PREFACE

THE Surgical Report consists of a Classified Table of Diseases and Injuries, followed by an Appendix.

In the Appendix cases are described individually and the results of treatment given. Where there is no statement of result it indicates that the patient's condition was improved. Cases treated by the Honorary Surgeons are referred to by their number in the Hospital Register, and those treated by the Staff of the Surgical Unit by their number in the Surgical Unit Records.

The notes of the Honorary Surgeons are bound in the order in which they are arranged in the Appendix.

D. C. CORRY,
Surgical Registrar.

C. W. FLEMMING,
Assistant, Surgical Unit.

March 1, 1928.

1927

This report deals with 1784 *patients* treated in the surgical wards during 1927.

**CLASSIFIED TABLE OF INJURIES AND
DISEASES**

This table shows opposite each disease or injury the total number of patients who were discharged or who died during 1927. In this table each patient appears only under one heading; but in the Appendix those who had more than one disease may appear more than once under different headings. Those who received treatment in the casualty or the out-patient departments are not included.

DISEASES OF THE PHARYNX AND LARYNX.

TONSILS AND ADENOIDS.

- M. 3358. Peritonsilar cellulitis. Subsided.
- U. 4375. Tonsilectomy.

MALIGNANT DISEASE.

Oropharyngeal Carcinoma.

T. 1153. Tonsil spreading palate and pharynx. Excised with upper deep cervical glands by superior lateral pharyngotomy. Died. *Post-mortem* 119. Broncho-pneumonia.

T. 28. Glosso-epiglottic fold. Excised with epiglottis by median division of jaw and tongue.

T. 2671. Tonsil. Radium.

T. 2815. Tonsil spreading to pharyngeal part of tongue. Excised with upper deep cervical glands by superior lateral pharyngotomy.

W. 790. Glosso-epiglottic fold, infiltrating epiglottis and base of tongue. Bilateral gland dissection. Laryngectomy with base of tongue. Two-stage. Died. *Post-mortem* 88. Broncho-pneumonia.

M. 112. Tonsil. Unilateral gland dissection. Excised by superior lateral pharyngotomy. Two-stage.

M. 2653. Readmission 112. Recurrence in glands excised. Later inoperable recurrence.

M. 2415. Tonsil. Unilateral gland dissection. Excised by superior lateral pharyngotomy. Two-stage.

U. 4388. Readmission, November, 1926, with post-operative pharyngeal fistula following superior lateral pharyngotomy for carcinoma tonsil. Fistula excised. Healed.

MALIGNANT DISEASE—(continued).

Epilaryngeal Carcinoma.

- T. 3866. Ary-epiglottic fold. Excised with deep cervical glands by inferior lateral pharyngotomy. Recurrence in glands of opposite side. Excised.
 T. 3339. Readmission 3866. Inoperable glandular recurrence.
 W. 677. Ary-epiglottic fold. Inoperable.
 W. 1552. Same case as 677. Tracheotomy and gastrostomy.

Pyriform fossa Carcinoma.

- T. 699. Inoperable.
 T. 729. Excised with deep cervical glands by inferior lateral pharyngotomy. Inoperable recurrence in arytenoid region.
 T. 866. Lateral pharyngotomy, 1375/1926. Recurrence in upper opening. Excised by median split of jaw and tongue. Died. No *post-mortem*.
 T. 888. Glands excised. Died. *Post-mortem* 85. Bronchopneumonia.
 T. 969. Inoperable. Tracheotomy and gastrostomy.
 T. 1483. Explored. Inoperable.
 T. 1572. Explored. Inoperable. Tracheotomy and gastrotomy.
 W. 2261. Inoperable.
 W. 2901. Readmission 3428/1925. Inoperable glandular recurrence.
 W. 3328. Glands excised. Died. No *post-mortem*.
 W. 1540. Gastrostomy and tracheotomy. Died. *Post-mortem* 142. Secondaries in glands, lungs and liver.
 M. 2212. Explored. Inoperable.
 U. 4122. Excised by inferior lateral pharyngotomy. Secondary haemorrhage. Died. *Post-mortem* 21. Cellulitis of mediastinum and purulent bronchitis.

Hypopharyngeal Carcinoma.

- T. 9. Post-cricoid. Excised by lateral pharyngotomy. Inoperable recurrence in glands of other side.
 T. 905. Post-cricoid. Explored. Inoperable. Gastrostomy.
 T. 977. Post-cricoid. Excised by inferior lateral pharyngotomy.
 T. 1575. Post-cricoid. Excised by inferior lateral pharyngotomy.
 T. 2335. Post-cricoid. Explored. Inoperable-tracheotomy.
 W. 322. Post-cricoid. Excised by inferior lateral pharyngotomy.

Intrinsic Carcinoma of Larynx.

- T. 897. Recurrence following partial laryngectomy for carcinoma vocal cord, 1969/1926. Total laryngectomy.
 T. 2444. Readmission 897. Recurrence in glands excised.
 T. 2295. Readmission 897. Inoperable recurrence.
 T. 2932. Sub-glottic. Hemi-laryngectomy. Died. *Post-mortem* 217. Broncho-pneumonia.

MALIGNANT DISEASE—(continued).

Sarcoma.

- W. 226. Inoperable recurrence sarcoma tonsil, excised 2316/1926.
 W. 958. Nasopharynx. Inoperable. X-ray therapy.

DISEASES OF THE EAR.

- T. 4150. Acute mastoid. Schwartz's operation.
 M. 861. Acute mastoid. Schwartz's operation.
 U. 4097. Acute mastoid. Schwartz's operation.

DISEASES OF LUNG AND PLEURA.

EMPYEMA.

- T. 1792. Staphylococcus albus. Following artificial pneumothorax. Resection. Open drainage.
 T. 2500. Re-accumulation. Old empyema, 8 years. Drained. Culture sterile.

REPORT
OF THE
MEDICAL REGISTRAR
FOR
1927

EDWARD
HAROLD
REGISLAR

PREFACE

As in previous years this report deals only with cases admitted to the medical wards, the total number of such admissions for the year being 1827. The report is in two parts. Part I. consists of a series of statistical tables of diseases showing the number of each treated during the past year and arranged in a similar manner to that used in the Nomenclature of Diseases drawn up by the Royal College of Physicians. A patient suffering from more than one disease is entered again under the corresponding heading. Part II. is a case index arranged to correspond with the tables in Part I. The numbers used in Part II. are those by which a case is identified in the Medical Registrar's index and bear no reference to the Hospital registered number. The capital letter refers to the physician under whose care the patient was during his or her stay in Hospital.

The names of the physicians and surgeons are indicated by the following letters :—

- S. = Dr. H. Batty Shaw.
- P. = Dr. F. J. Poynton.
- B. = Dr. C. Bolton.
- E. = Dr. T. R. Elliott.
- L. = Sir. Thomas Lewis.
- G. = Dr. A. M. H. Gray.
- W. = Dr. F. M. R. Walshe.
- C. = Dr. W. Pearson (children).
- M. = Dr. J. W. McNee.
- Tb. = Any case finally transferred to the tuberculosis ward irrespective of the physician who was in charge of the case previously.
- W.T. = Mr. W. Trotter.
- G.W. = Mr. G. E. O. Williams.
- S.U. = Surgical Unit.
- E.K.M. = Mr. E. K. Martin.
- J.T. = Mr. J. Taylor.
- C.W. = Mr. C. White.
- O.U. = Obstetrical Unit.

The case sheets of patients are, as in 1926, no longer bound and are, with the exception of those of patients admitted under Sir Thomas Lewis, filed in the Records Office. The case sheets of patients admitted under Sir Thomas Lewis will be found in the Cardiological Department.

C. J. FULLER.
Medical Registrar.

DISEASES OF THE EAR.			
1. Otitis media	2	I	I
2. Mastoiditis	I	—	I
3. Ménière's syndrome	2	2	—
4. Labyrinthine vertigo	I	I	—

TABLE IV.—DISEASES OF THE CIRCULATORY SYSTEM.

Diseases	Cases Treated during 1927.		
	Total.	Discharged.	Died.
A. DISEASES OF THE HEART.			
I. Pericardium.			
1. Pericarditis	15	6	9
II. Endocardium.			
1. Infective endocarditis	13	6	7
2. Valvular lesions—			
(a) Mitral stenosis	105	94	11
(b) Mitral regurgitation	17	17	—
(c) Aortic stenosis	5	5	—
(d) Aortic regurgitation	32	28	4
III. Myocardium.			
1. Myocardial degeneration	30	22	8
2. Angina pectoris	12	12	—
IV. Disorders of Rhythm.			
1. Simple tachycardia	4	4	—
2. Paroxysmal tachycardia	3	3	—
3. Auricular flutter	4	3	1
4. Auricular fibrillation	60	55	5
5. Heart block	2	—	2
V. Congenital malformations	7	4	3
B. DISEASES OF THE ARTERIES.			
1. Hyperpiesia	33	30	3
2. Diseases of the aorta—			
(a) Syphilitic aortitis	3	1	2
(b) Dilatation	2	2	—
(c) Aneurysm	9	7	2
3. Syphilitic endarteritis	1	1	—
4. Monckeberg's degeneration	1	1	—
5. Diabetic endarteritis	5	4	1
6. Thrombo-angiitis obliterans	5	4	1
7. Coronary artery thrombosis	1	—	1
8. Acro cyanosis	1	1	—
9. Raynaud's disease	3	3	—
C. DISEASES OF THE VEINS.			
1. Thrombosis	7	7	—
2. Varicose veins	1	1	—

TABLE V.—DISEASES OF THE BLOOD, SPLEEN AND LYMPHATIC SYSTEM.

Diseases.	Cases Treated during 1927.		
	Total.	Discharged.	Died.
A. DISEASES OF THE BLOOD.			
1. Anæmia—			
(a) Chlorosis	1	1	—
(b) Pernicious anæmia	18	18	—
(c) Aplastic anæmia	1	—	1
(d) Pseudo leukæmia of infants	1	1	—
(e) Secondary anæmia	4	4	—
2. Polycythaemia—			
(a) Splenomegalic	2	2	—
3. Leukæmia—			
(a) Myeloid	4	3	1
(b) Aleukæmic	2	2	—
4. Purpura—			
(a) Simplex (2)

TABLE I.—GENERAL INFECTIVE DISEASES, INCLUDING ACUTE SPECIFICS.

1. DIPHTHERIA.

- S.—10 (acute nephritis), 51 (acute nephritis).
 P.—3 (chorea), 7 (pernicious anaemia), 58 (chronic nephritis), 84 (Graves' disease and chorea), 134.
 B.—25 (chorea).
 G.—3 (pityriasis lichenoides varioliformis), 10 (lupus vulgaris), 29 (pruritus).
 C.—9 (malnutrition ; bronchitis), 10 (bronchiectasis), 11 (lobar pneumonia), 21 (chorea).
 Tb.—33 (pulmonary tuberculosis ; artificial pneumothorax).

2. DYSENTERY (Amoebic).

E.—258.

3. ENTERIC FEVER.

- a. *Typhoid* :
 S.—210.
 P.—55 (Graves' disease, pericarditis), 222.
 b. *Para. B* :
 S.—118.
 P.—92, 192.
 B.—90, 313.

4. GONORRHOEA AND COMPLICATIONS.

- E.—47 (toxic psychosis ; fibroids).
 G.—12 (prostatic abscess ; epididymitis), 55 (gonococcal arthritis ; iritis), 20 (psoriasis), 81 (gonococcal arthritis), 87 (epididymitis with abscess), 94 (gonococcal arthritis. Readmitted, 95), 101 (urethritis).

5. INFLUENZA.

- S.—7, 175 (visceroptosis), 178 (osteoarthritis).
 P.—1, 40, 89, 123, 124 (pleurisy), 177 (angina pectoris).
 B.—1 (acute nephritis), 279.
 E.—75.
 G.—13 (impetigo).
 L.—9 (mitral stenosis).
 M.—11.

6. LEPROSY.

W.—5.

7. MALARIA.

S.—61 (? cirrhosis of liver).
 E.—32 (visceroptosis), 227.

8. MEASLES.

C.—45, 46, 48 (broncho-pneumonia), 91.

9. PYAEMIA.

B.—314 (malignant endocarditis. Lobar pneumonia, *post-mortem* 219).
 E.—244 (diabetes), 250 (liver abscess, *post-mortem* 213).
 L.—113 (influenzal pneumonia. Drainage of prostatic abscess. S.U. *Post-mortem* 175).

10. RHEUMATIC FEVER.

S.—100 (mitral regurgitation), 214 (mitral stenosis), 233 (mitral regurgitation).

P.—34, 37 (mitral stenosis), 46 (chorea), 66, 104 (pericarditis, *post-mortem* 94), 118 (mitral stenosis; bronchitis), 146 (colloid goitre), 151 (mitral stenosis; aortic regurgitation), 160 (bronchitis; mitral stenosis; readmission, (P.) 261, 1927), 208, 236 (mitral stenosis), 263 (mitral regurgitation).

B.—16 (mitral regurgitation), 35 (mitral regurgitation), 70 (mitral stenosis), 151 (mitral regurgitation), 177 (mitral regurgitation), 257 (mitral stenosis).

E.—115, 213 (mitral stenosis. Tonsillectomy), 224 (mitral stenosis; aortic regurgitation), 263.

L.—91.

C.—6 (mitral regurgitation), 42 (mitral stenosis; adherent pericardium), 62 (mitral stenosis).

11. SCARLET FEVER.

S.—17 (diabetes mellitus).

12. SYPHILIS.

a. *Congenital* :

S.—103, 116 (tabes dorsalis).
 E.—204 (bronchiectasis).
 G.—39.
 C.—25 (pseudo-leucæmia of infancy).

b. *Acquired* :

G.—79.

13. SEPTICÆMIA.

S.—56 (pleurisy with effusion).
 E.—123 (following tonsillectomy, *post-mortem* 169).

14. TUBERCULOSIS (generalised miliary).

S.—252 (*post-mortem* refused).
 P.—214 (*post-mortem* 130), 229 (pulmonary tuberculosis,
post-mortem 153).
 E.—269 (*post-mortem* 241).

15. WHOOPING COUGH.

S.—185 (broncho-pneumonia, *post-mortem* 129).
 P.—117 (diarrhoea), 129, 204 (diarrhoea).

TABLE II.—MENTAL DISEASES AND DISEASES OF THE NERVOUS SYSTEM.

I. MENTAL DISEASES.

1. *Mental deficiency.*
 P.—26 (diarrhoea, readmitted, P.—27), 73.
 C.—94 (mongol).
2. *Dementia præcox.*
 W.—46.
3. *Senile dementia.*
 B.—258.
 W.—84.
4. *Acute mania (toxic).*
 S.—253 (mitral stenosis).
 P.—180 (melancholia following influenza).
 E.—47 (gonorrhœa; fibromyomata of the uterus).

II. PSYCHONEUROSES.

1. *Anxiety state.*
 S.—3, 40 (mitral stenosis; purpura), 84 (constipation), 104 (tonsillectomy), 137, 155 (gastric neurosis), 221, 215 (albuminuria), 232, 302, 308.
 P.—272, 297.
 B.—30, 80.
 E.—83, 112, 125, 218.
 W.—19, 54, 60, 66.
2. *Hysteria.*
 S.—142 (self-inflicted wounds).
 P.—13, 274 (constipation), 245 (rheumatoid arthritis), 300.
 B.—59, 73 (artefact pyrexia).
 E.—48.
 L.—68 (visceroptosis).
 W.—16, 20, 26, 70, 83.
 C.—79 (dyspnœa).

II. PSYCHONEUROSES—(continued).

3. Obsessional state.

W.—2, 33, 54.

B.—276 (pseudologia fantastica).

4. Neurasthenia.

S.—250.

III. DISEASES OF THE MENINGES.

1. Pachymeningitis hæmorrhagica.

W.—88 (*post-mortem* 260).

2. Syphilitic meningitis.

S.—70, 108 (*post-mortem* 197).P.—237 (hemiplegia, Herxheimer reaction, *post-mortem* 203).

B.—267.

W.—72.

3. Acute leptomeningitis.

a. Tuberculous :

S.—76.

B.—226 (*post-mortem* 170), 204 (*post-mortem* 109).

b. Cerebro-spinal :

C.—72 (*post-mortem* 262).

c. Suppurative :

S.—95 (pneumococcal; carcinoma of the pancreas; mitral stenosis, *post-mortem* 89), 105 (otitis media, *post-mortem* 157).P.—225 (mastoiditis, cerebral abscess. Operation. Exploration by W.T. *Post-mortem* 194).B.—298 (pneumococcal; lobar pneumonia, *post-mortem* 247).C.—12 (influenzal bacillus, *post-mortem* refused).

IV. DISEASES OF THE BRAIN.

A. 1. Encephalitis.

W.—22 (chronic?).

C.—51 (*post-mortem* 201).

2. Encephalitis lethargica.

B.—109 (?), 246.

L.—164.

3. Cerebral abscess.

P.—225 (mastoiditis, meningitis. Operation. Exploration by W.T. *Post-mortem* 194).

4. Cerebral vascular disease.

a. Cerebral hæmorrhage :

S.—93 (hyperpiesia; hemiplegia. *Post-mortem* 67).E.—14 (hemiplegia), 190 (*post-mortem* 232), 183 (hemiplegia, *post-mortem* refused).

IV. DISEASES OF THE BRAIN—(continued).

b. *Cerebral thrombosis*:

S.—4, 143 (hemiplegia), 187 (hemiplegia; high pressure), 236 (hemiplegia, syphilitic), 257 (hemiplegia), 306 (syphilitic; hemianesthesia).

P.—28 (basilar, *post-mortem* 79), 38, 179, 225 (hemiplegia), 294 (hemiplegia).

B.—75 (syphilitic, hemiplegia; gangrene of toe; cystitis).

E.—28 (auricular fibrillation; broncho-pneumonia, *post-mortem* 29), 51, 113 (hemiplegia), 181 (hemiplegia).

L.—35 (aphasia, hemiplegia), 50 (hemiplegia), 143.

W.—17, 24 (hemiplegia, syphilitic), 25 (sensory monoplegia, syphilitic), 32, 44, 79 (hemiplegia).

M.—6.

c. *Cerebral embolism*:

P.—230 (myocardial degeneration, pulmonary embolism, *post-mortem* 160), 249 (hemiplegia, infective endocarditis, *post-mortem* refused).

E.—5 (hemiplegia; mitral stenosis, auricular fibrillation), 137 (hemiplegia, mitral stenosis, auricular fibrillation).

L.—2 (hemiplegia, mitral stenosis), 78 (mitral stenosis and auricular fibrillation).

d. *Cerebral arterio-sclerosis*:

W.—45 (epilepsy).

5. *General paralysis*.

P.—253.

E.—217.

W.—29 (*post-mortem* 19), 73 (*post-mortem* refused).

6. *Post-encephalitic syndrome*.

S.—124, 205, 308 (?).

P.—188.

L.—17 (parkinsonism).

W.—4 (ophthalmoplegia), 8 (parkinsonism), 59.

7. *Cerebral tumour*.

S.—89 (subtemporal decompression by W.T. *Post-mortem* 63), 99 ? (diabetes mellitus), 278 (secondary, primary carcinoma of bronchus, *post-mortem* 254).

P.—90 (*post-mortem* refused).

B.—126 (auditory fibroma; subtentorial decompression by W.T.; meningitis, *post-mortem* refused), 88 (mediastinal lympho-sarcoma, *post-mortem* 118), 268 (decompression E.K.M.).

W.—21, 35 (? cystic glioma of pons), 47 (cerebellar), 50 (pituitary).

IV. DISEASES OF THE BRAIN—(*continued*).B. 1. *Paraplegia.*

S.—272.

P.—247 (spinal caries).

W.—27 (senile), 36 (chronic osteomyelitis of spine, laminectomy by W.T., good result), 56 (osteo-arthritis), 67 (fracture-dislocation of 8th dorsal vertebra), 68 (aortic stenosis).

2. *Hemiplegia.*S.—93 (hyperpiesia, cerebral haemorrhage, *post-mortem* 67), 143 (thrombosis), 187 (hyperpiesia, thrombosis), 226 (syphilitic thrombosis), 257 (thrombosis).P.—237 (syphilitic meningitis; Herxheimer reaction, *post-mortem* 203), 249 (infective endocarditis, embolism, *post-mortem* refused), 255 (thrombosis), 294 (thrombosis).

B.—75 (syphilitic thrombosis; gangrene of toe; cystitis).

E.—5 (mitral stenosis, auricular fibrillation; embolism), 14 (haemorrhage), 113 (thrombosis), 120 (carcinoma of bronchus; aphasia, *post-mortem* 117), 137 (mitral stenosis, auricular fibrillation), 181 (thrombosis), 183 (haemorrhage, *post-mortem* refused).

L.—35 (aphasia, thrombosis), 50 (thrombosis), 2 (embolism, mitral stenosis).

W.—24 (syphilitic cerebral thrombosis), 79 (thrombosis).

3. *Hemianæsthesia.*

S.—306 (syphilitic thrombosis).

4. *Monoplegia (sensory).*

W.—25 (syphilitic cerebral thrombosis).

5. *Aphasia.*E.—120 (carcinoma of bronchus; hemiplegia; *post-mortem* 117).

L.—35 (cerebral thrombosis, hemiplegia).

W.—85 (hysterical).

6. *Paralyses of infancy.*a. *Cerebral diplegia:*

S.—44 (snake bite), 289.

P.—127.

C.—58 (broncho-pneumonia, *post-mortem* refused).

W.—75.

REPORT
OF THE
OBSTETRIC REGISTRAR

FOR

1927

REPORT

THE report of the Gynaecological Cases is arranged in a similar manner to that of 1925.

The arrangement of the Obstetric Cases has been changed so as to conform more accurately to the scheme of report suggested by the Committee for the Unification of Maternity Hospital Reports, appointed by the Section of Obstetrics and Gynaecology of the Royal Society of Medicine.

The great majority are booked cases.

In tables where details of each case are given the emergency cases are indicated by an "E" preceding the filing number. In tables where the number of cases occurring is summarized, a separate table has been given to show the treatment and result of emergency cases.

Further details of gynaecological cases in which radium was used can be found in the Harker-Smith Registrar's Report.

In the column under "Para" the number of previous viable children is given. I.S. = Interspinous. I.C. = Intercristal. E.C. = External conjugate. D.C. = Diagonal conjugate.
 In the "Method" column, if drug induction was tried first the number of times is given. "K" indicates inductions by Krause's bougies (stiff gum-elastic). This was sometimes followed by induction with a solid soft rubber stomach tube, or this method was used alone, as indicated in column "S". The bougie induction was sometimes followed by drug induction if it appeared to be unlikely to succeed, this is indicated in the second "Drug" column. If pituitary extract was used in induction this is mentioned in "Remarks." Under "Duration," column A indicates the time in hours from the first induction to the onset of labour pains; where more than one attempt at induction was made, column B gives the time from the last bougie induction. Information about past labours is given in brackets in the "Remarks" column.

PUERPERAL MORBIDITY (*including Mortality*).

The standard of morbidity taken is a temperature of 100·4° F. or more, sustained during a period of 24 hours, or occurring twice or more times during the time the patient remains in hospital after delivery. The temperature is taken twice daily in the mouth, or more frequently if it appears to be indicated.

54 patients reached this standard, the temperature in 34 cases being due to puerperal sepsis and in 20 cases to other causes.

Of the 34 septic cases 15 were booked patients, 5 were admitted from the district after delivery, 3 were emergencies, and 11 were abortion cases.

7 deaths occurred during the year, 6 booked cases and 1 emergency case; details of maternal deaths are given on page 140. The table below indicates the percentage morbidity in different groups of cases.

DETAILS OF MATERNAL DEATHS.

Case 20 (Booked).—Age 35. 13-para. Accidental haemorrhage (external and concealed). First bleeding occurred on district 5 hours before admission. On admission pulse 80, temperature 98°, uterus woody hard and tender, no albuminuria. Vagina plugged under anaesthesia, and abdominal binder put on. Plug removed 14 hours later, cervix half dilated, $\frac{1}{2}$ c.c. pituitrin given. Still-born foetus delivered $\frac{1}{2}$ hour later. Old blood clot passed with placenta, bleeding before and after delivery of placenta. Pituitrin given. Patient collapsed $\frac{1}{2}$ hour later, gum saline given intravenously. Death 1½ hours after delivery of placenta.

Post-mortem. Two large irregular tears on posterior surface of body of uterus, extending through peritoneum but not through muscle; number of haemorrhages into uterine muscle; left broad ligament infiltrated with blood clot, extending up to left kidney.

Case 65 (Booked).—Age 17, primigravida 36 weeks. Influenza broncho-pneumonia. On admission condition critical, resp. 60, pulse 160, temperature 102°. Delivered spontaneously of still-born foetus 24 hours after admission. Died 48 hours after delivery.

Case 133A (Emergency).—Age 29, primigravida, full term. General peritonitis. Failed forceps outside. On admission occipito-posterior presentation, contracted pelvis, contraction ring, foetus dead. Craniotomy performed. Death 19 days later.

Post-mortem. General peritonitis, gangrene of legs.

Case 338 (Booked).—Age 22, primigravida, full term. Pyæmia. Normal spontaneous vertex delivery 6 hours after admission. Liquor amnii very offensive at birth of child. 1½ hours after delivery patient had a rigor. Repeated rigors occurred. Blood culture negative. Death 29 days after delivery.

Post-mortem. Pelvic cellulitis, septic thrombosis of ovarian veins, bilateral purulent pleurisy.

Case 413 (Booked).—Age 37, 4-para, full term. General peritonitis. Previous labours. 2 forceps deliveries, 1 (?) induction, 1 normal labour (the last). Did not come to antenatal clinic when advised. Prolonged labour on district, contracted pelvis, high forceps delivery (difficult). Admitted 1 day after delivery, abdomen distended and rigid. Laparotomy, general peritonitis. Died 16 hours after operation.

Post-mortem. Tear of cervix extending into bladder; bladder wall partly gangrenous; general peritonitis.

Case 512 (Booked).—Age 37, 2-para, full term. Delayed chloroform poisoning. Two previous forceps deliveries. Hydramnios and large foetus, forceps delivery for foetal distress, shoulders impacted and delivered with difficulty, foetus still-born, placenta manually removed 1½ hours later. Prolonged chloroform anaesthesia for operations. Patient jaundiced next day; died on 5th day.

Case 807 (Booked).—Age 28, 1-para, full term. Pyæmia. Normal spontaneous vertex delivery. Temperature 99·2 on 8th and 10th days, otherwise below 99° till discharge on 12th day. Involution of uterus normal. Pain in right leg began on day after discharge. Readmitted 6 days after discharge, temperature 102·6, pulse 120, thrombosis of right femoral vein. First rigor on 26th day after delivery. Blood culture gave a growth of hæmolytic streptococci. Death on 40th day after delivery.

Post-mortem. Uterus subinvolved. Mass of septic clot in right common, internal, and external iliac veins projecting into vena cava. Multiple abscesses and purulent infarcts in lungs. Bilateral pleurisy. Polypoid vegetation on tricuspid valve.

FœTAL MORTALITY.

Of the 658 children born after more than 28 weeks' gestation, 40 were still-born; of these 20 were ante-partum deaths, and 20 intrapartum deaths. This gives a still-birth rate of 6·08 per cent. In addition, 20 of the children born alive died while still in hospital.

BREAST FEEDING.

Both 3-hourly and 4-hourly systems of feeding were used, in different wards or on different sides of the same ward.

MATERNITY DISTRICTS.

On the districts 1104 patients were attended, 940 by students and 164 by midwives. This shows a decrease on 1925, the last complete year in which the department was run on the old lines, when 1438 patients were attended. But the number of patients admitted in 1927 (excluding those delivered on the districts) was 767, as against 195 in 1925, showing a total increase of 258.

PUERPERAL PYREXIA.

Of 715 cases of which full details are available, 15 had notifiable pyrexia. This figure is probably too low, as temperatures were only taken once or twice daily, and not necessarily in the evening.

This figure is made up as follows :—

General peritonitis	1 (death in hospital)
Local uterine infection	5
Mastitis	2
Bronchitis	2
Pneumonia	1

275. Patient developed ureteral fistula; died 8 months later from bilateral pyonephrosis.

354. Patient died 3 weeks later from gangrenous cystitis. *Post-mortem* refused.

452. Recurrence 6 weeks later; treated with radium.

460. Good recovery.

525. Died from shock 10 hours after operation.

B. *Inoperable*—

(i) Examination.

16. Old case re-admitted. No recurrence.

17. Old case re-admitted. No recurrence.

59. Old case re-admitted. Inoperable recurrence.

331. Recurrence following Wertheim operation.

371. Inoperable recurrence following radium treatment.

(ii) Radium.

30, 125, 400. Readmissions for further applications.

39, 82, 88, 95, 123, 137, 152, 198, 219, 258, 289, 394, 401, 423, 434, 502, 506.

(iii) Radium and lead. 143.

(iv) Lead only. 46, 141, 250.

(v) Palliative treatment. 335.

(iv) Cervicitis.

411, 406. Palliative treatment.

130. Curettage.

190. Patient also had metritis and polyarticular rheumatism; panhysterectomy performed.

4, 222. Radium treatment.

(v) Endothelioma.

408. Local excision. Radium and lead treatment.

IV. DISEASES OF BODY OF UTERUS.

1. *Senile Endometritis.*

48, 72, 87. Curettage.

2. *Fibroids.*

(i) Palliative treatment, 3.

(ii) Curettage, 167, 239.

(iii) Vaginal myomectomy, 128, 172, 197, 268, 282, 290, 108, 462.

IV. DISEASES OF BODY OF UTERUS—(continued).

2. Fibroids—(continued).

- (iv) Vaginal hysterectomy, 252.
- (v) Sub-total hysterectomy, 18, 23, 31, 36, 66, 97, 103, 217, 224, 266, 288, 303, 427, 447, 519; U.C.H. No. 2158; 377 (patient died from pulmonary embolism).
- (vi) Panhysterectomy, 105, 116, 163, 173, 244, 302, 315, 317, 358, 421, 435, 285; 149 (patient died from broncho-pneumonia).
- (vii) Radium, 20, 90, 199, 220, 325, 340, 343, 386, 507, 538.

3. Adenomyoma.

- 99. Sub-total hysterectomy.
- 322. Panhysterectomy.

4. Endometritis.

- 418.

5. Carcinoma of Body of Uterus.

- 263, 448, 474. Panhysterectomy.

V. DISORDERS OF MENSTRUATION.

1. Spasmodic Dysmenorrhœa.

- (i) Palliative treatment, 238.
- (ii) Dilatation, 8, 324.
- (iii) Dilatation and curettage, 90, 177, 209, 231, 281, 312, 450, 464, 467, 504, 536.
- (iv) Dilatation and curettage and radium, 301.

2. Sterility.

- (i) Examination under anaesthesia, 274.
- (ii) Dilatation, 503.
- (iii) Tubal insufflation and dilatation, 32, 40, 45, 85, 136, 201, 205, 254, 265, 330, 331, 363, 370, 376, 439, 486, 487, 494, 541.
- (iv) Dilatation and Gilliam, 518.

3. Menorrhagia.

- 80. Transferred to nursing home.
- (i) Palliative treatment, 13, 153, 212.
- (ii) Dilatation and curettage, 26, 69, 96, 131, 139, 142, 194, 213, 230, 246, 311, 383, 442, 443, 451, 461, 473, 476, 489, 492, 500; U.C.H. No. 9552.
- (iii) Dilatation and curettage and radium, 9, 75, 305, 341, 472, 479.
- (iv) External application of radium, 124 (menorrhagia following Cæsarean section 2 years previously).

4. Subinvolution.

- Dilatation and curettage, 92, 113, 151, 215, 256, 313, 309, 351, 379.

V. DISORDERS OF MENSTRUATION—(*continued*).5. *Menopausal Hæmorrhage.*

- (i) Palliative treatment, 280.
- (ii) Diagnostic curettage, 6, 79, 271, 499.
- (iii) Curettage and radium, 41, 70, 107, 140, 156, 192, 323, 330, 332, 420, 430, 468, 497.

6. *Post-menopausal Hæmorrhage.*

- (i) Diagnostic curettage, 475, 478.
- (ii) Curettage and radium, 530.

VI. DISPLACEMENTS.

1. *Prolapse.*

- (i) Anterior and posterior colpo-perineorrhaphy, 14, 27, 51, 147, 164, 206, 207, 259, 328, 332, 345, 350, 359, 362, 372, 382, 416, 432, 472, 520.
- (ii) Posterior colpo-perineorrhaphy, 242, 314, 360, 375, 385, 399, 484.
- (iii) Anterior and post. colpo-perineorrhaphy and amputation of cervix, 33, 101, 343, 391, 428, 465.
- (iv) Posterior colpo-perineorrhaphy and amputation of cervix, 138, 204.
- (v) Anterior and post. colpo-perineorrhaphy and ventrifixation, 86, 152.
- (vi) Le Fort's operation, 64.

2. *Retroversion.*

- (i) Palliative treatment, 264.
- (ii) Replacement, 110, 438.
- (iii) Replacement and insertion of pessary, 2, 10, 41, 179, 187, 210.
- (iv) Curettage, 146.
- (v) Gilliam's operation, 94, 133, 158, 313, 378, 455, 469.
- (vi) Alexander-Adams operation (modified), 73, 160, 446, 471, 480.

VII. DISEASES OF FALLOPIAN TUBES.

1. *Ectopic Gestation.*

- (i) Palliative treatment, 65, 84, 288, 334, 366, 397, 436.
- (ii) Salpingectomy, 58, 111, 270, 279, 287, 292, 387, 405, 422, 458 ; U.C.H. No. 1165.

2. *Chronic Salpingitis.*

- (i) Examination, 311.
- (ii) Salpingectomy, 171.

VII. DISEASES OF FALLOPIAN TUBES—(*continued*).

3. *Tubo-ovarian Cysts.*
 - Salpingo-oophorectomy, 255, 272.
369 (sub-total hysterectomy also).
4. *Tubo-ovarian Abscess.*
 - (i) Salpingo-oophorectomy, 191.
 - (ii) Salpingo-oophorectomy and sub-total hysterectomy, 413, 417,
629.

VIII. DISEASES OF OVARIES.

1. *Chronic Oophoritis.*
 - 118. Palliative treatment.
2. " *Blood Cyst.*"
 - 38. Palliative treatment.
3. *Ovarian Cyst.*
 - (i) Innocent.
 - (a) Uncomplicated, 28, 47, 120, 150, 169, 161, 380/1926,
327/1926, 338, 342, 774; U.C.H. No. 896, ovariotomy,
320, 327, bilateral salpingo-oophorectomy and sub-total
hysterectomy,
223, ovariotomy and Gilliam's operation.
 - (b) Twisted, 274, 510, ovariotomy.
 - (ii) Malignant.
 - 271. Ovariotomy; patient developed femoral thrombosis,
but made a good recovery.
 - 299. Bilateral salpingo-oophorectomy and sub-total hyster-
ectomy performed. Removal was incomplete;
lead treatment was given subsequently.
 - 302. Bilateral ovariotomy and sub-total hysterectomy.
The left ovary contained an endometrioma.
 - U.C.H. No. 1072. Laparotomy; peritoneum and intestines
studded with secondary growth.
 - U.C.H. No. 3227. Laparotomy; extensive secondaries
present; patient died 24 hours later.
 - 294. Old case of carcinoma of ovary readmitted with chronic
obstruction. Palliative treatment.

IX. DISEASES OF PELVIC PERITONEUM AND PELVIC CELLULAR TISSUE.

1. *Acute Pelvic Peritonitis.*
 - 318. Palliative treatment.
2. *Sub-acute Pelvic Peritonitis.*
 - 200, 392, 491. Palliative treatment.

IX. DISEASES OF PELVIC PERITONEUM AND PELVIC CELLULAR
TISSUE—(continued).

3. *Chronic Pelvic Peritonitis.*

- (i) Palliative treatment, 56, 91, 109, 189, 237, 240, 349, 390, 429, 454, 481, 645.
- (ii) Operative Treatment.
 - (a) Salpingo-oophorectomy, 132, 166, 175, 241, 304, 338, 347, 395, 483; 89, patient died from shock 10 hours later.
 - (b) Salpingo-oophorectomy and panhysterectomy, 185, 334, 449.
U.C.H. No. 2001, patient died from general peritonitis 18 hours after operation.

4. *Endometrioma of Recto-vaginal Septum.*

- 407. Radium treatment.

X. DISEASES OF URINARY SYSTEM.

1. *Carcinoma of Urethra.*

- 336. Radium treatment.

2. *Carcinoma of Bladder.*

- 61. Palliative treatment.

3. *Pyelitis.*

- 84. Palliative treatment.

4. *Renal Colic.*

- 303. Palliative treatment.

5. *Retention of Urine.*

- 353. Palliative treatment.

XI. MISCELLANEOUS CONDITIONS.

1. *Congenital Abnormalities.*

- (i) Absence of uterus and appendages, 7.
- (ii) Double uterus, 15.

2. *Abdominal and Pelvic Pain.*

- (i) Pelvic Pain.
 - 49. Examination.
 - 68. Hysterectomy.
 - 570. Dilatation and curettage.
- (ii) Abdominal Pain.
 - (a) Constipation, 77, 439.

PREFACE

THIS is the first annual report of the In-Patient Department of the Royal Ear Hospital from the new building in Huntley Street, and the first statistical report of the Ear, Nose and Throat Department.

Patients were admitted to the Royal Ear Hospital in Huntley Street on February 27, 1927, so the report covers ten months.

The report consists of a Classified Table of Diseases of the Ear, Nose and Throat, followed by an Appendix, in which cases are described individually under the initials of the Honorary Surgeons, with their In-Patient numbers in the Hospital Register, except for Tonsil and Adenoid patients, where the total number of cases under each surgeon is alone given.

DOROTHY J. COLLIER,
Registrar, Royal Ear Hospital.

PATIENTS
Admitted during the year 1927
and still remaining in Hospital on December 31st, 1927.

Patients admitted in 1927 = 961.
Patients remaining in Hospital on December 31st, 1927, and
therefore not included in the following table = 18.
