NOTE

At the time of sending to print some of the commodities suggested for use are momentarily in short supply, while others may be similarly affected in the future.

In particular, the supply of milk is restricted. **Dried and Condensed Milk** are, however, excellent substitutes and are supplied instead. Dried skim milk is a first-class food since it contains all the goodness of fresh milk except the fat "with its attendant vitamins A and D." Both dried and condensed milk can be used for the recipes in this pamphlet: follow carefully the directions on the containers, and use in the same way as fresh milk.

National Flour.—It will be noted that alternative quantities are given in recipes for the use of National Flour which is now in general supply.

Special Notes for Guidance in use of National Flour.

- (a) Use rather more liquid but less fat.
- (b) Mix to a somewhat slacker consistency when making pastry, cakes and biscuits.
- (c) Allow mixtures to stand 10–15 minutes before cooking.

Salt Cod, Fresh and Smoked, is in good supply at times when fresh fish is difficult to obtain. It is nourishing and economical and can be used for a variety of breakfast, dinner and supper dishes. Several new recipes are added to the section on Fish.

The **Wide Range of Recipes** given in each section of this pamphlet is intended to help the housewife to plan as varied a selection of meals as possible with the ingredients which may be obtained from the shops from time to time. Variety is important; it is easier to maintain a high standard of dietary on a mixed diet; monotonous diet may have an adverse effect upon health.

GOOD FARE IN WAR-TIME

THE previous pamphlets issued in this series offered suggestions for making full use of home-produced foods for family meals, in particular of salads and vegetables. The present pamphlet is intended to help in the choice of other foods particularly suitable for conserving health.

New problems of feeding will undoubtedly arise; familiar and useful foods may be scarce from time to time when it will be most important for housewives to choose available foods which give the essentials of a satisfactory diet at a low cost, and to use a wide variety of these foods so as to avoid making too great a demand upon the stock of any particular commodity.

Salads and vegetables (both green and root) which are dealt with in Pamphlet No. 1, should be served regularly during the winter months as they give protection against colds and other ills then prevalent. Green vegetables, such as brussels sprouts, kale, broccoli, turnip tops, spinach and cabbage, and root vegetables, such as carrots, turnips, parsnips, leeks, beetroots, etc., should all be used in turn, but if the full value is to be conserved they must be cooked carefully in a very little boiling salted water in a saucepan with a tightly-fitting lid. Potatoes are in good supply and may with advantage be used at least twice a day.

Amongst the recipes chosen a number of old favourites will be found which are specially adapted to war-time conditions in that they make the utmost use of home-grown foods with the minimum call upon those which come from overseas. Special value is attached to the protective, body-building and energy foods in all seasons and especially for obvious reasons in winter. Stress is therefore laid upon the use of soups and other dishes containing vegetables, salt cod, herrings, tinned salmon, cheese and milk as well as meat, oatmeal and rolled oats, pulses, cereals, etc. Some of the dishes are selected for use in an emergency; they are quickly prepared with few utensils and require little attention while cooking. In some instances the dishes can be made overnight or in the less busy hours of the day and only need to be heated through before serving. To give piquancy and variety, many fresh flavourings have been suggested.

An example of a series of meals containing a wide variety of foods intended for the main meal of the day is included. The commodities suggested are not expensive, they are generally available and together give a large proportion of the day's requirements: other foods will, of course, be needed, but the choice of these is comparatively unimportant if care is exercised in cooking, as careless cooking detracts from the value of food. Suggestions are also made for packed meals which so many people are having to rely upon in these times of emergency; it is equally important that these should be nourishing and appetising.

The quantities given in the recipes are for four people, except in the case of joints. Reference should be made to Pamphlet No. 1, "Salads and Vegetables," for methods of cooking vegetables, for a variety of savoury vegetable dishes and for recipes for sauces.

NOTE:

- (1) Allow a slice of National Bread per person for each meal.
- (2) For Recipes, *see* Index.

PACKED MEALS

A good variety of food stuffs in correct proportions is equally important for packed as for ordinary meals, and the fact that the former must be carried demands ingenuity in planning and preparation. Picnic meals in the past have too often been dry and uninteresting, the plain meat sandwich and jam tart have of necessity given way to a variety of appetising savoury and sweet sandwiches, pies and moulds for which sustaining and health-giving foods are used. A selection of savoury sandwiches, pies and moulds with salad and/or fresh fruit, and a glass of milk makes an ideal, in fact, almost a perfect meal.

Hot soup thick with finely shredded vegetables, scraps of meat and grated cheese, etc., which can be carried in a Thermos flask will undoubtedly be a popular addition to carried meals in wintry weather. Portable pies, if made in patty tins or saucers, allow greater depth for a more generous helping of filling. In fact, it is important that in the case of both sandwiches and pies a generous allowance of filling in proportion to bread or pastry should be given. Individual savoury and sweet moulds may be made in cartons, or in small metal moulds or tins of good quality and carried in these containers. Some salad or fresh fruit should be included with every meal. Salads, e.g. lettuce, watercress, shredded celery, etc., keep fresh for a long time if packed in a small air-tight tin, or in a grease-proof paper immediately after cleansing.

For Savoury Pies, *see* pages 16 and 7.

SOUPS

Soup can make a nourishing meal in itself, or at any rate a substantial part of a meal. It can be made with water, sliced or grated vegetables, peas, beans or lentils, the outside leaves of greens, scraps of meat or cheese and bacon rinds and bones. The flavour of soup is improved by frying the bones and a little leek or onion in the soup pan before adding the main ingredients, and by the addition of fresh herbs.

In the past, stock was considered an essential foundation to a good soup. The restricted space in modern kitchens and their equipment has led to changes in ways of cooking: quick methods are now usually adopted. Bones, which were previously boiled with vegetables for stock, are now generally added to the soup whilst cooking, and removed just before serving. Bacon bones are especially suitable for the soups in which pulses and vegetables are the principal ingredients.

To serve the head, remove meat from the bones, skin and slice the tongue and chop the brain. Serve in the broth or separately with parsley sauce.

FISH

Fish such as herring, kipper, mackerel, tinned salmon, sprats and fish roes are good alternatives to meat and are good value for money. Cod, both fresh and salted, haddock and other white fish are also valuable food, especially if served with a well-flavoured sauce made with a foundation of milk and fat. A good stuffing of potatoes and oatmeal or stale bread adds to the nourishment and bulk, thus proving economical when fish is expensive. The oily fish are usually baked, grilled or fried, and coated with oatmeal or breadcrumbs if baked or fried. The white fish, e.g. cod, hake, etc., on the other hand, can be steamed or stewed with white vegetables in a good sauce. Fresh salted and smoked salted cod needs special treatment.

For a complete course or meal, serve fish with potatoes and green vegetables.

Fresh Haddock

METHOD.—Slit the haddock and clean well. Fill with oatmeal stuffing. Sew up with a thread or fine string. Place the fish flat in a well-greased dish or dripping tin and bake for $\frac{3}{4}$ to 1 hour. Serve with a piquant, mustard or brown sauce.

Mix the grated stale bread with the roes, herbs, parsley and seasoning and spread on each herring. Roll up and keep in place by tying with a coarse cotton. Put fish in a greased tin or dish: cover and bake for about 15–20 minutes. Remove the lid and allow to brown.

(2) For a portable meal, roll pastry to a square and dampen the edges. Place the mixture in a heap in the middle, turn the four corners of the pastry to the centre, and press the edges together firmly. Decorate with a few pastry leaves. Bake in a moderate oven $\frac{1}{2}$ – $\frac{3}{4}$ hr.

SALT COD

Fresh and smoked salt cod are now in good supply. This fish is a valuable contribution to the diet at all times, but especially when the meat ration is low. Both types should be ready for use when purchased; both are improved by preliminary "blanching" and by the removal of the skin before blanching, if possible. If it can be spared the addition of $\frac{1}{2}$ teaspoon sugar to the blanching water improves the flavour and generous flavourings of fresh green herbs or watercress add to both taste and nourishment. Salt should be used with care.

1 lb. Smoked Salted Cod.	1 Bayleaf.
1 tea-sp. Vinegar.	2-3 Peppercorns.
Water.	Parsley or Mixed Fresh Herbs.

METHOD.—Tear skin from cod using a knife, wash thoroughly. Place in a frying pan or other shallow saucepan the skinned side down, with just sufficient cold water to cover, and $\frac{1}{2}$ teasp. sugar. Bring slowly to boiling point and allow to simmer 3 minutes: pour off the water. Cover fish again with cold water, add vinegar, bayleaf and peppercorns, if available. Bring slowly to boiling point and simmer very gently, 10-15 minutes, according to the thickness of the fish. Serve with a little margarine and finely chopped fresh herbs.

Bring slowly to boiling point and allow to simmer 3 minutes. Pour off the water. Cover fish again with cold water, add vinegar, bayleaf and peppercorns, bring slowly to boiling point and simmer very gently 20-40 minutes, according to the thickness of the fish. When cooked remove fish on to a hot dish, strain off and keep the fish liquor. Dot with margarine and sprinkle generously with chopped parsley. Prepare a sauce in the same pan, using the fish liquor. Serve very hot.

Baked Salted Cod.

Bake in a moderate oven 30-45 minutes, according to the thickness of the cod.

SAVE FUEL. Make full use of each unit of heat: cook complete meals in one pan.

To serve—remove the cod from the tin, put to keep hot on a dish. Mix flour or gravy powder with a little cold liquor, add to the liquor in the tin and mix well. Bring to boiling point, adding more liquor if necessary to make a sauce. Add freshly chopped parsley or other fresh mixed herbs. Pour over cod and serve very hot.

OTHER RECIPES for the use of **Salted Cod** may be found in “**Food from Overseas**,” H.M. Stationery Office, price 3d.

MEAT

Weight for weight of flesh all cuts of meat are of approximately equal value in body-building material, but more care in cooking is necessary to make the cheaper cuts appetising and palatable. In some cases the flesh of the cheaper cuts is coarse and contains a good deal of gristle, thus taking longer time to

SAVE FUEL. Pack oven to full capacity when in use.

cook. If, however, the meat is brushed over with a little vinegar or cut in small pieces or minced (by the butcher) the time for cooking can be reduced.

Some of the cheaper cuts may lack savour, but the addition of savoury stuffings* and vegetables (cooked with the meat) not only adds to the flavour but also helps to make the meat go further. Some typical recipes are given below.

CHEAPER PARTS OF MEAT

<i>Meat</i>	<i>Cut</i>	<i>Method of Cooking</i>
Beef	Brisket	.. Bake, stew or braise.
	Flank	
	Clod	
	Sticken	.. Stew, hot-pots, puddings, pies and soup.
	Shin	
	Skirt	
Mutton	Breast	.. Stuff and bake.
	Neck Stew.
Pork	Pickled	.. Stew (with rabbit), oatmeal, potato and other vegetable dishes.
Veal	Breast	.. Stuff and bake.
	Neck Stew.
	Knuckle	.. Stew and soup.
	Veal Pieces	.. Stew, soup, puddings, pies.

The **aitch bone**, **flank** and **brisket of beef**, and the **breast of mutton** and **veal**, may be baked. For good results, place in a covered tin with a little water and fat, and cook in a really hot oven for 20 minutes. Finish cooking very slowly for a long time, basting frequently. The aitch bone is economical if a large family joint of 6 lb. or more is required.

Time for cooking.—At least 30 minutes for each pound and 30 minutes over.

Baked Brisket of Beef

METHOD.—Wash the meat and put into a baking tin with $\frac{1}{2}$ teacupful of water and a little dripping; cover with another tin to prevent the escape of the steam. Internal Meats, Liver, Kidney, Melt, Hearts, etc.

Melt, kidney, liver, hearts and tripe contain valuable protective and body-building foods. These meats can form the basic ingredients of meals or they can be added in small quantities to other savoury dishes to give flavour and extra nourishment.

To Prepare—

1. Soak in warm salted water for 15 minutes.
2. Remove outer skin and trim if necessary.
3. Squeeze out water and dry.

NOTE.—Liver should not be over cooked: it should be added to stews, hot pots, etc., 30 minutes before the dish is to be served.

RABBITS

Full use should be made of rabbits as they are very nourishing and add variety to the diet at a time when some other foods are scarce. They may be stuffed and baked, stewed in white or brown sauce, curried or used for soups, savoury moulds, puddings, pies and sandwiches.

TO PREPARE.—Cleanse and remove heart, liver, etc., from the inside. Cut into joints and soak in cold salted water for 2–3 hours. The heart and the liver may be chopped and added to stuffing if the rabbit is to be baked or they may be included with the other ingredients if stewed.

Bacon and onions are usual accompaniments to rabbit, but as these may be in short supply from time to time, celery, leeks, parsnips, or other root vegetables should be used.

Oatmeal stuffing adds to the nourishment especially when bacon is scarce and the addition of dried herbs or fresh herbs improves the flavour.

SAVE FUEL. Wash up once or twice a day in big batches.

Rabbit Mould

2 Pig's Feet (order split).	Water.
1 Leek or Onion.	1 small Rabbit.
2 Carrots.	Salt, Pepper, Spice.

After soaking, joint the rabbit and add to the pig's feet and cook until tender, 1-1½ hours. Add more water if necessary. Cool slightly, strain off the stock, and remove meat from the bones and cut into small pieces. Season the stock with salt, pepper and spice and bring to boiling point. Add the meat (there should be just enough liquid to cover the meat). Serve very hot with green vegetables, potatoes and crisp baked bread or put into a basin or a pie dish to set. When cold turn out and serve with a salad.

NOTE.—To vary use brisket or shin of beef instead of rabbit.

Rabbit Pie

1 small Rabbit.	Salt, Pepper, Pinch of Herbs.
Bacon Rinds.	Water.
	2 Carrots.

Cover with a short crust pastry made with dripping (see page 26) and bake in a moderate oven 30-40 minutes to cook the crust.

METHOD II.—Place the jointed raw rabbit, vegetables, seasonings and stock in a pie dish. Cover with pastry. Bake in a hot oven for 30 minutes and then in a moderate oven for 1-1½ hours.

NOTE.—The flavour is improved by this method.

Rabbit Hot-pot

Bacon Rinds or 1 tea-sp. Fat.	3 or 4 sticks Celery (optional).
2 large Carrots.	Cup of Water.
3 or 4 Potatoes.	1 small Rabbit.

METHOD.—Melt the fat or frizzle the bacon rinds in a saucepan. Add the prepared celery and fry without browning. Add the remainder of the prepared vegetables, the water and the seasoning. Cut the prepared rabbit into joints and put on top of the vegetables. Cover with a well fitting lid and allow to stew 1-1½ hours according to the size of the rabbit. Sprinkle with chopped parsley and serve very hot.

NOTE.—Adopt this method for cooking tripe, brisket, ox cheek, clod, lambs' tails and other cheap parts of meat.

PULSE FOODS

Pulse foods (dried beans, peas and lentils) are good alternatives to meat, especially if served with a variety of fresh vegetables: they lack fat, however, and should be cooked with small scraps of fat meat or bacon, or served with fat meat, e.g., pork and bacon. If well flavoured and savoury the pulses

SAVE FUEL. Sift and use cinders.

may form the basis of a large variety of satisfying and nourishing meals. Haricot and butter beans are the most valuable, but all pulses contain minerals and body building material; they are relatively cheap, they keep well and occupy little storage space.

PREPARATION

Soak beans and peas overnight in boiled water: do not add salt. Lentils need not be soaked as they cook quickly.

COOKING

Cook soaked beans and peas in boiling water until tender before adding other ingredients (exception: pease pudding). Time varies with the kind of pulse: beans dried whilst young will soften in 1 hour, others may require 2-3 hours.

FLAVOURINGS

1. Boil with bacon rind or bones and cheese rinds.
2. Add parsley or other fresh herbs, fried leeks, onions, or root vegetables.
3. Cook in meat stock and add scraps of meat.

Pulse Foods may be served alone with a savoury sauce, i.e. White, Parsley, Mustard (*see* Pamphlet No. 1, Salads and Vegetables), or they may be used as the foundation for Soups (page 3), Savoury Roasts and Vegetable Dishes (page 17), Hot-pots (pages 17 and 18), Vegetable Pies (page 18), Au Gratin Dishes (page 17), Curries (page 16).

NOTE.—Beans, Peas or Lentils may be used in the following recipes, but the time for cooking will vary according to the pulse used.

They are used for porridge, oatcakes, and biscuits, and for haggis, and may be used with advantage for other savoury dishes to which scraps of meat and vegetables may be added. Flavouring and seasoning are important when oats are blended with other ingredients. Oatmeal is especially useful for coating fish before baking or frying, and for sauces instead of flour.

SAVOURY ROLLS, PUDDINGS AND TURNOVERS

Steamed or baked savoury rolls with substantial and nourishing fillings are especially appetising in cold weather. Suet pastry makes an excellent crust and with a variety of fillings, nourishing and savoury additions to packed meals may be made.

Bake $\frac{3}{4}$ to 1 hour according to the filling.
