QUARTERLY REPORT OF THE MYSORE STATE DEPARTMENT OF PUBLIC HEALTH.

GENERAL.

The state of public health in the quarter under report was satisfactory, the State being practically free from the epidemic diseases, plague, small-pox and cholera.

In connection with the manufacture of plague vaccine at the Public Health Institute, Government have sanctioned in Government Order No. G. 9863-4-P. H. 136-37-4, dated June 11, 1938, the construction of an incubating room in the Public Health Institute at a cost of Rs. 945. Sanction has also been given for the installation of an incubator at a cost of Rs. 2,350 in Government Order No. G. 8475-6-P. H. 136-37-2, dated April 21, 1938.

The temporary staff of one chemist, two laboratory attendants and one peon in the Chemical Section of the Public Health Institute was placed on a permanent basis in Government Order No. G. 10066-7—P. H. 131-37-2, dated June 22, 1938, with the modification that the scale of pay of the chemist be changed from Rs. 75-5-100 to Rs. 75-5-150.

As per Government Order No. G. 9748-9-P. H. 23-37-16, dated June 6, 1938, the Sanitary Inspectors' Training Class has been continued for the third year of its existence at an estimated cost of Rs. 2,100. The session of 1938-39 actually commenced on August 18, 1938 with 25 students.

Dr. V. Narasimhamurthy who was on a Rockefeller Foundation Fellowship in America, returned and joined duty on August 11, 1938. He was awarded the degree of Dr. P. H.

As per Notification No. G. 9366-P. H.-92-37-7, dated May 25, 1938, Mr. G. N. Seshadri was posted as Superintendent, Bureau of Health Education, Mr. E.

[VOL. X.

Anantha Rao being posted as District Health Officer, Shimoga.

The Director was out of headquarters for 34 days during the quarter and visited 13 towns and 15 villages in seven districts in connection the inspection of sanitation, vaccination, water supply, drainage and town improvement works. He also inspected the Malaria Stations at Hiriyur, Nagenhalli and Mudgere, and attended the Representative Assembly and the Mysore Improvement Trust Board meetings in Mysore City.

BUREAU OF ADMINISTRATION.

(a) City Health Organisations.

(1) BANGALORE CITY.

M. G. SRINIVASA PEIDPET, L.M.S., B.S.Sc.,

Health Officer.

During the quarter 1,914 live births, 95 still-births, 10 plural births, 1,247 deaths and 266 infant deaths were reported. Of 1,999 parturition cases registered 20 material deaths occurred, giving a maternal mortality of 10.0 per thousand births. The computed birth-rate was 36.1 per mille of population, the death-rate was 23.5 per thousand of population and the infant mortality rate was 139.0 per thousand live births.

The City was free from plague and cholera. Small-pox accounted for 55 attacks and 14 deaths. As a preventive measure 7,381 vaccinations were done. The number of unprotected children was 1,154.

During the quarter 6 attacks and 3 deaths from typhoid were reported and 4 anti-typhoid inoculations were given.

Hydrophobia accounted for 1 attack and 1 death.

Under measles 5 attacks and 5 deaths were reported.

The following sanitary improvements were effectted :---

- 1. Drains in Sampige Road and West Park Roads, Malleswaram, got repaired.
- 2. During this period, open drainage system in Link Road extension was completed.

- 3. One block of five flush-out latrines in Jalimohalla, one block of five urinals near mutton stalls and two urinals and one latrine in Arcot Srinivasa Char Street were constructed.
- 4. Two taps were opened which were closed for some months in IV Division.
- 5. Five new type platforms were constructed to the public fountains.
- 6. One thousand and thirty children bathed at Mavalli Bathing Centre, VI Division.
- 7. Five pits were got filled with rubbish and removal of rank vegetation was undertaken in VII Division.

The following inspections were made and action was taken wherever found necessary.

1.	No. of eating houses inspected	 26
2.	" aerated water factories visited	 5
3.	,, coffee clubs and sweetmeat shops inspected	 187
4.	., bakeries visited	 16
5.	,, notices issued	 307
6.	,, notices compiled	 85
7.	Number pending disposal at the end of the quarter	 71

Seven cinema shows were held in different parts of the City.

During the quarter, 44 samples of ghee, 20 of butter, 7 of coffee powder, 1 of buffalo milk and 1 sample of unspecified milk were analysed. Of these 73 samples, 48 were found to be genuine and remaining 25 adulterated.

(2) MYSORE CITY.

S. SESHAGIRI RAO, B.SC., M.B.B.S., D.P.H.,

Health Officer.

In Mysore City 1,332 live births and 35 still-births were reported giving a birth-rate of 42.9 in the quarter under report. The number of deaths reported was 742 with a death-rate of 23.9 per mille of population. Of these deaths, 148 were under 1 year of age with an infant mortality rate of 111.1 per 1,000 live births. Out of 1,362 parturition cases registered 11 deaths from childbirth were reported, giving a maternal mortality rate of 8.0 per 1,000 births.

No. 2]

The city was free from plague and cholera. During the quarter 197 anti-plague inoculations and 14 anticholera inoculations were done. Under the anti-rat campaign rat traps were distributed to 3,491 houses and 2,683 rats were caught and destroyed.

Only one attack of small-pox was reported. Of 2,458 vaccinations performed, 1,575, were primary and 883 revaccinations.

Two cases of influenza were reported.

During the quarter 13 deaths from typhoid were registered.

Nineteen houses were got disinfected as against 104 in the preceding quarter.

During the quarter 801 stray dogs were destroyed.

Malaria control work done during the quarter was on the same lines as in the previous quarter.

Under food inspection 84 visits were paid to hotels, 257 to coffee clubs, 54 to aerated water factories, 47 to bakeries and 171 to mutton stalls. During the quarter 61 notices were issued under the different sections of the Municipal Act. The samples of food stuffs analysed in the laboratory are described below :—

No.	Sample	Number of samples examined	Number of samples found genuine	Number of samples found adulterated	Number of cases prosecuted

(b) District Health Organisations.

(1) MYSORE DISTRICT.

A. S. VENKATACHALAM, L.M.S., D.P.H.,

Health Officer.

As this district is in the non-registration area, it is not possible to present the vital statistics of the current quarter in this report.

During the quarter 6 attacks with 5 deaths from plague were reported. A total of 3,491 anti-plague inoculations were done, of which, 239 were performed by the District Health Officer.

Small-pox accounted for 10 attacks in two places. As a routine preventive measure 12,544 vaccinations were done, of which 2,134 were performed in the Rural Health Unit, Mandya.

One attack of cholera was reported. As a preventive measure 274 anti-cholera inoculations were done, of which 106 were performed by the District Health Officer.

The bore-hole latrine work in Periyapatna Taluk was continued upto April 28. In this connection the Assistant Sanitary Inspectors visited 17 villages for propaganda work.

The District Health Officer visited 16 towns and 29 villages on inspection work. The work of Sanitary Inspectors and Vaccinators were supervised. He visited 4 schools and examined 272 children.

(2) SHIMOGA DISTRICT.

E. ANANTHA RAO, B.SC., M.B.B.S., D.P.H.,

Health Officer.

In Government Notification No. 9366–P. H. 92-37-7, dated May 25, 1938, Mr. G. N. Seshadri, District Health Officer, was transferred to the Central Office in Bangalore. He handed over charge to Mr. E. Anantha Rao on the afternoon of June 11, 1938.

Because of centralisation of vital statistics work, statistics of births, deaths and marriages are now available for the current quarter for the whole district. In the rural area of the district, having a population of

[VOL. X

4,73,960, 2,790 live births, 62 still-births, 259 infant deaths and 1,748 deaths from all causes were registered. The computed rates were:—birth-rate 23.5, death-rate 14.8, and infant mortality rate 92.8. Of 2,837 labour cases registered, 60 deaths from child-birth were reported, giving a maternal mortality rate of 21.0 per 1,000 births.

In the Municipalities with a population of 66,278 the rates were :-birth-rate 36.4, death-rate 14.8, infant mortality rate 76.3 and maternal mortality rate 18.7.

During the quarter one death from plague was reported.

Small-pox accounted for 20 attacks and 3 deaths. As a preventive measure 5,826 vaccinations were done.

The district was free from cholera.

Baby shows were held at Sorab, Hosanagar and Sagar at which 255 children were examined and lectures on maternity and childwelfare were given.

An institutional diet survey in the hostel attached to the Government High School is being undertaken. The data collected so far go to show that the diet is not well-balanced.

Four magic lantern lectures were given at Kudli, Harnahalli and Sagar during the jatra. Health talks were given in 3 primary schools on personal cleanliness, nutrition, etc.

Two hotels were inspected and suggestions were given for improving them.

In Shimoga Town 10 soak-pits were constructed for disposing of waste-water from the road side filter water stand-pipes.

The District Health Officer visited 6 towns and 24 villages on inspection work. He also inspected 3 model villages. He checked the work of 5 Vaccinators and verified 33 vaccinations. Suggestions were made to the President, Shimoga Municipality, regarding the improvements to the vegetable market and the sanitary method of disposal of night-soil. The District Health Officer supervised the anti-malaria operations undertaken by the Shimoga Municipality. He attended two meetings of Shimoga Municipality and one meeting of Bhadravati New Town Board.

ADMINISTRATION

(c) Voluntary Organisations.

RED CROSS SOCIETY.

Headquarter Grants.—(a) A sum of Rs. 720 being the grant towards the Nursery School, Mysore, for 1938, was received and paid to the Superintendent, Nursery School, Mysore, accordingly.

(b) A sum of Rs. 313, being the first half-yearly grant to the Kolar Gold Field Centre was received and paid to the Hon. Secretary, Kolar Gold Field Red Cross Branch, Robertsonpet, accordingly. A sum of Rs. 757 was received, being the first half-yearly grant to the State Branch.

University Grant.—The University of Mysore have generously sanctioned a sum of Rs. 300 towards the cost of publication of the translation of the book on 'Food' by Sir Robert McCarrison. Necessary steps are being taken to print and publish 2,000 copies of the same for propaganda purposes of the Society.

Delegation to the 16th International Red Cross Conference held in London in June 1938.—Dr. V. R. Naidu, M.B.B.S., M.Sc., a Mysore Doctor in London represented the State Branch at the above Conference held in London. He had the high honour of meeting their Imperial Majesties the King Emperor and the Queen Mary at a reception arranged in this connection. His Majesty, it is reported made kindly enquiries about the work of the Mysore State Branch and was very much pleased when he learnt the advance made by the Branch in its varied activities under the fostering care of His Highness the Maharaja of Mysore.

Equipment Grants.—The following equipment grants were sanctioned during the quarter :—

- (a) A grant of Rs. 200 towards the Maternity Home at Chandrasekarapura in Gubbi Taluk.
- (b) A grant of 300 towards the Maternity Home at Royarkoppal, Manjarabad Taluk.

Grants for Maintaining Additional Midwife.—The following grant was sanctioned towards the appointment of an additional midwife:—

> A grant of Rs. 100 towards the cost of salary of the additional midwife at Kallur (Tumkur District).

APRIL TO JUNE

Grants towards the Periodical Inspection of Maternity Homes.—A sum of Rs. 10 per mensem was sanctioned towards the conveyance allowance to the Lady Sub-Assistant Surgeon, Krishnarajnagar, for weekly visits to be paid by her to the Maternity Home at Bilikere.

Donations for the construction of Maternity Homes.— One Mr. Dasa Viswanatha Setty has donated a sum of Rs. 4,500 towards the construction of a Maternity Ward at Madhugiri.

Equipment and Maintenance of the Red Cross Buildings in the Kempe Gowda Road, i.e., Lady Willingdon Tuberculosis Dispensary and Seth Chellaram Kishindas Multani Maternity Home.—A committee of 5 members (1. Rajamantrapravina Diwan Bahadur Mr. K. Matthan, Chairman, Mysore State Branch of the Indian Red Cross Society, 2. the Senior Surgeon in Mysore, 3. the Municipal Commissioner, Bangalore, 4. the President, Bangalore City Municipality and 5. Rajacharitavisarada Rao Sahib Mr. C. Hayavadana Rao, Hon. Secretary, and Treasurer) was formed and the committee met at the Chairman's residence on March 9, 1938, to consider the above question. The conclusions arrived at by that committee are being given effect to.

Medical Examination of Sputa of Poor Patients.— Government have been requested to consider the desirability of issuing an order to the effect that sputa sent by any Registered Medical Practitioner of a patient who is poor, should be examined free of cost at the Public Health Institute, and the Victoria and the Krishnarajendra Hospitals, and the Hospitals located at all other district headquarters and the result made known also free of cost to the respective parties concerned.

Scheme for the Popularisation of the Knowledge of Tuberculosis.—Steps have been taken to arrange for a course of lectures on Tuberculosis to be delivered in the Normal Schools, Training Colleges, the Karnataka Sahitya Parishat and at the Teachers' Conference. The health of Public Health and Medical Departments have been sought for. The Director of Public Health has been requested to work out a scheme for these lectures and the concerned institutions have been addressed in the matter with a view to early action.

Appointment of an Organising Secretary.-Government have recently appointed Dr. S. V. Biligiri Iyengar,

No. 2] ADMINISTRATION

L.M.S., as Organising Secretary for Maternity and Child Welfare.

Election of Vice-Chairman.-The Senior Surgeon was elected as the Vice-Chairman of the State Branch of the Red Cross Society.

Annual Meeting.-The annual Meeting of the Mysore State Branch of the Red Cross Society, was held at the Daly Memorial Hall, Cenotaph Road, Bangalore City, under the distinguished presidentship of Sir Mirza M. Ismail, Kt., C.I.E., O.B.E., C.St.J., Amin-ul-Mulk, Dewan of Mysore. A large and representative gathering of State Officers, members and well-wishers of the Society were present. Office-bearers were elected for 1938 and the Budget Estimates for 1938 were also approved.

OTHER CENTRES.

BUREAU OF EPIDEMIOLOGY.

J. J. SIMON, L.M.P.,

Superintendent (in charge).

During the quarter Mr. B. Ananthaswamy Rao was deputed to Singapore to attend the League of Nations Health Organisation as per G. O. No. G. 8852-3-P. H. 120-37-6, dated May 7, 1938. He was in charge of the Bureau upto May 15, when he handed over charge to Mr. J. J. Simon, the Malaria Officer.

The following places were visited by Mr. B. Ananthaswamy Rao during the quarter :--

	Places Visited.		Purpose.				
1.	Hiriyur		Joint inspection of the Engineering as- pect of Malaria with the Sanitary Engineer.				
2.	Belur		Inspection with reference to Malaria survey of the town.				
3.	Mudgere-Handguli- Halur.		Inspection of vaccination with the Director of Public Health.				
4.	Chikmagalur, Tariko	ere.	Discussion with the Vice-President and the Director of Public Health re- garding proposals for anti-malaria work.				
5.	Shimoga—Jog		Inspection of Project camp sites with reference to evidence of malaria.				
6.	Bhadravati		Inspection of malaria work in Old Town and Iron Works.				
7.	Kolar Gold Field		Inspection of anti-malaria work in the Mining Area.				
8.	Jog		Malaria Suryey.				

The Superintendent in charge visited the three Study Stations, Jog, Bhadravati, Marconhalli and Tippagondanahally.

Malaria Stations.

The quarterly spleen and blood examinations in all the three study stations were done as usual, and the

Station	Sp. R.	Sp. R.	P. R.	P. R.
	1938	1937	1938	1937
Nagenhalli	 29'8	26.0	7.0	5'0
Mudgere	 25'0	45'0	2.7	8'5
Hiriyur	 40'0	30.0	6.6	5.0

results, as against those for the corresponding quarter of of the previous year, were as follows :---

There was practically no change in the routine work in these stations except that, in Mudgere Paris-green spraying in the river area, was slightly extended up to the belt of trees close to the river-bed towards northeast of the town, and in the other two stations it was temporarily suspended in some selected channels within the control area, for the purpose of studying the factors favouring anopheline breeding under natural conditions. In Hiriyur, the service of the elephant used for clearing the weeds in the Vedavathi river was discontinued, as it was found pulling out only the well-grown weeds in the swampy area without tackling the fresh shoots and those on hard ground as reported in the previous quarter.

In order to study the more natural conditions favouring anopheline breeding within and beyond the control area, the following special observations were taken up in the study stations during the quarter :---

- (1) Paris- green spraying in the Farm channel in Nagenhalli Farm, in the wells at Nagoonahalli Village, and in Krishnambudhi channel flowing close to the T. B. at Hiriyur was temporarily stopped for purposes of study.
- (2) Observations in regard to anopheline breeding in some selected paddy plots and channels, were made both in the control and peripheral areas.
- (3) Observations for anopheline breeding in the shaded and the non-shaded places both in the control and peripheral areas were made.

All these experiments are still under observation and it is hoped to complete and publish the results in the next quarter.

MANDYA CONTROL UNIT.

Malaria control in the group of 10 villages in Mandya Taluk was continued as usual. The half-yearly spleen and blood examinations of all the ten control and 4 comparison villages for the first half of 1938, were done as usual in April this year, and the results as against those for the corresponding period of the previous year are given below :—

	119 01 010 019 010 010 010		Sp. R. 1938	Sp. R. 1937	P. R. 1938	P. R. 1937
in a	Control Villages.	1111		postareg		
1.	Chikmandya		7.9	20'0	5.0	6.0
2.	Satnur		6'4	6'9	4'0	5.2
3.	Kommarahalli		17.8	20'0	8.0	10'0
4.	Hanganahalli		13'0	23'3	10.0	6.6
5.			7.6	25.0	6.0	8.0
6.	Gopalapura		12.8	20.0	6.0	6.0
7.	Kodihalli		25'0	34.1	6.0	15'8
8.	Malligere		25'4	41'3	10.0	8'3
9.	Jaigundipatna		18'2	28.6	7.0	6.6
10.	Kallahalli		20'3	28.7	7.0	5.0
	Comparison Villages.					in ser
1.	Kilara		23'6	25.7	9.0	17.7
2.	Mallanaikankatte		20'0	26'7	13'0	10.0
3.	Panakanhalli		31'7	40'5	20'0	12.0
4.	Ummadahalli		35'3	54'9	12.0	18'0

The distribution of quinine in the unit villages was not undertaken by the staff during the quarter as the activities of the Rural Health Unit at Mandya in regard to distribution of totaquine tablets extend into all the malaria control unit villages also.

ANTI-MALARIA ENGINEERING.

Observations on larval findings in the channels and hallas having a good fall round about Bevinahalli, Kyatangere and Sundahalli treated by anti-malaria engineering methods, were continued. Regular visits by the staff were also made for similar purpose, to Kodihalli and Gopalapura, as it was proposed to construct an automatic flushing syphon and a sluice respectively in those two villages.

The half yearly spleen and blood examinations in those three villages, viz., Bevinahalli, Kyathangere and No. 2]

17

Sundahalli for the first half of 1938, were conducted during April this quarter.

MALARIA CONTROL IN CITIES.

Bangalore City.— The mosquito control work in the City was continued as usual with oil spraying. The adult collections from all the catching stations during the quarter were 220 anophelines and 400 culicines, as against 95 and 696 respectively for the corresponding quarter of the previous year. The supervising staff examined 2,998 wells and re-stocked fish in 2,173 wells. Besides the oiling and check inspections, the gang were engaged in clearing the old drains and cutting new ones to drain off stagnant water.

Mysore City.— The anti-malaria work in the City was continued as usual with oil and Paris-green during the quarter. The number of adults caught in the catching stations was 193 as against 276 in the corresponding quarter of previous year. The staff examined and restocked fish in 849 wells and 17 pools.

MALARIA SURVEYS.

Malaria surveys were conducted in Jog in Sagar Taluk, in P. K. T. Sanatorium in Mysore City, and in ten villages along the Shimsha channel beyond Marconhalli, during the quarter.

Jog (Sagar Taluk).—A detailed survey was conducted in Jog and it was found that the place is hyper-endemic for malaria. The spleen rate among children under 12 years of age was 96'1 per cent, and the parasite rate among 17 people with history of malaria, was 41'2 per cent. The bed of the river was found to be breeding heavily throughout, except at the falls. The culex were also breeding in large numbers at the falls and in rocky pools in the river bed. Among the carrier species of anophelines identified, A. culicifacies and A. fluviatilis were found in large numbers. Proposals for immediate control were sent up and it is hoped that the work would be taken up after the monsoon.

Princess Krishnajammanni Tuberculosis Sanatorium (Mysore City).—As the patients in the Sanatorium were subject to periodical attacks of malaria a survey was conducted for a half-mile around the Sanatorium and it

3

was found that the carrier species of anophelines were breeding just beyond the city malaria control limits. In Mallumia's garden close to the Sanatorium both carrier and non-carrier species were found breeding in wells and stagnant pools in the channel. The owners of the garden area were not allowing spraying in their gardens. In the villages Matikalli and Kumbarkoppal, quite close to the Sanatorium, the carrier species were found breeding. The spleen rate in the former is 40.0 per cent, and in the latter it is below 10 per cent. A scheme for effective control of the area is under preparation.

Marconhalli Area.-Spleen survey in the following villages along the Shimsha Canal from Marconhalli was conducted :----

	Places.		Spleen-Rate.
1.	Hanumapura	 	25.0
2.	Torehalli	 	0.0
3.	Shanboganahalli	 	0.0
4.	Yachanahalli	 	5.0
5.	Channahalli	 	7.0
6.	Toobinkere	 	7.4
7.	Kirangur	 	7.3
8.	Kachuvanahalli	 	3.5
9.	Bettahalli	 	3.3
10.	Carithimmanapalya	 	4.3

HOOKWORM CAMPAIGN.

In connection with propaganda for the introduction of private pit-latrines 17 villages in Periyapatna Sub-Taluk were visited by two Assistant Sanitary Inspectors. They explained to 860 persons in all but response was poor.

GUINEAWORM CONTROL UNIT.

The Assistant Sanitary Inspector continued to be in charge of the Unit during the quarter. He toured in 5 taluks in the Chitaldrug District and the following is a brief statement of the work done :---

No. of days toured	 46
Do villages visited for the 1st time	 133
Total No. of villages visited	 227
No. of villages having active G. W. cases	 20
Average No. of G. W. cases per village	 23

No. of	step-wells examined		92
Do	wells stocked with fish for the first	time	24
Do	wells re-stocked with fish		31
Do	wells treated with perchloron		1

Out of 20 villages in which active guineaworm cases were found, 3 belong to Harihar Sub-Taluk, 3 to Chitaldrug Taluk, 2 to Chellakere Taluk, 2 to Davangere Taluk, and 11 to Molkalmuru Taluk. The Assistant Sanitary Inspector also took active part in guineaworm demonstrations at the District Conference in Chitaldrug and at the departmental cinema shows in the district.

CENTRAL LABORATORY.

The study of A. culicifacies was taken up during the quarter. The adult mosquitoes were got from Mandya and Hiriyur and allowed to lay eggs. A number of larvæ were raised from the eggs, which were reared in hay infusion specially prepared for the purpose. About 14 adults were raised from the larvæ, 2 males and 12 females. Experiments for allowing them to mate in cages for raising colonies of the species are in progress.

Routine examinations of blood smears received from Mandya and Mudgere were done and the adult collections from Marconhalli were identified as shown below:—

Mudgere		No. Ex.	No. Pos.	Sp. R.	P. R.
Control		72	18	25.0	2.8
Peripheral		38	22	57.9	23.7
Marconhalli.—	No	b, Ex.	Dangerous.	Nor	ı-dangerous.
Adults		54	12		42

CONTROL OF EPIDEMIC DISEASES.

The State was practically free from all the three epidemic diseases in the quarter under report, the number of deaths from plague, small-pox and cholera being 26, 20 and 3, respectively. In April, all the houses in Bethamangala including the water works colony were fumigated with cyanogas as an anti-rat measure. Antiplague and anti-cholera inoculations done during the quarter numbered 7,486 and 605, respectively. Particulars of 58,904 anti-small-pox vaccinations done are given in the following statement :—

2. Chemical Section.—As compared with 558 specimens in the previous quarter, 591 specimens were examined in the quarter under report.

Particulars.	Number	Examined.
Water for Residual Chlorine	 	530
Water for potable purposes	 	57
Molasses	 	3
Wood naptha	 	1

No. 2]

LABORATORIES

3. Medico-legal Section.-In the medico-legal section, 66 cases with 226 articles were examined during the quarter as compared with 58 cases with 195 articles during the previous quarter.

No.	Nature of Examin	ation	No. of cases	No. of articles
1	Suspected Human poi	soning	33	119
2	Mammalian Blood		21	85
3	Rape		8	11
4	Abortion		2	9
5	Explosives		1 001	avilen 1 mos
6	Seeds		1	1
	To	tal	66	226

As a result of examination madar was detected in 1 case, aconite in 2 cases, aconite roots were identified in 2 cases, dhatura in 2 cases, mammalian blood in 18 cases and spermatozoa was detected in 1 case.

4. Vaccines Issued .- The following quantities of vaccines were issued during the quarter :--

T. A. B. Vaccine	 	328 cc.
Anti-cholera Vaccine	 	2,150 cc.

5. Fees.-The amount of money collected for the examination of specimens and for supply of vaccines was as follows :--

Item			Apri	l-Jur	10	January-March		
	BE BUKEAU UK	iotan	Rs.	a.	p.	Rs.	a.	p.
1.	Bacteriological Section		47	11	0	21	8	0

3.	T.A.B. Vaccine		41	8	0	46	4	0
4.	Cholera Vaccine		858	6	0	1,410	4	0
5.	Other Receipts		6	2	0		•••	
	Total		1,028	11	0	1,548	0	0

6. Nutrition Experiments.—A number of biological experiments are being conducted in the Institute for 4

assessing the nutritive values of the common food-stuffs. Different samples of rice sold in the market such as Coimbatore sanna, Hyderabad rice, Ajmeer rice, Siam rice and Rangoon rice were experimented upon for finding out their suitability for consumption. It was found that all the samples examined, with the except of handpounded rice, are greatly dificient in Vitamin B_1 . The effect of addition of dhal to the highly polished rice was also investigated, and it was found that the addition improves the food value of the milled rice.

Experiments were also carried out for finding the comparative food values of rice, cholam and ragi.

VACCINE INSTITUTE.

(b) Vaccine Institute.

J. A. ISWARAMURTHY, B.A., L.M.S., B.S.SC.,

Superintendent.

During the quarter 29 samples of vaccine lymph were examined bacteriologically 321 times. Their potency was tested in serial dilutions on the rabbit and clinically in the Model Range prior to issue.

The standards adopted for potency and sterility of lymph issued were continued.

A summary of work done at the Institute is given below :--

Model Range.—In the model range 275 primary vaccinations were done with the lymph of varying age periods, for clinical test on children before releasing for general issue, giving a success rate of 96'5 per cent. The oldest lymph used in this range had been preserved for 3 months and 27 days from the date of production and the freshest for about 2 months and 21 days, the average period being 3 months and 9 days.

The percentages of successful primary vaccinations reported during the quarter were :---

BUREAU OF HEALTH EDUCATION.

G. N. SESHADRI, L.M.S., D.P.H.,

Superintendent.

In Government Notification No. G. 9366-P. H. 92-37-7, dated 25th May 1938, Mr. E. Anantha Rao, was transferred as District Health Officer, Shimoga, and G. N Seshadri took charge as the Superintendent, Bureau of Health Education, from June 21, 1938.

Cinema Publicity.-During the quarter the cinema publicity work was carried on in the districts of Chitaldrug,

No 2.]

ful.

Hassan, Kolar, Shimoga and Tumkur. A total of 51 cinema demonstrations were arranged for an approximate audience of about 39,000 persons. The cinema staff travelled, as usual, in the Departmental Motor van, covering a total distance of 2,278 miles.

The details of the 51 cinema shows are given below :---

Particulars.

No. of Shows.

1.	In connection with the Baby Shows	10
2.	Do District Conference, Hassan.	2
3.	Do do Kolar	1
4.	Exclusively for ladies at the Mahila Seva Samaja	
	and Sarada Sthree Samaja, Bangalore City	2

	and Tumkur Districts	29

Health Talks in Schools.—The Publicity Officer during his itineration visited two Government Primary Schools and delivered health talks to teachers and pupils.

Lectures.—Three lectures on 'House-fly' were delivered by the Publicity Officer at Doddasiddawarahalli, Kalledevapura and Haranahalli. Besides, in 27 places he delivered short lectures on the aims and objects of the Red Cross Movement in general and the activities of the Mysore State Branch of the Indian Red Cross Society in particular.

Health Exhibitions.—The Bureau helped, by lending the available health charts, posters, etc., in organising health exhibitions in connection with (a) the Baby Week organised by the Bangalore Woollen, Cotton and Silk Mills, Ltd., and (b) the exhibition arranged on the occasion of the District Conference at Shimoga. A poster exhibition was also arranged during the District Conference at Hassan.

'*The Mysore Arogya*'.—The March 1939 issue of the 'Mysore Arogya' (Diet and Health Number) was printed and published during the quarter.

Newspaper Publicity.—Thirteen (13) weekly bulletins in Kanarese in regard to the state of public health in the State were sent to Press for publication. The convictions secured in Bangalore and Mysore Cities under the Prevention of Food Adulteration Act were given publicity both in English and Kanarese papers.

28

RURAL HEALTH

Distribution of Health Literature.—A total of 1,051 illustrated posters and 8,530 leaflets and pamphlets on health subjects published by the Department were distributed.

BUREAU OF RURAL HEALTH.

(a) Health Training Centre, Closepet.

T. CHANDRASEKHARAIYA, B.A., M.B.B.S., M.P.H.,

Health Officer.

Rajkumari of Amrut Kaur, Lady Maharaja Singh, Gwalior and others, Mr. Iqubil Singh and Dr. Myers, Hon'ble Yakub Hussain, Minister of Madras, Mr. T. P. Fernandez, Nagpur Health School, C. P., visited the Unit during the quarter.

The students of the Sanitary Inspectors' Training Class, Bangalore, were given training in field work in this Unit in the month of June. They arrived here in two batches and each batch was given a fortnight's intensive practical training.

Typhoid.—There were 8 attacks with 2 deaths from typhoid as against 4 attacks with 1 death in the previous quarter. These were sporadic cases and occurred in several villages. Necessary precautions were taken to arrest the spread of the disease; 22 anti-typhoid inoculations were done.

Dysentery.—Forty-two attacks with no death due to dysentery were registered as against 68 attacks with 12 deaths in the previous quarter. June contributed the largest number of these cases, 36 attacks having occurred during this month. Settihalli, a village in the 'D' division contributed 10 cases, Checkere, also in the 'D' division, contributed 6 and Anjanapura in 'B' division contributed 6 cases. Arrangements were made to prevent the spread of the disease and treatment for the cases was arranged with the two Local Fund Dispensaries in the area.

Measles.—Twenty-two cases of measles with no death were reported against 35 with no death in the previous quarter.

Consumption.—Three cases with one death from pulmonary tuberculosis were registered in this office as against three attacks with nil death in the previous quarter. *Pneumonia.*—Pneumonia showed a slight increase in its incidence. The cases were influenzal in type generally and the disease prevailed in a sporadic form all over the area. Fifteen attacks with five deaths were reported as compared with four attacks with three deaths during the previous quarter.

House Survey.—The re-survey of houses was completed and the improvements necessary for individual houses and for villages were tabulated. These are being written up in the registers provided by the Rural Welfare Centre to the Patels so that they will form a guide to them when they take up improvement work in their villages.

Chlorination.—According to routine 117 public wells and 250 private wells were chlorinated out of 1,450 in the area.

Vital Statistics.—The checking of births and deaths registers was satisfactorily carried out. The lists of the detected births and deaths were sent to the Sub-Division Officer as usual for taking necessary action. The birthrate for the area was 52'1 and the death-rate 19'4. Fiftysix infant deaths were recorded, giving an infant mortality rate of 85'1; 52 of these deaths have been investigated by the Public Health Nurses.

Maternal Deaths.—Eight maternal deaths, giving a maternal mortality of 11.9 were recorded. All these deaths were investigated by the Public Health Nurses. The causes of these maternal deaths are given below :—

No.	2]		RURA	L HEA	LTH		. 31
	Remarks	Advised to go to hospital, but the patient did not go. Removed to hospital, but she did not stay. Returned home and died on	The people did not call the help of the staff nor did they take any medical aid. Gave some native	medicines. Advised to be under hospital care. Advice not carried out. .

It is significant to note that out of 64 births and 10 deaths that have been registered as unreported, 25 births and 3 deaths have been detected in Closepet Town only. The efficiency of reporting has improved considerably in the rural areas while that in Closepet Town shows no improvement.

Vaccination.— Intensive vaccination work was carried on as usual in 'A' and 'B' divisions; 3,583 vaccinations as against 3,879 during the previous quarter were done. Of these, 1,022 were primary and 2,561 re-vaccinations. The primary vaccinations gave a success rate of 73.5 per cent and the percentage of those whose reaction proceeded to the pustular stage among the re-vaccinations was 18.3 per cent.

Maternity and Child Welfare.—The Public Health Nurses' work in all the divisions was satisfactory. The clinics were held regularly in the different places as in the previous quarter. In all, 60 clinics were held at which 107 pre-natals, 433 infants, 504 pre-school children and 116 others attended.

The five Nurses during their 5,258 home-visits, examined and registered 2,228 pre-natals, 3,376 infants and 3,043 pre-school children. The Nurses examined 751 samples of urine.

Midwives.—The Midwives attached to the Unit conducted 343 deliveries during the quarter, showing that 51 per cent of the total number of deliveries was conducted by the trained midwives of the Unit. A total of 2,698 post-partum visits were given by the Public Health Nurses and Midwives, giving an average visit of 4 per case as against 4.1 in the previous quarter.

Health League.—The intensive village improvement work progressed fairly satisfactorily in the villages in the area. In order to provide cheap, strong and satisfactory windows, experimental windows were attempted in re-inforced concrete and it is gratifying to note that the result have been very satisfactory and it is expected that very soon the village homes will be provided with these.

Health League Activities.

Under construction.

Latrines for Schools.—It was considered desirable to introduce sanitary latrines in the primary schools in the area where it has been decided to do 'health habit training.' The Department has agreed to give the squatting plates for the construction of these latrines and the Unit prepared 20 slabs for this purpose and placed them at the disposal of the Rural Welfare authorities.

Laboratory.—Thirteen blood samples were sent to the Public Health Institute for Wassermann reaction and 55 blood smears were examined at the Unit laboratory for malaria parasities. Thirteen sputum smears for T. B., 15 samples of stools for hookworm ova and 12 urine samples and 3 throat smears for diphtheria were also examined.

During the quarter, 186 patients were given consultation at office and necessary advice was given to them, and 2,963 patients were treated at the office, clinics and villages for minor ailments.

(b) Rural Health Unit, Mandya.

C. RAMASWAMI, L.M.P.,

Officer-in-Charge.

Plague.—Two dead rats were found in one of the official quarters of the Engineering Colony in Mandya

town extension in the month of May and on microscopical examination they were found positive for plague. One dead rat was received from the Sugar Factory Colony, Mandya, in the same month and was found negative for plague.

Immediate precautionary measures were undertaken by the Unit staff to eradicate the epizootic among rats in the Engineering Colony; 35 residential quarters were disinfected; the rat burrows in the 16 blocks of 32 families and in the three officers' bungalows were fumigated with cyanogas; and 91 persons were given anti-plague inoculations. No human cases occurred in the rat-infected area.

There was no report of plague in the unit area during the quarter as against 14 attacks with 13 deaths in the previous quarter.

Small-pox.—The infection of small-pox which started in Halahalli village in the previous quarter with five attacks and nil death, prevailed in the same village in April also. There were three fresh attacks with one death and the infection was brought under control by the end of that month.

Four more villages of the unit area, namely, Holalu, Panakanahalli, Kudargundi and Gejjelgere were next infected with the disease, the sources of infection of the first cases in all these villages being traced to places outside the Unit area. In these villages 23 attacks with 3 deaths were reported.

Intensive vaccination work was taken up as a preventive measure in all the infected villages. In Halahalli, Holalu and Panakanahalli, the infection declined by the end of May. The infection in the remaining two villages is still lurking in a moderate form. In spite of opposition for vaccination work by the villagers on sentiments attempts are being made for vaccination on a mass scale.

Cholera.—In the villages of Tumbakere and Thaggalli in the Unit area and Karadikoppal outside the Unit area, a few attacks of suspected cholera occurred. These villages were immediately visited by the Health Officer. On examination of the patients they were found having acute attacks of diarrhœa and vomitting, this diagnosis being latter confirmed by laboratory examination of fæcal samples. The infected houses were disinfected, and the patients were advised regarding food and proper medicalaid. Vaccination.—The Unit staff performed 1,270 primary and 955 re-vaccinations during the quarter as against 704 primary and 218 re-vaccinations in the previous quarter.

Particular attention was paid to the villages infected with small-pox. The staff also conducted a survey for unprotected children and vaccinated the children so found.

Midwives. — The two midwives attached to this Unit paid 163 visits to 29 villages in their jurisdiction. They paid 530 pre-labour, 224 post-labour and 37 miscellaneous visits. They conducted 17 deliveries. They had 850 prenatals under their care during the quarter as against 735 in the previous quarter. Four samples of urine were examined for albumin.

Chlorination of Water Supplies. The routine work of chlorinating the water supplies of the villages once a quarter was continued. A total of 407 wells were thus chlorinated as against 476 in the previous quarter.

Dog Destruction.—During the quarter, 74 stray dogs (64 in Mandya town and 10 in Maddur town), were destroyed in the Unit area. This work was got done through the agencies of the respective municipalities.

GENERAL SANITATION.

Sivapura (Maddur Town).—In connection with the Mysore State Congress Convention held at Sivapura on the 11th, 12th and 13th of April 1938, the Unit staff paid special attention to the sanitary arrangements. All the wells and other sources of water supply were got chlorinated daily. The hotels and restaurants were frequently inspected and attention was paid to street sweeping and proper disposal of street refuse.

Maddur Town.—In connection with the annual jatra and cattle show held at Maddur town in the third week of April, the Unit staff was engaged in supervising the sanitation of the place under the guidance of the District Health Officer, Mysore.

The Unit staff also gave advice to the Patels and Chairmen of the Village Panchayets during their visits to villages regarding the proper disposal of house-sullage, cleanliness of the houses and of the village proper, removal of manure heaps from the vicinity of the dwelling quarters, and filling up of the pits with earth.

Spleen Survey.—The monthly spleen survey of Doddabyadarahalli, Nodekoppal and Gejjelgere was conducted regularly during the quarter. *Malaria.*—The incidence of malaria in the unit area was fairly on the decrease and its decline was appreciably noted in the ten villages where the control work is being undertaken.

The distribution of totaquine pills to the sufferers from active malaria by the Unit staff was continued. During the quarter 6,750 pills were distributed to 466 patients in 136 villages, and 920 pills were stocked with the Patels, Chairmen of the Village Panchayets, and School Masters for emergency distribution to patients with proper instructions.

Malaria control work in Mandya town was also continued during the quarter, the work being supervised by the Unit staff.

Vital Statistics.—In order to find out the accuracy of reporting of births and deaths by the Patels in the Unit area, a systematic monthly collection of these data was undertaken, as an experiment, by the Unit staff from May. Out of 172 villages with a population of 74,782 in the Unit area, 22 villages with a population of 14,620 were excluded for this purpose as they are far away and would occupy an unnecessary length of time for collection.

The Assistant Sanitary Inspectors visited the villages from the 6th to 16th of every month, collected the information regarding births and deaths that occured in the previous month by a house-to-house enquiry, verified the Patels' Registers of the respective villages, noting therein the details of the detected cases. It was found that the Patels had reported only 49'3 per cent of births and 6.70 per cent of deaths.

This activity of the Unit will be carried on, on a systematic basis by the Unit staff and by establishing personal contact with the reporting agencies, attempts will be made to rectify this defective reporting.

Health Education.—The Unit staff gave 2,007 taluks on various health subjects to an audience of about 12,000 persons and distributed 200 leaflets on different health subjects to the villagers in their visits to the villages.

Health Exhibition.—In connection with the Mysore District Conference held under the presidentship of the First Member of Council on the 21st May in Mandya town a health exhibition was organised by the staff of the Rural Health Unit and the special malaria control Unit, Mandya. A special feature of the exhibition was the lay-out of a sanitary and an insanitary village. The exhibition attracted a large crowd from villages in addition to the officers and the delegates from all over the district. The show was extended for a day more for the benefit of the women folk.

Laboratory.—The Unit laboratory made examinations of specimens got from patients in rural areas and those sent by the local medical practitioners. One blood smear for M.P., two smears of urine for albumin and sugar, one fæcal sample for ova, four sputum smears for T. B., three spleen and heart smears of dead rats for B. P., were examined. One sample of fæces was sent to the Public Health Institute, Bangalore, for identification of the cholera vibrio.

Conference.—Four conferences of the staff were held during the quarter.

BUREAU OF SANITARY ENGINEERING.

N. KRISHNIENGAR, B.E.,

Sanitary Engineer.

The Bureau worked as in previous quarters in five sections, *viz.*, water supply, drainage works, sanitary fittings and house connections, Bangalore City drainage and bore wells in the State, and in the two Sub-Divisions of Vani Vilas Water Works, Mysore, and the Kolar Gold Field Water Works, Bethamangala.

I. WATER SUPPLY.

The following statement shows the total number of works undertaken by the Bureau and the total expenditure incurred up to end of the quarter on each work.

The places, where works of water supply were in progress are : Madhugiri, Hiriyur, Davangere, Chitaldrug Bowringpet, Vokkaleri, Hassan, Nagamangala, Kalkunike and Melkote. The works at Arkalgud and Saklespur were completed.

The need for any kind of drinking water supply was very keenly felt in most of the towns and villages throughout the State, specially this summer on account of the prolonged spell of hot weather and the failure of the earlier rains.

To guard against this it is considered very necessary to pursue vigorously the present policy of providing water supply schemes to towns and villages even at some extra cost. In places where such supplies are already given, the consumption of water was something extraordinarily heavy, owing to the long-drawn summer weather, and the pumping machinery had to be put under service for a far longer period every day, and it was feared that the machinery may break down in many cases; and if only such had happened the service given would have completely broken down. Almost all the moffusil pumping installations are working with a solitary unit and it is highly desirable that the local bodies go in for a duplicate set very early, so that the sets may be enabled to work alternately and the machine parts examined leisurely and the defects if any rectified in time without having to affect the normal supply. A duplicate set for Hole-Narsipur is ordered. Attempts are being made to provide such duplicate sets to the towns of Davangere and Mandya which are extending rapidly.

In Mysore City there was great anxiety felt specially during the wedding of the Prince and the Birthday Festivities, as the consumption exceeded 5 million gallons per day and all the units were working at full load for 24 hours. Proposals for placing the city system on a safe basis are already submitted and as a first instalment in this direction, orders have been placed for two extra pumps and metering the city connections has been taken up.

Water supply works were under progress in various stages during the quarter April-June, 1938.

II. DRAINAGE.

(a) Bangalore City Drainage.—Details for the preparation of the comprehensive scheme are being considered including surveying of portions of the City recently developed and also taking fresh levels wherever wanted, and checking the levels of the existing sewer lines.

Five out of 13 estimates were returned with observations having been sanctioned by Government aggregating to Rs. 3,50,760; action was taken to start the construction of manholes in the old City portion lying between the Cubbonpet area and Narasimharaja Road and between the Avenue Road and the Sir K. P. Puttanna Chetty Town Hall.

Of the remaining estimates four were revised as per instructions of the Chief Engineer.

The question of utlising the avoid sewer line laid up to its present terminal and allowing the sewage to flow in it and further into the main flood water drain, was under consideration of the Bangalore City Drainage Committee.

(b) Other Drainage Works.—During the quarter drainage works in Hassan, Kolar, Jagalur, Anekal, Sarjapur, Nanjangud, Bannur, Chamarajanagar, Closepet, Channapatna, Goribidnur, Dodballapur and Pavagada were under progress and the Government given grants were fully worked out. The drainage works at Chikballapur, Chintamanai, Magadi, and Arsikere were completed.

Drainage Project for French-Rocks was prepared.

Tumkur Drainage Works.—The construction of street drains are nearing completion. The expenditure under this items was about Rs. 25,009. The construction of main drains is taken up.

Of the total of 191 samples of water collected 52 were examined bacteriologically and 139 chemically.

III. SANITARY FITTINGS AND INSTALLATIONS.

The progress on works both in Bangalore and Mysore Cities are as noted below :—

Bangalore Works.

- 1. Old Public Offices.—
 - (a) Providing sanitary fittings to the lavatory at the office of the General Secretary—Estimate Rs. 553—Executed Rs. 548.
 - (b) Providing sanitary fittings to Development Secretary's old room converted to Princes' Administrative Training Room, Estimate Rs. 710—Executed Rs. 700.
 - (c) Providing sanitary fittings to the Development Secretary's present room, Estimate Rs. 556, Executed Rs. 550.
 - (d) Providing sanitary fittings to the Local Self-Government Secretary's room-Estimate Rs. 360, Executed Rs. 361.
 - (e) Improving the underground latrines near the Band Stand in Cubban Park-Estimate Rs. 800, Executed Rs. 752.

2. Deviation of stoneware pipe sewers near the officer's quarters at the Mysore Lancers. The work was completed—Estimate Rs. 386—Executed Rs. 385.

3. Providing sanitary fittings and water supply arrangements to the quarters of the Superintendent, Serum Institute. The work was completed—Estimate Rs. 693, Executed Rs. 717.

4. Providing sanitary fittings and drainage arrangements to Shanker Mutt, Bangalore. The work was completed, Estimate Rs. 700—Executed Rs. 864.

5. Victoria Hospital. — Providing sanitary fittings to the remaining wards 3, 4, 7 and 8 were completed before June end. Executed Rs. 1,662—Estimate Rs. 4,055.

Mysore Works.

1. Krishnarajendra Hospital.-

- (a) Providing sanitary fittings to the new special ward. The work was completed but as later glazed tiles were ordered to be fixed, the sanitary fittings were removed. Estimate Rs. 1,498, Executed Rs. 463.
- (b) Providing sinks and waste water connection and drainage arrangement to New Kitchen. The work was completed and handed over. Estimate Rs. 1,000, Executed Rs. 972.
- (c) Providing lavatory basin etc., in the Consulting Room of Resident Medical Officer. The work was completed. Estimate Rs. 126—Executed Rs. 122.
- 2. Medical College.--
 - (a) Deviating underground pipe drain at the Anatomy Block. The work was completed to enable building work to proceed.
 - (b) Providing lavatory fittings with gas taps in the pharmacology block of Medical College. The work was completed.

3. Law Court Buildings.--Providing sanitary fittings with drainage arrangements to the Chambers of Additional Sub-Judge. The work was completed and handed over.

4. Maharaja's College Hostel.-Three latrines of the ordinary type were converted to flush type with automatic flush arrangements.

5. Maharaja's College.—Porcelain urinals with necessary connections were installed for the general latrine.

6. Maharaja's High School.—The general latrine and urinals were improved to automatic flushing type.

Shimoga Works.

McGann Hospital.—Providing sanitary fittings to the extension of Maternity Block was done.

Hassan Works.

Sri Chamarajendra Hospital.—Sanitary installation with drainage and sewage disposal arrangements. The drainage work was started and eight manholes built.

IV. TOWN PLANNING AND SURVEYS.

Plans for town improvements of Hole-Narsipur and Anekal were prepared during the quarter.

Layout plans of Kengeri and Goribidnur and Shandy Maidan at Sira town were also prepared and submitted.

Village Surveys.—For the Closepet Health Training Centre, the following villages in Channapatna and Closepet Taluks were surveyed: Kalli Hosur, Thittumaranhalli, Patlu, Mainakanahalli, Basavanapura, Sanga Basavana Doddi, Kethohalli and Madapura. In all 36 villages have been surveyed and 31 village maps have been prepared, of, which 21 have already been supplied to the Secretary Closepet Rural Reconstruction Centre.

Dwelling Houses for Adikarnatakas at Chitladrug. – Type design 2 A was adopted and six blocks were under construction.

V. BORE-WELLS.

During the quarter four bore-wells were completed and six new ones were started, the number of drills under operation being 14. 'I he progress of work done is described in the following statement:—

N	Place, Taluk	Depth	Depth bored		internet della contra	
No.		In soil	In rock	depth bored	Remarks

VI. BORE-HOLE LATRINES.

During the quarter 12 bore-holes for latrines were excavated as detailed below :--

Spice College, Whitefield Road ... 10 bore-holes. Imperial Dairy Farm, Bangalore ... 2 ,,

CENTRAL STATISTICAL OFFICE.

E. R. SUNDARARAJAN, M A. (Hons.),

Superintendent.

(a) Registration Area.

The new system of centralization of compilation work has worked satisfactorily. The following figures indicate that, on the average, more than 80 per cent of the returns are being received from the villages. So far as the municipalities are concerned nearly 100 per cent of the returns are being received :—

				Per cent of returns received						
			Jany.	Feby.	March	April	Ma	June	per month	
Shimoga	District (1,713).			1 1	1		1	1	
Birth			86.2	88.9	86.9	87:0	85.5	86.1	86.7	
Death			86.6	89.1	86.8	87.8	85.9	85.6	87.0	
Bangalor	e District ((2.472).		a second	198			1000	11.39

Returns of Births and Deaths received in each month from January 1, 1938.

No. 2] CENTRAL STATISTICAL OFFICE

The compiled figures in respect of these taluks and the municipalities therein, and the Cities of Bangalore and Mysore are given in Tables 1 to 6, 5 (a) and 6 (a) being the statements in respect of the two districts of Shimoga and Bangalore for the first quarter of the current year.

Births, Still-births and Infant Mortality.

In what may be called the *registration area* consisting of rural and urban areas of Shimoga and Bangalore districts and the Cities of Bangalore and Mysore, with an estimated population of 18,72,998, the number of livebirths registered was 11,892 in the quarter under report, giving a birth-rate of 25[.]4. The rates for the urban and rural areas are given in the following table and it will be seen that as a result of the new system, both in urban and rural areas, the birth-rates registered are not less than 20 per 1,000 of population. This fact indicates that the reporting has improved considerably in the registration area:—

· ·

49

There were 52 plural births reported in this area in respect of 12,146 parturition cases, showing that 99⁶ per cent of the mothers give birth to single births and that a negligible percentage of 0⁴ exhibit a tendency towards plural births.

During the quarter 306 still-births were registered as against 11,892 live-births, the percentage of still-births being 2.6 per 100 live births.

Out of 12,146 mothers who gave birth to 12,198 births (including still-births), 169 died of child-birth, giving a maternal mortality of 13.9 per 1,000 births.

So far as infant mortality is concerned the rate of 86.5 per 1,000 live births is too low a rate to be true. Except in the cities, where also it is low, the reported infant mortality in the rural and urban areas of Shimoga and Bangalore Districts is very low. In Bangalore District urban area, it is the lowest, *viz.*, 47.3. The reporting is obviously not satisfactory in any area in respect of infant deaths. This is reflected in the deathrates discussed below.

Deaths.

During the quarter, 6,314 deaths from all causes were registered in the registration area, giving a death-rate of 13.5. Obviously, this is still rather low. The rate for the rural area of Bangalore District is too low to be true, *viz.*, 9.1. It may be inferred, therefore, that, although the reporting has improved in all directions, as the reporting of infant mortality remains still unsatisfactory, the registered death-rates are low. This can certainly improve gradually as a result of frequent inspections and propaganda. Detailed instructions have already been issued in this behalf.

Marriages.

In the case of marriages, the reporting is optional in rural areas and minor municipalities, and compulsory in town municipalities in the District of Shimoga and the Cities of Bangalore and Mysore.

As per reports received, the number of marriages celebrated in the first half-year of the current year in the registration area was 7,920 as shown below :—

Although, May and June are the months in which marriages usually take place in large numbers it is obvious that the number of marriages reported so far is too low. Efforts are being made to make the reporting as complete as possible.

(b) Non-Registration Area.

(Statistics for Quarter, January-March 1938.)

In the non-registration area, *viz.*, the Districts of Chitaldrug, Hassan, Kadur, Kolar, Mysore and Tumkur and the municipalities in these districts, the compilation of births and deaths is being done in the Offices of the Amildars and Deputy Commissioners as heretofore. Even optional marriage registration is not introduced in this area. In respect of this area statistics for the current quarter are not available, and even those of the previous quarter are only provisional figures and the department is not aware as to the number of villages and towns that have sent in returns and the regularity with which they are being sent.

The following are the reported figures for the quarter January-March, 1938, including those of the registration area for the same period.

Births, Still-births, Infant Deaths .- During the quarter 35,833 live births were reported giving a birth-rate of 21.0 as against 23.0 in the preceding quarter. The highest birth-rate was 26'8 for Shimoga District and the lowest viz., 15'3, was reported in Mysore district. Bangalore City had a rate of 39'5, Mysore City 40'1 and Kolar Gold Field 62'8.

As against 35,833 live births 716 still-births were reported, the number of still-births per 100 live-births being 2.0. This percentage was highest (3.2) in Shimoga District and lowest (0'8) in Mysore District. In Bangalore City it was 6.4, in Mysore City 4.0 and in Kolar Gold Field 0.7.

The number of infant deaths under one year of age was 3,895 in the quarter under report, giving an infant mortality rate of 1687 per 1,000 live births. The rate was highest (127.0) in Kolar District and lowest (88.0) in Bangalore District. Bangalore City had a rate of 187.3, Mysore City 129.2 and Kolar Gold Field 152.4 respectively.

Deaths.—During the quarter 26,178 deaths from all causes were reported. The computed death-rate was 15.3 per mille of population as against 17.3 in the previous quarter. The death-rate was highest (24.6) in Shimoga District and lowest (10.7) in Tumkur District. Bangalore City had a rate of 24.4, Mysore City 25.8 and Kolar Gold Field 32.9.

(c) Epidemic Diseases.

In the quarter under report 35 attacks with 26 deaths from plague in 11 places, 175 attacks with 20 deaths from small-pox in 22 places, and 4 attacks with 3 deaths from cholera in 2 places were reported as detailed in the accompanying statement.

[Vol. X

Plague.—As compared with 657 attacks with 373 deaths in the previous quarter only 35 attacks with 26 deaths occurred in the State showing a complete decline in the incidence of plague. The number of places affected was 11 as against 166 in the previous quarter. Bangalore City and Mysore City were free from this disease whilst Kolar Gold Field reported 17 attacks with 11 deaths.

Small-pox.—The decline of small-pox reported in the previous quarter was continued in the current quarter also. Out of 175 attacks with 20 deaths reported 55 attacks with 14 deaths occurred in Bangalore City, 1 attack in Mysore City and 2 attacks in Kolar Gold Field.

Cholera.—As against 26 attacks with 3 deaths from cholera in 4 places in the previous quarter 4 attacks with 3 deaths were reported in 2 places in the present quarter, of which 3 attacks with 3 deaths occurred in one place in Hassan District and 1 attack in one place in Mysore District.

(d) Parturition Statistics.

In estimating the true rate of maternal mortality the statistics of parturition cases conducted in maternity hospitals and female dispensaries in the different parts of the State were collected as shown in the accompanying statement.

No. Place		Institution	Number of Labour cases con- ducted	Number of Maternal Deaths
1 2 8	Bangalore City Mysore City Do	 Vani Vilas Hospital Do Holdsworth Memorial	 $1,220 \\ 582 \\ 154$	21 6 2
