MEDICAL STAFF

Surgeon-in-Chief and Clinical Director :

WM. GISSANE, M.B., Ch.M. (Sydney), F.R.C.S. (Eng. and Edin.).

Surgeon and Deputy Clinical Director :

F. G. BADGER, B.Sc., F.R.C.S. (Edin.).

First Assistant Surgeon :

T. W. HOWAT, L.R.C.P., L.R.C.S., L.R.F.P.S.G.

Senior Anaesthetist :

L. J. WOLFSON, M.B., B.S. (Lond.), L.R.C.P., D.A.

Anaesthetists :

MRS. W. G. MILLS, M.B., Ch.B. (Birm.), L.R.C.P., D.A.

J. T. LINKLATER, M.R.C.S., L.R.C.P., D.A.

One Resident Surgical Officer.

Four House Surgeons.

Consultants :

Bacteriology : PROF. J. F. D. SHREWSBURY, M.D., D.P.H. (Liverpool).

Radiology : J. F. BRAILSFORD, M.D., Ph.D. (Birm.), F.R.C.P., F.F.R.

Rehabilitation : J. RHAIADR JONES.

STAFF OF MEDICAL RESEARCH COUNCIL WOUNDS INVESTIGATION UNIT

Director :

PROF. A. A. MILES, M.A. (Cantab.), F.R.C.P. (Lond.).

Pathologist :

R. E. O. WILLIAMS, B.Sc., M.D. (Lond.)

STAFF OF MEDICAL RESEARCH COUNCIL BURNS UNIT

Director :

COL. LEONARD COLEBROOK, M.B., B.S., F.R.C.O.G.

Resident Surgical Officer :

J. McKESSAR DUNCAN, M.B., Ch.B. (Birm.).

One House Surgeon.

OFFICIALS

Chaplains :

Church of England : REV. H. G. S. KENNEDY, M.A.

Church of England : REV. R. G. RICHARDS, B.A.

Free Church : REV. F. A. THOMAS.

Pharmacist :

Miss E. R. McNAB, M.P.S.

Afmoner :

Miss H. M. CHILDS, A.I.H.A.

Rehabilitation Officer :

Mrs. M. WILLIAMS, C.S.P., O.T.A.

Assistant Secretary :

F. G. HARTLAND, A.H.A.

Matron :

Miss M. BONTHRON, D.N.

Secretary :

A. A. MacIVER, C.A., F.H.A.

Auditors : MESSRS. CARTER AND CO., Chartered Accountants, Birmingham.

Solicitors : MESSRS. JOHNSON AND CO., Birmingham.

Bankers : LLOYDS BANK, LTD., New Street, Birmingham.

Birmingham Accident Hospital and Rehabilitation Centre.

REPORT OF THE BOARD OF MANAGEMENT

**For the Twelve Months ended 31st December,
1944.**

The year 1944 saw brought to fruition the first of the Board's schemes; namely, the adaptation of the buildings of the "Queen's Hospital" for the special purposes of a comprehensive accident service. The Out-Patient Department of unique design opened in August; the new Burns Unit incorporating a number of distinctive features was put into use for battle casualties at the end of August; and the new Ward for short stay cases was opened in December. These increased facilities are reflected in the greater number of patients and of patients' attendances.

**Fourth
Annual
Report**

On the 14th August the Rt. Hon. H. U. Willink, K.C., M.P., Minister of Health, honoured the Hospital by opening the new Out-Patient Department in the presence of Mr. George Tomlinson, M.P., Parliamentary Private Secretary to the Ministry of Labour and National Service, the Lord Mayor and Lady Mayoress of Birmingham, Members of the Board and some 350 guests.

**New
Out-Patient
Department**

In the new Department is provided every modern facility required for the immediate treatment of accident cases. New patients are segregated from returning patients in an admission suite, containing seven separate cubicles for the private examination of patients. Adjoining are four rooms as follows: a radiographic diagnostic room with attached dark room for processing films; two operating theatres; and a fracture and plaster theatre with special equipment for the reduction of fractures. Near the suite, but separate from it for greater quietness, is a shock room for patients requiring blood transfusion and other methods of resuscitation.

For returning patients three separate self-contained departments are provided, consisting of:

(1) A Clinic where fractures and more serious types of injuries are seen by senior surgeons. The Clinic consists of two consulting rooms, waiting room, radiographic diagnostic room and a modern plaster room of unique design.

(2) A dressing clinic for the continuity of treatment of the soft tissue injuries, comprising an examination room and a suite of three dressing stations. All of these are designed to minimise the risk of infection and cross infection in wound dressing.

(3) A well-equipped and spacious gymnasium, where physical re-education and re-development of injured limbs is undertaken.

In the waiting hall a canteen has been provided for the convenience of the patients. The cost was defrayed by a gift of £263 8s. 6d. from members of the 1st Central Reserve Ambulance Depot No. 20 (Car Park) of the City of Birmingham Air-Raid Precautions Department.

Burns Unit

During the year a Unit of two wards was adapted for the treatment of burns. This Unit is under the joint direction of the Clinical Director and the distinguished Bacteriologist, Dr. Leonard Colebrook, who has been seconded for this purpose by the Medical Research Council. The Unit now consists of: (a) Four wards of eight beds each; (b) Shock room; (c) Metabolism investigation room; (d) First treatment room; (e) Air-conditioned room to provide bacteriologically "clean" air for wound dressing; and (f) A saline bath annexe.

This Unit was put into action in August for the treatment of Service casualties and a few civilian cases. Now, however, the Unit is ready to receive cases of civilians, men, women or children, who are suffering from burns.

The Board takes this opportunity of welcoming Dr. Colebrook and his assistants to the Hospital.

Day Ward

The problem of the short stay cases was mentioned in the last Report. They are patients admitted to a ward for less than 24 hours. The solution of the problem was urgent as such cases represent about 9 per cent. of the total number of patients. Accordingly, a ground floor ward near the Out-Patient Department has been adapted, providing sixteen beds for men and ten beds for women.

In announcing these new facilities, the Board thinks that an explanation regarding the prolonged stay in hospital on the occasion of the out-patient's first visit to hospital would be welcomed by patients, patients' relatives, and employers.

Not all patients of the Hospital require an operation ; but those that do are a high proportion, approximately 40 per cent. The majority require an X-ray photograph of the injured part ; sometimes to confirm and amplify the surgeon's opinion ; sometimes to exclude a fracture in arriving at a diagnosis. Although this procedure is rapid, it does take time. Of the patients requiring operation, one half can be operated on under a local anæsthetic. This offers no great medical problem and the waiting time for operation will be comparatively short. Conditions requiring a general anæsthetic are quite different. Modern surgery demands general anæsthesia for many types of cases for which local anæsthesia was considered adequate a few years ago. For general anæsthesia the patient must be given time to digest his last meal and to be prepared for operation. This time may vary from 1½ hours to 6½ hours. After the operation the patient must rest in bed for two or more hours till he recovers from the anæsthetic. He is then permitted to go home. The total stay in Hospital for such cases may be as short as five hours, but generally will be much more. It must be recognized, however, that only by adopting this procedure can modern surgical treatment be carried out.

In reviewing the year's work the following figures for **Review of 1943 and 1944** reflect the better facilities available for **Year's Work** rehabilitation in the year 1944 :

	1943	1944
In-patients admitted	2,072	2,109
New patients	20,769	22,273
Casualty attendances 99,600	104,900	
Rehabilitation Department attendances . . 46,326	75,081	
	145,926	179,981
Operations	8,039	8,669
Day Ward (short stay) cases	2,541	2,001

The Medical Research Council Wound Infection Unit **Wound Infection Unit** has continued to develop the technique of investigation of various methods —old and new—for the treatment of small wounds. With the help of the surgical staff of the hospital a careful test has been made of the value of some sulphonamide drugs in preventing wound infection. Over 7,000 specimens from about 700 patients have been examined. In addition to the evidence on the value of

the particular methods of treatment under test, a considerable amount of information has been accumulated. It is expected that this will eventually lead to a comprehensive picture of the origin of some of the types of wound infection. Surveys in factory surgeries have also been continued. Arising from these surveys the Unit, in collaboration with industrial nurses, has worked out a routine for wound dressings in factory surgeries. This routine is based on the same principles which governed the design of the new dressing station in the Hospital Out-Patient Department.

Rehabilitation The Gymnasium has been in full use during 1944, and an average of 150 patients have used it daily. Massage and electro-therapy are still housed in a hut at the rear of the hospital. The Occupational Therapy Department is temporarily accommodated in a Ward at some distance from the Gymnasium. In spite of the obvious difficulties of administering these three sections, separated as they are by considerable distances, the total number of Rehabilitation Department attendances during 1944 was 75,081.

The Board is pleased to announce that a Building Licence has been granted to carry out alterations in the rooms adjacent to the Gymnasium and in two disused wards on the same floor in another building. When these alterations are complete it will be possible for patients to proceed to the Massage Department, from there to the Gymnasium, and then on to Occupational Therapy, for all these departments will be on the one floor and intercommunicating. Between the Gymnasium and Occupational Therapy Department a patients' rest room is being provided with facilities for serving meals to those who require them.

The Hospital Saturday Fund gift referred to in the previous annual report covered the cost of equipping the Gymnasium and the Massage Department. The cost of the adaptations of the building to provide the Massage Department has been defrayed by a gift of £2,000 from the City of Birmingham Fire Guard Service Cot Fund. This cheque, with another for £380, was handed over by the Rt. Hon. Herbert Morrison, M.P., Minister of Home Security, at a meeting in the Town Hall on 7th October.

Some of the specialized apparatus in the Admission Department for treatment of fractures has been presented by the Austin Motor Company, Limited.

With the opening of the last of the Wards which it is intended to use for In-patients, the bed complement is now 210, made up as follows :

Male beds	113
Female beds	66
Children's beds and cots.....	31
	<hr/>
	210

Of the beds allotted to women patients twenty-two cannot be used for women for the time being as they are occupied by battle casualties.

On 22nd June—sixteen days after “ D ” Day—there was received the first convoy of Battle casualties, air-borne from Normandy.

Altogether eleven convoys, making a total of 183 wounded, were received during the year. The great majority of these were long stay cases; some of them remained as patients for as long as six months.

The Board wishes to put on record that they and the staff have felt it a very great privilege and honour to be permitted to help those who were wounded in the fight for freedom and who have deserved so well of their country.

Of the seventeen candidates entered for the first time for the Preliminary State Examination, thirteen passed both parts while two were successful in one part. Of three re-entries, two were successful in both parts.

The prize for the best student nurse for her year, judged on both theoretical and practical tests, was Nurse Jean Wyld. The Lord Mayor on the occasion of his visit to the Hospital on 23rd December, presented this prize. The second prize was awarded to Nurse Violet Colgan.

During the year sixteen student nurses transferred to general hospitals to complete their training as follows : Queen Elizabeth Hospital, 3 ; General Hospital, 5 ; Selly Oak Hospital, 6 ; Dudley Road Hospital, 2.

As a result of the restrictions imposed on trained Nurses by the Ministry of Labour and National Service, the number of resident students for the Industrial Nursing Course fell during the early part of the year. Later in the year, however, the number of applications

increased. Three examinations were held (in April, July and December), with the following results :

	<i>Entered.</i>	<i>Passed.</i>
Resident Candidates	7	5
Non-resident Candidates	15	11
Re-entries	6	6

Photographic Department

With the appointment of two experienced photographers, the Photographic Department was opened in May. The primary purpose of this Department is to assist the Surgeons by preserving for use at later interviews a clear pictorial record of the original state of the wounded part. This is of the greatest value to the Surgeon in his "follow-up."

Secondly, the department will reduce X-ray films to quarter-plate size photographs, which will be attached to case records. In this way the considerable problem of the storage of X-ray films will be solved, for there will be no necessity to retain the original full-size negatives.

Almoner's Department

The Almoner's work has steadily increased throughout the year. Her activities are largely confined to social service work and liaison with industry, for it should be emphasized that the Almoner's principal duty is to assist the injured patient. In this Hospital patients who are members of a hospital contributory association are treated free without enquiry unless there is reason to believe the income is above £420 per annum. In very few cases is such assessment necessary. In 1944 £2,031 was received from patients in payment for treatment.

Diet

The Board and Staff of the Hospital have given much thought and attention to the feeding of patients and staff. The great majority of patients are healthy, with good appetites, and under war-time conditions it taxes the ingenuity of those concerned to provide varied menus. The Department of Physiology of the Birmingham University was invited to carry out an investigation of the food values of the nurses' diet, which is approximately the same as the patients' diet. The report finished as follows :

"In conclusion, it is our opinion that the nutritive value of the food supplied to the nurses at the Birmingham Accident Hospital during the period investigated was very satisfactory considering the prevailing conditions."

Expenditure increased greatly during the year, the **Finance** total ordinary expenditure amounting to £80,303, which, with the extraordinary expenditure of £1,747, made a total expenditure of £82,050. This sum was considerably in excess of the amount budgeted for. The reasons for the increased expenditure are to be found in (1) opening of the new Out-Patient Department in August; (2) opening of additional wards; (3) increased rates of salaries and wages payable under national and local agreements.

Income has kept pace with the expenditure, but the Board must point a warning that the largest single contribution, namely £32,994 from the Ministry of Health, will not remain at the same high figure in 1945. The magnitude of this contribution in 1944 was due largely to a temporary cause, namely, battle casualties. Contributions from industry amounted to £19,637 from 1,017 firms; this is an increase of £1,679 compared with 1943. Subscriptions from private persons also showed an increase of £894. The total ordinary income, including £10,000 from the City of Birmingham, amounted to £82,703, resulting in an excess of income over expenditure of £653, which has been deducted from the accumulated deficit of £898, leaving a balance of £245.

In 1945 the Hospital will be in full use for the first time, and with the increased salaries, wages and high costs of material the budgeted expenditure is almost £90,000. Additional support from private persons and industry is essential if a deficit is to be avoided.

The thanks of the Board are extended to the Corporation of the City of Birmingham, Industry, the Birmingham Hospitals Contributory Association, the Hospital Saturday Fund, and private subscribers for their magnificent support.

To those firms who have not contributed hitherto it is suggested that the minimum annual contribution of an industrial concern be calculated on the basis of 2s. per employee per annum, that is, a concern with an average of 500 employees should contribute not less than £50 per annum. Such contributions for maintenance should be allowed as a charge against business profits for taxation purposes, as they will be paid wholly and exclusively for the benefit of the employees.

By 14th August, 1944, the sum of £22,457 had been **Capital** received in cash and promises in response to the appeal **Appeal** for £20,000 launched in February, 1942. In August

a further appeal for the balance of £30,000 was launched, towards which the sum of £11,330 was received in cash and promises, leaving a balance of £16,213 to be found. The result is disappointing, but it is hoped that the requirements of the Hospital will be borne in mind when money is being distributed for charitable purposes.

**Naming of
Beds**

During the year the sum of £1,250 was received from Mrs. F. M. Farmer to name a bed in memory of her father, the late William Parsons.

The sum of £850 towards the naming of a bed has been received from the employees of the General Electric Company, Limited. They hope to complete the sum required within the next few months.

Legacies

The undernoted legacies were received during the year :

A. A. Jago, £250.

A. E. Hills, £10,000. This sum was credited to the Capital Account and has been used for the alterations and adaptations.

**Members
of the
Board**

Councillor* W. H. Griggs, F.C.I.S., representing the Birmingham City Council, resigned, and Councillor James Williams took his place.

Mr. Arthur Keats, O.B.E., of Messrs. Fisher and Ludlow, Limited, was co-opted ; Mr. Allan S. Barnfield, O.B.E., resigned.

**Shortage
of Staff.**

It is well known that there is an acute shortage of Doctors, of all grades of Nursing Staff and of Domestic help. The Hospital has felt the shortage of Nurses and Domestic Staff severely, but the shortage of Doctors has prevented the Hospital from undertaking the work for which it is equipped. The Central Medical War Committee, in view of its commitments to the Services, has been unable to allocate any more Doctors to the Hospital.

The Board appreciates the difficulties of the Committee, and while hoping for an early alleviation of the position, must point out to the public of Birmingham that the calls on the Hospital cannot be met adequately until more doctors are permitted to join the staff.

To economise the time of the staff and patients an appointments system is in operation for all returning patients. Only by the adoption of this system has the small medical staff been able to get through the immense

amount of work. To assist the doctors, patients are requested to attend at their allotted times. Lateness may prevent the patient from being seen by the doctors, who must of necessity work to a rigid time-table. On occasions emergencies interfere with the doctors' time-table and the understanding of the public is sought in such cases.

The Board wishes to express appreciation and thanks **Thanks to**
to the whole of the staff, Medical, Nursing and Lay, with **Staff**
especial mention of the Clinical Director, Mr. William Gissane, for their work, particularly in view of the shortage of staff and the great developments in the Hospital, during the year 1944.

C. G. SPRAGG,
Chairman.

REPORT OF THE AUDITORS TO THE MEMBERS OF THE BIRMINGHAM ACCIDENT HOSPITAL AND REHABILITATION CENTRE.

We have audited the Balance Sheet of the Birmingham Accident Hospital and Rehabilitation Centre, dated the 31st December, 1944, above set forth. We have obtained all the information and explanations we have required. In our opinion such Balance Sheet is properly drawn up so as to exhibit a true and correct view of the state of the Hospital's affairs, according to the best of our information and the explanations given to us, and as shown by the books of the Hospital.

AGREEMENT TO CONTRIBUTE TO THE
BIRMINGHAM ACCIDENT HOSPITAL

**How to
INCREASE YOUR SUBSCRIPTION
at
NO FURTHER COST to yourself**

ANNUAL Subscribers to the Birmingham Accident Hospital, provided they pay Income Tax at the standard rate, may increase their subscription by signing a Deed of Covenant to subscribe for seven years.

This will cost the Subscriber no more, but will enable the Hospital to recover Income Tax on the subscription. Furthermore, if Sur-tax is payable, Subscribers are entitled to deduct the gross amount of the subscription from the Sur-tax return.

You are earnestly asked to give your consideration to this suggestion, and if you will, to fill in the form opposite and return it to the Secretary, Birmingham Accident Hospital, Bath Row, Birmingham, 15.

EXAMPLE :

With Income Tax at 10s. 0d. in the £ a subscription of £1 1s. 0d. per annum is worth £2 2s. 0d. to the Hospital, i.e., an additional £1 1s. 0d.

Will you help us to claim all the shillings we can?

.

**AGREEMENT TO CONTRIBUTE TO THE
BIRMINGHAM ACCIDENT HOSPITAL
AND REHABILITATION CENTRE**

I,
of

HEREBY COVENANT WITH THE BIRMINGHAM ACCIDENT
HOSPITAL AND REHABILITATION CENTRE that for a period
of seven years from the date hereof, or during my life, whichever
period shall be shorter, I will pay annually to the said Hospital
such a sum as will after the deduction of Income Tax leave in the
hands of the said Birmingham Accident Hospital a net sum of

£.....
such sum to be paid from my general fund of taxed income so that
I shall receive no personal or private benefit in either of the said
periods from the said sum or any part thereof, AND I DECLARE
THAT it is my desire that the said sum shall be used by the said
Birmingham Accident Hospital for the general worth of the
Hospital.

IN WITNESS whereof I have hereunto set my hand and seal
this day of 194
