EXTRACTS FROM RULES AND REGULATIONS.

PATIENTS.

Privileges of Contributors.

- 21. In-patients.—Subject to regulations pertaining to admission of patients, every contributor of £2 annually shall have the privilege of recommending one indoor patient in the year; of £5 annually, three indoor patients in the year; of £10 annually, the privilege of having always one patient in the hospital.
- 22. Out-patients.—Subject to rules pertaining to out-patients, contributors of £2 annually shall also have the privilege of recommending six outdoor patients for relief from the dispensary; contributors of £5, 12 patients; contributors of £10, 15 patients: Provided that such recommendations shall only be issued by the contributors to persons who cannot pay for medical treatment elsewhere.
- 23. Life contributors of £20 or more shall have the privileges set out in regulations 21 and 22 estimated as if their annual contribution had been one-tenth of their actual contribution.
- 24. It shall be optional for contributors to have indoor order forms supplied in lieu of outdoor forms at the rate of one of the former for six of the latter.
- 25. Recommendations shall only be given to persons who, on account of their straitened circumstances, are proper subjects for hospital treatment.

Admission of Patients.

- 26. Responsible relatives of or applicants for admission themselves shall furnish particulars of their financial position and make a declaration, on a form supplied for that purpose, to the effect that they are unable to pay for medical treatment and stating whether the applicant is entitled to medical attendance from any benefit society or lodge: Provided that the Board shall have power to refuse admission to any applicant or to charge the cost of maintenance of the applicant in hospital either to the applicant or his responsible relative or guardian.
- 28. Notwithstanding the provisions of regulation 26, in cases of severe accidents and of emergency, patients may be admitted at all times by the Resident Medical Officer on duty.
- 29. No infectious case, or suspected infectious case (other than enteric fever or tuberculosis), or children under 12 years of age, or any infant (on account of the condition of the mother) shall be admitted to the hospital proper except with the consent of the Medical Superintendent, who may admit such patient or child in any case where the life of the patient or of the child would be endangered by his refusal to do so. Cases of infectious diseases, except as provided above, shall be admitted to the Infectious Diseases Block of the Adelaide Hospital.
- 30. No patient who can be treated at the Out-Patients' Department, or who is obviously incurable, shall be admitted.
- 31. It shall be the duty of the honorary medical officer concerned to discharge a patient when his treatment is completed except as provided for under the regulations for the Medical Superintendent.
- 35. The hours for patients to present their recommendations for admission shall be from 10 a.m. to 4 p.m., except in cases of emergency or accident.

Admission of Patients on Payment of Fees for Maintenance.

- 42. Persons seeking admission whose means will not enable them in any other way to procure such medical attendance as their cases may require may be admitted into the institution upon payment of maintenance fees, not exceeding the rate of 10s. per diem, and upon the patient or a responsible person entering into an agreement with the Lay Superintendent undertaking the payment during the time the patient remains in the institution.
- 43. Every person admitted for treatment at the hospital who has made a declaration or statement in writing that he is unable to pay for medical advice and that he is not entitled to any benefit from any lodge, shall, nevertheless, be liable to pay to the Board a sum not exceeding 10s. for each day during which he receives medical attendance at or from the hospital.

Visitors to Patients.

- 44. Subject to regulations hereinafter contained, relations and friends desirous of visiting patients may be admitted to the institution (by tickets only to be procured in the wards) for that purpose on Tuesdays, Thursdays, and Sundays between the hours of 2 p.m. and 4 p.m., and shall leave the wards punctually at the latter hour.
- 45. Not more than two visitors to each patient shall be allowed on any one day unless with the permission of the medical officer in charge of the case.
- 46. Exceptions to regulations 44 and 45 shall only be allowed by special permission of the Resident Medical Officer or Medical Superintendent in favor of relations or friends of patients in a dangerous state or to Jews on their Sabbath.
- 47. Near relatives and visiting members of friendly societies may be permitted to visit a patient in the evening between the hours of 7.30 p.m. and 8.30 p.m., provided they possess a night visitor's card signed by the Medical Superintendent. Such cards of admission shall be issued only to those visitors who, on account of their employment, or some other good cause, are not able to attend during the day time. The cards must be presented for inspection to the gatekeeper and the nurse in charge of the respective wards.
- 48. No person shall directly give to a patient any food, drinks, or refreshment of any kind whatsoever. All parcels shall be handed to the nurse in charge, who shall inspect them and obtain the approval of the Resident Medical Officer before handing them to the patients.

RELIGIOUS INSTRUCTION.

- 49. Patients shall be at liberty to receive the visits of ministers of the religious denominations to which they respectively belong, and a card indicating the professed religion of the patient shall be placed over the bed on admission. Ministers, however, shall not be allowed to remain in the wards during the professional visits of the medical officers without permission.
- 50. Ministers of religion and other persons visiting the hospital shall not interfere with the repose and quiet of patients.
 - 51. Fublic religious services shall not be held in the wards of the hospital.
- 52. A room in the hospital shall, when practicable, be available for public worship by the convalescent patients of each religious persuasion.

ANNUAL REPORT, 1927.

The Board of Managament of the Adelaide Hospital, in accordance with section 12 (1) of the Hospitals Amendment Act, 1921, has the honor to submit for the information of the Hon. the Minister the fifty-eighth annual report on the administration showing the condition and progress of the Institution for the year ended December 31st, 1927.

The Board has held 54 meetings during the year.

The following information is submitted relating to the treatment of patients, costs, &c.:-

FINANCE.

Revenue.—The total receipts from all sources, and including all branches of the Hospital, for the year 1927 were £21,567 1s. 4d., as compared with £20,714 6s. 11d. for the year 1926, an increase of £852 14s. 5d.

The amount of patients' fees on account of the Adelaide Hospital again shows a satisfactory increase, the revenue for 1927 from this source being £1,432 1s. in excess of the amount received for 1926, or an increase of 13.79 per cent.

The amount of patients' fees for the Adelaide Hospital for the year 1927 was £11,815 7s. 2d., as against £2,630 6s. 8d. for the year 1921, an increase of 349 per cent.

The fees received towards the maintenance of each patient, based on the daily average number of patients, in 1927 were £26 19s. 6d., as against £7 1s. 5d. in 1921.

Patients' fees to the amount of £4,743 4s. 5d. were written off by the Board during the year.

The amount of patients' fees received on account of the Consumptive Home was £197 12s. 5d. less than the previous year, £728 14s. 2d. for 1927, as against £926 6s. 7d. for 1926.

There was also a reduction in the amount of fees received for the maintenance of patients in the Infectious Diseases Block, £1,240 19s. 3d. for 1927, as against £1,428 14s. 5d. for 1926, a decrease of £187 15s. 2d.

Laboratory fees show an increase of £75 3s. 7d. over the previous year, the amount of revenue from this source amounting to £2,751 18s. 11d. The revenue of this branch amounts to 67 per cent. of the expenditure.

The Dental Branch shows a decrease in patients' fees of £564 13s. over the previous year, £1,707 12s. 6d. in 1927, as against £2,272 5s. 6d. in 1926.

Details of revenue for 1927 will be found in Appendix No. 2.

A comparison table showing the revenue received for the years 1921-1927 is also shown.

Expenditure.—Details of expenditure will be found in Appendix No. 2. The total expenditure of all branches of the Hospital for the year 1927 was £105,656 16s. 4d., as against £95,419 9s. 4d. for the year 1926, an increase of £10,237 7s.

Salaries and wages show an increase of £4,759 7s. 9d., whilst there is an increase in contingencies of £5,477 19s. 3d.

POPULATION.

The total number of patients admitted to the Hospital for the year 1927 was 8,266, being 686 more than the number admitted during 1926.

The daily average number of indoor patients was 438, as compared with 422 for the previous year.

The number of indoor patients treated for the year 1927 was 8,640, as against 7,901 in 1926.

The number of new patients attending the Outpatients' Department was 6,811, and the total number of outpatient attendances during the year was 34,438.

In the Consumptive Home the daily average was 60, and in the Infectious Diseases Block, 22.5.

The total number of attendances at the Dental Hospital for all purposes was 24,404. The admissions for treatment were 2,845.

Honorary Staff.

Dr. W. R. Cavanagh-Mainwaring, Honorary Surgeon, who was granted six months' leave of absence on account of indifferent health, subsequently tendered his resignation. In view of the many years of valuable service rendered by him since 1900, Dr. Cavanagh-Mainwaring was appointed to the Honorary Consulting Surgical Staff.

Dr. Malcolm L. Scott, the Senior Honorary Assistant Surgeon, was appointed to the vacancy, and Dr. P. Santo Messent to the position of the last named.

Dr. T. G. Wilson, Honorary Gynaecologist, whose term of appointment expired on June 30th, 1927, had completed more than 20 years' service, and in accordance with the regulation he was therefore ineligible for re-appointment. In appreciation of his long services, Dr. Wilson was appointed Honorary Consulting Gynaecologist.

Dr. Rupert E. Magarey, the Senior Honorary Assistant Gynaecologist, was appointed to the vacancy, and Dr. J. B. Dawson to the position formerly held by Dr. Magarey.

The following members of the Honorary Staff who retired by effluxion of time, were re-appointed for a further term of three years, viz.:—

Dr. C. T. C. de Crespigny, Physician; Dr. D. R. W. Cowan, Physician; Dr. A. R. Southwood, Assistant Physician; Dr. G. A. Lendon, Assistant Physician; Dr. H. C. Nott, Radiologist; Dr. F. H. Makin, Dermatologist; Dr. R. L. T. Grant, Assistant Pathologist; Dr. A. P. R. Moore, Dental Surgeon; Mr. J. L. Eustace, Dental Surgeon; Mr. G. Hardy, Dental Surgeon; Mr. F. M. Swan, Dental Surgeon.

The following honorary appointments were also made, viz.:—Professor H. H. Woollard, Consulting Anatomist; Professor C. S. Hicks, Clinical Physiologist; Dr. R. M. Glynn, Clinical Assistant to the Aural Out-Patients' Department; Dr. E. F. Gartrell, Assistant to the Honorary

Officer in Charge of the Electro-Cardiograph; Dr. C. H. G. Ramsbottom, Medical Officer, T.B. Clinic; Mr. R. J. Brazil Smith, Dental Surgeon; Mr. M. S. Joyner, Dental Surgeon.

MATRON.

Matron Eleanor Harrald resumed duty on March 1st, after an absence on leave of 12 months.

ADVISORY COMMITTEE.

Mr. W. T. McCoy, B.A., was granted leave of absence by the Government, and during his absence abroad Dr. Wm. Ray was, on the nomination of the Board, appointed as a member of the Committee, vice Mr. McCoy.

Dr. C. T. C. de Crespigny was also appointed a member in the place of Dr. Smeaton.

The valuable advice of the Advisory Committee from time to time is appreciated by the Board.

OFFICIAL VISITORS.

The following were appointed official visitors by the Government for a further term of 12 months:—

Lady Hackett Moulden.

Mesdames M. Wallington and E. A. Wilson.

Messrs. F. B. H. Vincent and T. P. Howard.

Mrs. Wilson, who had served in this capacity for some years tendered her resignation and Mrs. M. B. Martin was appointed to the vacancy.

FIRE PRECAUTIONS.

Monthly reports are regularly forwarded and recommendations are made from time to time by the Metropolitan Fire Brigade.

The Board again desires to record its appreciation of the valuable assistance rendered by the brigade in making regular inspections of all fire appliances and hydrants and for the instructions to the Hospital male staff in their use.

THOMAS MARTIN BEQUEST.

A photograph of the late Mr. Thomas Martin was presented by the Commissioners of Charitable Funds, to be hung in Martin Ward in memory of this generous donor.

FURNISHINGS, RENOVATIONS AND IMPROVEMENTS.

The Balconies on the Eastern Wing.—The new balconies and bathrooms and lavatories for the use of Flinders and Light Wards have been completed and are now in use.

The scheme for the renovation and refurnishing of the old wards has been continued during the year; Hope and Beatrice wards having now being completed.

The following is a complete list of wards which have undergone structural alterations, provision of balconies, or renovations:—Adelaide, Albert, Martin, Victoria, Alexandra, Alfred, Leopold, Wyatt, Dorcas, Hope, Beatrice, Flinders, and Light. In addition to the above, sanitary hand basins have been installed in the four wards of the Ophthalmic block.

BUILDING ADDITIONS.

Bice Building.—This building which was commenced in 1923, was completed and occupied early in the year. Provision has been made on the Ground Floor for office accommodation for the whole adminstrative staff, whose offices were previously scattered. The convenient grouping of the staff tends towards greater efficiency and added convenience to the general public.

First and Second Floors, are set aside for the accommodation of the resident medical staff. These quarters are well lighted and tastily equipped. A billiard room has also been made available.

Third Floor.—The whole of this floor is utilised for the treatment of female medical patients and has been named "Bice Ward." This ward comprises 30 beds with up-to-date metal furnishings and modern sanitary and other conveniences. The floor lighting and steam radiators have been found to be a considerable improvement upon former methods. Two modern electric lifts have also been installed.

New Kitchen and Stores Block.—The work of erecting a new kitchen and stores block has proceeded during the year and it is hoped that it will soon be ready for occupation.

FUTURE BUILDING ADDITIONS.

It is strongly urged that funds be made available as soon as possible for the erection of the following additional buildings:—

Operating Theatres.

Outpatients' Casualty and Admission Block.

Additional Patients' Block.

Plans have been approved for the foregoing buildings.

Laboratory.—Additions to the laboratory, plans of which were approved some years ago, and which have been urged from time to time, have not yet been started.

AUSTRAL HOUSE.

The Government purchased Austral House, a property opposite the Hospital. The building has been renovated and refitted for use as additional sleeping quarters for the nursing staff. This additional accommodation was badly needed on account of the overcrowded state of the Nurses' Home.

CONSUMPTIVE HOME.

Throughout the year a portion of the home was thoroughly cleaned and repainted. It is hoped that next year the remaining portions will be completed. The Board trusts that the building of a new Consumptive Home in a more suitable locality will be put in hand as soon as possible.

X-RAY.

The Board again recommends the provision of a portable X-Ray Plant for use in wards, &c. This is necessary in cases where it is inadvisable to move patients and would also lessen the work required of the old plant, which is already overtaxed.

T.B. CLINIC.

The Lodge at the entrance to the Consumptive Home and Infectious Diseases Block has been converted into rooms suitable for the purpose of an Out-patient T.B. Clinic. Dr. C. H. G. Ramsbottom has been appointed as Medical Officer in charge with the status of "Honorary Assistant

Physician." The Clinic is well attended and suitable male patients therefrom have been transferred to the Bedford Park Sanatorium. There are many female patients attending the Clinic who would benefit by Sanatorium treatment. It is hoped that provision will soon be available for the accommodation of such cases.

INVESTIGATION INTO TREATMENT OF CANCER.

A committee to investigate the problems connected with the treatment of Cancer has been appointed by the Adelaide University Council.

The Medical Superintendent (Dr. J. G. Sleeman), and the Director of the Laboratory (Dr. L. B. Bull), are members of the committee. The Board has granted permission to carry out the Clinical work of the investigation at the Cancer Block.

HONOR ROLL.

Arrangements have been made with the Architect-in-Chief for the erection of an Honor Roll in the main entrance to Bice Building.

HOSPITAL AUXILIARY.

The Adelaide Hospital Auxiliary continues to perform very valuable work for the benefit of the Hospital and patients. The Kiosk in the grounds of the Hospital is open each day from 9 a.m. to 5 p.m., friends of patients, members of the staff, and outpatients, are able to procure refreshments and other comforts throughout the day. The sewing circle branch of the Auxiliary has completely equipped the Hospital with bed linen, quilts, bed jackets, toilet covers, &c., and by the adoption of well selected color schemes has given all the wards a very pleasing and soothing appearance.

The Board wishes to place on record its sincere appreciation for the untiring work of the voluntary lady workers.

The result of their work will also be reflected in the future by the building of a maternity block for the Hospital the money expended by them being subsidised by the Government and allowed to accumulate towards this object.

Accommodation for the Sewing Committee has been provided at Austral House.

GOLD MEDALISTS.

The following, who passed first-class in all subjects in their examinations during probationership were awarded a gold medal:—Nurses E. T. Edgar, M. D. Dutton, J. W. E. Kunoth, and L. M. Zwar.

DONATIONS.

The Board has pleasure in recording the receipt of further donations from the following:—

Charity Football Carnival Committee £2,000	0	0	0
Mr. McRobertson, of Melbourne (received			
through the Proprietors of the S.A.			
Register)	0	0	0
Trustees of the late Wm. Thorngate 30	0	0	0
Also donation from Berlei Ltd. of 100	0	0	0

A complete list of contributors who have subscribed to the funds of the Institution during the year is contained in the Report, also a list of Life contributors. To all donors the Board extends its grateful thanks.

BEQUESTS.

The following bequests are also gratefully ack	knowle	edge	d:
Estate of late A. G. Arthur	£25	0	0
Estate of late M. E. A. Davies (instalment)	24	3	0
Estate of late J. Delaney	9	0	0
Estate of late W. I. Dempsey	141	13	0
Estate of late J. M. Richman (instalment)	215	0	0

GIFTS, ETC.

The Board places on record its appreciation of the following gifts, &c. :-

Medical Works.—Valuable contributions from time to time from Dr. E. Angas Johnson.

Dental specimens.-Mr. H. W. Barratt.

Dental literature.—F. H. Faulding & Co.

Drugs, &c.-Willmott, Prisk & Co.

Hospital reports.—From kindred institutions in and out of the Commonwealth.

Books and magazines, clothing, produce, flowers, from various benevolent persons and church societies.

Various band concerts.

Flowers, shrubs, &c.—From the Director of the Botanic Gardens.

Newspapers.—Proprietors of the Observer, Church Guardian, M.A.N., War Cry, Patriot, Barrier Daily Truth.

Christmas Festivities.—The News Father Xmas Fund; Cathedral Choir; Carol Singers.

The News.—Its valued efforts in connection with the Charity Football Carnival, by which the Institution and Auxiliary benefitted to the extent of £2,000, are much appreciated.

Attached are statistics, reports, &c.

I have, the honor to be Sir,
Your obedient servant,
BEDLINGTON H. MORRIS, M.B., B.S.,

Chairman.

TO THE
1895 1895 1895 1895 1895 1895 1895 1895

* The cost per head is arrived at by making allowance for attendance and medicines supplied to the out-patients, etc., viz., £3.182 7s. 1d.

† For years 1870 to 1923 the amounts shown are the total expenditure for each year. From the year 1924 the amounts shown are the actual cost of maintenance for the year. For the year 1927 the amount £85,808 11s. £d., does not include:—Consumptive Home, £5,961 17s. 2d.; Infectious Diseases Block, £3,245 3s. 7d.; S.A. Government Laboratory £4,129 7s. 8d.; and Dental Hospital, £4,539 9s. 6d.

‡ The fees received do not include Consumptive Home, £728 14s. 2d.; Infectious Diseases Block, £1,240 19s. 3d.; S.A. Govt. Laboratory, £2,751 18s, 11d.; and Dental Hospital, £3,533 9s. 0d.

The total number of deaths (568) does not include Consumptives

and Cancer Home (121) and Infectious Diseases Block (27).

The statistics for the year as compared with those of 1926, show the following:—Increases—Expenditure, £10,577 ls. 7d.; annual cost of in-patients, £16 5s. 10d.; patients' fees, £1,432 ls. 0d.; number of admissions, 686; number of deaths, 21; attendances of out-patients, 9,495; average daily number of patients, 16.

Three hundred and fifty-eight patients have been sent to the Convalescent Hospital, Semaphore. The Da Costa Fund, created by Miss Da Costa, to assist convalescent patients leaving Hospital, paid for the maintenance of 227 of these patients at the Convalescent Hospital.

The number of cases of enteric fever treated, showing percentage of mortality over same : —

APPENDIX No. 3.

STATISTICS FOR YEAR 1927.

Medical Statistics, 1927.

Remaining in Hospital on December 31st, 1926 Admissions during the year 1927	Males. 221 4,511	Females. 153 3,755	Total. 374 8,266
	4,732	3,908	8,640
Discharges during the year 1927—	198	The state	199 Marie
Recovered	2,644		
Relieved			
Unrelieved	895		
Other causes	173		
Died	568		
Remaining in Hospital on December 31st,			
1927—Males, 219; females, 170	389		
			8,640
Average number resident daily throughout the	year		438
Mean residence of each patient in days			18
Number of out-patients attended during the ye	ar-		
new cases			6,811
Number of attendances of out-patients during	the		
year		3	4,438
Contract to the second			

CLASSIFICATION OF DISEASES OF PATIENTS TREATED FOR YEAR ENDING DECEMBER 31st, 1927.

Note.—Concurrent Diseases.—The figures in this column represent the number of patients in whom the disease was of secondary importance or was a complication.

GROUP 1.—GENERAL DISEASES.

APPENDIX No. 4.

OPERATIONS.

OPERATIONS ON BLOOD VESSELS.	
Ligature of arteries	2
Excision of varicose veins	5
" varicocele	7
	12
Ligature of jugular veins	1
OPERATIONS ON MUSCLES, BURSAE, TENDONS, AND NERVES, ETC.	-
	7
Tenotomy	
	34
Excision of bursa	1
Excision of ganglion	3
Tendon transplantation	4
Resection of nerve	1
Suturing nerves	2
Stretching nerves	1
Excision of gasserian ganglion	1
Ramisectomy	1
	8
(a) Skull OPERATIONS ON BONES.	
(a) Skuii—	
Land to the state of the state	10
Exploratory trephine 1	15
Unilateral subtemporal decompression	2
**	_
Suboccipital decompression	2
Drainage of cerebral abcess	1
(b) Spine—	
Laminectomy	1
	-
(c) Fractures—	
Reduction and setting of fractures (by manipulation only,	
under G.A.) 1	
	10
Reduction of fracture and dislocation	3
Reduction of fracture and dislocation	3
Reduction of fracture and dislocation	3
Reduction of fracture and dislocation	3
Reduction of fracture and dislocation	3 15 1
Reduction of fracture and dislocation Wiring of fracture	3 15 1 1
Reduction of fracture and dislocation Wiring of fracture	3 15 1 1 1
Reduction of fracture and dislocation Wiring of fracture Plating of fracture Removing of plates and wires Suturing patella Removal of callus Correction of malunited fractures (osteoclasis)	3 15 1 1 1 1 6
Reduction of fracture and dislocation Wiring of fracture Plating of fracture Removing of plates and wires Suturing patella Removal of callus Correction of malunited fractures (osteoclasis) Freshening ends of ununited fracture	3 15 1 1 1 1 6
Reduction of fracture and dislocation Wiring of fracture Plating of fracture Removing of plates and wires Suturing patella Removal of callus Correction of malunited fractures (osteoclasis) Freshening ends of ununited fracture Cleaning and setting compound fractures	3 15 1 1 1 1 6
Reduction of fracture and dislocation Wiring of fracture Plating of fracture Removing of plates and wires Suturing patella Removal of callus Correction of malunited fractures (osteoclasis) Freshening ends of ununited fracture Cleaning and setting compound fractures (d) Amputations and excisions—	3 15 1 1 1 1 8
Reduction of fracture and dislocation Wiring of fracture Plating of fracture Removing of plates and wires Suturing patella Removal of callus Correction of malunited fractures (osteoclasis) Freshening ends of ununited fracture Cleaning and setting compound fractures (d) Amputations and excisions— Amputation of toes	3 15 1 1 1 1 1 8
Reduction of fracture and dislocation Wiring of fracture Plating of fracture Removing of plates and wires Suturing patella Removal of callus Correction of malunited fractures (osteoclasis) Freshening ends of ununited fracture Cleaning and setting compound fractures (d) Amputations and excisions— Amputation of toes '' foot	3 15 1 1 1 1 6 1 8
Reduction of fracture and dislocation Wiring of fracture Plating of fracture Removing of plates and wires Suturing patella Removal of callus Correction of malunited fractures (osteoclasis) Freshening ends of ununited fracture Cleaning and setting compound fractures (d) Amputations and excisions— Amputation of toes '' foot '' leg	3 15 1 1 1 1 1 8
Reduction of fracture and dislocation Wiring of fracture Plating of fracture Removing of plates and wires Suturing patella Removal of callus Correction of malunited fractures (osteoclasis) Freshening ends of ununited fracture Cleaning and setting compound fractures (d) Amputations and excisions— Amputation of toes 'foot 'leg 'thigh	3 15 1 1 1 6 1 8 7 1
Reduction of fracture and dislocation Wiring of fracture Plating of fracture Removing of plates and wires Suturing patella Removal of callus Correction of malunited fractures (osteoclasis) Freshening ends of ununited fracture Cleaning and setting compound fractures (d) Amputations and excisions— Amputation of toes 'foot 'leg 'thigh 'thigh 'fingers	3 15 1 1 1 1 6 1 8
Reduction of fracture and dislocation Wiring of fracture Plating of fracture Removing of plates and wires Suturing patella Removal of callus Correction of malunited fractures (osteoclasis) Freshening ends of ununited fracture Cleaning and setting compound fractures (d) Amputations and excisions— Amputation of toes '' foot '' leg '' thigh '' fingers '' hand	3 15 1 1 1 6 1 8 7 1
Reduction of fracture and dislocation Wiring of fracture Plating of fracture Removing of plates and wires Suturing patella Removal of callus Correction of malunited fractures (osteoclasis) Freshening ends of ununited fracture Cleaning and setting compound fractures (d) Amputations and excisions— Amputation of toes '' foot '' leg '' thigh '' fingers '' hand '' forearm	3 15 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1
Reduction of fracture and dislocation Wiring of fracture Plating of fracture Removing of plates and wires Suturing patella Removal of callus Correction of malunited fractures (osteoclasis) Freshening ends of ununited fracture Cleaning and setting compound fractures (d) Amputations and excisions— Amputation of toes '' foot '' leg '' thigh '' fingers '' hand	3 15 1 1 1 6 1 8 7 1
Reduction of fracture and dislocation Wiring of fracture Plating of fracture Removing of plates and wires Suturing patella Removal of callus Correction of malunited fractures (osteoclasis) Freshening ends of ununited fracture Cleaning and setting compound fractures (d) Amputations and excisions— Amputation of toes 'foot 'leg 'thigh 'fingers 'hand 'forearm 'upper arm	3 15 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1
Reduction of fracture and dislocation Wiring of fracture Plating of fracture Removing of plates and wires Suturing patella Removal of callus Correction of malunited fractures (osteoclasis) Freshening ends of ununited fracture Cleaning and setting compound fractures (d) Amputations and excisions— Amputation of toes '' foot '' leg '' thigh '' fingers '' hand '' forearm '' upper arm '' stump	3 15 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1
Reduction of fracture and dislocation Wiring of fracture Plating of fracture Removing of plates and wires Suturing patella Removal of callus Correction of malunited fractures (osteoclasis) Freshening ends of ununited fracture Cleaning and setting compound fractures (d) Amputations and excisions— Amputation of toes '' foot '' leg '' thigh '' fingers '' hand '' forearm '' upper arm '' stump Curetting bone	3 15 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1
Reduction of fracture and dislocation Wiring of fracture Plating of fracture Removing of plates and wires Suturing patella Removal of callus Correction of malunited fractures (osteoclasis) Freshening ends of ununited fracture Cleaning and setting compound fractures (d) Amputations and excisions— Amputation of toes '' foot '' leg '' thigh '' fingers '' hand '' forearm '' upper arm '' stump Curetting bone Tarsectomy	3 15 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1
Reduction of fracture and dislocation Wiring of fracture Plating of fracture Removing of plates and wires Suturing patella Removal of callus Correction of malunited fractures (osteoclasis) Freshening ends of ununited fracture Cleaning and setting compound fractures (d) Amputations and excisions— Amputation of toes '' foot '' leg '' thigh '' fingers '' hand '' forearm '' upper arm '' stump Curetting bone Tarsectomy Excision of metatarsal bone	3 15 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1
Reduction of fracture and dislocation Wiring of fracture Plating of fracture Removing of plates and wires Suturing patella Removal of callus Correction of malunited fractures (osteoclasis) Freshening ends of ununited fracture Cleaning and setting compound fractures (d) Amputations and excisions— Amputation of toes '' foot '' leg '' thigh '' fingers '' hand '' forearm '' upper arm '' stump Curetting bone Tarsectomy	3 15 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1

OPERATIONS ON BONES—continued.	
Sequestrectomy	11
Osteotomy	
Excising and curetting sinuses	3
Removal of bony spurs	1
OPERATIONS ON JOINTS.	
Reduction of dislocation (by manipulation)	3
Reduction of dislocation (by open operation)	3
Arthrotomy	. 8
Arthrectomy	1
Arthrodesis	2 3
Moving stiff joints	
Excision of semilunar cartilage	4 2
Correction of hallux valgus: bunion	3
Correction of hammertoe	2
Removal of loose bodies	4
Exploration of tuberculous sinus	
OPERATIONS ON GLANDULAR SYSTEM.	
Excision of gland (diagnostic)	4 22
Excision of glands (therapeutic) (specify)	
Incision for suppuration	13
Partial thyroidectomy	1
Removal of thyroid adenoma or cyst	.1
OPERATIONS ON ALIMENTARY SYSTEM.	
Mouth, tongue, lips, etc.—	3
Extraction of teeth	
Excision of lip (partial or complete)	10
Excision of lip and glands	5
Partial or complete excision of tongue	3
Excision of jaw (lower) and glands of neck	1
Excision of jaw (upper)	1
Closing salivary fistula	
Oesophagoscopy	
Incision or excision of ranula	1
Repair of cleft palate	1
Removal of dentigerous cyst or epulis	2
Removal of foreign body from oesophagus	1
Stomach and intestines-	
Gastrectomy	7
Gastrostomy	5
Gastroenterostomy	64
Closing perforated peptic ulcer	19
Excision of peptic ulcer	2
Exploratory laparotomy	62
Freeing abdominal adhesions	10
Parasentesis abdominis	-
Closure of intestinal perforation	1
Colostomy	15
Enterectomy	5
Lateral anaetomosis	-
Appendectomy	313
Appendectomy with drainage	62
Drainage of appendical abscess	4
" subphrenic	6

OPERATIONS ON ALIMENTARY SYSTEM—continued.	
Stomach and intestines—continued.	
Drainage of other abdominal abscess	11
Caecostomy	
Relief intestinal obstruction	13
Repair of faecal fistula	2
Opening colostomy	7
Closing colostomy	6
Entero-anastomosis	7
Hernia—	
Inguinal hernia. Radical cure	
Inguinal hernia. Strangulated	2
Femoral hernia. Radical	6
Femoral strangulated	3
Ventral hernia. Radical cure	16
Ventral hernia. Strangulated	4
Incisional hernia	1
Umbilical hernia	1
Liver gall bladder, spleen, pancreas—	
Incision and drainage hepatic abscess	1
Hydatid eyst	15
Repair ruptured liver	_
Cholecystostomy	21
Cholecystectomy	64
Cholecystenterostomy	1
Linectomy	1
Repair of ruptured spleen	_
Drainage of pancreas	1
Choledochostomy	2
Rectum and anus—	
Haemorrhoids. Radical cure	36
Fistula in ano. Excision	11
Dilatation of stricture	_
Ischiorectal abscess. Incision and drainage	19
Excision of papilloma rectum	1
Excision of rectum	_
Sigmoidoscopy	9
Fissure in ano-excision	.7
Prostoscopy	1
Widney OPERATIONS ON URINARY SYSTEM.	
Kluney—	0
Exploration of kidney	8
Nephrectomy	15
Draining perinephrec abscess	7
Removal of stone from kidney	4
Cystoscopy	153
Suprapubic eystotomy	20
Perineal prostatectomy	3
Vesical calculus. Lithotomy	3
Removal of stone from ureter	2 7
Passing bladder sound or catheter	3
Internal urethrotomy	7
External urethrotomy	-
Excision of urethral stricture	11
Excision of urinary fistula	3
Incision of prostatic and periurethral abscess	8
Nephropexy	1
Removal of vesical tumour	6

OPERATIONS ON URINARY SYSTEM—continued.	
Kidney—continued.	
Supra-pubic prostatectomy	45
Application of diathermy to bladder	2
Removal of F.B. from bladder or urethra	1
Excision of urethral caruncle	5
OPERATIONS ON MALE GENITAL ORGANS.	
Incision of prepuce	2
Circumcision	21
Reduction paraphimosis	2
Amputation of penis	2
Orchidectomy	6
	12
Carry many acres. Oppositions	
Vulva- GYNÆCOLOGICAL OPERATIONS.	
Incision of Bartholin's abscess	4
Excision of cysts and new growths	3
	15
Vaginal—	
	14
Post colporrhaphy	2
Plastic for fistulæ	2
Post colpotomy	00
Uterus—	
Dilatation of cervix	11
	46
	24
Myomectomy	5
Subtotal hysterectomy	33
Total hysterectomy	19
Wertheim's op	1
Removal of polyp	7
Shortening of round ligts	07
Ventrosuspension	
	1
Ovary and tubes—	1
Application of forceps	1
Excision of ovarian cyst	25
	10
	44
	41
	21
Salpingostomy	1
Repair of ruptured ectopic gestation	3
Caesarean section	1
Partial resection of ovary	3
Removal of ovarian tumour	1
Tremoral of Oralian fundation	-
OPERATIONS OF THE BREAST.	
	13
Excision of tumour	14
Amputation of breast	4
Amputation of breast with glands	13
OPERATIONS OF THE THORAX.	23
THURSCHIOTHY TESTINATE	THE R. P. LEWIS CO., LANSING

OPERATIONS ON THE EYE.	
Excision of tumours	
Plastic operations on lids	31
Removal of pterygium	39
Incision and drainage of dacryocystitis	1
Removal of tearsac	16
Tenotomy	22
Tenotomy with advancement	5
Advancement	1
Tarsectomy	2
Enculeation of globe	16
Evisceration	2
Extraction of lens	26
Needling lens	51
Peritomy	14
Tridectomy	10
Removal of foreign body	17
Trephine	10
Posterior selerotomy	1
Removal of lacrimal duct obstruction	1
Keratotomy	-
OPERATIONS ON EAR, NOSE, AND THROAT.	
Removal of aural polyp	10
Paracentesis tympani	4
Operations on mastoid antrum—	
Palliative	4
Radical	29
Operations on maxillary antrum	83
Palliative	51
Radical	7
Operations on sphenoidal, ethmoidal, and frontal sinuses	4
Excision of turbinal bone	64
Resection of nasal septum	24
Removal of nasal polyp	156
Tonsillectomy	153
Tonsillectomy and adenoidectomy	2
Adenoidectomy	1
Laryngotomy	1
Removal of F.B. from air passages	5
Tracheotomy	1
Tracheotomy	
Charman	
GENERAL.	2
Plastic operations on ear, lips, cheek	10
Plastic operations on jaw, palate, nose	11
Skin grafts	5
Other plastic operations	62
Incision of abseess and cellulitis	56
Removal of F.B. from soft parts	14
Excision of sinus and scar tissue	4
Excision and suture of wound	77
Burying radium at operation	36
Application of plasters, &c	11
Snipping for microscopic-examination	13
Canterization	12

X-RAY DEPARTMENT.

.. DR. H. C. NOTT. Honorary Radiologist MR. C. H. MARSHALL. Radiographer

The work demanded of the X-ray Department continues to increase, as indicated by the number of films used, as follows:— 15×12 , 4,064; 12×10 , 4,533; 10×8 , 3,112; $8\frac{1}{2} \times 6\frac{1}{2}$, 1,322; $6\frac{1}{2} \times 4\frac{3}{4}$, 7; dentals, 82; total 13,120.

The number of examinations carried out was as follows:—Opaque meals, 411; opaque enemata, 44; urinary tracts, 354; chests, 751; cholecystographs, 113; miscellaneous, 2,650; total, 4,323.

Patients treated with	X-rays	144
		552
Patients treated with	Radium	142
Treatments given		241

MASSAGE DEPARTMENT.

Senior Masseuse Miss E.	M. ASHTO	N.
The number of patients treated were:	1926.	1927.
In-patients	. 228	316
Out-patients		388
Total	. 606	704
Average number of patients each day	. 42	36
The actual number of treatments given	. 13,006	11,205
Patients under treatment in Hospital, December 31st, 1927 (12 in and 52 out)	-	64
Cases treated were as follows:-		
Fractures	. 325	327
Loss of muscular tone		28
Sprains and injuries		124
Paralysis		53
Rheumatism		123
Neuritis	2.00	32
Various		17
	606	704

ELECTRICAL AND RADIANT HEAT.

The number of patients treated were: —	1926.	1927.
In-patients	. 52	78
Out-patients		171
Treatments given		3,388
Daily average		11
Separate cases treated were :		
Reactions tested	. 29	35
Paralysis		54
Neuritis		28
Fractures		. 15
Injuries	2.0	32
Rheumatism		94
Muscular weakness		11
Synovitis		4
Various		11
Patients under treatment in Hospital, December 31st, 1927 — In-patients, 1; Out patients, 19	Tall Marie	20

that I have audited the accounts of the Commissioners of Charitable Funds in connection with

REPORT ON DENTAL DEPARTMENT, 1927.

Superintendent—T. D. Campbell, D.D.Sc.

Senior Dental Surgeon and Demonstrator—J. F. Clark, B.D.S.

Dental Surgeon (half-time)—A. D. Cocks, B.D.S. Senior Dental Mechanic—L. A. M. Brougham.

STAFF.

The following alterations in the Staff took place during 1927:—Mr. G. O. Lawrence retired from his position as part-time Dental Surgeon, and Mr. A. D. Cocks relinquished his full-time post in favor of the half-time position.

HONORARY OFFICERS.

Dr. L. W. Trott's resignation was accepted. Messrs. M. S. Joyner, B.D.S., and R. J. Brazil-Smith, B.D.S., were appointed as Honorary Dental Surgeons.

STUDENTS.

Students attending the practice of the Hospital were as follows:—First year, three; second year, five; third year, seven; fourth year, four; total, nineteen (19).

In the final examinations, four students graduated for the degree of Bachelor of Dental Surgery, University of Adelaide.

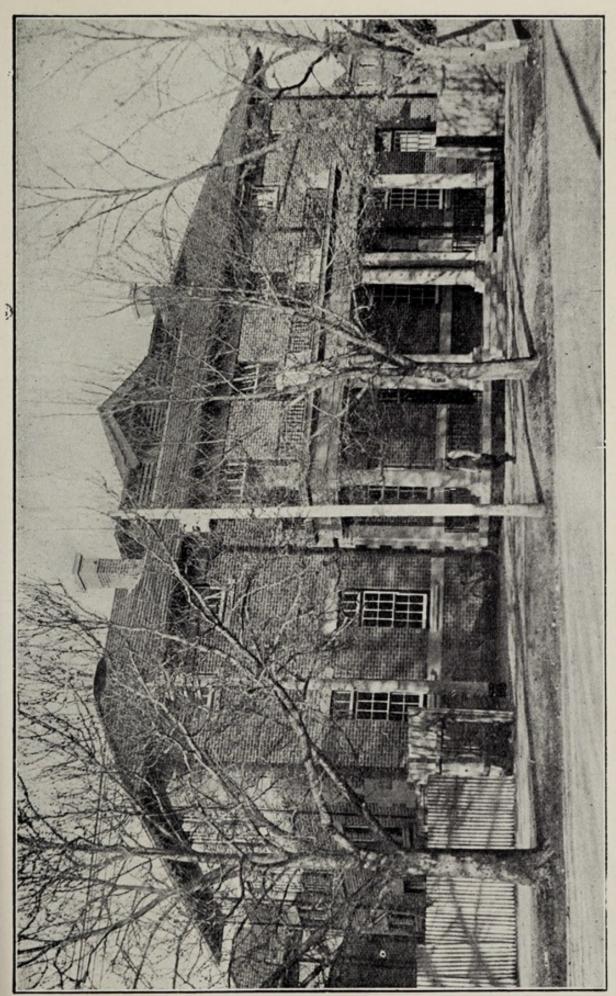

GENERAL REMARKS.

The Dental Association of South Australia continues to hold its monthly meetings at the Hospital.

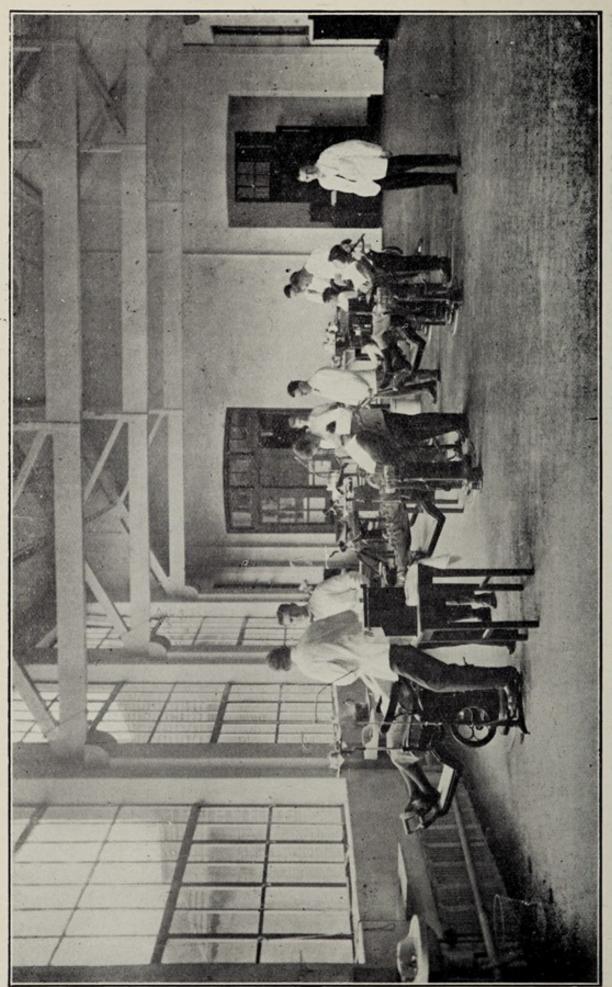

The appreciation of the general public of the advantages offered by this branch of the Hospital is so marked that the Department is still quite unable to cope with the applications for treatment.

The amount of work accomplished was in most branches somewhat less than the previous year, this being due to a diminished operating staff.

The general financial depression was obviously reflected in the cash returns for the year; the number of indigent and destitute persons treated being more marked than previously.

THE DENTAL DEPARTMENT (Front View of the Building).

THE OPERATING ROOM (Patients Under Treatment).

Arrangements were commenced at the end of the year for the fitting up of a portion of the large conservation room as a special demonstration surgery for students. It has been found desirable in some branches of their work and particularly in dental prosthesis, to alienate the students' activities as much as possible from the general routine Hospital practice.

During the year a series of Departmental circulars were printed containing instructions on the care of the teeth, on treatment in cases of post-operative hæmorrhage, on the care of artificial dentures and preparations for general anæsthetics. These, besides forming excellent educational propaganda, have aided Departmental work and are much appreciated by patients.

A set of seven wall posters were secured from the Dental Board of the United Kingdom. These are very striking in design and appealingly informative, and being hung conspicuously in the two waiting halls attract and occupy the attention of patients.

THE CONSUMPTIVES' HOME.

Within the home are rooms set apart for library (with hundreds of books, periodicals, and magazines), smoking, billiards (full-sized table), billatelle, and other games. A piano and organ are also provided, in fact everything is done to give the patient all the comforts of a good home, together with the best medical and nursing skill procurable. There are 23 cubicles, three rooms for two patients each, one ward for eight patients, one ward for nine patients, one large bungalow for 12 patients, and four tents for one patient each—giving accommodation for 62 patients.

The buildings have verandahs on both sides, are thoroughly ventilated, the walls and ceilings are varnished and the floors covered with linoleum.

Provision is also made for the treatment of cancer cases, there being 14 single bedrooms devoted to this purpose.

The majority of cases pass through the Consultation room, or are transferred from the wards of the General Hospital.

The number of new cases admitted to the Block (520) shows an increase of 116 cases, as compared with the previous year.

The deaths totalled 27, a mortality rate of 4.96 per cent. There was an increase in the number of cases of Measles treated during the year, 89 in 1927, as against 10 in 1926.

The number of cases of Erysipelas was 51, as compared with 65 in 1926.

The Diphtheria cases were 40 less than the previous year, 66 cases in 1927 and 106 in 1926. There were two deaths, being a mortality rate of 3,03 per cent.

There were 77 cases of Scarlatina treated in 1927, as against 75 in 1926. There were no deaths.

There is accommodation for 144 cases.

LABORATORY OF BACTERIOLOGY AND PATHOLOGY, ADELAIDE HOSPITAL.

STAFF ..

Director:

LIONEL B. BULL, D.V.Sc., Melb.

Honorary Bio-Chemist:

T. Brailsford Robertson, Ph.D., D.Sc.

Bio-Chemist: M. E. Long, B.Sc.

Bacteriologist in charge of Vaccine Department: Helen M. Mayo, M.B., B.S., Adel.

The work of the laboratory is clearly separated into two main divisions, viz., work done for patients admitted to the Adelaide Hospital for treatment and that done for private medical practitioners, boards of health, Stock Department, and other public institutions. All the work in these two main divisions is more or less of a routine character, but wherever possible, research or investigational work is carried out on diseases of man and animals and also on the improvement of laboratory methods used in the diagnosis of disease. As far as possible this work is summarised in the following table, but this summary does not represent all the activities of the staff, which, in addition, concerns itself in the care and maintenance of apparatus; the preparation of staining solutions, culture, media, &c., for use by students both in the Hospital and at the University; assistance to the Honorary Pathologist in the building up and maintenance of a museum and pathological and bacteriological examinations in connection with the post mortem room; the maintenance of a library of current scientific publications on pathology, bacteriology, biochemistry, and related subjects.

It is not possible to give a very accurate picture of the activities of the laboratory staff and the work done by giving the actual number of examinations made, for one examination may involve, for example, 10 times the amount of time that another does. For the most part, however, such a summary does convey, particularly to those familiar with laboratory work, some idea of the main activities of the staff.

Summary of work, 1927:-

The Clinical Pathological examinations performed for the Adelaide Hospital include—(1) The histological diagnosis of pathological tissues, several of which were immediate examinations performed during operations (such examinations are done in order to help the surgeon in determining the extent and nature of the operation necessary); (2) the examination of urine to detect abnormal chemical and morphological elements; (3) the examination of faces to detect the presence of abnormal elements; (4) the examination of cerebro-spinal fluid to detect cellular and chemical change (this examination is extremely useful in detecting syphilis of the central nervous system); (5) the examination of the blood to detect the presence of the various anæmias and leukæmias; (6) the examination of material for the detection of spirochæta pallida in the diagnosis of syphilis; (7) the examination of fluids from various cavities and cysts to determine their nature.

The bio-chemical examinations performed for the Adelaide Hospital include—(1) The estimation of the amount of sugar in the blood (this examination is made as an aid to the diagnosis of diabetes, and is made either after a fasting period or after the administration of glucose when several examinations are made to trace the rise and fall in the blood sugar); (2) the estimation of the urea nitrogen in the blood; (3) the examination of the gastric contents after a test meal, either one sample at the end of one hour or smaller samples at more frequent intervals over a period of two and a half hours; (4) collodial gold curves on cerebro-spinal fluids; (5) the estimation of the basal metabolism of patients; (6) chemical examinations of various body fluids.

The Bacteriological Examinations performed for the Adelaide Hospital include—(1) The examination of sputum for the detection of tubercle bacilli and other bacteria, and also for hydatid hooklets; (2) the examination of blood for the Widal reaction (this examination is important in assisting in the diagnosis of typhoid fever); (3) the examination of swabs taken from the throat and nose to detect the presence of diphtheria bacilli; (4) the examination of urine to detect the presence of tubercle bacilli, colon bacilli, and other bacteria; (5) the examination of inflammatory fluids, for the detection of bacteria, e.g., pleuritic fluid, for tubercle bacilli; (6) examination of cerebrospinal fluid to detect the presence of tubercle bacilli, meningococci, and other bacteria; (7) the cultural examination of blood to detect the presence of bacteria in the circulation: (8) the examination of fæces and urine for the detection of typhoid bacilli and other pathogenic bacteria; (9) the examination of pus for the detection of gonococci, actinomyces, and other bacteria. Bacteria isolated from the various fluids and materials are often used in the preparation of autogenous vaccines.

The Wassermann Reaction was performed on Thursday in each week. This reaction is of great value in the diagnosis and treatment of syphilis. The Griffith & Scott

technique is employed throughout.

The examinations performed and classified under the head Private Work include in the main such examinations as described under clinical pathological, bio-chemical, and bacteriological examinations. Much work was done for the Board of Health. Included in the examinations are also:—Examinations of various foodstuffs for the detection of bacterial contamination; (2) examination of drinking water to determine its suitability for drinking purposes. Included under this head are regular examinations for the Hydraulic Engineer's Department and for the Adelaide Local Board of Health: (3) the examination of disinfectants to determine their germicidal power; and (4) medico-legal examinations.

The routine examinations for the Stock Department include—(1) Bacteriological examinations of cow's milk for the detection of tubercle bacilli and other bacteria; (2) morbid tissues for histopathological examination; (3) examination of fæces to determine the presence of parasitism; (4) examination of cow's blood for the diagnosis of contagious abortion by the agglutination test; (5) specimens removed post mortem from animals dying from various causes, &c.

Investigations are being continued on enzootic haematuria in cattle. Mr. C. G. Dickinson, Veterinary Research Officer of the Commonwealth Council for Scientific and Industrial Research, has been working in this laboratory on the disease. Mr. Dickinson is also working under our direction on other animal diseases. During the year swine fever made its appearance in this State and experimental inoculations were carried out in order to establish the diagnosis and elucidate other problems. Investigations were also carried out in connection with botulism or forage poisoning, "swelled head" in rams, hepatitis in sheep, and other diseases of stock.

The Vaccine Department, as well as preparing 312 separate vaccines, also administered inoculations of vaccine to hospital patients. During the year 210 hospital patients were under treatment. The majority of these patients

visited the laboratory twice a week during their course of treatment, when they received their injections. In all, 1,338 doses of vaccine were administered; also 252 doses of tuberculin were given to 19 patients. Vaccines were prepared for 177 patients under the care of private practitioners, and 1,459 doses (including 147 doses of tuberculin and 133 doses of T.A.B. and B.C.C.) and 188 cc., were supplied in bulk to private practitioners.

Summary.—The figures show that there has been an increase of, approximately, 500 examinations over those made during the previous year. There were 677 more examinations made for hospital patients, but 539 fewer throat swabs and sputa examined from outside sources. The number of throat swabs and sputa examined causes the greatest fluctuation in the total number of examinations. It will be seen, therefore, that there has been an increase in the general work greater than is indicated by the difference in the total number of examinations made.

VENEREAL DISEASES.—NIGHT CLINICS.

REPORT FOR YEAR ENDED SEPTEMBER 30TH, 1927.

Improved accommodation for the treatment of venereal diseases is urgently necessary.

The Venereal Diseases Act, passed by Parliament in 1920, has not yet been proclaimed. The provisions of the Act could not be effectively carried out until accommodation for the treatment of both indoor and outdoor patients is provided.

It is considered that this Act should be proclaimed as soon as possible, but, failing such action in the near future, improved accommodation and facilities for treating patients are necessary at the existing clinic.

REPORT OF OPERATIONS FOR THE YEAR ENDING SEPTEMBER 30TH, 1927.

Male Section.

Surgeon-Dr. G. H. Burnell, B.S., M.D.

"With the increasing number of male patients attending, the need for larger and better accommodation is becoming more and more evident.

On some evenings 110 patients have had to be dealt with, and under present conditions this leads to great over-crowding with hurried treatment.

It is to be hoped that it will be possible shortly to carry on this work under conditions suitable for treatment of such large numbers of patients.

The total number of patients for the year was 958, and the total number of attendances was 9,525. There were 187 cases of syphilis and 597 cases of gonorrhœa treated. Not included in the above were 16 persons who had both gonorrhœa and syphilis, and 128 patients attended on account of diseases which were shown to be other than venereal.

Female Section.

Surgeon-Dr. R. F. Matters, M.B., Ch.M., F.R.C.S.

Considerable help is rendered to patients who are unable to attend to their requirements at home by the clinic being opened on Thursday and Saturday evenings.

Occasional cases occur which would be assisted by indoor treatment for two or three days from time to time, if two beds were available for the Night Clinic Department.

Accommodation for proper treatment is still inadequate in the present department, but the results have been very gratifying

especially in view of the limited accommodation.

The total number of patients for the year was 189, and the number of attendances was 4,501. There were 66 cases of syphilis and 104 of gonorrhoa treated. Not included in the above were six patients who had both gonorrhoa and syphilis, and 11 patients attended for diseases which on examination were found to be non-venereal.

Attached are details of attendances and statement of expenditure.
