HOSPITAL MANAGEMENT COMMITTEE

CHAIRMAN

R. P. Chester, Esq., J.P.

Wheely Down House, Warnford,
Nr. Southampton.

VICE-CHAIRMAN

Mrs. I. R. Humphreys-Owen, J.P.

Warbrook House, Eversley,
Nr. Basingstoke.

MEMBERS

H. W. Annetts, Esq.

"Walmley," Porton, Nr. Salisbury.

W. Asten, Esq., M.D.

24, Braidley Road, Bournemouth.

Mrs. L. Barnard

81, Stafford Road, Southampton.

I. Baker, Esq. (deceased)

35, Avenue Road, Southampton.

J. N. Barron, Esq., F.R.C.S.

49, Cliddesden Road, Basingstoke.

J. Carse, Esq., M.D.

Graylingwell Hospital, Chichester.

C. L. Chute, Esq., M.C. (resigned)

The Vyne, Sherborne St. John,
Basingstoke.

G. T. Dicks, Esq.,

14, Nichols Road, Southampton.

E. J. Diffey, Esq., J.P.

45, Castle Road, Salisbury.

F. J. Hunt, Esq., D.F.C.

Farleigh Mortimer, Nr. Basingstoke.

H. Jackson, Esq.,

7, Bartons Lane, Old Basing,
Nr. Basingstoke.

J. T. Rowe, Esq., M.R.C.S.

14, Winchester Road, Basingstoke.

R. P. W. Shackleton, Esq.,
B.A., D.A., M.R.C.S.

Tangier Park, Wootton St. Lawrence,
Nr. Basingstoke.

Commander J. H. Turner

"Quiberon," Lascelles Road,
Southbourne, Bournemouth.

Mrs. B. Webb

Albion Cottage, Hartley Wintney, Hants.

OFFICERS

PHYSICIAN SUPERINTENDENT

I. Atkin, M.D., B.S., L.R.C.P., D.P.M.(Lond.), M.R.C.S.(Eng.)
(Psychiatrist, Royal Hampshire County Hospital. Psychotherapist,
H.M. Prison, Winchester.)

DEPUTY PHYSICIAN SUPERINTENDENT

J. Slorach, B.Sc., M.B., Ch.B.(Aberd.), D.P.M.(R.C.P. & S.)
(Physician in Psychological Medicine, Aldershot Hospital. Chief
Assistant, Psychosomatic Department, St. Bartholomew's Hospital.)

ASSISTANT PSYCHIATRIST

S. Kent, M.R.C.S.(Eng.), L.R.C.P., D.P.M.(Lond.).

SENIOR REGISTRAR

J. Todd, M.B., B.S., L.R.C.P., D.P.M.(Lond.), M.R.C.S.(Eng.).

REGISTRARS

E. R. Jones, M.R.C.S.(Eng.), L.R.C.P.(Lond.).

D. E. R. Kelsey, M.B., B.Ch.(Cantab.), M.R.C.P.(Lond.), M.R.C.S.(Eng.).

C. S. Trzaski, M.B., Ch.B.(Cracow).

JUNIOR REGISTRAR

R. L. Sikes, M.R.C.S.(Eng.), L.R.C.P., D.P.M.(Lond.).

ASSISTANT MEDICAL OFFICERS

S. D. H. de Zilwa, M.R.C.S.(Eng.), L.R.C.P.(Lond.).

E. A. O'Neill, M.B., Ch.B.(Birm.) (deceased).

HOUSE PHYSICIAN

B. Fife, M.B., Ch.B.(Birm.), D.T.M. & H.(Eng.) (resigned).

DENTAL PRACTITIONER (PART-TIME)

J. K. Donald, L.D.S., R.C.S.

CHAPLAIN—CHURCH OF ENGLAND

Rev. T. Fraser Bowen.

CHAPLAINS—NON-CONFORMIST

Rev. H. G. Kelley (resigned).

Rev. Eric Bower.

CHAPLAIN—ROMAN CATHOLIC

Rev. Father J. W. Levey.

SECRETARY, FINANCE AND SUPPLIES OFFICER

Fredk. Hales, F.H.A., F.C.C.S.

MATRON

Miss K. Gander, S.R.N., R.M.P.A.

CHIEF MALE NURSE

S. T. Phillips, R.M.P.A., R.M.N.

PSYCHIATRIC SOCIAL WORKER

Mrs. Audrey Smith.

SOCIAL WORKER

Mrs. K. Wade.

CHIROPODIST (PART-TIME)

Mrs. E. Slinger.

PHYSIOTHERAPIST (PART-TIME)

Mrs. E. Dorph-Petersen.

HEAD OCCUPATIONAL THERAPIST

J. G. Williams, M.A.O.T., R.M.P.A.

SENIOR LABORATORY TECHNICIAN

W. A. Napier, F.I.M.L.T.

DISPENSER

E. Jones.

ENGINEER

F. J. Tivey, M.Inst.F., A.I.E.E.

FARM BAILIFF

E. E. Shorney.

CONSULTING STAFF

GENERAL SURGEON

J. Troup, M.B., Ch.B.(Manch.), F.R.C.S.(Edin.).

GENERAL PHYSICIAN

H. S. Le Marquand, M.D., F.R.C.P.(Lond.).

ORTHOPAEDIC SURGEON

PARK PREWETT GROUP HOSPITAL MANAGEMENT COMMITTEE

GROUP NO. 47

SECOND ANNUAL REPORT OF THE GROUP HOSPITAL MANAGEMENT COMMITTEE

At a Meeting of the Group Hospital Management Committee held at the Hospital on February 6th, 1950, it was resolved to present to the South West Metropolitan Regional Hospital Board a Report for the year ending December 31st, 1949.

MANAGEMENT COMMITTEE

Mr. I. Baker, for many years a member of the former Park Prewett Hospital Visiting Sub-Committee, died on May 31st, 1949. The Committee desire to place on record their appreciation of his long and valued service to the Hospital.

The vacancy thus caused was filled by the appointment of F. J. Hunt, Esq., D.F.C., whose wide experience, particularly relating to estate organisation, has proved a great asset to the Committee.

C. L. Chute, Esq., M.C., Chairman of the Hampshire County Council and Quarter Sessions, resigned his membership of the Committee owing to his important County and public duties. Mr. Chute had rendered estimable service to the Hospital over many years and it was with sincere regret the Committee learned of the necessity for his resignation.

HOSPITAL GROUP

For the purposes of the Lunacy and Mental Treatment Acts:—

- (a) Park Prewett Hospital.
- (b) Wimble Hill House, Crondall.
- (c) Kingsclere Hospital.

The two latter Units of the Group are also designated under Section 20, Lunacy Act, 1890, for the reception of 6 female and 6 male patients respectively.

- (d) The Special Jaw and Plastic Unit, Rooksdown House.

The activities of the House Sub-Committee appointed for Wimble Hill House and Kingsclere Hospital have been the subject of monthly reports to the Group Hospital Management Committee. In both instances it has been gratifying to observe the keen interest displayed

towards the general development of the Health Services, reflecting the advancement of treatment and the welfare of patients.

ACCOMMODATION

Villa 2 is still diverted to accommodate certain personnel attached to Rooksdown House and Villa 6 remains in use as an Occupational Therapy Centre. The acute position relating to patient and staff accommodation has been under constant review by the Committee and appropriate recommendations submitted to the Regional Hospital Board. A scheme for the addition of a wing to the Nurses' Home is included in Capital Estimates and it is hoped that either sanction will be forthcoming for this Scheme or alternatively, an alleviation to the present problem obtained.

MOVEMENT OF PATIENTS

At the date of this report resident patients at the four Units of the Hospital Group number:—

	<i>M</i>	<i>F</i>	<i>Total</i>
Park Prewett Hospital	652	672	1324
Wimble Hill House, Crondall		99	99
Kingsclere Hospital	64	17	81
The Special Jaw and Plastic Unit (Rooksdown House)	33	23	56

Detailed information relating to the patients under treatment during 1949 and statistical returns, is given in the reports of the Physician Superintendent and Medical Superintendent (Rooksdown House).

Although it has been possible to receive back a number of female patients from the Evacuating Hospitals, 186 are still due for return.

VISITS BY COMMITTEE

The Rota Visitors have carried out a monthly visit to the Hospital, which system appertains also to the House Sub-Committees of Wimble Hill House and Kingsclere Hospital. Their visits have proved of great value—in addition to the regular contact and interview with patients, much has been achieved thereby to promote the general interest and well-being of the several Units of the Hospital Group.

FINANCE

The Finance Sub-Committee have met monthly and their reports and recommendations considered by the Management Committee. The annual estimates, both maintenance and capital, have been carefully reviewed and the Committee are satisfied that financial control has been satisfactorily maintained, consistent with efficiency and due regard to economy. The limitation of Capital expenditure has curtailed the development of many schemes which the Committee had anticipated at an early date.

The Committee decided to invite periodic public tender to contract for goods and services, with effect from April 1st, 1949.

Interim Health Service Audit of Accounts have taken place and a satisfactory report received from the Auditor respecting the period July 5th, 1948, to March 31st, 1949. The report is made subject to completion by the District Auditor of his examination of the final accounts of the Visiting Sub-Committee of the Joint Mental Health Institutions Committee and to adjustment respecting the maintenance of persons for whom local authorities are, under user agreements, responsible.

MEDICAL AND DENTAL ESTABLISHMENT (PSYCHIATRIC GROUP)

The Regional Hospital Board approved a full-time Medical Establishment as follows:—

Park Prewett Hospital:—

3 Consultants.

4 Senior Officers.

5 Medical Officers.

A list of the Consulting Medical and Dental Staff is contained in this Report.

The formation of Medical Advisory Committees has proved a progressive step to the maintenance of an efficient health service. Their reports and recommendations to the Management Committee have contributed in no small measure to the general uplift of all standards of the day-to-day life within the Hospital Group.

The Committee regret to record the death of Dr. E. A. O'Neill on March 27th, 1949, who, in the short time he was at Park Prewett, had proved himself a loyal and conscientious officer.

TREATMENT

Modern forms of treatment in their respective categories are available and have been efficiently maintained.

The Psychiatric Units of the Hospital Group have developed increased facilities, which has benefited the interests and well-being of the patients.

HEALTH

It is gratifying to report that the general health of both patients and staff has been good and that apart from a minor outbreak of mild dysentery, there have been no serious epidemics.

The water supply has been subject to regular bacteriological examination and has proved satisfactory. Although the level of the deep well dropped considerably during the long dry spell of last Summer,

on no occasion was it necessary to restrict water consumption within the Hospital.

Periodic examination of the sewage effluent has been conducted and one positive in untreated effluent was reported, while the treated effluent was always free of pathogenic organisms.

A scheme is under consideration to abolish the Sewage Disposal Plant and to connect the Hospital mains to a proposed sewage disposal plant to be installed by the Basingstoke Rural District Council for the Parish of Sherborne St. John. The existing plant is obsolete and effluent overflow from the septic tank continues to have a deleterious effect on agricultural land. Submissions were made to the Regional Hospital Board, who agreed inclusion in the 1950-51 Capital Estimates of a sum for the provision of a main from the Hospital to the nearest convenient point on the Council's proposed scheme.

OUT-PATIENT CLINICS

Good progress has been made at the four Out-Patient Psychiatric Clinics established at the Aldershot, Royal Hants County, Odstock and Park Prewett Hospitals respectively. An additional Clinic has been opened at the Andover Public Health Centre.

The increasing number of patients attending these Clinics gives testimony to the public appreciation of the facilities available for the early treatment of nervous and mental disorders.

The Committee extend their thanks to all the medical officers associated with this extremely important branch of the Mental Health Service.

Out-patients at the Special Jaw and Plastic Unit (Rooksdown House) attended from all parts of the country. During the year under review, the total out-patient attendance was 3,071, the number of new out-patients being 602.

FIELD PLACE APPROVED HOME—NEW MILTON

The Committee were pleased to concur with a request made by the Regional Hospital Board, whereby members undertake quarterly lay inspection of Field Place Approved Home. The arrangement received approval of the Minister of Health.

BUILDINGS—CAPITAL SCHEMES

Considerable work of restoration to fabric and internal redecoration at Park Prewett Hospital, Wimble Hill House and Kingsclere Hospital has been effected; nevertheless, there still remains much to be accomplished to bring the fabric and internal decoration up to the ideal.

DETAILS OF MAJOR WORKS COMPLETED DURING THE FINANCIAL YEAR ENDED MARCH 31ST, 1950, WERE AS FOLLOWS:—

Park Prewett Hospital

Acquisition of two Transport Vehicles.
Renovation of six Protective Rooms.
One 80-qt. Hobart mixing machine.
Six 60-gallon steam-jacketed pans.
One potato peeling machine (electric).
One chip cutting machine (electric).
Two gas ovens—Admission Hospital.
One gas oven—Villa 7.
Installation of a Vertical Economiser (Main Boilers).
Extension of Steam Heating Services to 7 Villas and the Nurses' Home.
Adaptation of rooms to Preliminary Training School for Nurses.
Provision of full-length lavatory doors in certain Wards.
Extension of water supply to pastures.
Transfer of electricity supply to 72 Staff Houses from the Hospital Generating Station to the Grid System of the British Electricity Authority.

Rooksdown House

One Esse Cooker.
One 20-gallon boiler.
One chip cutting machine (electric).
One 2-pan Fish Fryer.

Wimble Hill House

Electrical re-wiring of all buildings to conform with official standards and installation of one transformer.

MAJOR WORKS NOW IN PROGRESS

Park Prewett Hospital

External redecoration of main Hospital buildings and internal redecoration of Recreation Hall.
Erection of two farm cottages.
Installation of Milk Bottling Plant (Farm Dairy).
Replacement of Milk Cooling Apparatus, refrigerating type.
The Regional Hospital Board approved the replacement of two washing machines and two hydro extractors for Park Prewett Hospital Laundry as priority items 1950/51. The Committee's scheme for further development includes modernisation of the laundry buildings, provision of a central linen store and further replacement of machinery and equipment.

Rooksdown House

External and internal redecoration.

MAJOR WORKS CONTEMPLATED

Park Prewett Hospital

- Installation of soot extractor plant (main boilers).
- Installation of coal handling plant (main boilers).
- New wing to Nurses' Home.
- Twenty-four Staff cottages.
- Four Occupational Therapy hutments.
- Provision of new canteen, library and hairdressing saloon (female).
- Building of Chapel.
- Provision of dual cinema projectors.
- Provision of hot and cold water facilities in nurses' accommodation.
- Additional greenhouse—garden.
- Repair and resurfacing of roadways—Dunsford Crescent and Wellington Terrace.
- Extension of office accommodation—Secretary's staff.
- Replacement of telephone switchboard—automatic.
- Provision and erection of one implement shed (farm).
- Review of fire precautions at the four units of the Hospital Group has been made.

Wimble Hill House

- Addition of three bathrooms in three houses.
- Restoration, redecoration and extension of heating services to detached block.
- Extension of heating system to dormitories.
- Provision of kitchen equipment.
- Acquisition of prefabricated house.

Kingsclere Hospital

- Heating and hot water supply (revision scheme).
- Adaptations to provide suitable accommodation for patients admitted under Section 20, Lunacy Act, 1890.

BASINGSTOKE INFECTIOUS DISEASES HOSPITAL

The Administrative Quarters of this Hospital are still used to accommodate certain of the nursing staff (Rooksdown House). The Regional Hospital Board has decided that in view of the serious deficiency of general beds in the Winchester area, that this unit be returned as soon as possible to the Winchester Hospital Group.

TANGIER HOUSE, WOOTTON ST. LAWRENCE

The Ministry of Works has recently completed work of restoration and redecoration of these premises.

OFFICIAL VISITS

Two Commissioners of the Board of Control, H. R. Green, Esq., and Dr. R. G. Anderson, visited the Hospital on June 16th, 1949.

It was gratifying to receive their report with an appreciation of the manner in which general administration is maintained.

A Commissioner of the Board of Control, Dr. R. G. Anderson, visited Kingsclere Hospital on February 8th, 1949.

An Inspector of the Ministry of Health visited the residents under Part III, National Assistance Act, 1948, at Kingsclere Hospital on July 6th, 1949.

Dr. L. A. Napier visited the Service Patients on behalf of the Ministry of Pensions on December 13th, 1949.

A Dietitian from the Ministry of Health visited Wimble Hill House on March 24th, 1949.

Dr. H. E. Magee, Senior Medical Officer for Nutrition, and Mrs. B. M. Needham, an Advisory Dietitian of the Ministry of Health, visited the Hospital on January 17th and 18th, 1950.

FARM AND GARDEN

The Committee, in accordance with recommended policy, decided to co-opt to membership of the Farm and Garden Sub-Committee, the following gentlemen:—

F. J. Hunt, Esq., D.F.C.

T. Wannop Williamson, Esq., B.Sc.(Agric.).

W. Basil Porter, Esq.

Thanks are extended to these three members for their practical contribution to the comprehensive work connected with the management of the farm and garden.

With a view to increased production and the ultimate attainment of self-sufficiency of supply, the Committee has completely revised the administration of the farm and garden. Dual control was abolished with effect from February 1st, 1950, and farm and garden activities placed under one control.

In this respect valuable assistance was rendered by D. R. Browning, Esq., N.D.A., N.D.D., Assistant County Agricultural Officer (Advisory), who ably presented reports for the re-planning of the farm and garden to allow modern methods of husbandry.

The Committee record their thanks and appreciation to Mr. Browning.

The long period of dry weather retarded the growth of green crops, otherwise supplies were up to standard.

Increased supplies of root and other vegetables were made to Wimble Hill House and Kingsclere Hospital.

Periodic tests of the attested herd of Shorthorn Dairy Cattle were made by the Ministry of Agriculture and Fisheries. Milk samples have been subject to bacteriological examination at regular intervals.

Following a survey by the Hampshire Agricultural Executive Committee the farm and garden were placed in category "A".

GENERAL

The Committee are cognisant of the enthusiastic efforts made by the Officers and Staff to further and promote the interests of the Hospitals within the Group and express their thanks for loyal co-operation which has rebounded to the welfare and benefit of the patients.

Signed on behalf of the Hospital Management Committee at a Meeting held on May 1st, 1950.

R. P. CHESTER,
Chairman.

PARK PREWETT HOSPITAL

ANNUAL REPORT OF THE PHYSICIAN SUPERINTENDENT

Mr. Chairman, Ladies and Gentlemen,

I have the honour to present the Annual Report of the Hospital for the year ended December 31st, 1949.

Three female wards were opened during the year: E in January, H in March and G in December. This has enabled a further improvement in the classification on the female side. Undoubtedly one of the most serious criticisms levelled against Mental Hospitals in the past has been the nursing of early and chronic cases in the same ward. It can be claimed that this has been completely solved at your hospital. Only voluntary patients who are well conducted are now admitted to Pinewood House; certified and other voluntary patients are admitted to J or M.11, and are transferred to Pinewood for convalescence.

At the end of the year there was a deficiency of night accommodation to the extent of 19 on the male side and 37 on the female side. Three female wards still show overcrowding—75% in A, 31% in B and 40% in Romany. This is because two wards are still diverted for other purposes (Laurels as Occupational Therapy Department, Shrubberies for Rooksdown staff), and 27 beds are allocated in Wards H and K for nursing staff. I reported last year on the serious shortage of accommodation for nurses, and you are fully aware of the detailed situation.

ADMISSIONS

According to sex and status, the figures for the DIRECT admissions were as follows:—

Voluntary—

	<i>M</i>	<i>F</i>	<i>Totals</i>
Park Prewett	205	250	455
Kingsclere	4	—	4
Crondall	—	4	4
	209	254	463

Temporary—

Park Prewett	3	16	19
Kingsclere	1	—	1
	4	16	20

Certified—

Park Prewett	67	116	183
Total	280	386	666

The total number (666) is 88 more than that of 1948, and is now nearly double that of pre-war years (the average for 1934-7 was 335). This is one of the reasons necessitating increased nursing and medical staff. The percentage of voluntary admissions has increased from 63 to 70.

Classified according to areas of origin the figures for direct admissions were as follows:—

	<i>M</i>	<i>F</i>	<i>Totals</i>
Bournemouth	81	116	197
Aldershot	51	70	121
Winchester	37	36	73
Basingstoke	19	40	59
Stockbridge	26	30	56
Alton	11	28	39
Southampton	8	12	20
Romsey	7	12	19
Eastleigh	4	12	16
Kingsclere	7	7	14
Surrey	3	5	8
Wiltshire	5	1	6
Lymington	1	4	5
Christchurch	5	—	5
Berkshire	1	4	5
London	2	3	5
Dorset	3	—	3
Kent	—	3	3
Petersfield	—	2	2
Gosport	1	—	1
Portsmouth	—	1	1
Sussex	1	—	1
Buckinghamshire	1	—	1
Bedfordshire	1	—	1
Middlesex	1	—	1
Somerset	1	—	1
Scotland	1	—	1
Broadmoor Patients	2	—	2
Total	280	386	666

In addition there were 40 indirect admissions, making a grand total of 706.

The population of the Hospital has grown from 1,202 to 1,293.

EVACUATED PATIENTS

There are still 186 female patients due to return, distributed as follows: Mendip Hospital, Wells, 59; Roundway Hospital, Devizes, 53; Tone Vale Hospital, Somerset, 48; Coney Hill Hospital, Gloucester, 36.

During the year it was possible to take back only 35 patients.

DISCHARGES

Classified according to sex and status, the figures were:—

Recovered—

	<i>Vol.</i>	<i>Males Temp.</i>	<i>Cert.</i>	<i>Vol.</i>	<i>Females Temp.</i>	<i>Cert.</i>	<i>Totals</i>
Park Prewett ...	32	—	13	52	2	7	106
Relieved—							
Park Prewett ...	117	1	24	167	1	48	358
Crondall	—	—	—	1	—	—	1
Not Improved—							
Park Prewett ...	30	—	4	25	—	4	63
Totals—							
Park Prewett ...	179	1	41	244	3	59	527
Crondall	—	—	—	1	—	—	1
	179	1	41	245	3	59	528

The total of 464 patients at Park Prewett discharged as relieved and recovered, works out on the number of direct admissions at 70%, which is 10% higher than in 1948.

INQUESTS

Two inquests were held during the year: one died of acute gastritis accelerated by the shock of an operation performed for suspected obstruction, and the other died of bronchopneumonia complicated by severe cardio-vascular degenerative changes.

PHYSICAL HEALTH

This has remained on a good level throughout the year. One female patient admitted with jaundice proved to be a mild form of Weil's disease. Eleven male patients had dysentery (Schmitz) and two female patients had dysentery (Sonne); all in a mild form. Many other patients in the wards concerned were investigated, with negative results.

One female and nine male patients were notified as suffering from active pulmonary tuberculosis at the end of the year. Another eleven male and two female patients and four staff who are inactive are reviewed regularly. A mass radiography unit examined 997 patients and 169 staff in December. Twenty-one male patients were judged active and twenty-one patients (16 male, 5 female) inactive; the number included many already diagnosed, and are being clinically investigated. Of the staff, one active and two inactive were reported.

The percentage of patients found active by mass radiography (2.1%) compares favourably with published statistics of other

hospitals, which vary from 1.4 to 5.3%; as elsewhere, the male figures are markedly higher than the female, but I am not aware that any explanation for this is available.

Of the 79 deaths, 56 (71%) were of the age of 60 and over. The death rate works out at 6.25%.

The chief causes of death were: Diseases of the circulatory system 21; pneumonia (all forms) 15; cerebral thrombosis, haemorrhage, etc., 13; malignant neoplasms 9; nephritis 6.

The standard of diet has been well maintained. Patients' mess committees were formed in Greenlands and M.12, and their suggestions for improvements have proved most helpful.

OUT-PATIENT CLINICS

The figures of attendances were as follows:—

<i>Clinic</i>	<i>New Cases</i>	<i>Total attendances</i>	<i>Psychiatrist</i>
Aldershot Hospital	127	531	Drs. Slorach and Jones.
Pinewood House	73	596	Drs. Atkin, Slorach, Kent and Todd.
Royal Hampshire County Hospital	65	299	Dr. Atkin.
Andover Health Centre ...	35	98	Dr. Kent.
Odstock Hospital	7	51	Dr. Slorach.
Total	307	1575	

Compared with last year, the number of new cases has increased by 76% and the total attendances by 100%. The numbers at Aldershot have increased to such an extent that an extra session has been arranged, and Dr. Jones attends as assistant to Dr. Slorach. Sessions of E.C.T. are held at Pinewood House, and when the nursing situation permits similar sessions will be arranged at the Aldershot Hospital. Dr. deZilwa continues to assist Dr. Christie at the Aldershot Child Guidance Clinic, and Dr. Slorach assists Dr. Wittkower in the Psychosomatic Dermatological Department of St. Bartholomew's Hospital.

CONSULTANT PSYCHIATRIC SERVICE

Dr. Slorach and Dr. Atkin offered to give such services both at Institutions and in homes of patients situated in the Park Prewett catchment area, as far as their hospital and clinic commitments permitted. Most of the domiciliary consultations (20) were given by Dr. Slorach; and I have examined cases at the Basingstoke, Alton, St. Paul's, Winchfield and Winchester Hospitals.

As consultant to the Crondall and Kingsclere Hospitals, I visit to examine all patients admitted under Section 20. In four cases I advised extension of detention for another 14 days, and of a total of

15 patients, only three had to be certified, the others being admitted on a voluntary basis. Nearly all were elderly, and there is no doubt that the period of three or seventeen days' observation has saved unnecessary certifications. I would like to express my thanks to Drs. Maile and Philip and to the Superintendents of Crondall and Kingsclere Hospitals for their co-operation in the treatment of these cases.

PSYCHIATRY AND CRIMINOLOGY

The importance of neurosis, psychosis and psychopathic character in anti-social behaviour is being increasingly recognised, and the Criminal Justice Act 1948 has made provision for the investigation and treatment of offenders. Under Section 28 an offender may be admitted for examination so that a report can be sent to the Court. Under Section 4, offenders may be admitted as voluntary patients for treatment up to one year as a condition of probation, and under Section 24 an offender can be ordered detention if of unsound mind. Two patients were admitted under Section 60 from Winchester Prison for a period of treatment. Dr. Slorach and I have furnished reports for Magistrates' Courts in cases of juvenile and adult delinquency, making recommendations, where indicated, for psycho-therapy either on an in-patient or out-patient basis. I would like here to thank the probation officers in our area for their co-operative help in many cases.

Dr. Slorach gave expert evidence in a most skilful manner in two murder trials, on July 15th before Mr. Justice Hallett, and on December 19th before Mr. Justice Byrne. On each occasion the verdict was "guilty but insane".

I was appointed psychotherapist to H.M. Prison, Winchester, by the Regional Hospital Board and visit there weekly. The number of new cases examined was 27, but only eight were suitable for psycho-therapy. A total of 107 patient-sessions was held. When the prisoner is discharged, and further treatment is indicated, I continue to see him at the Pinewood House or Winchester Psychiatric Clinics; if he is distantly domiciled I refer him to the appropriate local clinic. I would like to thank Dr. Fenton, the M.O. of Winchester Prison, for his courtesy and co-operation.

PATHOLOGICAL LABORATORY

Dr. C. H. Wrigley, M.A., M.D., B.Ch., commenced duties on October 5th, 1949, for one session weekly as consultant pathologist. Mr. W. Napier, F.I.M.L.T., Laboratory Technician, and Mr. F. Malinowski, Student Technician, have performed nearly 4,000 investigations during the year. A summary of the items dealt with reads as follows:—

Urine

Routine examinations	1,094
Sugar (quantitative)	25
Sediments	644

Albumin (quantitative)	288
Urea concentration tests	5
Chlorides	1
Bacteriological	186
For T.B.	1
Faeces	
Routine (Dysentery, Typhoid, etc.)	479
For T.B.	9
For Worms and Ova	4
For Occult blood	8
For Bile	2
For Amœba	3
Blood	
R.B.C., W.B.C. and Haemoglobin	291
Differential Counts	145
B.S.R.	163
Grouping	18
X-Matching	16
Malarial Films	7
Sugar estimations	78
Sugar Tolerance Curves	8
Urea estimations	61
Van Den Bergh	5
Protein estimations	6
Icteric Index	6
Miscellaneous	13
C.S.F.	
Lange	18
Gum Mastic	24
Cell Counts	30
Protein estimations	29
Chlorides estimations	4
Sugar estimations	2
Cultures	2
Stomach Contents	
Fractional test meals	15
Vomits	2
Miscellaneous	
Throat Swabs	14
Various Swabs and Cultures	24
Urethra and Vaginal (smears and swabs)	10
Skin examinations	2
Fertility tests	1
Autoclave efficiency tests	2

Penicillin sensitivity tests	1
Pus for T.B.	3
Sputa for T.B.	64
Histological sections	22
Plural Fluids	2
Autopsies (68.4% of deaths)	57

The intermittent typhoid (4) and paratyphoid (2) carriers in B Ward were examined at intervals throughout the year; only two of them gave positive results. Treatment with *B. Acidophilus* seems to have diminished the frequency of positive findings.

We are indebted to the Public Health Laboratories, Winchester, for the performance of nearly 500 Wasserman reactions, and the monthly examination of our milk, water supply and sewage effluent. The bacteriological reports on the water supply have always been satisfactory. On one occasion the sewage effluent yielded paratyphoid bacilli, but the treated effluent was clear. With regard to the milk supply, the methylene blue test was not satisfactory on several occasions, but special measures taken on the suggestion of Dr. R. D. Mackenzie have rectified this. The arranged provision of up-to-date apparatus, an improved cooling plant, a larger sterilising cabinet and a bottling machine will ensure the highest standards of purity and distribution.

Many microscopic and other demonstrations were given to nurses in training.

X-RAY DEPARTMENT

Miss Bushnell, as Radiographer, now takes three sessions weekly, and Dr. R. I. Roberts, the Radiologist, has visited weekly (instead of fortnightly) from October 19th. Routine investigations include radiography of the chests of all newly-engaged staff, of nurses who deal with cases of tuberculosis at six-monthly intervals, and of all active and inactive patients and staff at three-monthly intervals. A total of 2,000 films was taken.

SPECIAL FORMS OF TREATMENT

All the well-recognised forms of treatment, psychological and physical, have been utilised where indicated. These included narco-analysis, hypno-analysis, ether abreaction, prolonged narcosis, subcoma insulin, electro-shock (with or without curare), insulin shock, and leucotomy.

Dr. deZilwa and Dr. Trzaski have continued to run the intravenous insulin unit in M.4 Ward.

Arrangements have been made for the discharged leucotomised cases to be visited by the psychiatric social worker at three-monthly intervals for five years, so that long-term results might be assessed. Improvement is not maintained in all cases, and two patients who were discharged had to be readmitted; we have also admitted two patients

who had been leucotomised at other hospitals. At the time of writing the favourable results in the 26 cases operated since 1948 read as follows:—

Discharged, social recovery	4
Discharged, improved	4
Remaining in hospital improved	9

The first group includes two obsessional types, one aggressive psychopath and one aggressive schizophrenic; the second, one manic-depressive, two aggressive schizophrenics and one obsessional; the third, five violent schizophrenics, one psychopath, one melancholic, one manic-depressive and one obsessional. The results must be regarded as worth while considering the otherwise hopeless outlook in these cases.

Dr. Todd and Dr. deZilwa organised several sessions of psychodrama in Pinewood House. Examples of maladjustment due to various causes (environmental stress, paranoid attitudes, morbid jealousy, excessive self-pity, over-compensation, etc.) were illustrated by playlets or two or three scenes, in which patients, assistant occupational therapists and the doctors took part, in front of an audience of about 20 patients. A discussion, ably guided by Dr. Todd, then followed. Undoubtedly this is a most valuable form of group psychotherapy.

Of three cases of dementia paralytica treated with malaria and penicillin, one was discharged recovered and one relieved.

DENTAL DEPARTMENT

Mr. J. K. Donald has held two sessions weekly. A summary of the work done is: Fillings 42; dentures inserted 43; dentures repaired 20; scaling and polishing 34; extractions under local anaesthetic 539; extractions under general anaesthetic 405; other treatments 52. In addition many inspections were made.

As reported last year, two sessions are not sufficient to cope with the routine inspection of all new admissions, reviewing the whole chronic population at reasonable intervals and performing all the necessary work. Unfortunately Mr. Donald cannot attend for more than the two sessions a week, and it will be necessary to engage a second dental surgeon.

SOCIAL WORK DEPARTMENT

Mrs. Audrey Smith was appointed Psychiatric Social Worker on May 2nd. Her duties include home visits of all new outpatients and formulating a report for the psychiatrist of the Clinic concerned; home visits and reports for many in-patients who are about to be discharged; follow up visits of selected discharged patients. In all she has furnished 226 reports and, with attending the Advisory Bureaux for the Public Health Department, has had to cover over 10,000 miles in travelling. In addition she has given many interviews to in-patients at the Hospital.

A worker of great experience in several hospitals and clinics in the past, Mrs. Smith's reports have been of the utmost value in difficult cases.

Mrs. K. Wade, the Social Worker, has continued her scheme of following up as a routine all discharged in-patients with the help of the W.V.S. I hold a weekly conference with her when the reports (495 during the year) forwarded by eight voluntary workers are studied together with the hospital clinical records. In the great majority of instances the ex-patient is found to have settled satisfactorily at home. In other cases I decide on what course of action should be taken, e.g.:—

- 1.—Another home visit by the W.V.S.
- 2.—A visit by the Psychiatric Social Worker.
- 3.—A further letter to the registered practitioner (a report is always sent on discharge).
- 4.—An appointment at the nearest Psychiatric Clinic.

In this manner lack of successful re-adjustment is often quickly remedied; and relapses are attacked without delay.

Mrs. Wade, who interviews relatives of newly-admitted patients so that the enquiry forms are accurately completed for statistical purposes, discusses problems of re-adjustment with patients about to be discharged; and gives many other interviews on request both at the Hospital and at her Basingstoke office—a total of 555 patients were seen during the year.

The Disablement Re-settlement Officer, Mr. W. Jones, visits as required to advise on employment problems, and has proved of great help to us. Four patients were sent to the Egham Rehabilitation Centre.

The scheme of employing patients outside the Hospital for a trial period before discharge has been continued. Of ten patients eight were thus successfully rehabilitated.

Our thanks are due to Madam I. Nowotna for the help she continues to give us with the Polish patients.

SOCIAL THERAPY

Dr. Slorach has continued in an unobtrusive manner to guide the successful functioning of the Pinewood House Social Club. Improved furnishing has brightened up considerably the Club Room, which is open every evening up to 9.30 p.m. The weekly programme of whist drives, quizzes, dances, rambles, ping-pong, etc., has been maintained. Two lectures were given, one by Mr. Willis, Curator of the Basingstoke Museum and one by Police-Supt. T. Wilmott. A very jolly social evening and dance was organised at Christmas time. Several patients on discharge have informed me they will miss the pleasant atmosphere of the Club when they settle at home

OCCUPATIONAL THERAPY

The two Assistant Occupational Therapists, Miss Armstrong and Miss Yates, who had done so much to develop this department, resigned to take up posts in South Africa and W. Australia respectively. This created a serious gap, and it has not yet been possible to replace them. Mr. Williams commenced work as Head Occupational Therapist on October 1st. As assistants he has Male Nurse Stubbert (in training for Occupational Therapist, Nurse W. Malinowska (seconded for one year), Male Nurse F. N. Fiford (carpentry section). British Red Cross workers have helped on Wednesday afternoons. In addition newly-engaged male nurses assist for periods of one to three months, as far as other duties allow, so as to become acquainted with the main principles of occupational therapy. As many as 90 patients have attended daily, but the numbers in the wards are still too small and cannot be expected to grow to a satisfactory level until the establishment of three qualified Assistant Occupational Therapists is filled. The plan of sending an Assistant Occupational Therapist to Crondall and Kingsclere has had to be dropped for the time being.

In spite of the shortage of qualified staff, much work has been carried out. This included the following articles:—

Embroidery and tapestry, 600; stools, 75; basketry, 25; carpentry, 50; leatherwork, 100; wool rugs, 200; coir mats, 20; knitting wear, 300; weaving, 75; soft toys, 50; lampshades, 10.

Many of these (e.g., rugs, mats, woodwork) have been put to good use in the hospital; others found popular sale at the Annual Fete and before Christmas. The bookbinding section has performed much useful work for the library. A brief summary of the sculpture and graphic sections is given elsewhere.

ART THERAPY

The monthly musical recitals arranged through the Council for Music in Hospitals were much appreciated. The programme for the year was:—

- 27. 1.49.—Isabelita Alonso, soprano; Henry Bronkhurst, piano.
- 24. 2.49.—The Windrush Orchestra.
- 31. 3.49.—Douglas Hemmings, baritone; Cicely Hoyer, piano.
- 19. 4.49.—John McKenna, tenor; Margaret Norman, piano.
- 26. 5.49.—Jean Merlow, piano.
- 30. 6.49.—Harold Fairhurst, violin; Reginald Paul, piano.
- 28. 7.49.—Philip Hattey, bass-baritone; Sheila Mossman, piano.
- 25. 8.49.—Rosemary Pfaendler, 'cello; Marian Hirst, piano.
- 29. 9.49.—Mary Bonin, soprano; Bruno Raikin, piano.
- 27.10.49.—Lambert Flack, flautist; Enid Taylor, piano.
- 24.11.49.—John McKenna, tenor; Margaret Norman, piano.
- 22.12.49.—Nora Gruhn, soprano; Hubert Greenslade, piano.

Arrangements have been made with the Arts Council of Great Britain to borrow gramophone records, and recitals will be given on the second Thursday of each month by Charge Nurse Bowen.

The Basingstoke Choral Society gave a very enjoyable programme on June 9th.

Dr. deZilwa has continued to direct the Art Studio, and many patients have produced work both of psychiatric interest and artistic merit. This department is open daily, mornings and afternoons, and patients can choose to paint in water colour or oils, make compositions in pencil, charcoal or pastel. Nurse Stubbart is available to give guidance on technique two afternoons a week, but the principle adopted is not to force advice or ideas on to any patient, rather to encourage him to express himself in his own natural manner. Many styles of drawing and painting can be seen in the studio collection, varying from crude realism to the most bizarre surrealism. The subject matters of such pictures have proved interesting topics of discussion at clinical conferences. However, apart from their value in revealing psychodynamics or in hinting at a diagnosis, many patients undoubtedly benefit from this artistic activity. Latent talents are stimulated and once the patient's interest is roused he is helped to awaken to other aspects of life. Even chronic, institutionalised patients have benefited. Undoubtedly this department is worthy of extension, and I hope in due course will have more adequate accommodation. We are again indebted to the British Red Cross Picture Library Scheme for arranging a course of monthly lectures by Mr. Clare on the Italian School of Art. Reproductions of classical paintings were loaned for exhibition.

In July Mr. Eric Benfield commenced a Sculpture Class on Tuesday and Friday afternoons. Works of remarkably high merit have been produced, though no member of the class had any previous experience. The general remarks noted above concerning the value of drawing and painting apply equally here, as indeed to all artistic activities. On October 17th Mr. Benfield took his class to see the Duke of Wellington Art Exhibition at the Basingstoke Museum.

Dr. Kelsey has continued to direct the Dramatic Group, and two revues were produced: "Patients on Parade" in April, and "Christmas Crackers" in December. The behaviour of patients at rehearsals proved psychologically enlightening, they benefited by various modes of expression, and of course gave pleasure to large audiences.

Dramatic interest has been stimulated by the visits of several outside dramatic groups:—

March 9th: "Merchant of Venice", Dramatic Society of Girls' High School and Queen Mary's Grammar School.

May 23rd: "Murder No Object", North Warnborough Women's Institute; "In Waltz Time", Hartley Wintney Women's Institute.

On November 17th a party of female patients went to see the Grange Players produce "Tons of Money" at the Grand Theatre, Basingstoke.

The Donna Roma Ballet gave an enjoyable programme on January 8th.

RECREATIONAL THERAPY

The sessions of organised items for the year are summarised as follows:—

Cricket and football, 75; badminton, 34; dances, 50; cinema, 33; whist drives, 11; chess, 10; social evenings, 12.

The Social Evenings, when male and female patients meet in one of the wards for an impromptu concert and dance, have become increasingly popular.

Invitations for home and away cricket and football matches were sent to all mental hospitals in the South-West Metropolitan Region, and fixtures were accepted by Banstead, Brookwood, Graylingwell, Knowle, Long Grove, St. Ebba's, St. James and Springfield Hospitals. Matches were also arranged with Fairmile, Littlemore, Roundway and Tatchbury. The figures below show that we fared better at football than cricket:

Football					
<i>Played</i>	<i>Won</i>	<i>Lost</i>	<i>Drawn</i>	<i>Goals for</i>	<i>Goals agst.</i>
15	10	4	1	62	30
Cricket					
<i>Played</i>	<i>Won</i>	<i>Lost</i>	<i>Drawn</i>	<i>Runs for</i>	<i>Runs agst.</i>
16	6	9	1	1779	2009

The away matches have proved particularly popular, involving as they do a pleasant bus drive and an opportunity for the team, 19 other patients and two or three nurses to make some contacts at other hospitals. Not infrequently the party is asked to stay for a cinema or dance, and I would like here to express thanks to all the hospitals who have afforded us a uniformly pleasant reception.

Parties of patients went to County Cricket Matches at Bournemouth and Southampton.

The female patients had several sea-side outings to Southsea, Hayling Island, Worthing and Milford.

The two new tennis courts laid out next to Pinewood House, the two renovated putting greens and croquet lawn on the cricket field, have been much appreciated.

The Chairman and Vice-Chairman were present at the Annual Fete and Sports held on June 23rd. Over 700 patients were out on the Recreation Field in the fine weather to enjoy the races, side shows and dancing.

The Ward Gardens Competition was judged by Dr. Rowe on August 2nd. The Humphreys-Owen Cup and first prize were awarded to Ward M.2.

The Christmas Festivities included a Patients' Revue, a Staff Variety Concert, singing by the Basingstoke Choral Society and a Fancy Dress Ball. When Mr. Hales and I went round the wards, we received many appreciatory comments from patients on the excellence of the Christmas fare.

RELIGIOUS SERVICES

The Chaplains have continued to minister to the spiritual needs of the Church of England, Roman Catholic and Non-Conformist congregations. Their annual reports appear separately.

LIBRARY

The Rev. Fraser Bowen has continued to render most valuable service as Librarian. There has been an exchange rate of over 15,000 books, the losses and damages amounting to less than 200.

The London Red Cross Headquarters opened with us a new system of 100 books on loan for the Continental staff. The Winchester Headquarters have been able to supply us with approximately 100 books specially requested by staff and patients, and two very acceptable bequests of a wide assortment and range were given to the Library by Mrs. Humphreys-Owen and Mrs. Colin Davy.

We are indebted also to the British Red Cross Voluntary Workers for their help, arranged by Mrs. Bertram.

PHYSIOTHERAPY

Mrs. Dorph Petersen commenced two sessions weekly on June 14th, 1949. Treatments included massage, exercises, faradism, wax baths, radiant heat, infra-red, ultra-violet, and re-education in walking. Altogether 1,129 treatments were administered to 39 patients.

OPHTHALMIC SERVICE

We are indebted to Dr. Romanes of Rooksdown House for examining and advising concerning many patients and staff referred to him.

CHIROPODIST

Mrs. Slinger held weekly sessions, alternately for the male and female sides, on Mondays. The number of foot treatments was 471.

VISITING CONSULTANTS

The following additional consultants were appointed:—

Dermatologist: A. S. Hall, Esq., B.Sc., M.D., Ch.B.(Liverpool).

Gynaecologist and Obstetrician: P. R. Mitchell, Esq., O.B.E.,
T.D., M.B., Ch.B., M.R.C.O.G.
Ophthalmic Surgeon: J. A. Robertson, Esq., M.B., B.S., D.O.M.S.
Pathologist: C. H. Wrigley, Esq., M.A., M.D., B.Ch.(Camb.),
M.R.C.S.(Eng.), L.R.C.P.(Lond.).

A summary of operations performed is as follows:—

Mr. Wylie McKissock and Mr. Dawes, 15; Mr. Troup, 12; Mr.
Golden, 4; Mr. Rubin, 2; Mr. Hunter, 1; Mr. Robertson, 1;
Dr. Penny, 1; Dr. Peter, 2.

In addition Dr. LeMarquand, Mr. Troup, Mr. Golden, Mr.
Rubin and Mr. Midgley, visited to give advice on request. Dr. B. L.
Lloyd visited regularly to review and advise on cases of tuberculosis.

MEDICAL STAFF

Dr. B. Fife resigned to take up a post in Bracebridge, and Dr.
C. S. Trzaski, M.B., Ch.B.(Cracow) commenced as House Physician
on March 7th. Drs. Todd and Sikes passed the D.P.M.(Lond.) final,
and Dr. E. R. Jones passed Part I of the D.P.M. (R.C.P. and S.I.).

It was with deep regret that we learned of the death of Dr. E.
O'Neill who had been an excellent officer and a most pleasant
colleague.

On September 27th Dr. Slorach addressed the Business Women's
Club in Basingstoke on "Some Aspects of Modern Psychiatry". An
article by Dr. Atkin on "Physical Factors in Mental Disorders" was
published in the Medical Press.

Dr. Kelsey was appointed Chairman, and Dr. Trzaski Secretary,
of the Medical Staff Committee.

Clinical meetings of great interest continue to be held weekly.
The Reference Library has received many useful books.

NURSES' TRAINING SCHOOL

In November the decoration and furnishing of the two lecture
rooms, demonstration and study rooms, in Pinewood House, was
completed and the School moved into the extremely satisfactory new
quarters.

Mr. Hopwood has continued his duties as Tutor in a most able
manner. Three preliminary courses were held during the year, each
consisting of 97 lectures by the Tutor, and examinations of the
students were carried out by the Matron, the Chief Male Nurse and
the Physician Superintendent. Lectures for the R.M.P.A. and State
Examinations were given by the Tutor, Drs. Slorach, Kent, Jones and
Kelsey. The high standard of teaching is reflected in the results: 15
out of 24 passed the Preliminary State Examination, and all the Final
Examination candidates (4) were successful.

At the end of the year, the number of nurses in training was
56, and an Assistant Tutor will have to be appointed.

The essential equipment of the School is completed. More books will be added to the Reference Library, and it is hoped to obtain a Film Strip Projector in the near future.

NURSING STAFF

In spite of persistent advertisement, the position has not improved—the best that can be said is that we have barely succeeded in making good our losses during the year. On the male side 31 left and 32 joined; on the female side 53 left and 48 joined (20 British and 28 Continental). The part-time staff increased by five. The complement at the end of the year was (the figures in brackets being those qualified):—

	<i>Male</i>	<i>Female</i>
Full time	97(61)	83(17)
Part time	—	44(13)

Of the 83 full-time female staff, 43 are Continental: French, Norwegian, Latvian, Belgian, Swiss, Danish, Austrian, Polish, German and Estonian. To them, and to the part-time staff, especially those who are qualified, we are indebted for being enabled to open more wards. Ten orderlies and six ward maids are employed to relieve nursing staff of the more domestic duties.

The following promotions and appointments were made:—

Senior Assistant Matron: Miss M. Boulding.

Assistant Matrons: Miss Whitcher and Miss Stewart.

Night Superintendent: Miss Fox.

Assistant Chief Male Nurse: Mr. Wright.

Sister: Mrs. S. Bowen.

Charge Nurses: Messrs. Tunstall and Rowsell.

It is with regret that I have to record the deaths of Nurses O. Jackson and W. Foy, who have served the hospital so well for many years; also Mr. W. Fursman (builder's labourer).

The Matron has been selected to represent mental hospitals on the South West Metropolitan Regional Hospital Board Nursing Advisory Committee. To her and to the Chief Male Nurse great praise is due for organising the nursing services under the persistent handicap of staff shortage.

STAFF SOCIAL CLUB

The Committee (Chairman, Dr. Slorach; Secretary, Mr. Lorimer), are to be congratulated on having arranged another year's successful activities of dances, whist drives, theatre trips to London, badminton and table tennis matches, etc. First-rate dance music is available and one of the most successful functions was held on November 25th, when Oscar Rabin's band was engaged.

On August 6th a Staff Garden Party was held at which the Mayor and Mayoress of Basingstoke, Mr. and Mrs. Barnard, Mr. and Mrs. Dicks, and Dr. Rowe were present. The Social Club Cup was won by Dr. Slorach, the Chester Tankard for the best exhibit by Mr. Allen, and the Humphreys-Owen Cup for the best cottage garden by Mr. B. T. Adams. A very happy afternoon was rounded off by an enjoyable dance in the evening.

MISCELLANEOUS

A committee to represent all the departmental staffs of the hospital (medical, nursing, clerical, engineering, farm and garden, laundry, domestic, orderlies) was elected. It is felt that such a committee could supply, in a co-operative manner, recommendations to the benefit of the hospital.

We have had to say goodbye to three retired members of the staff: Mr. A. Bushell (painter), Mr. J. W. Duffin (shoemaker), and Mr. A. P. Speiser (engineer's storekeeper). Our best wishes go to them for many happy years of retirement.

CONCLUSION

It gives me pleasure to express thanks to all officers and staff for working unitedly in the service of this Hospital. I am indebted to Mr. Hales for relieving me of many administrative duties, and to all the Medical Officers I wish to render praise for their continued enthusiasm.

To you, Sir, and the Members of the Management Committee, I tender my sincere thanks for your continued confidence and for your great interest in the development of this Hospital.

I have the honour to be, Mr. Chairman, Ladies and Gentlemen,

Your obedient Servant,

I. ATKIN,
Physician Superintendent.

PLASTIC AND JAW UNIT, ROOKSDOWN HOUSE

ANNUAL REPORT OF THE MEDICAL SUPERINTENDENT

Mr. Chairman, Ladies and Gentlemen,

I have the honour to submit the annual report of this Hospital for the year ended December 31st, 1949.

During the past year, many "ups and downs" have been experienced in this Plastic and Jaw Unit. In the early months of the year it was decided by the South-West Metropolitan Regional Hospital Board that as soon as suitable accommodation for the Unit could be secured elsewhere in the Region, the Unit would be moved and Rooksdown handed back to the Mental Hospital.

This decision was published in the Press and caused a certain amount of unrest amongst the staff, many of whom considered it in their interests to look about for more permanent employment. Efforts were made to bring to the notice of all concerned, the fact that the proposal was to move the Hospital when the time comes, as a complete working Unit, and that re-employment for the vast majority of those working at Rooksdown, who wished to remain with the Unit, would almost certainly be offered. This had the effect of checking to a certain extent the unrest that had arisen.

As a result of this decision of the Board, all additions to the Hospital and reconstruction work, including new Theatres, X-ray and Photograph Departments, which had been approved, were cancelled as an economy measure and the existing departments had to be overhauled and improved as far as possible from our own resources.

Owing mainly to the continued deterioration in condition of walls, ceilings and paint-work, the infectivity rate rose to such a high figure that the Senior full-time Surgeon, Mr. Barron, reported to the Regional Board and to this Committee, in April, that he considered it necessary to limit operations to emergency work until some reconditioning of wards, dressing rooms and Theatres could be undertaken. Just prior to this, the Matron left Rooksdown to get married, and though we were extremely fortunate in securing the services of Miss Cook, who was appointed to fill the vacancy, it took her some time to pick up all the threads and make her presence felt.

This combination of adverse factors, occurring at a time when Sir Harold Gillies, our Senior Consultant, was away on extended sick leave, caused a spirit of despondency to descend on the Unit and the usual cheerful atmosphere of Rooksdown was very much

in eclipse for a period. However, the measures taken to overcome infection, including repainting of the Children's Ward, Theatre and Ward Surgeries, on the authority of this Committee and the provision of vacuum cleaning, bore fruit. Sir Harold Gillies returned to full duty and morale rose once more to a high level.

At the end of October, Mr. Barron asked me to report to this Committee that the high incidence of infection had fallen markedly and that all surgical restrictions could be considered at an end. Pending redecoration, the available beds have been reduced to 102, and this figure will have to be reconsidered when this redecoration is complete. The year closed with a visit from the Contractor and the welcome news that the painting of the Hospital would definitely commence in early January.

The number of patients who have received treatment during the period under consideration was 1,055, with an average length of stay in hospital of 21 days, a reduction of seven days on the previous year.

The total bed complement was reduced for reasons above described, from 160 to 102.

The average daily number of beds occupied was 74.

The total out-patient attendances were 3,071, an increase of 653 on last year.

New out-patients numbered 602.

The number of major operations performed was 1,218, a reduction of just over 100 on the previous year.

Emergency admissions were 200, which was an increase of 50 on 1948. Of these—

44 were burns;

88 were jaw cases;

68 other fractures and general plastic injuries.

The Plastic and Jaw Unit at Odstock was opened on November 21st, and three of the Rooksdown staff, i.e., Mr. Barron (Plastic Surgeon), Dr. Mita Barnes (Anaesthetist), and Mr. Dalling (Dental Surgeon), were transferred on that date to the new Unit.

Training. Four foreign Plastic Surgeons, i.e., from America, Yugoslavia, Czechoslovakia and Belgium, completed the twelve-months' course. Dr. Kristensen (Denmark), commenced a ten-months' course on October 5th.

A revision course for Final Fellowship in Dentistry was held in March. Nine attended the course, of whom seven sat for the Fellowship examination, six being successful.

The three-month courses for six R.A.M.C. Orderlies have continued throughout the year.

Children's Ward Schooling. For some time the possibility of arranging some school teaching for the children patients, of school age, has been under consideration and correspondence with the Educational Authorities has been taking place. These proposals have at last borne fruit and on September 19th the teaching scheme was put into effect. Two teachers have been daily in the children's ward from 4 p.m. to 6 p.m., Monday to Friday, and given tuition to a varying number of children, averaging seven. The scheme is working well and is appreciated by both staff and patients themselves. The teachers have proved tactful and have blended well with hospital routine.

The Rooksdown Club Re-Union was held on June 25th under perfect weather conditions. Approximately 400 members attended, patients and ex-patients, many accompanied by their wives. Amongst the guests was the Chairman of the South-West Metropolitan Regional Hospital Board, who, after the Annual General Meeting which was held in the open on the lawn, gave a brief address. The Re-Union finished up with a most successful dance in the Alexandra Pavilion.

Rehabilitation. This department, under the care of the Rehabilitation Officer, has established itself and is now an integral part of the Hospital Service.

The Rehabilitation Officer is fully occupied in dealing with the many applicants for help, which cover training, re-establishment in suitable occupations, settlement of domestic cares, financial difficulties, in fact all phases of life where satisfactory treatment eases the patient's mind and results in greater medical co-operation and speedier recovery.

The Surgeons freely consult the Rehabilitation Officer and there is a complete interchange of confidences regarding the treatment of patients.

Apart from the usual routine settlement work, the Rehabilitation Officer has been able to use influence in securing preferential passages overseas for patients who would otherwise have had to wait months for same, and in one case the wait would have been over three years.

There is still a very great need for a practical Rehabilitation Shop, where mechanical and practical work could be undertaken, the success of which can be gauged by those that are already operating in other parts of the country. The provision of such a department could and would be a tremendous help in extending the work of rehabilitation as recommended by the Ministry and would materially assist the turn-over of beds.

The Anglo-Swiss Red Cross convalescent scheme, in the course of winding up, was able to arrange three small parties for a month's convalescence at Weggis, on Lake Lucerne. Eight Rooksdown patients were included in these parties, conveyance being by air as in the previous year. It is much regretted by all that this scheme is now finally at an end.

The second Red Cross car referred to in the last annual report has not been replaced. The one remaining vehicle, though now showing signs of wear and proving a constant expense to the Comforts Fund, has been very much in demand and has run regular outings for patients ; picnics, river bathing parties, etc., in the summer, and attendances at football matches mainly, in the winter months.

I have the honour to be, Mr. Chairman, Ladies and Gentlemen,

Your obedient Servant,

(Signed) A. E. PANTER,

Air Vice Marshal (Rtd.),

Medical Superintendent.

REPORT OF THE COMMISSIONERS OF THE BOARD OF CONTROL

COMMISSIONERS' REPORT

June 16th, 1949

This Hospital enjoys the advantages of modern buildings and energetic and enterprising administration. Like nearly all mental hospitals it still suffers from shortage of suitable nursing staff, particularly on the female side.

The Hospital forms the main member in a group which includes Rooksdown House—at present used as a plastic surgical unit—Wimble Hill House, Crondall and Kingsclere Infirmary. The new Hospital Management Committee has been fortunate in acquiring the services of the Chairman and a number of the members of the former Visiting Committee.

Apart from Rooksdown House, the whole of the hospital buildings have now been made available for their normal purpose but Villa 2 is temporarily used by nursing staff from Rooksdown House, Villa 6 is used for occupation therapy, K Ward is used for the Preliminary Training School for nurses, G Ward is used for sleeping purposes only in the absence of sufficient staff to open the ward, and H Ward is only partly used for the same reason. The Nurses Home is full and if the additional nursing staff required for these wards, when they once more receive patients are to be resident, the enlargement of both male and female nursing quarters will be necessary. There were, Dr. Atkin told us, approximately two hundred and forty patients yet to be returned to Park Prewett from other hospitals.

The numbers in residence on the first day of our visit were 1,241, or 651 male and 590 female patients: in addition 2 male and 1 female patient were absent on leave. The nursing staff available for the care of these patients amounts at present to 103 men and 87 women employed upon full-time, and 29 women employed upon part-time duties only. Of the 87 women employed full-time a large number are Scandinavian, French or other foreign origin: in spite of language difficulties, which are being overcome by instruction, the work of these nurses is said to be good.

The villas and the wards in the Main Building were bright and clean. They do not all reach the standard set by Pinewood House in the matter of furniture but nearly everywhere new armchairs were to be seen and the old furniture is gradually to be replaced. In Pinewood House and the wards for younger women of the convalescent or non-acute type at least one full-length mirror would probably be a

useful aid to restoring self-respect and in any event would be appreciated. The statutory notices informing patients of their rights as to correspondence with certain authorities or persons should be displayed at some point in every ward.

The women's clothing was modern and reasonably varied; many patients, of course, wear their own garments. But the frocks and underwear issued by the hospital together with all other articles of clothing or bedlinen are marked by the ink process which is both unsightly and harmful to the material. A certain number of articles acquired from the E.M.S. are already threadmarked, though not to the Park Prewett Hospital, but these appeared to be the only ones. The Hospital already possesses a thread-marking machine and all clothing or linen which is new or to be re-marked should, we think, be treated in this way. Our observations apply also to articles of male clothing.

The outlying units are served by their own kitchens so that the disadvantages of transport of hot food do not arise. In the Main Building, however, they do, and we understand that some more satisfactory method of conveyance than the present E.M.S. surgical dressing trolleys is to be found. It is only right to say, however, that no patient complained of receiving cold food which should have been hot, and the hot plates in each ward appeared to be working satisfactorily. The food itself was highly spoken of by the many patients whom we questioned on this subject. In Pinewood House and the Villas refrigerators have been provided.

The Occupation Therapy Department in Villa 6 is in the charge of a qualified therapist together with an assistant. Men and women work in the same rooms and care had evidently been taken in the selection of patients for whom occupation was likely to be really valuable. There is a separate room devoted to the Art Section. Shortage of nursing staff has so far prevented the organisation of occupations in the wards.

Recreations include weekly dances and cinema shows. Provision for outdoor sports includes two new tennis courts for patients. The Social Club in Pinewood House is managed by the patients themselves and the programmes include dances, table tennis, whist drives, gramophone recitals and the like: country rambles are also organised.

The library has a stock of 4,750 volumes which are well classified. The Chaplain to whom we spoke during our visit acts as Librarian. The need for a reading room is felt, and the subject is receiving consideration.

During 1948 the number of patients who died amounted to 64 (37 males and 27 females), giving a death rate of 5.6%, a figure below the mean death rate of 6.33% for all former county and borough mental hospitals. Post-mortem examinations were performed in 37 instances. The principal causes of death were heart disease (including

arterio-sclerosis), 22; pneumonia, 11; and cerebral thrombosis or haemorrhage, 7. Two patients of each sex died from tuberculosis.

Since the last visit there has been an inquest on a male patient who was found to have died from natural causes.

During the period under review 13 patients have sustained fractures and there has been one dislocation. Seven of these injuries were due to falls or to other accidental causes, five occurred through altercations with fellow patients, one resulted from an epileptic fit, while in the remaining case the patient concerned threw himself out of a deck chair on to the concrete floor of a verandah. In addition a voluntary patient on extended parole had his feet amputated by an electric train while trying to cross the main line near Basingstoke.

Last year eight patients (six males and two females) were notified as suffering from tuberculosis, and four men and two women remain under treatment for this disease. Verandahs are available for open-air treatment and such cases are nursed in Villa 5 on the male side and in Ward A on the women's side. A radiographer attends weekly and all suspected cases are X-rayed as well as old cases at three-monthly intervals. New entrants to the staff are X-rayed on joining. A radiologist who attends at least fortnightly interprets the plates, and the County Tuberculosis Officer visits once a week in an honorary capacity and carries out artificial pneumo-thorax when required and advises on treatment.

Notifications of dysentery last year numbered four cases: one man and three women, and there were also six cases of severe diarrhoea. A further ten cases of dysentery occurred this year (eight men and two women): the Schmitz organism was the cause of the disease on the male side, while the two women were attacked by that of the Sonne type. There are also a few typhoid carriers and one paratyphoid carrier on the female side. These cases are being treated by cultures of *lactobacillus acidophilus*. The hospital laboratory is active and the work here includes bacteriological examinations of the intestinal contents of all new cases. Clinically recovered cases of dysentery are examined twice weekly until six negative results have been obtained, and the typhoid carriers are also subjects of investigation. Bio-chemical, histological, and haematological examinations are included in the laboratory's activities.

At the time of our visit there were 97 patients undergoing treatment in bed (28 males and 69 females). All appeared to us to be receiving good nursing care and attention.

Special forms of treatment include electric convulsions, given in certain cases with curare, narco-analysis, hypnosis, prolonged narcosis and insulin shock. The operation of pre-frontal leucotomy is employed in suitable cases. There are insulin units on both sides of the Admission Hospital, where from six to eight patients of each sex are treated at a time. There is also another insulin unit in Male Ward 4 where

about five patients are treated by the intravenous method. We were interested to learn that a part-time physiotherapist has been employed to take up duty shortly and in the meantime a small department is being equipped for physiotherapy. The Dentist attends once a week for a full day.

Case conferences are held weekly by Dr. Atkin and his medical officers and are found to be of great value.

Outpatient clinics are held weekly at Pinewood House, Aldershot Hospital, Andover Public Health Centre and the Royal Hampshire County Hospital, Winchester. Dr. Atkin attends by arrangement at Winchester Prison. Dr. Slorach is engaged one day each week on psycho-somatic work at St. Bartholomew's Hospital, London, while Dr. Todd and Dr. deZilwa attend Child Guidance Clinics in Basingstoke and Aldershot respectively.

We spoke to a large number of patients besides those to whom we gave private interviews. All, whatever the requests or complaints which they had to make, spoke highly of the care and treatment which they receive whilst they are here.

Dr. Atkin has to assist him Dr. Slorach as Deputy Medical Superintendent, Dr. Kent as Assistant Psychiatrist, Dr. Jones, Dr. Todd, Dr. deZilwa and Dr. Kelsey as Assistant Medical Officers, and Dr. Trzaski and Dr. Sikes as House Physicians. From all of those members of the staff who accompanied us in the course of our visit we received, as always, the most valuable assistance.

(Signed) H. R. GREEN.

R. G. ANDERSON.

Commissioners of the Board of Control.

THE CHURCH OF ENGLAND

CHAPLAIN'S REPORT

January 20th, 1950.

Mr. Chairman, Ladies and Gentlemen,

It is my happy duty to report that throughout the year the congregations at the Hospital Divine Service have been maintained at last year's attendances, fluctuating at between 250 and 350 at each Service. There has been, too, a marked improvement in the corporate conduct of these Services and it has been a real happiness to lead them all in Divine Worship.

Even more marked is the reverence which has accompanied the Services of Holy Communion and I would wish to continue a weekly celebration.

At the Pastoral visits to the Wards there has been without exception a courteous welcome, and I have very much appreciated the kindly help of the night sisters and staff when called to the Hospital at night, to the dangerously ill or to prepare and commend the dying.

The temporary Church has been restored and awaits the furnishing when the makers can release this. Meanwhile, a Church Society for work in Mental Hospitals has appointed me Warden and presented to us an oak Altar, Chancel furniture, a Silver Chalice, Paten and Vessels for use in the new Church.

So often overlooked, I would like to include in the Report a simple note of appreciation of the quiet dignity which is added to the Service, by the Male Staff responsible for conducting the funerals at the Hospital Chapel.

I am, Mr. Chairman, Ladies and Gentlemen,

Your obedient Servant,

(Signed) THOMAS FRASER BOWEN.

THE ROMAN CATHOLIC CHAPLAIN'S REPORT

January 28th, 1950.

Mr. Chairman, Ladies and Gentlemen,

I have the honour to present the annual report of the Catholic Staff and Patients.

The privilege of assisting at Holy Mass each Sunday at 6.15 a.m., throughout the year, has been maintained by approximately 70% of the Catholic Staff. The Feast Days, as previously mentioned in last year's report, were well attended.

It gave me great pleasure to sing the Midnight Mass on Christmas Eve night, the second time in the history of the Hospital. Over 130 were present to assist at "Christ's Mass"—in honour of His Birthday.

Each Monday Mass is said at 8.45 a.m., for the patients, giving them a weekly opportunity for the Sacraments. In visiting the wards to administer their spiritual needs and my pastoral visits, I have been given every assistance and help by the Staff.

In September, the International Guild of Catholic Nurses offered an affiliation to the Staff at the Hospital. The following month the Guild had its first meeting. Matron kindly made it permissible to invite all the other Catholic Nurses of the District. It is worthy of note that at one of the meetings, Dr. P. W. F. McIlvenna of Reading came and gave a most interesting and enlightening talk.

I remain, Mr. Chairman, Ladies and Gentlemen,

Your obedient Servant,

(Signed) J. W. LEVEY.

THE FREE CHURCH CHAPLAIN'S REPORT

February 28th, 1950.

Mr. Chairman, Ladies and Gentlemen,

During the past year services have again been held at 3 p.m., on Thursday afternoons, when patients have assembled in fair numbers in the Main Hall. The services have been conducted by the Free Church Ministers—serving on a rota—Baptist, Congregationalist, Countess of Huntingdon and Methodist—and it has been obvious to those officiating that the patients have wholeheartedly welcomed the opportunity of worship. Many of those present have taken a great interest in what has been said in the course of addresses, whilst all have had some share as they have joined in the singing. A word of appreciation should be said regarding the help given by the organists, who are always willing to play hymns particularly requested by the patients.

In addition, the Ministers have had conversations with many of the patients and, in some instances, have been able to render services of various kinds. Now that up-to-date lists of Free Church patients have been furnished, it is hoped that more systematic visitation of the wards will be possible.

Our gratitude is due to those responsible for making arrangements for our services and to all who have assisted us in any way during the year.

I am, Mr. Chairman, Ladies and Gentlemen,

Your obedient Servant,

(Signed) ERIC BOWER.
