ADELAIDE HOSPITAL

1932

SIXTY-THIRD

ANNUAL REPORT

of the

Board of Management.

NOTE.

Subscribers living in the Country or Suburbs upon whom the demand for orders for admission or treatment as outpatients is not great would confer a great favour on many necessitous cases by signing their order forms and forwarding them to the Secretary of the Adelaide Benevolent and Strangers' Society, Morialta Street, Adelaide. Digitized by the Internet Archive in 2019 with funding from Wellcome Library

ANNUAL REPORT, 1932.

The Board of Management of the Adelaide Hospital, in accordance with section 12 (1) of the Hospitals Act Amendment Act, 1921, has the honor to submit for the information of the Minister the sixty-third annual report on the administration, showing the condition and progress of the institution for the year ended December 31st, 1932.

The Board held 52 full meetings during the year. Several conferences with the Advisory Committee and the Honorary Staff were also held. In addition, the Chairman and members regularly confer throughout the year and continuously visit the Hospital in connection with the administrative work. The condemnation of worn-out and useless stores is always kept under their personal supervision.

The following information is submitted relating to the treatment

of in-patients, &c. :-

FINANCE.

Revenue.—The total receipts from all sources, including all branches of the Hospital, for the year 1932, were £18,303 8s. 1d., as compared with £19,162 12s. 11d. for the year 1931. The decrease is accounted for by the closing of the North Terrace Consumptive Home, the revenue from this branch in 1931 being £1,329 7s. 7d. No revenue from this source is included in the 1932 figures.

The amount of the patients' fees received on account of the Adelaide Hospital was £9,506 13s. 11d. for the year 1932, as compared with £9,284 16s. 6d. for the year 1931, an increase of £221 17s. 5d.

The total amount of fees charged to patients during the year was £11,548 4s. 11d. Patients' fees to the amount of £3,723 11s. 8d. were written off by the Board during the year.

The fees received towards the maintenance of each patient, based on the daily average number of patients, in 1932 were £19 3s. 4d., as against £18 15s. 10⁴/₅d. in 1931.

The fees received for maintenance of patients in the Infectious Diseases Block were £773 8s. 9d. more than the previous year, £2,657 19s. 4d. in 1932, as compared with £1,884 10s. 7d. in 1931.

Laboratory fees were £2,519 4s. 4d. for the year as against £2,308 14s. 3d. for the previous year, an increase of £210 10s. 1d. The revenue of this branch amounts to approximately 55 per cent. of the expenditure.

The revenue from the Dental Branch decreased from £668 7s. 9d. to £626 6s. 5d. The majority of the patients at this branch are in destitute circumstances, no less than 75 per cent. being either unemployed and in receipt of Government rations, or pensioners or inmates of Government institutions.

Details of revenue in 1932 will be found in Appendix No. 2. A table of comparison of revenue for the years 1921-1932 is also shown.

Expenditure.—Details of expenditure will be found in Appendix No. 2.

The total expenditure for maintenance for all branches of the Hospital for the year 1932 was £101,633 5s. 1d., as compared with £105,660 7s. 5d. for the year 1931. The year 1931 includes £4,772 8s. 7d. for the maintenance of the old North Terrace Consumptive Home, which is not included in 1932.

The expenditure for maintenance of the Adelaide Hospital was £87,444 ls. 5d. for the year 1932, as against £85,476 l4s. ld. for the year 1931, an increase of £1,967 7s. 4d. The increase is accounted for by the increased cost of repairs, &c., carried out by the Architect-in-Chief's Department, which were £2,258 4s. 9d. more in 1932 than in 1931.

The annual cost per bed occupied in 1932 was £163 16s. $0^2/_5$ d., as compared with £163 11s. $4^1/_{10}$ d. in 1931, and the average daily cost per patient 8s. $11^2/_5$ d. as against 8s. $11\frac{1}{2}$ d. for the previous year.

At the Infectious Diseases Block the average daily cost per patient

fell from 5s. $11\frac{1}{2}$ d. in 1931 to 5s. $7^{3}/_{10}$ d. in 1932.

The expenditure of the South Australian Government Laboratory showed a decrease of £176 9s. 5d. over the previous year.

At the Dental Hospital there was a decrease in expenditure of

£91 1s. 1d.

FOOD USAGES.

The following table shows a comparison of the cost of food usages for the months of December, 1931, and December, 1932. The months of December, being the last month in each yearly report, are quoted for comparative purposes:—

POPULATION.

The number of new patients admitted to the Hospital for the year 1932 was 10,171, being 734 more than the number admitted during the year 1931.

The daily average number of patients was 496, as compared with

494 for the previous year.

The total number of in-door patients treated during the year 1932 was 10,604 as compared with 9,839 in 1931.

The number of new patients attending the Out-Patients' Department was 19,898, as compared with 17,363 for the previous year.

The total number of out-patient attendances in 1932 was 96,896,

as against 80,288 in 1931.

The figures for 1932 show that the Adelaide Hospital, in both in-door and out-door patients, reached the highest point in the history of the institution.

At the T.B. Clinic 288 persons were under treatment during the year as compared with 206 for the previous year.

In the Infectious Diseases Block the daily average number of patients,

32, was the same as the year 1931.

The total number of attendances at the Dental Hospital for all purposes was 66,053, as compared with 61,796 for the previous year. The admissions for treatment were 10,411 in 1932 and 10,614 in 1931.

HONORARY STAFF.

Mr. H. Gill Williams and Mr. J. Laybourne Smith, Honorary Dental Surgeons, who retired during the year, were appointed as Honorary Consulting Dental Surgeons in recognition of their many years of honorary service.

Sir H. S. Newland, Honorary Surgeon, was granted 12 months' leave of absence, and Dr. H. R. Pomroy was appointed to act as

locum tenens.

During the absence of Dr. I. B. Jose, Honorary Surgeon, on six months' leave of absence, Dr. C. T. Turner acted as *locum tenens*.

The following members of the Honorary Staff, who retired by effluxion of time on June 30th, 1932, in accordance with the regulations, were re-appointed for a further term, viz.:—Professor J. B. Cleland, Pathologist; Dr. J. R. S. G. Beard, Gynaecologist; Drs. R. F. Matters and B. H. Swift, Assistant Gynaecologists; Dr. H. M. Jay, Aural Surgeon; Dr. W. C. Sangster, Assistant Aural Surgeon; Dr. G. A. Lendon, Assistant Physician; Drs. J. B. Lewis and J. J. O'Grady, Assistant Ophthalmologists; Dr. H. A. McCoy, Radium Therapist Dr. J. S. Verco, Deep X-Ray Therapist; Drs. W. A. Pryor, S. R. Hecker, E. C. Black, H. E. Pellew, Anaesthetists; Drs. R. Godson, J. A. O'Donnell, H. C. D. Taunton, and Mr. P. R. Begg, Dental Surgeons; Drs. R. G. Burnard, E. F. Gartrell, and H. W. Wunderly, Clinical Assistants to the Medical Section; Drs. G. H. Burnell, W. J. W. Close, and A. F. Hobbs, Clinical Assistants to the Surgical Section; Dr. M. Schneider, Clinical Assistant to the Ophthalmic Section; Dr. W. C. T. Upton, Clinical Assistant to the Skin Section.

The following Honorary appointments were also made:—Dr. C. Gurner, Assistant Deep X-Ray Therapist (new appointment); Dr. J. W. Browne, Medical Officer, T. B. Clinic (new appointment); Dr. A. C. Savage, Anaesthetist vice Dr. G. M. Hone; Dr. A. L. Tostevin, Curator to Ophthalmological Section of Pathological Museum vice Dr. R. M. Glynn; Dr. I. Hamilton, Clinical Assistant to the Surgical Section vice Dr. H. R. Pomroy; Dr. R. T. Binns, Clinical Assistant to the

Medical Section vice Dr. N. T. Wigg; Drs. R. A. Haste, F. R. Hone, I. S. Magarey, H. G. Prest, Clinical Assistants to the Medical Section (new appointments); Drs. L. O. Betts, A. L. Dawkins, A. H. Lendon, B. C. Smeaton, Clinical Assistants to the Surgical Section (new appointments); Drs. H. M. Fisher, R. L. Verco, Clinical Assistants to the Gynaecological Section (new appointments); Dr. B. F. Moore, Clinical Assistant to the Ophthalmic Section (new appointment); Dr. H. A. McCoy, Clinical Assistant to the Radiological Section (new appointment); Mr. A. D. Cocks, Dental Surgeon, vice H. Gill Williams; Mr. T. D. Hannon, Dental Surgeon, vice J. Laybourne Smith.

The following temporary Honorary appointments were also made:—Dr. G. H. Burnell, Temporary Assistant Surgeon vice Dr. I. B. Jose; Dr. W. J. W. Close, Temporary Assistant Surgeon vice Dr. H. R. Pomroy; Dr. H. W. Wunderly, Temporary Medical Officer, T.B. Clinic vice Dr. J. W. Browne; Dr. A. H. Lendon, Temporary Clinical Assistant to the Surgical Section vice Dr. G. H. Burnell; Dr. H. M. Fisher, Temporary Clinical Assistant to the Surgical Section vice Dr. A. H. Lendon; Dr. O. M. Moulden, Temporary Clinical Assistant

to Surgical Section vice Dr. A. H. Lendon.

ADVISORY COMMITTEE.

Dr. Bronte Smeaton was appointed a member of the Advisory Committee in the place of Sir Henry Newland who resigned on account of going abroad.

The Board has pleasure in recording its appreciation of the advice

received from the Committee during the year.

OFFICIAL VISITORS.

The following Official Visitors were appointed for a further term of twelve months:—

Lady Hackett-Moulden. Mrs. M. B. Martin. Mr. T. P. Howard.

Mrs. L. L. Hill was also appointed as an Official Visitor in the place of Mrs. M. Wallington who resigned on account of ill-health.

Lady Moulden was granted six months leave of absence to enable her to proceed abroad.

BUILDING ADDITIONS.

Owing to serious lack of accommodation the old Out-Patients' Building at the Hospital entrance was converted into a temporary surgical ward to accommodate 18 female cases. This was subsequently closed during the year, as the land was required for a site for the new Out-Patients' Department, plans for which were approved and the work authorized by the Government.

Excavation work was begun towards the end of the year. Plans were also approved and authority given for the erection of a new Casualty and Admission Block adjacent to the new Out-Patients'

Building which is to be proceeded with immediately.

FROME WARD.

Frome Ward was erected for the accommodation of "open" Tuberculosis cases requiring active medical treatment and was officially opened on September 16th, 1932. This ward has accommodation for 30 patients (18 males and 12 females), and was erected on the site of the Pathological Museum. This has had the effect of removing this class of patient from the general wards of the Hospital.

T.B. CLINIC.

Plans and site for a new Tuberculosis Clinic on the Adelaide Hospital grounds have been approved and will replace the temporary T.B. Clinic at the entrance to the old North Terrace Consumptive Home.

The Clinic is now open two afternoons weekly instead of one afternoon in order to cope with the increased number of patients.

INFECTIOUS DISEASES BLOCK.

The North Terrace Infectious Diseases Block was closed on October 7th, 1932, and the patients were transferred to the new Infectious Diseases Hospital at Northfield. This Institution is under the control of the Metropolitan Infectious Diseases Hospital Board consisting of representatives of Municipal Bodies.

X-RAY ROOM AND PLANS.

In order to cope with the increase in X-Ray work and to relieve the strain on the present Plant, another X-Ray Room has been built at an approximate cost of £863 and an additional Plant purchased costing £2,500.

STEAM SERVICES.

Hot water and steam services in lieu of gas were extended towards the end of the year to Alexandra, Wyatt, Victoria, Albert, Adelaide, Dorcas, two Theatre Wards, and No. 1 Operating Theatre at an actual cost of £570 1s. 3d.

The funds for this work have been provided by the Commissioners of Charitable Funds and are repayable to them plus Interest at 5 per cent. per annum by monthly instalments equal to one half of the proved savings in the gas accounts.

Considerable savings have been effected in gas consumption as the

following figures show, viz. :--

Total saving £579 6 0

Notwithstanding the decreased consumption of gas the cost of fuel used in the boilers for the generation of steam has not increased.

The Board has under consideration the question of extending hot water and steam services in the place of gas to other parts of the institution with the object of effecting further savings.

OUT-PATIENTS' DEPARTMENT.

Owing to the congestion at the old Out-Patients' Department it was found necessary to institute afternoon clinics on two days weekly, beginning from August 2nd, 1932.

HOSPITAL AUXILIARY.

The Board desires to again express its appreciation of the continued good work on the part of voluntary lady workers for the benefit of the patients of the Adelaide Hospital.

The Sewing Circle Branch provides bed linen, quilts, bed jackets, &c. Refreshments, &c., are on sale daily from 9 a.m. to 5 p.m. at the

Kiosk in the Hospital grounds.

The result of the activities of the Auxiliary will be reflected in the future by the erection of a Women's Block at the Hospital., the funds expended by them being subsidized by the Government and allowed to accumulate towards this object.

GOLD MEDALS.

The following Probationer Nurses, having passed first class in their examinations, were each presented with a gold medal, viz.:—Cocks, B. M.; Hammond, J. T.; Murray, J.

LETTERS OF APPRECIATION.

Letters were received from time to time from ex-patients and their relatives, expressing their appreciation of the care and treatment received.

Donations and Bequests.

GIFTS, ETC.

The Board expresses its appreciation of the following gifts:—Books, magazines, clothing, produce, flowers, from various benevolent persons and societies.

The assistance rendered by Toc H., lady visitors, musical bodies, &c., is much appreciated.

Attached are statistics, reports, &c.

I have the honour to be, Sir,

Your obedient servant,

BEDLINGTON H. MORRIS, M.B., B.S., &c., Chairman Adelaide Hospital Board.

• The cost per head is arrived at by making allowance for attendance and medicines supplied to the out-patients, etc., viz., £6.198 6s. 0d.

† For years 1870 to 1923 the amounts shown are the actual expenditure each year. From the year 1924 the amounts shown are the actual cost of maintenance for each year. The years 1929—1932 include expenditure on repairs, &c., by the Architect-in-Chief's Department, which was not previously shown. The amount of £87,444 1s. 5d. for the year 1932 does not include:—Infectious Diseases Block, £2,524 3s. 5d. S.A. Government Laboratory, £4,523 4s. 0d.; Dental Hospital, £7,141 16s. 3d.

‡ The fees received for 1932 do not include Infectious Diseases Block, £2,657 19s. 4d.; S.A. Govt. Laboratory, £2,519 4s. 4d.; Dental Hospital, £626 6s. 5d.

The total number of deaths (705) does not include Infectious Diseases Block (7).

Three hundred and sixty-five (365) patients have been sent to the Convalescent Hospital, Semaphore. The Da Costa Fund, created by Miss Da Costa, to assist convalescent patients leaving Hospital, paid for the maintenance of 324 of these patients at the Convalescent Hospital.

APPENDIX No. 4.

OPERATIONS FOR 1932.

OPERATIONS ON BLOOD VESSELS.

Ligature of arteries	5
Excision of varicose veins	1
Excision of varicocele	3
Blood transfusion	52
Aneurysm	1 9
Ligature of jugular vein	9
OPERATIONS ON MUSCLES, BURSAE, TENDONS, AND NERVES.	
Tenotomy	6
Suturing tendons and muscles	18
Excision of neuroma	2
Excision of bursa	1
Freeing nerve from callus	2
Excision of ganglion	14
Injection into nerve Excision of gasserian ganglion	14
Sympathectomy	2
Tendon transplantation or transplantation	ī
Nerve anastomosis or transplantation	î
Suturing nerves	3
Resection of nerve and division	18
Ramisectomy	1
Stretching of nerve	2
Suturing of nerve	3
The second secon	
OPERATIONS ON BONES.	
(a) Skull—	
Elevation of depressed fracture	1
Exploratory trephine	6
Subocupital decompression	1
Unilateral subtemporal decompression	17 24
Ventriculography—Drainage of ventricles	24
Drainage of cerebral abscess	1
Removal of cerebella tumour	3
(b) Spine—	1
Laminectomy	11
Lumbar puncture (general anaesthetic) Lumbar puncture (local anaesthetic)	11
Excision of coccyx	1
Albees bone graft to spine	î
	411 40
(c) Fractures— Reduction and setting of fractures (by manipulation only, under	
G.A.)	17
Reduction of fracture and dislocation	6
Wiring of fracture	19
Plating of fracture	3
Removing of plates and wires	1
Suturing patella	2
Removal of callus	1
Correction of malunited fracture (osteoclasis)	1

OPERATIONS ON BONES-continued.

Freshening ends of ununited fracture	-
Open reduction of Colles fracture	5
Cleaning and setting compound fractures	11
(d) Amputations and excisions—	
Amputation of—	
Toes	9
Foot	4
Leg	11
Thigh	1
Fingers	21
Hand	1
Forearm	1
	6
Upper arm	
Stump	1
Bone graft	5
Astragelectomy	_
Tarsectomy	-
Excision of metatarsal bone	-
Incision of Periosteum	_
Drainage of medulla	12
Sequestrectomy	10
Osteotomy	8
Excising and curetting sinuses	1
Aspiration of T.B. abscess (Bone dis.)	14
Removal of bony spurs	2
Curetting bone	-
Excision of osteophytes	-
Other excisions	8
Removal of toenails and fingernails	12
Excision of head of radius	2

RADIO-THERAPEUTIC DEPARTMENT-1932.

Total new cases	 	 525
Total visits	 	 6,624

During the past year the Cancer Clinic, consisting of nominees of the Honorary Staff with Dr. F. S. Hone as Chairman, has continued to meet regularly on Tuesday afternoons; in addition there have been evening meetings at which various phases of the work have been discussed.

Blood tests on members of the staff have given satisfactory results, while the photometric tests, advised by the last Australian Cancer Conference to determine the degree of exposure of each member, have been carried out. These tests, also, were satisfactory except in the case of the Deep X-Ray technician, on whom further tests are in progress to determine the cause of the apparent over-exposure.

RADIUM DEPARTMENT.

(Dr. H. A. McCou.)

(Dr. 11. A. McCoy.)	
Total cases treated	403
Total treatments given	683
Made up as follows :—	
Needlings 107	
Plates 460	
Radon treatments 46	
Radium moulds 70	

With the exception of an occasional shortage of beds caused by increased admissions and alterations to the Hospital, the greatest difficulty has been caused by the varying supply of radium emanation. During the year the form of needle was altered to make them more widely applicable, but unfortunate technical difficulties connected with the sealing of the needles have prevented their general use. Experiments at the Commonwealth Radium Laboratories are in progress to determine the cause of this.

In other respects treatment with radium has been carried out without undue trouble.

DEEP X-RAY DEPARTMENT. (Dr. J. S. Verco.)

Assistant-Dr. Colin Gurner.

Total cases treated	311
Total number of treatments	2,821
Total courses of treatment	380
Total incomplete courses of treatment	21

The machine has performed very well mechanically, and the call on it has again been sufficiently great to need the services of an extra technician at times to prolong the working hours into the evening.

No additional equipment was supplied during the year.

that I have audited the accounts of the Commissioners of Charitable Funds in connection with

REPORT ON DENTAL DEPARTMENT, 1932.

Superintendent—T. D. Campbell, D.D.Sc.

Senior Dental Surgeon and Demonstrator—J. F. Clark, B.D.S.

Dental Surgeons—H. M. Wilson, B.D.S., A. E. Bolt.

Dental Surgeon (half-time)—Miss W. E. Preedy, B.D.S.

Senior Dental Mechanic—L. A. M. Brougham.

CHANGES IN STAFF DURING YEAR.

Mr. J. V. Christophersen, Dental Surgeon, resigned, and Mr. H. M. Wilson was appointed to fill his place.

Miss M. Uren, Dental Nurse, resigned, and Miss K. Warncken was appointed to the permanent nursing staff.

Miss R. Watson was appointed permanently to the office staff, her time to be shared with the main office.

STUDENTS.

Students attending the practice of the Hospital were as follows:—Second year, nil; third year, 3; fourth year, 6; fifth year, 5; total, 14. All the fifth year students graduated in the B.D.S. course at the end of the year.

GENERAL REMARKS.

The demand for treatment continues to be greater than the services available can deal with adequately; therefore, much of the treatment has necessarily been restricted to emergency and relief work. On account of this, effort has been made to concentrate, as much as possible, the work of the conservation section on treating children, this being considered the best course for serving the community with the limited resources available.

The demand for artificial dentures continues to be very heavy. In this section of work every effort is made to supply dentures only when absolutely necessary, and to the most deserving cases who take their turn for treatment from waiting lists.

The revenue received for treatment shows no improvement over last year on account of the large percentage of patients who are in receipt of rations or pensions, or who are wards of Government or charitable institutions. In other cases, it is necessary, and has been for some years, for patients to present an order for treatment from some outside responsible person or official.

LABORATORY OF BACTERIOLOGY AND PATHOLOGY, ADELAIDE HOSPITAL.

STAFF.

Director:

LIONEL B. BULL, D.V.Sc., Melb.

Deputy Director:

E. McLaughlin, M.B., B.S., Adel., M.R.C.P.

Bio-Chemist:

R. J. COWAN, B.Sc.

Bacteriologist in Charge of Vaccine Department.

HELEN M. MAYO, M.D., Adel.

Honorary Pathologist.

JOHN B. CLELAND, M.D., Ch.M., Sydney.

The work of the laboratory is clearly separated into two main divisions, viz., work done for patients admitted to the Adelaide Hospital for treatment and that done for private medical practitioners, boards of health, Stock Department, and other public institutions. All the work in these two main divisions is more or less of a routine character, but wherever possible, research or investigational work is carried out on diseases of man and animals, and also on the improvement of laboratory methods used in the diagnosis of disease. As far as possible this work is summarised in the following table, but this summary does not represent all the activities of the staff, which, in addition, concerns itself in the care and maintenance of apparatus; the preparation of staining solutions, culture, media, &c., for use by students both in the Hospital and at the University; assistance to the Honorary Pathologist in the building up and maintenance of a museum and pathological and bacteriological examinations in connection with the post mortem room; the maintenance of a library of current scientific publications on pathology, bacteriology, bio-chemistry, and related subjects.

It is not possible to give a very accurate picture of the activities of the laboratory staff and the work done by giving the actual number of examinations made, for one examination may involve, for example, 10 times the amount of time that another does. For the most part, however, such a summary does convey, particularly to those familiar with laboratory work, some idea of the main activities of the staff.

Summary of Work, 1932-continued.

Adelaide Hospital—continued.

Vaccine prepared—

(a) Hospital	
Less examinations mentioned twice	22,119 918
Grand total	21,201

The Clinical Pathological examinations performed for the Adelaide Hospital include—(1) The histological diagnosis of pathological tissues, several of which were immediate examinations performed during operations (such examinations are done in order to help the surgeon in determining the extent and nature of the operation necessary); (2) the examination of urine to detect abnormal chemical and morphological elements; (3) the examination of faeces to detect the presence of abnormal elements; (4) the examination of cerebro-spinal fluid to detect cellular and chemical change (this examination is extremely useful in detecting syphilis of the central nervous system); (5) the examination of the blood to detect the presence of the various anaemias and leukaemias; (6) the examination of material for the detection of Treponema pallidum in the diagnosis of syphilis; (7) the examination of fluids from various cavities and cysts to determine their nature.

The bio-chemical examinations performed for the Adelaide Hospital include—(1) The estimation of the amount of sugar in the blood (this examination is made as an aid to the diagnosis of diabetes, and is made either after a fasting period or after the administration of glucose when several examinations are made to trace the rise and fall in the blood sugar); (2) the estimation of the urea nitrogen in the blood; (3) the examination of the gastric contents after a test meal, either one sample at the end of one hour or smaller samples at more frequent intervals over a period of two and a half hours; (4) collodial gold curves on cerebro-spinal fluids; (5) chemical examinations of various body fluids.

The Bacteriological examinations performed for the Adelaide Hospital include—(1) The examination of sputum for the detection of tubercle bacilli and other bacteria, and also for hydatid hooklets; (2) the examination of blood for the Widal reaction (this examination is important in assisting in the diagnosis of typhoid fever); (3) the examination of swabs taken from the throat and nose to detect the presence of diphtheria bacilli; (4) the examination of urine to detect the presence of tubercle bacilli, colon bacilli, and other bacteria; (5) the examination of inflammatory fluids, for the detection of bacteria, e.g., pleuritic fluid for tubercle bacilli; (6) examination of cerebral-spinal fluid to detect the presence of tubercle bacilli, meningococci, and other bacteria; (7) the cultural examination of blood to detect the presence of bacteria

in the circulation; (8) the examination of faeces and urine for the detection of typhoid bacilli and other pathogenic bacteria; (9) the examination of pus for the detection of gonococci, actinomyces, and other bacteria. Bacteria isolated from the various fluids and materials are often used in the preparation of autogenous vaccines.

The Wassermann Reaction was performed on Thursday in each week. This reaction is of great value in the diagnosis and treatment of syphilis. The Griffith & Scott technique is employed throughout.

The examinations performed and classified under the head Private Work include in the main such examinations as described under clinical pathological, bio-chemical, and bacteriological examinations. Much work was done for the Board of Health. Included in the examinations are also:—Examinations of various foodstuffs for the detection of bacterial contamination; (2) examination of drinking water to determine its suitability for drinking purposes. Included under this head are regular examinations for the Hydraulic Engineer's Department and for the Adelaide Local Board of Health; (3) the examination of disinfectants to determine their germicidal power; and (4) medicolegal examinations.

The routine examinations for the Stock Department include—(1) Bacteriological examinations of cow's milk for the detection of tubercle bacilli and other bacteria; (2) morbid tissues for histopathological examination; (3) examination of faeces to determine the presence of parasitism; (4) examination of cow's blood for the diagnosis of contagious abortion by the agglutination test; (5) specimens removed

post mortem from animals dying from various causes, &c.

During the year a preliminary investigation was made into a disease of sheep occurring in the N.E. districts of the State and of obscure actiology.

An experiment was carried out to try and ascertain the aetiology of Fowl Paralysis. This one experiment was carried to its conclusion but other work contemplated could not be done owing to lack of accommodation for experimental birds.

B. Suipestifer septicaemia of pigs was another subject for investiga-

tion and some experimental work was carried out.

One hundred boxes of bees from Italy were examined for the presence

of Tarsonema Woodi and Nosema aphis.

Bovine contagious abortion has been eliminated from two pure bred herds of milking cattle by the aid of the agglutination test carried out at the laboratory.

Ataxia in sheep and cattle is at present being investigated.

The investigations into bovine Haematuria and caseous lymphadenitis in sheep which are being carried out in association with the Commonwealth Council for Scientific and Industrial Research were continued during the year.

The Vaccine Department, as well as preparing 166 separate vaccines, also administered inoculations of vaccine to hospital patients. During the year 223 hospital patients were under treatment. The majority

of these patients visited the laboratory twice a week during their course of treatment, when they received their injections. In all, 1,393 doses of vaccine were administered; also 561 doses of tuberculin were given to 24 patients. Vaccines were prepared for 80 patients under the care of private practitioners, and 879 doses (including 126 doses of tuberculin and 105 doses of T.A.B. and B.C.C.), and 120c.c., were supplied in bulk to private practitioners.

The Vaccine Department continued to undertake the work of testing asthma and hay fever patients for sensitization against various extraneous substances, and to carry out the appropriate treatment. During the year 112 patients were tested against the various pollen, protein, and epithelial extracts. Sixty-one patients were treated

and received 920 doses.

During the year the sterilization and preparation of catgut for surgical use in the Hospital was carried out by the staff.

Summary and Comments.—The figures show that there has been an increase of only 313 in the total examinations over those made during the previous year. An analysis of the figures shows, however, that there has been an increase in all other departments of the work and that this is not expressed in the total on account of the large fall in the numbers of throat swabs examined, 1,756 less than the previous year, coincident with the closing of the Isolation Ward. The number of histopathological examinations continues to increase, an increase of 31 per cent. over the previous year when it was noted that the work in this department had doubled since 1927. This increase is partly due to the number of examinations carried out for for the Radium Department, 370 or 27.3 per cent. of the whole coming directly and 514 or 38 per cent. of the whole coming either directly from Radium Department or indirectly from the surgical wards.

The number of blood counts made on hospital patients is almost double that of the previous year. The same applies to test meal

examinations.

Nine hundred and twenty doses of protein extracts were administered in the Asthma Clinic, as against 506 doses in the previous year.

Under the heading of private work there has been a slight increase

in the number of examinations.

VENEREAL DISEASES.—NIGHT CLINICS.

REPORT FOR YEAR ENDED DECEMBER 31st, 1932.

Improved accommodation for the treatment of venereal diseases is urgently necessary.

The Venereal Diseases Act, passed by Parliament in 1920, has not yet been proclaimed. The provisions of this Act could not be effectively carried out until accommodation for the treatment of both in-door and out-door patients is provided. It is considered that the Act should be proclaimed as soon as possible.

REPORT OF OPERATIONS FOR THE YEAR ENDED DECEMBER 31st, 1932-

Male Section.

Surgeon—G. H. Burnell, B.S., M.D., F.R.C.S.E. Second Surgeon—H. R. Pomroy, M.B., B.S., F.R.C.S.

During the past year the number of patients attending has shown a further steady and definite decrease, so that those attending can now be given more detailed treatment. Those who need it are now receiving diathermy treatment, with gratifying results. It has also been possible, in the case of a few patients with resistant gonorrhoea, to take them into hospital, and operate on them; these, without exception, have responded well to the treatment, and have since been discharged cured.

It will also be noted that a very large number of patients, who were not suffering from venereal disease, presented themselves for diagnosis. This is a very gratifying feature of the work, and it is to be hoped that the public will continue to avail themselves of the facilities provided, as in this way we may hope to commence our treatment at the earliest possible date, should their disease prove to be a venereal infection; patients treated early almost invariably do better than those commencing later.

Female Section.

Surgeon-R. F. Matters, M.B., Ch.M., F.R.C.S.

The work at the Female Night Clinic during the past year has been very satisfactory and a number of patients have satisfied us that they were cured and have been discharged. The work has been facilitated by the help and co-operation of the Sisters, who have worked most strenuously and thoroughly.

Attached are details of attendances and statement of expenditure and revenue.

DETAILS OF ATTENDANCES.

Males—	Gonorrhæa.	Gonorrhœa and Syphilis.	Syphilis.	Non-venereal	Not Diagnosed.	Total.	Attendances.
