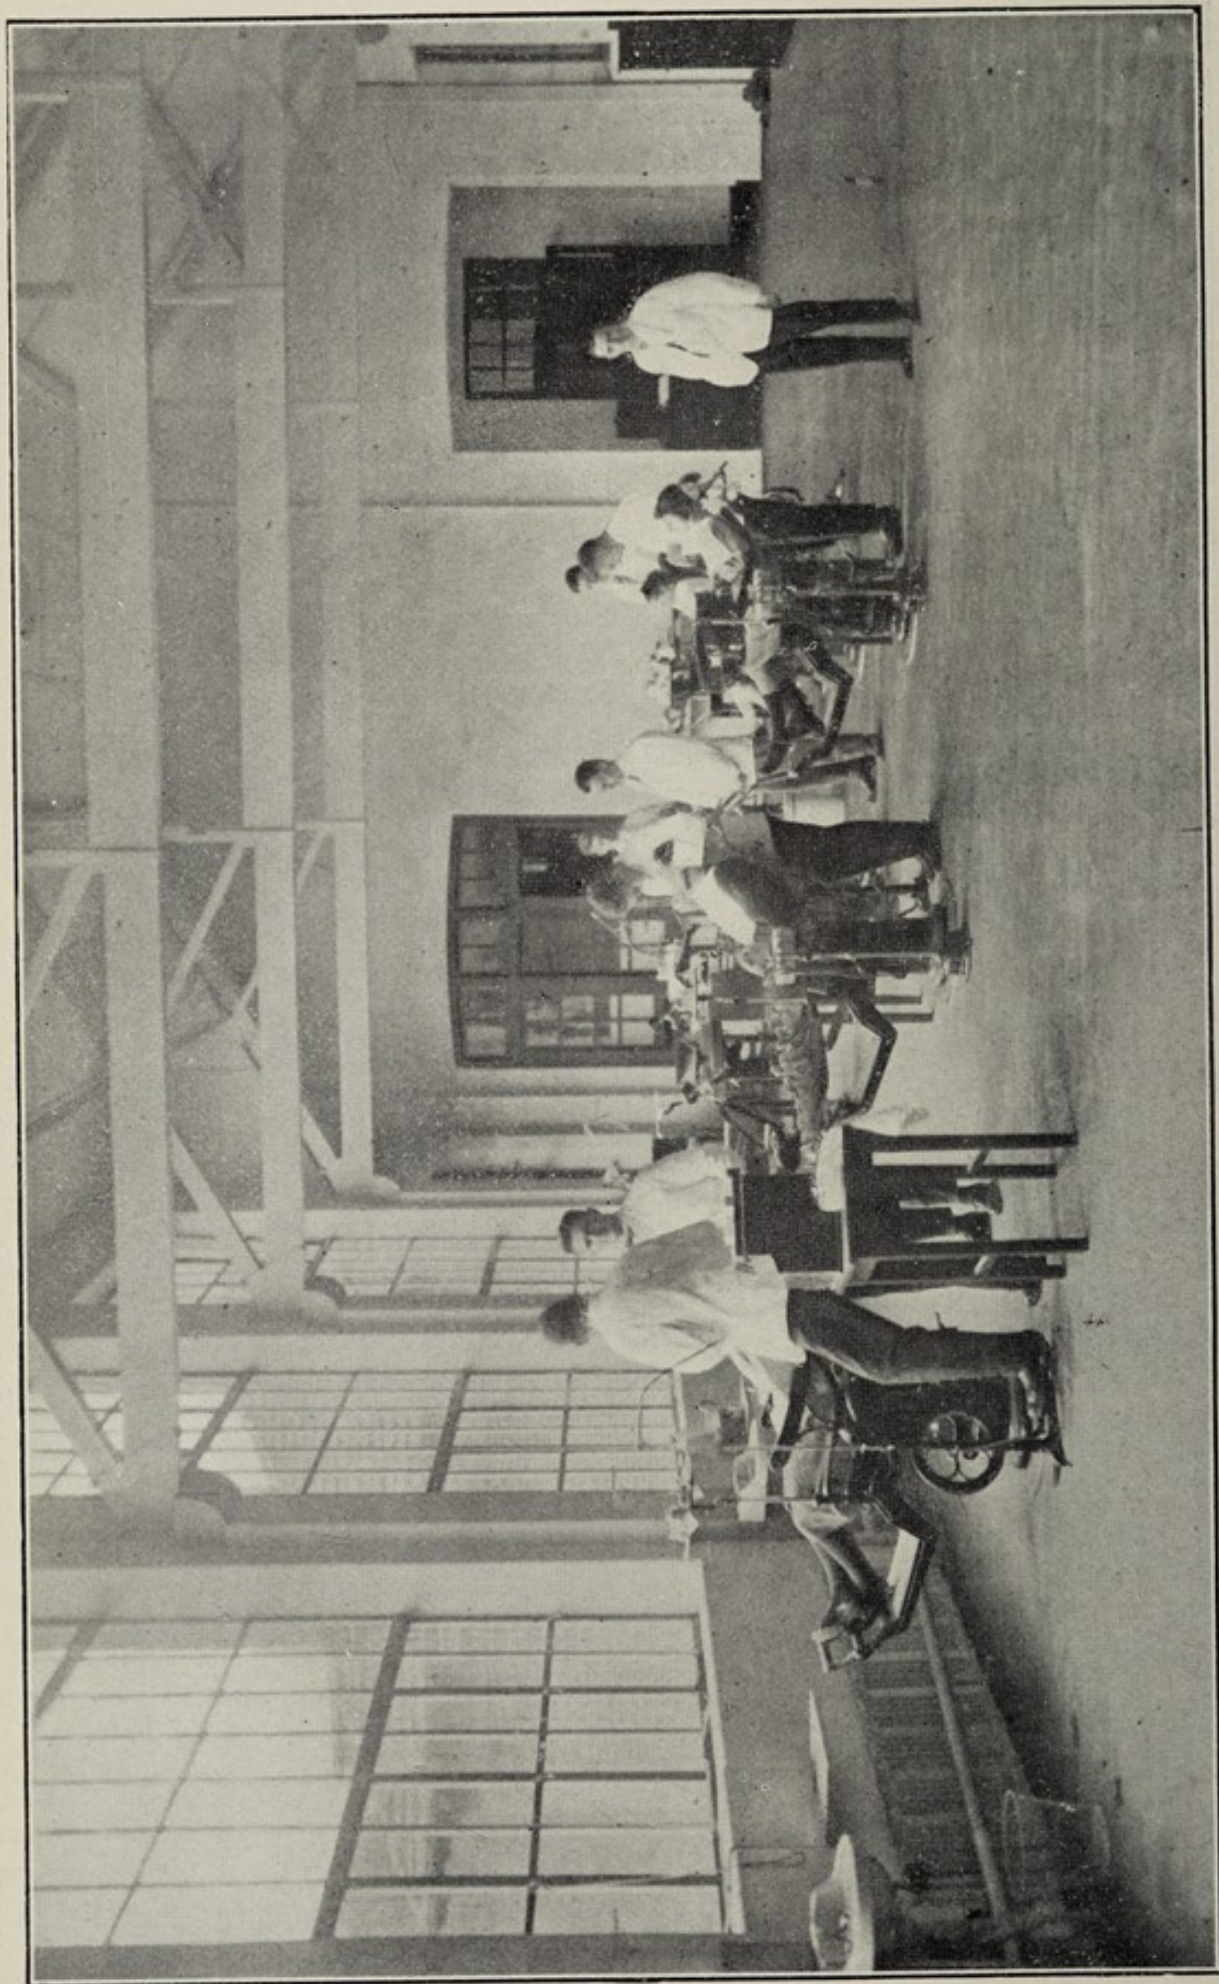

Increased demand for this class of treatment compelled the engagement of a temporary dental mechanic. Owing to continued increase of work, it is recommended that this position be made a permanent one from the occupation of the new building. It is also recommended that a Public Service classification be made as regards dental mechanics, so as to facilitate the future engagement of men either permanent or temporary according to the grade required.

### EQUIPMENT.

Owing to the near approach of completion of the new building, it was not thought necessary or advisable to improve or add to the present equipment or furniture.

THE NEW DENTAL HOSPITAL (Front View of the Building).

THE OPERATING ROOM (Patients Under Treatment).

## DENTAL ADVISORY COMMITTEE.

This Committee, consisting of Sir Joseph Verco (Chairman), Dr. A. G. Trott, Dr. E. J. Counter, Mr. H. Gill Williams, and Mr. Alex. Swann, met several times during the year, and their efforts on behalf of the Department are greatly appreciated.

## STUDENTS.

Twenty students in the Dental Course of the University were admitted to the clinical and technical courses provided. Unfortunately certain classes of advanced tuition could not be given owing to lack of patients and modern equipment. It is expected that this will be overcome next year. A recent regulation of the B.D.S. Course abolishing private apprenticeship will result in the necessity for more accommodation than the present building can supply. First and second year students cannot be admitted in 1923 until the new building is taken over.

Thirty-two medical students received clinical instruction in extraction of teeth and dental local anaesthesia.

## THE NEW BUILDING.

We are pleased to report that the new building will be ready for occupation during 1923. It will supply every facility for the conduct of an up-to-date dental hospital and dental school. The staff has worked well under the most trying conditions this year and will welcome the speedy completion of the new building.

## DENTAL OPERATIONS.

The dental operations for the year 1922 are as under:—

1. No. of patients examined .. .. .	899	Increase of	438
2. No. of extractions under general anaesthesia .. .. .	2,724	“	1,228
No. of extractions under local anaesthesia .. .. .	585	“	168
3. No. of fillings .. .. .	872	“	279
4. No. of treatments .. .. .	352	“	34
5. No. of inlays .. .. .	38	Decrease of	5
6. No. of crowns .. .. .	8	Increase of	6
7. No. of artificial dentures .. .. .	240	“	75
8. No. of special appliances (splints)	4	“	2
9. No. of repairs to dentures .. .. .	22	Unaltered	
10. No. of attendances .. .. .	3,320	Increase of	1,636
11. No. of admittances .. .. .	707	“	273
12. No. of discharges .. .. .	275	“	24

There is a marked increase in nearly every item.

## DENTAL FEES RECEIVED.

Salaries .. .. .	1,364	18	9
Contingencies—Equipment, Stores . . . . .	580	15	3
	<hr/>		
	£1,945	14	0

## GENERAL REMARKS.

The Prosthetic Department continues to be by far the most remunerative, one-half of the total assessed revenue being collected from that source (in spite of the fact that one (1) patient in every six is admitted for free supply).

The Department has undertaken during the year to give a total full fee value of service to the necessitous poor of £899 3s. 9d. free of cost. The educational value of the institution cannot be estimated in currency, but it is felt, both by reference to increasing patronage and experience of the general attitude of patients, that this Department is filling a very long felt want in the community. Cases of refusal to undergo the advised treatment are becoming very rare. The numbers of metropolitan school children attending is very gratifying, and no opportunity is lost to impress both to them and their parents upon the value of mouth hygiene, both in sickness and health, and the importance of conservative treatment of dental disease.

The work of the Department amongst indoor patients of the Hospital has also increased considerably.

Yours truly,

ARTHUR CHAPMAN,

Dental Superintendent.

## THE CONSUMPTIVES' HOME.

Within the home are rooms set apart for library (with hundreds of books, periodicals, and magazines), smoking, billiards (full sized table), billatelle, and other games. A piano and organ are also provided, in fact everything is done to give the patients all the comforts of a good home, together with the best medical and nursing skill procurable. There are 23 cubicles, three rooms for two patients each, one ward for eight patients, one ward for nine patients, one large bungalow for 12 patients, and four tents for one patient each—giving accommodation for 62 patients.

The buildings have verandahs on both sides, are thoroughly ventilated, the walls and ceilings are varnished and the floors covered with linoleum.

Provision is also made for the treatment of cancer cases, there being 14 single bedrooms devoted to this purpose.

The majority of cases pass through the Consultation room or are transferred from the wards of the General Hospital.

## INFECTIOUS DISEASES BLOCK.

The number of new cases admitted to the block (611) shows a substantial falling off from the previous year. The deaths totalled 14, a mortality rate of 2.3 per cent.

The decrease was mainly shown in the diphtheria cases; 276 were admitted in 1922, 405 in 1921; there were 11 deaths, or a case mortality of 4 per cent.

There was an increase in the number of scarlatina cases, 195 in 1922, 166 in 1921.

There is accommodation for 144 patients.

## SOUTH AUSTRALIAN GOVERNMENT.

LABORATORY OF BACTERIOLOGY AND  
PATHOLOGY, ADELAIDE HOSPITAL.

## STAFF:

*Honorary Consulting Bacteriologist:*

THOS. BORTHWICK, M.B., Ch. M., Edin.

*Director:*

J. B. CLELAND, M.D., Ch.M., Sydney.

*Deputy Director and Veterinary Pathologist:*

LIONEL B. BULL, D.V.Sc., Melb.

*Honorary Bio-Chemist:*

T. BRAILSFORD ROBERTSON, Ph.D., D.Sc.

*Assistant Bio-Chemist:*

F. R. HONE, M.B., B.S., Adel.

*Bacteriologist in charge of Vaccine Department:*

HELEN M. MAYO, M.B., B.S., Adel.

*Laboratory Assistants:*MISS F. E. DORMAN, H. V. JUSTELIUS, Senior Assistants.  
MISS E. CLELAND, MISS A. H. BUTTFIELD, MR. S. F. TEE.*Clerk:*

MISS D. I. STEINTHAL.

The Laboratory consists of a two-storied building, in which are situated the main working laboratory, inoculating rooms, director's laboratory, assistant's laboratory, museum, library, &c. Adjacent to the main building is a large students' laboratory and lecture hall, with a basement beneath, in which are ice chests and a photomicrographic room.

The accommodation for laboratory animals is very convenient, and the animals are healthy and well cared for.

A large veterinary experimental block, with loose boxes, pens, and operating room, is situated about 100yds. away, near the north boundary of the Hospital grounds. In this horses, sheep, &c., can be kept under observation.

Appended is summary of work, 1922.

The *Clinical Pathological Examinations* performed for the Adelaide Hospital include:—(1) The histological diagnosis of pathological tissues, several of which were immediate examinations performed during operations (such examinations are done in order to help the surgeon in deter-

mining the extent and nature of the operation necessary); (2) the examination of urine to detect abnormal chemical and morphological elements; (3) the examination of faeces to detect the presence of abnormal elements; (4) the examination of cerebro-spinal fluid to detect cellular and chemical change (this examination is extremely useful in detecting syphilis of the central nervous system); (5) the examination of the blood to detect the presence of the various anaemias and leukaemias; (6) the examination of material for the detection of *spirochaeta pallida* in the diagnosis of syphilis; (7) the examination of fluids from various cavities and cysts to determine their nature; (8) the examination of blood for the estimation of glucose, urea, proteins, &c. (These examinations are conducted by the Honorary Bio-Chemist and the Assistant Bio-Chemist.)

The *Bacteriological Examinations* performed for the Adelaide Hospital include:—(1) The examination of sputum for the detection of tubercle bacilli and other bacteria, and also for hydatid hooklets; (2) the examination of blood for the Widal reaction (this examination is important in assisting in the diagnosis of typhoid fever); (3) the examination of swabs taken from the throat and nose to detect the presence of diphtheria bacilli; (4) the examination of urine to detect the presence of tubercle bacilli, colon bacilli, and other bacteria; (5) the examination of inflammatory fluids for the detection of bacteria, *e.g.*, pleuritic fluid for tubercle bacilli; (6) the examination of cerebro-spinal fluid to detect the presence of tubercle bacilli, meningococci, and other bacteria; (7) the cultural examination of blood to detect the presence of bacteria in the circulation; (8) the examination of faeces and urine for the detection of typhoid bacilli and other pathogenic bacteria; (9) the examination of pus for the detection of gonococci, actinomyces, and other bacteria. Bacteria isolated from the various fluids and materials are often used in the preparation of autogenous vaccines.

The *Wassermann Reaction* was performed on Thursday in each week. This reaction is of great value in the diagnosis and treatment of syphilis. There is a general increase in the number of examinations made over those made during 1921. The Griffith and Scott technique is employed throughout.

The examinations performed and classified under the head *Private Work* include in the main such examinations as described under clinical pathological examinations and bacteriological examinations. Much work was done for the Board of Health. Included in the examinations are also:—(1) Examination of various foodstuffs for the detection of bacterial contamination; (2) examination of drinking

water to determine its suitability for drinking purposes. Included under this head is a special investigation carried out for the Adelaide Local Board of Health. The object of this investigation is to determine at regular intervals the bacterial content of the water as delivered from the Adelaide waterworks main. This investigation is being continued. (3) The examination of disinfectants to determine their germicidal power; (4) the examination of 229 rats in the search for any possible plague (*B. pestis*) infection.

The routine examinations for the *Stock Department* include :—(1) Bacteriological examination of cow's milk for the detection of tubercle bacilli and other bacteria; (2) examination of faeces for the detection of helminth infection; (3) physiological examination of water suspected of containing some poison; (4) morbid tissues for histopathological examination, &c.

The investigation into the cause of "forage poisoning" was continued, but little progress was made during the year. Investigations were also made into the nature of several diseases of sheep.

The *Vaccine Department*, as well as preparing 223 separate vaccines, also administered inoculations of vaccine to hospital patients. During the year 96 hospital patients were under treatment. The majority of these patients visited the laboratory twice a week during their course of treatment, when they received their injections. In all 1,480 doses of vaccine were administered. Also 528 doses of tuberculin were given to 16 patients. Vaccines were prepared for 129 patients under the care of private practitioners, and 2,204 doses (including 108 doses of tuberculin, four doses influenza, two doses anti-typhoid, and 123 doses T.A.B.) were supplied for these patients.

The examinations made by the *Bio-Chemical Department* have more than doubled in numbers. There will be a much greater increase in this work as its value is more fully appreciated.

*Summary.*—The figures show 4,869 fewer examinations made than during 1921. This is mainly due to the fall in the number of throat swab examinations for diphtheria, 4,652 fewer examinations being made. Slightly more than double the number of Wassermann tests have been made for the Hospital patients than during 1921. In all other departments the number of examinations made are approximately the same as for 1921.

## ADELAIDE HOSPITAL.—NIGHT CLINICS.

*Sixth Annual Report for Year ended September 30th, 1922.*

85, Hutt Street, Adelaide,

October 28th, 1922.

Sir—I have the honor to furnish my report upon the working of the night clinic for venereal diseases (male section) for the year ending September 30th, 1922.

There were 178 cases of syphilis and 385 cases of gonorrhoea. Included in these figures were 27 men who had both syphilis and gonorrhoea. One person attended with a condition which proved to be not venereal disease. The total number of attendances was 4,602.

## COMMENTS.

As regards syphilis, the condition of affairs may be considered satisfactory.

Cases applying for treatment in the earlier stages of the disease do well and have a good prospect of permanent cure, but one is more and more impressed with the impossibility of holding out this hope to those who either do not apply for treatment in the early stages, or, having commenced treatment early, later on neglect it or become casual in their attendance until some recurrence of their disease directs their attention to the seriousness of their condition.

Novarseno-benzol (*Billon*) has been the drug used almost throughout, and in early cases quickly effects a cure, both clinically and as judged by the blood reaction, but, as was noted in the last annual report, some cases have taken an extraordinarily long time for the blood reaction to respond to the treatment. In certain complications, notably those of the mouth, and in cases showing toxic effects due to novarseno-benzol, intramine has given good results.

With regard to gonorrhoea, I do not regard the position as being nearly so satisfactory. I take it that, in establishing the clinics, the Government had in mind as their chief aim and object the prevention of the transmission of the disease. This, of course, presupposes that no case will be discharged until quite free from infection. While it is true that some patients cease attending as soon as the acute symptoms subside, yet a fair percentage are willing to continue as long as the medical officer considers them

to be infectious. But with the present equipment of the clinic it is not possible to carry out all the necessary tests before one can state definitely that a given patient is no longer infectious. This standard of cure was adopted by a Venereal Diseases Conference held in Melbourne in February, 1922, but it is at present impossible to have one of the tests recommended at that Conference, viz., the gonococcal complement deviation test, carried out anywhere in South Australia. The result is that, after subjecting patients to those tests which one is able to apply, they are discharged as presumably cured. Unfortunately, however, a few of them return later with a condition which is clearly a relapse of their former (uncured) gonorrhoea, and in the meantime they may have transmitted the disease to innocent persons.

The remedy for this state of affairs lies in a reorganisation of the working of the clinic and in supplying it with better equipment, but before either of these is done more space is needed, for it would be useless to provide more elaborate equipment when there is no space in which to use it. Under present methods of working, one medical officer can easily enough handle the number of patients attending, but with the introduction of methods involving a more detailed investigation of the patient, the present personnel of the staff will not be sufficient. In the interest of the public, of the patients, and of the students, who should be taught the modern methods of treatment, some change, such as that outlined, is necessary. The allotment of one bed in the surgical wards would be of considerable assistance, as there are some cases, who, if they are to obtain a cure, need operative measures and careful post-operative treatment.

My assistants have done their best to render the working of the clinic a success, and I tender them my thanks.

I have, &c.,

GLEN H. BURNELL, B.S., M.D., (Adel.)

The Chairman, Board of Management,  
Adelaide Hospital.

A.M.P. Chambers,

King William Street, Adelaide.

November, 18th, 1922.

Sir—I have the honor to present the sixth annual report upon the work of the night clinic for the treatment of venereal disease (section for women), at the Adelaide Hospital, that is for the year 1921-22, ending September 30th last. The total number of women treated during the year was 96, or eight less than the year before. The total number of cases of disease was 101, as follows:—Forty-nine cases of syphilis; 47 cases of gonorrhoea (five individuals had both diseases); and five cases of conditions which were not venereal disease. The total number of attendances was 947. These figures show a slight increase in the numbers for syphilis and a slight diminution in the numbers for gonorrhoea as compared with the year before.

These figures show, in any case, since gonorrhoea in women, as in men, is three or four times commoner than syphilis, that a much larger proportion of all the cases of syphilis in the community attend the clinic than of all the cases of gonorrhoea, that is to say, the majority of cases of the latter disease, at any rate, do not come for treatment to the clinic. Having regard to all things, this is as it should be.

I consider the arrangements as regards the treatment of syphilis to be satisfactory and am satisfied, on the whole, with the results obtained. In the lack of application of the Act of 1920 for the enforcement and control of treatment I do not, at any rate, expect anything better. As regards gonorrhoea, I do not think it is sufficient for the clinic to be open one night a week if we wish to obtain the easiest, quickest, and best results. Cases can be dealt with, under present conditions, efficiently. But there is a great deal of room for improvement in the arrangements if we are aiming at the best.

I have recently furnished, at the request of its President, a report to the International Office of the Public Health, Paris, as to our experience during the last six years of the arseno-benzol derivations in the treatment of syphilis. This report has been published in summary in the *Medical Journal of Australia*, October, 1922.

I have also now been enabled to work out the end results (that is after four to six years) of the first six women that came to the clinic in a pregnant state.

All the six came to normal confinement and none of the children have died, so that the investigation concerned six women and six children. All six say that both they and their children are in excellent health and none have ever

shown any sign of disease. Physical examination confirmed the probability of the truth of these statements. All the children, at any rate, look to be in perfect health, and four of the six are considerably above the average physically.

The Wassermann Reaction of the blood has been tested as far as may be in the case of the mothers at regular intervals. Five of the six mothers give a negative reaction after four years and upwards. One, however, gives a definite positive reaction.

Of the children, five of the six give a negative reaction. One, however, gives a definite positive reaction. (These individuals that give positive reactions are *not*, however, in the relation of parent and child). We have, therefore, six mothers, five satisfactory, and six children, five satisfactory. I look upon this result as deplorable. For given proper conditions as to time, regularity of attendance, &c., as by law, the figures would, without doubt, have been six and six in each case. I am convinced that this is attainable under the proper conditions as to control in all similar cases. (A helpful feature is that pregnant women with syphilis come for treatment, on the whole, earlier each year—a point of the highest importance.)

I have to state, with regret, that I was induced in a former report to make a forecast or prognosis on these cases, and made it too optimistically as six in six in each case, whereas it should have been five in six in each case as is now shown. For this I beg to apologise. But I disclaim responsibility for this lack of complete success, because both women left the clinic and ceased treatment before the time appointed and without my permission.

Yours faithfully,

HAROLD RISCHBIETH,

M.A., M.D., B.Ch. (Cambridge), F.R.C.S. (Eng.)

Honorary Surgeon.

The Chairman of the Board of Management,

The Adelaide Hospital.

## DETAILS OF ATTENDANCES.

		Gonorrhœa.	Gonorrhœa and Syphilis.	Syphilis.	Non-venereal.	Total.	Attendances.
Males—
