* Members of the House and Farm Committee,

NOVEMBER, 1890.

LUNATIC ASYLUM

FOR THE

ADMINISTRATIVE COUNTIES OF EAST AND WEST SUSSEX AND THE COUNTY BOROUGH OF BRIGHTON.

THIRTY-SECOND ANNUAL REPORT OF THE COMMITTEE OF VISITORS.

To the Councils of the Administrative Counties of East and West Sussex and the County Borough of Brighton.

THE COMMITTEE OF VISITORS have the satisfaction of reporting very favourably of the present state and condition and good management of the Asylum, and of the conduct of the officers and servants, and of their care of the patients.

During the past year the question of accommodation has caused much anxiety to your Committee, and in order to further relieve the congested state of the Asylum, your Committee in the month of June last, entered (with the consent of the Home Secretary) into a second contract with the Committee of the Berry Wood Asylum at Northampton, for the reception of 50 female patients into that Asylum at a charge of 14s. a week for each patient; 37 patients have already been removed under this contract to Berry Wood, where every arrangement has been made for their care and treatment. This contract will continue for two

years from the 16th of June last, as the consent of the Home Secretary only extended to that period.

The new Lunacy Act which came into operation on the 1st May last introduces numerous alterations in the Lunacy laws, and brings a considerable increase of work and responsibilities.

The alterations and improvements to the wash-house, the expenditure for which has been authorised by the Councils, is being satisfactorily carried out. These works when completed will enable the patients and laundrymaids to work under more convenient and healthy conditions.

The new system of electric tell-tale checks, the expenditure for which has also been authorised by the Councils, is now in course of completion, and when finished will afford a more efficient and reliable check on the nightly supervision of the Asylum.

During the past year your Committee have replaced and improved a portion of the cooking apparatus in the kitchen, and this promotes the comfort of the patients and leads to economy and efficiency.

On the 1st March last the Lord Chancellor's Visitor paid an official visit to the Asylum, and on the 17th and 18th of that month the Commissioners in Lunacy made their statutory visit, and left a satisfactory report. A recommendation by the Commissioners that the nursing staff should be increased has been duly carried out.

Pursuant to Section 263 of the Lunacy Act, 1890, the Asylum buildings and land have been assessed for the relief of the poor at gross £5,107 and rateable £3,541.

In the month of August last the Sanitary Institute, then in congress at Brighton, paid a visit of inspection to the Asylum, and were very favourably impressed with what they saw.

The number of patients on the 30th September, 1890, was:—

For the purpose of this analysis the patients from the overlapping Unions of Cuckfield and Steyning have been duly apportioned according to population.

The number of patients on the books on the 30th September, 1889, was 884, which, compared with 960, the number on the 30th September, 1890, shews an increase of 76 during the year.

The Admissions during the year ending 30th September, 1890,	
were	288
The Discharges from Haywards	
Heath 108	
The Discharges from Berry Wood 3	
The Deaths at Haywards Heath . 94	
The Deaths at Berry Wood 7	
	212
Increase as above mentioned	76

The admissions during the year have been largely in excess of any previous year since the Asylum was opened, being no less than 92 above the average, and 20 more than in any one of the preceding 30 years.

The vacant beds at Haywards Heath on 30th September last were:—

In conclusion your Committee have pleasure in reporting that, notwithstanding the crowded condition of the Asylum, the year has passed without serious accident of any kind. This is an important matter for consideration where lunatics are concerned, and reflects very creditably on Dr. Saunders and his staff; at the same time your Committee feel it to be their duty most earnestly to impress on the Councils the urgent necessity for a new arrangement whereby adequate accommodation for the pauper lunatics of East and West Sussex and the County Borough of Brighton may be provided.

On behalf of the Visiting Committee,

W. HENRY CAMPION,

Chairman.

THE

MEDICAL SUPERINTENDENT'S THIRTY-SECOND ANNUAL REPORT.

Thirty-second The Medical Superintendent has the honour to annual Report. Submit the Thirty-Second Annual Report to the Committee of Visitors.

Numbers on the 30th September, 1889, the Numbers in the 30th September, Asylum were—Male, 337; Female, 464; Total, 801.

Admissions. The Admissions during the year ending 30th September, 1890, have been—Male, 120; Female, 168; Total, 288.

Discharges. The Discharges during the year have been—Male, 59; Female, 86; Total, 145.

Deaths. The Deaths during the same period have been—Male, 33; Female, 61; Total, 94.

Mean Annual The Average Daily Number Resident during the Population.

year has been—Male, 351; Female, 482; Total, 833.

The Numbers in the Asylum this day (30th Sep-Numbers this day, September tember, 1890), are—Male, 365; Female, 485; Total, 30th, 1890.

The Admissions were considerably in excess of any The Admissions previous year since the Asylum was opened, being no less than 92 above the average and 20 more than in any of the preceding 30 years.

It is perhaps unfortunate, at this particular crisis of Asylum affairs, that this should be the case, but so it is, and it enforces the urgent necessity for further accommodation being provided for lunatics in this county with as little delay as possible.

The following tabular Statements shew the details of the year's admissions, the expectancy of recovery on admission, and the subsequent history of the cases; their ages in groups, and forms of mental disorder.

Expectancy of Recovery.	Good.	Fair.	Bad or Hopeless.	Actively Suicidal.
Males	43	28	49	58
Females	45	43	80	50

AGES ON ADMISSION.

	0—5.	5-15.	15—35.	35—55-	55-75.	75 and upwards
Males	I	2	49	50	17	I
Females		3	59	68	31	7

Form of Mental Disorder of Year's Admissions.

	Males.	Females.	Total.
Insanity with Epilepsy	9	10	19
Idiocy without Epilepsy	2	3	5
Imbecility without Epilepsy	5	6	II
General Paralysis	12	3	15
Dementia	10	25	35
Mania	55	88	143
Melancholia	26	33	59
Not Insane	I		I
TOTAL	120	168	288

Table shewing the numbers of the Year's Admissions who were Discharged, Died, or Remain.

	Males.	Females.	Total.
Discharged Recovered	20	17	37
" Relieved	I		I
" to care of friends	6	7	13
" from on trial		2	2
" from Criminal List	I		1
Transferred to other Asylums	4	6	10
Not Insane	I		I
Died	12	23	35
Remain in Asylum	75	113	188
TOTAL	120	168	288

Only one case was admitted who was found not to be insane, and he was discharged at the earliest possible moment.

The total number of patients under treatment was 1,089.

The large number of admissions made it imperative that further accommodation should be provided, and in June another contract was entered into with the Committee of Visitors of the Northampton County Asylum to receive 50 more female patients.

The relief seems likely to be only temporary if the admissions keep on increasing in a corresponding ratio to those in the past year.

The chargeability of the total number of patients on the books to their respective divisions is as follows:—

	At Haywards Heath.	At Berry Wood.	Total.
Eastern Division	300	34	334
Western Division	290	32	322
County Borough of Brighton	245	44	289
Otherwise Chargeable (Criminal, Out County, &c.)	15		15
TOTAL	850	110	960

The numbers thus accumulating here and elsewhere, are already 80 in excess of the utmost capacity of this Asylum. The Chichester Incorporation claim to

send patients, under the provisions of the Local Government Act, 1888, and they have already availed themselves of such right. Their patients, to the number of 12 or 15, who are now boarded out elsewhere, and find no place in these statistics therefore, will have to be accommodated in the future.

It may be fairly well considered whether the secession of any of the present contracting parties will suffice to give the prospective accommodation which will be required, and whether, by the time another Asylum is ready for one division of the County, another will not be required for the other two.

The Discharges. The Discharges were at the rate of 50.3 per cent. of the admissions.

Excluding cases relieved only, the Recoveries (34 Males and 33 Females) were in excess of the previous year, although reckoned as percentage on the admissions, they are less than last year, being for Males 28.3, for Females 19.6, or combined 23.2 per cent. of the total admissions.

The number of discharges was again abnormal, owing to the cases (2 Males and 35 Females) who were transferred to Northampton.

Twenty-six cases were discharged relieved to the care of their friends.

The Deaths.

Ninety-four deaths occurred, viz., 33 Males and 61 Females. The death-rate was 11.2 per cent. of the population daily resident; of the total deaths 14.8 per cent. were due to Progressive Paralysis of the Insane, 18.0 to Phthisis.

Post-mortem examinations were made in 50 cases. One of the objections to post-mortem examination is, that it is associated in the mind of some people with a coroner's inquest, and the publicity of such inquiry is not unnaturally shrunk from by the relatives of patients dying in an Asylum.

Of the 94 deaths which occurred, only 56 were buried in the cemetery.

Every death has been duly reported to the Coroner, but no case has called for an inquest, and no death has occurred from violence or injury, nor has any serious accident happened.

The general health of the inmates has been exceed- General Health. ingly good. It is true that there was not a complete immunity from the Influenza epidemic, but the adoption of prophylactic measures, in the shape of daily rations of quinine, is at least claimed as having something to do with limiting any outbreak. The only case of severity was that of Dr. Walker, and the Medical Superintendent was deprived of his valuable services for some weeks in consequence.

A patient who made his escape, but was followed immediately and brought back, developed scarlet fever: he was isolated, and only one other case occurred. The single exposure to infection, and that for a very brief time, made the case one of some interest.

There have been six escapes; with one exception the Escapes. patients were brought back within an hour or so, and all within the statutory limit, so that the certificates remained in force.

So much success has attended the setting apart of

another Observation dormitory on the Female side, for quiet suicidal and epileptic patients, that a similar dormitory containing 25 beds has been opened on the Male side. This, too, is much appreciated by the patients.

Alterations, &c.

The alterations in the laundry have been carried out to a successful issue; they include putting down in both wash-houses a cement floor, with radiating open channels covered with gratings, the under-drainage of each being independent of the other and thoroughly "disconnected." By the removal of a hot-closet a much larger area in the wash-house has been secured, and to compensate for the drying power taken away, 16 drying horses have been erected in a new building extended beyond the existing drying closet; and still further on, a new Turkish bath has been built. The lantern of the roof of both wash-houses has been raised; the ventilation is by cross windows opened by an Archimedean screw arrangement, which answers very well and is easily worked. In the foul-linen laundry the washing-tubs are made of stone-ware with white enamel on the inside, so that there is an entire absence of any absorbent surface.

New weir-trough closets, with an automatic flushtank, have been erected.

These several alterations ought to conduce to the healthier conditions under which both patients and laundry-maids will, for the future, do their work.

A system of electric tell-tale clocks,* to check the visits of the night patrols, is about to be installed; and in connexion with these a series of fire alarm bells is to be put up. Presses placed in various parts of

^{*} By Cox-Walker, of Darlington.

the house will, if used in the event of fire, set all the bells ringing simultaneously on both sides of the house, and indicate in the "Central block" on which side of the house the fire is.

Two of the large kitchen boilers having become worn out, it was found to be more economical and efficient to replace these with four smaller ones.

At the same time an important alteration was made to the kitchen flue, which has had the effect of carrying off the steam more effectually and of obviating the dampness of a wall in the Central Hall.

Having regard to the still unsettled question as to the future government of the Asylum, it has been the Medical Superintendent's aim to postpone as much as possible bringing to notice any work involving a serious outlay or structural alteration, but in a large establishment it is difficult to make all things stand as still as might be desired.

One of the most painful duties of an alienist physician is to practically decide the issue of life or death in the case of capital offences committed by lunatics. The Treasury instructed your Medical Superintendent to enquire into the mental condition of the poor woman who murdered three of her children at Polegate. Although the case presented features of much difficulty and complexity he was fortunate enough to convince the judge and jury that the act was done while the mother was in a state of mental automatism, and not conscious of, or responsible for her actions; the judge's sentence being that she be detained during Her Majesty's pleasure.

Legislation.

The Lunacy Act, 1890, which incorporates the Lunacy Act Amendment Act, 1889, and codifies the whole of the previous Acts, came into force on May 1st. Much of it is complicated in machinery and some contradictory in terms. In it is adopted a plan of some other modern legislation, viz., the tacking on, of "rules" to the Act.

In the case of the Lunacy Act the Commissioners in Lunacy are empowered to make, and have made, rules, which have, under the conditions named in the Act, the force of an Act of Parliament. The legal status of the Commissioners is by this Act far more extended than ever it was before—although by the grace of Committees of Visitors and the Medical Superintendents of Asylums the Commissioners' suggestions have been cheerfully adopted, even when they went beyond the limit of compulsion. But where all are working for the common good, legal enactments are of secondary importance; it is pleasant to think that there is not a monoply of good intentions.

Certain of the Commissioners' rules leave something to be desired, and in their finicking detail give little credit to the medical knowledge and acumen of the Medical Officer; while the account of the patient's antecedents, which is asked for, it is quite impracticable to give. The Act will necessitate the re-certification of every patient in the house; this obligation being expressed in the Act in the following terms:—

Every reception order dated after, or within three months before the commencement of this Act, shall expire at the end of one year from its date, and any such order dated three months or more before the commencement of this Act shall expire at the end of one year after the commencement of this Act, :

During their Congress at Brighton a large number of Visit of Sanitary Institute the members of the Sanitary Institute paid a visit of inspection to this Asylum. A very agreeable afternoon and evening were spent, and the visitors were good enough to express themselves as very much pleased with what they saw of the sanitary arrangements of the Asylum.

On this occasion the Medical Superintendent gathered together a few facts* relating to the Asylum, and among others he showed the growth of lunacy in Sussex, as accurately as the figures at his command would allow, since the opening of the Asylum in 1859 to the present year. The summary of the whole tables of figures shows:—

The proportion of Pauper Lunatics chargeable to the Unions and places in the County of Sussex, to every 10,000 of the population, ENUMERATED in the Census periods 1861, 1871, 1881, and ESTIMATED in 1889.

	In	the Asy	Cour lum.		W	orki h Fri	ous	es,	TOTAL.						
	1861	1871	1881	1889	1861	1871	1881	1889	1861	1871	1881	1889			
In the Eastern Division.	8.8	14.2	13.7	14,3	+	9.0	6.7	7.6	+	23.2	20.5	21.9			
In the Western Division.	9.8	14.8	15.4	17.0		11.5	8.4	9.0		26.3	23.9	26.2			
In the Boro' of Brighton.	10.4	15,0	18.8	20.0		11.2	15.8	16,9		26.3	34,2	36.9			

Considering the much larger number of the Insane who are now registered or certified, these figures are very reassuring.

^{*} A Leaflet of facts and figures concerning the Sussex County Asylum.

[†] No available information at this date.

The Committee have shewn the value they attach to Dr. Walker's services by granting him a substantial addition to his salary, and it only remains for the Medical Superintendent to say how thoroughly well, in his opinion, Dr. Walker's services deserved such recognition, and how much he appreciates his assistance.

The conduct of the staff, generally, has been good, and the efficiency with which both the Head Male and Female Attendants (Mr. and Miss Buckle) perform their duties is worthy of all praise.

The changes in the staff do not call for any special comment, although they are more frequent than might be desired. In this connexion it should be mentioned that the Committee have most liberally adopted a scheme of rewards for merit and long service, and it is hoped that this will act as an inducement for Attendants to remain in the service. The staff has been augumented by two Female and one Male Attendant.

It has been usual to record the Rainfall in these Reports, but as the figures relate to the year January to December it becomes necessary to relegate this to the Appendix; and it may be well to call attention to the fact that the subject matter of the Report relates to the twelve months dating from October in one year to September in the next; while the Vital Statistics (in the Appendix) deal with the year January to December,* and the Financial Statement covers a period of twelve months from April in one year to March of the next.

^{*} By a strange coincidence the number of admissions, and the proportion of the sexes, with the exception of one male, are the same for both periods.

The Commissioners in Lunacy paid their statutory visit on the 17th and 18th March; their Report will be found in the Appendix.

Most of the Boards of Guardians have sent committees to visit the patients chargeable to them. These visits are looked forward to by the patients, and are useful in several ways.

The Medical Superintendent desires to thank the Committee for the kind expression of their appreciation of his work during the past year.

C. E. SAUNDERS, M.D.,

Medical Superintendent.

HAYWARDS HEATH,
OCTOBER 30th, 1890.

APPENDIX,

CONTAINING

STATISTICAL AND OTHER TABLES, &c., &c.

The Medical Superintendent desires to acknowledge the service rendered to him by the Clerk of the Asylum (Mr. S. A. Mortlock) in the compilation of these Tables.

*The apparently low percentage of Recoveries in these years is due to the Admission of many Chronic Lunatics from St. Pancras, Maidstone, and Peterborough. † Transfers from other Asylums are deducted before these percentages are computed. ‡ Cases removed to Nottingham and Northampton Asylums.

TABLE IV.

Showing the History of the Annual Admissions since the Opening of the Asylum, with the Discharges and Deaths, and the Numbers of each Year remaining on the 31st December, 1890.

REPORT OF THE VISITING COMMISSIONERS IN LUNACY.

Sussex County Lunatic Asylum,

March 18th, 1890.

We have this day concluded our inspection, which we commenced yesterday. Our colleagues paid the last official visit just nine months ago, since which time the changes following have occurred.

					M.	F.	Total.
	Admitted				87	119	206
Discha	rged .				84	84	168
,,,	of whom	Rece	over	ed	25	22	47
Died					29	47	76

There are on the Books this day the names of 841 patients, 354 Males and 487 Females. There are in addition to these, 79 patients belonging to Sussex who are boarded out at the Northampton County Asylum. The chargeability of the total number 920 is as follows:

To East Sussex .				319
" West Sussex				306
" Brighton .				276
" Out County .			,	4
Private Patients				15

920

Three out of the private patients are Criminals, detained here under the order of the Secretary of State. There are considered to be 39 vacant beds in the Asylum, but the dormitories are even now crowded, and we cannot consider that there really is accommodation here adequate for the reception of 39 more patients. We are aware that the provision of increased Asylum accommodation here has been the subject of anxious consideration by the Committee, and not long ago a deputation attended at our Board to discuss the question as to how this could be best obtained. The general consensus of opinion then seemed to be that it was undesirable to add to the existing Asylum, but that a separate Asylum should be erected in some other part of the County, and we desire most strongly to express our opinion that this is the proper course to be adopted. We hope that early steps will be taken to carry this out, and bring back to this County patients who are now sent away far from their friends and homes. matter is pressing, and the provision of Asylum accommodation within the County for the patients belonging to the County should be decided upon and undertaken forthwith.

We have during our visit seen all the patients on the books, none being absent on leave, and were satisfied with their personal neatness, and the general air of comfort which prevailed was noteworthy. The complaints which were made to us were confined to alleged undue detention, but we explained to those possessing any intelligence that with the Committee rested the power of discharge. The recoveries as compared with the admissions for the year 1889 were in the proportion

of 27.98 per cent. The mortality for the same period on the average daily number resident was 11.61 per cent. for both sexes, and this has been very nearly the death rate for the interval since the last visit. causes of death have all been natural, and no Coroner's inquest has been held. Post - mortem examinations were made in only 50 per cent. of the deaths. Two male patients have had scarlet fever, 3 other males diphtheria, and 2 males and 3 females have suffered from influenza, which also attacked 5 attendants and 4 nurses. In all the above cases recovery took place. The scarlet fever was traced to outside infection, and the diphtheria was also imported; the 3 patients affected had been boarded-out in the adjacent village, where the disorder was epidemic. The state of the wards and dormitories was very creditable to the attendants, and the bedding in very good order. Ample supply of amusing books was accessible to the patients in every ward, and other modes of entertainment are liberally furnished. The dinners we saw in the Dining Halls yesterday were good and satisfactory. There are on day duty 28 attendants of each sex, but 5 attendants and 13 nurses have not yet been here for a year. proportion of attendants to patients is decidedly low, being about I to 121 in the male and I to 171 in the female division. The proportion of nurses to patients may be perhaps sufficient to ensure the safe custody and cleanliness of the patients, but is clearly not large, enough to allow troublesome and turbulent patients to be taken for daily extended exercise beyond the airing courts. Those taking exercise frequently beyond the Asylum estate are reported to be 132 men and 107 women, whilst exercise within the grounds, but beyond

the airing courts (excluding the men employed out of doors), appears to be limited to 150 women three times We think that daily extended exercise is a powerful agent in promoting the recovery of the curables, and in improving the condition of the chronic cases. Dr. Saunders tells us that any addition to the staff on either side could only be obtained at the expense of beds and single rooms now occupied by patients. However much this sacrifice is to be deplored, we attach such importance to the outdoor exercise of the patients, that we must urge the increase of the staff upon the Committee even at the cost of a few patients' beds. On night duty 5 men and 6 women are employed. The patrolling attendants only visit the corridors every two hours, but we think that the rule adopted in most Asylums, of hourly visits, ought to be in force here. A second dormitory for the continuous supervision of the quieter epileptic and suicidal patients has been opened on the female side, and we are glad to learn that a similar arrangement is to be made in the male division. We hope that before long the whole of the single room doors will be made to open by an ordinary handle from the outside. Some of the doors have been so fitted. All the epileptic patients and the actively suicidal are under continuous supervision by night. They number respectively 85 and 46. There are 21 patients afflicted with general paralysis, and 101 patients were last week registered as under medical treatment. Divine Service is only performed here once on Sundays, at which 250 are present, whilst 640 is the average number attending morning prayers in the dining halls. About 260 are present at the associated entertainments. The records of employment furnished us by the head attendants' books show that 230 men and 370 women are made useful in various ways; of these as many as 75 men, but only 46 women are returned as ward cleaners. Including these, the proportions employed appears to be 65 per cent. of the men and 75 per cent. of the women. No entry occurs of the use of mechanical restraint, and only one instance of seclusion, that of a woman once for five hours. We have not many structural alterations or additions to notice not already mentioned, but we may report that two acres of land have been cleared and planted for the new cemetery. The male and female Dining Halls have been re-decorated, and general renovations have been effected in various parts of the Asylum.

W. E. FRERE, Commissioners in Lunacy.
