President's Report

Dr. Harvey Cushing, Chief Surgeon since the Hospital was first organized in 1912, has reached the retiring age of sixty-three years and retires from the Staff this autumn, to the regret of the Board of Incorporators. We are greatly indebted to him for all he has accomplished at the Peter Bent Brigham Hospital. He has directed an organization which has treated our patients most skillfully and considerately. His teaching and example have drawn to the Hospital many young surgical leaders, who have contributed to the care, comfort and cure of our patients, and who have become in their turn teachers of surgery over this country. The medical world has made it known that Dr. Harvey Cushing is considered one of the great surgeons of all time.

It is the just pride of the Hospital that many men who have received a part of their education and experience in surgery and medicine in this Hospital have been called to positions of importance in other hospitals and in medical schools in this country.

MEDICAL

Hilding Berglund, Asst. Res. Phys., P. B. B. H., 1921-23; Assoc. in Med., *ibid.*, 1923-25; now Prof. of Med., Univ. of Minn., and Chief, Dept. of Med., Univ. Hospitals, Minneapolis.

John J. Morton, Surg. House Officer, P. B. B. H., 1913-14; Prof. of Surg., Univ. of Rochester, Rochester, N. Y.

PATHOLOGICAL

Charles L. Connor, Res. Pathol., P. B. B. H., 1925-26; now Prof. of Pathol., Univ. of Calif. Med. School.

Ernest W. Goodpasture, Res. Pathol., P. B. B. H., 1915-17; now Prof. of Pathol., Vanderbilt Univ.

This Hospital was founded under the terms of the will of Peter Bent Brigham of Boston "for the care of sick persons in indigent circumstances residing in the County of Suffolk." The Hospital constantly has in mind these provisions and never refuses admission to poor persons, citizens of Suffolk County.

The Hospital acknowledges with gratitude the gifts received, a list of which will be found on the pages

immediately following this report.

During the past year the following eminent physicians have served as temporary Chiefs of Service:

Lewellys F. Barker, Emeritus Professor of Medicine, Johns Hopkins University, and Visiting Physician, Johns Hopkins Hospital, served as Physician-in-Chief pro tem from April 21 to April 27, 1931.

Campbell P. Howard, Professor of Medicine, McGill University, Montreal, Physician to Montreal General Hospital, Montreal, served as Physician-in-Chief pro

tem from November 16 to November 21, 1931.

We are grateful to them for their valuable services,

their teaching and inspiration.

We thank the Ladies' Social Service Committee for all the good work which they have done for the Hospital

during the past years.

We regret to record the resignation of Mrs. Thelma Tubbs Currier, who came here as a student dietitian August 1, 1923, became assistant dietitian in 1924, and in May, 1925, was appointed Dietitian. She has been a highly efficient officer and did much to advance our dietary department.

We express our appreciation and gratitude for the faithful service rendered by the Staff and employees

during the past year.

CHARLES P. CURTIS. President.

DECEMBER 31, 1931.

EDMUND D. CODMAN, Treasurer.

Report of the Superintendent

THE eighteenth annual report of the Superintendent is submitted herewith.

From the standpoint of a hospital executive, a favorable hospital report would be one showing large numbers of patients admitted to all departments with good collections of normal hospital charges and good returns from the invested funds. On the other hand, a public health officer, reporting for the year's work, would consider he had submitted a good report if he was able to show that the general health of the people had been better than usual.

Nineteen thirty-one has been a bad hospital year because there were fewer admissions, poorer collections from the patients and smaller returns from the endowment fund. From the standpoint of public health with the country going through the second year of a profound financial depression, health conditions have been very favorable. The Metropolitan Life Insurance Company, in its statistical bulletin of January, 1932, says, "The 1931 health record of the millions of insured wage-earners in the United States and Canada, and their dependents, was the most remarkable of all time. It is true that their death rate was not at the absolute minimum. But, in spite of the most severe industrial depression of a generation, which lasted throughout the year, and in the face of a widespread epidemic of influenza during the first quarter, the 1931 death rate exceeded the previous minimum by only one per cent."

Reports from all sources indicate that the year was unusually healthy. Some have attempted to lay it to conditions arising out of unemployment, and it is generally conceded that the relief agencies have seen to it that children and invalids have been well nourished and their health unaffected by economic conditions. As an indication of the healthfulness of the year, the record of sickness among students in our School of Nursing is of interest. Never in the history of the School has there been so little time lost by the students on account of illness.

There were admitted to the wards 4,245 patients as compared with 4,341 in 1930. Patient's days treatment were 72,256 as compared with 77,852 the previous year. The average occupancy of all hospital beds was 80+% as compared with 86.5% in 1930. While running the hospital was less costly than the previous year, this difference was not sufficient to lower the daily per capita cost, owing to the lessened bed occupancy. This cost, based on the total expenditure in all departments of the hospital (excepting the amount paid graduate special nurses employed at the expense of the patient for special duty) was \$8.00 per day as compared with \$7.68 in 1930. Deducting the cost of operating the private ward and the out-door department, the per capita cost was \$6.63+; it was \$6.45 last year. The per capita cost of provisions for all persons supported was \$.43+ as compared with \$.49- in 1930. In the Out-Door Department, the number of new patients treated was 7,595 against 7,784 in 1930. The total number of visits in that department was 71,188, as compared with 76,523 the previous year. The loss in visits to the Out-Door Department during the year (about 5,000) led me to wonder to what this was due, as I feel the number of

return visits may be considered somewhat an index as to the quality of the work done in the Out-Door Department, or at least, satisfaction given to the patient. The Social Service Department received a small grant to make a study. One thousand records were selected at random to ascertain how many patients had failed to keep their return appointments. Of this number, it was found that 80%, or 800, had kept all appointments or had been discharged by the doctor. Twenty percent or 200 patients had failed to keep appointments.

Of these 200 patients, 81% did not return for such

reasons as the following:

27% moved, left no address.

25% felt their condition had improved.

19% could not be found.

15% wrong address given, not traced.

5% financial distress.

14% did not return for the following reasons:

6% felt they got no results.

5% because of some misunderstanding.

3% dissatisfied with treatment.

Of the remaining 5%, 2½% have died, 2% were receiving care elsewhere, ½ of 1% have been recommended for operation for which they were not prepared.

The Social Service Department also made an interesting study of the economic status of 239 families known to us through the cardiac clinic. Of the 239 families studied, the index used was whether this family was living within or below the standard budget prepared by the Nutrition Service of the Community Health Association. It was found that 80% of the families were living below the standards of this budget. Of these, 14 families of three were receiving \$10 per week for

part time work; 11 families had no regular income and were supported by relatives; 9 families received \$8 per week for part time work; 8 families had no regular income and had small savings or were supported by relatives.

The average daily cost per patient in the out-door department increased a little over a cent, from .71— to .72+. Further statistical information will be found in Table III on page 35.

We regret to record the death of one of our Trustees and a medical house officer during the year. Mr. Henry S. Howe, a charter member of the Corporation, died March 2. Mr. Howe had had a long experience as hospital trustee, both at the Massachusetts General Hospital and at this hospital since its beginning, and thus was a wise counsellor in hospital affairs. Dr. Horace M. Boyden died on February 3, after an acute illness, a streptococcic sore throat. From the start, it was seen that he was seriously ill, and the end came after only four days. His father, a physician in Portland, Oregon, flew from there to Boston in mail planes and regular passenger transports, arriving a day before his son's death.

We record with regret the resignation of our dietitian, Mrs. Thelma Tubbs Currier. Mrs. Currier's first connection with the hospital was as student dietitian; later, she became an assistant dietitian, and on May 21, 1925, was appointed as dietitian. By her ability and zeal, she advanced the work of her department, and it was with great regret on the part of all her associates here that her resignation was accepted on August 1, 1931. She was succeeded by Miss Gertrude McDonald. Miss McDonald also received her first practical dietetic work as a student here and came to us from the Beth Israel

Hospital where she had served a year as assistant dietitian.

The total special diet days for the year were 13,994, as compared with 11,920 last year. The outstanding special diets supplied were: Diabetic, 2,937; High Caloric, 2,564; Standard Nephritic, 977; Low Protein, 510; Sippy, 1,904; and Special Anemia Diets, 730. The selective menus adopted last year in the private ward have been successfully continued this year. Re-organization of the main kitchen, eliminating the matron and placing a chef in charge under a dietitian, which was started last year, has made for better food service. Twelve student dietitians have completed the six months course during the past year. The affiliation with the Boston Dispensary, which was a repetition of the students out-patient experience here, was discontinued. Work in the metabolic research laboratory at the Huntington Memorial Hospital, under Dr. Joseph C. Aub was substituted. This experience has proved beneficial.

During the year, 6,500 books were circulated from the patients' fiction library. One hundred and forty-eight books were given to the Library. Of these, 85 came from the Brookline Public Library; Mr. C. P. Curtis, President of the Corporation, 20; Mrs. Larz Anderson, 15; Dr. William Walker, 12; Miss Eleanor J. Chase, 9. Magazines and games also have been presented to the Library. Mr. William Amory gave \$25 to purchase books. One hundred and eighty-one foreign books have been loaned us by the Division of Public Libraries at the State House.

No physical changes in the hospital were made during the year as economy here, as almost everywhere, has been the main thought.

The co-operative spirit among the staff and workers of the hospital has been all one could ask. I wish to thank the Corporation for their continued support.

Respectfully submitted,

Joseph B. Howland, Superintendent.

DECEMBER 31, 1931.

DISTRIBUTION of the DOLLAR for 1931 .

Report of the Roentgenologist

Speaking of anniversaries, this is the tenth annual report of the present Roentgenologist, who voluntarily took upon himself the task back in 1922. Before that time the X-ray Department was not represented in that rather unique little book known as the "Annual Report." Since then I have tried to carry on the tradition of this hardy annual, or rather perennial, by presenting each year the news of the department, the developments, and such collateral comments and observations as seemed suitable. If I had realized the difficulties inherent in such annual reports, the desperate striving for something felicitous or unique or even mildly interesting, it might well never have been offered. Our department now has a growing list of graduates scattered around the country-our own family within the larger hospital family—and to these particularly this message is sent. In these ten years many changes have taken place but they have all been detailed year by year and there is no benefit to be derived from repeating them. Suffice it to say that in ten years the work of the department has doubled, and the staff has almost doubled. The income has more than doubled, and the expenses have kept pace with the income. More than twice as many films were taken this year as in 1922, five times as many dental films, twice as many treatments were given, and yet there were six hundred less patients admitted to the wards in 1931 than in 1922, and in the O. D. D. there were less than half as many new patients seen in 1931 as in 1922! The inferences are obvious. Usually they are herewith listed and explained to prove

that they are obvious—I shall try to achieve uniquity and stick to my statement.

We shall dispense with further statistics and the laments as to lack of funds and of available space, so common in annual reports, and take up the analysis of one group of cases as we have done for several successive years. This study is undertaken each year by the Assistant Resident in Roentgenology under my direction in order to determine our accuracy in diagnosis in that particular branch of work. It is obvious that by repeating the study under the same conditions several years later one may determine what progress if any has been made. It also gives us a critical attitude toward our own work which is of great value in curbing undue enthusiasm which is so apt to arise in the specialties. Furthermore, it gives us a definite basis for any statements which formerly were guesses, and it gives us a milestone by which we can judge our progress. When clinical facts or interpretations are included, collaboration is obtained from the personnel of the section involved avoiding the possible charge of unbalanced statistics or of errors in clinical judgment. With this preliminary explanation, we shall consider this year the diagnostic work done in X-raying the skulls and brains of 939 patients in 1931, with a total of 1,219 examinations.

We selected the group of skulls for our 1931 study as it was the last full calendar year in which Dr. Cushing presided over the surgical service and probably never again shall we see such a similar wealth of clinical material referred to us. As a matter of fact we made more examinations of the skull for the medical service than for the neurological service, at least in number of patients, but with far fewer positive findings, as the group referred from the neurosurgical service is highly

selected and clinically rich material. It is difficult to estimate the diagnostic accuracy in such cases as the clinical course is often prolonged, the patient is seen by many people, the statements are often at variance, and the clinical opinions frequently differ. As a working basis we decided to limit our study to those patients who had their first X-ray examination of the skull and brain between January 1 and December 31, 1931. This forced us to extend the follow-up period well into 1932 to include those patients examined late in 1931 whose lesions were verified in 1932. Our results, therefore, are incomplete but they form a basis for study and comparison, and are as accurate as we could make them. Dr. Hare, Assistant Resident in this department, bore the brunt of the work and I can commend his careful and unbiased studies. To determine our percentage of correct diagnoses we considered only those cases verified either at operation or autopsy, with additional classes for those with only clinical or roentgenological verification. The outstanding diagnostic group was, of course, brain tumor, with its many sub-groups. Dividing the cases as to their point of origin we find that the great majority of the patients sent from the general surgical service for X-rays of the skull were sent because of suspected fracture or to confirm a clinical diagnosis of fracture. Because of an occasionally over-looked skull fracture with serious complications it has become almost routine to send all patients who receive blows or injuries to the skull for X-ray examination, the majority, of course, being with negative results. It might well be emphasized here that in definite cases of cerebral damage the X-rays are relatively unimportant as compared to the patient's clinical condition, and it is often wiser not to delay for the X-rays but to treat the pa-

tient for shock or hemorrhage and then get the X-rays later. Furthermore, it is often difficult to obtain satisfactory X-ray films on a patient who has just been injured, as many of my residents called to do midnight examinations will testify, and poor films with negative findings may lead to a false sense of security. The amount of acute traumatic work brought to this hospital is small, as compared with the City hospitals, as is shown in Table A summarizing the cases from General Surgery:

TABLE A

SKULL X-RAYS, 1931 GENERAL SURGERY

New Cases	
Total Examinations 167	
Question of Fracture asked Clinically	135
Fracture of Vault	9
? Fracture of Vault	2
Fractures other than Vault	7
Separation of Sutures (Traumatic)	1
OTHER FINDINGS	
Paget's Disease	2
Pituitary Adenoma	1
Synostosis Cranii	1
Calcification of Internal Carotid	2
Angioma of Vault	1
Bullet in Vault	1

By comparison, the Medical Service sent us almost three times as many patients for X-rays of the skull, and the interesting thing is that in this group, quite comparable with any other hospital with a 125-bed service, there were found 18 brain tumors (verified) and 8 other calcified or destructive tumors (unverified). In other words patients with brain tumors are

REPORT OF THE ROENTGENOLOGIST

often present in the general wards of the hospital, and in considerable numbers. Table B gives the detailed findings in this group:

TABLE B MEDICINE New Cases 413 Re-examinations 30 Total Examinations 443 Verified Tumors 18 Clinical Diagnosis, Location 11 Clinical Diagnosis, Type 3 X-ray Diagnosis, Location 12 X-ray Diagnosis, Type 3 OTHER FINDINGS Unverified Calcified Tumors or Tumors with Destruction of Vault 8 Synostosis Cranii Paget's Disease Angioma of Vault Aneurysm Internal Carotid (Unverified) Calcification of Internal Carotid

The striking thing in this group is the high percentage of diagnosis made by X-ray. This group is made up largely of patients from Boston or its environs, coming to this hospital not because of its reputation as a brain tumor centre, but with complaints which would warrant admission to the Medical wards of any similar institution anywhere but includes cases, presumably brain tumor cases, sent to the Medical wards for preliminary study. With the exception of the latter it should serve, therefore, as an index of the frequency of brain tumors in the general hospital, this particular year showing 1,900 admissions to the Medical wards, almost one patient in every 100 having a brain tumor diagnosed and verified.

During a recent address on this subject in a neighboring city it was stated that only one case of brain tumor had been diagnosed in that city in the past five years and that they were, therefore, extremely rare. But in the four weeks following that address and discussion four patients all with brain tumors were received at this hospital from that same city!

Of particular interest in this year's study is the group of patients referred to us from the Neuro-surgical Service. In this group (patients whose first X-ray examination was made in 1931), there have been 157 subsequently found to have one form or another of brain tumor. This group was quite difficult to assay as to our diagnostic accuracy, as we had the benefit of some of the clinical findings, and the clinicians had the benefit of our X-ray findings after the first day in the hospital. We tried to be as reasonable and as just and as accurate as possible in calculating the following percentages but it must be admitted that there is considerable chance for both errors of omission and commission to creep in. But let us give the figures first and then explain how they were secured (Table C).

TABLE C

NEUROLOGICAL SERVICE 1. New Cases X-rayed 363 2. Re-examination 130 Total 493 4. Verified Tumors 157 5. Preoperative Diagnosis, Location 135-86% 6. Preoperative Diagnosis, Type 61-38% 7. X-ray Diagnosis, Location 73-47% 8. X-ray Diagnosis, Type 41-26% 9. Diagnosis Definitely Aided by X-ray ... 36-23% 10. Diagnosis Entirely by X-ray 9-7% 11. Diagnosis Misleading by X-ray 6- 4%

In the first place the re-examinations are quite high as it is customary at the time of discharge to have a post-operative set of films made as a record on many of the patients with verified tumors. This often is of great importance, as the position of calcified areas, bone particles or the silver clips used during operation may be changed by a recurrence of a tumor, and the position and size of the recurrence may be estimated by the shift in the position of these shadows, particularly of the opaque silver clips. The fifth line in the table "Clinical Diagnosis as to Location," is the preoperative diagnosis by majority opinion or by authoritative opinion as recorded in the hospital records, and includes all the evidence on each case, including the X-ray findings. The following line should show a higher percentage, as the chronological development of symptoms or the location of signs and the age of the patient often give a definite clue as to the type of tumor, but it was not put down in writing and could not be counted in several cases where it was fairly definite.

The figures on the seventh line, "X-ray Diagnosis as to Location" are more reliable. In each case we summarize our findings, when positive, and draw such conclusions as are justified, and these are all down in writing before much of the other work has been done or its results known. It is astonishing, therefore, that we are able to predict the location of the brain tumor in almost one-half of the cases and guess accurately as to its histological type in one-quarter of them. This is a very decided advance in diagnostic accuracy as compared with the results in previous years and in different groups. (The individual groups will be considered in Table D.) It must be emphasized that these figures are obtained from the study of plain X-ray films, stereoscopic, of course, and in different positions and direc-

tions, but not including ventriculograms. (Table E will show the results after ventriculography.)

The other figures, lines 9, 10 and 11, we consider quite accurate, the difference between the 47% of line 7 and the 30% of lines 9 and 10 being those cases which were diagnosed clinically and in which the X-ray findings were merely confirmatory. This has been a moot point and I, for one, am glad to have the accurate figures and actual percentages for reference. The final line includes all of the cases where changes in the X-rays were reported suggesting the presence of a tumor but in which no tumor was found, or in which it was found in a different location.

By analyzing the diagnoses in the different kinds of tumors we established the table below:

TABLE D

NEUROSURGICAL SERVICE Pituitary Adenomas 22 Diagnosed by X-ray 20-91% Meningiomas 24 Localized by X-ray 16-67% Acoustic Neurinomas 17 Confirmed by X-ray 9-53% Cerebellar Tumors 24 X-rays Compatible, not Diagnostic 11-45% Gliomas—In Hemispheres49 Localized by X-ray 14-28% Calcification Visible in X-ray 9-18% Pineal Displacement Aiding Localization, All Cases Pineal Displacement Misleading Metastatic Tumors Verified Pituitary Adenomas Verified by X-ray only 9 Calcified or Destructive Tumors—X-ray only ...

Of the twenty-two pituitary adenomas, three were not suspected clinically and two were not properly diagnosed by X-ray examination. Of these two, one tumor contained calcification extending above the sella and was called a craniopharyngioma, the other one was an entirely suprasellar adenoma with a normal sella.

The meningiomas are of particular interest to us in that so many of them show characteristic changes on the X-ray films allowing us to make a localizing diagnosis in two-thirds and a histological diagnosis in one-third. This is lower than our usual percentage, as almost half of the total number give enough evidence on the X-ray films to suggest the histological type of tumor with which we are dealing. It is interesting that the X-rays in three cases showed similar changes which were found not to be associated with a tumor of this type.

In the acoustic neurinomas the diagnosis is nearly always accurately made by the chronological development of signs and symptoms and by physical examination, and the X-ray examination is merely confirmatory, except occasionally when it establishes another diagnosis. When positive, the typical findings are those of an enlarged internal auditory meatus on one side with more or less erosion of the petrous bone around it. We have found an accurate antero-posterior stereo showing the petrous ridges in the centre of the orbits to be our most valuable position for determination of this point in diagnosis.

Similarly in cerebellar tumors the X-ray examination is of confirmatory value only in the great majority of cases with the rare exceptions where calcification in the tumor renders it visible. There are no characteristic changes, but just the general signs of pressure plus atrophy of the dorsum sellæ and usually a forward bending of the posterior clinoids.

In the largest group of all, the gliomas, a few may be located by thinning of the bone directly over the tumor (apparently when the glioma is on the surface of the brain), a few more by displacement of the pineal gland shadow, and 18% of them may be located and might be identified by the calcium content which is often considerable, particularly the oligodendrogliomas and some of the astrocytomas. Measurable displacement of the pineal gland shadow was of localizing value in thirteen cases of the 157 tumors, and inaccurate in one case. This latter was a patient with a tumor blocking the aqueduct of Sylvius and with a resulting internal hydrocephalus. The dilated ventricles pushed the pineal gland backward and downward but not laterally, leading us to assume the presence of a midline frontal tumor. Fortunately the clinical evidence was quite definite and the only error was on our part.

The remaining entries are self-explanatory and would raise the total considerably and our percentages moderately had they been verified by operation or autopsy.

The last group of cases separated for study is the one in which ventriculography was done. This method of direct tap of the cerebral ventricles, removal of cerebrospinal fluid, and replacement by air, followed by suitable X-ray examination in at least four positions, was employed 116 times in 1931 as shown in Table E.

TABLE E

VENTRICULOGRAMS

Total Examinations	116
Verified Tumors after Ventriculograms	
Tumors Located Correctly	59- 95%
Failure due to Unsatisfactory Filling	2
Incorrect Localization	1
Normal	21
Tumors Located, Not Verified	8

Following this procedure in 116 cases, sixty-two tumors were verified. These were correctly located in fifty-nine, and in two of the failures the mistake could be attributed to incomplete filling of the ventricles, an error in technique for which we were not responsible. This leaves one positive error which occurred during my absence and which may be attributed to insufficient experience. In other words this method is a very exact one when performed properly, but is associated with a very definite risk. I shall not attempt to discuss the mortality from this diagnostic method as it is entirely outside my field, and I doubt if anyone could give the accurate percentages in such a group as an operation is the usual and immediate sequel when an accessible tumor is demonstrated. The eight "tumors located, not verified" were mostly of the inaccessible type, a few deemed not operable for other reasons.

A final group, not numerically appraisable, is the one in which the X-ray examination was negative in the face of clinical signs. This is frequently of value, as for instance, in patients with the local signs of pituitary tumor but with a normal sella, or again, patients with the signs and symptoms of a space-occupying tumor in a hemisphere but with normal ventriculograms. We can simply say that negative X-ray findings are often of value, sometimes of positive value as well as of value in ruling out tumors and beg the question of percentage.

I cannot leave this section of our work without recording my appreciation and that of my entire staff of the rare privilege and pleasure it is to do such work for our retiring "Chief." His stimulus will never be lost and his example is one to be emulated.

A few pleasant notes and one of minor key and our tenth annual report is ended. The sad note is that in spite of an increase in the amount of work, the income

decreased, and, for the first time since 1919, fell below the expenses leaving us with a deficit of about \$830.00 for the year. This, however, is not remarkable in this period of suspended prosperity, and could have been avoided only by sacrificing the quality of the work, which was unthinkable. We hope that 1932 will show a better outcome, and all efforts are being made to balance our budget for the coming year without hampering the work to be done. One of the pleasant things to be recorded is a two months' brain-dusting trip abroad during the summer, aided by a grant from the trustees of the hospital. The trip included the Roentgenological centres of Germany and Austria, as well as the Third International Congress of Radiology held in Paris. It may be of interest to know that most of the Roentgenological knowledge acquired abroad was gathered from the famous pathologists and pathological laboratories. After all, our branch of medical science is really pathological-a study of the shadows cast by various forms of gross pathology-with a dash of pathological physiology and considerably normal anatomy thrown in. There could be no better training for Roentgenologists than a thorough grounding in anatomy and gross pathology, and a close association with the Department of Pathology is essential in the continuous acquisition of knowledge which is so valuable.

There have been the usual changes in personnel during the year, Dr. Pickwick completing his two-year service June 30, and continuing his work as Graduate Assistant at the Massachusetts General Hospital and the Pondville State Hospital, later accepting a position in the practice of Roentgenology in Fitchburg. His place as Assistant Resident was filled by the promotion of Dr. Hare, and the position of House-officer was awarded to Dr. Joseph Marks, a graduate of Harvard Medical

REPORT OF THE ROENTGENOLOGIST

School who has completed the usual term on the Medical Service of this hospital. We regret to record the resignation of Mrs. Heard (née Margaret Murtagh) who has been our amiable and efficient secretary for five years. Her place was filled by Miss Hewes who came to us from the Robert Breck Brigham Hospital. There have been no changes in the technical staff this year.

I might summarize these ten years which have passed so quickly and so pleasantly as one continuous course of post-graduate instruction for the Roentgenologist who has relayed the knowledge obtained to others and they still further so that we have shared in carrying the torch. It has been ten years rich in experience and of unbroken harmony and cooperation.

M. C. Sosman, Roentgenologist.

DECEMBER 31, 1931.

Report of the School of Nursing

THE year ends with the following staff of graduate and student nurses:

Superintendent of Nurses and Principal	
School of Nursing	1
Assistant Superintendent of Nurses	1
Instructors	2
Supervisors	5
Night Supervisors	2
Graduate Head Nurses and Assistants in De-	
partments	181/2
Graduate Floor Duty Nurses	9
Graduate Nurse Anesthetists	4
Masseuse	1
Student Nurses	120
	1631/2

Sixty-five students entered, one was re-admitted, two received by transfer from the Army School of Nursing and the School of Johns Hopkins Hospital. Thirty-eight students have been graduated, thirty-three have withdrawn, and one has died.

The total number of student sick days was 890, of graduate nurse sick days, 195. The Metropolitan Life Insurance Company has found the year 1931 to be "the most remarkable health year on record." Our figures would seem to bear this out.

The seventeenth annual graduation exercises were held November 12th in the Assembly Hall at Simmons College. Mr. Curtis, President of the Corporation, presided and the address was made by Dr. William Darrach, Professor of Surgery, College of Physicians and Surgeons, Columbia University, New York, also chair-

man of the Committee on the Grading of Nursing Schools. The Dr. John P. Reynolds gold medal was awarded to Marion Ethel Eastman of the graduating class. The John P. Reynolds scholarship was awarded to Ruth Gladys Pearl, a student in the five-year combined course with Simmons College who, in two years of hospital work, attained an average of 96.2%.

During the year the School has been visited by an inspector from the Nurses' Examining Board of the Board of Regents of the state of New York, who found some things to commend and others to criticize.

Affiliations provide one of our most satisfactory methods of teaching and experience for the students. Theory and practice are sure to be correlated on affiliated services. This year affiliation at Children's Hospital has been increased from three to four months for each student. This is to provide one month of experience in the new department for communicable diseases. The first students to have this experience were five who went to the Children's Hospital in June and who were in the new ward in September in the height of the anteriorpoliomyelitis epidemic. Their interest and enthusiasm at being privileged to participate in that work was gratifying and inspiring, both to the officers of the Children's Hospital and to us. The number of Children's Hospital nurses coming to us for adult medical and surgical work has been increased from thirty-four to forty in the year. It has been necessary to reduce the number going to the Massachusetts Eve & Ear Infirmary from twelve to eight. It is hoped that the usual number may be restored next year. During this year we have increased the number going to McLean Hospital for psychiatry from four students to six. This teaching and experience are proving extremely valuable to those selected students who are so fortunate as to have it.

A few changes in the graduating nursing staff have occurred—the most important being the addition of Martha O. Sayles, class of 1929, as Instructor in Sciences in place of Katharine Bell who resigned after holding that position three and one-half years. Knowing the difficulties of unemployment, most nurses are striving to retain their positions, and there is less moving from one type of work to another. This is true in most institutions and is to the advantage of the hospital, because it means a much smaller turn-over of personnel, a more stable organization, and a more experienced group of workers.

The number of enrolled students is considerably below our average. Entering classes have been of the usual size, but an exceptionally large number have been dropped or have withdrawn. This shrinkage can be attributed to no single reason. To provide adequate nursing care, the student group has been supplemented by the addition of a number of graduate general duty nurses. This serves a dual purpose, that of nursing our patients and of giving regular employment to several nurses at this time of irregular employment, especially in the private duty field. My personal wish is that we should be increasing the graduate staff and reducing the size of the student group as a matter of policy rather from necessity.

At the request of the Grading Committee, whose work has been mentioned in previous reports, last spring Doctor Howland and Miss Gilmore made a study of costs of nursing care of patients. Figures are available for the cost of nursing in the hospital by the School of Nursing, but for purposes of comparison with a paid service of graduate nursing the costs were estimated. It is safe to say that these evaluations were very conservative. Yet this study presented some surprising

figures, and disclosed that the School is saving the hospital annually nearly \$20,000. This figure corresponds with results in schools in other hospitals studied by the Committee. It shows that student nurses not only pay for their education through their services, but are definite contributors to the treasuries of hospitals. These students should not be expected to carry such economic burdens for our hospitals, and are frequently less well able to do so than many of the patients whom they serve. The tradition that the School of Nursing must carry the nursing load of the hospital binds it with an invisible chain, strong as iron, to the apprenticeship system of learning. The introduction of training for nurses sixty years ago did more than any one thing to make hospitals decent places for the care of the sick of all classes. The hospitals were quick to sense the economic value of the rotating student group.

But we live in a rapidly changing world and the methods of sixty years ago may not be the best today. No more than fifteen or twenty years ago, we were probably right in saying that there were plenty of opportunities after graduation for well-trained nurses. After the World War and the influenza epidemics of 1918 and 1919, the cry of the shortage of nurses was heard from one end of the country to the other. In good faith I, with many others, participated in active campaigns to attract young women into nursing schools and we were successful in securing large numbers of girls. About six years ago we began to understand that nursing, outside of institutions and organizations, was a seasonal occupation, with many weeks in the year when graduate nurses were unemployed. Presently those impressions were confirmed by statistics from the Grading Committee. Nurses began to feel the pinch of unemployment before this depression and

general unemployment situation were upon us. After three years of intensive preparation many nurses are now able to earn no more than many stenographers with only a few weeks of preparation because there are too many nurses. But hospitals, large and small, continue to enroll students in numbers sufficient to do the work of the hospitals regardless of what their economic fate as graduates may be.

Unhappily, while there exists an excess in number of graduates, there is also a dearth of well-prepared nurses for many positions in hospitals and the public health field. It appears that the demand is for quality rather than quantity. It has been stated many times in recent years that the education of nurses is not a proper charge on the hospital's income and endowments. Nor does it seem fair for the hospitals to secure their nursing so cheaply through a School of Nursing that it makes those students such large contributors to the hospitals' budgets. Until such time as it becomes recognized that the consumer must pay for nursing care as he does for every other necessity in life, I believe that the hospital's responsibility in the program of nurse education will not be changed materially. A basic graduate nursing service in hospitals supplemented by a smaller student service would be more expensive than the present system. It would transfer the weight of the nursing load from the student body to the graduate group and should insure more stable nursing care to patients. I believe that such a change would be much less revolutionary today than the removal of Sarah Gamp and the introduction of the modern nurse in training sixty years ago. It is essential that student nurses continue to have practical experience and teaching under supervision in the wards of the hospitals. But many of the subjects essential for the nurse could be better taught in colleges

REPORT OF THE SCHOOL OF NURSING

or universities than in hospitals. The system of educating the nurse should not differ materially from other forms of higher education, all of which depend upon endowments for their proper functioning.

CARRIE M. HALL, Principal.

DECEMBER 31, 1931.

Report of the Social Service Department

THE past year has presented an unusual number of serious social problems occasioned by the continued hardship of unemployment. In several instances families previously well above the dependency group have this year required financial assistance.

These families have put off the grim day of asking for material relief as long as possible. They have used their hardly acquired savings; remortgaged their homes; borrowed on their life insurance policies until finally with unpaid rent and unpaid grocers' bills they have been reluctantly obliged to ask of Social Service, assistance in procuring outside financial aid. This stress of financial worry is an especial danger to a cardiac patient and has in some instances caused a marked increase of cardiac symptoms. This is clearly indicated in the following case:

In the early part of 1930 an attractive 12-year-old American girl was referred to the Cardiac Clinic with a diagnosis of potential heart disease following chorea. She was one of six children ranging in age from two years to fourteen. Her father owned a trucking business which brought him on the average \$50.00 a week. The parents were intelligent and the home was comfortable and well furnished in a desirable neighborhood. At this time there appeared to be no social need other than the regular medical follow-up; to see that the doctor's recommendations were fully understood and that the patient returned to the clinic at regular intervals. However, at a subsequent clinic visit in July, 1931 it was found that the patient had been losing weight, her color was poor and there were very marked signs of choreic activity.

REPORT OF THE SOCIAL SERVICE DEPARTMENT

In questioning the mother it was discovered by the social worker that several months earlier her husband's trucking business had dwindled to the point where he was obliged to give it up for lack of trade. Through a friend he had recently obtained a position as clerk in a small fruit shop where he was now earning only \$20.00 a week, the entire support of a family of eight. As some time elapsed between the losing of his business and the finding of another job the family was obliged to draw upon its small savings. Added to this the mother had become pregnant. The accumulative effect of the parents' anxiey on the patient was such that bed care was advised.

Because of the presence of five lively brothers and sisters in the home, the proper rest for a choreic patient could not be given there. Arrangements were therefore made with the Children's Mission for bed rest in a foster home where there was a practical nurse in charge. The patient has steadily improved but has continued to remain in the country for several months longer in order to stabilize the gain made.

In the meantime plans were carried out for prenatal care for the mother and free admission at the time of her confinement in an excellent maternity hospital.

This case reveals only one instance of the definite relation between long continued unemployment and the health of a cardiac patient.

In one or two instances it has been possible to secure daywork for the mother of a family during the period of the father's enforced idleness. In events of this sort the father assumes the care of the home and children to the best of his ability during the mother's absence. For instance:

A capable Scotchwoman, mother of four boys one of whom was being followed in the Cardiac Clinic, was almost sick with worry over her husband's inability to find work. Her own condition of hypertension was being aggravated by this worry. With the doctor's consent daywork for three days a week was secured for her through the Emergency Employment Bureau conducted by the Women's Educational and Industrial Union.

The father with the help of the boys managed the household during the mother's absence. The mother's mind is consider-

ably less harassed now that there is sufficient money to feed the family.

Continued schooling for the boys and girls who in other years might more readily have left school to enter industry, has been constantly urged by the social worker. The year has been an unusually appropriate one for the consideration of training for skilled work and, as formerly, for this we have turned to the well established training centers such as the Trade Schools and the Vocational Guidance Department of the State Rehabilitation Section.

1 1

Problems of interpretation and of mental adjustment are many, with patients receiving long series of luetic treatments. A busy mother who has unwittingly contracted "the disease" from her husband, the unskilled workman who is fortunate enough to have a job and the elderly and infirm patients are among the types for whom the social worker is called upon to arrange a workable plan for regular attendance on treatment days. Volunteer drivers from the Red Cross and Family Welfare Society have been helpful in transporting patients unable to come in by themselves. Transfers to other clinics to accommodate working hours or to save transportation are frequently made. As the Wednesday clinic has moved into the rooms used by the Cardiac Clinic, a better opportunity is afforded the social worker to discuss problems with the individual patient.

In the course for dietitians, one month is spent in the Social Service Department. Mornings are given over to clinic work, and afternoons to calls on patients with dietary problems. One dietitian reports as follows:

REPORT OF THE SOCIAL SERVICE DEPARTMENT

- I. Time in Social Service—One month. Total number of calls—30. Conferences—2.
- II. A-Procedure of call.
 - Introducing one's self and telling patient calling for P. B. B. H.
 - 2. Patient's condition.
 - a. Is patient on diet?
 - b. Is patient following diet?
 - 3. Does patient test urine?
 - a. How often? What color (if diabetic)?
 - b. If not-why?
 - Any conditions in home or relationship with other members of family that prevents patient from following instruction and treatment.
 - 5. Very brief description of home and neighborhood.
 - 6. Has my call (dietitian's) helped in any way?
 - B-Report in written form.
 - 1. Date of visit.
 - Name—address.
 - Diet understood by patient—facilities.
- III. Kinds of calls-number of each.

Diabetic-16.

Malnutrition—13.

Obesity— 1.

IV. General Impression.

I found the majority of patients very willing to cooperate with the Social Service Department. With the exception of two calls, every one has felt the depression keenly. Some of the patients were morbid due to their financial status while others had little or nothing to do but to think about their condition. Five cases were decidedly neurotic. I do not remember any one specific case in which the family was destitute. Every patient was most grateful for the call. I feel that I helped ten cases, at least, with problems pertaining to their diets.

V. My own personal opinion.

I think an excellent way to see the dietary problems that confront a person is by making a visit to the home

PETER BENT BRIGHAM HOSPITAL

of the patient. Personally, I like to meet people of all classes. I think the student dietitians realize that we must study foreign cookery, which many of our naturalized citizens continue to practice in our country, and make up in the diets to these people, the essential foodstuffs for a good diet. This work has been full of interest and most enjoyable.

1 1

The outstanding problem to be faced in the Diabetic Clinic is that of providing insulin for patients who are unable to pay for it.

Insulin is very expensive and moreover has to be taken two or three times a day for long periods of time. Ordinarily we can raise money from outside agencies for nursing and convalescent care, glasses, teeth, etc. but there are no resources from which we can get money for this treatment.

There is very great need especially now for a fund which can be used to supply insulin for patients who are unable to afford this added item of expense to an already insufficient income.

1 1

The Gastro-Intestinal Clinic presents a field for intensive social as well as medical study. Patients whose major difficulties are stomach disorders of various types are faced with two practical problems; regulation of living and working conditions and obtaining and following a diet. Many attending this clinic are subject to irregular working hours or to continued mental and emotional upsets.

With these facts in mind, a special study is being made by the Social Service Department of a group of patients picked out at random, to determine if these factors influence or aggravate the stomach condition and how much, if anything, can be accomplished by readjustment. In the small group already studied, a large per cent of patients have various psychopathic tendencies in addition to physical disorders. A few have been benefited through the Social Service Department by opening up new channels of work and interests, but a psychiatric consultant would undoubtedly be of help with this group.

As the majority of patients are on special diets, a dietitian is present during clinic to explain the diet to each patient and suggest ways of adapting it to meet the different requirements. If the diet calls for an extra expenditure which the patient's financial budget will not permit, he is then referred to the social worker who is present in the clinic and who trys to make an economic plan to meet the need, frequently asking an interested social agency to supply extra funds.

A follow-up study of more than 1,400 patients for over a period of five years is being made by Doctor Emery and Doctor Monroe, for the purpose of finding out what actually happens to ulcer patients; i.e., the effect of different kinds of treatments, the frequency and cause of remissions and what is being accomplished by treatment. To facilitate this study, 383 letters to patients not heard from for over six months were sent out by the Social Service Department. One hundred and five patients receiving letters have already reported at clinic and others have responded by letter or telephone message to the social worker. An earnest effort is being made to keep a careful follow-up of clinic patients. Eight hundred and twenty-eight visits by 315 patients were made to the clinic during 1931, an average of 16 patients to a clinic.

Report of the Pathologist

THE figures for the department are as follows:

Autopsies, medical service	119 0 61 0 28
Autopsies, done outside for neurological service	11
Total number of autopsies recorded	219
General autopsies recorded	
232	
Recorded autopsies	
Actual total 219	
Reports on surgical specimens	1,174 172 1,100
Total	2,615

There were 296 deaths in the hospital, of which 171 were medical, 94 were surgical and 31 were neurological. Nineteen deaths, 3 medical and 16 surgical, were investigated by the Medical Examiner.

The percentage of autopsies for the year after deducting the 19 cases taken over by the Medical Examiner proves to be 75%. The percentage of autopsies

PETER BENT BRIGHAM HOSPITAL

for the various services after making corrections for autopsies twice entered is: Medical 70%; Surgical, 78%; neurological, 90%.

The number and percentage of autopsies for all years are:

	Year	Number	Per Cent
	1931	219	75.0
	1930	192	64.4
	1929	240	68.6
	1928	219	59.6
	1927	196	63.4
	1926	179	62.0
	1925	204	70.7
	1924	177	70.0
	1923	153	58.0

1917	1,248
1916	1,140
1915	1,030
1914	847

Changes in the staff in the last year are as follows:

Dr. Rudolf Osgood succeeded Dr. Reuben Z. Schulz as Resident Pathologist July 1, 1931.

Dr. Darwin E. Bennett succeeded Dr. James Perry Tollman as House Officer July 1, 1931, for six months and was succeeded by Mr. Mark D. Altschule, of the fourth year in Medicine, to serve for six months.

Dr. Fred M. Marquis served for six months from July 1, 1931, as House Officer when he was forced to leave on account of severe dermatitis due to formaldehyde; his place was taken for a period of six months by Mr. John Denison Houghton, of the fourth year in Medicine.

S. B. Wolbach, Pathologist.

DECEMBER 31, 1931.

Report of the Surgeon-in-Chief

Dr. Johnson once said that he who runs against time has an antagonist not subject to casualties. This I am quite ready to believe, for with each annual lap time seems to have accelerated his pace leaving me on this, the twentieth, greatly in need of a second wind. Some twenty-five years ago, a group of enthusiastic and rebellious voung American surgeons, most of them, though still in their thirties, already holding university positions, inaugurated a new sort of society at whose meetings the customary reading of tiresome papers was to be replaced by the objective presentation of one's work. To secure entrée to a particular clinic over which an older man, actually in his fifty-fourth year, then held sway, an exception was made in his favor and the age of enforced retirement was put at fifty-five years! With the bumptiousness of youth, it seemed inconceivable to us that anyone could properly do surgical operations much after that age.

So when the regulations of the Brigham Hospital specified some ten years later that all officers should retire at a given age and sixty-three was hit upon as a reasonable jumping-off place, two decades seemed a long way ahead. And though a year ago the Board of Incorporators generously proposed to extend this limit in my case for another three years, recalling what had once been thought of fifty-five, the offer was declined

as establishing an unwise precedent.

Where these twenty years have gone is difficult to say. There were two long interruptions—or rather one—for they ran into each other and both had something to do with the War. A brief service in 1915 at

the American Ambulance in Paris—an effort subsequently to organize a Base Hospital for the Red Cross —two years in France followed by a polyneuritis with slow, incomplete recovery—the death of a friend whose son I saw buried in the Flanders mud and whose biography I agreed to write, little realizing how long it would take. Nine, almost ten years gone before one could bat an eye, and the real work of building up the surgical reputation of a newly established hospital scarcely begun.

And just now after a period of pseudo-prosperity, we are in the slough of the great depression almost as demoralizing as was the War itself out of which it grew. Between battles during the War, some men loafed and groused while others found ways of profitably occupying themselves. So in slack times like the present, it's a wholesome discipline to be one's own employee and to keep at work on some self-appointed task, however unremunerative. One advantage of being a doctor is that something useful can always be found to do and those who imagine they "kill time" at golf, the bridge table, and the movies while waiting for a job, injure themselves more than they punish time.

Caught in the pinch of the depression, the Brigham Hospital like all other charitable institutions, has been obliged to curtail its expenditures and practise the most rigid economy. For this reason it was proposed at the turn of the year that the publication of this annual report should be omitted. Protest was raised against this suggestion on the following grounds: that once discontinued, the reports in their present form would in all probability never be resumed; that if they have been worth printing in the past, they are worth keeping up even if we had to go begging to meet the expense; that they provide a continuous record of the hospital's

activities and changes of personnel which will become increasingly valuable as time goes on; that they serve as the only possible medium whereby an interest in the affairs and activities of the Hospital on the part of those formerly connected with it may be kept alive. It was intended at the start that these reports should break away from the traditional emphasis laid on the administration of the trust, as though this rather than the work of the clinicians was the chief purpose of the foundation. In a certain sense, therefore, they have typified the youthfulness, the vigor and the spirit of the Hospital and its intention to establish its own new traditions and express its own individuality.

It has in many respects been a unique institution. I know of no place where administration, professional staff, and school of nursing have worked in greater harmony, no place where good-will, loyalty, and fair play have been continuously more in evidence, no place where patients receive better care, more individual attention and sympathy. This is partly due, I think, to the fact that the Hospital has remained small and compact and intimate. It has altered its arrangements here and there and plans for changes and improvements are always on foot, but outwardly it is much the same, its working organization like its bed capacity remains unchanged, and growth has been in reputation rather than in size.

Bigness, though held up and worshiped as the American ideal, is no measure of effectiveness and permanency. The dinosaurs have gone while the bee and the ant survive. So the mammoth hospitals of the present day, like overgrown organizations of other kinds, find themselves from their very unwieldiness at a disadvantage in times of stress like the present. There are of course other opinions about this—each to his own taste.

But it's a good rule of life to be thankful for what you have and to make the most of it; and this may explain why in an earlier one of these reports in attempting to answer the question of how large should a hospital be, the Brigham in spite of its many inperfections, was thought to be about the right size for economic operation and real effectiveness. To this opinion my colleagues may not wholly subscribe, nor, indeed, my successor, Dr. Cutler, who is to come back to us from an experience in a much larger institution; but I have so often seen expansion followed by deterioration in quality of work, by diminished productiveness from excessive administrative burdens, and by disharmony among rival workers that I confess to be fearful of it.

IN RETROSPECT. The hospital's opening had not been notably propitious. The inevitable delays of construction were such that the restive surgical staff, tired of marking time, finally crowded their way into and took over for their purposes the ward which happened to be nearest completion. There a make-shift operating equipment was set up and on January 27, 1913, our first patient, Mary Turner of Roxbury, not only was cured of her varicose veins but was sufficiently satisfied with the attention she received to return to us in later years whenever she sought relief for other and sundry complaints. Two months elapsed before a medical ward was finally opened with the admission-on March 31, 1913 to be exact-of one Maurice Promisel whose renal hypernephroma necessitated his subsequent transfer to the surgical service for a nephrectomy.

We were still, some weeks later, in a milieu of scaffolding and dirt and noise and wet concrete when Sir William Osler, who happened to be on a visit in the country, was asked to come and give us his blessing. His impromptu but altogether appropriate remarks of congratulation and admonition, made on that blustery day of April 30, 1913, were taken down and in part published some years later in the sixth of these Annual Reports (p. 55). After speaking in his familiar vein of the three major purposes of a hospital—the care of the patient, the instruction of the students, and the extension of knowledge—he went on to say that what he regarded as the most important and significant thing about our program was that the clinical chiefs were taking an important step in medical education by giving their services on a university basis as practically full-time men.

Some day an impartial and unabridged history will be written of the important movement that has come to be known as the full-time plan for clinical departments. What initiated the movement was, I believe, an address¹ by L. F. Barker, then Professor of Anatomy in the University of Chicago, in which a vigorous plea was made for the establishment of hospitals especially constructed and endowed for university purposes where clinicians, well enough paid to permit them to forego private practice, might "devote their whole time and strength to teaching and investigation." Three years later, in 1905, Dr. Barker was appointed Osler's successor in the Chair of Medicine at the Johns Hopkins.

Our American medical schools at that time, mostly proprietary in character, were unnecessarily numerous and most of them of an inferior type. The American Medical Association after an elaborate survey had already succeeded in a quiet way in closing the doors of some of the least worthy schools when in 1910 there appeared Mr. Abraham Flexner's elaborate report to the Carnegie Foundation for the Advancement of Teaching

¹ Medicine in the University. Am. Med., July 26, 1902, iv, 143.

on "Medical Education in the United States and Canada." This sensational publication served to call public attention to the deplorable conditions that prevailed and had a profoundly beneficial effect not only in accelerating the elimination of many poorly equipped and conducted medical schools but at the same time in raising the standards of the survivors. While in this monumental report the Johns Hopkins was singled out and held up to view as approaching the ideal, only two years elapsed before the clinical departments of this particular school came privately, by the same virile pen, to be severely criticized. To correct what were regarded as abuses of their academic positions a full time service for the chiefs of the clinics was proposed and though there were differences of opinion, the program, financed by the General Education Board, was finally adopted and, with Dr. Barker's resignation, in January, 1914, put in full operation.

Meanwhile, in 1912 Dr. Christian and I, in full accord with the general principles of a whole-time service, were in the process of coming to a working arrangement with the Board of Incorporators of the Brigham Hospital. Their original proposal, that we give half-time to the hospital and half-time elsewhere to our private practice, was looked upon as an arrangement unfavorable to the future development and reputation of the hospital on which we hoped to concentrate our energies. This implied some provision however modest, for the reception of private patients. While the sick poor of Suffolk County had been uppermost in the testator's mind, he could scarcely have forseen in 1870 that they would fare better in a teaching hospital with a university connection, where no distinction would be drawn in the matter of care between the indigent and those able to pay their way. And after an opinion favorable

to this view had been legally handed down, the cautious administrators of the fund finally acceded to our alternative proposal and I trust have had no reason to regret it.

So it came about that we were the first clinical teachers, so far as I know, who desired and were permitted to give their undivided attention to the work of a teaching hospital and to confine their professional activities within its walls. In so doing we were to have the privilege of accepting fees from patients who might consult us during such hours as we felt justified in setting aside for this purpose. It was foreseen that the privilege of thus supplementing a meagre hospital salary was one which might come to be abused, but experience proves that with the increasing growth of the hospital we tend from year to year to give less rather than more time to our private affairs.

Subsequently, through funds provided by the General Education Board of which Mr. Flexner by now had become the Director, the major clinical departments at Johns Hopkins, as already stated, were put upon a full-time clinical basis which differed from our own in a single respect—and this, be it said, was regarded by the sponsors of the plan as an all-important difference namely, that the institution rather than the attendants was to collect and utilize the fees from private patients. Here, then, appeared to be an opportunity to put to the test of time a controlled experiment regarding a new and revolutionary academic policy. Would the holders of full-time clinical chairs on a larger and fixed salary prove in the long run to be more stimulating teachers, more productive investigators, and better hospital servants than would those who are at liberty to supplement a smaller salary through personal dealings with their private patients? The answer might then have been

foreseen: namely, that the personal characteristics of those chiefly concerned will determine whether they will be happier and, therefore, accomplish more on one or the other basis.

Our self-imposed program, however, was not permitted to stand unchallenged for in October 1931, after some overtures, the General Educational Board offered to give the Harvard Medical School a million and a half dollars provided the chiefs-of-clinic at the Brigham Hospital would agree to serve as full-time officers on the same financial basis as that about to be instituted in Baltimore. The Medical School was then in debt and the promised financial relief would have been a vertiable windfall; but I never could convince myself that those here who pressed us to accept the restrictions imposed by the gift (apart from several of our preclinical colleagues) were interested as much in the principle involved as in securing the gift. On my own part, a term of service limited to twenty years with an academic salary on which a family of children were to be educated and no pension in sight in case of accident or ill health seemed a dubious proposition. I doubted, moreover, whether such an arrangement would in any way activate me and feared, indeed, that it might encourage indolence. If the purpose of the plan was to prevent the attendants in university hospitals from exploiting their position for their personal ends, there was just as much reason to fear, human nature being what it is, that hospital superintendents and trustees might be tempted in a pinch to exploit their salaried professional attendants. With no pretense to be anything more than an amateur investigator, I could not see that a fixed salary would either improve my status in this respect or give me any more freedom for such researches as I was capable of directing or undertaking.

And coming of a race of general practitioners, the intimate and confidential relation between doctor and patient—one of the most precious things in Medicine—was in my blood and I could not look upon the cold institutional program with any great enthusiasm, much less with any expectation that it would serve to make

something out of me that I was not already.

To make the story short, more or less active negotiations regarding this highly disconcerting proposal were on foot from October, 1913 until March, 1915 when the first Harvard Medical Unit sailed for France. At this time pressure upon me had become such that I felt obliged to put my resignation in the hands of the University to act upon during my absence as they saw fit. I did not feel justified in longer blocking the project and was quite willing to relinquish my chair in favor of some younger man who had come to assume fewer responsibilities and obligations. On my return three months later, it was learned that conferences had been held and the proposal found to be unacceptable to the Hospital Trustees. So, after this prolonged distraction at the very outset, we started in once more to see what might be done on our originally planned basis.

In view of all this, it is not improper after this interval briefly to mention some of the things that appear to have been accomplished for the good of the School and the Hospital under our particular kind of full- or whole-time service. They may be separately considered under Osler's three purposes of a hospital—the care of the patient, the instruction of students, and the exten-

sion of knowledge.

Care of the Patient. What the patient costs a hospital per diem is not necessarily an indication of the care bestowed upon him, but it nevertheless is a weathercock

in that direction, and it may be learned on consulting the consecutive reports of the Superintendent that this cost has risen from \$4.48 in 1915 to \$8.00 this past gloomy year. A still better indication is the number of persons who in one capacity or another have to do with the patient's welfare, and there prove to be 311 names on the Hospital payroll in addition to twentyseven unpaid house officers and between ninety and one hundred nurses. Nor does this tell the whole for it fails to include some twenty associate members of both medical and surgical departments several of whom give their entire time to the Hospital without putting it to any expense, volunteer workers in the laboratories and Social Service Department, secretaries who are paid for by members of the staff, special nurses who are paid for by patients who can afford them, or from a private and special fund when patients urgently need and can't afford them. And there presumably should be included the members of the Board of Corporation, and the committee of faithful women who help raise money to keep our Social Service Department running, and the student clinical clerks and dressers who contribute willing and helpful hands while they are learning something from us. Thus for every patient occupying one of our 250 beds, there must be at the lowest estimate an average of two persons who in one capacity or another are continuously doing something for his well being.1

These figures serve to show what a large number of people in these modern days are concerned with the care of hospital patients from the time of their admission to the time they are back at home to remain if necessary under the watchful eye of a social service

¹ Though comparisons are odious, I learn from a friend who administers the affairs of a large, overcrowded civic hospital with eight times our number of beds that only three times the number of persons of all stations are engaged in the patient's welfare, most of the attending physicians, indeed, only serving periodically for a few hours a day. Their patients, therefore, may be said to receive three-eighths of the attention we lavish upon ours.

worker or to report periodically at a class of ambulatory patients afflicted by a common disorder; and even if they need no further attention after being discharged they find themselves written to at varying intervals for news of their progress and condition.

In all this the Brigham probably differs in no marked respect from many another hospital; but I know of none where a more whole-hearted effort is made not to lose sight of John and Mary while treating their malady. A hospital ward can be a cheerful instead of a melancholy place if the rule is followed never to pass a bed without doing something for the person in it, be it only a nod of recognition or a smoothed pillow or a word of encouragement.

There at the same time can be little question but that the patient is better safeguarded in an institution where the senior attendants are on continuous duty, for there is no telling when sudden emergencies may arise which call for interstaff consultations and decisions without loss of time. In this respect it would seem to make little difference whether the attendants are restricted to an institutional salary or are permitted to collect fees from those few who can afford and wish to consult them privately, but I have a strong feeling that under the latter system the patient is less likely to be considered "a case" and more likely to receive the intimate personal attention he yearns for and is entitled to expect.

Two years' experience in the Army was enough to show me that nothing is so conducive to inferior work as the absence of any sense of personal responsibility to the wounded man or his relatives and dependants. This was entirely assumed by the government and all the administrative officials expected of us was to get through with the largest possible number of operations

during our periods of duty so that they might evacuate the cases with the greatest possible speed. There were no checks, no possibility of following the case to learn what had happened, and indeed objections were raised to any attempt on the part of a medical officer to do so. The problem might have been momentarily interesting but the wounded man himself passed through essentially unknown and disregarded.

I do not wish to imply that a salaried medical officer in a peace-time hospital would fall into these sorry ways; but there is no doubt that the obligation put upon him of some intimate contacts before and after an operation with the patient and his relatives is a relation that instills a far greater sense of responsibility in the immediate task and insures a greater permanency of contact with the patient's further progress than could be expected if these transactions are left to an administrative official who collects an institutional fee.

The latter arrangement must lead, however unconsciously, to impersonal surgery, which is not what most of us, much less our family, would desire when our time comes. In short, it is the doctor's duty and privilege to learn from the patient something of his social and financial status if for no other reason than that it may be determined whether he should pay anything beyond his hospital bills or indeed whether one may not actually wish out of his own pocket to contribute something toward his keep. And when these rules are made to apply to the few patients who can afford private accommodations, they come automatically and by force of example to apply to the far greater number of public ward patients, who deserve and cherish the same intimacy and deserve and get the same attention and professional care which for each and every one is the best we can give.

Instruction of the Student. So far as the undergraduates are concerned, we may take a modicum of credit to ourselves for having revolutionized their status in the several hospitals affiliated with the Medical School by admitting them for the first time to the wards and operating rooms as participants in our work rather than as mere onlookers. Several years elapsed before the other hospitals could be persuaded that it was safe to have fourth year students "clean up" in their operating rooms and play a minor part in operative procedures.

There were two things, novel in this community, which from the outset made it possible for us to introduce this custom. One was the substitution, in place of the old-time instruction in standard operative procedures on the cadaver, of a course of operations on living animals in which the same ritual in its smallest detail was observed that was practised in the hospital operating room itself. Another safeguard lay in our junior staff organization whereby selected men who had passed through the house-officer grades constituted a senior residential staff eager and accustomed to teach and who could be depended upon to instruct the students and to oversee them in their minor surgical duties. It is now difficult to say whether the hospital gets more out of the fourth-year students or they out of the hospital; the benefit is mutual and we have come largely to depend on them not only as co-workers but as a stimulus, for the very example which we are obliged to set for them keeps us on our marks. We were the first also to provide ample laboratory space for the senior clinical clerks, and our annual contribution to the school library has had no little to do with the fusion of the former departmental collections of books into a

general library of excellent character continuously accessible to all.

Osler, we may be sure, intended in his remarks to include graduate with undergraduate students; and our contribution as a hospital to graduate teaching has been largely centered upon the meticulous training of our junior staff. This from a surgical standpoint is a highly responsible business for it means the gradual induction of young men to the point where they may safely and with confidence carry out their own operations with the least possible or with no supervision. What is more, if a surgeon sets about to inoculate his juniors with the idea that by dint of hard work and perseverance they may qualify for a career in academic surgery, he takes on an added responsibility for there is not only a limit to the number of teaching positions that might conceivably lie open for them, but the preparatory road is a long one. "Who chooseth me must give and hazard all he hath." They must not only prove themselves skillfull handicraftsmen with native surgical instincts and at the same time indicate that they have a natural aptitude for teaching, but they must begin to put themselves on paper, learn to present their subject in hand acceptably before an audience, show some capacity for independent research, have the robust health which promises to stand the strain of surgery, and finally must not marry too early, and then beyond peradventure the right person.

Not only is the competition heavy but unless one is pulled or pushed, the steps that lead up the pyramid from house officer to assistant resident, to the laboratory, to the residency, are high and each of them takes one or more years to negotiate. And if there should then, as is desirable, be thrown in an additional year or two abroad, it's been a long and expensive apprenticeship

with no certainty of reaching the top where at best there is standing room for few. But a surgical house officer need not pass through all these grades in order to have a successful career; on the way not a few, indeed, find that their talents, tastes and opportunities for service lie wholly in other directions than those leading to academic preferment.

Whatever may be the subsequent attainments of those who have received at least a portion of their education within its walls, it is from this source that a hospital as a training ground for graduates draws its chief reputation; and though twenty years is a short time to make an appraisal it is gratifying to find that more than half of the circa two hundred men who began their service here as internes or in some higher rank already hold teaching positions in one or another of the better medical schools in the country. Many of them, indeed, have attained positions of professorial grade, not always in surgery, to be sure, which goes to show that a preliminary surgical training may be a help rather than a handicap in preparation for some other line of work. While their names and present positions may be found in the register appended to these reports, it may not be taken amiss to assemble them here.

EXTENSION OF KNOWLEDGE. Opportunities for this always lie before a clinician if it is only through a more accurate study than has previously been made of a group of patients having the same malady in common. Whether at bedside or laboratory there is always something that remains to be learned about every disorder, even the most commonplace one, if restudied from a new angle. It may be a matter of deducing certain facts from pure observation or of seeing the significance of something to which others have been blind; and those who possess mechanical ingenuity rarely fail to develop some novel device or to perfect some method of diagnosis or operative treatment which amounts to the taking of a forward step in knowledge.

Though curiosity and the thirst to satisfy it is common to all, not everyone has the imagination or training to put questions which interest him to experimental test, and even when blessed with these qualities most clinicians find themselves hampered by the very nature of their essentially practical activities. Yet I fail to see in what manner Jenner's or Lister's contributions were any less dignified or worthy of praise than those, for example, of Claude Bernard. Why research should be stultified and looked upon as impure if undertaken with a practical end in sight is difficult to understand; and this was unmistakably Pasteur's goal in the problems of his later years. But this attitude toward clinical research, as something inferior to such laboratory investigations as have no ostensible immediate application, has given the clinician an inferiority complex, has tended to inhibit his productive activity, and has made him look with some apprehension on the quality and number of publications that may have come from his department. There are either too many of them to be of high grade or too few to justify the opportunities of recording new facts and principles that lie on all sides.

So if an apologia is needed for the seven hundred or more papers from the surgical clinic that in the past twenty years have been listed in these successive annual reports, it is only necessary to say that it is looked upon as part of a house officer's training not only that he learn to speak before an audience extemporaneously, if it is only to present a case for discussion, but that he put together for publication the results of some study, however humble it may be. Some of the best men, full of ability and ideas, may have to be literally pushed into the inkpot because of their fear of composition, and they must painfully learn that this is never an inborn

gift but something acquired by lamentation and perseverance.

One of the privileges pertaining to the Moseley Professorship of Surgery at Harvard is the appointment each year of a research fellow in surgery on a foundation, established (under circumstances told in an earlier report, 1928, page 87) by the late Dr. F. C. Shattuck in memory of his friend and contemporary, Arthur Tracy Cabot. Where the appointees should spend their time or what should be the direction of their studies was unspecified, but the first of them, Dr. Weed, owing to the delayed opening of the hospital was put in charge of the existing Laboratory of Surgical Research at the medical school rather than in the projected surgical laboratory of the hospital. Thus, by what now I look upon as a fortunate combination of circumstances, the admirable traditions of this fellowship have been built up in the school where they serve as almost the last remaining formal link between any of the clinical departments and the preclinical laboratories, some of them now almost independent institutes, which flourish there.

Recalling my own unusual opportunities as a young man in having direction of a small research laboratory at the Johns Hopkins, the successive A. T. Cabot Fellows have in their turn been given full responsibility for the conduct, budgetary expenditure and productivity of this departmental plant. That this confidence has not been misplaced is shown by the one hundred and sixty-four papers so far printed and accredited to this laboratory, by the spirit which the many subsequent workers there have shown in emulating the tradition left by the first incumbent, and by the positions which he and many of those who succeeded him subsequently attained. Their names follow:

PETER BENT BRIGHAM HOSPITAL

1912-14 Lewis H. Weed, Prof. of Anatomy, Johns Hopkins.

1914-15 Gilbert Horrax, Asst. Prof. of Surg., Harvard,

1915-16 Samuel C. Harvey, Prof. of Surgery, Yale.

1916-17 William S. McCann, Prof. of Med., Univ. of Rochester.

1917-19 No appointments.

1919-20 George B. Wislocki, Prof. of Anatomy, Harvard.

1920-21 Percival Bailey, Prof. of Neurol., University of Chicago.

1921-22 Roger C. Graves, in practice, Boston.

1922-23 W. J. M. Scott, Assoc. Prof. of Surg., Univ. of Rochester. 1923-24 Claude S. Beck, Asst. Prof. of Surg., Western Reserve.

1924-25 Lester R. Whitaker, Asst. in Surg. and Inst. in Anat., Boston U.

1925-26 Tracy J. Putnam, Instructor in Neuropath., Harvard.

1926-27 Arthur J. McLean, Inst. in Surg. and Neuropath., U. of Ore. 1927-28 John H. Powers, Asst. Surg., Bassett Hos., Cooperstown, N. Y. 1928-29 Harold M. Teel, Abroad on Mission for Gen. Educ. Board.

1929-30 Paul Martin, Asst. in Surg., Univ. of Brussels.

1930-31 Richard H. Meagher, Resident Surgeon, P. B. B. H.1931-32 Richard U. Light, Asst. Resident Surgeon, P. B. B. H.

The activities of the A. T. Cabot fellows under the circumstances mentioned have come to be carried out in the surgical laboratory in the school rather than in the rooms set aside in the hospital for a similar purpose. It was in these latter quarters that Dr. Boothby, one of the early members of the surgical staff, after a period of training with Professor Haldane in Oxford began his important studies of the metabolism of patients with endocrine disorders-studies which have been of farreaching consequence both for medicine and for surgery. Had it not been for the interruption of the War and for Dr. Boothby's subsequent appointment at the Mayo Clinic where opportunities lay before him to pursue his investigations on a larger scale, the metabolism observations on our hospital patients might have remained in surgical hands rather than in those of our medical colleagues who were naturally eager and better equipped to take over the work. What small laboratory space this left for us for surgical purposes has been occupied by those engaged in furthering my special problems to which reference may now briefly be made.

SURGICAL SPECIALIZATION. Is the chief surgeon in a general hospital entitled to devote himself exclusively to a special field of work? This is a question I have often secretly asked myself and the answer, presumably, would be that it depends upon circumstances. The circumstances which in my case have made it possible have been my implicit reliance from the outset on the judgment, skill and high sense of responsibility of my immediate Juniors, Drs. Cheever and Homans, who in later years have been ably supported by the Drs. Newton. Their outstanding ability and experience as general surgeons, who make no pretense at specialization, have left me free to expend my energies in the cultivation of my favorite field. In so doing, the stand has been taken that if I were to claim for myself all of the neurosurgical patients who sometimes occupy an undue proportion of the surgical beds, my colleagues in all fairness should be given control of all the other cases. While this unquestionably was a proper subdivision of our work, I confess to many a pang from foregoing the privilege of putting my hand now and then to the sort of tasks in general surgery which I was brought up to do.

Thus it has come about that a semi-independent neurosurgical school has grown up within the general surgical clinic and whether this should have been allowed to continue much longer is perhaps doubtful. While the general surgical experience of my juniors has been widening, mine has been narrowing, and though I continued eagerly to teach the principles of general surgery, even this was given up when my weekly clinics for third-year students were eliminated by a change in the curriculum: and should the inevitable swing of the curricular pendulum lead to the resumption of clinical lectures in general surgery for third-

year students in a body, almost anyone of my juniors could now qualify to take them on much better than I could. To put all this in a nutshell, it is fair to say that no one could properly be considered eligible to the position of leadership in a general surgical clinic who has not had a primary broad surgical training which implies a certain working familiarity with all the recognized surgical specialists. But should he in course of time become so engrossed in a particular field, whether new or old, that it occupies his attention to the exclusion of other things, it is about time the institution should begin to cast about for his successor.

However this may be, it has come to pass that within the greater orbit of the surgical department, a special group of workers has come to revolve around their own detached and independent axis, their center of activity being the small and over-crowded laboratory whose affairs in later years Drs. Bailey, Buckley and Eisenhardt have successively supervised. Here a quasi-school of neurosurgery, more particularly as it relates to the study of intracranial tumors, has from a nebulous beginning come to take form. It has been wholly independent of the medical school and been tolerated by the hospital authorities out of their willingness to let me pursue my own problems as I wished, provided the work could be independently financed. In this case it has proved to be costly, but there was no difficulty about this, thanks to our kind of full-time service, for as the work has grown ample funds have been put at our disposal by grateful patients or their relatives for the mere asking.

So while the surgical staff as a whole has been engaged in training men to be general surgeons, Dr. Quinby and I—he with far more restricted opportunities, I may add—have been training men for careers in our respec-

tive specialties. And I naturally look with particular pride on the fact that there are scattered here in Boston (Horrax, Cobb, Viets, Putnam and Ingraham), in New Haven (Harvey, Fulton and German), in New York (Davidoff, Scarff, Deery and Kaplan), in Philadelphia (Grant and Groff), in Baltimore (Bagley), in Louisville (Spurling), in Rochester, N. Y. (Van Wagenen), in Cleveland (Locke and Bell), in Detroit (Schreiber), in Chicago (Bailey, Davis and Oldberg), in Omaha (Keegan), in San Francisco (Towne and Fleming), in Los Angeles (Rand and Courville), in Portland (McLean), in Toronto (McKenzie), in Montreal (Penfield), in Edinburgh (Dott and Henderson), in Leeds (Armitage), in London (Symonds, Ross and Cairns), in Brussels (Martin and Bremer), in Louvain (Morelle), in Antwerp (Van Dessel), in Amsterdam (Oljenick), in Hamburg (Schaltenbrand), in Berlin (List), in Vienna (Schönbauer and Schlesinger), in Bucharest (Bagdasar), in Bern (De Coppet), in Geneva (Ody) and in Paris (Petit-Dutaillis) a number of men who have gained at least a small part of their neurological experience here. They form a band of sympathetic persons who share in common an interest in furthering the development of the surgical aspects of neurology, even though not all of them actually choose to put their hands to it. In all this Dr. Horrax has for years been my chief mainstay, and of late years during his vacation period, by a happy arrangement, former assistant residents (Mr. Dott in 1929, Mr. Cairns in 1930 and Drs. Van Wagenen and Oldberg this present summer) have volunteered to return and take his place. By relaying operations for me they have helped to conserve my time and energies.

So here has been a minor training school within a larger one. And if any particular contributions from it may be singled out as deserving of special mention, they are probably the early studies by Drs. Weed and Wegefarth of cerebrospinal fluid, Drs. Bailey and Bremer's investigations of hypothalamic function, Dr. Bailey's classification of the gliomas, Dr. Eisenhardt's subsequent development of the supravital method whereby they may be promptly differentiated, and the many contributions which Drs. Goetsch, Putnam, Dott, Davidoff and others have from time to time made in furthering our knowledge of disorders of the pituitary body.

Naturally enough, our departmental list of publications becomes increasingly topheavy with neurosurgical papers, for time to write is found by a larger number of persons engaged in this work compared with those on the general service who are continuously occupied by their heavy responsibilities in wards and operating room. It has been our custom heretofore strictly to limit the publications for each year to the papers actually printed, but in the subjoined list, for the purpose so far as possible of clearing my slate, not only are the papers for 1931 included but also some of those in hand for 1932 whether already printed or still in press.

PUBLICATIONS FOR 1931-32

Armitage, George. Osteoma of the frontal sinus: with particular reference to its intracranial complications, and with the report of a case. Brit. J. Surg., April, 1931, 18, 565-580.

Surgeons-in-Chief, pro tempore. (Professors Putti and Heuer.) From the early days we have enjoyed the closest cooperation with the orthopoedic and surgical departments of the neighboring hospital for children. With the late Robert W. Lovett, the plan of having a weekly exchange visit with the combined staffs of the two hospitals was put into effect. The primary idea on his part was that it would broaden the experience of his group could they thus keep in touch with the problems of general surgery. It was obvious that we would be the chief gainers for at the Children's Hospital we would see surgical maladies of a type that rarely come under our observation, and at the Brigham could count upon receiving valuable suggestions and criticisms of our peculiar way of treating adult orthopoedic cases. Since Dr. Lovett's death, his successors, Dr. R. B. Osgood and Dr. Frank Ober, have kept on with the program and the attendance at these early Tuesday morning ward visits and demonstrations, alternating between the two hospitals, bears witness to the continued enjoyment and profit gained from them.

In recognition of this long enduring inter-hospital alliance, it appeared to be a particularly appropriate gesture should an orthopoedist be invited to act as my locum tenens. There could only be one choice, namely, Professor Vittorio Putti, and he was given an official

leave of absence by the University of Bologna for the express purpose. As all orthopoedists know, Professor Putti is a bachelor who lives and conducts his celebrated clinic in a most picturesque XVIth century Benedictine Monastery known as S. Michele in Bosco situated on an isolated hill overlooking the ancient city of Bologna where the university idea had its birth. That he was willing to drop his important work and after a long voyage exchange his comfortable abode in its quiet sylvan retreat for a cot in the Resident's quarters facing the noisiest street corner in Boston was a tribute not only to the Brigham but to the Children's Hospital as well. For his skill as a surgeon and contributions to his special subject, Professor Putti has a world-wide reputation. Beside this, he is a student of medical history, a bibliophile, and a scholar whose charming personality will not easily be forgotten by the young men who were privileged to come in contact with him as a co-worker.

For a week in the month of July, Dr. George J. Heuer, recently appointed Professor of Surgery at the Cornell Medical School in New York, and who will be Surgeon-in-Chief of the newly erected Medical Center there, was our second appointee as Surgeon-in-Chief, we having been entitled to have two representatives owing to my neglect in appointing someone during the past year.

After Dr. Heuer's graduation from the Johns Hop-kins Medical School in 1908, he served as my personal clinical assistant for the ensuing year, this being the first appointment of the kind I was permitted to make. His subsequent career at the Johns Hopkins and at the University of Cincinnati, now capped by his appointment to Cornell, has been followed with the greatest pride, and my suggestion that he do me the honor of acting as my last official substitute here at the Brigham he gener-

REPORT OF THE SURGEON-IN-CHIEF

ously and promptly accepted. From the students' standpoint, it is regrettable that his all-too-brief term of service should have come in mid-summer for he not only is an inspiring teacher and a clinician who instills the utmost confidence in his patients, but his skill, resourcefulness and composure at the operating table put him in a class by himself as an ace of operating surgeons. What his stay among them meant to the house staff, some of whom are soon to join him in his new hospital in New York, can be readily appreciated.

CHANGES IN PERSONNEL. Resident Surgeons. On May 1, 1931, Dr. A. J. McLean, after six years' contact with the Brigham Hospital, terminated his term as Resident surgeon and took up his residence in Portland, where he promptly was appointed Instructor in Surgery and Neurosurgery in the University of Oregon. Dr. McLean is a man who inherited from his Scottish ancestors a superhuman capacity for work combined with an intellectual receptivity discouraging to those of less active mind and body. Coming here from the Johns Hopkins in July, 1925, he passed through all of our grades from house officer to resident, meanwhile holding the Arthur Tracy Cabot Fellowship for a year and the George Gorham Peters Travelling Fellowship. If native ability and long training indicate anything, a brilliant career in surgery lies ahead of him. He was succeeded in the residency by Dr. Richard H. Meagher who likewise had moved up to this coveted position through our successive ranks and from his record highly deserved it. Two months later, he was obliged temporarily to withdraw and Dr. Frank N. Glenn, one of our recent Assistant Residents who shortly before had gone to California to enter practice, was prevailed upon

¹ Note here is made of changes in positions held by the surgical staff from January 1, 1931, to the date of writing, July 1, 1932.

to return and act as interim Resident for three months, from July to September. He performed his duties so acceptably he was rewarded by the George Gorham Peters Travelling Fellowship, and having passed the winter in Edinburgh with Professor Wilkie, one of our former Surgeons-in-Chief, pro tempore, is now at this writing on his way around the world.

Assistant Resident Surgeons. Dr. Glenn's service in this capacity, as noted above, terminated April 1, 1931, and he was succeeded by Dr. Walter W. Boyd, a former house officer who had just completed a service at the Lying-In Hospital. Dr. Boyd resigned February 1, 1932 and went abroad to make a semi-official visit of the principal obstetrical hospitals in Europe with the expectation of devoting himself to this field of work. When Dr. Meagher became Resident on May 1, 1931, he was succeeded by Dr. Kenneth W. Thompson, a former house officer, and at the same time Dr. Bronson Ray was likewise advanced to be assistant resident, filling the post vacated by Dr. Glenn.

Meanwhile, on March 15, 1931, Mr. W. R. Henderson completed his term as assistant resident in neurosurgery and returned to Edinburgh to become Mr. Dott's assistant at the Royal Infirmary. His place was taken by Dr. Thomas I. Hoen who in September, 1931 proceeded to Montreal in order to continue his neurosurgical training there under Dr. Penfield. Dr. William deG. Mahoney, the next in line, at the expiration of his term as house officer had come on duty March 15, 1931 and served continuously for a year when he went abroad on a Brigham Surgical Fellowship to work with Professor Foerster in Breslau. There followed in these overlapping neurosurgical positions Dr. Bronson Ray who was titularly transferred to neurosurgery from his assistant residential post in general surgery in October, 1931.

He in turn is being supplemented by Dr. R. U. Light who on completion of his house officership on November 1, 1930, after relieving his air mindedness by a flight over Central America, served as A. T. Cabot Fellow until April, 1932 when he resumed his work in the clinic

as Dr. Ray's second in neurosurgery.

Of Dr. Quinby's Assistant Residents in Urology, Dr. R. P. Middleton withdrew July 1, 1931 to enter practice with his father in Salt Lake City, and Dr. John C. Eckels left in September, 1931 for a period of work abroad on a Moseley Travelling Fellowship. He was succeeded by Dr. James B. Herring, a medical graduate of the University of Pennsylvania who prior to this appointment had been acting as a voluntary graduate assistant.

House Officer Positions. The successive paired members of our junior staff who have graduated since January, 1931 have changed their status as follows: The graduates of February, 1931: Dr. F. A. Fender was appointed neurosurgical resident at the Boston City Hospital, and Dr. Mahoney who has been already accounted for expects to join the group of several Brigham representatives in the newly opened Cornell Medical Center next autumn. The graduates of May, 1931: Drs. Bronson Ray and K. W. Thompson, have, as related, been advanced to higher rank, the former also expecting to go to Cornell the coming September while the latter will remain as assistant resident under Dr. Cutler. The graduates in August, 1931: Dr. John H. Lawrence was appointed Assistant Resident in Medicine at the Strong Memorial Hospital in Rochester, and Dr. Donald E. Dial Assistant Resident in Surgery at the New Haven Hospital. The graduates of November, 1931: Dr. J. H. Boyes was appointed Resident in Surgery at the Stanford University Hospital in San Francisco, and Dr. L. H. Strayer became Junior Fellow in Surgery at the Presbyterian Hospital in New York. The graduates of February, 1932: Drs. C. C. Bishop and L. G. Kendall are now serving as Assistant Resident Surgeons on the general service and expect a transfer to Cornell this coming September. The graduates of May, 1932: Dr. C. M. Gray is Assistant Resident in Medicine at the Kansas City Hospital while Dr. A. N. Berry is taking a house officership at the Boston Lying-In Hospital. The graduates of August, 1932: Dr. John W. Kane plans to go to Rochester as Assistant Resident in Neurosurgery under Dr. Van Wagenen, and Dr. Stanley Bysshe will take an interneship at the Sloane Hospital for Women.

Thus by stretching the proper scope of this report which should concern itself with 1931 alone, the movements of our graduating house officers are accounted for up to the time when I shall turn the responsibility of providing for them over to my successor. Those who remain as the residual of a former régime can be assured that their new Chief, a Brigham graduate himself, will have as great an interest in their future careers as if they had been his personal appointees. It is particularly gratifying to me that a group of our former house officers, Glenn, Mahoney, Ray, Bishop and Kendall, with Richard Meagher as their senior are to represent us at Cornell where they will come under Dr. Heuer's stimulating leadership.

Voluntary Assistants and Fellows. During 1931 and 1932, the following graduates have been temporarily attached more or less intimately to the activities of the surgical clinic, most of them because of their special interest in neurology. Dr. Alexander Zeitlin, an assistant professor of the North Caucasian University of Rostov-on-Don, who came highly recommended as an

aspirant for neurosurgical experience, had his sojourn cut short by orders for his return from the Soviet Government. Dr. Carl List, a highly trained neurologist and assistant of Professor Schuster of Berlin served most acceptably and to our great advantage from February, 1931 for the ensuing twelve months. Likewise for a year following May, 1931, we profited from the presence of Dr. Benno Schlesinger, a promising surgeon particularly well versed in neuro-anatomy who was sent here from the University of Vienna on a Rockefeller Fellowship. Meanwhile, Mr. W. R. Henderson of Edinburgh and Dr. François Ody of Geneva who also were Rockefeller fellows had in July, 1931 and September, 1931 respectively concluded their terms of service. Dr. Abraham Kaplan, a Harvard medical graduate of 1927 who had subsequently served as assistant to Dr. Ernest Sachs at the Barnes Hospital for a year and then successively as fellow in neurosurgery and resident neurologist under Dr. Foster Kennedy at the Bellevue Hospital in New York, proved a most acceptable coworker for the year following July, 1931, as did likewise, Dr. Robert A. Groff, a graduate of the University of Pennsylvania who on the recommendation of Dr. Francis Grant joined us October, 1931 and remained for the following nine months. Briefer sojourns were made by the following: Dr. Johannes Rives sponsored by Professor Puusepp of the University of Tartu, Esthonia, serving on a Rockefeller Fellowship; Dr. A. Lehner of the University of St. Gallen, Switzerland; Dr. Ferdinand Verbeek of the University of Groningen, all of whom were primarily interested in neurosurgery. At the present time serving as voluntary assistants are Dr. D. Vasiliu of the University of Bucharest; Dr. A. R. D. Pattison, assistant to Professor Grey Turner of Newcastle-upon-Tyne, and holder of the Rutherford Morison Travelling Scholarship of the University of Durham and Dr. Arist A. Stender, Assistant in the Nerve Clinic of the University of Hamburg, sponsored by Dr. George Schaltenbrand and here on a Rockefeller Fellowship.

It has been gratifying that these men should feel that their time in the clinic is profitably passed even though their number makes it impossible at times to give them the individual attention they deserve and some are obliged to content themselves by picking up what they can from observation of rather than actual participation in the work. So far as possible, they have been given problems to occupy their spare time, but even this is not always feasible.

Surgical Tabulations. Buried in preceding reports may be found various lucubrations concerning the annual publication of departmental statistics. In retrospect there is perhaps more to be said of their futility than in their behalf. Both services, medical and surgical, began bravely at the outset not only to publish classified tables of the disease and injuries that had come under treatment, but the surgeons even went so far as to give a brief synopsis of every case in which an operation had been followed by a fatality. This was finally given up because of the labor it entailed and its essential uselessness unless other hospitals adopted a similar system which was more than could be expected. Dr. Christian in course of time ceased to include in his report the customary tabulation of medical diseases and now, after all these years, in the present report for reasons primarily of economy, the corresponding surgical table will be omitted with due apologies to Miss Robbins and her faithful cohorts of the record room who have gone to the trouble of preparing it with their usual detail and accuracy. So it comes about that the

REPORT OF THE SURGEON-IN-CHIEF

only check on the year's work will be found in the compressed figures of the accompanying table. It shows the smallest number of patients discharged since 1922 and thereby reflects the curtailing effect on our work of these present hard times.

YEAR	Total Discharges	Deaths	General mor- tality %	Diagnoses	Excess % of Diagnoses	Patients oper- ated upon	Case % op- erated upon	Operations	Post-operative deaths	Case mortality	Operative mor- tality %
1913	690	35	5.00	690	. 0	477	69.1	693	29	6.0	4.2

It has been said that no one ever consciously does any particular thing for the last time without a certain feeling of sadness—even a chore like the annual preparation of a hospital report. So when for the last time I shall close the door on these my cherished and familiar quarters where, surrounded by pictures of my friends to hearten me, so much has gone on these past twenty years, I foresee that it will be a difficult moment both for me and for those loyal persons in my employ who

at the same time lose their jobs. We will have reason to envy the faithful hospital servants, chiefs of their departments from the early days as I have been of mine, Miss Packard the housekeeper and her assistant Katherine Kelley, Harry Coman the apothecary, John Aitken the mechanician who like a proper Scot is master of all trades and Jack of none, Miss Cheney of the hardsledding Social Service department, Miss Crawford the chief clerk untouchable in her cage, William Morgan who must have laid on a thousand miles of our hospital grey paint, Christine McDonald who'll be making the best ice cream in Kingdom come. There is also Adolph Watzka who has long made up for his somewhat shorter service by choosing to "live in." I roughly calculate that during these past fifteen years he has lifted from stretcher to operating table and back five thousand tons of humanity, his other multifarious duties being considerably more time-consuming and onerous. Such permanency of service shows what a happy family we have been with all the gives and takes of the day's work year in, year out. Fortunate it is that for them there's no age limitation, and I trust they may go on forever.

To the Superintendent, to the Principal of the Nursing School, and to my colleagues in Medicine and Pathology and Roentgenology for their unfailing co-operation at all times I wish to express my heart-felt gratitude, while to my loyal juniors on the surgical staff who have stood by me through thick and thin I owe if possible an even greater debt. And to my, as well as their, friend and one-time pupil shortly to succeed me, I can wish nothing better than that the position he is certain to adorn will at the same time bring him as great happiness and satisfaction as it has brought to me.

HARVEY CUSHING,

Surgeon-in-Chief.

August 1, 1932.

REPORT OF THE SURGEON-IN-CHIEF

Summary of Statistics

JANUARY 1, 1931 to JANUARY 1, 1932

Total number of surgical admissions in 1931	2,345 -120 	245
Total number of surgical cases discharged or transferred Total number of deaths	2,250 125	2,465
Total number of cases remaining in wards, Jan. 1, 1932	2,375 90	2.45
Total number of operations	1,849 147	2,465 1,996

Report of the Physician-in-Chief

ENDING OF SERVICE OF DR. CUSHING. This annual report is the last one in which Dr. Cushing as Surgeonin-Chief will include a report on the work of the surgical service, since during the next year his service will end by reason of limit of age. How fruitful that service has been is recorded in the successive annual reports of the Peter Bent Brigham Hospital and is testified to by the opinions of his colleagues and by honors bestowed upon him by universities and surgical and scientific associations the world over. Dr. Cushing ever has been a great influence on those colleagues and associates who have had the great good fortune to work with him in the Peter Bent Brigham Hospital during the twenty years that have elapsed since he took active charge as the first surgeon-in-chief of the Peter Bent Brigham Hospi-To us he has shown the methods of a scientific enquiring mind basing opinions on meticulously careful clinical observation and perfected surgical technique, applied to patients and controlled, when needed, by animal experimentation, and his influence has permeated all departments of the hospital. It has been my privilege, as Physician-in-Chief throughout all of his period of service at the Peter Bent Brigham Hospital, to have a very close association with Dr. Cushing and to be stimulated to better work by him. How fast the years have flown; how rich the experience; how greatly will his active presence be missed; to you, Dr. Cushing, I and my associates on the medical service of the Peter Bent Brigham Hospital are deeply indebted; regretfully we see your service as Surgeon-in-Chief end.

BITS OF P. B. B. H. HISTORY. In the previous annual report under this heading I commenced a record of events connected with the beginning of the Peter Bent Brigham Hospital. In that report I described the association of Francis W. Peabody with the hospital. In the inauguration of a new institution two things are very important to its subsequent success, the selection of the personnel and the organization under which they are to function. Something of the former was discussed last year; this year the latter will be described.

Now for twenty years the Peter Bent Brigham Hospital has been actively engaged in its daily work under a plan of organization which has gradually evolved from one submitted to the Trustees of the Peter Bent Brigham Hospital in December, 1911. It is of interest to see just how far the original plan has been adhered to and in what respects modifications have been made.

On October 23, 1911 a plan of organization for the staff of the Peter Bent Brigham Hospital was drawn up in the form of a letter directed to the President of the Trustees and submitted to Dr. Cushing for his criticisms and suggestions. His answer is as follows:

Baltimore, November 2, 1911.

Dear Henry:

I am returning the letter and am sorry to have kept it so long, but I have been in Cleveland and have been harrowed with an unusual lot of responsible work. I have made some minor changes, which I hope you can make out, as they are roughly penciled in, and have also added a postscript in regard to the necessity of getting hold of a reliable operating-room nurse and an anaesthetist at as early date as possible.

Ever yours, H. C.

One question that was discussed at this time was the retiring age. Dr. Cushing writes as follows:

Baltimore, November 20, 1911.

Dear Henry:

Why not put the surgical age of retirement for the attending surgeon at sixty and the physician at sixty-three or sixty-five, as you think best?

I have an idea that the surgeon's fingers are apt to get a little stiff and thus make him more or less incompetent before the physician's cerebral vessels do. However, as I told you, I would like to see the day when somebody would be appointed surgeon somewhere who had no hands, for the operative part is the least of the work. Then, of course, many of us may get, vascularly speaking, a little inelastic well on this side of sixty, or may remain in this respect as youthful at seventy as are others at fifty. This is all a lottery of inheritance and habits, and I shall be very glad, for one, to have it legislated to stop active work at sixty.

Ever yours, H. C.

Another question under discussion concerned postmortem examination. On this Dr. Cushing writes.

BALTIMORE, NOVEMBER 29, 1911.

Dear Henry:

I have asked a number of people about the autopsy matter, and the opinions are most variable. Of course they all think, just as we do, that theoretically it is a good plan, but the difficulties are many. Most of them think it would mean the withdrawal from the hospital at the last moment of patients who are critically ill by those who object to a post-mortem investigation. I was under the impression for a while that they had such a rule at the Rockefeller Hospital, but I have learned that they do not. I fear that it is a thing that must come slowly with the general education of the public, and not a thing we can force down their throats. However, there is no harm in trying.

Ever yours, H. C.

Finally the following letter was transmitted.

BOSTON, MASS., DECEMBER 7, 1911.

Mr. ALEXANDER COCHRANE,
President Board of Trustees,
Peter Bent Brigham Hospital.

Dear Sir:

In our judgment it seems that it is time now to proceed to the further organization of the Staff of the Peter Bent Brigham Hospital, in order that the services of some of the men whom we believe desirable for that Staff may be secured. Delay in this matter might be the cause of our losing such men owing to their acceptance of positions elsewhere, not knowing of the possibilities in the Peter Bent Brigham Hospital.

Before proceeding to a consideration of individuals for positions, it seems to us desirable that a general plan of Staff organization be determined upon. So far as we know, the only steps so far taken to that end are the appointment of the Physician-in-Chief, the Surgeon-in-Chief, and the Superintendent, and the expression in the letter to Dr. Cushing and myself that we should have the privilege of nominating to the Board of Trustees our various assistants. In regard to the general organization of the Hospital Staff, we would advise

REPORT OF THE PHYSICIAN-IN-CHIEF

GENERAL STAFF ORGANIZATION

Staff (1) That the Staff of the Hospital consist of the Physician-in-Chief, the Surgeon-in-Chief, and their respective assistants, with the exception of the House-officers; the Consulting Pathologist, and the Consulting Physiologist, and the Consulting Chemist, and their assistants; the Superintendent, and such others as may subsequently be added on the recommendation of the Executive Committee of the Staff to the Trustees.

Age Retire- (2) That all Staff appointments shall cease automatically ment. when the encumbent reaches the age of sixty-three years.

Executive (3) That there shall be an Executive Committee of the Committee Staff composed of the Physician-in-Chief, the Surgeon-in-Chief, and the Superintendent.

(4) That each member of the Executive Committee shall have the privilege on request of appearing at meetings of the Trustees to present matters immediately concerned with his Department.

Nominations (5) That the Physician-in-Chief, the Surgeon-in-Chief, and the Superintendent each shall have the privilege of nominating to the Trustees his assistants, and at any time recommending their dismissal for adequate cause.

(6) That the other members of Staff shall be nominated to the

Trustees by the Executive Committee of the Staff.

Medical and We submit in connection with the above, the enclosed Surgical Staff schedule of Staff positions (see pages 118 and 119), which will give some idea of the probable number of men needed when all of the beds of the Hospital are occupied, and when the general

when all of the beds of the Hospital are occupied, and when the general work of the Hospital is fully under way. Furthermore, we have appended to this schedule salaries suggested for these various members of the Staff. It is to be realized in this connection that conditions in medicine and in hospitals are very rapidly changing, and that new opportunities with increasing salaries are being offered to young men engaged in such work. Consequently we regard this schedule of Staff positions and of salaries as a tentative one, expressing what in our judgment today are likely to be the needs of the Hospital during its first few years of existence, and what it will be necessary to pay to secure these services. Doubtless later increases will have to be made in many of these.

Consulting
Pathologist,
Physiologist,
Chemist

We believe that at the present time, the best arrangement for the work of the Hospital will be to throw the burden of it on the resident staff, the Physician-in-Chief, and the Surgeon-in-Chief, with the aid of the non-resident assistants appearing in the schedule immediately preced-

ing Physician-in-Chief and Surgeon-in-Chief; that in addition to these there should be a Consulting Pathologist, a Consulting Physiologist, and a Consulting Chemist, with no regularly fixed duties, to be called upon freely for advice, and to have complete freedom of visiting and making suggestions in the aid of the work of all Departments of the Hospital. Furthermore, it is believed that no salaries should be paid to these men until such time as it is evident that such service is making a considerable demand on their time.

Consultants It is furthermore believed that at an early day it will in specialties be necessary to secure the services of other consultants covering certain of the specialties, namely, neurology, otology, ophthalmology, dermatology and laryngology. As far as the wards of the Hospital are concerned, with the beds divided for medical and surgical patients, relatively little demand will be made upon the services of such consultants for the specialties, and consequently they can be secured either without salary, or with small remuneration. In connection with the Out-patient Department probably in a short time larger demands will be made upon men engaged in these special lines of work, and other arrangements will then have to be made.

Out-patient In the beginning the Out-patient Department will un-Department doubtedly be small, and it is planned to organize this at the outset for a relatively small number of patients, and to provide ample space for growth. It is believed this Out-patient Department should be open continuously for the treatment of patients, and at first should be operated by the medical and surgical staff as shown in the schedule referred to above. With growth it may be necessary to organize separate departments covering the special lines of work, and then a considerable staff of men for these will be needed. It seems wise to us to postpone such organization until we can determine from the method of development of the Out-patient Department under the plan of having a continuous Out-patient Service what are the immediate and future requirements for such special departments. These requirements naturally will be influenced by the possible development about the Peter Bent Brigham Hospital of various special clinics, to which ambulatory patients advantageously can be referred. Should the Trustees wish to have an estimate of the probable cost of such subsequent developments, we think a tentative figure of \$100.00 per month for each man on duty daily in such an Out-patient Department might be given, and that for some time \$1,200.00 per Department, or \$6,000.00, if there are five of these Departments, might be considered sufficient.

Roentgenologist In regard to a Roentgenologist we have put down no salary figure. This Department will probably involve the employment of one or more technical assistants not graduates in medicine, with the probable supervision of a resident or visiting graduate in medicine. The exact organization must depend in large part upon the training and ability of the men whom we can secure to do the technical work. Some idea of the probable cost of such a department, which should be established as early as possible, may be obtained from the figures which we submit of the cost of this department during the past year at two large hospitals, the Boston City Hospital, \$5,581.29, and the Massachusetts General Hospital, \$4,663.58, which figures include salaries and the cost of supplies, but not cost of power, light and caretaking of building. From this cost may be subtracted such fees as are paid by patients for Roentgen ray examinations.

Photographer In similar way no salary has been named for a photoand artist grapher and an artist. Both will be needed in the work of the Hospital. The photographic work possibly may be combined with that of the roentgenologist. The personnel of this de-

REPORT OF THE PHYSICIAN-IN-CHIEF

partment will be a determining factor; no definite figure can be set for his salary nor for the cost of his materials. The call for work by an artist is apt to be a varying quantity, and so difficult of estimate. Arrangements may be made for utilizing a portion of the time of artists employed in the Harvard Medical School or other adjacent institutions. Under these circumstances a probable cost cannot be stated until organization has progressed much further.

One other matter we deem of the very greatest importance Autopsies for the future success of the Peter Bent Brigham Hospital, and we would ask the Trustees of the Hospital to take early action upon it. This matter has reference to the securing of autopsies on patients dving in the Hospital. We believe that the best interests of the development of the scientific work and improvement in our methods of treating patients can only be obtained by the careful post-mortem study of fatal cases. To this end, we would ask the Trustees to adopt a rule that on admission to the general wards of the Hospital each patient, and his nearest relative, as provided by the law governing such matters, shall be required to sign an agreement providing that, in case of his or her death, a post-mortem examination of the body shall be made whenever in the judgment of the Staff such an examination is desirable. We feel that this matter cannot be too strongly insisted upon. Such a rule is now established for all of the Government Hospitals (Marine, etc.) in this country and has long been in existence in all the great German clinics.

Dr. Cushing and myself will separately submit a schedule of what we believe needed in the way of members of the Staff at the time of the

actual opening of the Hospital.

We would ask that the Board of Trustees indicate to us now the date on which they will require our services, it being understood that on that date our salary payments will begin, in order that we may make the necessary arrangements of our work to meet these engagements with you. We ask that this date be named thus far in advance for the reason that both of us are holding positions and are engaged in work, a certain part of which will need to be discontinued before we begin our service at the Brigham Hospital. It is desirable that ample notice be given to the institutions with which we are at present connected of the time at which our resignations are to take affect.

Very truly yours,

HENRY A. CHRISTIAN, HARVEY CUSHING.

P.S.: Dr. Cushing wishes to add that in view of the difficulties of training a new operative staff for responsible surgical work, it will be necessary for him at as early a date as possible, to select and educate for her special duties an operating-room head nurse, as well as an anaesthetist. He feels that both of these women should have at least six months of special training, and should visit other large clinics before undertaking their work at the Brigham Hospital; and that their salaries—or such proportion of their future salaries as may seem reasonable—should begin as soon as the proper individuals for these tasks can be selected, and an agreement made with them for a certain term of service after the opening of the Hospital.

SCHEDULE OF STAFF OF PETER BENT BRIGHAM HOSPITAL Submitted to Trustees, December 7, 1911

This letter was acknowledged as follows by Mr. Cochrane, President of the Trustees:

BOSTON, MASS., JAN. 16, 1912.

Dear Dr. Christian,

Your letter of January 14 was duly received.

The Trustees of the Peter Bent Brigham Hospital at a meeting held yesterday acted favorably on the recommendations made in the joint letter of yourself and Dr. Cushing of Dec. 7th, your letter of Dec. 7th, and Dr. Cushing's letter of Jan. 10th.

Yours very truly,

ALEXANDER COCHRANE.

When the hospital was completed and all the wards open for patients, most of this plan was in effect except that the terms, visiting physician and surgeon, were changed to physician and surgeon and on the surgical side this post was divided to give two surgeons. Salaried assistant visiting physicians and surgeons have never been appointed; the work contemplated for them is done by associates in medicine and surgery receiving no remuneration for their services. Shortly the title of the consulting pathologist was changed to pathologist and a salary provided. On further consideration it was deemed inadvisable to carry out the recommendation made about autopsies, and we have proceeded under the plan of seeking permission in each case for a post-mortem examination. As yet no hospital photographer or artist has been provided. In the intervening years the resident staff has been enlarged to twelve house officers, five assistant residents and a resident; two pathological house officers, a roentgenological house officer and assistant resident in roentgenology and a dental house officer have been added; the visiting staff has had added two physicians, a genito-urinary surgeon, a consulting dental surgeon and a group of senior associates, associates and junior associates in medicine and surgery. No provision, as suggested in this letter of organization, for the ultimate development of special departments in the Out-Door Department under the charge of men on salary has ever been made. In the years since the hospital opened the expenditure for the Roentgen-ray department has increased greatly but receipts from patients

fully cover this expenditure.

This original plan for organization of the medical and surgical staff, when it was fully developed including special departments in the Out-Door Department, called for an annual budget for the salary of the professional staff amounting to \$29,800, or without the special departments \$23,800. Twenty years have passed since these recommendations were acted upon favorably by the Trustees; in 1931 the actual budget from the hospital for the medical and surgical staff was \$24,931.05. It is noteworthy that in this twenty-year period no one of these professional salaries has received any increase, and though individuals have been added to take care of the increasing work of the hospital, the total budget is essentially that advised twenty years ago for the same professional service to the hospital and is nearly \$6,000 less than what was then considered a reasonable development of the medical and surgical work if special departments in the Out-Door Department were developed. In this annual report Dr. O'Hare comments on the lack of special consultants in the Out-Door Department as one of its main defects. This failure to increase the budget for the medical and surgical staff since the beginning of the hospital must be regarded as a failure to keep pace with what has been done in all other similar hospitals in the same period of time, so far as I know.

THE USE OF DIGITALIS AT THE P. B. B. H. In the May, 1930, Bulletin of the American Heart Association there appears the following:

After careful consideration, the American Heart Association recommends the following three resolutions:

 That tablets or capsules of powdered digitalis leaves be dispensed in all cases where digitalis is indicated, ex-

cept in emergencies.

2. That such digitalis preparation be standardized by a recognized method of biological assay, such as the cat or frog, for biological potency, but that efforts be made to secure uniformity of activity, so far as possible, by adhering to one of these methods of standardization.

That the digitalis be further standardized for its absorbability and efficacy by administration to selected

patients suffering with auricular fibrillation.

In connection with this it is of interest to see how the early patients with heart disease were treated at the Peter Bent Brigham Hospital. The second patient to be admitted to the medical service was diagnosed chronic cardiac valvular disease, mitral insufficiency. Today this patient would be diagnosed chronic nonvalvular heart disease or chronic myocarditis and hypertension. He was treated by bed rest, a light diet and was given 15 grams of magnesium sulphate every other morning and 0.09 grams of powdered digitalis leaves three times a day. The fourth patient to be admitted had chronic nephritis and hypertension. When it was thought she needed digitalis it was prescribed as powdered digitalis leaves 0.09 grams every four hours. The eighth patient was diagnosed chronic myocarditis and auricular fibrillation. Her digitalis was given in the same way. The eleventh patient, having chronic myocarditis, similarly received powdered digitalis leaves but in somewhat larger dosage, 0.12 grams every four hours. Thus nearly twenty years ago digitalis was being used at the Peter Bent Brigham Hospital in the form recommended in 1930 by the American Heart Association.

In the intervening years, except for occasional trials of other preparations of digitalis or when intravenous or intramuscular medication with digitalis seemed needed, we have adhered to the use of powdered digitalis leaves because the results seemed so satisfactory. In the earlier days digitalis leaves were purchased and tested. on animals through the courtesy of the Laboratory of the Department of Pharmacology of the Harvard Medical School. From the powdered leaves pills were made using glucose solution as a vehicle. These were tested out on patients and then utilized in treating our cardiac patients both in the wards and out-door department. In other words the advice of the American Heart Association for the present time (1930) was being followed. Dosage has been varied from time to time with a resultant varying speed in obtaining digitalis effects, but no other change has been made. Now we purchase our pills of digitalis all made up; the results from them are entirely satisfactory. The manufacturer has tested the efficiency of the digitalis on animals. We check his results by clinical trial. It is a fact to the credit of American pharmaceutical houses that in this period of 20 years all digitalis sent us has been satisfactorily efficient. It is probable that the Peter Bent Brigham Hospital was among the first of American hospitals to use pills of powdered digitalis leaves as its accepted standard preparation of digitalis.

PHYSICIANS-IN-CHIEF, *Pro tempore*. One of the most pleasant experiences of each winter is the visitation of our Physicians-in-Chief, *pro tempore*. To these men, who come to live for a period in the hospital and conduct our medical work, we owe a real debt of gratitude. Little do they realize, I am sure, how much they give to us from the deep wells of their personality and their

professional experience. In the calendar year 1931 it happens that we had two such visitors, since the *protempore* for 1930-31 chose the spring time and the one for 1931-32 the autumn.

In the spring of 1931 Dr. Lewellys F. Barker, of Baltimore, Professor of Medicine, emeritus, of the Johns Hopkins Medical School, brought to us the charm of a very unusual personality and the erudition of a scholar in medicine mingled with the skill of a highly trained clinician particularly interested in the psycho-neuriatic phases of disease. Dr. Barker served us happily as 17th Physician-in-Chief, pro tempore, and when he left, there went with him the affection and professional respect of a hospital staff that had learned from him much that was worth while. After he went, it was discovered that all available dictionaries had had an unwonted use.

In the autumn of 1931 Dr. Campbell P. Howard of Montreal, Clinical Professor of Medicine at McGill University and Visiting Physician at the Montreal General Hospital, served most acceptably as 18th Physician-in-Chief, pro tempore. After graduating in Medicine at McGill, he became in Baltimore an assistant of Osler, who had been a devoted pupil of his father, and then returned to Montreal before going to Iowa City as professor of medicine in the University of Iowa, whence later he returned to his native Montreal. With a medical heritage from a father, who was of very unusual attaintment as a clinician and a much beloved physician, McGill, Johns Hopkins, Iowa and again McGill have developed in this, our most recent Physician-in-Chief. pro tempore, the type of teacher at his best at the bed side. Exemplifying careful clinical examination correlated with a rich store of experience gathered at other bed sides and from medical literature, from him we

learned to reappreciate the importance of what may be termed the English influence on our profession of medicine. A skilled bed-side teacher, Dr. Howard taught us that the careful study of many patients is, after all, the most important link in building up a thorough knowledge of internal medicine with which to teach students and to practice the healing art, provided that this link is strengthened by the results of many hours of reading in the medical library. Dr. Howard has left with us many pleasant memories of his sojourn.

CHANGES IN PERSONNEL. During 1931 Dr. Francis C. Hall resigned as Associate in Medicine to undertake special work on arthritis at the Boston City Hospital; Dr. Marshall N. Fulton resigned as Resident Physician completing a service on the resident staff which began March 1, 1926, when he became medical house officer, a service which had been notable for its efficiency and effectiveness in all respects; Dr. Fulton was appointed Junior Associate in Medicine at the Peter Bent Brigham Hospital and to succeed him Dr. Richard G. Hahn was promoted to the post of Resident Physician. In 1931 Dr. S. Marion Salley ended service as Assistant Resident Physician to undertake medical work at Chaco in Colombia, South America. To fill vacancies Dr. Paul H. Wosika, who comes to us from Passavant Memorial Hospital, Chicago, and Dr. W. K. Purks, who comes to us from Grady Hospital, Atlanta, Georgia, were appointed Assistant Resident Physicians.

As medical house officers the following men completed service and began on other work as follows: Dr. Paul C. Dozier to take a service at the Boston Psychopathic Hospital, Dr. Earl A. Harvey to begin practice in Denver, Colorado, Dr. Daniel Blain to take a neurological service at the Boston City Hospital, Dr.

Edwin J. Doty to take a psychopathic service at the University of Michigan, Dr. James H. Marks to take a roentgenological service at the Peter Bent Brigham Hospital, Dr. Norman A. Pokorny to take a pediatric service at the Baby's Hospital in New York, Dr. Samuel A. Diack to begin practice in Portland, Oregon, Dr. Harry Buhrmester to become a member of the medical staff at the Boston Dispensary and Dr. Richard H. Young to take a neurological service at Bellevue Hospital, New York.

REPORT OF DR. O'HARE ON THE OUT-DOOR DEPART-MENT. As shown in the accompanying table the Medical O.D.D. has shown a falling off not merely in the total number of visits and total new patients but also in the total numbers coming to all the Special Clinics except the Luetic and the Blood Clinics. The explanation for the Luetic Clinic increase is somewhat uncertain although part of it is undoubtedly due to the fact that many more patients in the Surgical O.D.D. are having routine Wassermanns and those found positive are being directed to the Luetic Clinic for treatment. Furthermore many come to the Clinic now because of economic reasons. The increase in the Blood Clinic is due to the frequent visits of many of the pernicious anemia patients for treatment with the new intramuscular liver extract.

STATISTICS FOR MEDICAL O.D.D.

	1930		1931	
	Patients	Visits	Patients	Visits
Total	3,390	43,478	3,203	39,977
General Medical		21,180		19,088
Special		22,298		20,889

This decrease in the total number of visits to the O.D.D. is without doubt a desirable thing. In times

past and even now, we have had far too many patients to handle in the way we would like. However, the problem of numbers has not been solved permanently, the decrease being largely due to a general decrease in illnesses treated in Out-Door Departments of all the Boston Hospitals. While these other institutions have shown a similar drop in their new patients, there has been a relative increase in their number of old patient visits. This is in contrast to our decrease. However, for a long time our average number of return visits for patients has been far greater than in any of the other local institutions. Their increased old patient visits is therefore only beginning to approach our ratio.

However, we should not close our eyes to the possibility that this drop in our numbers—desirable as it may be-may possibly be in part due to our own defects or omissions. The present depression has forced many self-satisfied concerns to take account of stock and see in what way their service can be improved. My four months service in the Medical O.D.D. has shown me that on the whole this department functions well and compares favorably with similar departments in other institutions. The only major weakness is the limitation of the department to Medicine and Surgery. At times it is very awkward and difficult to get a satisfactory special opinion on the condition of the sinuses, eyes, female pelvis, nervous system, etc. Usually it is necessary to refer the patient to another hospital. This frequently means marked delay and often loss of control of the patient. As an extreme example of what sometimes occurs let me cite what happened to one of our hypertensive luetics who had been for months under observation and treatment in our wards and in the Luetic and Renal Clinics. Because of an intractable headache he was referred to the Massachusetts Eve and

Ear Infirmary for an opinion on the sinuses as a possible cause of this headache. He went to the Infirmary as directed. By them he was referred to the Massachusetts General Hospital Out-patient Department and then sent into the Massachusetts General Hospital for observation. Practically all of the studies made by us on our wards including a lumbar puncture were repeated, unnecessarily. Eventually after several weeks he returned to us with the story of his wanderings and a statement that he had had two polyps removed without improvement in his headache. We still know nothing official about the condition of his sinuses in spite of the fact that a request for such information was sent with him at the time he was referred by us four months previously. It would be very helpful if some method could be devised for getting such consultation opinions promptly and in a less round about way.

I see no adequate remedy for this weakness in our system except a much larger O.D.D. containing the various specialties. Possibly we could solve the problem by having specialists in the more common fields attached loosely to our O.D.D. These men might see on one day a week only cases referred from the Medical or Surgical O.D.D. If the patients were absolutely confined to such references, no great increase in the numbers in our O.D.D. would occur, no great burden would be thrown on anyone, and we could get much needed information directly and with far greater speed than under the present arrangement.

If such a scheme is not possible, another remedy that might help is to have some form of consultation sheet acceptable to other hospitals containing a résumé of our information, a request for specific information and an addressed stamped envelope. There are a few other defects, the correction of which would make for a better service. None of these demand immediate attention but all should be kept in mind and should be corrected soon.

One very annoying feature in the O.D.D. is the frequent failure of patients to keep their appointments. It is difficult to find any adequate remedy for this. The probable causes for such failures to appear are that the patient gets better before his appointment, or he gets very much worse and is compelled to seek help elsewhere. In either case, the average patient probably sees no reason why he should waste five cents on a phone call to cancel his appointment. There seems to be no adequate remedy for this situation when the patients are new. Possibly one might obviate some of the difficulty with old patients who make their appointments at the time of their previous visit by asking them for a deposit of one-half the usual fee.

There is another group of patients who I believe cancel for another reason more easily remedied. These are the ones that are given appointments at 8.15 a.m. This is much too early for the mother of children who have to be fed and made ready for school at 9 a.m. They should, of course, refuse such an early appointment. I am sure, however, that many accept such an early hour without thinking about it at the time and then later decide that they can't make it and go elsewhere. It seems to me that some method of speeding up the time consumed in getting through the booking, etc. at the door could be devised so that these patients could come at 8.45 a.m. If those that were to be cared for by students reached them by 9 a.m. this would be as soon as many of them get into their hands under the present arrangement. The student is often late, the patient may be late, or there is a delay of threequarters of an hour in the booking.

One other condition of weakness which only indirectly concerns the management of the Medical O.D.D. is the teaching of the fourth-year students. Under the present arrangement these students do not see enough cases, averaging only one a morning. This is partially due to their own lack of knowledge and slowness and possibly in part to the teaching. It seems to me that they would see far more patients and would get much more training in handling ambulatory patients if each man spent one solid week of his two months entirely in the O.D.D. subject to the house officer whenever the visiting man is not there. This would also obviate the frequent absence from ward visits of a student who should be there to present a case.

Regarding the Special Clinics there is but little to say. With the exception of the Arthritic and Diabetic Clinics the men who are in charge are the same as in the preceding years. Dr. Monroe has taken the place of Dr. Hall in the Arthritic Clinic and Dr. Flynn is in active charge of the Diabetic Clinic succeeding Dr. Fitz. All the men are grateful for the decreased numbers of patients they have to handle because it means more careful study and management. Dr. Walker reports that "the treatment of his asthma and hay fever patients has been considerably better than in the previous several years." This he attributes to the smaller numbers and greater individual attention. Dr. Murphy reports marked success in the treatment of pernicious anemia patients with the new intramuscular liver extract, which he has perfected. This is of great value in the resistant cases, the very toxic patients that vomit and in those less serious cases who have difficulty in using liver. Furthermore the treatment is said to be less expensive than the usual treatment. One injection a week is believed to be sufficient to control the average patient whose blood has been brought to normal and evidence is accumulating to suggest that in many patients less frequent dosage will be needed. The biggest problem in the blood clinic is the treatment of those patients with spinal cord changes. These need the help of a trained orthopedist.

For the most part the other clinics are following the plans of previous years and are doing excellent work in the study and management of their special groups. They have had no unusual items to report.

Publications for 1931. During 1931 certain lines of investigation have been pursued by the members of the Staff, as shown by the following list of publications. Some of these represent work actually done in the preceding year, but, according to our custom, are noted in the Annual Report only after their completion and publication, thereby avoiding duplication in being noted once when the work is under way and the second time when completed and published.

The annual report provides an occasion to acknowledge helpful and cheerful cooperation from all members of our hospital family in facilitating the work of the medical service. On behalf of the members of the med-

REPORT OF THE PHYSICIAN-IN-CHIEF

ical staff I take pleasure in acknowledging our great indebtedness to all workers in the hospital.

HENRY A. CHRISTIAN,

Physician-in-Chief.

DECEMBER 31, 1931.

Summary of Medical Statistics

JANUARY 1, 1931 to JANUARY 1, 1932

Total number of admissions in 1931 Total number of medical cases remaining in the wards, January 1, 1931		1,980	2010
Total number medical readmissions discharged in 1931	155 1,821		2,049
Total number of medical cases remaining in the wards, January 1, 1932	,	1,976 73	2,049
Results on medical cases discharged in 1931 were as follows: Total number discharged well Total number discharged improved Total number discharged unimproved Total number discharged untreated Total number transferred to Surgical Service Total number dead	115 998 208 299 185 171		2,049
Total number of medical cases remaining in the wards January 1, 1932		1,976 73	2,049
			2,049

Visiting Physicians and Surgeons Pro Tempore

SIR CHARLES BALLANCE

K.C.M.G., C.B.; Consulting Surgeon to British Army, 1914-19; Col., R.A.M.C.; Consulting Surgeon to St. Thomas Hospital and to the National Hospital for Paralysis and Epilepsy; Surgeon-in-chief pro tem., P. B. B. H., October 15 to October 25, 1928.

DR. LEWELLYS F. BARKER

M.B., Univ. of Toronto, 1890; M.D. (Hon.) Univ. of Toronto, 1905; Queen's, 1908; LL.D., McGill, 1911; Emeritus Professor of Medicine, Johns Hopkins University and Visiting Physician, Johns Hopkins Hospital; Physician-in-chief pro tem., P. B. B. H., April 21 to April 27, 1931.

DR. FRANK BILLINGS

M.D., Northwestern Univ., 1881; M.S., ibid., 1890; Sc.D., Harvard, 1915; Professor of Medicine, Northwestern Univ., 1891-98; Professor of Medicine, Rush Medical College, 1898-1905; Professor of Medicine, Univ. of Chicago, 1905-24; Physician-in-chief pro tem., P. B. B. H., May 15 to May 20, 1916.

Dr. Lewis A. Conner

Ph.B., Yale Univ., 1887; M.D., Columbia Univ., 1890; Physician, New York Hospital, 1905; Professor Clinical Medicine, Cornell Univ. Med. School, 1905-16; Professor of Medicine, ibid., 1916; Physician-in-chief pro tem., P. B. B. H., April 8 to April 15, 1923.

PROF. OTFRID FOËRSTER

Professor of Neurology, Univ. of Breslau; Surgeon-in-chief pro tem., P. B. B. H., October 1 to October 14, 1930.

MR. GEORGE E. GASK

Graduate of St. Bartholomew's Hospital, London, England; Consulting Surgeon, B. E. F., receiving C.M.G. and a D.S.O.; Surgeon and Director of Surg. Unit to St. Bartholomew's Hosp.; Professor of Surgery, Univ. of London; Surgeon-in-chief pro tem., P. B. B. H., March 20 to April 3, 1921.

Dr. Duncan Graham

M.D., Univ. of Toronto, 1905; Professor of Medicine, Univ. of Toronto; Physician-in-chief, Toronto General Hospital; Physician-in-chief pro tem., P. B. B. H., March 3 to March 10, 1929.

DR. EVARTS GRAHAM

M.D., Rush Medical College, 1907; Professor of Surgery, Washington Univ., St. Louis, Mo.; Surgeon-in-chief pro tem., P. B. B. H., April 26, 1925-May 3, 1925.

REPORT OF THE PHYSICIAN-IN-CHIEF

- Dr. James B. Herrick
 - A.B., Univ. of Mich., 1882 (Hon. A.M., ibid., 1907); M.D., Rush Medical College, 1888; Professor of Medicine, ibid., 1900; Attending Physician, Presbyterian Hospital, Chicago, Illinois, 1895; Physician-in-chief pro tem., P. B. B. H., Feb. 15 to Feb. 21, 1924.
- Dr. George J. Heuer
 - M.D., Johns Hopkins Univ., 1907; successively Associate Professor of Surgery, Johns Hopkins Univ., Professor of Surgery, Univ. of Cincinnati, and Professor of Surgery, Cornell Univ. Medical School, New York, Surgeon-in-Chief pro tempore, P. B. B. H., July 12-16, 1932.
- Dr. Albion Walter Hewlett
 - B.S., Univ. of Cal., 1895; M.D., Johns Hopkins Medical School, 1900; Professor of Internal Medicine, Univ. of Mich., 1908-16; Professor of Medicine, Leland-Stanford Jr. Univ., San Francisco, 1916-25; Physician-in-chief pro tem., P. B. B. H., May 1 to May 4, 1915, and Jan. 2 to Jan. 8, 1916. Died Nov. 10, 1925.
- DR. CHARLES F. HOOVER
 - M.D., Harvard, 1892; Professor of Medicine, Western Reserve Univ., Cleveland, Ohio; Surgeon-in-chief pro tem., P. B. B. H., Feb. 3 to Feb. 9, 1924. Died June 15, 1927.
- Dr. Campbell P. Howard
 M.D., McGill, 1901; Professor of Medicine, McGill University,
 Montreal; Physician to Montreal General Hospital, Montreal; Physician-in-chief pro tem., P. B. B. H., November 16 to November 21,
 1931.
- DR. SAMUEL W. LAMBERT
 - A.B., Yale, 1880; Ph.B., *ibid.*, 1882; M.D., Columbia, 1885; A.M., Yale, 1905; D.Sc., Columbia, 1921; Professor Clinical Medicine, Columbia, 1903-19; Dean, Coll. Phys. and Surgs. (Columbia), 1904-19; Attending Physician, New York Hosp., 1896-1909; Attending Physician, St. Luke's Hosp., 1906; *Physician-in-chief pro tem.*, P. B. B. H., Jan. 24 to Jan. 30, 1926.
- DR. HENRY ROBERT MURRAY LANDIS
 - A.B., Amherst, 1894; M.D., Jefferson Med. Coll., 1897; Director, Clinical and Sociological Departments, Henry Phipps Institute, Philadelphia, Pennsylvania; Physician-in-chief pro tem., P. B. B. H., Jan. 18 to Jan. 25, 1919.
- PROF. RENÉ LERICHE
 - Professor of Surgery, University of Strasbourg; Professor of Surgery, University of Lyons, 1932; Surgeon-in-chief pro tem., P. B. B. H., June 12 to June 20, 1929.
- Dr. Dean Dewitt Lewis
 - A.B., Lake Forest Univ., 1895; M.D., Rush Med. Coll., 1899; Associate Professor of Surgery, Rush Medical College, 1919-25; Attending Surgeon, Presbyterian Hosp., Chicago; Professor of Surgery, Johns Hopkins Univ., 1925; Surgeon-in-chief, pro tem., P. B. B. H., March 15 to March 24, 1920.

- SIR THOMAS LEWIS
 - C.B.E.; F.R.C.P.; F.R.S.; M.D., University College, London, England, 1906; Physician, University College, London, England; Physician to Staff of Med. Research Comm.; Physician-in-chief pro tem., P. B. B. H., Oct. 26 to Nov. 2, 1914.
- DR. WARFIELD T. LONGCOPE
 - A.B., Johns Hopkins Univ., 1897; M.D., ibid., 1901; Bard Professor of Medicine, Columbia Univ., New York, 1914-21; Professor of Medicine, Johns Hopkins Univ., and Physician-in-chief, Johns Hopkins Hospital, 1922; Physician-in-chief pro tem., P. B. B. H., Jan. 13 to Jan. 20, 1917.
- Dr. William De B. Macnider
 M.D., Univ. of N. C., 1903; Professor of Pharmacology, Univ. of
 N. C., 1905; Physician-in-chief pro tem., P. B. B. H., April 13 to
 April 17, 1925.
- Dr. Thomas McCrae
 A.B., Univ. of Toronto, 1891; M.B.; M.D., ibid., 1903; F.R.C.P.,
 England; Associate Professor of Medicine, Johns Hopkins Univ.,
 1906-12; Professor of Medicine, Jefferson Med. Coll., 1912; Physician to Jefferson and Penn. Hosps.; Physician-in-chief pro tem.,
 P. B. B. H., March 13 to March 19, 1921.
- Dr. James S. McLester
 A.B., Univ. of Alabama, 1896; M.D., Univ. of Virginia, 1899; Prof. of Med., Univ. of Alabama; Physician-in-chief pro tem., P. B. B. H., April 27 to May 3, 1930.
- Prof. Gunnar Nyström
 Professor of Surgery, University of Upsala, Sweden; Surgeon-inchief pro tem., P. B. B. H., May 23 to May 26, 1930.
- SIR D'ARCY POWER, K.B.E.
 M.A., M.B., Univ. of Oxford, 1882; F.R.C.S. (England), 1883;
 Consulting Surgeon, St. Bartholomew's Hospital, London, England;
 Surgeon-in-chief pro tem., P. B. B. H., April 20 to May 5, 1924.
- Prof. VITTORIO PUTTI
 Professor of Orthopedics, University of Bologna; Director, Istituto
 Ortopedico Rizzoli; Surgeon-in-chief pro tem., P. B. B. H., May 30
 to June 6, 1932.
- Dr. David Riesman
 M.D., Univ. of Pa., 1892; Prof. Clin. Med., ibid.; Physician, Philadelphia General Hospital and University Hospital, Pa.; Clinician, Philadelphia; Physician-in-chief pro tem., P. B. B. H., April 25 to May 2, 1927.
- Dr. Emmet Rixford
 M.D., Cooper Medical College, San Francisco, 1891; Professor
 of Surgery, Leland-Stanford Jr. Univ.; Surgeon-in-chief pro tem.,
 P. B. B. H., April 25 to May 9, 1927.

REPORT OF THE PHYSICIAN-IN-CHIEF

SIR HUMPHRY ROLLESTON, Bart.

G.C.V.O.; K.C.B.; M.A. and M.D., Cambridge University; Fellow and sometime President of the Royal College of Physicians of London; Hon. D.Sc., D.C.L., LL.D.; Fellow and sometime President of the Royal Society of Medicine; Consulting Physician (Temporary Surgeon Rear-Admiral) to the Royal Navy, 1914-19; Emeritus Physician, St. George's Hospital, London; Physician in Ordinary to H. M., the King; Regius Professor of Physic, University of Cambridge, Cambridge, England; Physician-in-chief pro tem., P. B. B. H., March 25 to April 1, 1928.

DR. CLARENCE L. STARR

M.B., Univ. of Toronto; M.D., Univ. of New York; LL.D.; Professor of Surgery, Univ. of Toronto; Surgeon-in-chief, Toronto General Hosp.; Surgeon-in-chief pro tem., P. B. B. H., March 7 to March 16, 1926. Died Dec. 25, 1928.

SIR HAROLD J. STILES

Kt., cr. 1918; K.B.E., cr. 1919; M.B., C.M., F.R.C.S., Edinburgh; British Colonel, R.A.M.C.; Mem. Army Med. Advisory Board; Surgeon, Royal Edinburgh Hosp. for Sick Children, and Chalmers Hosp.; Professor of Clinical Surgery, 1919-25; Late Lecturer on Applied Anatomy, Univ. of Edinburgh; Surgeon-in-chief pro tem., P. B. B. H., April 8 to April 21, 1923.

DR. WILLIAM S. THAYER

A.B., Harvard, 1885; M.D., *ibid.*, 1889; LL.D., Washington Coll., 1907; Hon. F.R.C.P.I., 1912; Brig. General, U. S. A. M. C., 1918-19; Professor of Medicine, Johns Hopkins Univ., 1919-21; Physician-in-Chief, Johns Hopkins Hosp., 1919-21; Visiting Physician, Johns Hopkins Hosp., 1921; *Physician-in-Chief pro tem.*, P. B. B. H., Nov. 14 to Nov. 21, 1913.

SIR CUTHBERT WALLACE

C.B., 1918; K.C.M.G., 1916; M.B., B.S., London; F.R.C.S., Eng.; Surgeon to St. Thomas' Hosp.; Dean, St. Thomas' Hosp. Med. School; Late Surgeon, East London Hosp. for Children; Lecturer on Surgery, St. Thomas' Hosp.; served in South Africa as Surgeon to Portland Hosp., 1900; European War, 1914-18; Maj. Gen., A. M. S.; Consulting Surgeon, B. E. F., France; Surgeon-in-Chief pro tem., P. B. B. H., April 24 to May 8, 1922.

B. H.

PICKWICK, ERSKINE R.

M.D., Tufts, 1924; Interne, Newton Hosp., 1924-25; Asst. Surg., Hood Rubber Co. (Hosp.), Watertown, Mass., 1925-27; Asst. Res. (Exec.) Worcester City Hosp., 1927-29; H. O. Roent., P. B. B. H., July 1, 1929-July 1, 1930; Asst. Res. in Roent., ibid., July 1, 1930-July 1, 1931.

Pokorny, Norman A.
A.B., Marquette Univ., 1925; M.D., Johns Hopkins, 1929; Med.
H. O., P. B. B. H., Mar. 1, 1930-July 1, 1931.

PURKS, WILLIAM K.

B.S., Emory Univ., 1926; M.D., *ibid.*, 1929; Interne, Grady Hosp., Atlanta, 1929-30; Med. H. O., *ibid.*, 1930-31; Asst. Res. Phys., P. B. B. H.

QUINBY, WILLIAM CARTER

A.B., Harv., 1899; M.D., ibid., 1902; House Pupil, M. G. H., 1902-03; Asst. G. U. Surg., Boston Disp., 1907-09; Asst. Surg., N. E. Baptist Hosp., Boston, 1908-14; in charge of Experimental Surg., Brady Clin., J. H. H., 1914-16; Assoc. in Urol., ibid., 1915-16; Clin. Prof., G. U. Surg., Harv.; Urol. Surg., P. B. B. H.

RAY, BRONSON SANDS

B.S., Franklin College, 1924; M.D., Northwestern, 1928; Interne, Passavant Memorial Hospital, Chicago, Ill., and Wesley Memorial Hosp., Chicago, Ill., 1928-29; Surg. H. O., P. B. B. H., Jan. 1, 1930-May 1, 1931; Asst. Res. Surg., ibid.

RICHARDS, LYMAN G.

A.B., Harv., 1916; M.D., ibid., 1919; in Smyrna with Near East Relief, 1919; Surg. H. O., St. Luke's Hosp., New York, 1920-22; Mass. Eye and Ear Infirmary, Ear, Nose and Throat Serv., 1922-24; Chief in Otolaryngology, Children's Hosp., Boston; Assoc. in Otolaryngology, New England Deaconess Hosp.; Consultant in Bronchoscopy, Union Hosp., Fall River; Permanent Staff, Baptist Hosp., Boston; Assoc. in Otolaryngology, P. B. B. H., June 12, 1924-Oct. 9, 1930; Consultant in Otolaryngology, ibid.

SALLEY, S. MARION

B.S., Emory Univ., Atlanta, 1924; M.D., ibid., 1928; Interne, Gradv Hosp., July 1, 1928-July 1, 1929; Asst. Res. Phys., P. B. B. H. Aug. 1, 1929-July 1, 1931.

SCHNITKER, MAURICE A.

B.S., Univ. of Mich., 1928; M.D., ibid., 1931; Med. H. O., P. B. B. H.

SCHULZ, REUBEN Z.

A.B., Central Wesleyan Coll., Warrenton, Missouri, 1921; M.A., Univ. of Nebraska, 1926; M.D., ibid., 1927; Fellow and Asst., Dept. of Anat., ibid., 1924-25; Asst. in Bact. and Immunology, ibid., 1925-26; Pathol. H. O., P. B. B. H., July 1, 1927-July 1, 1928; Res. Pathol., Children's Hosp., 1928-29; Res. Pathol., P. B. B. H., Sept. 1, 1929-Sept. 1, 1931.

SHAMBAUGH, PHILIP

A.B., Amherst, 1926; M.D., Harv., 1930; Med. H. O., P. B. B. H., Nov. 1, 1930-Mar. 1, 1932; Surg. H. O., P. B. B. H.

SHILLITO, FREDERICK H.

A.B., Univ. of Mich., 1927; M.D., Harv., 1931; Surg. H. O., P. B. B. H.

REGISTER OF PRESENT MEMBERS OF THE STAFF

Sosman, Merrill C.

A.B., Univ. of Wis., 1913; M.D., Johns Hopkins, 1917; Res. Phys., Soldiers' Home Hosp., Washington, D. C., 1917-18; entered U. S. A., M. C.; Army Med. Sch., X-ray Dept., Walter Reed Hosp., 1919-21; X-ray Dept., M. G. H., 1921; Consult. Roent., C. P. Huntington Mem. Hosp.; Consult. Roent., Peabody Home for Crippled Children; Assoc. in Roent., Children's Hosp.; Roent-genologist, P. B. B. H.

STEEL, SELWYN

M.D., Yale, 1930; Med. H. O., P. B. B. H., Mar. 1, 1931-July 1, 1932.

STRAYER, LUTHER M.

A.B., Princeton, 1926; M.D., Harv., 1930; Surg. H. O., P. B. B. H., July 1, 1930-Nov. 1, 1931; Jr. Fellow in Surg., Presbyterian Hosp., N. Y.

STROCK, MOSES SOLOMON

D.M.D., Harv., 1923; Asst. in Extract. and Oral Surg., Harv., 1923-25; Instr. in Extract. and Oral Surg., *ibid.*, 1925-30; Anesthetist, Forsyth Dental Infirmary, 1925-30; Instr. in Oral Surg., Harv.; Asst. Dental Surg., M. G. H.; *Dental Surg.*, P. B. B. H.

THOMPSON, KENNETH WADE

A.B., Leland Stanford, 1926; M.D., Harv., 1929; Surg. H. O., P. B. B. H., Jan. 1, 1930-May 1, 1931; Fellow in Surg. Research, Harv.; Asst. Res. Surg., P. B. B. H.

TOLLMAN, JAMES PERRY

B.S., Univ. of Neb., 1927; M.D., ibid., 1929; Med. H. O., P. B. B. H., July 1, 1929-Nov. 1, 1930; Pathol. H. O., ibid., Jan. 1, 1931-July 15, 1931; Asst. Prof. Pathol., Univ. of Nebraska.

TROPPOLI, DANIEL V.

A.B., A.M., Brown Univ., 1923; M.D., Harv., 1927; Neurol. H. O., M. G. H., June, 1927-Jan., 1928; Med. H. O., P. B. B. H., March 1, 1928-July 1, 1929; Res. Phys., R. I. Hosp., Aug., 1929-Oct., 1930; Surg. H. O., P. B. B. H.

VAN AUKEN, HOWARD A.

A.B., Yankton Coll., 1925; M.D., Univ. of Mich., 1931; Med. H. O., P. B. B. H.

VOGT, EDWARD C.

M.D., Univ. of Iowa, 1923; Interne, St. Vincent's Hosp., Toledo, Ohio, 1923-24; H. O., X-ray Dept., P. B. B. H., Sept. 12, 1924-March 1, 1925; Asst. Res. in Roent., ibid., March 1-Sept., 1925; Res. in Roent., New Haven Hosp., Oct., 1925-July, 1926; Roent., Children's Hosp., Boston; Roent., Huntington Mem. Hosp., 1928; Assoc. in Roent., P. B. B. H.

WALCOTT, CHARLES F.

A.B., Harv., 1926; M.D., ibid., 1931; Med. H. O., P. B. B. H.

WALKER, ISAAC CHANDLER

A.B., Johns Hopkins, 1905; M.D., ibid., 1909; Grad. Stud., Lab. of Theory and Practice of Physic, Harv., 1910-11; Med. H. O., Carney Hosp., Boston, 1910-11; Lect. on Clin. Microscopy and Phys. Diag., Univ. of Iowa, 1911-12; Stud. of Prof. Morawitz, Freiburg, Germany, 1912; Research, Rockefeller Hosp., New York, 1912; Sr. Med. H. O., P. B. B. H., Nov. 1, 1912-March 1, 1913; Asst. Res. Phys., ibid., March 1, 1913-March 1, 1914; Act. Res. Phys., ibid., March 1, 1914-Jan. 1, 1915; Asst. Res. Phys., ibid., Jan. 1, 1915-March 1, 1915 (granted leave of absence from March 1, 1915-Sept. 1, 1915); Med. Chief, Hosp. Ab. 32bis Passy Yonne, France, 1915; Asst. in Pharmacol., Harv.; Alumni Asst. in Med., ibid.; Act. Phys., P. B. B. H., Aug. 1, 1917-Feb. 1, 1918, and April 1, 1918-Dec. 16, 1918; Asst. Prof. of Med., Harv., 1918-19; Assoc. in Med., P. B. B. H.

WILHELM, NORBERT A.

B.S., St. Louis Univ., 1922; M.D., *ibid.*, 1925; Interne, Mercy Hosp., Toledo, Ohio, 1925-26; Chief Res. Phys., Lucas Co. Hosp., Toledo, Ohio, 1926-27; Asst. Plantation Surg., Estates of Central Aguirre, Porto Rico, 1927-29; Asst., Div. of Neuropsychiatry, Henry Ford Hosp., 1929-30; 2nd Asst. Supt., P. B. B. H.

Med. H. O., B. C. H., 1911-13; Sr. Med. H. O., P. B. B. H., June
1-Nov. 1, 1913; Phys. for Men, Infirmary, Univ. of Cal., Berkeley,
Cal., 1914-15; Am. Red Cross, Serbia, 1915-16; Asst. Phys., M. G.

H., O. P. D.; Lieut. and Capt., M. C., U. S. Army, 1917-19; Research Work, Cancer Commission, Harv.; Lab. and Field Work, Div. Industrial Hygiene, *ibid.*; Hon. Research Fellow, Applied Physiol., Yale Univ., New Haven, Connecticut; Research Work, Neuropathol., Harv.; Research Fellow Neuropathol., *ibid.*

FORT, JR., LYNN

B.S., Univ. of Ga., 1921; M.D., Emory Univ., 1925; Interne, Cincinnati Gen. Hosp., July, 1925-Feb., 1926; Surg. H. O., P. B. B. H., March 1, 1926-July 1, 1927; Asst. Res. Surg., Strong Mem. Hosp., Rochester, N. Y., 1927-28; in practice, Atlanta, Ga.

FOSTER, JOHN HESS

B.S., Colby, 1913; M.D., Univ. of Pa., 1917; Med. H. O., P. B. B. H., July 1, 1917-June 15, 1918; 1st Lieut., M. C., U. S. Army, 1918-19; Instr. in Med., Hunan-Yale Coll. of Med., Changsha, China; Vol. Asst., Thorndike Mem. Lab., B. C. H., 1923-24; Asst. in Med., Harv., 1924; Asst. Prof. in Med., Hunan-Yale Coll. of Med., Changsha, China; Assoc. Prof. of Med., ibid., 1924-27; Attend. Phys., Waterbury Hosp.; in practice, Waterbury, Conn.

FOSTER, LEWIS CHANDLER

A.B., Univ. of Kansas, 1919; M.D., Harv., 1923; Substitute, Med. Serv., New York Hosp., 2 mos., 1922; Surg. H. O., P. B. B. H., July 1, 1923-Nov. 1, 1924; Asst. Res. Surg., New Haven Hosp., 1924-25; Res. Surg., ibid., 1925-27; Instr. Surg., Yale Med. School, 1925-28; Asst. Clin. Prof. Surg., ibid.

FREMONT-SMITH, FRANK

M.D., Harv., 1921; Pathol. H. O., P. B. B. H., July 1, 1921-July 1, 1922; Med. H. O., B. C. H., 1922-23; Asst. in Neuropathol., Harv., 1923-24; Asst. in Neurol., M. G. H.; Asst. in Neuropathol., Harv., 1924-25 and 1925-26; John White Brown Scholar, Harv., 1924-25 and 1925-26; Jr. Visit. Phys. for Neurol., B. C. H., 1927-29; Asst. Visit. Phys. for Neurol., ibid.; Research Fellow, Thorndike Mem. Lab., B. C. H.; in charge, Cerebrospinal Fluid Lab., B. C. H.; Asst. Prof. Neuropathol., Harv.

FREMONT-SMITH, MAURICE

A.B., Harv., 1913; M.D., *ibid.*, 1918; Surg. H. O., P. B. B. H., March 1, 1918-Feb. 7, 1919; in charge of hosp. at Sivas, Armenia, 1919-20; in practice, Boston.

FRIEDGOOD, HARRY B.

A.B., Univ. of Mich., 1924; M.D., Johns Hopkins, 1928; Act. Interne, Simpson Memorial Inst., Ann Arbor, Mich., Sept., 1927-Feb., 1928; Med. H. O., P. B. B. H., Nov. 1, 1928-March 1, 1930; Jr. Instr. in Int. Med., Univ. of Mich., March 1, 1930-July 1, 1930; Instr. in Int. Med., ibid.

FULTON, JOHN

B.A., Oxon, 1923; M.A. and Ph.D., ibid., 1925; M.D., Harv., 1927; Rhodes Scholar, Magdalen College, Oxford Univ., 1921-23; Jr.

Assoc. in Neurol, Surg., P. B. B. H., March-June, 1928; Research Fellow, Magdalen College, Oxford, England, 1928-30; Sterling Prof. of Physiology, Yale Univ. Sch. of Med.

GABE, WILLIAM EDWIN

M.D., Harv., 1918; Surg. H. O., P. B. B. H., March 1, 1918-March 31, 1919; Instr. in Surg., Indiana Univ. Sch. of Med.; Visit. Staff in Gynecology, Indianapolis City Hosp.; Staff, Methodist Episcopal Hosp., and St. Vincent's Hosp., Indianapolis; in practice, Indianapolis, Indiana.

GERMAN, WILLIAM J.

A.B., Univ. of Calif., 1922; M.A., ibid., 1923; M.D., Harv., 1926; Surg. H. O., P. B. B. H., July 1, 1926-Nov. 1, 1927; Fellow in Plastic Surg., Johns Hopkins; Asst. in Surg., Yale Univ. School of Med., and Asst. Res. in Surg. New Haven Hosp., 1928-29; William Harvey Cushing Fellow in Surg., Yale Univ. School of Med.

GILE, HAROLD H.

A.B., Princeton, 1915; M.D., Columbia (Coll. of Phys. and Surgs.), 1922; Surg. Interne, Presbyterian Hosp., New York, 1922-24; Asst. Res. Surg., P. B. B. H., Jan. 1-Nov. 1, 1925; Asst. Visit. Urologist, Presbyterian Hosp., New York.

GOETSCH, EMIL

S.B., Univ. of Chicago, 1903; Ph.D., ibid., 1906; Fellow Asst. and Assoc. in Anat., ibid., 1904-08; Research Asst., Dept. of Exp. Therapeutics, ibid., 1908-09; Rush Med. Coll., 1906-07; M.D., Johns Hopkins, 1909; Asst. in Surg., ibid., 1909-10; Asst. Res. Surg., ibid., 1910-12; Res. Surg., P. B. B. H., Sept. 1, 1912-Sept. 1, 1915; Asst. in Surg., Harv., 1912-15; Assoc. in Surg., Johns Hopkins, 1915-18; Assoc. Prof. of Surg., ibid., 1918-19; Prof. of Surg. and Surg.-in-Chief, Long Island Coll. Hosp., Brooklyn, New York; in practice, Brooklyn, New York.

GOLDEN, ROSS

A.B., Cornell (Mt. Vernon, Iowa), 1912; M.D., Harv., 1916; Med. H. O., P. B. B. H., July 1, 1916-July 18, 1917; Capt. and Major, M. C., U. S. Army, 1917-20; House Phys., X-ray Dept., M. G. H., 1920-21; Asst. Res. Phys., P. B. B. H., July 1, 1921-April 15, 1922; Visit. Phys., Roentgen-ray Dept., Presbyterian Hosp., New York; Assoc. Prof. of Med., Columbia Univ.

GOODALL, HARRY WINFRED

A.B., Dart., 1898; M.D., Harv., 1902; House Pupil, M. G. H., 1902-03; House Pupil, Boston Lying-In Hosp., 1903; Assoc. in Med., P. B. B. H., Dec. 12, 1912-Dec. 31, 1917; Lieut. Col., M. C., U. S. Army, 1917-19; Instr. in Med., Harv. Grad. Sch. of Med.; Phys., Boston Dispensary; Asst. Visit. Phys., N. E. Baptist Hosp.; in practice, Boston.

GOODPASTURE, ERNEST WILLIAM

A.B., Vanderbilt, 1907; M.D., Johns Hopkins, 1912; Rockefeller Fellow in Pathol., Johns Hopkins, 1912-14; Pathol., Union Protest. Infirmary, Baltimore, 1913-14; Asst. Res. Pathol., J. H. H., 1913-14; Act. Res. Pathol., ibid., 1914-15; Instr. in Pathol., Johns Hopkins, 1914-15; Res. Pathol., P. B. B. H., Sept. 1, 1915-Oct. 1, 1917; Asst. Prof. Pathol., Harv.; Fellow in Pathol., Cancer Comm., ibid.; Lieut. (j. g.) M. C., U. S. N. R. F.; Act. Pathol., P. B. B. H., Feb. 1-Aug. 15, 1920; Chief, Dept. of Pathol. and Bacteriol., Univ. of Philippines, 1922; Pathol., Phil. Gen. Hosp., Manila, 1922; Director, William H. Singer Mem. Research Lab., Pittsburgh, 1922-24; Scholarship, Gen. Education Board of the Rockefeller Found. Inst. for Gen. and Exp. Pathol., Vienna, 1924-25; Prof. of Pathol., Vanderbilt Univ.

GORDON, BURGESS

A.B., Gonzaga Univ., 1912; M.D., Jefferson Med. Coll., 1919; Interne, Jefferson Hosp., 1919-21; Asst. Res. Phys., P. B. B. H., Sept. 15, 1921-Aug. 1, 1922; Res. Phys., ibid., Aug. 1, 1922-Sept. 1, 1925; Asst. Prof. Med., Jefferson Med. College; Asst. Phys., O. P. D., Pennsylvania Hosp.; Visit. Phys., White Haven San.; Med. Director and Phys. in charge, Dept. for Diseases of Chest, Jefferson Hosp., Phildelphia; in practice, Philadelphia, Pa.

Graham, William Randolph M.D., Med. Coll. of Va., 1925; Interne, Johnston-Willis Hosp., Richmond, Va., 1925-26; Jr. Assoc. in Med., P. B. B. H., 1926-27; in practice, Richmond, Virginia.

Grant, Samuel Becker

B.S., Washington Univ., 1918; M.D., ibid., 1920; Med. H. O., P. B.

B. H., Oct. 16, 1920-March 1, 1922; Med. H. O., J. H. H., March
1, 1922-May 1, 1922; Asst. Res. Phys., P. B. B. H., April 15, 1922Sept. 15, 1923; Asst. in Clin. Med., Wash. Univ.; Asst. in Med.,
Barnes Hosp.; in practice, St. Louis, Missouri.

Graves, Edwin G.

A.B., Univ. of Texas, 1920; M.D., Harv., 1924; Med. H. O., P. B.

B. H., July 1, 1924-July 1, 1925; in practice, Houston, Texas.

Graves, Roger Colgate

A.B., Syracuse Univ., 1913; M.D., ibid., 1918; Surg. H. O., P. B. B. H., Aug. 15, 1918-Oct. 19, 1919; Asst. Res. Surg., New Haven Hosp., New Haven, Connecticut, 1919-20; Asst. Res. Surg., P. B. B. H., July 15, 1920-Aug. 1, 1921; Assoc. in Surg., ibid., Sept. 1, 1921-April, 1923; Cabot Fellow, Harv., in charge of Lab. of Surg. Research, Sept. 1, 1921-Sept. 1, 1922; Urologist, Carney Hosp.; Genito-Urinary Surg., Pondville State Hosp. for Cancer; Assoc. Consult. Urologist, Brockton Hosp.; Consult. Urol., Quincy and Winchester Hospitals; in practice, Boston.

GRAY, HORACE

A.B., Harv., 1909; M.D., *ibid.*, 1914; *Med. H. O., P. B. B. H., Nov.* 1, 1914-March 1, 1916; Inst. for Juv. Research, Chicago, Ill., 1926-29; Assoc. Clin. Prof. Med., Stanford Univ., San Francisco, Calif.

GREEN, GEORGE F.

B.S., Univ. of Mich., 1922; M.S. in Surg., Univ. of Minn., 1929; M.D., Univ. of Mich., 1924; Asst. in Physiol., *ibid.*; Asst. in Med., B. C. H., IV Med. Serv.; *Ir. Assoc. in Pathol.*, P. B. B. H., Oct. 1, 1924-Jan. 15, 1925; Fellow in Surg., Mayo Foundation, 1925-29; Staff Surg., St. Joseph's Hosp. and Epworth Hosp., South Bend, Ind.; in practice, South Bend, Ind.

GREEN, WILLIAM T.

A.B., Indiana Univ., 1921; A.M., ibid., 1922; M.D., ibid., 1925; Instr. in Anat., Indiana Univ., 1921-22; Interne, Indiana Univ. Hosp.; Asst. Res. Surg., Henry Ford Hospital, Detroit; Surg. H. O., P. B. B. H., Aug. 1, 1929-Feb. 1, 1930; Asst. Res. Surg., ibid., Feb. 1, 1930-Oct. 1, 1930.

Greene, James A. M.D., Harv., 1925; Med. H. O., P. B. B. H., Nov., 1925-March, 1926.

GREENE, THEODORE C.

A.B., Harv., 1920; M.D., ibid., 1924; Asst. in Pathol., Johns Hopkins, Sept., 1924-Jan., 1925; Surg. H. O., P. B. B. H., March 1. 1925-July 1, 1926; Asst. in Clin. Neurol., Peking Union Med. Coll., Sept. 15, 1929-May 15, 1930; Surg., Douw Hosp., Presbyterian Mission, Peking, China.

GREENSPON, EDWARD A.

M.D., McGill Univ., 1916; House Bacteriol., Royal Victoria Hosp., Montreal, 1916-17; Asst. Res. Pathol., Johns Hopkins, 1917-18; Capt., Canadian Army Med. Corps; Res. Pathol., P. B. B. H., Oct. 1, 1919-April 1, 1920; Med. H. O., ibid., April 1, 1920-July 1, 1921; May Fellow in Med. Research, Johns Hopkins; Asst. in Med., ibid., 1921-23; Jr. Attend. Phys., Montreal Gen. Hosp.; in practice, Montreal, Canada.

GREY, ERNEST

A.B., Univ. of Wis., 1907; Asst. in Anat., ibid, 1907-08; Stud. in Med., ibid., 1907-08; M.D., Johns Hopkins, 1911; Res. H. O., ibid., 1911-12; Surg. H. O., P. B. B. H., Nov. 1, 1912-Feb. 12, 1914; Asst. Res. Surg., ibid., Feb. 12, 1914-Sept. 1, 1916; Asst. in Surg., Harv., 1915-16; Instr. in Surg., Johns Hopkins. Died Oct. 12, 1918.

GUNDERSEN, TRYGVE

M.D., Harv., 1926; Surg. H. O., P. B. B. H., Nov. 1, 1926-March 1, 1928; Ophthalmic Interne, Mass. E. and E. Infirm., 1929-30; Clin. Asst., ibid.; Asst. in Ophthalmology, Harv.; in practice, Boston.

HAIGHT, L. CAMERON

A.B., Univ. of Calif., 1923; M.D., Harv., 1926; Surg. H. O., P. B. B. H., Nov. 1, 1926-March 1, 1928; Asst. Res. Surg., New Haven Hosp., 1928-31; Instr. in Surg., Univ. of Mich.

HALBERSLEBEN, DAVID L.

A.B., Univ. of Nebraska, 1924; M.D., Harv., 1928; Med. H. O., P. B. B. H., July 1, 1928-Nov. 1, 1929; in practice, Roslindale, Massachusetts.

HALE, WORTH

A.B., Univ. of Mich., 1908; M.D., ibid., 1904; Assoc. in Med., P. B. B. H., Nov. 1, 1917-Dec. 31, 1918; Assoc. Prof. of Pharm. and Asst. Dean, Harv.

HALLER, DAVID ALEXANDER

A.B., Hampden-Sidney, 1908; M.D., Columbia, 1913; Med. H. O., P. B. B. H., Nov. 1, 1913-March 1, 1915; Asst. Res. Phys., ibid., March 1, 1915-Oct. 1, 1916; Res. Phys., ibid., Oct. 1, 1916-June 6, 1917; Major, M. C., U. S. Army, 1917-19; Junior Attend. Phys., Hahnemann Hosp., 1920-21; Internist for the Rochester Clinic, Rochester, New York, 1919-25; Asst. Phys., Rochester Gen. Hosp.; Phys. to Baden St. Disp., 1924-25; Instr. in Med., Univ. of Rochester Med. Sch., 1926-29; Asst. Prof. of Med., ibid.; Asst. Phys., Strong Mem. Hosp., Rochester, N. Y.; Chief, Med. Serv., Rochester Gen. Hosp.; in practice, Rochester, N. Y.

HANSMANN, GEORGE H.

M.D., Univ. of Iowa, 1918; Hosp. Chem., Iowa Univ. Hosp., 1918-19; Clin. Asst., Dept. of Internal Med., *ibid.*, 1919-20; Lect. in Clin. Microscopy, *ibid.*, 1920-21; Res. Pathol., P. B. B. H., Sept. 15, 1921-Sept. 15, 1923; Pathol., Iowa Univ. Hosp.

HARBIN, MAXWELL

B.S., Univ. of Georgia, 1916; M.D., Harv., 1920; Surg. H. O., P. B. B. H., Nov. 1, 1920-March 1, 1922; H. O., Children's Hosp., 1922-23; Surg., Harbin Hosp., 1923-25; Assoc. in Orthopedic Surg., Lakeside Hosp.; Surg. in Charge, Rainbow Hosp.; Asst. Prof. Orthopedic Surg., Western Reserve Univ. School of Med.

HARBIN, JR., ROBERT MAXWELL

B.S., Univ. of Ga., 1925; M.D., Emory Univ. Med. School, 1928; Surg. H. O., P. B. B. H., July 1, 1928-Nov. 1, 1929; in practice, Rome, Ga.

HARRISON, TINSLEY RANDOLPH

A.B., Univ. of Mich., 1919; M.D., Johns Hopkins, 1922; Med. H. O., P. B. B. H., Nov. 1, 1922-March 1, 1924; Asst. Res. Phys., ibid., March 1-Sept. 1, 1924; Asst. in Med., Johns Hopkins; Res. Phys., Vanderbilt Univ. Hosp., Nashville, Tennesse; Instr. in Med., ibid., 1926-27 (leave of absence, 1927-28); Asst. Prof. Med., ibid.

HARRISON, JR., WILLIAM GROCE

A.B., Univ. of Mich., 1924; M.D., Johns Hopkins, 1928; Med. H. O., P. B. B. H., March 1, 1929-July 1, 1930.

HARVEY, EARLE A.

B.S., Univ. of Wash., 1925; M.D., Harv., 1929; Med. H. O., P. B. B. H., Nov. 1, 1929-March 1, 1931; House Phys., Mercy Hosp., Denver, Colo.

HARVEY, SAMUEL CLARK

Ph.B., Yale, 1907; M.D., *ibid.*, 1911; Sc.D., Western Reserve, 1931; Alonzo Clark Fellow, Columbia, 1911-12; Instr. in Pathol., *ibid.*, 1912-13; Asst. Res. Phys., Loomis Sanitarium, Loomis, New York, 1913-14; Surg. H. O., P. B. B. H., Nov. 1, 1914-Nov. 1, 1915; Arthur Tracy Cabot Fellow, in charge of Lab. of Surg. Research, Harv., 1915-16; Asst. Res. Surg., P. B. B. H., Nov. 1, 1916-May 7, 1917; Major, M. C., U. S. Army, 1917-19; Res. Surg., New Haven Hosp.; Instr. in Surg., Yale, 1919-20; Asst. Prof. of Surg., *ibid.*, 1920-21; Assoc. Prof. of Surg., *ibid.*, 1921-23; Consult. Surg., State of Conn. Tbc. Comm.; Surgeon-in-Chief, New Haven Hosp. and New Haven Disp.; Prof. of Surg., Yale.

HASS, GEORGE MARVIN

M.D., Harv., 1929; Pathol. H. O., P. B. B. H., Jan. 1, 1930-Jan. 1, 1931.

HATCH, FLOYD FROST

A.B., Univ. of Utah, 1912; M.D., Harv., 1914; Med. H. O., P. B. B. H., March 1, 1914-Jan. 4, 1915 (granted leave of absence from Jan. 4-Feb. 28, 1915); Surg. House Pupil, M. G. H., 1915-16; House Surg., ibid., 1916-17; Surg. to G. U. Dept., Salt Lake County Hosp., 1917-18; Surg. to G. U. Dept., L. D. S., Hosp., Salt Lake City, Utah; 1st Lieut., M. C., U. S. Army, 1918-19; Asst. County Phys., Salt Lake County Hosp., and Asst. Visit. Surg., ibid., 1921-22; Post-Grad. Study of Surg., Europe, 1926-27; Sr. Visit. Surg., Latter Day Saints' Hosp.; Surg., Inter-Mountain Clin.; in practice, Salt Lake City, Utah.

H'DOUBLER, FRANCIS TODD

POTTER, WILLIAM HENRY

A.B., Harv., 1878; D.M.D., *ibid.*, 1885; A.M., Hon., *ibid.*, 1927; Demonstr. in Operative Dentistry, Harv., 1887-88; Clin. Lecturer,

ibid., 1890-96; Lecturer, ibid., 1896-1900; Asst. Prof., ibid., 1900-04; Prof., Operative Dentistry, ibid., 1904-1927; Prof. Emeritus, ibid., 1927; Dental Surgeon, "Ambulance American Hospital" at Neuilly, France, 1914-15; 1st Lieut., Major, and Lieut. Col., Dental Corps, U. S. A., 1917-19, A. E. F.; Member, U. S. A. Base Hosp. No. 5, A. E. F.; Instr., Dental Dept., U. S. A. Sanitary School, Langres, 1918-19; Consulting Dental Surg., P. B. B. H. Died July 27, 1928.

POTTS, JR., WILLIAM HENRY

A.B., Univ. of Texas, 1922; M.D., Harv., 1926; Med. H. O., P. B. B. H., March 1, 1926-July 1, 1927; Asst. Clin. Med., Baylor Univ., 1927-29; Instr. Clin. Med., ibid.; in practice, Dallas, Texas.

Powers, John Howard

A.B., Bates, 1919; B.A., Oxon, 1923; M.D., Harv., 1925; Surg. H. O., Lakeside Hosp., Cleveland, Ohio, 1925-26; Asst. Res. Surg., P. B. B. H., Oct. 15, 1926-Sept. 15, 1927; Arthur Tracy Cabot Fellow in charge of Lab. of Surg. Research, Harv.; Assoc. in Surg., P. B. B. H., Sept., 1927-Oct., 1928; Res. Surg., ibid., Oct. 15, 1928-July 1, 1930; Assoc. Surg., Mary Imogene Bassett Hosp., Cooperstown, New York.

PRICE, JAMES VALENTINE

A.B., Univ. of N. C., 1915; M.D., Johns Hopkins, 1919; Surg. H. O., P. B. B. H., Oct 15, 1919-March 1, 1921; Guggenheim Bros., La Paz, Bolivia, S. A.

PUTNAM, TRACY JACKSON

A.B., Harv., 1915; M.D., ibid., 1920; Asst. Res. Pathol., J. H. H., 1920-21; Asst. Res. Surg., P. B. B. H., Nov. 1, 1923-Oct. 1, 1924; Moseley Traveling Fellow, Harv., 1925; Arthur Tracy Cabot Fellow, ibid., 1925-26; Assoc. in Surg., P. B. B. H., 1925-28; Instr. in Neuropathol., Harv.; Asst. Visit. Phys. in Neurol. and Asst. Visit. Surg. for Neuro-Surg., B. C. H.

QUINLAND, WILLIAM SAMUEL

B.S., M.D., Rosenwald Fellow in Pathol., Harv., Sept., 1919-April, 1921; Asst. in Pathol., P. B. B. H., April 14, 1921-July 28, 1922; Pathol., G. W. Hubbard and M. E. Hale Hospitals and Prof. of Pathol., Meharry Med. Coll., Nashville, Tennessee; Assoc. Med. Director, Geo. W. Hubbard Hosp., Nashville, Tenn.

RAGSDALE, LUNEY VARNON

A.B., Univ. of Ala., 1917; M.D., Harv., 1924; Second Asst. Supt., P. B. B. H., June 1-Dec. 15, 1924; Med. H. O., ibid., Dec. 15, 1924-March 1, 1926; Clin. Instr. in Med., Univ. of Alabama; Asst. Clin. Prof. Med., ibid., 1931; Associate, American College of Physicians, 1930; Asst. Director, M. G. H.

RAND, CARL WHEELER

A.B., Williams, 1908; A.M., ibid., 1909; M.D., Johns Hopkins, 1912; Res. H. O., J. H. H., 1912-13; Asst. Res. Surg., P. B. B. H.,

Oct. 1, 1913-Nov. 1, 1914; House Surg., Mercy Hosp., Chicago, Ill., 1914-15; Lieut., M. C., U. S. Army; Clin. Prof. Surg., (Neurological) Univ. of California; in practice, Los Angeles, Calif.

RAPPORT, DAVID

A.B., Harv., 1912; M.D., *ibid.*, 1916; Moseley Travelling Fellow, Harv., 1916-17; *Med. H. O., P. B. B. H., March 1-June 17, 1917;* Lieut., M. C., U. S. Army, 1917-19; Austin Teaching Fellow in Physiol., Harv., 1919-20; Instr. in Physiol., *ibid.*; Research Fellow in Physiology, Cornell Univ. Med. Coll., 1921-24; Sr. Instr. in Physiol., Western Reserve Univ. Med. Sch., 1924-26; Asst. Prof. Physiol., *ibid.*, 1926-29; Prof. Physiol., Tufts Med. School.

RAWLINGS, J. MOTT
B.S., Princeton, 1921; M.D., Johns Hopkins, 1925; Interne, *ibid.*, 1925-26; Instr. in Pathol., *ibid.*, 1926-27; H. O. Med. Serv., Baltimore City Hosp., 1927-28; *Pathol. H. O., P. B. B. H., July 1, 1928-July 1, 1929.*

Read, James S.

B.A., Vanderbilt Univ., 1921; M.D., ibid., 1924; Interne, Louisville City Hosp., 1924-26; Asst. Res. Phys., P. B. B. H., July 1, 1926-July 1, 1927; in practice, Nashville, Tenn.

REIFENSTEIN, BENEDICT W.

B.S., Syracuse, 1920; M.D., *ibid.*, 1922; Pathol. H. O., Hosp. of the Good Shepherd, Syracuse, N. Y.; *Pathol. H. O.*, *P. B. B. H.*, *July 1*, 1922-July 1, 1923; Med. H. O., New Haven Hosp., 1923-24; Asst. Phys., Syracuse Univ. Hosp. of the Good Shepherd; Inst. in Med., Syracuse Univ. College of Med.; in practice, Syracuse, New York.

RENNIE, THOMAS A. C.
B.S., Univ. of Pittsburgh, 1924; M.D., Harv., 1928; Med. H. O.,
P. B. B. H., Nov. 1, 1928-March 1, 1930.

REYNOLDS, LAWRENCE

A.B., Univ. of Ala., 1912; M.D., Johns Hopkins, 1916; Capt., M. C., U. S. Army, 1917-19; Roentgenologist, P. B. B. H., Oct. 15, 1919-June 1, 1922; Roentgenologist, Children's Hosp., Boston, 1922; Roentgenologist, Children's Free Hosp., Detroit, Mich.; Asst. Roentgenologist, Harper Hosp., Detroit; Editor, Am. Journal of Roent.; in practice, Detroit, Mich.

RHEA, LAWRENCE JOSEPH
B.S., Univ. of Texas, 1901; M.D., Johns Hopkins, 1905; H. O. in Pathol., B. C. H., 1906-07; Second Asst. in Pathol., ibid., 1907; First Asst. in Pathol., ibid., 1907-08; Asst. Visit. Pathol., ibid., 1908-09; Asst. in Pathol., Harv., 1908-09; Instr. in Pathol., ibid., 1909-10; Asst. Pathol., B. C. H., 1909-10; Director of Pathol. Lab. and Pathol., Montreal Gen. Hosp., 1910-12; Lect. in Pathol., McGill Univ., 1910-11; Asst. Prof. of Pathol., ibid., 1911-12; Res. Pathol.. P. B. B. H., July 1, 1912-Oct. 1, 1913; Asst. Prof. of Pathol., Harv.,

1912-13; Assoc. Prof. of Pathol., McGill Univ.; Major, Canadian Army Med. Corps., Pathol., Children's Memorial Hosp., Montreal; Pathol., Foundlings' Hosp., Montreal; Director, Pathol. Lab., Montreal Div. of Shriner's Hosp.; Director of Pathol. Lab., Montreal General Hosp.

RHOADS, CORNELIUS PACKARD

A.B., Bowdoin, 1920; M.D., Harv., 1924; Surg. H. O., P. B. B. H.. July, 1924-May 18, 1925; Assoc. in Pathol., Boston City Hosp., 1926-27; Instr. in Pathol., Harv., 1927-28; Assoc., Rockefeller Inst. for Med. Research.

RICHARDSON, HENRY BARBER

A.B., Harv., 1910; M.D., ibid., 1914; Med. H. O., P. B. B. H., March 1, 1915-July 1, 1916; Asst. in Med., Johns Hopkins; Asst. Disp. Phys., J. H. H.; First Lieut., M. C., U. S. Army, 1918-19; Instr. in Med., Columbia Univ., New York, and Asst. Adjunct Visit. Phys., Bellevue Hosp., New York, 1921; Instr. in Med., Cornell, and Research Fellow, Russel-Sage Inst. of Pathol., Bellevue Hosp., New York; Visit. Phys., Bellevue Hosp.; Asst. Prof. of Med., Cornell Univ. Med. Coll., New York.

RIDDLE, MATTHEW C.

B.A., Reed College, 1917; M.A., Univ. of Oregon, 1922; M.D., Harv., 1926; Huntington Mem. Hosp., March-June, 1926; Med. H. O., P. B. B. H., Nov. 1, 1926-March 1, 1928; Res. Interne and Jr. Research Asst., Simpson Mem. Inst. for Med. Research; Fellow in Med., National Research Council; in practice, Portland, Ore.

RINGER, MICHAEL

B.S., Coll. of City of New York, 1915; M.D., Cornell, 1919; Instr. in Exper. Med., Yale, 1919-21; Instr. in Physiol., Cornell, 1921-23; Med. H. O., P. B. B. H., Nov. 1, 1923-Jan. 1, 1925; in practice, New York.

RIOCH, DAVID M.

B.A., Butler Coll., Indianapolis, 1920; M.D., Johns Hopkins, 1924; Surg. H. O., P. B. B. H., Nov. 1, 1924-March 1, 1926; Asst. Res. Surg., ibid., March-April, 1926; Asst. Med. Res., Strong Mem. Hosp., Rochester, N. Y., April 1, 1926-July 1, 1927; Instr. in Med. Univ. of Rochester Sch. of Med., July 1, 1927-Sept. 15, 1928; Nat. Research Council Med. Fellow, Sept. 15, 1928-Sept. 15, 1930; Assoc. in Physiol., Johns Hopkins Med. Sch., 1930-31; Asst. Prof. Anat., Harv.

ROONEY, JAMES STEWART

Univ. of Calif., 1917-21; M.D., Harv., 1926; Pathol. H. O., P. B. B. H., Jan. 1-Oct. 1, 1926; Res. Pathol., Long Island Hosp., Oct. 1, 1926-June 1, 1927; Res. Phys., ibid., 1927-28; Instr. in Pathol., Harv.; Pathol., Charles Choate Mem. Hosp., Woburn, Faulkner Hosp., Boston, Industrial Accident Board, Commonwealth of Mass., Lynn Hosp., Lynn, Malden Hosp., Malden, Women's Hosp., Boston,

Moore Hosp., Brockton, Norwood Hosp., Norwood, Peterborough Hosp., Peterborough, N. H., Symmes Arlington Hosp., Arlington, Weymouth Hosp., Weymouth, Whidden Mem. Hosp., Everett.

ROOT, HOWARD FRANK

A.B., Harv., 1913; M.D., ibid., 1919; Med. H. O., P. B. B. H., Feb. 13, 1919-Jan. 1, 1920; Clin. Lab., J. H. H., 1920; Phys., N. E. Deaconess Hosp.; Assoc. in Med., P. B. B. H., April 13, 1922-Dec. 31, 1930; in practice, Boston, Mass.

Ross, J. Paterson

M.B., M.S., London; F.R.C.S., England; St. Bartholomew's Hosp., England; Jr. Assoc. in Surg., P. B. B. H., April 9, 1923-Sept. 14. 1923.

RUBLEE, C. D.

M.D., Univ. of Vt., 1922; in practice, 1922-28; Roent. H. O., P. B. B. H., Nov. 1, 1928-Feb. 1, 1929; in practice, Newport, Vt.

SAEGER, ERNEST TIRRILL

B.S., Dart., 1914; M.D., Harv., 1917; Surg. H. O., P. B. B. H., July 1, 1917-Aug. 1, 1918; Res., First Surg. Division, Bellevue Hosp., New York; in practice, Boston.

SAGEBIEL, JAMES LAMBERT

B.S., Denison Univ., 1924; M.D., Harv., 1927; Surg. H. O., P. B. B. H., Oct. 1, 1927-Feb. 1, 1929; H. O., Boston Lying-In Hosp., Mar. 1, 1929- Sept. 15, 1929; Jr. Assoc. in Neurol., Miami Valley Hosp.; in practice, Dayton, Ohio.

SCARFF, JOHN E.

B.S., Princeton, 1920; M.D., Johns Hopkins, 1924; experimental lab. work, ibid., 1924-25; H. O., ibid., 1925-27; Surg. H. O., P. B. B. H., March 1, 1927-July 1, 1928; Asst. Res. Surg., ibid., July 1, 1928-July 1, 1930; Res. Surg., ibid., July 1, 1930-Oct. 1, 1930; Jr. Attend. Neuro-Surg., Bellevue Hosp., N. Y.; Instr., Neuro-Surg., N. Y. Post-Graduate Med. Sch. and Hosp.; in practice, (Neuro-Surgery) N. Y.

SCHLESINGER, MONROE J.

B.S., Coll. City of New York, 1912; Ph.D., Harv., 1920; M.D., ibid., 1926; Asst., N. Y. H. D. Research Lab., 1912-14; Asst. Bacteriol., West Penn. Hosp., Pittsburgh, 1914-17; Asst. in Preventive Med. and Hygiene, ibid., 1917-20; Instr., ibid., 1920-22; Asst. in Pathol., ibid., 1922-23; Research Asst. in Pathol., ibid., 1923-25; H. O. Pathol., P. B. B. H., July 1. 1925-July 1, 1926; Res. Pathol., Children's Hosp., Boston, 1926-27; Instr. in Pathol., Harv.; Pathol., Beth Israel Hosp., Boston.

SCHMITZ, HENRY L.

B.S., Univ. of Chicago, 1920; M.S., Univ. of Wis., 1922; Ph.D., Univ. of Wis., 1924; M.D., Harv., 1926; Med. H. O., Huntington Mem. Hosp., Boston, July, 1926-Dec., 1926; Med. H. O., P. B. B. H.

March 1, 1927-July 1, 1928; Lasker Fellow and Instr., Dept. of Med. Univ. of Chicago, 1928-30; Asst. Prof. of Med., ibid.

SCHNECK, ROBERT J.

M.D., Harv., 1925; Interne, St. Luke's Hosp., Chicago, 1925-26; Med. H. O., P. B. B. H., July 1, 1926-Nov. 1, 1927; Asst. Res. Phys., ibid., 1927-28; Instr. in Med., Detroit Coll. of Med.; Jr. Assoc. in Med., Detroit Receiving Hosp.; Assoc. Phys., O. P. D., Harper Hosp., Detroit; in practice, Detroit, Mich.

SCHOLEFIELD, BERNARD GRAHAM

B.A., Oxford, 1921; M.A., B.M., B.Ch., *ibid.*, 1923; M.D., Oxford, 1927; F.R.C.S., England, 1928; M.Ch., Oxon, 1931; Stud., St. Peter's College, Westminster, London, 1912-17; 2nd Lieut., Royal Engineers, 1917-19; Student, Guy's Hosp., London, 1922-23; House Surgeon, *ibid.*, 1924-25; Commonwealth Fund Fellow, Johns Hopkins Univ., 1925-26; Asst. Res. Surg., P. B. B. H., Aug. 1, 1926-July 10, 1927; Surg. Registrar, Guy's Hosp., London, England.

SCHREIBER, FREDERIC

A.B., Univ. of Mich., Ex. 1918; Ensign, U. S. N., 1918-19; M.D., Harv., 1923; Interne, Harper Hosp., 1923-25; Asst. to Dr. Max Ballin, 1925-28; Assist. in Surg., O. P. D., Harper Hosp., 1926; Asst. Res. Surg., P. B. B. H., Oct. 1, 1928-Aug. 1, 1929; Neuro-Surg., Harper Hosp., Receiving Hosp., Children's Hosp. of Mich; Consult. Neuro-Surg., Deaconess Hosp., Sigma Gamma Clin., North End Clin.; in practice, Detroit, Mich.

SCHUMACHER, IRWIN C.

A.B., Univ. of Cal., 1915; M.D., Johns Hopkins, 1919; Asst. Res. Phys., P. B. B. H., Oct. 1, 1920-Sept. 1, 1921; Asst. Prof. Med., Univ. of Cal.; in charge, Clin. Pathol. Dept., and Allergy Clin., Director of Clin. Labs., and Visit. Phys., Univ. of Cal. Hosp.

SCHWARTZ, CHARLES WADSWORTH

Ph.B., Yale, 1914; M.D., Harv., 1919; H. O., X-ray Dept., P. B. B. H., Feb. 20, 1919-Feb. 20, 1920; Roentgenologist, New York Neurol. Inst.; in practice, New York.

SCOTT, W. J. MERLE

A.B., Oberlin, 1914; M.D., Johns Hopkins, 1918; A.M., Columbia Univ., 1922; First Lieut., M. C., U. S. Army, 1918-19; Asst. in Surg., Henry Ford Hosp., Detroit, Mich., 1918-21; Fellow in Exper. Pathol., Montefiore Hosp., 1921-22; Arthur Tracy Cabot Fellow, Harv., 1922-23; Asst. in Surg., ibid., 1923; Assoc. in Surg., P. B. B. H., Sept. 1, 1922-July 1, 1923; Asst. Res. Surg., ibid., July 1, 1923-July 1, 1924; Res. Surg., Lakeside Hosp., and Instr. in Surg., Western Reserve Univ., Cleveland, Ohio, 1924-26; Asst. Surg., Strong Mem. and Rochester Municipal Hosp., 1926-27; Assoc. Surg., ibid.; Asst. Prof. Surg., Univ. of Rochester, Rochester, N. Y., 1926-27; Assoc. Prof. Surg., ibid.

SHAMBAUGH, JR., GEORGE E.

A.B., Amherst, 1924; M.D., Harv., 1928; Med. H. O., P. B. B. H., Nov. 1, 1928-Mar. 1, 1930.

SHELBURNE, SAMUEL A.

B.A., Rice Inst., Houston, Texas; M.D., Univ. of Pa., 1928; H. O., Univ. Hosp., Phil.; Lab. work, Shreveport Charity Hosp.; Asst. Res. Phys., P. B. B. H., July 1, 1929-July 1, 1930; Asst. in Clin. Med., Baylor Med. Sch., Dallas Texas.

SHRADER, JOHN C.

B.S., Univ. of Iowa, 1920; M.D., ibid., 1922; Med. Interne, Univ. Hosp., Iowa, 1922-23; Hosp. Chem., ibid., 1923-24; Asst. Res. Phys., P. B. B. H., July, 1924-Aug., 1926; Chief Res., Emory Div., Grady Hospital, Atlanta, Georgia, 1926-27; in practice, Ft. Dodge, Iowa.

SIMON, HILDA AMANDA

M.D., Cooper, 1905; Third Asst. Supt., P. B. B. H., Oct. 5, 1917-March 1, 1919; Supt., Lynn Hosp., Lynn, Mass. (resigned); City Health Dept., Seattle, Wash. Died June 7, 1929.

SIMPSON, SUTHERLAND E. R.

A.B., Cornell, 1921; M.D., Harv., 1925; Med. H. O., P. B. B. H., March 1, 1926-Aug. 1, 1926.

SISSON, WARREN RICHARDS

A.B., Colgate, 1906; Stud. of Med., Freiburg, Germany (summer semester), 1910; Stud., Univ. of Munchen (winter semester), 1910-11; Stud., Univ. of Heidelberg (summer semester), 1911; M.D., Johns Hopkins, 1912; House Pupil, M. G. H., Children's Med. Ward, 1912-13; Med. H. O., P. B. B. H., March 1, 1913-March 1, 1914; Res. Pathol., ibid., March 1, 1914-April, 1915; Instr. in Pathol., Harv., 1914-15; H. O., B. C. H., So. Dept., summer of 1915; Sr. H. O., Boston Floating Hosp., 1915; Instr. in Pediatrics, Johns Hopkins; Instr. in Pediatrics, Harv.; Visit. Phys., Boston Lying-In Hosp.; Asst. Phys., Children's Hosp.; in practice, Boston.

SMILLIE, WILSON GEORGE

A.B., Colorado, 1908; M.D., Harv., 1912; D.P.H., ibid., 1916; Med. H. O., P. B. B. H., Nov. 1, 1912-March 1, 1914; Asst. Res. Phys., ibid., March 1-Sept. 1, 1914; Asst. Instr., Dept. of Preventive Med., Harv., 1914-16; Research Fellow, Rockefeller Inst., New York City, 1916-17; International Health Board of Rockefeller Foundation, 1917; loaned by the board as Asst.
