DETAILED TABLE OF CONTENTS.

	PAGE
PREFACE	11
PART I.—DISTRIBUTION OF HIGHER FORMATIONS AT VARIOUS DATES	12
(i.) France	12
(ii.) Germany	16
(iii.) Egypt, Palestine and Syria	17
(iv.) Salonica, Army of the Black Sea	21
(v.) Mesopotamia	22
(vi.) East Africa	23
(vii.) Italy	24
(viii.) Russia and Siberia	24
(ix.) Great Britain	25
(x.) Ireland	26
(xi.) Distribution of Divisions Abroad and at Home	27
(xii.) Summary of Divisions	28
PART II.—ESTIMATED STRENGTH OF THE FORCES ABROAD AND AT HOME, RETURN OF LABOUR AND NATIVE PERSONNEL SERVING ABROAD, AND GROWTH OF THE INDIVIDUAL ARMS OF SERVICE	29
Section 1.—Summary of the Estimated Strength of the Expeditionary Forces, the Troops at Home and in India, and the Garrisons of Defended Ports Abroad	29
(i.) (a) Estimated Strength during November, 1918, (b) Establishment and Strength of the British Army on 1st August, 1914	30
(ii.) Estimated Strength of the Forces Abroad and at Home, by months, since November, 1916	31
(iii.) Strength by Arms of the Expeditionary Forces, including Overseas Dominions Contingents and Natives	38
Summary of Strength, all Contingents, by Arms	58
Summary of Strength of all Contingents in all Theatres	60
Strength of Troops by Arms, Dardanelles	61
Section 2.—Estimated Strength of the Expeditionary Forces	62
(i.) Estimated Strength of the Expeditionary Forces up to November, 1918	62
(ii.) Estimated Strength of the Expeditionary Forces, by months, since December, 1914	64
(iii.) Comparative Strength and Percentages of the different Arms and Branches of the Service in (a) France, (b) Italy (c) Mediterranean Force, (d) Salonica, (e) Egypt, (f) Mesopotamia	65
(iv.) Percentage of Strength by Arms (a) September, 1916, and June, 1918, (b) 11th November, 1918	76
Section 3.—Details of the Regimental Strength of the British Army (Regular Army and Territorial Force) at Home and Abroad	77
(i.) Regimental strength of the British Army (Regular Army and Territorial Force), by months and by arms, since 1st November, 1917	77
(ii.) Increase and decrease of the Regular Army (N.C.Os. and men), by months, August, 1914, to 1st October, 1917	83
(iii.) Increase and decrease of the Regimental Strength of the British Army (Regular Army and Territorial Force), by months, since 1st October, 1917	85
(iv.) (a) Increase and decrease of the Regimental Strength of the British Army (Regular Army and Territorial Force), by Arms, 1st October, 1917, up to 1st October, 1918	87
(b) 1st October, 1918, to 1st November, 1919	88
(c) 1st October, 1919, to 1st April, 1920	89
(v.) Strength of the Army Reserve by Arms in Sections on 1st April, 1920	90
Section 4.—Details of the States of the Expeditionary Forces	91
(i.) Feeding Strength, France and Flanders, 7th December, 1918	91
(ii.) France and Flanders, 3rd April, 1920	92
(iii.) Number of women employed with the British Expeditionary Force, France and Flanders, 3rd August, 1918	93
(iv.) Italy, 28th September, 1918	94

PART II.—ESTIMATED STRENGTH OF THE FORCES ABROAD AND AT HOME—*continued*.

PAGE

Section 4—*continued*.

(iv.) Egypt (a) 30th November, 1918	95
(b) 13th March, 1920	97
(va.) Salonica, 30th November, 1918	98
(vb.) Black Sea Army, 3rd April, 1920	99
(vi.) East Africa, November, 1918	100
(vii.) Mesopotamia (a) November, 1918	102
(b) 27th March, 1920	105
(viii.) British Army of the Rhine on 30th August, 1919, (b) 17th April, 1920	106
(ix.) Strength of the Troops and animals in the Army of the Rhine, by weeks, from 3rd May, 1919	107
(x.) Strength of the Troops in France and Flanders, by weeks, from 3rd May, 1919	108
(xi.) Number of Divisions, &c., of the British Army in France and Italy	109
Section 5.—Details of the States of the Troops at Home	110
(i.) Total Summary of the estimated Strength of the Troops at Home, 12th April, 1920	111
(ii.) Estimated Strength of the Troops at Home (by months) since September, 1916	112
(iii.) Estimated Strength, by arms, of the Regular Army and Territorial Force at Home (a) July, 1919, (b) 3rd November, 1919, and (c) 12th April, 1920	127
(iv.) Estimated Strength, by arms, and Contingents of the Overseas Contingents at Home, March, 1919	132
(va.) Strength and Classification of the Volunteer Force (by Commands), 1st September, 1919	134
(vb.) Volunteer Force—Return of Strength (by months) since February, 1917	136
(vi.) Estimated Strength, by arms of the Regular Army at Home (by months), October, 1914, to July, 1917	138
(vii.) Estimated Strength of the Territorial Force at Home (by months), September, 1914, to July, 1917	139
(viii.) Estimated Strength, by arms, of Regular Army and Territorial Force at Home (by months) since August, 1917	140
(ix.) Estimated Strength by Arms of the Overseas Contingents at Home (by months) since November, 1914	142
(x.) Estimated Strength by Contingents of the Overseas Contingents at Home (by months) since November, 1914	145
Section 6.—Strength of the Troops in India and Burma, 1st March, 1920	148
Section 7.—Strength of the Garrisons at British Defended Ports Abroad, 1st March, 1920	149

PREFACE.

The machinery for the compilation of this Abstract of Military Statistics, which was issued monthly, owes its origin to Mr. Lloyd George when Secretary of State for War, and was not set up until October, 1916. Complete records are only available from that date, but in order that the military forces as constituted in 1914 might be compared with those existing after more than four years of warfare and with the Army 18 months after the Armistice, every effort has been made to include complete figures for the whole period. The gradual expansion and subsequent diminution of the forces can thus be studied in detail.

The co-ordination and presentation in a summarized form of the information distributed throughout the War Office regarding the military forces at home and abroad involved the collation and re-arrangement of a mass of material primarily produced by various branches in connection with their individual control of administration, and therefore not always in a shape which lent itself readily to reproduction in a series of statistical returns on a uniform scale. The information is presented, therefore, in the form which made the least exacting demands upon branches already hard pressed.

With the return to more normal conditions the continued publication of the Abstract became unnecessary, and a final edition was issued for the month of June, 1920. This edition was revised and amplified to contain everything of more than transient interest that had appeared in previous issues, and has now been prepared for publication with the addition of such supplementary information as has since become available. The tables have been dated as far as possible, and differences of date will often account for apparent discrepancies in the figures or for the allusions made to past or future events in terms which are now inappropriate. The information regarding the Overseas Forces has been authenticated after reference to the Dominions, Crown Colonies and Protectorates concerned.

It is hoped that the general publication of the statistics and information contained in this volume will prove of interest and value as a work of historical reference concerning the military effort of the Empire during the Great War and the demobilization of the Army.

THE WAR OFFICE,
March, 1922.

PART I.

DISTRIBUTION OF HIGHER FORMATIONS AT VARIOUS DATES.

The force was concentrated in the neighbourhood of the Dardanelles and the Bosphorus with detachments at Salonica, Batoum and on the Anatolian Railway as far as Ismid.

The Headquarters were at Constantinople.

There was up to 25th March, 1920, a British Military Mission under the command of Major-General H. C. Holman, with Headquarters at Novorossisk: the strength on 21st February, 1920, was 290 officers, 1,116 other ranks; Royal Air Force, 66 officers, 253 other ranks.

When this Mission was dissolved a small portion was left temporarily in the Crimea to advise General Wrangel, the successor of General Denikin.

This portion is directly under the orders of General Sir G. F. Milne.

(v.) MESOPOTAMIA.

(a.) November, 1918.

The troops in Mesopotamia, under the command of Lieut.-General Sir W. R. Marshall, consisted of the following higher formations :—

(vii.) ITALY.

November, 1918.

There were in Italy three British Divisions, 7th, 23rd and 48th. The 7th and 23rd Divisions formed the XIVth Corps, the 48th Division was placed under the command of the XIIth Italian Corps commander. General Lord Cavan was Commander-in-Chief of an Army, consisting of one Italian Corps and the British XIVth Corps. The following were the commanders of the British higher formations :—

7th Division (Major-General T. H. Shoubridge).
23rd Division (Major-General Sir J. M. Babington).
48th (South Midland) Division (Major-General Sir H. B. Walker).

The bulk of the British troops were withdrawn by the end of January, 1920

(viii.) RUSSIA AND SIBERIA.

1. In September, 1919, there were in North Russia the following troops commanded by General Lord Rawlinson :—

(a.) *At Archangel.*—(Commander, Major-General W. E. Ironside)—

British troops	11,000
Russian troops	19,000
Total	30,000

In August a successful offensive was carried out on the River Dwina in which over 2,500 prisoners and 16 guns were captured from the Bolsheviks. As a result it was possible to withdraw the British troops and hand over the front to the Russians. The evacuation of the British troops was carried out practically without loss and completed by 27th September, 1919.

(b.) *At Murmansk.*—(Commander, Major-General C. C. M. Maynard)—

British troops	5,000
Allied troops (French and Serbian)	1,400
Russian troops	7,000
Total	13,400

After the evacuation of Archangel had been completed, the British and Allied troops were withdrawn, and the Murmansk front handed over to the Russians. The evacuation was completed by 12th October, 1919.

2. The British Military Mission in Siberia under Brig.-General J. M. Blair was withdrawn during April, 1920.

(ix.) GREAT BRITAIN.

(April, 1920.)

The higher formations of the Regular troops in Great Britain were distributed as follows :—

HOME SERVICE COMMANDS.

- (1.) **NORTHERN (LIEUT.-GENERAL SIR F. I. MAXSE).**
 - 10th Brigade of 4th Division (Brig.-General W. J. Dugan). (Battalions at Lichfield, Sheffield, York.)

| --- Egypt. | | ⊗ Reorganized as a Cyclist Division. | |

NOTES.

The 4th and 5th (Indian) Cavalry Divisions were broken up in France during February 1918. The Indian Regiments of these Divisions were then sent to Egypt. The six Indian Regiments from the 4th Cavalry Division joined the 1st Mounted Division. Of the four Indian Regiments from the 5th Cavalry Division two were sent to the new 2nd Mounted Division and two to the Australian Mounted Division.

The 2nd Mounted Division was formed from the 2nd Line units of the Yeomanry Regiments in the 2nd Mounted Division, when the latter Division was ordered to Egypt. From March 1917 to March 1918 the 1st Mounted Division was known as the 1st Mounted Division. By 2/1st Mounted Division was formed, however. The 1st Line Brigades which originally composed the 1st Mounted Division were sent overseas independently and were reorganized in the Division by 2nd Line units.

The re-organization of the Yeomanry remaining at home into Cyclists was begun early in 1918, and by August 1918 the majority of the units in each of the three Mounted Divisions in the United Kingdom had been so converted. The three Divisions were then reorganized as shown. The 2nd Mounted Division became the 1st Mounted Division and was partially reconstituted, two of the four Brigades in the Division being interchanged with one from each of the other two Divisions.

In each case the date of the order is given whenever obtainable.

Date of movement—The date given is that of the move of Divisional Headquarters. Sea voyages are only shown graphically when of over five days. Sea voyages of less than five days are not shown graphically but the dates of departure and arrival are given then—
Sea voyages of less than two days are not shown.

NOTES.

The present 20th Division was originally entitled the 57th Division.
The 14th (New Army) Division was originally to have been designated the 8th Division. The number was changed from 8th to 14th when it was decided to make an 8th (Imperial) Division.
The 27th Division was originally to have been designated the 4th Division. The alteration in title took place before the actual formation of the Division.

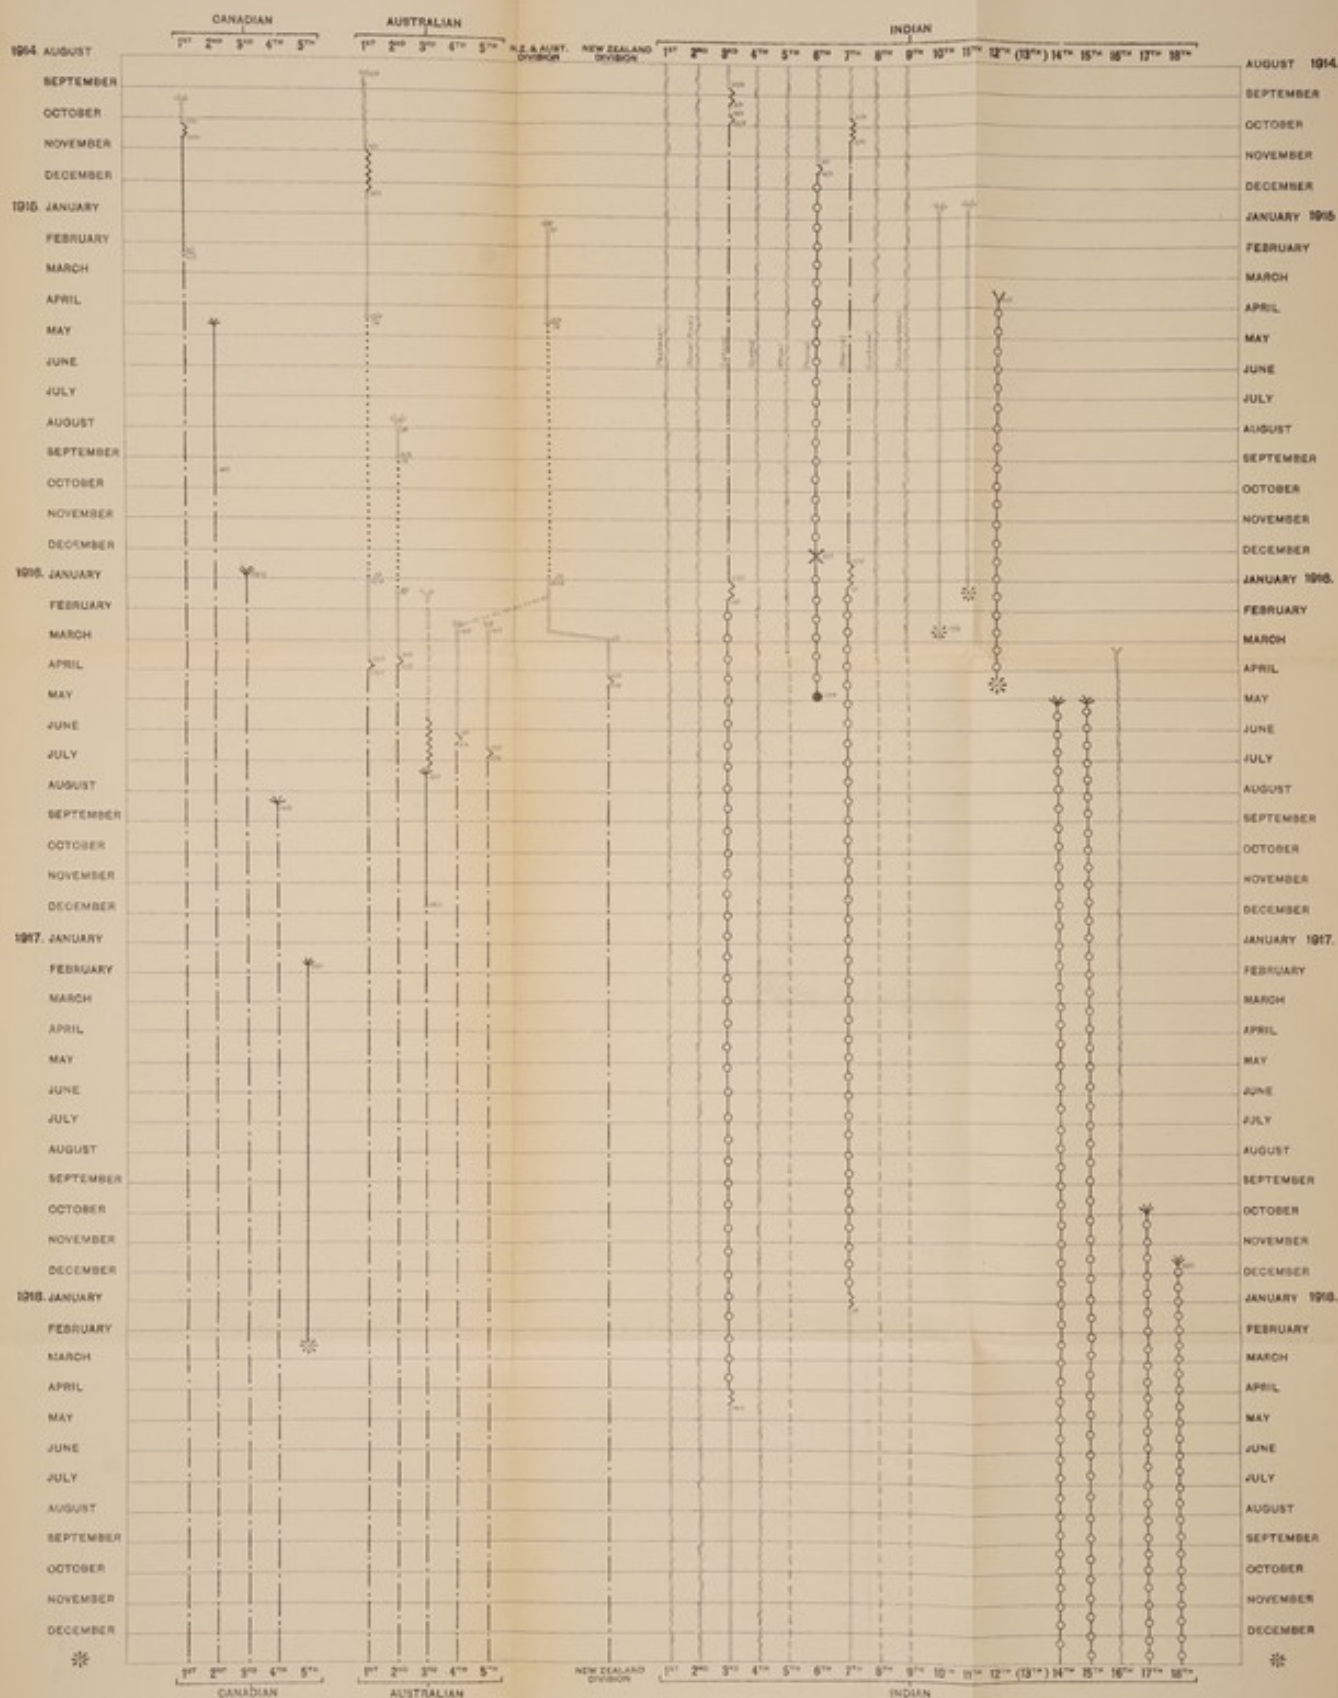

- The original 6th Division was a 2nd Line Territorial Division formed in September 1914. This Division was disbanded in August 1915. The R.E.D. was then numbered 6th.
- The units of the 4th, 4th, and 4th Divisions were dispersed to garrison stations on arrival in India, and these Divisions have not since been reconstituted.
- The 5th and 28th Divisions did not actually go out to France as shown. The units went out separately, and the two Divisions were formed in France with new Headquarters Staffs on the dates given.

The following New Army Divisions were given special titles on formation—
20th — (British)
20th — (Irish)
24th — (Light)
52nd — (British)
59th — (Irish)
60th — (Light)
80th — (Irish)
20th (4th) — (Irish)

NOTES.

The New Zealand and Australian Division was originally composed of—N.Z. Inf. Div.

N.Z. Inf. Div.
4th Aust. Inf. Div.
4th Aust. Inf. Div.

On the return of the Division from the Dardanelles to Egypt the 4th Aust. Inf. Div. was transferred to form the nucleus of the 4th Aust. Inf. Div. and the N.Z. Inf. Div. was transferred to the Aust. and N.Z. Inf. Divs. their place being taken by two new N.Z. Inf. Divs. The Division was then renamed The New Zealand Division.

Besides the Indian Infantry Divisions here shown the following British Infantry Divisions were, during 1918, reconstituted with Indian Battalions. (See Chart of British Infantry Divisions.)—

10th
53rd
55th
75th

The units of the 2nd Australian Division were formed in Australia during the early months of 1916. The Division was not reconstituted, however, until its arrival in England in July, 1916.

The 1st, 2nd, and 4th Indian Divisions have been maintained throughout at war strength on the S.W. Frontier. The other divisions retained in India (10th, 53rd, and 55th) were gradually disbanded and may be considered to have ceased to exist as fighting organizations from about March 1916. The 10th Division was then formed to take the place of the 1st Division at Lahore.

The Burma Division of the Indian Army is not shown. This Division has never been more than an administrative organization, and its units have remained dispersed in Garrison Stations throughout the War.

Date of movement—The date given is that of the move of Divisional Headquarters

See voyages are only shown graphically when of more than five days

See voyages of less than five days are not shown graphically but the dates of departure and arrival are given thus—

See voyages of less than five days are not shown.

* Includes 5,461 other native troops.

† Strength on 1st June, 1918. Later information has not yet been received.

‡ Does not include the Volunteers, the strength of which on 1st November, 1918, was 8,515 officers, 239,929 other ranks, 248,444 total; neither does it include, apparently, the number of prisoners of war, about 150,000.

§ For strengths of previous months and for details, see Table (ii.), p. 31.

|| Owing to the return from India being rendered in a different form, it is now impossible to differentiate between officers and other ranks. The figure as shown in the total is therefore inclusive of both.

** Includes 388,599 Indian troops not classified according to officers and other ranks.

NOTE.—Estimated strengths on the signing of the Armistice, 11th November, 1918.

Note on Table (i.) (a).

The strengths shown in this table for the British Army in the Expeditionary Forces, the troops at home and in India are for specified dates; owing to the fact that these dates more or less agree, and in order to obtain as recent an approximation as possible to the total strength, no period is allowed for the inclusion of men on the strength of one force on transference from another although already struck off the strength of that force. There is always, therefore, in these approximate figures a certain "floating quantity" unaccounted for, and this discrepancy will at any time depend greatly upon the number of men being sent home from the various Expeditionary Forces and from certain Expeditionary Forces to India.

Section 3, Tables (i.) to (iv.), pp. 77 to 90, gives the real strength of the British Army at home, abroad or afloat. On p. 228 and onwards will be found a detail of strengths of all arms by months, from August, 1914, to March, 1920.

TABLE (i.) (b).—ESTABLISHMENT AND STRENGTH OF THE BRITISH ARMY, ON 1ST AUGUST, 1914 (EXCLUDING NATIVE TROOPS STATIONED IN INDIA).

Force.	Establishment.			Strength, 1st August, 1914.		
	Officers.	Other ranks.	Total.	Officers.	Other ranks.	Total.
1st August, 1914.*

Total	26,774	777,425	804,199	24,896	708,618	733,514
National Reserve on 1st October, 1913	5,784	209,667	215,451

1. It must be noted that the above strength of the British Army includes the strength of staffs, departments and miscellaneous establishments. It is not, therefore, exactly comparable with the figures of strengths given in the "General Annual Return of the Army," as the latter relate only to regimental strengths (Command 1193).

2. For details of these establishments and strengths, see pp. 156 to 159.

* For details, figures, &c., see Section 10, pp. 156-157.

† Includes permanent staff of the Territorial Force.

SECTION 2.

ESTIMATED STRENGTH OF THE EXPEDITIONARY FORCES.

TABLE (i.).—ESTIMATED STRENGTH OF THE EXPEDITIONARY FORCES, INCLUDING THE UNITS WHICH HAVE COMMENCED TO EMBARK, ACCORDING TO THE LATEST INFORMATION RECEIVED TO 1ST NOVEMBER, 1918.

Expeditionary Force.						Officers.	Other ranks.	Natives, other than troops.	Total, all ranks.
FRANCE.									
British troops	64,172	1,497,198	..	1,561,370
Australian troops	4,630	89,078	..	93,708
New Zealand troops	1,047	24,240	..	25,287
Canadian troops	6,241	147,587	..	153,828
South African troops	211	5,792	..	6,003
South African Native troops	3,008	..	3,008
Indian Contingent—British	118	315	..	433
Indian	31	15,578	..	15,609
Labour units, followers, &c.	107,481	107,481
Total	76,450	1,782,796	107,481	1,966,727
ITALY.									
British troops	3,442	76,841	..	80,283
Labour units	3,347	3,347
Total	3,442	76,841	3,347	83,630
EGYPT.*									
British troops	9,624	166,584	..	176,208
Australian troops	763	16,017	..	16,780
New Zealand troops	177	4,367	..	4,544
South African troops	82	1,173	..	1,255
Indian Contingent—British	1,688	2,567	..	4,255
Indian	2,026	91,449	..	93,475
Egyptian and Native troops	217	9,233	..	9,450
Labour units, followers, &c.	152,279	152,279
Total	14,577*	291,390*	152,279	458,246*
SALONICA.									
British troops	5,341	131,941	..	137,282
Indian troops—British	30	30
Indian	334	15,600	..	15,934
Other native troops	5,461	..	5,461
Labour units, followers, &c.	24,300	24,300
Total	5,705	153,002	24,300	183,007
BRITISH EAST AFRICA.									
British troops	1,582	9,415	..	10,998
South African troops	220	2,470	..	2,690
Indian Troops—British	99	429	..	528
Indian	26	2,652	..	2,678
African native troops	2	16,730	..	16,732
Labour units, followers, &c.	82,044	82,044
Total	1,930	31,696	82,044	115,670

* The following were attached to the Egyptian Expeditionary Force:—

	Officers.	Other ranks.	Total.
French troops ..	234	7,517	7,751
Italian troops ..	28	565	593

TABLE (i).—ESTIMATED STRENGTH OF THE EXPEDITIONARY FORCES, INCLUDING THE UNITS WHICH HAVE COMMENCED TO EMBARK, ACCORDING TO THE LATEST INFORMATION RECEIVED TO 1ST NOVEMBER, 1918—*continued*.

Expeditionary Force.	Officers.	Other ranks.	Natives, other than troops.	Total, all ranks.
MESOPOTAMIA.				
British troops	7,309	94,725	..	102,034
Australian troops	11	294	..	305
Indian troops	2,453	117,607	..	120,060
Labour units, followers, &c.	185,739	185,739
Total	9,773	212,626	185,739	408,138
ADEN.				
British troops	202	1,652	..	1,854
Indian troops	121	6,110	..	6,231
Local troops	423	..	423
Labour units, followers, &c.	2,953	2,953
Total	323	8,185	2,953	11,461
Grand total	112,200	2,556,536	558,143	3,226,879
*Strength 1st October, 1918, for comparison	112,318	2,580,031	559,615	3,251,964

* For strength of previous months and for details, see Table (ii).

NOTES.—(i.) The above numbers include hospital patients, but are exclusive of the Portuguese Contingent, nurses, &c.

(ii.) Estimated Strength on the signing of the Armistice, 11th November, 1918.

TABLE (i).—*continued.*

SURPLUS AND DEFICIENCY STATEMENT, 1ST NOVEMBER, 1918.

Expeditionary Force, France.	War establishment.	Effective strength.	Surplus.	Deficiency.
<i>(a.) Combatant Troops.</i>				
British	926,983*	896,875	..	30,108
Canadian	101,634	101,962	328	..
Australian	80,993	66,908	..	14,085
New Zealand	18,771	19,069	298	..
South African	4,457	4,046	..	411
Indian contingent—				
British	84	103	19	..
Indian	5,754	10,557	4,803	..
Total	1,138,676	1,099,520	5,448	44,604
<i>(b.) Labour Units.</i>				
British	219,663	200,648	..	19,015
Canadian	4,854	5,926	1,072	..
Australian	1,613	1,555	..	58
New Zealand	595	892	297	..
South African	23	20	..	3
Indian contingent—				
British	25	30	5	..
Indian	3,730	3,156	..	574
Other Natives	101,882	101,432	..	450
Total	332,385	313,659	1,374	20,100

* Establishment of Infantry on the basis of 46 First Line and 4 Second Line Divisions.

Home Establishments.—Deficiency in Home Establishments to replace wastage in all Theatres of War (excluding existing deficiencies abroad) :—

Infantry	25,000
Other arms	56,000

Forces for Home Defence.—Deficiency in Establishment of Home Forces, 43,000.

NOTE.—The figures throughout Table (i) are based on an estimate only. It is probable that the table takes no account of the number of the sick and wounded or of prisoners of war. The correct figures for the distribution of British troops will be found in "General Annual Reports on the British Army," 1913–1919 (Command 1193).

TABLE (iii).—COMPARATIVE STRENGTH AND PERCENTAGES OF THE DIFFERENT ARMS AND BRANCHES OF THE SERVICE IN FRANCE AND OTHER THEATRES.

British Troops—Other Ranks only, since September, 1914.

Machine-Gun Corps	2,549	2,549
Tank Corps	304	304
Royal Army Service Corps	4,346	4,346
Royal Army Medical Corps	2,615	2,615
Royal Malta Artillery	39	39
Royal Army Ordnance Corps	553	1	..	554
Royal Army Veterinary Corps	101	101
Army Pay Corps	12	12
Labour Corps	1,250	1	40	1,291
Total	62,922	16	1,012	63,950*

* Includes 477 residing abroad.

Section A consists of men who undertake a liability to be called out in stated circumstances without the General Reserve being mobilized; the undertaking is for the period required to complete one year from the date of their first transfer to the Reserve, and in certain circumstances for a further year. It was established by Royal Warrant of 8th October, 1898 (A.O. 142 of 1898).

Section B is the ordinary Reserve, and consists of men completing, in the Reserve, the term of their original engagement. It now includes Section C, in which men who had converted a period of colour service into Reserve service used to serve until the time when their correct date of transfer to the Reserve arrived, when they passed into Section B.

Section D consists of men who, having completed the term of their original engagement (12 years), either with the colours or in the Reserve, or having been discharged after 12 years' service, provided not more than 15 years have elapsed since the date of first attestation (A.O. 212/1913) re-engage (or re-enlist) for a further period of four years in the Reserve. It is only opened when required. Men of certain trades are allowed to re-engage for further periods of four years in Section D, or, if they are within four years of attaining the age of 50, till the attainment of that age.

Class W consists of soldiers whose services are deemed to be more valuable to the country in civil life than in military employment. These reservists will be liable at any time to be re-called for service with the colours.

SECTION 4.

DETAILS OF THE STATES OF THE EXPEDITIONARY FORCES.

TABLE (xi).—THE NUMBER OF DIVISIONS, RIFLE STRENGTH, COMBATANT STRENGTH AND EFFECTIVE RATION STRENGTH OF THE BRITISH ARMY IN FRANCE AND ITALY.

Month.	Number of infantry divisions.*	All ranks.			Remarks.
		Rifle strength (i.e., strength of infantry with divisions, exclusive of pioneer and garrison battalions and machine-gun corps).	Combatant strength (i.e., total strength of all ranks of all combatant arms).	Effective ration strength. (i.e., effective strength, exclusive of women, coloured labour, enemy prisoners of war and civilians).	
1918.					
January	62	642,912	1,335,941	1,733,380	
February	62	648,671	1,343,597	1,729,570	
March	62	645,640	1,358,346	1,915,456	
April	63	530,617	1,289,440	1,850,696	} 7 divisions were cadre during April and May.
May	64	552,418	1,202,875	1,762,594	
June	64	506,097	1,206,967	1,778,015	7 divisions were cadre on 1st June.
July	61	524,087	1,271,077	1,833,613	3 divisions were cadre on 1st July.
August	63	543,747	1,306,283	1,874,605	1 division was cadre on 1st August.
September ..	63	493,877	1,253,635	1,832,465	2 divisions were cadre on 1st September.
October	64	497,767	1,237,334	1,815,376	2 divisions were cadre on 1st October.
11th November ..	64	468,214	1,201,839	1,793,440	1 division was cadre on 1st November.

* There were in addition 3 cavalry divisions.

SECTION 5.

DETAILS OF THE STATES OF THE TROOPS AT HOME

DESCRIPTION OF CATEGORIES.

The categories referred to in the following tables are :—

1. Those before November, 1917 :—

A.—Fit for general service. <i>N.B.—Men discharged from a command depôt or a military convalescent hospital in category A will on joining a reserve unit be placed in A (i.).</i>	(i.) Men actually fit for despatch overseas in all respects, as regards training, physical and mental qualifications.
	(ii.) Recruits who should be fit for A (i.) as soon as trained.
	(iii.) Returned Expeditionary Force men who should be fit for A (i.) as soon as "hardened."
	(iv.) Men under 19 years of age who should be fit for A (i.) or A (ii.) as soon as they are 19 years of age.
B.—Fit for service abroad (but not fit for general service).	(i.) In Garrison or Provisional units.
	(ii.) In Labour units or on Garrison or Regimental outdoor employment.
	(iii.) On sedentary work as clerks or storemen only.
C.—Fit for service at home only	(i.) In Garrison or Provisional units.
	(ii.) In Labour units or on Command Garrison or Regimental outdoor employments.
	(iii.) On sedentary work as clerks, storemen, bätmen, cooks, orderlies, sanitary duties, &c.
D.—Temporarily unfit for service in categories A, B, or C, but likely to become fit within 6 months and meanwhile either	(i.) In Command Depôts, (Regular Royal Artillery, Royal Engineers, and Infantry and Territorial Force Infantry).
	(ii.) In Regimental Depôts (Regular Cavalry, Royal Artillery, Royal Engineers and Infantry only).
	(iii.) In any unit or depôt under or awaiting medical or dental treatment (who on completion of treatment will rejoin their own original category).
E.—Unfit for service in categories A, B, or C, and not likely to become fit within 6 months.	Awaiting discharge or re-classification.

2. Those subsequent to October, 1917 :—

A.—Fit for general service	(i.) Men actually fit for general service in any theatre of war in all respects, both as regards training, physical and mental qualifications.
	(ii.) Recruits who should be fit for A (i.) as soon as trained.
	(iii.) Men who have previously served with an Expeditionary Force who should be fit for A (i.) so soon as "hardened."
	(iv.) Men under 19 years of age who should be fit for A (i.) or A (ii.) as soon as they are 19 years of age.
B.—Not fit for general service, but fit for service at home (and abroad in the case of men passed fit for service overseas).	(i.) In Field units (at home only) and in Garrison units, or on duties of an analogous nature.
	(ii.) In Labour units, or Garrison or Regimental outdoor employment.
	(iii.) On sedentary work as clerks, storemen, bätmen, cooks, orderlies, on sanitary duties, &c., or if skilled tradesmen, at their trades.
D.—Temporarily unfit for service in categories A or B, but likely to become fit within six months, and meanwhile either—	(i.) In Command Depôts.
	(ii.) In Regimental Depôts.
	(iii.) In any unit under or awaiting medical or dental treatment (who on completion of treatment will rejoin their own original category).
E.—Unfit for service in categories A or B, and not likely to become fit within six months.	Awaiting discharge, re-classification or invaliding home from abroad.

TABLE (i.).—TOTAL SUMMARY OF THE ESTIMATED STRENGTH OF THE TROOPS AT HOME.
(12th April, 1920.)

Unit.	Officers.						Other ranks (summary of conditions of service).						Other ranks (state of units).					Other ranks attached for duty from other units.				
	On strength of, and serving with units.			On strength of, but away from units.			Army of Occupation.		Total other ranks.				Present with units.	Detached from units.	In hospital.	Absent without leave.	In detention.					
	Regulars.	Volunteers.	Not volunteers.	Regulars.	Volunteers.	Not volunteers.	About whom inquiries are being made.	Demobilizable.	Regulars on normal en- gagements and re-enlisted serving and ex-soldiers.	Ex-soldiers and others en- listed for one year.	Volunteers.	About whom in- quiries are being made.							Demobilizable.

SECTION 14.

GROWTH OF THE ARMY CYCLIST CORPS.

(April, 1920.)

The Army Cyclist Corps was created by Royal Warrant* in November, 1914.

A Training Centre was established at Hounslow in December, 1914, to train reinforcements for Corps Cyclist Battalions and Divisional Cyclist Companies in the Field; this Training Centre was afterwards transferred to Chisledon in Wiltshire, but was abolished September, 1917, and the personnel transferred to the Cyclist Division.

A small dépôt was formed at Hounslow, was then transferred to Kingston, and subsequently to Mill Hill, London, N.W. 7, and is now disbanded (A.C.I. 70 of 1920).

There were originally 51 Yeomanry Cyclist Regiments and 23 Territorial Force Cyclist Battalions; of these 16 Yeomanry Cyclist Regiments and 16 Territorial Force Cyclist Battalions were demobilized or disbanded; all of the remaining Yeomanry Cyclist Regiments and Territorial Force Cyclist Battalions have been disbanded, the non-demobilizable personnel being transferred to Infantry or Cavalry (regular soldiers with colour service to complete and army reservists (Section B) being retransferred to regiments to which they formerly belonged).

Candidates for appointment to temporary commissions in the Army Cyclist Corps were trained in Infantry Cadet Battalions, but no candidates are now being accepted.

SECTION 15.

FORMATION AND GROWTH OF THE MACHINE-GUN CORPS.

(May, 1920.)

1. The Machine-Gun Corps was created by Royal Warrant* on 11th October, 1915, and is now divided into three branches—

Machine-Gun Corps (Infantry).

Machine-Gun Corps (Cavalry).

Machine-Gun Corps (Motors).

2. *Machine-Gun Corps (Infantry).*—In November, 1915, machine-gun sections were withdrawn from Infantry battalions overseas and formed into machine-gun companies, one of which was attached to each brigade. At the same time, a Machine-Gun Training Centre was formed at Grantham for the purpose of training and supplying reinforcements for machine-gun companies in the field, and raising new machine-gun companies. As these new companies were raised and trained they were sent to the various theatres, and the numbers of machine-gun companies in each division was increased to four. In March, 1918, it was decided to form these four companies into a machine-gun battalion and to attach one machine-gun battalion to each division. This reorganization was carried into effect in France and Italy, and, with certain modifications, in Egypt, but not in the other theatres of war. The machine-gun battalions in Egypt had an establishment of a headquarters and three companies only.

In addition to the machine-gun battalions, which form an integral part of a division, eight Army Troops machine-gun battalions were formed for service in France in the spring of 1918. These battalions were provided with motor transport. Five of these Army Troops battalions were formed from Yeomanry regiments as follows:—

100th Bn. Machine-Gun Corps, formed of Warwickshire and South Nottinghamshire Yeomanry.

101st Bn. Machine-Gun Corps, formed of Buckinghamshire and Berks Yeomanry.

102nd Bn. Machine-Gun Corps, formed of Lincolnshire and East Riding of Yorkshire Yeomanry.

103rd Bn. Machine-Gun Corps, formed of City of London (Rough Riders) and 3rd County of London (Sharpshooters).

104th Bn. Machine-Gun Corps, formed of 2nd County of London Yeomanry (Westminster Dragoons).

The Yeomanry personnel which formed these battalions was transferred to the Machine-Gun Corps (Infantry).

These Yeomanry have now resumed their original identity.

* Army Order 413 of 1915.

See also pp. 216-218.

The three Army Troop battalions which were formed from the Household Cavalry have been disbanded, and the personnel returned to their original units.

The 4th Bn. Guards Machine-Gun Regiment, formed from the Foot Guards, was finally disbanded on 30th April, 1920.

The original proposed scheme for the distribution of Machine-Gun Corps (Infantry) battalions for the interim Army were as under :—

(a.) ARMIES OF OCCUPATION.

Theatre.	Number of battalions or companies.	Establishment.		
		Officers.	Other ranks.	Composition.
1. Army of Occupation, Rhine.	2 battalions (c)	29	877	Headquarters—4 companies. Total, 64 Vickers guns.
2. Clearing up Army. Lines of Communication.	Nil (d).			
3. (a.) Army of Occupation, Mesopotamia.	1 battalion	37	558	Headquarters—4 companies. Total, 64 Vickers guns.
(b.) North Persia.	1 company	10	137	Headquarters—4 sections. Total, 16 Vickers guns.
4. Egypt ..	6 battalions (a)	178	2,630	{ 1 battalion headquarters—3 companies. 2 (Indian) battalion headquarters—3 companies, excluding Native personnel. 1 company headquarters—4 sections. 1 company headquarters—6 sections.
	2 companies (e)	25	438	
Army of the Black Sea—				
5. Caucasus ..	2 companies	56	936	Headquarters—6 sections.
6. Turkey ..	3 companies	42	702	Headquarters—6 sections.
7. North Russia	Nil (f).			
8. United Kingdom.	2 battalions	29	861	1 battalion headquarters—4 companies.
	1 Guards Machine-Gun Regiment, including a Depot Company.	31	623	

(a.) Reduced to companies.

(b.) Sixteen companies were serving in India. Four battalion headquarters proceeded to India, which, together with the sixteen companies, were formed into four machine-gun battalions.

(c.) Four battalions were brought home; two for service in Ireland, and two were stationed in the Northern Command. The two latter battalions were later amalgamated.

(d.) One battalion proceeded from France to Egypt about 20th September, 1919, and arrived about 29th September, 1919.

(e.) One from Italy and one from Dobruja.

(f.) The 8th and 19th regular and 201st specially enlisted battalions were dispatched and served in North Russia.

The Machine-Gun School moved from Grantham to Seaford on 12th August, 1919.

The proposals relative to the Machine-Gun Corps in the Home Army during the interim period have now been carried out.

The Machine-Gun Training Centre ceased to exist with the exception of a Receiving Depot, which has since been disbanded, and a small cadre composed of details as from 15th September, 1919, when the functions hitherto carried out by the General Officer Commanding, Machine-Gun Training Centre, devolved upon the Field-Marshal Commanding-in-Chief the forces in Great Britain.

3. *Machine-Gun Corps (Cavalry).*—The following table shows the establishments and distribution of Machine-Gun Squadrons with the Armies of Occupation :—

Theatres.	No. of Squadrons.	Establishment.		
		Officers.	Other ranks.	Composition.
France.. ..	Nil (a).			
Egypt	5	8	221	Headquarters—6 sub-sections. Total, 12 Vickers guns.
Mesopotamia	1	8	235	Headquarters—6 sub-sections. Total, 12 Vickers guns.
India	(composite) 4	8	203	Headquarters—6 sub-sections. Total, 12 Vickers guns.

(a) Three squadrons were brought home from the Army of the Rhine and disbanded in November, 1919.

Reinforcements for these squadrons were to be provided by the Machine-Gun Corps Cavalry Dépôt at Shorncliffe, which consists of a Headquarters and two reserve squadrons.

Five Machine-Gun Corps Cavalry Squadron were brought home from France at cadre strength for reconstitution as after war regular Machine-Gun Squadrons. Three of these were reconstituted to form part of the after war army and have proceeded to India. The other two being subsequently disbanded.

The Machine-Gun Corps Cavalry Training Centre moved from Uckfield to Shorncliffe on 12th August, 1919, and has now been absorbed by the Machine-Gun Corps (Cavalry) Dépôt.

4. *Machine-Gun Corps (Motors).*—The Motor Machine-Gun service was originally formed as a separate unit in 1914, but subsequently formed a separate part of the Machine-Gun Corps. The proposals for the after-war Army legislate for the Tank Corps assuming the responsibility for the provision of armoured car units (*see* paragraph 10).

TABLE SHOWING ESTABLISHMENT AND DISTRIBUTION OF MACHINE-GUN CORPS MOTOR UNITS WITH ARMIES OF OCCUPATION.

Theatres.	Number of batteries, &c.	Establishment.		
		Officers.	Other ranks.	Composition.
France.. ..	Nil.			
Egypt	4 Light Armoured Motor Batteries.	5	85	
	6 Light Armoured Car Patrols.	2	16	Ford cars carrying Lewis guns.
Mesopotamia ..	1 Light Armoured Motor Brigade.	22	326	Headquarters—4 batteries.
	1 Light Armoured Motor Battery (North Persia).	5	85	8 light armoured cars, each equipped with 1 machine gun.
	1 Railway Armoured Motor Battery.	1	25	4 armoured cars, each equipped with 1 Lewis and 1 Maxim gun.
India	4 Motor Machine-Gun Batteries.	5	63	
	3 Brigade Headquarters ..	47	299	Organized in 10 Brigades, 7 with no separate Headquarters.
	16 Class "A" Batteries ..			
	(a) 27 Class "B" Batteries			
Ireland ..	1 Armoured Car Company	9	118	Headquarters and 4 sections (22 armoured cars).
England ..	(b) 1 M.M.G. Battalion ..	22	257	

(a) 11 Class "B" are left unarmoured for use as Light Motor Patrols.

(b) Instructions for disbandment have been issued.

5. The following units were intended to form the after-war Machine-Gun Corps, but the programme was completely revised and a *résumé* showing the Machine-Gun Corps in its present development is contained in paragraph 9:—

Headquarters, Machine-Gun Corps Dépôt, Shorncliffe. Establishment—4 officers, 20 other ranks.	
No. 1 Dépôt Battalion, Shorncliffe. Establishment—29 officers, 1,145 other ranks.	
No. 2 Dépôt Battalion, Shorncliffe. Establishment—29 officers, 1,145 other ranks (to be reduced to cadre formation).	
4th Machine-Gun Battalion, Chatham. Establishment—29 officers, 802 other ranks, composed of personnel ineligible for drafting overseas east of Suez. Now merged into the 1st Machine-Gun Battalion, Ireland.	
7th Machine-Gun Battalion	These battalions were reconstituted for service in India and proceeded overseas in the early part of 1920.
8th Machine-Gun Battalion	
9th Machine-Gun Battalion	
11th Machine-Gun Battalion	These battalions sailed for India, 24th November, 1919, and are now serving there.
12th Machine-Gun Battalion	
Machine-Gun Corps Cavalry Dépôt	This unit was formed at Shorncliffe from the Machine-Gun Corps (Cavalry) Reserve Training Centre, on a provisional peace establishment of 16 officers and 583 other ranks, which is now under revision.
1st Machine-Gun Corps Cavalry Squadron	Now absorbed in the Machine-Gun Corps (Cav.) Dépôt.
2nd Machine-Gun Corps Cavalry Squadron	
3rd Machine-Gun Corps Cavalry Squadron	This unit reconstituted sailed for India on 2nd October, 1919.
4th Machine-Gun Corps Cavalry Squadron	These units were reconstituted at Uckfield of regular personnel for service in India. They embarked for India on 24th October, 1919, and 4th November 1919, respectively.
5th Machine-Gun Corps Cavalry Squadron	
6th Machine-Gun Corps Cavalry Squadron	Now absorbed in the Machine-Gun Corps (Cav.) Dépôt.

6. There are at present approximately 408 officers (excluding those dispersed) and 9,260 other ranks in the Machine-Gun Corps.

7. The numbers demobilized up to the end of April, 1920, are (approx.) 4,434 officers and 114,390 other ranks.

8. The strength by years of the Machine-Gun Corps is as shown:—
Formed October, 1915.

	Officers.	Other ranks.
October, 1916...	2,366	47,852
October, 1917...	5,420	80,136
October, 1918...	6,091	118,311
October, 1919...	4,008	25,812

9. It has now been decided that each infantry battalion is to have its own machine-gun platoon of 8 guns in its headquarters company, but the following units of the Machine-Gun Corps are to remain as a temporary measure during the financial year 1920/21:—

	Officers.	Other ranks.
Abroad.—5 battalions in India at an establishment of	29	802
1 company on the Rhine	10	221
1 company, Black Sea	10	221
At home.—1 dépôt battalion	22	842
1 cadre dépôt battalion. (It is intended that this battalion shall train the nuclei for the machine-gun platoons of infantry battalions forming at home.)	28	218
Dépôt headquarters	4	20
Riding establishment	4	58
1 battalion	31	976
Machine-Gun Corps (Cavalry) Dépôt	8	91

10. The Cavalry branch of the Corps will for the present consist of 3 squadrons in India, and it is proposed to keep for a time a cadre Machine-Gun Corps (Cavalry) dépôt for training the nucleus of the machine-gun troops of cavalry regiments.

The Motor branch of the Machine-Gun Corps has been abolished, as the Tank Corps is in future to be charged with the duty of providing such armoured car companies as are required, although, until relieved by Tank Corps units, certain motor machine-gun formations exist still in Egypt, Mesopotamia and India.

SECTION 16.

FORMATION AND GROWTH OF THE TANK CORPS.

(May, 1920.)

The "Tanks," mainly with the object of keeping their existence a secret, originally formed part of the Machine-Gun Corps, under the title of "Machine-Gun Corps, Heavy Section."

There is no specific date on which the formation took definite shape, but it was about 6th March, 1916.

The "Tanks" continued to form part of the Machine-Gun Corps until 27th July, 1917, when the Tank Corps was created by Royal Warrant.

Early in 1916 a Training Centre was established at Elveden. The first six Tank units were formed at Bisley and later moved to Elveden. The Tank unit at this time was the Company and it was not until the end of 1916 that the Corps was reorganized into battalions.

The first four Tank companies went to France in August, 1916, and were first used in action on the Somme on 15th September, 1916.

When it was realized that more Tank units would be required in France in 1917, more accommodation than was available at Elveden became necessary, and eventually the large Infantry camp at Bovington, Wool, in the county of Dorset, was selected as the future home of the Tanks in England. To this camp, in November, 1916, came the remaining one and a half companies of Tanks, one half company having been sent out to Egypt to assist in the operations in Palestine.

Intensive training commenced and five battalions and a Depot Battalion were formed.

At the same time the four companies in France expanded, with the aid of seasoned officers and men transferred from other units, into four battalions. These four battalions were concentrated in what afterwards became the Tank Corps Area, around the village of Bermicourt, some 5 or 6 miles from St. Pol.

From this time onwards, all units required were raised in England, and after about four months' training were sent over to France. In this way four battalions were raised in the late spring of 1917, five more during the late summer and autumn and eight more during the winter of 1917-18. The last eight battalions, however, never went to France, as the Armistice was signed before they were ready.

Since the Armistice, the Tank battalions raised during the war have been slowly disbanded, and of the two battalions (17th and 19th) that remained, the 19th was disbanded on 31st March, and the 17th converted into the 5th Armoured Car Company.

The proposed Peace Establishment of the Tank Corps for the financial year, 1920-21, is as follows:—

	Establishment.	
	Officers.	Other ranks.
Headquarters, Tank Corps Training Centre	6	33
Central Schools (comprising Headquarters, Mechanical Maintenance and Tank-Driving School, Gunnery School, Lulworth Camp Staff, Equipment School, Reconnaissance and Compass School).	25	172
Workshop Training Battalion	27	617
Tank Corps Depot (temporary)	2	15
1st Depot Tank Battalion	29	1,099
2nd Tank Battalion	32	374
3rd Cadre Tank Battalion	11	52
4th Cadre Tank Battalion	11	52
5th Tank Battalion	32	374

"B" Company of the 5th Tank Battalion at an establishment of 10 officers and 140 other ranks (including additional Tank Corps personnel, and Royal Army Service Corps and Royal Army Ordnance Corps attached) was despatched to the Army of the Rhine on the 7th May, 1920.

See p. 219.

The Workshop Training Battalion will be responsible for the training of 313 boys into skilled artificers.

The following Armoured Car Companies are formed, or in process of formation :—

Unit.	For service in.	Establishment.		Remarks.
		Officers.	Other ranks.	
1st Armoured Car Company	.. Mesopotamia ..	14	145	} Expected to embark during May, 1920. } Expected to embark during May, 1920.
2nd Armoured Car Company	.. Mesopotamia ..	14	145	
3rd Armoured Car Company	.. Egypt ..	14	145	
4th Armoured Car Company	.. Egypt ..	14	145	
5th Armoured Car Company	.. Ireland ..	14	180	The 17th Tank Battalion, Ireland, has been converted into the 5th Armoured Car Company.
6th Armoured Car Company	.. Mesopotamia ..	14	145	It is intended to form this unit locally, from personnel already in Mesopotamia.
7th Armoured Car Company	.. India ..	14	145	} These units are still awaiting formation at Wool.
8th Armoured Car Company	.. India ..	14	145	

With the exception of the 5th Armoured Car Company now stationed in Ireland, which consists entirely of Tank Corps personnel, the establishments of the remaining Armoured Car Companies are supplemented by 56 other ranks Royal Army Service Corps, in each case, plus an Armourer Sergeant, Royal Army Ordnance Corps, thus increasing the establishment of each Armoured Car Company to a total of 14 officers and 202 other ranks. A Tank Section, on an establishment of 4 officers and 36 other ranks is attached to the 5th Armoured Car Company, and is provided at the expense of the 1st (Depôt) Tank Battalion at Wool.

The following are the schools through which all officers and men pass before being considered trained :—

Tank Driving School, Repair and Maintenance School, Artillery School for 6-pr. gun training, Machine-gun School, Signalling School, Intelligence and Reconnaissance School, and various minor schools, such as camouflage, &c.

The General Staff (Tanks) at the War Office now consists of—

One Deputy Director of Staff Duties (Tanks),
One General Staff Officer, 2nd Grade,

the whole forming part of the branch S.D. 4, under the Director of Staff Duties.

The War Office branch dealing with production and provision of Tanks and Tank Stores, &c., Design and Experiment and all questions relating to material, is A. 5, and is constituted as follows :—

1 Deputy-Assistant Director of Artillery.
1 Staff Captain.

The Tanks Design and Experiment Branch includes :—

1 Superintendent.
3 Assistant Superintendents.
1 Officer i/c Experiments.
1 Assistant officer i/c Experiments.
15 Draughtsmen.
8 Clerks.
3 Tracers.
45 Non-commissioned officers and men.

RETURN of Tanks, April, 1920.

Disposition.	Marks I. to IV.	Mark V	Mark V.*	Mark VIII.	Mark IX.	Medium A.	Medium B.	Medium C.	Gun Carrier.	Armoured Cars.	Tank Tenders.	Mark V.**	Remarks.

R.E. Tank Bridging Centre.	16	..	4	..	3	4	
R.A.O.C., Bovington	..	195	111	7	37	56	65	22	19	

Since the Armistice approximately 2,038 officers and 24,149 other ranks of the Tank Corps have been demobilized.

The strength of the Tank Corps is approximately 346 officers, 4,085 other ranks.

The general proposals for the future of the Tank Corps are as under—

- (a.) A tactically independent Tank Corps for the purpose of forcing and exploiting success.
- (b.) Tank units which would be part of the Infantry formation.

The provisions for the financial year 1920-21, given above, are all directed towards (a) and very real and definite results have been achieved in this direction since the Armistice.

The provision of technical and mechanical personnel to replace those demobilized from the Tank Corps of the National Armies offered great difficulties, and it was only natural that the re-enlistment of these men for service in the after-war Army (the bulk of whom were skilled in civilian trades, demanding high wages) would be comparatively small, and great efforts had to be made to induce the maximum re-enlistment of this skilled personnel.

Immediately the Tank Corps was opened for enlistment, however, no difficulty was experienced in attracting recruits of a very good type, and recruiting soon had to be closed for all, excepting skilled men. By special efforts a considerable number of the latter were secured, including ex-Royal Army Service Corps, Royal Engineers, Machine-Gun Corps (Motor) and Royal Air Force personnel, and a proportion of ex-naval engine room ratings.

Recruiting has now been opened for the Tank Corps on what constitutes a novel departure from normal methods, i.e., on an educational basis. With the exception of those possessing technical qualifications, no man will be accepted for the Tank Corps unless he can produce evidence of the equivalent of a Secondary School education or special training in a Technical School or Institute.

If a sufficiency of this type of recruit is secured, it will readily be seen that the Tank Corps will in a short time become to no small extent a Corps d'Elite.

SECTION 17.

GROWTH OF THE ROYAL ARMY SERVICE CORPS.*

1. On 1st August, 1914, the Corps consisted of 498 officers and 5,933 other ranks.	
" " 1915 " " 5,224 " 156,190 "	
" " 1916 " " 6,144 " 236,585 "	
" " 1917 " " 9,195 " 314,552 "	
" " 1918 " " 10,477 " 314,693 "	
" " 1919 " " 5,937 " 109,849 "	

On 1st April, 1920, the Corps consisted of 2,343 officers, of which 594 are not employed on R.A.S.C. duties, and 31,291 other ranks, of whom 992 officers and 11,223 other ranks were serving with the various Expeditionary Forces.

2. At the outbreak of war the Corps was providing rations and forage for 186,400 men and 28,742 animals. At the present time it is feeding, out of the whole Army, at Home, 186,000, and overseas, 540,000 (including 280,000 in Mesopotamia partly fed by us and partly by India), and about 122,000 animals.

3. On 4th August, 1914, the Army Service Corps owned 246 mechanically-propelled vehicles; on 1st April, 1920, the number was 28,272, including 9,872 motor-lorries and 150 steam wagons, 10,979 pneumatic-tyred vehicles and ambulances, and 6,102 motor-cycles.†

4. The Corps is divided into three main sections—

- I.—*Horse Transport Section*.—Employing with the Expeditionary Forces 1,744 men, at home 3,522 men, and in India and the Colonies 85 men. The chief home depôts are at Aldershot and Woolwich.
- II.—*Mechanical Transport Section*.—Employing with the Expeditionary Forces 4,229 men, at home 11,797 men, and in India and the Colonies 798 men. The chief home depôts are at Winchester and Bulford.‡
- III.—*Supply Section*.—Employing with the Expeditionary Forces 2,306 men,‡ and at home 2,878 men, and in India and the Colonies 199 men. The chief home depôts are at Deptford, Avonmouth, Liverpool, Northampton, Manchester, Newhaven, Reading, Leeds, Glasgow and Southampton.

5. In addition to its ordinary duties, the Corps is provided drivers for all the field ambulances, for the conveyance of ammunition for all branches of the Royal Artillery and for the tractors of the heavy Siege Artillery. It also provided a very large number of clerks at Headquarters and in the various Commands.

6. The casualties published up to date are—

	Officers.	Other ranks.
Killed in action	79	1,507
Died of wounds	42	967
Died (disease, &c.)	159	5,713
Wounded	384	7,262
Prisoners of war	22	98
Total	686	15,547

27 officers and 440 other ranks previously reported missing now included under "Killed in action."

* The distinction of Royal was conferred by the King in recognition of "splendid work" during the war (Army Order 362 of November, 1918).

† At the time of the Armistice, 11th November, 1918, the Royal Army Service Corps was feeding over 5,500,000 men and about 895,000 animals. The maximum number of vehicles was reached on 1st March, 1919, viz.: 125,149 mechanically-propelled vehicles, which included 53,107 motor-lorries, 31,098 pneumatic-tyred vehicles and ambulances, and 36,953 motor-cycles.

‡ The distribution of officers in the various sections overseas is not readily obtainable.

7. Since 11th November, 1918, and up to 1st April, 1920, the following numbers have been demobilized :—

—	Horse Transport.	Supply.	Mechanical Transport.	Remounts.	Canteens.	Petrol.	Forage.
Discharged	9,911	7,868	14,037	9,582	485	37	1,118
Transferred to Class Z, Army Reserve.	62,183	48,981	155,676	16,617	3,311
Discharged on demobilization.	633	795	1,669	149	1
Total	72,727	57,644	171,382	26,348	3,797	37	1,118

8. For details of Reserves of Supplies, see pp. 578 and 841.

„ „ Mechanical Transport, see pp. 593 and 852.
 „ „ Messing and Canteens, see pp. 580 and 873.

DISTRIBUTION OF THE ROYAL ARMY SERVICE CORPS BY TRADES IN THE EXPEDITIONARY FORCES.

(1st December, 1918.)

Distribution.	Horse Transport Section.				Mechanical Transport Section.	Supply Section.				Remount Section.	Canteen Section.	Petrol Section.	Total.
	Horse Transport.	Farriers.	Saddlers.	Wheelers.		Bakers.	Butchers.	Clerks.	Packers and Loaders.

SECTION 19.

GROWTH OF THE ROYAL ARMY VETERINARY CORPS.*

1. *Veterinary officers.*—On the 4th August, 1914, the number of officers, Royal Army Veterinary Corps, including Special Reserve, was 197. Of these, 64 were serving in India.

On mobilization the Expeditionary Forces required 192 officers, of whom only 109 were available, leaving a deficiency of 83 which was made up by granting temporary commissions to civil practitioners. Home requirements were at first met by engaging local veterinary surgeons at civil rates of pay; but this proved unsatisfactory, and later it was found necessary to grant temporary commissions in the Royal Army Veterinary Corps to practically all veterinary surgeons, whether employed in the United Kingdom or overseas. On the 11th November, 1918, the total number of officers, Royal Army Veterinary Corps, was 1,356, of whom 182 had been obtained from the Colonies, and only held Colonial qualifications.

2. *Warrant officers, non-commissioned officers and men.*—On the 4th August, 1914, the number of available other ranks, Royal Army Veterinary Corps, was 322; the number on the 11th November, 1918, was 26,146. The increase was made by special enlistments or transfer of low category men from combatant units. The transfer of Category "A" other rank personnel to combatant units was going on practically continuously, with the result that during the war, the establishment of other rank personnel in the Royal Army Veterinary Corps was completely changed three times, giving rise to considerable work of training, at a time when there was great pressure in dealing with sick animals.

3. *General.*—During the years of the war considerable progress was made in the treatment and prevention of animal diseases. On the 11th November, 1918, contagious disease amongst military animals, both in the United Kingdom and in the various Expeditionary Forces, had practically ceased to exist. The application of modern scientific methods, both in the control of diseases, their treatment, and the surgical treatment of wounds, had by this time given results undreamt of in the early days of the war.

The developments in the organization in the Veterinary Service during the war included the allotment of Veterinary Evacuation Stations and Motor Horse Ambulances to Corps Headquarters in the Field, the establishment of the Central Veterinary Research Laboratory at Aldershot, the formation of Field Veterinary Laboratories with each Expeditionary Force, the installation in Veterinary Hospitals in the United Kingdom of electrically driven machinery for clipping and grooming purposes, the application of mechanical methods for the preparation of animal food in Veterinary Institutions, and the setting up of an extensive organization for the economic disposal of carcasses of Army animals. These improvements resulted in the saving of animal suffering, and the reduction of animal wastage.

The camels required for transport duties in Egypt and Palestine were practically all purchased by officers, Royal Army Veterinary Corps. In this force camel hospitals were organized, each having a small nucleus of Royal Army Veterinary Corps personnel augmented by large numbers of Egyptians or Indians. 61,232 patients passed through these hospitals.

Schools of Farriery were opened by the Royal Army Veterinary Corps for training men to meet the large demands made for shoeing-smiths and farriers. 1,317 pupils passed through these schools during the war. This enabled the horses on the various fronts being efficiently shod.

To assist in the control of soldiers' dogs on demobilization, arrangements were made with the Royal Society for the Prevention of Cruelty to Animals and the authorities of the Dogs' Home at Hackbridge, to quarantine for a nominal fee some 500 dogs, the property of officers and soldiers returning from the Expeditionary Forces, who could not pay the usual quarantine fee for dogs imported into Great Britain. Experience has shown that comparatively few other ranks personnel were anxious to bring their pet dogs back from overseas. A very large percentage of the dogs admitted to this quarantine station were the property of officers, and the number—500, for which

* See also pp. 224 and 863.

provision was made proved to be more than ample. Appeals to the British public for subscriptions to cover the cost of quarantine of these soldiers' dogs met with little response, and the whole undertaking has resulted in a heavy drain on the funds of the Royal Society for the Prevention of Cruelty to Animals. Several cases of rabies have occurred amongst the dogs during their period of quarantine, proving the necessity of either prohibiting the introduction of dogs into the United Kingdom with troops returning from countries where rabies exists, or steps being taken for efficient quarantine measures.

4. *Mortality*.—During the war the average annual mortality among horses and mules in the various theatres of war and at home fluctuated between 9 and 17 per cent. The average mortality amongst horses and mules in transit by sea, not including losses from submarine attacks, was under 1 per cent. between North or South American ports and the United Kingdom or Mediterranean ports of Salonica, Port Said and Alexandria. The Veterinary Service provided the conducting officers on these horse transports, and the phenomenal small percentage of loss which occurred on the Trans-Atlantic voyages proves how advisable it is to employ trained men for this duty.

6. *Demobilization*.—The following table shows the increase and decrease of the Royal Army Veterinary Corps. It will be seen that 1,043 officers and 24,915 other ranks have been released from the Army since the 11th November, 1918.

During this period of demobilization from the 11th November, 1918, to the 31st March, 1920, the Royal Army Veterinary Corps has disposed of 49,751 animals for human food, which have realized the sum of 1,009,243*l.*, being an average of 20*l.* 5*s.* 9*d.* per carcase sold.

In addition to this, by-products from animal carcasses have realized 33,573*l.* 12*s.* 1*d.*, while horses sold as fit for work by various Royal Army Veterinary Corps units have realized 6,064,329*l.* 9*s.* 3*d.*, being an average price of 36*l.* 4*s.* per animal.

The whole of this work, together with the movement of vast numbers of animals to the United Kingdom, which required most careful veterinary inspection, quarantine and testings for disease, has been carried out with little check to the rapid diminution of the personnel.

Welsh Calvinist ..	1	1
Jewish ..	2	1	3
Salvation Army
Total ..	273	43	29	84	31	50	2	43	555†

The scale of Chaplains for the Expeditionary Force had been laid down as follows :—

- One Church of England Chaplain for each Brigade (Cavalry or Infantry).
- One Roman Catholic Chaplain for each Division (Cavalry or Infantry).
- One Presbyterian Chaplain for each Division (Cavalry or Infantry), provided that the Division included a Scottish unit.

* The distinction of Royal was conferred by the King in recognition of "splendid work" during the war. (Army Order 92 of March, 1919.)

† Includes unfilled vacancies of the Imperial Establishment, but excludes all Colonial Chaplains, and Chaplains engaged locally at foreign stations and not granted Imperial commissions. Territorial Force Chaplains are included if mobilized, but not otherwise.

‡ Includes chaplains on Indian transports.

§ Includes chaplains *en route* to replace others due for demobilization.

Besides the above there were to be four Chaplains (two Church of England, one Roman Catholic and one Presbyterian) at each of the two Bases and the Advanced Base then contemplated in connection with the Expeditionary Force.

It was also decided on grounds of policy that a nominal representation in the Chaplains' Department of the Expeditionary Force should be given to the Wesleyans.

On the outbreak of war, Chaplains were appointed in accordance with the above arrangements.

To meet the growing needs in hospitals and elsewhere demands for more Chaplains were received in piecemeal fashion from the Expeditionary Force, until in March, 1915, a conference was held at General Headquarters in France to consider the fixing of a new establishment. The new establishment, adopted on the recommendation of this conference, involved a considerable increase in the total number of Chaplains and, moreover, gave a definite place in the scheme to Wesleyans and other denominations. The outstanding features of the new establishment were:—

1. A total number of Chaplains for each Infantry Division of 12 to 14.
2. One Church of England Chaplain for each General and each Stationary Hospital.
3. One Roman Catholic Chaplain and one Presbyterian or Non-Conformist for each group of not more than three General and Stationary Hospitals.

A supplementary establishment for the Base Depôts and troops on the Lines of Communication was also granted in October, 1915.

In the spring of 1916, the Advisory Committee on Church of England Chaplains strongly recommended further substantial increases in the establishment of Chaplains of that denomination, and also proposed a scheme of organization to be adopted among Church of England Chaplains with the British Expeditionary Force in France. The numerical increases included—

1. An establishment of nine Church of England Chaplains to each English Division instead of seven as hitherto.
2. A reserve of 4 per cent. of the total number of Church of England Chaplains in France should be held available to meet emergencies.

When these last recommendations were adopted, the other denominations demanded similar privileges, in the matter of numbers of Chaplains and promotions, to those which had been granted to the Church of England, and the Interdenominational Committee has now been instituted to advise the Army Council on Chaplaincy matters, with the special view of securing equal treatment among all the denominations and acquainting the authorities of each with the needs of the others.

The normal number of Chaplains attached to a Division is now 17. Besides these certain numbers are allotted to Army Troops and Lines of Communication and Base Hospitals.

There is a dual organization of Chaplains in France, one for Chaplains of the Church of England and a parallel one for those of other denominations who are administered as one unit for military purposes. In each case there is some devolution of authority from the heads of the two departments as follows:—

	Church of England under the Deputy Chaplain-General.	Other denominations under the Principal Chaplain.
At Headquarters of each Army and Main Base ..	One Assistant Chaplain-General.	One Assistant Principal Chaplain.
At Headquarters of each Army Corps	One Deputy - Assistant Chaplain-General.	One Deputy - Assistant Principal Chaplain.
With each Division	One Senior Chaplain (D.C.G.'s Department).	One Senior Chaplain (P.C.'s Department).

In each of the other theatres of war there is a single organization under a Principal Chaplain who is the administrative head of the Chaplains of all denominations in that theatre. In these more remote theatres there are no purely administrative appointments in the Chaplains Department other than those of the Principal Chaplain and his Assistant.

SECTION 21.

(a.)—GROWTH OF THE NURSING SERVICES.

The effective strength of Queen Alexandra's Imperial Military Nursing Services including the Reserve and the strength of the Territorial Force Nursing Services was as follows:—

Date.	Q.A.I.M.N.S. and Reserve.		Date.	T.F.N.S.	
	Trained.	Untrained and partially trained.		Trained.	Untrained and partially trained.
1914—August ..	463	..	1914—August ..	2,783	..
1915—August ..	4,126	389	1915—August ..	4,129	1,268

‡ Includes 10 soldier clerks.

SECTION 24.

FORMATION AND GROWTH OF THE ARMY PRINTING AND
STATIONERY SERVICES.

(April, 1920.)

The service originated with a Base Stationery Depot which went overseas on mobilization in August, 1914, and it has expanded into a directorate charged with the production of printed matter and of aeroplane and other photographs for the forces in the field, and with the publicity service by which published orders and information from the War Office and Air Ministry and from branches and departments are distributed to the formations and units concerned, in addition to the original function of the supply of Army forms and books, stationery, and office equipment generally. To cope with the growth of the forces and these additional duties as an administrative secretariat the personnel in France has expanded as follows, and it is now distributed among 30 centres in Army areas, General Headquarters, and on the Lines of Communication :—

	Officers.	Other Ranks.
August, 1914	3	7
August, 1915	20	176
August, 1916	29	313
August, 1917	52	700
August, 1918	56	739
November, 1918	62	860

Branches have also been established serving the military forces in Italy, Egypt, Palestine, Mesopotamia, Salonica, and Malta, and the Royal Air Force in the Mediterranean, Adriatic, and Aegean, in addition to the Royal Air Force with Expeditionary Forces.

The department has always been a pioneer, and one of its activities, namely, the collection and salvage of waste paper, commenced in March, 1916, has expanded into a separate salvage organization for all purposes, to which Army Printing and Stationery Services waste-paper baling presses have now been transferred.

The department has had to adapt its facilities to the needs of Allied forces and foreign labour units serving with the British Armies at different times (which has included printing in French, Flemish, Indian languages, Chinese, &c.), and at one period it was serving a large American Army before the American Expeditionary Force developed its own services on similar lines.

1.—FRANCE AND BELGIUM.

The main divisions of the department are as follows :—

- (i.) Directorate Headquarters.
- (ii.) Printing and Photographic Company.
- (iii.) Publications Department.
- (iv.) Army Printing and Stationery Depôts.
- (v.) Typewriter Inspection and Repair Services.
- (vi.) Rubber Stamp Factory.
- (vii.) Technical Store.

(i.) Directorate Headquarters.

(a.) The service is controlled by a Director, who is stationed at General Headquarters, and is responsible to the Adjutant-General. Assisted by a Deputy Director and a Deputy-Assistant Director, he administers all branches in advance of General Headquarters and all branches attached to the Royal Air Force. He is also responsible for the co-ordination of questions affecting Army Printing and Stationery Services in other theatres of war.

(b.) The representative at each Army Headquarters is a Deputy-Assistant Director. He controls the Army Photographic Section and Printing Section and advises the staff of the Army Commander on all matters connected with the work of the Army Printing and Stationery Services.

(c.) By arrangement between the Air Council and the Army Council all the facilities given by the Army Printing and Stationery Services are made available for the Royal Air Force, and for this purpose the Director is responsible to the Air Ministry. He is represented at the Headquarters of the Royal Air Force and at the General Headquarters of the Independent Force by a Deputy-Assistant Director in

each case, and these officers administer printing, photographic and publications sections which are small replicas of those used by the British Armies in France. They are also generally responsible for the control of all Army Printing and Stationery Services matters within the forces to which they are attached.

(d.) The detailed administration of all branches on the Lines of Communication is entrusted to a second Deputy Director, who is assisted by an Assistant Director for the northern Lines of Communications and another for the southern. This Deputy Director also controls the issue of censor stamps, and typewriting and duplicating machines, and accounts for local purchase or sales to the Allies, and advises on the design and production of new printed forms in order to effect economy and standardization.

(ii.) *Printing and Photographic Company.*

(a.) The letterpress equipment of the original Expeditionary Force consisted of a hand-press brought over by the Royal Engineers. Work of any size had to be put out to local contract or sent to the War Office. The former was impossible in the case of secret and confidential documents and always inconvenient, and the latter led to delay, so that the first Army Printing and Stationery Services Press was established at Havre in July, 1915, and the second at Boulogne in January, 1916. The printing and photographic personnel has now expanded to 14 officers and 439 other ranks, and is divided into a headquarters and general headquarters section at General Headquarters; one section with each army headquarters; a process section for the line-block, half-tone, and three-colour illustrations required for training pamphlets, technical instructions, posters, &c.; a machinery gang for the erection and repair of all printing machinery; and two large presses on the Lines of Communication. The plant includes eight linotype machines. It is impossible to indicate in figures the growth of printing work, since there is no standard by which the complexity of different work may be measured, but all printing, however large, which may be required by the British Armies in France can be and is reproduced on the spot more quickly than would be possible from England. A volume such as the "Order of Battle," containing 120 foolscap pages closely filled with tabular matter, is printed and issued in 36 hours.

(b.) Aeroplane photography is a development of the war, and the small photographic equipment of the Royal Flying Corps was not adapted for reproducing quickly the large quantities found useful in the first Battle of the Somme, so that an experimental Army Printing and Stationery Services Photographic Section was opened for the Fourth Army in October, 1916, equipped to produce 5,000 whole-plate prints daily. This was so successful that a similar section was given to each Army, and the photographic work has extended to mosaics, panoramas, maps, and stereoscopic photographs for operations, and to the reproduction of all Graves Registration photographs, photographs of deserters and escaped prisoners, and general outdoor photography for training or record purposes.

The number of photographs taken or reproduced has grown as follows:—

1916	25,000
1917	2,095,750
1918 (to October)	2,244,750

The above figures are given in whole-plate equivalents for purposes of comparison.

(iii.) *Publications Department.*

This originated in May, 1915, owing to the need for automatic issue of training pamphlets, &c., direct to all concerned without the delay of proceeding through the channels of command or the uncertainty of trusting to those concerned applying for what they required. It has rapidly extended into a "publicity service" for the whole army in France and is the machinery by which the vast majority of printed orders and informative circulars and pamphlets are issued, without trouble to the branches or departments originating them, directly to formations and units concerned, whether general or selected issue is required. The automatic distribution extends to those who afterwards may become concerned, and to amendments to the original document, and is applicable alike to secret documents of which only a few numbered copies exist and to instructional leaflets issued by the million.

The Publications Department machinery deals with all issues from the War Office and the Air Ministry, in addition to documents produced in France, and it has lately been extended to War Savings Campaign publicity and to the methods used for registering and securing the votes of soldier electors.

It is in itself one complete side of the military censorship system since it issues all censor stamps, green envelopes, and field service postcards automatically to those entitled to them on the authorized scales.

The growth of the department may be illustrated by the following figures representing the average number of separate packets despatched a week in—

August, 1915	29,000
August, 1916	84,000
August, 1917	179,000
August, 1918	349,950
October, 1918	393,950

(iv.) *Army Printing and Stationery Depôts.*

These represent the original work of the Army Printing and Stationery Services, but even that has greatly increased not only with the size of the force but also with the increasing complexity of its administration. One depôt has expanded to six to meet the growth of the British Armies in France, but whereas the original depôt on mobilization brought over 271 varieties of Army Forms and Books, there are now 1,104 varieties stocked in addition to many hundreds of special forms not registered as Army Forms; and the articles of stationery and equipment required in modern military offices have expanded in like proportion. The greatest difficulty of the depôts has been to maintain adequate supplies of essentials in spite of the increasing shortage of raw materials in England.

Electrical copiers for producing the ferrogallic and ferroprussiate prints required in engineering work, &c., are installed at certain depôts.

The number of stationery demands met by depôts in a month has increased as follows :—

August, 1914	176
August, 1915	14,760
August, 1916	21,279
August, 1917	27,443
August, 1918	36,373

(v.) *Typewriter Inspection and Repair Service.*

There is a base workshop at each depôt capable of heavy over-hauls, but in addition, a system of travelling mechanics was introduced in December, 1915, and there are now 21 mechanics, including 12 travelling mechanics with Armies, General Headquarters, and the Royal Air Force, many with motor bicycles, and each having a small workshop for light repairs at the headquarters to which he is attached and a travelling kit of tools. In this way over 7,200 machines are kept in repair and under supervision, so that the percentage of those scrapped as of no further use (including those destroyed by shell fire, lost in action, &c.) during the whole campaign has only been $2\frac{1}{2}$ per cent. of the total machines in use.

About 40,000 inspections and repairs have been carried out.

(vi.) *Rubber Stamp Factory.*

This manufactures all rubber stamps used by the Army and the Royal Air Force in France and Italy, including censor stamps. In the year ended October, 1918, 57,107 stamps were made at the factory.

(vii.) *Technical Store.*

This was instituted in 1917 to maintain adequate stocks of technical supplies, such as spare parts for printing machinery, engines, dynamos, and batteries for light and power generating plants; electrical accessories; papers, plates, and chemicals used in photography, printing, lithography, and all forms of process printing.

2.—OTHER THEATRES OF WAR.

There are branches of Army Printing and Stationery Services serving the military forces in Italy, Malta, Salonica, Egypt, Palestine, Mesopotamia, and the Royal Air Force in the Mediterranean and Middle East as well as the Royal Air Force with expeditionary forces. The branch in Egypt was opened in 1915, in Salonica in 1916, and in Italy in 1917. These branches reproduce the main features of the parent organization. There is an assistant director for Italy with a deputy-assistant director, another assistant director for Egypt and a deputy-assistant director for Salonica. There are depôts at

Genoa, Taranto, Salonica, Alexandria, Basra, and Bagdad, the two latter being under Indian administration except as to supplies received from England. The Taranto depôt, in addition to local services for the Mediterranean and Adriatic Royal Air Force, Malta, and South Italy, is the bulk store from which the depôts further east draw their supplies.

Owing to local conditions some Army Printing and Stationery Services have not developed as far in the East as in France, but there are Publications Sections in Italy and Egypt, and a Press Section and a Photographic Section at General Headquarters, Italy.

All supplies for the East are now sent overland and an Army Printing and Stationery Services Port Officer at Havre superintends the transit of stores for North Italy, while another at Cherbourg is in charge of those for South Italy and further East.

The activities of the Department described in the foregoing have been modified in the following respect :—

(a.) GERMANY.

At the signing of the Armistice, the following units moved with the British Army of the Rhine into the occupied territory :—

Photographic Section.

Printing Section.

Publication Section.

Army Printing and Stationery Depôt.

Typewriter Inspection and Repair Unit.

These units, first placed under a Deputy Director, and later under a Deputy-Assistant Director, in addition to their normal duties were required to deal with the production of the printing required in the occupied territories, *e.g.*, proclamations and notices to inhabitants. The requirements of the various Commissions operating in Germany are dealt with by the branch of the Department in Cologne.

(b.) FRANCE AND FLANDERS.

The work of the Department in France and Flanders increased very considerably with the Armistice, notably in connection with the Army Education Scheme, and the work of demobilization. The personnel of the Department was retained under the Special Army Order which declared them "machinery for demobilization." The distribution direct to units of millions of forms, the variety of form and numbers varying from day to day as different categories came up for release or preferential treatment, according to the industrial situation at home, entailed the addition of special staffs to the publicity branch of the Department and also special arrangements on the part of the Army Post Office to handle the greatly increased volume of correspondence.

The forward sections engaged on photographic work for operations were closed down with the exception of two sections—No. 2 being transferred to the Army of the Rhine, and No. 6 being handed over to the Director of Graves Registration and Enquiries for work on "Graves" photography.

(c.) ITALY.

The cessation of operations on the Italian front rendered the continuance of the photographic section unnecessary and this together with the units attached to General Headquarters were dispersed on the breakup of General Headquarters. The Depôt at Taranto, charged with the distribution of stores in bulk to Egypt, Salonica, Mesopotamia, &c., was dispersed after the distribution of the stocks eastward generally.

The depôt at Arquata, retained at a greatly reduced strength to deal with the requirements of British troops still in Italy, was disbanded in April, 1920.

(d.) SALONICA.

The units in this theatre of war were transferred to Constantinople for service with the Army of the Black Sea. The requirements of the various civil and military missions in Bulgaria, Roumania, Serbia, Turkey, and South Russia are met with by the units of the department in Constantinople.

(e.) EGYPT AND OCCUPIED TERRITORIES.

Owing to the political and military situation in Egypt and the occupied territories the work of the department has not materially changed. Additional duties have been assumed in connection with the supply of stores to the organizations charged with the administration of occupied enemy territories, &c.

DEMobilIZATION.

The reduction of the Department has kept pace with the falling off of work consequent upon the progress of demobilization in the various theatres of war.

REDUCTIONS.

France—

Directorate Headquarters—

Director	Replaced by Assistant Director.
Deputy Directors (2)	{ One transferred to Rhine Army. One demobilized.
Assistant Directors (2)	

Appointments lapsed.

Deputy Assistant-Directors, General Headquarters and with Armies (6) ... Demobilized.

Deputy Assistant-Director, Army Printing and Stationery Services, Headquarters, Royal Air Force ... Demobilized.

Air Force ... Demobilized.

Army Printing and Stationery Depôts—

Calais ... Demobilized.

Havre ... Demobilized.

Rouen ... Demobilized.

No. 3 (Field) ... Demobilized.

No. 4 (Field) ... Demobilized.

Rubber Stamp Factory ... Demobilized.

Technical Stores ... Demobilized.

Port Officer, Havre ... Transferred to Rotterdam.

Port Officer, Cherbourg ... Transferred to Boulogne.

Italy—

Directorate Headquarters ... Closed.

Deputy Director ... Demobilized.

Deputy Assistant-Director ... Demobilized.

Printing Press ... Demobilized.

Photographic Section ... Demobilized.

Publications Department ... Merged in Army Printing and Stationery Depôt, Arquata.

Depôt and Publications Department ... Demobilized.

Taranto Depôt ... Demobilized.

Salonica—

Depôt ... Transferred to Constantinople.

Egypt—

Directorate Headquarters ... Assistant Director replaced by Deputy-Assistant Director.

SECTION 25.

FORMATION AND GROWTH OF QUEEN MARY'S ARMY
AUXILIARY CORPS.

(1st April, 1920.)

On 9th April, 1918, the Secretary of the War Office issued the following notice:—
“As a mark of Her Majesty's appreciation of the good services rendered by the Women's Army Auxiliary Corps both at Home and Abroad since its inauguration, and especially of the distinction which it has earned in France by its work for the Army during the recent fighting on the Western front, Her Majesty has been graciously pleased to assume the position and title of Commandant-in-Chief of the Corps, which in future will bear the name of Queen Mary's Army Auxiliary Corps.”

Women were first officially employed with the Army under special authority, dated 3rd August, 1915, given to the Cookery Section of the Women's Legion, and subsequently by Army Council Instruction 441 of 26th February, 1916, when members of the Women's Legion were engaged in various household duties in convalescent hospitals and as instructresses at military schools of cookery. By further instruction, authority was extended to officers' messes, &c., and ultimately to army formations generally, and by Army Council Instruction 221 of 7th February, 1917, to women drivers, &c., under the Motor Transport Section of the Women's Legion.

Towards the end of 1916 the attention of the Adjutant-General was drawn to the work which women were doing with the Army, and initial steps for considering the employment of women with the Army Overseas were taken by Lieutenant-General H. M. Lawson, who was instructed to examine into the question of releasing men on Lines of Communication, &c., for the front, and he urged, amongst other recommendations, the replacement of men by women.

In the meantime, conferences to consider the question of a Central Organization were held under the presidency, first of the Adjutant-General on 5th January, 1917, and later of the Secretary of State. These resulted in the decision to inaugurate the Women's Army Auxiliary Corps, and on 13th March, 1917, the first batch of women (mostly original members of the Women's Legion) was enrolled and provided with Identification Certificates prior to departure for France, on 4th April, under Army Council Instruction 537 of 28th March, 1917, authorizing the employment of women with the Army Overseas.

Several hundred women were sent Overseas before authority was given by Army Council Instruction 1069 of 7th July, 1917, to effect substitution of women for men at Home.

The Corps is administered by the Adjutant-General's Department, and its object is to effect substitution of women for soldiers in certain employments throughout units, formations and offices administered by the Army Council (other than the War Office, hospitals and those administered by the Finance Member) at Home and Overseas.

All women who join the Corps are required to enrol for service for the duration of the war, but should the war be over in less than a year from the date of enrolment, they will be liable to serve for at least a year. They may enrol:—

- (a.) For Home or Overseas service as required, the location resting with the Army Council.
- (b.) For Home Service only—
 - (i.) Mobile Members who may be employed where required.
 - (ii.) Immobile Members who live at, and may be employed anywhere in the vicinity of, their homes.

A woman who desires to enrol must apply by letter or in person direct to the nearest Employment Exchange. Subsequently she is interviewed by a Selection Board, and at the same time medically examined. If accepted by the Selection Board and passed as physically fit, she is enrolled. Then follows a short period of elementary drill and disciplinary training while resident in a Hostel at Home, and, if for Service Overseas, she is inoculated and vaccinated. The Member is then drafted either Overseas or to the Command at Home which requires her services, the category of employment being that for which she has been passed as qualified.

Members, other than Controllers or Administrators, enrol for various definite classes of employment, at fixed rates of pay as laid down in the Regulations for the Queen Mary's Army Auxiliary Corps issued with Army Orders, dated 1st June, 1918. They are employed as clerks, typists, cooks, waitresses, qualified driver mechanics, storehouse women, packers, women for postal services, and also for technical employment with the Army Service Corps, &c.

Where possible (subject to paragraph (b) (ii.) above) Members are housed in Hostels, under the care and supervision of women Administrators. In other cases quarters are provided by the Military Authorities with the approval of and after inspection by an official of the Queen Mary's Army Auxiliary Corps.

Khaki uniform is provided for all Officials and Members proceeding Overseas and for all personnel at Home whose duty takes them regularly into barracks or camps. The conditions as regards hours of work are much the same as those in the Army. No woman under 20 years of age is accepted for service Overseas and 18 is the minimum for service at Home.

The number of Controllers and Administrators gazetted or serving on 1st April, 1920, is 28, 61 Members are serving Overseas, and 195 at Home, making a total of 284. At about the time of the Armistice, 11th November, 1918, the Corps was at its greatest strength, there were 1,058 Controllers and Administrators, 8,529 Members serving abroad, and 30,155 Members serving at Home, making a grand total of 39,742.

December	1,078	17,553	18,631
1920—January	1,046	17,498	18,544
February	755	13,473	14,228
March	621	13,770	14,391

Although the Machine-Gun Corps was formed by Royal Warrant on 11th October, 1915, no transfers took place to the Corps until February, 1916, with the result that considerable numbers of men who were trained as machine gunners in 1915, were on discharge from hospital in early 1916 returned to their original Reserve Units and consequently lost to the Corps.

The Training Centre consequently was in the early days obliged to train more men than were in reality necessary owing to the loss of trained men being returned to Infantry Units.

Average monthly strength up to December, 1918—70,851 all ranks.

PART III.

OFFICERS.

1. Approximate number of officers—

4th August, 1914.				11th November, 1918.			
Regular	12,738	Regular and New Army...	74,200		
Special Reserve	2,557	Special Reserve	...	28,000	
Territorial	9,563	Territorial	...	60,055	
Reserve of officers	3,202	Reserve of officers	...	2,000	
Total...	<u>28,060</u>	Total...	...	<u>164,255</u>	

2. The number of permanent Commissions in the Regular Army as 2nd Lieutenants granted during the period 5th August, 1914, to 1st December, 1918, was as follows (the figures in brackets show the intake in 1913):—

Royal Military Academy	1,928	(112)
Royal Military College	5,013	(343)
Royal Military College (Canada)	172	(6)
Special Reserve	1,008	(67)
Territorial Force	335	(9)
Temporary Commissions	1,109	...
Universities	246	(78)
Colonial	20	(3)
Ranks	6,713	(7)
Total	<u>16,544</u>	<u>(625)</u>

The estimated intake of cadets, &c., to be appointed to permanent Commissions from 1st December, 1918, to 31st October, 1919, is:—

Royal Military Academy	218
Royal Military College (including 47 for Indian Army).	546
Royal Military College (Kingston)	7
				<u>771</u>

3. The number of permanent Commissions granted in the Special Reserve from 4th August, 1914, to 1st December, 1918, was 30,376 compared with 81 in 1913.

4. The number of officers holding Commissions in the Territorial Force on 4th August, 1914, was 9,563; the number of Commissions granted from that date to 1st December, 1918, was—

Yeomanry	5,182
Royal Flying Corps	27
Royal Artillery	6,499
Royal Engineers	2,777
Infantry and Cyclists Corps	39,901
Royal Army Service Corps	861
Royal Army Medical Corps	1,680
Royal Army Veterinary Corps	147
General List	1,627
Royal Defence Corps	1,343
	<hr/>
	60,044

5. Since February, 1916, the issue of Direct Commissions to the Regular Army Special Reserve of Officers and Territorial Force has practically ceased. Commissions since were only granted to Cadets who passed successfully through the course in the Officers Training Units, details of which are as follows to 1st December, 1918 :—

Arm.	Number of Officer Cadet Training Units.	Number posted.
Infantry	23	69,312
Royal Artillery	6	19,131
Cavalry	2	2,621
Royal Engineers	3	3,566
Machine-Gun Corps	3,053*
Royal Army Service Corps	2	4,960
Garrison Battalions	1	3,572
Tanks Corps	1	1,714
	<hr/>	<hr/>
	38	107,929
	<hr/>	<hr/>
Royal Air Force (up to 9th December, 1918) ..	16†	37,692‡

Cadets who failed to qualify for Commissions were held to serve in the ranks.

6. The number of Commissions granted from the beginning of the war up to 1st December, 1918, was approximately 229,316, excluding the Royal Defence Corps, the Indian Army and the Dominion Contingents. This figure does not include a great number of Commissions granted to officers for special duties, but covers all combatant Commissions. In addition, 5,053 Commissions were granted to chaplains of all denominations, and 12,692 Royal Army Medical Corps Commissions were given. The total, apart from Commissions for special duties, was, therefore, about 247,061.

7. The number of officers who relinquished their Commissions, including those whose services were dispensed with, from August, 1914, to 1st December, 1918, was approximately 22,193,§ including the Royal Army Chaplains' Department and the Royal Army Medical Corps, but excluding the Royal Defence Corps.

8. (a.) From 1st December, 1918, to 1st April, 1920, about 1,087 Temporary Commissions have been granted, of which 85 were to Chaplains and 114 to the Royal Army Medical Corps.

* Since 1st October, 1917, candidates for commissions in the Machine-Gun Corps must have had three months' commissioned service in other units.

† There were five cadet wings in England, one in Egypt and one in Canada. There were seven Schools of Aeronautics in England, one in Egypt and one in Canada. Total, 16.

‡ Exclusive of cadets posted in Egypt and Canada.

§ For the numbers of those who were cashiered and dismissed the Service, see p. 644.

(b.) Since 1st February, 1919, under Army Order 42 of 1919, Commissions have been granted to Cadets who had completed a satisfactory course of training on or after 1st January, 1919.

The following are the figures up to 1st April, 1920 :—

Cavalry	229
Special Reserve	281
Territorial Force	819
Temporary	8,518
Total	9,847

(c.) The number of permanent commissions in the Regular Army as 2nd Lieutenants granted since 1st December, 1918, to 1st April, 1920, is as follows :—

Royal Military Academy	238
Royal Military College	624

(d.) The number of permanent commissions in the Royal Army Medical Corps granted from 1st December, 1919, to 1st March, 1920, is 208.

9. The following table shows the number of formal commissions prepared and awaiting preparation on 15th April, 1920 :—

Arm.	Commissions prepared.	Commissions awaiting preparation.	Total.
Land Forces	171,613	} 11,500	217,379
Special Reserve	34,266		
Territorial Force	58,618	} 1,400	60,018
Volunteer Force	11,190		
Indian Chiefs (hon. rank)	81	} ..	81
Channel Islands Militia	45		
Oversea Contingents—			
Australian	17,388	} ..	27,039
Canadian	4,757		
Newfoundland	233		
New Zealand	4,661		
Indian officers	5,378	} ..	5,378
Total..	308,230		
		12,900	321,130

10. The number of King's Certificates already given to officers invalided out of the service is 13,552.

11. The number of warrants issued up to 15th April, 1920, is 38,529.

PART IV.

CASUALTIES.

SECTION I.—BRITISH CASUALTIES.

TABLE (i.) (a).—APPROXIMATE NUMBER OF CASUALTIES FROM 4TH AUGUST, 1914, TO 31ST DECEMBER, 1920.

	Number of soldiers who lost their lives in, and through, the Great War.*			Number of wounds received by soldiers.			Number of reported prisoners of war.

* As "missing" officers and other ranks became officially "presumed dead" they were transferred to column 1 "killed" see p. 237. (f) See note on p. 240.

It is not to be inferred from these totals that it is possible to estimate the exact number of casualties between any two or more given periods, as these figures only show the numbers of casualties reported, irrespective of the date on which they actually occurred.

The casualties of the Royal Naval Division are not included in this table, they did not vary appreciably after 1916. The following are the approximate total figures:—

ROYAL NAVAL DIVISION.		Dardanelles	
1919.	133	2,358	199
1920.	4,838

SUMMARY OF CASUALTIES REPORTED IN THE SOUTH AFRICAN FIELD FORCE.

(From 11th October, 1899, to 31st May, 1902.)

	Officers.	N.C.O's. and men.
<i>Reduction of Field Force—</i>		
Killed in action.. ..	518	5,256
Died of wounds.. ..	183	1,835
Prisoners who have died in captivity ..	5	97
Died of disease	339	12,911
Accidental deaths	27	771
Total deaths in South Africa ..	1,072	20,870
Missing and prisoners (excluding those who have been recovered or have died in captivity).	..	105
Sent home as invalids	3,116	72,314
	4,188	93,289
	97,477	
<i>Total Reduction of the Military Forces through war in South Africa—</i>		
Deaths in South Africa	1,072	20,870
Missing and prisoners	105
Invalids sent home who have died	8	500
Invalids who have been discharged the Service as unfit.	..	5,879
	1,080	27,354
	28,434	

Total wounded in action not including wounded prisoners but including men who have died from wounds, 20,978.

TABLE (i.) (c).—CALCULATIONS REGARDING THE CASUALTIES IN THE REGULAR ARMY AND THE TERRITORIAL FORCE, NON-COMMISSIONED OFFICERS AND MEN ONLY, IN ALL THEATRES OF OPERATIONS.

1. The following table shows the proportion of the total casualties of officers to the total casualties of non-commissioned officers and men in the Regular and Territorial Forces in France, by arms, to 30th November, 1918:—

	Officers.	Men.
Cavalry	1	9.4
Royal Artillery		12.3
Royal Engineers		16.4
Infantry		23.9
Machine-Gun Corps... ..		14.8
Tank Corps		5.5
Other arms		12.3
Total (excluding Royal Air Force) ...	1	21.0

The proportion of officers to other ranks, for all forces and arms (excluding Royal Air Force), in France is 1 to 21.4.

STATEMENT showing the numbers serving on 25th October, 1917, who had been wounded more than once.

Arm.	Twice wounded.				Three times or more wounded.				Grand Total.

TABLE (xviii.).—TABLE SHOWING COMPARATIVE BRITISH AND ENEMY CASUALTIES ON THE BATTLE FRONTS IN THE BATTLES OF ARRAS, MESSINES AND THE THIRD BATTLE OF YPRES, WITH THE NUMBER OF PRISONERS AND GUNS TAKEN BY THE BRITISH, AND THE EXTENT OF ALLIED TERRITORY RECAPTURED.

Name of battle.	Dates.	Number of days' fighting.	Prisoners taken.	Guns taken.	Area captured.	British casualties.	Estimated enemy casualties.
Battle of Arras ..	9th April—16th May, 1917.	38	20,834	252	61 sq. miles	146,586	132,000
Battle of Messines ..	7th June—13th June, 1917.	7	7,257	67	10 sq. miles	25,997	39,000
Third Battle of Ypres, up to 5th October, 1917.	31st July—5th October, 1917.	67	20,564	55	36 sq. miles	162,769	255,000
Totals	110	48,655	374	107 sq. miles	335,352	426,000

NOTES.

1. The enemy's losses are estimated on the fighting strengths of the troops actually engaged and on the time these troops are known to have been on the front. A calculation on a similar basis was made for the battle of the Somme, and the result arrived at was announced in the French press. The enemy immediately altered his system of publishing casualties and prohibited the export of casualty lists. This is a good indication that the basis of calculation was sound.

2. For the total British captures of prisoners, see Part XXI., p. 630. For Guns captured or lost, see Part VII., Section 4, p. 491.

(a) The figures include Royal Naval Air Service up to 31st March, 1918. (b) "Dead" includes killed in action, died of wounds, accidentally killed, died of disease and drowned.

(c) The minus figures are due to transfers to other heads.

NOTE.—The above figures do not include British Mercantile Marine—Dead, 14,661.

SECTION 4.

HOSPITAL REPORTS.

France.

(a.) In France the accommodation in hospitals on 25th November, 1916, was 42,894 beds, of which 10,604 were vacant, and in convalescent dépôt 20,851 beds, of which 9,905 were vacant. On 27th November, 1916, there were in hospitals and on ambulance trains 54,550 patients, and in transit 614 patients.

(b.) In France the number in medical charge on 24th November, 1917, was 107,275, including 2,490 Germans. The accommodation in hospitals was 68,913 beds, of which 18,073 were vacant, and in convalescent dépôts 44,625 beds, of which 13,614 were vacant. On 22nd November, 1917, there were in hospitals and on ambulance trains 100,322 patients, and in transit 1,905 patients.

(c.) In France the number in medical charge on 21st November, 1918, was 121,604 including 6,378 prisoners of war. The accommodation in hospitals was 82,879 beds, of which 18,998 were vacant, and in convalescent dépôts 53,125 beds, of which 20,381 were vacant. On 22nd November, 1918, there were in hospitals and on ambulance trains 107,472 patients, and in transit 1,295 patients.

(d.) RETURN for week ended 30th April, 1920.

France and Flanders.

(e.) The number of admissions from all causes during the week ending 24th April, 1920, was 7 officers, 211 other ranks; deaths all ranks, 1.

British Army of the Rhine.

(f.) The number of admissions from all causes during the week ending 26th May, 1919, was—all ranks, 1,794; deaths, 5.

(g.) The number of admissions from all causes during the week ending 8th May, 1920, was—officers, 3; other ranks, 256; deaths other ranks, 1.

Egypt.

(h.) The number of admissions for all causes during the week ending 10th April, 1920, was—officers, 25; other ranks, 224; deaths all ranks, 1.

Army of the Black Sea.

(j.) The number of admissions for all causes during the week ending 24th April, 1920, was—officers, 10; other ranks, 155; deaths all ranks, nil.

Mesopotamia.

(k.) The number of admissions for all causes during the week ending 24th April, 1920, was—all ranks, 243; deaths all ranks, 1.

From the Armistice to 1st May, 1920, the following reduction in hospital beds has taken place :—

United Kingdom	336,913
France	155,097
Egypt	40,831
Salonica (Army of Black Sea)	38,700
Mesopotamia	8,140
Italy	9,045
Malta	7,283
Total	596,009

At Home.

4. The following figures relate to the numbers of sick and wounded, admitted from the Expeditionary Forces into hospitals in the United Kingdom :—

	Remaining in hospitals on 30th April, 1920.				Total number transferred to England from the Expeditionary Forces since 23rd August, 1914.	
	Officers.		Other ranks.		Officers.	Other ranks.
	Sick.	Wounded.	Sick.	Wounded.		
British Forces in France	244	326	2,601	2,854	114,262	2,246,351
British Forces in Italy	10	3	41	8	627	9,558
British Forces in the Mediterranean	47	11	485	42	10,436	195,945
Other British Forces, <i>e.g.</i> , Persian Gulf, East Africa, West Africa.	24	5	154	15	1,964	26,693
Native Indian troops	368	14,182
Prisoners of war.	1,514	44,654

5. The admissions for venereal diseases in the United Kingdom during January, 1920, were 1,220, February 1,127, and March 990, compared with 806 in December, 1919.

6. The number of combatant prisoners of war in hospitals in the United Kingdom was 39, and in France nil, on 9th January, 1920.

7. The number of beds equipped in the United Kingdom was 37,093 on 12th March, 1920.

8. The following table shows the comparative strengths of Regular and Territorial Forces in France in December, 1916, and the respective numbers sent home sick :—

Arm.	Percentage of total strength.	Number of sick sent home in December.	Percentage of total sick sent home.	Percentage of strength of arm.
Cavalry	2.5	268	1.1	1.0
Royal Artillery	18.7	3,121	12.4	1.4
Royal Engineers	9.4	1,175	4.7	1.1
Royal Flying Corps	1.0	118	.5	1.0
Infantry	44.7	17,899	71.2	3.4
Royal Army Service Corps	10.2	1,248	5.0	1.0
Royal Army Medical Corps	3.8	493	2.0	1.1
Others	9.7	804	3.1	.7
	100.0	25,126	100.0	

9. The number of totally blind who have passed through St. Dunstan's Hospital is approximately 2,000; and the number of all ranks who have lost one eye is 30,000, but this figure must be taken with reserve.

10. Figures from June, 1915, to 29th February, 1920, supplied by the Registrar of the Central Registry for limbless sailors and soldiers:—

Officers.

Admitted to Dover House from 1915 to 30th April, 1920	...	1,300	
Waiting List...	...	57	
Officers transferred from Roehampton House Register to Dover House Register	...	13	
Officers admitted to the Prince of Wales Hospital, Cardiff	...	80	
Officers admitted to St. Thomas's Hospital, Lambeth, S.E. 1	...	249	
Officers admitted to Ulster Volunteer Force Hospital, Belfast	...	16	
Officers admitted to the Princess Louise Scottish Hospital, Glasgow	...	1	
Officers admitted to Edenhall Hostel, Musselburgh	...	3	
Officers admitted to Blackrock Special Fitting Hospital, Dublin	...	2	
Officers fitted privately, including men of the Overseas Dominions fitted through their respective Headquarters, officers who have refused a limb, also notifications of deaths	...	266	
			617
Total	...		1,987

Other ranks.

Admitted to Roehampton House from June, 1915, to 30th April, 1920	...	21,931	
Admitted to Special Fitting Hospitals other than Roehampton—			
Charterhouse Military Hospital, E.C. 1	...	2,078	
Paddington Military Hospital	...	294	
Prince of Wales Hospital, Cardiff	...	1,326	
Princess Louise Scottish Hospital, Glasgow	...	4,343	
Edenhall Hostel, Musselburgh	...	1,797	
Special Military Surgical Hospital, Newcastle	...	191	
Special Military Surgical Hospital, Blackrock	...	716	
Ulster Volunteer Force Hospital, Belfast	...	569	
Blackmoor, Hospital, Liverpool	...	1,254	
Pilkington Special Hospital, St. Helens, Lancashire	...	187	
2nd Northern General Hospital, Leeds	...	2,009	
Lancaster House, Manchester	...	1,983	
Uffculme Hospital, Birmingham	...	1,708	
War Hospitals, Exeter	...	624	
Royal Victoria Hospital, Netley	...	133	
Patients dealt with at St. Dunstan's	...	27	
Patients fitted at Lady Arthur Grosvenor's Hospital	...	37	
			41,207

Deduct from this total number of patients included in the Roehampton total, 21,829, who have since been admitted to other Special Fitting Hospitals—

To 1st March	...	3,511	
To 1st May	...	720	
			4,231
Patients not requiring a limb and others fitted privately without admission to Special Fitting Hospitals	...		533
Total notifications on Registration Forms of men to be dealt with through the Central Registry	...		1,937
Notifications without Forms	...		186
Notifications of deaths	...		462
Grand total	...		39,094

SECTION 5.

REGISTRATION OF GRAVES.

(20th May, 1920.)*

The Directorate of Graves Registration and Enquiries was established on 21st August, 1916, for the purpose of locating, verifying and registering the graves of soldiers in the various theatres of war.

On 1st May, 1920, the establishment abroad was constituted as follows:—

	Officers.	Other ranks.
France and Belgium...	198	3,683
Salonica, Ægean Isles and Constantinople	14	591
Egypt	18	109
Mesopotamia...	27	1,383
East Africa	6	130
Berlin	7	37
Army of Rhine	1	20
United Kingdom	59	50
Total	330	6,003

TABLES SHOWING NUMBER OF DECEASED BRITISH AND DOMINION OFFICERS, NON-COMMISSIONED OFFICERS AND MEN, AND THE NUMBER OF THOSE WHOSE GRAVES HAVE BEEN REGISTERED OR BURIALS REPORTED.

TOTALS OF ALL ARMIES AND CONTINGENTS.

Deaths of all ranks resulting from the war to 31st August, 1919.	Graves fully registered and accepted as authentic. (Figures to 30th April, 1920.)	Burials reported, but graves not yet identified.
British Expeditionary Force and Italian Expeditionary Force.	France, Belgium and Italy .. 441,158	148,750
Egyptian Expeditionary Force and Mediterranean Expeditionary Force.	Gallipoli 7,258	1,523
British Salonika Force 9,784	Mudros, &c. 2,557	..
Mesopotamian Expeditionary Force.	Macedonia 10,959	516
East African Expeditionary Force	Malta 1,499	72
Other Expeditionary Forces 3,303	Mesopotamia 7,000	8,738
*German S.W. Africa 254	Turkey 720	2,638
*Rebellion S. Africa 409	Egypt and Palestine 35,881	3,018

	Other countries 133	42
738,690	539,909	191,196
	191,196	
	731,105	

Notes.

1. These figures are compiled from information supplied by the War Office and the Dominion Record Offices.

2. Comparisons between the figures of dead for Expeditionary Forces and the Burial figures for theatres of war must necessarily be only approximate. Burials at Marseilles are reckoned in France, but relate mostly to other Expeditionary Forces.

* For a return of Graves and Burials registered up to 20th May, 1920, see p. 351.

Burials in the United Kingdom and at Sea relate to all Expeditionary Forces. The affiliations of Gallipoli and Mudros, Macedonia and Malta, and Mesopotamia and Turkey in the tables necessarily ignore the fact that Mudros, Malta and the Prisoner of War Camps in Turkey draw their casualties from several theatres of war. It seems impossible without very great labour in other departments of the War Office to split up these figures.

3. "Burials" referred to in the third column do not in every case refer to a grave. If it is established that a man was blown to pieces and no burial was possible, or that he disappeared and no one in the battalion knows where he is buried, or if all that can be ascertained is that he was killed at a particular spot, an entry is made under "Burials." This means in ordinary cases burial information which will probably merge into a Grave Report, but in some cases it means detailed information of death, or disappearance which may have in the end to be accepted as a substitute for burial information.

REGULAR ARMY AND TERRITORIAL FORCE.

—	Deaths.	—	Graves.	Burials.	Remarks.

* Excludes Indian followers.

Note.—It has been possible to divide graves and burials, but not deaths, between (a) Indian Army and (b) other Native troops. British officers of the Indian Army are included.

The figures of graves and burials in Mesopotamia in this and other tables are very low. This fact is due partly to the very great difficulties which the country offers and probably also to wholesale loss of records after the capture of Kut by the Turks.

SECTION 6.

ALLIED AND ENEMY CASUALTIES.

It is only possible in some cases to indicate by approximate estimates the casualties sustained by other belligerents.

France.

Pertes définitives au 1er Novembre, 1918.

	Pertes imputables aux opérations.	Pertes indépendantes des opérations.	Pertes totales.
Tués, morts, disparus	1,345,300	40,000	1,385,300 (a)
Prisonniers (vivants en pays ennemis ou internés en Suisse)	446,300	..	446,300 (b)
Pensionnés et réformés	447,000	..	690,000 (c)
Total	2,238,600	40,000	2,521,600

(a.) dont environ 58,000 indigènes (de l'Afrique du Nord et Coloniaux).

(b.) " 3,500 "

(c.) " 39,000 "

An official report, 1st August, 1919, gives the number of killed and died other causes as 1,357,000. There is no record obtainable of the number of wounded.

Belgium.

The casualties to 11th November, 1918, are reported to be—

Killed and died	13,716
Wounded	44,686
Missing	24,456
Prisoners	10,203
Total	93,061

These figures are approximate only, the records being incomplete. They are exclusive of 33,000 interned in Holland.

Italy.

Strength of the Italian Army, summer, 1914 :—Officers, 19,000 and 350,000 other ranks (including Libya). Called to the colours from 1st August, 1914, to 1st July, 1918, nearly 5 millions.

Casualties (to 11th November, 1918)—

Dead	460,000
Wounded	947,000
Prisoners	530,000
Total	1,937,000

Discharged up to 1st July, 1918, 446,000.

Portugal.

Casualties to 1st January, 1920—

Killed and died other causes	7,222*
Wounded	13,751†
Missing and prisoners of war	12,318‡
Total	33,291

Africans are included in these figures.

* Includes 1,689 killed in France, 810 in Angola, and 4,723 in Mozambique.

† No figures for wounded have been received from Mozambique and Angola.

‡ Includes 6,678 prisoners taken in France and a large number of missing in Mozambique.

The total British casualties to 9th March, 1919, amount to—

Killed or died	675,258
Wounded	2,047,026
Missing (including prisoners)	346,037
Total	3,068,321*

* This figure includes the Regular Army and Territorial Force, Oversea, Indian and other Native troops and the Royal Naval Division, and also the Royal Flying Corps up to 31st March, 1918. For later detail of British casualties, see p. 237.

Roumania.

The total permanent loss as reported by the Roumanian Embassy, 6th January, 1919, is as follows:—

Killed and missing	{ officers	9,589
	{ other ranks	326,117
Total	335,706

and in addition 265,000 of the civilian population are stated to have been killed or are missing.

Serbia.

Casualties to 4th December, 1918—

(a.) Killed	45,000
(b.) Wounded	133,148
(c.) Prisoners	70,423
(d.) Missing	82,535
Total	331,106

Greece.

Killed or died of wounds	5,000
Wounded	21,000
Prisoners and missing	1,000

Russia.

A telegram from Petrograd to Copenhagen (20th December, 1918) gives the Russian losses in the war as follows:—

Killed	1,700,000
Disabled	1,450,000
Wounded	3,500,000
Prisoners	2,500,000
Total	9,150,000

United States of America.

The casualties suffered by the Armies of the United States to 1st April, 1920, officially reported by the United States Government, are as follows:—

Killed in action	35,560
Died of wounds	14,720
*Died of disease	57,460
*Died, other causes	7,920
Total deaths	115,660
Wounded	205,690
Missing	46
Prisoners	4,480
Grand Total	325,876

* Both in Europe and the United States.

Bulgaria.

The following approximate figures have been received from the Bulgarian War Office :—

Mobilized strength, 1915	768,000
Highest ration strength during war	*1,000,000

Casualties—

Killed	48,917
Died of wounds...	13,198
Accidentally killed	(?) 888
Died of disease	24,497
Missing	13,729
Wounded	152,390
Prisoners up to 31st December, 1917	10,623

The Bulgarian War Office states that their losses during the retreat from sickness and privations were much greater than the figures they possess.

Germany.

(See also pages 358, *et seq.*)

The total number of German casualties reported in official German lists up to the end of October, 1917, was as follows :—

Nature of casualty.	Totals.
Killed and died of wounds	1,138,768
Died of sickness	85,088
Prisoners	387,979
Missing	263,043
Severely wounded	652,021
Wounded	328,431
Slightly wounded	1,829,820
Wounded remaining with units	315,263
Grand total	5,000,413

1917.

The estimated gross German casualties on all fronts during 1917 were 2,082,000.
The estimated net wastage was 40 per cent. of this = 830,000.

1918.

The estimated gross German casualties on the Western Front during 1918 up to 11th November were 2,250,000.

The estimated net wastage was 40 per cent. of this = 900,000.

No estimate can yet be made for casualties on other fronts.

NOTE.—*German casualties.*—An estimate of the German casualties on all fronts during the war is given below :—

Year.	Gross casualties.	Permanent casualties.
1914-1915	5,255,000	2,102,000
1916	3,267,500	1,307,000
1917	2,075,000	830,000
1918	2,325,000	930,300
Total	12,922,500	5,169,000

* Bulgarians only.

According to the German Press, the following are reported to be the official losses up to 1st November, 1918 :—

Permanent casualties (*i.e.*, as far as fighting is concerned)—

Dead	1,600,000
Missing	203,000
Prisoners	618,000
	<hr/>
Wounded	2,421,000
	<hr/>
Total	4,064,000
	<hr/>
	6,485,000
	<hr/>

As a proof of the inaccuracy of the German figures, the approximate number of prisoners taken by the Allies on the Western Front alone during the war is 774,000. If to this figure be added the German losses in prisoners in the Eastern Theatre (approximately 150,000) during the years 1914-16, and in the remaining theatres during the war, the sum total does not fall short of 1,000,000.

A semi-official message through Wolff's Bureau, from Berlin, 17th April, 1919, gives the complete German casualties up to 30th April, 1919, as follows :—

Killed	1,676,696
Missing	373,778*
Wounded	4,207,028
Prisoners	617,922
	<hr/>
	6,875,424
	<hr/>

A later report published by a Majority Socialist organ, Berlin, 6th January, 1920, gives the following casualties to the German Army :—

	Officers.	Other ranks.	Total.
Killed	62,693	1,655,553	1,718,246
Wounded	116,015	4,118,092	4,234,107
Prisoners and missing ..	23,104	1,950,515	1,073,619
	<hr/>	<hr/>	<hr/>
Total	201,812	6,824,160	7,025,972
	<hr/>	<hr/>	<hr/>

The casualties in the Navy are stated to be 78,342, including 24,112 killed.

Official figures of German Casualties.
(Army and Navy.)

	Officers.	Other ranks.	Total.
Killed.. ..	55,181	1,753,364	1,808,545
Wounded	98,565	4,148,578	4,247,143
	<hr/>	<hr/>	<hr/>
Total	153,746	5,901,942	6,055,688
	<hr/>	<hr/>	<hr/>

The above figures are exclusive of coloured troops of whom 14,000 were killed during the war. The totals are extracted from the *Militär-Wochenblatt* of 17th September, 1921.

* Of this number nine-tenths must be regarded as dead, bringing the total number of killed to over 2,000,000.

Austria-Hungary.

1. The total number of casualties published in the official Austro-Hungarian casualty lists up to 31st March, 1916, was—

Killed	182,760
Wounded	816,169
Prisoners	348,102
Total	<u>1,347,931</u>

But as the above figures for prisoners were only equal to one-third of the known total of prisoners, the estimate of wastage given by the Director of Military Intelligence and accepted by the Enemy Personnel Committee was, up to 31st March, 1916:—

Permanent wastage	1,760,000
Constant temporary wastage	400,000
Prisoners...	1,100,000
Total	<u>3,260,000</u>

The above, while not giving any estimate of the numbers of killed and wounded, is a useful indication of the losses incurred.

2. In 1917, when a revision was made by the same Committee, the totals accepted up to the end of May, 1917, were:—

Permanent wastage	2,300,000
Constant temporary wastage	400,000
Prisoners...	1,800,000
Total	<u>4,500,000</u>

3. Figures up to the end of May, 1918, published in a recent Vienna message give the following estimated totals:—

Killed	800,000
Wounded and sick	3,200,000
Total	<u>4,000,000</u>

To this must be added 1,800,000 prisoners making the total of casualties up to the end of May, 1918, 5,800,000.

4. (a.) From 1st June to 24th October, 1918 (including the Austro-Hungarian June offensive), losses (excluding prisoners) may be estimated at 80,000 a month, of which the proportion of killed would be 16,000.

To this must be added 20,000 prisoners (12,000 being taken in the June offensive). This would make an addition of—

Killed	80,000
Wounded	320,000
Prisoners	20,000
Total	<u>420,000</u>

Note.—It was acknowledged in the Austro-Hungarian Press that the losses from the 15th to 20th June were 100,000 killed and wounded, and that subsequent losses were as heavy.

(b.) In addition, from 1st June to 4th November the Balkan and Western front casualties may be estimated at :—

		Balkans.		West.		Total.
Killed...	...	10,000	...	2,500	...	12,500
Wounded	...	40,000	...	10,000	...	50,000
Prisoners	...	5,000	...	5,000	...	10,000
Total		55,000		17,500		72,500

(c.) During the last Italian offensive the prisoners claimed by the Italians amounted to 448,000. To this an estimate of 30,000 killed and 50,000 wounded (remainder captured) must be added.

5. (a.) On these figures a total estimate for losses throughout the war works out as follows :—

Killed	922,500
Wounded	3,620,000
Prisoners...	2,278,000
Total					6,820,500

(b.) A later estimate up to 31st December, 1918, is as follows :—

Dead	1,200,000
Wounded	3,620,000
Prisoners	2,200,000
Total					7,020,000

(c.) According to the Austro-Hungarian estimate the casualties were distributed in the following percentages :—

			Austria.	Hungary.	Bosnia Herzegovina.
Killed	56.6	40.4	3.0
Died	51.9	44.5	3.6
Prisoners	56.5	41.5	2.0
Missing	49.8	47.7	2.5

(d.) The population of the Austro-Hungarian Empire was distributed in the following percentages :—

Austria, 55.3. Hungary, 41.2 Bosnia Herzegovina, 3.5

Turkey.

Casualties throughout the war—

Killed	50,000
Died of wounds	35,000
Wounded	400,000
Died of disease	240,000
Total accounted for				725,000
*Total unaccounted for				1,565,000
Grand total				2,290,000

* Includes prisoners, deserters, invalids and missing.

(c) During the last Italian offensive the numbers obtained by the Italians amounted to 700-800 tanks, which have been drawn up to show in comparative form.

No figures for "Died of wounds" or "Died of disease" have been compiled since the German Archives state that the compilation of such figures would entail an examination of the register of every military hospital which had existed during the war in occupied France and Belgium and in Germany. A large proportion of the hospital registers were lost immediately after the armistice in 1918 and, therefore, for this reason, as well as for many others, such statistics would be very inaccurate and would only confuse a comparison instead of simplifying it.

(1.) The total number of British *officer* casualties during the period in question was 115,741.

i.e., British : German = 5 : 2 (about).

The total number of German *other ranks* casualties during the period in question was 1,633,140.

i.e., British : German = 3 : 2 (about).

The total number of German casualties to *all ranks* during the period in question was 1,680,396.

i.e., British : German = 3 : 2 (about).

Total German casualties in 1918 (excluding November)		

* British casualties in this column are calculated for January and February. There was little activity during the first part of March.
† Add to these figures 108 unclassified officer casualties.
‡ From July onwards (inclusive) "killed" figures include "died of wounds."

PART V.

RECRUITING.

N.B.—In connection with this part, it would be advisable to consult in addition the memorandum on the recruiting for the Army from the outbreak of war which will be found in the General Annual Reports on the Army, October, 1913, to September, 1919. (Cmd. 1193.)

In August, 1917, the whole of the recruiting administration was reorganized, and from that date to 15th January, 1919, was under the control of the Minister of National Service.

Recruiting was only one phase of the Ministry's activities, the object being to obtain a maximum result from the man and woman power of the nation. In this connection the Ministry had to hold the balance between the demands of the Army, the Navy, and the Royal Air Force for men, munitions, ships, coal, &c., and the necessity of maintaining the agencies of production, distribution and supply, upon which depended the daily life of the civil population of the country. This task would have been difficult if the conditions had been fixed, but, as it was, the respective claims were in a constant state of change.

Detailed investigations were made from time to time into the state of industry and labour throughout the country and, in view of the fact that the complexity of the problem of organizing resources increased as the amount in reserve in civil life decreased, these investigations called for constant additions in the details of information required.

SECTION I.

POPULATION, AND RECRUITING FOR THE ARMY IN THE EMPIRE.

Country.	Total enlistments from all sources to 11th November, 1918.	Estimated total population in July, 1914.	Percentage of total population represented by enlistments.	Estimated male population in July, 1914.	Percentage of male population represented by enlistments.
†England	4,006,158	34,618,346*	11·57	16,681,181	24·02
‡Wales	272,924	2,489,202	10·96	1,268,284	21·52
Scotland	557,618	4,849,500	11·50	2,351,843	23·71
Ireland	134,202	4,374,500	3·07	2,184,193	6·14
Total	4,970,902	46,331,548	10·73	22,485,501	22·11

* In the population of England, the Isle of Man (50,000) is included, but the Channel Islands (100,000) are not included.

† Excluding Monmouthshire.

‡ Including Monmouthshire.

Country.	Total sent Overseas or undergoing training as at 1st November, 1918.	Estimated total white male population at July, 1911.	Percentage of total white male population, represented by total recruited.
Canada*	458,218	3,400,000	13·48
Australia	331,814	2,470,000	13·43
New Zealand	112,223	580,000	19·35
South Africa†	76,184	685,000	11·12
Newfoundland	6,173

* Canada.—The total population shown is only in respect of those born in Canada or in British Isles.

† South Africa.—The total population shown comprises the Cape Province, Natal, the Transvaal, and the Orange Free State.

‡ Includes East Africa, but excludes troops employed in the German South-West African campaign, who numbered approximately 50,000.

SECTION 2A.

VOLUNTARY DIRECT ENLISTMENTS INTO THE TERRITORIAL FORCE
DURING THE WAR PERIOD TO THE END OF THE YEAR 1915.

There are no figures available to show the strength of the Territorial Force on the 4th August, 1914, or the exact number of recruits who enlisted into the Territorial Force between that date and the 15th October, 1914. The strength in non-commissioned officers and men on 1st July, 1914, may be taken as practically the strength at the outbreak of war, seeing that the intervening period of the year was one in which, usually, in peace time there were relatively few recruits and few casualties. The figures for the period 1st July to 15th October shown below represents merely the *net increase* for that period, and are considerably below the number of recruits for that period, owing to the number of Territorial Force soldiers who had been weeded out on embodiment for medical reasons, &c., and who had for various reasons been required by, and transferred to, the Regular Army.

Otherwise, the following figures give the actual number of recruits for the Territorial Force week by week as shown by returns which were furnished by all Territorial Force Associations:—

Week ended.	English T.F. units.	Scottish T.F. units.	Welsh T.F. units.	Total.
1st July to 15th October, 1914 (net increase)	172,511	31,416	9,632	213,559
21st October	13,047	2,315	1,576	16,938

SECTION 5.

FORECASTS OF RECRUITING AND STRENGTHS OF THE BRITISH
ARMY IN VARIOUS THEATRES.

(Estimated on 1st October, 1919.)

The following Tables A to J have been prepared to show as far as can be estimated:—

- (1) The position of the Army in the various theatres of war at certain future days, i.e., 15th November, 1919, and other dates thereafter.
- (2) The necessity for immediate recruitment.
- (3) The necessity for sustained recruitment to meet the requirements of the Army in 1921-1922.

The tables are forecasts only and cannot be regarded as more than very approximate. They have been prepared from the various suggestions for reductions put forward by General Officers Commanding theatres, the General Staff and the Adjutant-General's Department.

The situation in 1921 has been taken as "normal peace," and at other interim dates the situations in various theatres have been taken to be the most "optimistic."

TABLE A.
United Kingdom.

		Notes.
Strength, British other ranks, 1st September, 1919	470,000 (a)	(a.) Includes 74,000 non-effectives.
Strength, British other ranks, 29th September, 1919	395,000	
Deduct non-effectives	57,000 (b)	(b.) The non-effectives are as follows:— Sick in hospital, 17,000 regulars, 28,000 conscripts. Awaiting discharge, 3,500 regulars, 8,500 conscripts.
Balance, effective other ranks, 29th September, 1919	338,000	
Strength, British other ranks, 29th September, 1919	395,000	
Estimated reductions to 15th November, 1919—		
To be demobilized (old Army Orders) ..	30,000	
" " (new " ") ..	102,000	
Regular troops embarked for the East ..	28,000	
Strength on 15th November, 1919	235,000	
Of these there will be—		
Non-effectives	45,000	
Preparing for overseas	50,000	
Ireland	48,000 (c)	(c.) This figure allows for 25,000 effective infantry, which is the General Staff minimum. There will be no cyclists, but it is suggested that the cycles could, if necessary, be handed over to infantry battalions. The three regiments of cavalry will be reduced from 2,528 to 1,200.
Balance of effective other ranks in Great Britain on 15th November, 1919	92,000	
Add eight battalions from Rhine	4,000	
Add recruits from 1st October to 15th November, 1919	14,000	
Total effective strengths, other ranks, in Great Britain on 15th November, 1919	110,000 (d)	(d.) Exclusive of troops preparing for overseas.

Forecasts of Recruiting and Strengths.

376

TABLE A—continued.
Great Britain.

Forecast of situation on 15th November, 1919.			Notes.
Total effective Home Service other ranks on 15th November, 1919, in Great Britain ..	—	110,000	
10 Guards battalions, with a total effective strength of	4,000		
49 Regular battalions, with an average effective strength of 500 each	24,500		
20 Army of Occupation battalions, with an average effective strength of 600 each ..	12,000		
Total effective bayonets	40,500	40,500	
Other fighting arms	34,869	34,869 (a)	(a.) 3 Household Cavalry Regiments .. 1,500 12 Cavalry Regiments 7,824 Royal Horse Artillery 2,100 20 batteries, Royal Field Artillery .. 4,379 Royal Garrison Artillery, Coast Defence, Home Service and Reserve Units .. 9,000 Royal Engineers 3,500 6 battalions, Machine Gun Corps .. 5,166 Tank Corps 1,400 34,869
Total fighting arms	75,369		
Technical arms	—	34,631 (b)	(b.) Royal Army Service Corps .. 12,000 Royal Army Medical Corps * 7,500 Royal Army Ordnance Corps 2,000 Labour Corps 6,000 Military Police 1,000 Royal Army Veterinary Corps 2,000 Army Pay Corps 1,500 Records and Schools, &c. 2,631 34,631
The numbers in technical and administrative arms may appear to be unnecessarily high in proportion to fighting arms, but they are really not so for the following reasons:—			
(1) Non-effectives and troops preparing for overseas (95,000) have to be administered in addition to the 75,000.			
(2) There is a considerable amount of documentary work in connection with pay, pensions, records, &c., of men who have been and are being demobilized.			
(3) Although the reduction of fighting troops will eventually admit of reduction in administrative troops, the latter reduction cannot be effected until the former has been completed, and even then it is not possible to reduce the administrative troops exactly in the same proportion.			
	—	110,000	* It is estimated that of this 7,500 Royal Army Medical Corps personnel at least 5,000 are in charge of "war casualties."

NOTE.—The actual strength on 15th November, 1919, was 266,000.

TABLE B.
Army of the Rhine.

Strength, British other ranks on 26th July, 1919 ..	202,000	
" " " 29th September, 1919 ..	101,000	
" " " 15th November, 1919 ..	45,000 (a)	(a) Estimated.
" " " 1st December, 1919 ..	30,000 (b)	(b) Cologne garrison, 14,500; Plebiscitary division, 15,500.

NOTE.—The actual strength on 15th November, 1919, was 45,000.

TABLE C.
France and Flanders.

Total strength on 26th July, 1919	473,000 (c)	(c) British other ranks 179,000 Prisoners of war 197,000 Indian troops (labour) 13,000 Chinese and coloured labour 77,000 Miscellaneous 7,000
" " 29th September, 1919	304,000 (d)	(d) British other ranks 140,000 Indian (labour) 13,000 Prisoners of war 79,000 Chinese and coloured labour 65,000 Miscellaneous 7,000
Estimated strength on 15th November, 1919	* 107,000 (e)	(e) British other ranks † 46,000 Indian 11,000 Chinese and coloured labour 50,000
" " 1st January, 1920	* 58,000 (f)	(f) British, other ranks 32,000 Indian 10,000 Chinese and coloured labour 16,000
" " 1st March, 1920	* 22,000 (g)	(g) Exhumators 12,000 Guards Base Camp Staffs, Boulogne and Marseilles; hospitals, train services, &c. 10,000 This is on the assumption that all stores have gone and no other Rest Camps exist than those at Boulogne and Marseilles.
" " 1st May, 1920	Nil	

* These figures are based on the assumption that the Army is relieved of all responsibility for guarding and care of stores which have been taken over by the Disposals Board.

† The actual strength on 16th November, 1919, was 50,000.

TABLE D.
Black Sea.

	British.	Indian.	Mule Drivers.	Prisoners of War.	Totals.	Notes.
Strength on 30th August, 1919	34,000	14,000	943	11,949	60,892	
Estimated strength on 15th November, 1919 ..	28,000	14,000	943	Nil.	42,943	
Estimated strength on 1st January, 1920 ..	(a) 18,000	(a) 14,000	900	Nil.	32,900	(a) This figure is to be reduced to 12,500 British and 8,000 Indians on the evacuation of Batum.

NOTE.—The actual strength on 15th November, 1919, was 17,000.

TABLE E.
Egypt and Palestine.

	British.	Indian.		Egyptian Army.	French Army.	Italian Army.	Prisoners of War.	Total.	Notes.
		Troops.	Followers.						
Strength, 23rd August, 1919	52,000	61,000	11,000	1,365 (a)	15,000	1,000	86,000	227,365	(a) 2 battalions of Egyptian Army attached to the Egyptian Expeditionary Force in the Cairo area; remainder of Egyptian Army, about 16,000 strong, is distributed approximately half in Upper Egypt and half in the Soudan.
Strength, 13th September, 1919	45,000	61,000	11,000	1,326	13,000	Nil	78,000	209,326	
Estimated strength, 15th November, 1919	30,000 (b)	61,000	11,000	1,326	Nil	Nil	54,000	157,326	(b) The strength of British other ranks depends upon the date of evacuation of Syria, the pacification of Egypt, and the evacuation of Turkish prisoners of war, in which latter case shipping is the limiting factor, only 8,000 being evacuated by sea each month.
Estimated strength, 1st February, 1920	25,700	45,000	7,000	1,326	Nil	Nil	24,000	103,026 (c)	(c) The reduction to this garrison is dependent upon the completion of the evacuation of Syria and is subject to the proviso that no serious trouble arises either in Palestine or Egypt.

NOTE.—The actual strength on 15th November, 1919, was 40,000.

TABLE F.
Mesopotamia.

	British.	Indian.	Local levies.	Followers.	Total.	Total reduction to date.	Notes.
Strength on 16th August, 1919	25,000	77,000	18,000	138,000	258,000 (a)	..	(a) Excludes 19,000 prisoners of war who will be reduced on conclusion of peace with Turkey.
29th September, 1919	21,000 (b)	79,000	16,000	126,000	242,000	16,000	(b) General Officer Commanding-in-Chief on 12th September, 1919, gave this figure as 23,000, since when 2,000 have been evacuated.
Estimated strength on 15th November, 1919	18,000	73,000	16,000	91,000	198,000	60,000	
1st January, 1920	17,000	51,000	16,000	70,000	154,000	104,000 (c)	(c) The General Officer Commanding-in-Chief agreed that a total reduction of 94,000 could be made by 1st December, 1919.

NOTE.—The actual strength on 25th October, 1919, was 18,800.

Forecasts of Recruiting and Strengths.

TABLE G.
India.

		Notes.
Strength, British other ranks on 1st August, 1919 ..	59,146	(a.) The pre-war garrison of India was 72,852, included in which were 9 British cavalry regiments and 52 infantry battalions. No other ranks for Royal Engineers, Royal Army Service Corps or Royal Army Medical Corps were included in the establishments.
" " 29th September, 1919 ..	66,000	
Estimated British other ranks on 15th November, 1919 ..	66,000	
" " 1st January, 1920 ..	79,000(a)	
		The proposed establishments as demanded by India are 6 cavalry regiments, 38 infantry battalions, 7 machine-gun corps battalions, 8 machine-gun corps motor batteries, 43 armoured car batteries, 33 trench mortar batteries, Royal Engineer signals, Royal Army Service Corps and Royal Army Medical Corps.
		These proposals have not received the endorsement of the Secretary of State. They are now undergoing examination.

NOTE.—The actual strength on 15th November, 1919, was 53,000.

NECESSITY FOR CONTINUATION OF RECRUITING.

TABLE H.
Forecast of Situation on 1st February, 1920.

Establishments to be filled on 1st February, 1920 (a)	—	(a.) All men must be volunteers, and the majority must be fully trained.
<i>Home—</i>		(b.) Six Army of Occupation Battalions total 3,600 have been deducted from 48,000 shown for Ireland in Table A.
Ireland	44,400(b)	(c.) Two Army of Occupation Divisions (Eastern and Highland)—total 14,400—have been deducted from the 110,000 shown for Great Britain in Table A.
Great Britain	95,900(c)	(d.) No account is taken for any troops in France and Flanders, or for the Plebiscitary Division which will be Army of Occupation units. The General Staff is unable to forecast, even approximately, the date on which the Plebiscitary Division can be dispensed with. If, however, it has to be maintained after the 1st February, 1920, it will be necessary to provide an additional 15,500 regulars to replace the Army of Occupation personnel who must be demobilized before the 30th April, 1920. Consequently we shall in these circumstances have a deficit of 78,500 to be made good by recruiting.
	140,000	
<i>Overseas (d)—</i>		
Overseas garrisons	126,000	
Rhine Garrison	14,500	
Black Sea	12,500	
	153,000	
Total	293,000	
Deduct numbers of volunteers already enlisted who will be available on 1st February, 1920	230,000	
Deficit to be made good by 1st February, 1920	63,000	

TABLE J.
Forecast of Situation on 1st April, 1921.

I.—Number of men in the Regular Army who have voluntarily enlisted on the 29th September, 1919	230,000	
For the period 30th September, 1919, to 1st April, 1921, deduct—		
Time expired	65,000	
Non-effectives discharged	30,000	
Normal wastage	19,000	
	104,000	
Balance on 1st April, 1921	126,000	
II.—The following would seem to be the minimum requirements on 1st April, 1921:—		
India	79,000 (a)	(a.) Subject to reduction (see Table G).
Mesopotamia	17,000	
Egypt and Palestine	18,000	
Colonies and fortresses	10,000 (b)	(b.) Pre-war garrisons 27,000.
Ireland	24,000 (c)	(c.) As at pre-war figure.
Great Britain	95,000	
Rhine	12,500	
	255,500(d)	(d.) The following reductions have been allowed:—
		For Black Sea 12,500
		Plebiscitary Division 15,500
		Total 28,000
To meet these requirements there will be in hand on 1st April, 1921 (see I. above)	126,000	
Deficit to be made good by 1st April, 1921	129,500	

SECTION 6.

RECRUITING OVERSEAS.

(a.) DOMINIONS (WHITE POPULATION).

Dominion.	Male population.	Date of Census.	Numbers recruited August, 1914, to November, 1918.
Australia	Estimated at 2,800,000	1911	Military.. .. 416,809 Naval 3,856
Canada	3,821,975	1911	995,411 Sent overseas .. 418,052
New Zealand. ..	Estimated in 1917, 537,360	From 1911 Census	124,211
Union of South Africa ..	738,866	Preliminary 1918 Census	Sent overseas .. 136,074*
Newfoundland	124,305	1911	Military.. .. 9,826† Naval 2,053
Other Colonies	?	?	12,000

* It is impossible to get correct figures, many of this number having been overseas to two or three different theatres of war.

† This includes about 3,000 who joined the Canadian forces.

The above figures were obtained from the High Commissioners of the Dominions concerned, excepting those for "other Colonies."

For further details of recruiting in the Dominions, see pages 739 to 779.

The population figures of the Dominions are mainly those of the 1911 census and, therefore, probably err somewhat on the side of under-estimation.

A careful investigation of the figures for Great Britain shows that the proportion of men aged from 18 to 41, both inclusive, who are fit to be placed in Category "A," is about 25 per cent. of the total male population, while the number of men of the same ages fit for other military service is roughly 15 per cent. These percentages have been used as a basis for calculating the estimated number of men in the Dominions fit for military service.

No account was taken of Imperial reservists recalled to the Regular Army, nor of men who have voluntarily proceeded to the United Kingdom to enlist there. It is probable that the number who served under this head and who came from Canada and South Africa exceeded those from the more distant Australia and New Zealand. South Africa estimated her contribution at over 5,000.

In any comparison, the different economic conditions of the several Dominions must be kept in mind. Many of the staple industries (e.g., gold mining in South Africa, the lumber trade in Canada, &c.) do not lend themselves readily to the substitution of female labour.

In view of future requirements the number of youths attaining the age of 18 in each year is an important point. For the present purpose it may be estimated that in white communities the proportion of males reaching the age of 18 in any one year is 2 per cent. of the total male population surviving in that year. Of the youths thus annually becoming available, about 66 per cent. may be taken as fit for Category "A," and 30 per cent. for other military service.

The estimated number of youths who will attain age of 18 in each year is as follows :—

Country.	Number of youths attaining age 18 each year, say	Of whom likely to become Category "A."
Canada (British extraction) ..	30,000 }	33,000*
Canada (French extraction) ..	20,000 }	
Australia	50,000	33,000
New Zealand	11,000	7,300
South Africa	5,500	3,700
Total	116,500	77,000

* This figure is too high as it assumes that youths of French extraction will all be available.

The estimates arrived at in the tables on the previous page are probably, in the case of the Dominions, on the low side, for the following reasons :—

- (1.) The age distribution in the Dominions may be expected to differ considerably from that of the Mother country, as in the former there will be proportionally a much greater number of men in the prime of life.
- (2.) The percentage of rural population to urban population is likely to be much higher in the Dominions than at Home.
- (3.) A very considerable proportion of the population in the Dominions is composed of emigrants from Great Britain who are for the most part of very good physical fitness, *e.g.*, in the case of some of the Dominions men suffering from diseases such as tuberculosis, &c., are not permitted to land.
- (4.) Another reason for an expected good yield of men is the fact that in Australia, New Zealand and South Africa, little munition work is being done, and in Canada a much smaller percentage of the population is engaged on this work than is the case in the United Kingdom.

On the other hand, the number of youths annually becoming available is probably slightly over-estimated, owing to the fact that the white population in the Dominions has been rapidly increasing.

An examination of the foregoing tables would seem to indicate that—

- (1.) Very few additional men were to be expected from South Africa.
- (2.) A very considerable number could still be supplied by Australia.
- (3.) A fair number could still be supplied by New Zealand.
- (4.) As regards Canada—
 - (a.) Those born in the United Kingdom have quite done their share.
 - (b.) Of Canadian born—British extraction—a large number were still available.
 - (c.) The large reservoir—Canadian born, French extraction—made practically no contribution to our Army.

AUSTRALIA.

The population of Australia, though fairly homogeneous, contains a number of troublesome elements which militate against intensive utilization of man-power.

Owing to political opposition it was impossible to introduce compulsory military service for overseas. Universal military training for home service was in force.

The census of 1911 showed the following age-distribution of male population :—

Cadet age (12 to 18)	about 260,000
Citizen soldier age (18 to 26)	366,000
Age 26 to 35	330,000
Total (age 18 to 35)	696,000
Total (age 35 to 60)	614,000

Total male population—

Estimated, 1914	2,551,431
Estimated, 1918	2,600,000
Aged 18 to 45 (after deducting men already in Overseas Service), June, 1916	635,500
Aged 18 to 60, in industries, on 31st October, 1917	124,000

(b.) INDIA.†

The following Table shows the Man-power of the Chief Fighting Races of India :—

Tribe.	Male Population, 1911.	Males between 20 and 40.	Estimated Category "A."	Serving in Army or Military Forces, 1.1.1915.	Percentage of men serving to estimated Category "A" men.	Remarks.
Jat Sikhs	951,572	285,248	95,000	35,617	37	* No figures obtainable.
Khatri Sikhs	172,000	37,202	17,000	1,069	6.2

Others	"	"	"	13,247	..	
Others	"	"	"	16,139	..	
Total	247,768	..	

† For further particulars see p. 777.

The figures in the above table are based on the returns of 1st January, 1915, but since that date about 69,000 recruits, surplus to wastage, have been enlisted. The Government of India also undertook to raise 16 new Infantry battalions.

As regards the white population in India, there were 44,000 efficient Volunteers of whom it was proposed to embody permanently a sufficient number to permit of the release of six British battalions for service outside India, and to organize, equip and train the remainder adequately to meet any sudden emergency.

(c.) BRITISH PROTECTORATE IN EASTERN AFRICA (EAST AFRICA PROTECTORATE, UGANDA, NYASALAND).

On the outbreak of war the East Africa Protectorate and the Protectorates of Uganda, Nyasaland and Zanzibar were thrown at first on their own resources for the protection of their frontiers from the enemy forces in German East Africa.

The normal peace-time garrison consisted of three battalions of the King's African Rifles (native East African troops with European officers) at a strength in all of about 2,300. To supplement these forces the European male population of each Protectorate immediately came forward and formed local volunteer forces, variously designated. At the same time a proportionate number of natives were enlisted from those who volunteered, to provide for non-combatant services of portage and military labour.

After a period of stress, during which these local forces were engaged in numerous offensive and defensive engagements against an energetic enemy working on interior lines, expeditionary forces from India, then from South Africa, and later from West Africa, supplemented by details from the United Kingdom, gradually came into the field and opened the campaign on the scale necessary to invade a territory twice the size of Germany in Europe.

With the arrival of these forces, the task of the Protectorates increased rather than diminished. The European volunteer units were, for the most part, broken up, but only in order that their personnel, valuable for their knowledge of the native languages and of local conditions, might be distributed among subsidiary units, such as the East African Military Labour Corps, which grew into a large organization for controlling native labour for the whole of the forces engaged in the campaign.

Meanwhile, no efforts were spared to increase the number of trained native combatants, and the expansion of the King's African Rifles from 3 to 22 battalions ensured a supply of acclimatized troops who, as other units were in time withdrawn with their health shattered by the rigours of the climate, formed, during the last two years of the campaign, a large proportion of the total British force engaged.

The absence of roads and the prevalence of the tsetse-fly made motor and pack transport impracticable throughout large areas of the enemy territory, and the demand for carriers taxed the resources of the Protectorates to the utmost.

The figures given below are in all cases approximate, but serve to show the manpower effort of the European and native population. In addition, a considerable number of the Asiatic population served, mainly in non-combatant services; but the figures are not available.

(1.) *Total number of men raised in East Africa during the War for the campaign against German East Africa:—*

—	European.	Native Combatant.	Native Non-Combatant.
East Africa Protectorate, Uganda and Zanzibar ..	2,300	24,000	400,000
Nyasaland	800	10,000	200,000
Total	3,100	34,000	600,000

(2.) *Total number of men raised in East Africa during the War for the campaign against German East Africa who were killed or died of wounds or disease:—*

—	European.	Native Combatant.	Native Non-Combatant.
East Africa Protectorate, Uganda and Zanzibar .	175	3,000	44,000
Nyasaland	60	1,500	4,000
Total	235	4,500	48,000

3. *The following figures relate to the King's African Rifles only:—*

(i.) *Strength of the force (viz., 3 battalions) on 5th August, 1914—*

British officers	62
British non-commissioned officers	2
Native rank and file	2,319

(ii.) Strength of the force (viz., 22 battalions) on 1st November, 1918—

British officers	1,423
British non-commissioned officers	2,046
Native rank and file	31,955

(d.) RHODESIA.

An infantry battalion formed from the white population in Southern Rhodesia was offered to the Union Government in 1914, and took part in the rebellion in South Africa and the German South-West African campaign. It was then disbanded. A second battalion was subsequently raised, and employed in German East Africa, where it was heavily drawn upon for officers for the King's African Rifles. It returned to Rhodesia in April, 1917, and many of the officers and men proceeded to Europe for service in the Western Front. A white volunteer force from Southern Rhodesia also served through the greater part of the war in the operations in the neighbourhood of the North Eastern Rhodesia-German East African frontier.

The white population of the two Rhodesias was heavily drawn on, the number of Rhodesians on active service during the war being estimated at 5,200 out of a total European population of some 35,000.

Two native regiments were raised in Southern Rhodesia for service in connection with the German East African campaign. In addition to natives enlisted in these regiments, and those enlisted in the Northern Rhodesia Police and the King's African Rifles, large numbers of Rhodesian natives were employed as carriers. It is estimated that from 30,000 to 40,000 natives were in constant employment, and that in North-Eastern Rhodesia 40 per cent. of all available male natives were at times engaged on war work.

(e.) WEST AFRICA.

The population of the four West African Colonies, Nigeria, Gold Coast, Sierra Leone, and the Gambia, reaches a high figure, but it has to be borne in mind that a comparatively small portion only provides any fighting material. Recruiting for combatants, therefore, had necessarily to be confined to the fighting tribes only.

The normal garrison of these Colonies, as maintained by their own Governments, consisted of the West African Frontier Force, recruited from local African natives and officered by British officers seconded from the British Army. The strength of this force was approximately :—

Nigeria Regiment	...	175 officers, 101 British N.C.Os., 4,996 native ranks.
Gold Coast Regiment	...	39 " 11 " " 1,433 " "
Sierra Leone Battalion	...	28 " 1 " " 644 " "
Gambia Company	...	4 " 2 " " 128 " "

During the course of the war, the total numbers employed with the West African Frontier Force amounted to the following :—

Nigeria Regiment	...	1,587 Europeans, 13,980 native ranks.
Gold Coast Regiment	...	397 " 9,890 " "
Sierra Leone Battalion	...	48 " 646 " "
Gambia Company	...	20 " 351 " "

The Gold Coast Regiment took the main part in the capture of Togoland in August, 1914, whilst practically the whole of the West African Frontier Force served throughout the operations in the Cameroons. On the conclusion of these operations, the Gold Coast Regiment proceeded to East Africa, where they were followed by the Nigerian Overseas Contingent consisting of one battery, four battalions of infantry, signal section, machine-gun company, and a small medical establishment, formed from the Nigeria Regiment. This contingent was accompanied by the Gambia Company.

Recruiting depôts and training centres were established in Nigeria, the Gold Coast, and the Gambia, to deal with the upkeep of the overseas forces, and recruiting for internal security.

All available white males in West Africa volunteered for military service, and as many as possible were released for this purpose, local staffs being reduced to the irreducible minimum.

During the course of the campaigns in Togoland and the Cameroons, very considerable numbers of West African natives were employed as carriers. Exact statistics are not available, but the number ran into tens of thousands.

For service in East Africa a properly organized Carrier Corps, numbering nearly 10,000 strong, was raised in Nigeria and Sierra Leone.

At the request of the War Office, motor transport personnel were raised in Nigeria and the Gold Coast. The total number employed on this service was:—

Nigeria	3 Europeans,	250 native ranks.
Gold Coast	6 „	1,197 „ „

In addition, Kroomen and carriers for inland water transport in Mesopotamia were enlisted.

(f.) MAURITIUS, CEYLON, &C., AND THE FAR EAST.

In Hong Kong, Ceylon, Mauritius and Seychelles all available white males volunteered. Hong Kong and Ceylon undertook local defence, so releasing the Indian infantry battalions. In Ceylon and Mauritius the black and coloured populations were unsuitable for fighting purposes and were employed as labour units or munition workers.

(g.) WEST INDIES AND BERMUDA.

Country.	Approximate coloured male population. Census 1911.	Approximate white male population.	Numbers serving.		Remarks.
			Coloured.	White.	
West Indies	686,000	14,000	} 15,200	750	Round figures.
British Honduras	19,000	1,000			
British Guiana	147,000	7,000			
Bermuda	6,500	3,500	240	120	
Total	858,500	25,500	15,440	870	

A British West Indies contingent was formed, absorbing only a small proportion of the coloured population.

(h.) THE MEDITERRANEAN.

Country.	Male population, 1911.	Estimated Category "A" men.	Numbers serving.	Remarks.
Gibraltar	9,228	2,000	Nil	
Malta	105,600	25,000	3,000	
Cyprus	139,383	30,000	3,000*	* Being raised.

In Gibraltar the civil population were technically camp followers and not suitable for military service. A local Volunteer Force existed and a certain number of civilians were serving with the Royal Garrison Artillery in subordinate positions to replace trained men sent home for service elsewhere.

Malta raised a labour battalion (1,000 strong) which was sent to Salonica. The Royal Malta Artillery and two infantry battalions formed part of the local garrison.

In Cyprus muleteers were recruited for service at Salonica.

SECTION 7.

RECRUITING SINCE THE SIGNING OF THE ARMISTICE.

(11th November, 1918, to 1st April, 1920.)

RECRUITING UNDER THE MINISTRY OF NATIONAL SERVICE.

All calling-up under the Military Service Acts was suspended at midday on 11th November, 1918, and from that date until 15th January, 1919, posting was confined to men who had previously been called up and reported themselves. The Ministry of National Service subsequently to 11th November, 1918, only recruited and handed over to the Military Authorities men between 18 and 25 years of age who presented themselves voluntarily for enlistment and who were willing to be attested for the full period of 12 years' Army Service to fill vacancies existing in the Regular Establishment. The number of recruits so enlisted during the period 11th November, 1918, to 15th January, 1919, was 1,139.

RE-ENLISTMENT OF SERVING SOLDIERS.

Meanwhile, the necessity for refilling at an early date the depleted ranks of the old Regular Army in order to provide oversea garrisons and reserves at home having become evident, an Army Order was published on the 10th December, 1918, *see p. 392*, authorizing the re-enlistment of serving soldiers for periods of, approximately, 2, 3 or 4 years. Bounties of 20*l.*, 40*l.* and 50*l.*, respectively, were given, in addition to any pension, bounties or gratuities due on account of war or other services, to men re-enlisting for these periods. This Army Order, which became Army Order 4 of January, 1919, was subsequently further extended by Army Orders 124 and 125 of 1919, of which the former slightly modified the conditions and of which the latter applied them so modified, to men serving as members of Overseas Contingents. Re-enlistments under Army Order 124 were closed by Army Order 329 (published on 27th September, 1919) from the date of its receipt in the various Commands. The total number of men re-enlisted under these Army Orders, with bounty, was 74,930. A detailed statement of these numbers is given on pages 394 and 395.

There was considerable delay, owing to postal and other difficulties, in reporting to Record Offices, re-enlistments under this Army Order which were being carried out simultaneously all over the world. This fact, combined with the very heavy pressure of work in those offices caused by demobilization, resulted in certain popular infantry regiments receiving more than their proper quota, and becoming somewhat congested with short service men. Otherwise, the results may be considered satisfactory.

RECRUITING ORGANIZATION IN THE UNITED KINGDOM.

On 15th January, 1919, recruiting from civil life for the Regular Army was resumed on pre-war lines, the Ministry of National Service being relieved of all duties in this connection as from that date. Pending the elaboration of an improved recruiting organization, and a decision being reached with regard to the general terms and conditions of service, rates of pay, allowances, &c., which would obtain in the future, it was decided not to enter immediately upon active recruiting operations. At the same time, in view of the necessity for rebuilding the framework of the after war army by enlisting men on normal engagements in addition to those joining for short periods, it was regarded as essential to provide every facility for such recruits as might come forward for enlistment, and to afford them every encouragement to do so. It was consequently decided to revert provisionally to the general recruiting organization and procedure in force before the war, namely, that in certain cities and large towns special areas should be formed under selected officers, and that elsewhere the officers commanding infantry depôts should direct the recruiting service within the limits of their regimental districts.

The staff for the above scheme was provided by the re-appointment of a certain number of the pensioner recruiting staff formerly employed by the Military Authorities and taken over by the Ministry of National Service, and by utilizing the services of the existing staff of regimental depôts, supplemented, where necessary, by serving officers and non-commissioned officers specially detailed for recruiting duties. General Officers Commanding-in-Chief were made directly responsible for all recruiting arrangements in their commands, with the exception of London, which was again placed under a serving officer who was appointed Chief Recruiting Staff Officer, and in addition to his duties in charge of the London area, was an officer on the War Office Staff, and was responsible to the War Office for the inspection and supervision of recruiting in the United Kingdom generally, pending the appointment of staff officers to undertake these duties in the Commands.

APPOINTMENT OF STAFF OFFICERS.

During the first half of May, 1919, staff officers charged solely with the duty of inspecting and supervising recruiting were re-appointed to the commands in Great Britain, and a similar staff officer replaced the Assistant Inspector of Recruiting in the Irish Command. They have been graded as Deputy-Assistant Adjutant-Generals, provided they hold field rank and in the capacity of Staff Officers to the General Officer Commanding-in-Chief of the Command, undertake all the recruiting duties which before the outbreak of war were assigned to officers commanding districts. The assistance which they have been able to afford to the responsible Branch at the War Office and to Recruiting Areas in their Command has fully justified their appointment, and the results achieved must be attributed largely to their efforts.

RECRUITING FROM CIVIL LIFE FOR THE REGULAR ARMY.

On 1st April, 1919, an active recruiting campaign was opened. Every effort was made to raise men on normal engagements and under Army Order 155 of 1919, published on that date, demobilized soldiers were permitted to re-enlist on conditions generally similar to those published in Army Order 4 of 1919, but without the right to special bounty.

By Army Order 238 of 1919, the conditions of enlistment under Army Order 155 of 1919 were extended in order that a limited number of men (including men who have not previously served, but who possess special qualifications) might be permitted to enlist for one year with the Colours. Corps open for recruiting under these conditions, the age limit and physical standard required for the various corps, and any other special conditions are notified from time to time in Recruiting Instructions and circulars.

Army Order 155 of 1919 was further amended by Army Order 413 of November, 1919, under the conditions of which men who have not previously served are permitted to enlist for periods of 1, 2, 3 or 4 years with the Colours in certain corps, similarly notified in Recruiting Instructions as in the case of Army Order 238 of 1919. Separation allowance is not payable in respect of any man without previous service who enlists under this Army Order for 2, 3 or 4 years, and, further, in no case is dependants' allowance resumed in respect of any men who re-enlist for 1, 2, 3 or 4 years after 2nd December, 1919.

The following précis shows the recruits raised up to 1st April, 1920, on normal engagements and under the above Army Orders:—

RECRUITS RAISED FROM CIVIL LIFE BETWEEN THE 15TH JANUARY, 1919, AND 1ST APRIL, 1920, FOR THE REGULAR ARMY ON NORMAL ENGAGEMENTS AND ENGAGEMENTS FOR SHORTER PERIODS WHICH WILL EXPIRE AFTER 1ST MAY, 1920.

	Normal period.	Army Order 155 of 1919.	Army Order 238 of 1919.	Army Order 413 of 1919.	Total by corps.

* These corps are closed to recruiting under Army Order 238 of 1919 with the exception of a few skilled trades.

† Closed entirely to recruiting.

SPECIAL RECRUITING MISSION FOR THE ROYAL ARMY SERVICE CORPS, MECHANICAL TRANSPORT.

On 1st January, 1920, a special recruiting campaign for the Royal Army Service Corps, Mechanical Transport, was commenced, owing to the large demand for personnel being made for this branch of the corps in the East.

The campaign was conducted under a Royal Army Service Corps officer. Seven officers and 24 Royal Army Service Corps, Mechanical Transport, non-commissioned officers were detailed throughout the United Kingdom, working under direct instructions from the Royal Army Service Corps Officer in Charge of the campaign, in conjunction with the Deputy-Assistant Adjutant-Generals for recruiting in commands.

On 13th March, 1920, 5,210 recruits had been obtained.

The requirements being subsequently slightly reduced, the number obtained has necessitated the closing down of recruiting for this branch of the Service, with the exception that a number of ex-non-commissioned officers and a few skilled artificers are still required.

An average of 520 recruits a week was obtained for that branch of the corps during the special campaign.

INSTRUCTIONS AND ARMY ORDERS OPENING ENLISTMENTS FOR SHORT PERIODS FOR SPECIAL PURPOSES.

On 8th April, 1919, for a Relief Force for North Russia men were recruited voluntarily from amongst demobilized and discharged trained soldiers. The branches of the service open to recruiting for this Force were:—Royal Field Artillery, Royal Engineers (Field, Signals, Postal), Infantry, Machine-Gun Corps, Royal Army Service Corps, Royal Army Medical Corps and Royal Army Ordnance Corps. The total number of men obtained for this Force was 5,344.

On 26th April, 1919, for the Stores Section, Royal Engineers, by Army Order 164 of 1919 (subsequently modified by Army Order 235 of 1919). All candidates had to be 38 years of age or over and fit for categories B (i), B (ii) or B (iii). The number of men enlisted up to 25th June, 1919, was 4,667. Recruiting under this Army Order for the Royal Engineers was, however, generally closed on 25th June, 1919, after which date men were accepted for one year under Army Order 238 referred to above.

Meanwhile, by Army Orders 156 and 195 of 1919, in order to relieve men anxious to return to civil life, the enlistment of men serving as members of certain Oversea Contingents, the Royal Naval Reserve and the Royal Marines, and of ex-soldiers and others required for garrison duties, was permitted for a period up to 30th April, 1920. Some 10,500 men were enlisted under these conditions. Recruiting under Army Order 195 was closed on 11th August, 1919.

On 10th May, 1919, recruiting was opened for the same period under Army Order 196 for the Labour Corps, which urgently required men for special duties connected with the scheme for the exhumation of bodies and the centralization of military cemeteries in France. Additional pay of 3s. per diem in the case of warrant and non-commissioned officers and 2s. 6d. in the case of other ranks was promised to these men for days when they were actually employed on exhumation duties. This attracted large numbers of applicants, 15,445 were actually enlisted, and though, owing to the difficulty of laying down physical standards for duties which were not military, and the necessity, in order to avoid competition with ordinary recruiting, for refusing men eligible to join as regular soldiers, a certain number of unsuitable men were enlisted and have been discharged, the residue are, it is understood, carrying out their duties in a satisfactory manner.

In December, 1919, it was decided to re-open recruiting for garrison battalions, but this time under Army Order 238, each man signing a statement to the effect that although enlisted for 1 year he realized he would not be retained that period, should his services be no longer required at an earlier date. These men were immediately on enlistment despatched to France and there distributed as required for garrison duties, volunteers being employed to keep exhumation units up to an establishment of 10,000 diggers. Recruiting for these battalions was closed on 11th February, 1920.

OTHER RECRUITING INSTRUCTIONS ISSUED DURING THE PERIOD.

Early in the year 1919 it was decided to accept recruits between the ages of 17 and 18 years on man's pay and on a normal engagement for the Cavalry and Infantry of the Line, provided they obtained their parents' consent to enlist, were willing to enlist for 9 years with the Colours and 3 years in the reserve, could pass the tests for physical fitness laid down for the corps selected and were in other respects fully qualified. The number of recruits so enlisted on 1st April, 1920, was 9,422.

In order that the Army might be in a better position in the future to provide and train its own tradesmen, and so to some extent be relieved of the necessity for enlisting

skilled tradesmen from civil life, it was decided during the latter half of 1919, in the case of certain of the technical corps, considerably to increase the number of boys allowed by Recruiting Regulations, 1912 (reprint 1914), paragraph 148, for training as artificers as follows :—

Royal Artillery raised from 182 to 450.

Royal Engineers raised from 72 to 420.

Tank Corps allotted 50.

Royal Army Service Corps (M.T.) allotted 500.

Royal Army Service Corps (H.T. and Supply) allotted 230.

Towards the end of July, 1919, returns began to arrive from Records showing that owing to their popularity, referred to above, several infantry regiments had taken so many short period recruits under Army Orders 4 and 124 of 1919, that with those taken from civil life they were already over the peace establishment of 1914. In such cases it became necessary to check recruiting by raising the standards and restricting the areas in which recruiting for these regiments was open. Subsequently, recruiting in various other infantry regiments was of necessity similarly checked, and recruiting for short periods under Army Order 155 of 1919 referred to above has been closed in such cases.

Owing to the difficulty of finding accommodation for the families of a large number of married men and the financial and other objections to the payment of separation and dependants' allowance on an unlimited scale, instructions were issued on 30th September, 1919, requiring War Office authority for the enlistment of any married man or man with dependants.

These measures were no doubt partly responsible for the falling off in the number of recruits raised which began to be apparent at the beginning of October, 1919. An instruction issued demanding that particular care should be taken to avoid the enlistment of men of poor physique or doubtful antecedents has no doubt also had a contributory effect.

In order further to reduce expenditure, an instruction was issued on 17th March, 1920, stopping the re-enlistment of married men under Army Order 155 of 1919.

About the middle of March, 1920, it was found necessary to check the flow of recruits to the Royal Horse and Royal Field Artillery. In order to avoid closing the branch of the Service to recruiting, each intending recruit is now subjected to a special educational test instead of raising the physical standards, which are already high. The results of this experiment are not yet apparent.

RECRUITING ADVERTISEMENTS.

It was decided during June, 1919, to commence a pictorial poster campaign, and orders were given for some 20 different designs by well-known poster artists embodying all branches of the service. A general distribution of these posters was made throughout the country, and some 300,000 posters were sent out through Commands, Chief Recruiting Staff Officer, London, Railway Companies, General Post Office, and Messrs. Thomas Warden and Co., with whom a contract was arranged for a 2 months' general hoarding display. This contract was extended for 1 month, and a fresh contract covering 6,500 double crowns was entered into to cover Ireland for 2 months. Lantern slides of these posters have been produced and are being shown throughout the Cinema Theatres in London and the Provinces.

The results which are ascribed to this poster campaign proved eminently satisfactory and a similar campaign was inaugurated in January, 1920, with the special object of raising recruits for the Foot Guards, Royal Engineers, Royal Army Service Corps, Royal Army Medical Corps and Royal Army Ordnance Corps, which has been extended to run until the end of April, 1920. A general advertising campaign was also started in the Press, which continued until the end of February, 1920.

TERRITORIAL ARMY.

The Secretary of State for War having publicly announced on 30th January, 1920, that recruiting for the reconstructed Territorial Army would commence on 16th February, 1920, recruiting was accordingly opened on that date. The total number of recruits raised during February and March was 5,002; this small number was attributed to the fact that in many units commanding officers, permanent staffs and other officers, had not yet been posted or appointed, and that units were unable to commence a serious recruiting campaign until they were in proper working order. Representations have been received pointing out that men will not come forward for enlistment until they know what officers they are to serve under, company officers as well as commanding officers, and bearing in mind the fact that sentiment plays a very important part in connection with the Territorial Army, this can be readily understood.

(a.) OTHER RANKS SERVING ON NORMAL ENGAGEMENTS.

RETURN of Warrant Officers, Non-commissioned Officers and Men serving on normal engagements on 31st March, 1919, with one or more years further Colour Service to complete. (All arms included.)

SECTION 8.

RECRUITING FOR OVERSEAS GARRISONS AND RESERVES AT HOME.

ARMY ORDER 4—10TH DECEMBER, 1918.

IV.—Provision of "other ranks" for Overseas Garrisons and Reserves at Home.—1. In order to provide the men for overseas garrisons and the necessary reserves at home, it has been decided that soldiers may re-enlist for service in the various arms for periods of approximately 2, 3 and 4 years respectively from date of re-enlistment, the object being to obtain equal numbers in these three classes. The conditions, terms, &c., under which men may re-enlist are notified herein for the information of all ranks.

2. Men eligible to re-enlist—

- (a) Men serving on "duration of war" engagements.
- (b) Men serving on regular normal engagements whose term of colour service has expired, or is due to expire before 1st April, 1919.
- (c) Men of the Special Reserve and Territorial Force.

3. Periods of service.—Men will be required to re-enlist for one of the following periods:—

- (a) From date of re-enlistment to 31st March, 1921.
- (b) From date of re-enlistment to 31st March, 1922.
- (c) From date of re-enlistment to 31st March, 1923.

4. Qualifications—

- (a) Must be of categories A or *B (i), as laid down in A.C.I. 1606 of 1917, as amended by A.C.I. 282 of 1918.
- (b) Must, on re-enlistment, be not under the age of 19 or over the age of 35.

5. Conditions.—

- (a) Re-enlistment will be for service in the following arms of the service only:—

Household Cavalry.
Cavalry of the Line.
Royal Artillery.
Royal Engineers.
Foot Guards.
Infantry of the Line.
Machine-Gun Corps.
Tank Corps.
Royal Army Service Corps.
Royal Army Medical Corps.
Royal Army Ordnance Corps.
Royal Army Veterinary Corps.
Army Pay Corps.
Military Provost Staff Corps.
Corps of Military Police.

- (b) (i) Men serving on a regular normal engagement will on re-enlistment resume their existing substantive rank and seniority.
- (ii) Subject to (c) below, men serving on any engagement other than a regular normal engagement will retain their existing substantive rank provided that such rank is not above that of serjeant (or its equivalent), with the following exception:—

If such men re-enlist into the Royal Engineers, Royal Army Service Corps, Royal Army Medical Corps, Royal Army Ordnance Corps, Royal Army Veterinary Corps, Army Pay Corps, Military Provost Staff Corps, and Corps of Military Police, they can only be accepted in the rank of private (or its equivalent).

- (iii) Men serving on any engagement other than a regular normal engagement, if holding substantive rank above that of serjeant may only be accepted provided they are willing to revert to the rank of serjeant, and subject to the provisions of (ii) above.
- (iv) Any warrant or non-commissioned officer who cannot be accepted under (ii) or (iii) above may elect to revert to a rank lower than serjeant on signing a statement that he is willing to do so.

- (c) Subject to the conditions set out in this Army Order men may only re-enlist in their present arm, except that:—

- (i) A man belonging to a corps not referred to in sub-paragraph (a) may re-enlist in any of the arms or branches of the service specified in that sub-paragraph for which he is considered generally suitable.
- (ii) A man who has previously served in an arm or branch of the service other than that to which he now belongs may, should he so wish, re-enlist in such arm or branch of the service, provided it is one of those specified in sub-paragraph (a), and that he is generally suitable.
- (iii) A man serving on a regular normal engagement who elects to re-enlist under sub-paragraph (c) (ii) into one of the corps mentioned in sub-paragraph (b) (ii) may so re-enlist, provided that he is willing, if holding substantive warrant or non-commissioned rank, to revert to the place on the corps roster which he would have held had his transfer from that corps not been affected.

- (d) A man re-enlisting in one of the arms or branches of the service mentioned in sub-paragraph (a) will not be liable subsequently to be transferred from that arm or branch of the service to another without his consent. He will, however, should the exigencies of the service require, be liable to transfer at the discretion of the military authorities within that arm or branch of the service.

- (e) Acceptance for re-enlistment will be subject to the following limitations:—

- (i) The man, in the opinion of the approving officer, must be an efficient soldier in the rank and capacity in which he is to serve on re-enlistment.
- (ii) The numbers* that can be accepted in ranks of or above that of serjeant must necessarily be limited, as it must be in proportion to the number of rank and file re-enlisting.
- (iii) The numbers* (including the various classes of tradesmen) re-enlisting in any one arm or branch of the service will be limited by the requirements of that arm or branch.
- (iv) The numbers* re-enlisting for each of the three periods referred to in paragraph 3 must be approximately equal.

- (f) The above conditions will not prejudice the position of men who may desire at the termination of this new enlistment to remain in the service for the purpose of qualifying for pension, and who would under regulations now existing have had a claim to re-engage if they had continued to serve on their present attestations instead of re-enlisting.

6. Terms.—

- (a) Pay.—The ordinary rates of pay of the corps into which a man re-enlists laid down in the Royal Warrant for Pay, &c., and increased by Army Order 1 of 1918 will (subject to (b) below) continue in force for periods of re-enlistment, but special rates such as those authorized for wheelers, saddlers, motor drivers, clerks, &c., under Army Order 263 of 1914 and subsequent similar regulations, will not be continued after re-enlistment.
- (b) Service after the date yet to be fixed by Order in Council as that of the termination of the war will not count for increased war pay under Article 3 of Army Order 1 of 1918.

* Amended by Army Order 15 of 1919.

* Limitations as regards these numbers will be notified to those concerned in due course.

Recruiting for Overseas Garrisons and Reserves at Home.

(c) The rates of separation and dependants' allowance (including special parents allowance) now in force will be continued in the case of men in respect of whom they are issuable at the date of this Army Order.

(d) *Bounties*.—In addition to any pension, bounties,* or gratuity to which men may be entitled on account of war or other service, special bounties at the following rates will be given to men re-enlisting for one of the three periods laid down in paragraph 3, provided they so re-enlist before 1st February, 1919 (re-enlistments subsequent to 31st January, 1919, will be subject to a *pro rata* reduction in bounty which will be notified later).

Each instalment of bounty will only be payable provided the man is still serving with the colours on the date on which such instalment becomes due. Should he become non-effective for causes other than misconduct, before the date on which an instalment becomes due, he will receive a proportion only of that instalment.

Men re-enlisting for service up to 31st March, 1921.
Three sums each of 6*l.* 13*s.* 4*d.*

The 1st payable on re-enlistment.
The 2nd payable on 31st March, 1920.
The 3rd payable on 31st March, 1921.

Total, 20*l.*

Men re-enlisting for service up to 31st March, 1922.
Four sums each of 10*l.*

The 1st payable on re-enlistment.
The 2nd payable on 31st March, 1920.
The 3rd payable on 31st March, 1921.
The 4th payable on 31st March, 1922.

Total, 40*l.*

Men re-enlisting for service up to 31st March, 1923.
Five sums each of 10*l.*

The 1st payable on re-enlistment.
The 2nd payable on 31st March, 1920.
The 3rd payable on 31st March, 1921.
The 4th payable on 31st March, 1922.
The 5th payable on 31st March, 1923.

Total, 50*l.*

* No bounty under Army Order 209 of 1916 or 222 of 1918 will be payable to any man re-enlisting under this Army Order, whose current engagement (including the extra year under Section 87 (1) of the Army Act, and Section IX. (5) of the Territorial and Reserve Forces Act) has not expired prior to the date of such re-enlistment.

† A man when finally discharged will receive such gratuity as may be due to him under Article 1117, Royal Warrant for Pay, &c. He will not, however, receive a gratuity under that Article when discharged from his previous engagement for re-enlistment under the provisions of this Army Order.

(e) *Special furlough* to the United Kingdom will be granted to men re-enlisting for one of the periods laid down in paragraph 3 as follows:—

Men re-enlisting for service up to 31st March, 1921—
2 calendar months.

Men re-enlisting for service up to 31st March, 1922—
3 calendar months.

Men re-enlisting for service up to 31st March, 1923—
3 calendar months.

This furlough will in the case of men coming from abroad commence from the date of passing through the dispersal station. On the expiration of the furlough, namely, 2 months or 3 months as the case may be, a man will rejoin for duty at a station in the United Kingdom in accordance with instructions which he will receive before proceeding on furlough.

This furlough will be given as soon after re-enlistment as the exigencies of the service permit, but in the case of men going to overseas garrisons, it will in any circumstances be given before they proceed to such garrisons.

(f) A limited number of married men may be accepted, but passages will only be provided for their families (as defined for passage purpose in the Allowance Regulations) up to the maximum number for which accommodation can be made available in the various foreign garrisons. The privilege of passage for a family cannot be commuted for a money bounty.

Separation allowance or passages to and from foreign garrisons can only be given to the families of such men as are married at the date of this Army Order.

7. A man re-enlisting under this Army Order will be automatically discharged as from the day prior to re-enlistment, and will in due course receive a certificate of discharge from his present engagement.

As explained in paragraph 5 (f) above, this discharge in no way prejudices a man's position as regards pension, and discharge with a view to re-enlistment under this Army Order will not be held to constitute a break in service for pension.

8. In any case where there would remain uncompleted, at the termination of the period of re-enlistment, any portion of a man's present engagement, a man re-enlisting under this Army Order will be allowed, if he so desires, to enlist into the Army Reserve to complete such period.

9. A man who re-enlists under this Army Order will not be allowed to purchase his discharge during the period for which he has so re-enlisted.

10. Special forms of Attestation and Notice papers have been approved and will be issued to all concerned.

11. This Army Order does not apply to soldiers serving in India, in regard to whom separate instructions will be issued.

NOTE.—Re-enlistments were actually closed on 31st October, 1919.

PART VI.

REMOUNTS.*

SECTION 1.

PEACE, WAR, AND INTERIM ESTABLISHMENTS.

	Animals.	Officers.	Non-commissioned officers and other ranks.
Strength in August, 1914	25,000	121	230
" " 1915	534,951	366	16,294
" " 1916	789,135	406	18,373
" " 1917	869,931	423	20,560
" " 1918	828,360	450	19,488
" " 1919	210,090	258	6,731
Strength on 31st March, 1920	110,708	182	635

On mobilization, the establishment of the Army was raised to 165,000 horses, and these were purchased by impressment within 12 days, after which purchase by these means practically ceased.

In order to supplement the reserves of horses and make good wastage, buying was continued in the open market, and Purchasing Commissions were sent to Canada, North and South America, consisting largely of country gentlemen, large landowners, and competent masters of hounds, and a withdrawal of officers from military duties was thus avoided.

On 11th November, 1918, when shipping ceased, the Canadian Commission had shipped from North America 428,608 horses and 275,097 mules. On 31st March, 1920, purchases in the United Kingdom reached the total of 468,323. South America had supplied 6,000 horses and 1,500 mules, these latter being sent to supplement the supply in East Africa.

3,700 mules were also obtained from Spain and Portugal.

The chief remount depôts for horses were situated near the ports of Bristol, Liverpool, and Southampton, where, during active operations, the animals remained under veterinary observation for about 3 weeks, when they were distributed to the Reserve Cavalry regiments, Artillery Brigades, and the smaller remount depôts to be conditioned and trained previous to their transfer to the base remount depôts abroad.

Before the war, the remount accommodation in the United Kingdom was for some 1,200 horses; at one period it rose to 60,000 and is now under 6,000.

During active operations the remount depôts in France were being kept up to an establishment of 16,000 to 17,000 animals. The depôts in Egypt and Salonica were originally chiefly supplied with horses direct from Australia, and with mules from North America. Owing to difficulties of transportation, shipment of horses to Egypt from Australia was stopped, and later all direct shipment of animals from America to the Mediterranean was stopped. Hence the supply to Egypt and Salonica had to be provided through the United Kingdom and France, which necessitated an increase in depôt accommodation in the latter country. In Mesopotamia the supply of animals was arranged for by the Indian Government. The demands of East Africa were met by the Union Government of South Africa, with the exception of a small reinforcement of mules from Buenos Ayres.

Since the conclusion of the Armistice the remount service in all theatres has been gradually reduced, animals of all classes have been sold in all theatres of war, and 94,686 have been repatriated from France and Flanders and the Rhine for the Army at home and for sale in Great Britain. Surplus animals have been shipped to India from Egypt and Mesopotamia to supply India's Peace requirements. Marseilles has been used as a sale depôt for horses from Egypt.

* See also p. 861.

There is a Remount Dépôt at Cologne holding the reserve for the Army of the Rhine.

Animals have been disposed of for work and for meat as follows :—

		Number sold for work.	Number sold for meat.
United Kingdom, 11th November, 1918, to 31st March, 1920	...	132,649	6,247
France and Flanders	" " " "	197,181	40,638
All other theatres	" " " "	169,331	14,347

The following is a comparison of the wastage of horses in the French and English Armies, 1st October, 1917 :—

		Died, destroyed, killed, missing.	Cast.	Total loss.
French Army in France	376,201	165,513	541,714
British Army in France and in England	...	225,856	30,348	256,204

The proportion of castings to deaths in the French Army is 1 cast to 1·7 dead ; in the English Army it is 1 cast to 7 dead.

Wastage during the South African war worked out at 7·8 per cent. a month.

The estimated expenditure up to 31st March, 1920, was 67,505,000*l*.

The number of *riding* horses purchased in United Kingdom from the date of mobilization to 31st December, 1918, is as follows :—

1st, Mobilization period (5th August, 1914, to 16th August, 1914, inclusive)	49,131
2nd, Completion of mobilization period to 31st March, 1915	...	57,271
3rd, 1st April, 1915, to 31st March, 1916	21,337

6th, 1st April, 1918, to 31st December, 1918	15,697
Total	<u>174,665</u>

SECTION 2.

DEMobilIZATION.

The disposal of animals surplus on demobilization was carried out as follows:—

All horses and mules were grouped—

- A. Group.—Practically sound, 5 to 8 years.
- B. „ —Practically sound, 9 to 12 years.
- C. „ —Unsound, but fit for work, or over 12 years.
- D. „ —Unfit for work, to be destroyed.

Units retained in the Armies of Occupation and at home were completed with first choice horses from Groups A. and B. Surplus horses in the United Kingdom are being sold as they become available.

All surplus horses on the Rhine were disposed of. The few remaining horses in France were sold as they became surplus.

The Board of Agriculture and Fisheries were strongly opposed to the repatriation of animals from any theatre of war except France, and the animals in Egypt and Mesopotamia were therefore disposed of locally. All surplus animals in Italy and Black Sea were sold.

The Commander-in-Chief, India, arranged the demobilization of the troops in Mesopotamia, by withdrawing certain units to India completely horsed, and disposing of animals surplus to the Army of Occupation to meet the needs of the inhabitants.

Animals in East Africa were disposed of locally as fear of infectious diseases debarred them from entry to other countries.

SECTION 3.

LOSSES AT SEA.

RETURN OF LOSSES AT SEA AMONGST ANIMALS SHIPPED FROM NORTH AMERICA TO THE UNITED KINGDOM AND OTHER COUNTRIES DURING 1914—18, COMPARED WITH LOSSES AMONGST ANIMALS SHIPPED FROM NORTH AMERICA TO SOUTH AFRICA DURING 1899—1902.

To the United Kingdom and other Countries.

Year.	Shipped.		Lost at sea.		Percentage lost.	
	Horses.	Mules.	Horses.	Mules.	Horses.	Mules.
1914	35,146	5,928	626	20	1·78	0·03
1915 ^A	197,792	114,830	3,865	2,819	1·95	2·45
1916 ^B	53,437	74,289	699	252	1·30	0·33
1917 ^C	94,035	60,329	3,318	451	3·52	0·07
1918 ^D (to end of December)	48,198	19,721	1,248	426	2·58	2·16

To South Africa.

1899	9,074	..	375	..	4·13
1900	25,845	37,949	1,137	1,475	4·40	3·88
1901	63,680	23,052	2,044	375	3·21	1·63
1902	28,070	10,450	613	55	2·11	0·52

^A Includes 834 horses sunk, 1,399 mules sunk, 26 horses killed by shell fire, 23 mules killed by shell fire.

^B Includes 300 horses sunk.

^C Includes 2,732 horses sunk, 200 mules sunk, 14 mules killed by shell fire.

^D Includes 881 horses sunk, 258 mules sunk.

SECTION 2.

DEVELOPMENT OF MUNITIONS SUPPLY.

I.—BEFORE THE FORMATION OF THE MINISTRY OF MUNITIONS.

The subjoined statement is based upon an extract from a Memorandum circulated to the Cabinet by the late Lord Kitchener at the beginning of June, 1915, to inform the members of the new Coalition Government as to the course of War Office administration since the outbreak of hostilities. It has been amplified and annotated in order to make the information more complete.*

(a.) Guns and Ammunition.

On 4th August, 1914, the following provision of guns and ammunition for the Expeditionary Force had been made in accordance with War Establishments and the modified Mowatt Reserve :—

Nature of guns.	Number of guns.	Rounds a gun.	Total rounds.
13-pr... ..	30	1,900	57,000
18-pr... ..	324	1,500	486,000
4·5-inch howitzer	108	1,200	129,000
60-pr... ..	24	1,000	24,000
Total	486	..	696,000

Provision was also to be made for an additional 500 rounds a gun and 400 rounds a howitzer by the end of 6 months.

During the retreat on Paris large numbers of guns, rifles and ammunition were lost, and the difficulty not only in meeting these losses, but in providing for the unprecedented and uncalculated expenditure of ammunition which the war introduced, at once caused great anxiety. The War Office was at this time in close communication with the French on the subject of the amount of ammunition required.

Both France and Germany had high-explosive shell for their field guns but the British Army had not adopted this type. Early in September, however, the War Office took up the question of a design of shell of this nature. On 22nd October, General Deville, head of the French Ordnance, came over at our invitation to discuss the whole situation, not only as regards the amount of ammunition necessary to meet

* The following dates are worthy of record :—

Mr. Wintour became Director of Contracts, 6th September, 1914.

The Cabinet Committee on Munitions first met on 12th October, 1914.

Sir George Gibb was appointed to supervise contracts as an additional Member of the Army Council, 28th December, 1914.

The High Explosives Department, under Lord Moulton, was formed in January, 1915.

The Master-General of the Ordnance took over contract business relating to warlike stores, January, 1915.

Messrs. Morgan and Grenfell were appointed agents for the purchase of munitions, &c., in the U.S.A., 15th January, 1915.

Mr. George Booth was appointed to deal with the Defence of the Realm Act (Amendment) relating to the control of factories, labour, &c., March, 1915.

Sir Percy Girouard was appointed to co-operate with Mr. Booth, April, 1915.

A Treasury Committee, composed of Mr. Lloyd George, Mr. Balfour, Mr. Montagu, Mr. Henderson and representatives of the Admiralty, War Office and Board of Trade, was formed to deal with increase of output of munitions and the supply of labour, 8th April, 1915.

The Ministry of Munitions was formed on 5th June, 1915.

expenditure but also its nature; and the subject of H.E. shell for field guns as well as the fuze to be employed, the pattern of the shell, and the nature of the filling was closely discussed between us. General Headquarters in France were consulted as to their wishes regarding this nature of shell, and replies were received indicating that opinions were divided, but that they considered it desirable that some H.E. should be provided if this could be done without interfering with the supply of shrapnel. On 19th October the first 1,000 rounds of 18-pr. H.E. shell were sent to France for trial and report, and steps were taken to proceed with further manufacture. On 6th November a favourable report was received on the shells sent out for trial, and we were asked by General Headquarters to supply in future, and as soon as we could procure it, 50 per cent. of shrapnel and 50 per cent. of H.E. for the 18-pr. and 13-pr. guns. A week later a telegram was received asking that the proportion of H.E. should be 25 per cent. and not 50 per cent.

At this stage it was for consideration whether machinery employed in producing the 18-pr. shrapnel, which was so urgently required, should be stopped and turned on instead to H.E. shell. The adoption of this course would not have produced any H.E. shell for 10 weeks or more; and during this period the provision of the absolutely necessary amount of ammunition for the field guns would have been seriously imperilled, just when Sir John French was pressing for every round. The expenditure of 18-pr. ammunition up to 1st November was 385,000 rounds, while our supply from manufacture was at that date approximately 45,000 a month. A stoppage of the supply of shrapnel would, it was thought, have seriously affected the safety of the troops in the field, for a large proportion of our machinery would thus have been placed out of work at the most critical period of the war, in order later to have an article which no doubt would have been somewhat better for certain purposes than the shrapnel shell then being provided.

Additional instead of substituted orders were, therefore, at once placed not only with the experienced armament firms but also with new firms not previously engaged in this nature of manufacture, as well as in Canada and America. It may be pointed out that if the promises of delivery made by all these firms when the contracts were placed had been fulfilled there should have been received by 15th May, 1915, 481,500—18-pr. H.E. shells, instead of which only 52,400 were delivered. The causes of the delay were the same as those which have been instrumental in making all our manufacturers behindhand in the fulfilment of their contracts. It must be remembered that the manufacture of armament and munitions of war is a highly specialized industry, and the resources of the nation devoted to such supplies were very circumscribed; any attempts, therefore, to expand suddenly must be fraught with unexpected difficulties and disappointments.

It had been asserted that it is only by the use of H.E. shell that wire entanglements could be cleared. In January, 1915, trials were carried out by Sir John French's direction by our troops in Flanders, and the report showed that rather more effect was obtained with 18-pr. shrapnel than with H.E.; but both were very effective, and at Neuve Chapelle the good results expected from shrapnel were fully realized. The Germans apparently noted this, and, it is understood, either put up walls in front of their wire entanglements to catch the bullets, or put them in pits; hence the call for H.E. shell to clear wire entanglements.

To return to the general question of war material. The whole matter of supply of munitions of war was very fully gone into from the first and by October, 1914, orders had been given for as much as possible in this country, while Canada and America were called upon to assist in providing the extraordinary amount of guns and ammunition which events had proved would be required. In the middle of October a Committee of the Cabinet was formed to assist the War Office, consisting of the Secretary of State for War (Lord Kitchener), the Lord Chancellor (Lord Haldane), the Chancellor of the Exchequer (Mr. Lloyd George), the First Lord of the Admiralty (Mr. Churchill), the Home Secretary (Mr. McKenna), the President of the Board of Trade (Mr. Runciman), and the President of the Board of Agriculture (Lord Lucas). It was due to this Committee which first met on 12th October that many difficulties were overcome, and further orders were placed in this country as well as in America.

During the early stages of the war other developments became apparent, such as the great value of guns and howitzers of heavier natures than had been previously

taken into the field. The provision of these was at once taken up, and orders were also placed for 3,500—18-pr. guns, 650—4·5-inch howitzers, and 168—60-pr. guns, which, when delivered, would bring our total number of guns available for the field up to about 6,000.

The estimates for orders in the early stages of the war to supply munitions for the Army were in the first place based upon an establishment in the field of 1,100,000 men, with a proper proportion of artillery, though on a scale of guns slightly reduced from what was previously considered advisable, and General Deville's strong recommendation confirmed the War Office in the belief that for future reinforcements they were right in reducing the batteries from 6 to 4 guns,* although by the increase of batteries in a brigade from 3 to 4, the total reduction of guns in a brigade was only 2.

It may here be noted that on 1st April, 1915, there were in France 122—13-pr. guns, 625—18-pr. guns and 116—4·5-inch howitzers. The position with regard to the number of guns in possession and the orders and deliveries of guns at the end of May, 1915, is shown in the subjoined table :—

NOTE.—See next page.

* 18-pr. batteries were restored to the 6 gun basis (November, 1916).

NOTE.—This represents a total of 7,253 guns, as compared with the 486 of the Expeditionary Force.

The position on 1st July, 1915, was that the manufacturers had hoped to be able to deliver 2,148—18-pr., 530—4·5-inch howitzers and 96—60-pr., but had actually delivered 803—18-pr., 165—4·5-inch howitzers and 37—60-pr.

In regard to gun ammunition, if the promises made to the Cabinet Committee had been carried out, even with a small delay, there would have been available at the end of May, 1915, a number considerably in excess of the 17 rounds a gun a day that Sir John French and General Joffre decided to be the amount that they required. As it was, at the end of 6 months 1,500,000 rounds had been sent out, at the end of 12 months 4,250,000, and at the end of 16 months 8,000,000.

The method of dealing with these large requirements was very fully considered, and it was decided by the Cabinet Committee that in the first instance it was best to place orders with the usual armament firms to the extent of which their managers thought them to be capable. This procedure was most necessary especially in connection with the fuzes, in order that the requisite supervising staff with its experience should be not only fully utilized, but utilized to the best advantage. This having been done, further orders were given for the components of ammunition to such other firms as had works which were considered capable of undertaking them, and financial assistance was afforded to them for providing the necessary plant.

The necessity of organizing all the trade resources for supplying our wants was fully recognized at this period, but it was considered that instead of attempting to organize centrally from the War Office it was more advisable that the main orders should be given to the Ordnance Factories and the large armament firms, and that they should themselves organize, expand and sub-contract to supplement what they could do with their own existing buildings and machinery, while advantage was taken of other developments which were found possible to augment the supply.

The orders thus placed in England involved the employment of some 2,500 to 3,000 firms in the production of munitions of war.

Those best able to judge were confident of being able to fulfil their promises, but they evidently miscalculated their powers and had not taken into full consideration the difficulties caused by shortage of labour, by delays in delivery of machinery, and by the restrictions of the Trades Unions and the limitation of output enforced by their local branches.

The patriotic enthusiasm which was swelling the ranks of the army also proved a very serious drain on the supply of both skilled and unskilled labour, and caused a serious set-back in manufacture. Steps were taken to cope with this deficiency of labour, and the Board of Trade co-operated with the War Office to provide as far as possible what was required, but found the difficulty greater than it had first appeared.

The ammunition ordered by the end of May amounted to a total for 18-pr. ammunition of approximately 30,000,000 rounds, and other natures in proportion.

It may be noted that during the first 6 months of the war the expenditure of gun and howitzer ammunition amounted to 1,000,000 rounds. During the next 3 months the expenditure reached a similar figure, including 610,000 rounds fired between 15th April to 15th May.*

Notwithstanding this expenditure, never during all this period did the number of rounds in France drop below that laid down to be carried in the Battery and in the Brigade, and in the Divisional Ammunition Column and Park (*e.g.*, for the 18-pr. 528 rounds a gun) except in the case of 4.5-inch howitzer, where for two short periods the number dropped slightly below the authorized amount, and once in the case of the 18-pr. guns.

The expenditure mentioned above shows the rapid increase which was caused principally and naturally by the large number of reinforcements in guns sent out to our Army in the field as well as by the active attempts to break through the German trenches.

The manufacture of 18-pr. ammunition was at the following rates:—

1914.

June and July (monthly average)	3,000
August	10,000
September	10,000
October	45,000
November...	45,000
December...	78,000

* It is interesting to recall that during the 33 months of the South African War only 273,000 rounds of gun ammunition of all natures were fired. The average weekly expenditure in France for the 4 weeks ending 5th November, 1916, approximated to 1,120,000 rounds a week.

1915.

January	93,000
February	128,000
March	194,000
April	225,000
May	400,000†

In May there were produced in three days the amount of ammunition usually produced in a year of peace.

The following tables illustrate the progress made :—

TABLE showing the ammunition of all natures provided during the early months of 1915.

Month, 1915.	18-pr.	13-pr.	4·5-inch.	60-pr.	4·7-inch.	6-inch Howitzer.	9·2-inch Howitzer.	Total.

16th May	628	497	242	739	369	182	184

It must be realised that, whereas other countries had merely to supply the additional requirements in ammunition caused by the peculiar nature of the war for the fixed establishment of a mobilized army, Great Britain on the contrary had in addition to deal with a vastly increased establishment, which had been caused by the creation of new units quite out of proportion to the previously existing army. Thus, whereas our power of production at the commencement of the war was a possible 10,000 to 15,000 rounds of gun ammunition a month, the French and Germans had the power to produce the ammunition required for the 4,000 and 8,000 guns with which their armies were respectively provided.

(b.) *High Explosives.*

It was not well known or understood that this country had enormous potential resources for the production of high explosives. These resources had hitherto been exploited for a large number of years by German-controlled firms in England, and we had bought from them what we required, and had thus left our enemy controlling the essential means of production in this country. Lord Moulton took up this subject with the greatest zeal and ability, and has achieved great success. The Germans had established at Rotterdam a factory for toluol, and the plant of this was purchased and

* Includes some heavy shell that were in store in England.

† By October, 1915, the number had risen to 1,014,812, which did not yet include any deliveries from the Ministry of Munitions.

set up in England. A great nitrate factory in Norway, which previously supplied the Germans with their requirements, was also purchased and devoted to the service of the Allies.

Lord Moulton not only provided explosives for our needs and prepared for our large additional requirements when our ammunition grew to large proportions, but he enabled us to give at various times to all the Allies, and notably France, sufficient explosives to enable them to continue the war. Though there were anxious moments, we were, by the end of May, 1915, practically out of the wood, and hoped to be able, even with our larger expenditure, still to help our Allies in this essential for the war.

(c.) *Propellants.*

On the declaration of war it was grasped at once that our cordite factories were insufficient to supply the demands of both the Admiralty and the War Office, and that the only way to provide the necessary quantity of propellant was to order the Trade, as well as our own Government Factory at Waltham Abbey, to put down more plant. The output of the new plant began towards the end of May, 1915, and gave us grounds for hope that we should not fail in the supply of ammunition on account of the propellant. Orders were, in addition, placed in America, while India and the Japanese Government undertook to render help.

Steps were also taken to order as much nitro-cellulose and ballistite as it was possible both to obtain and use, thus freeing the cordite either for the Navy or for those guns and howitzers with which the other propellants cannot be used. Lord Moulton undertook to construct a very large factory for the manufacture of propellants of a nitro-cellulose nature.

The cordite trade of this country, like the high-explosive trade, had for years been controlled by Germans, and early in September, 1914, most of the directors of that nationality withdrew their names from the various Boards.

(d.) *Poisonous Gas.*

Towards the end of April, 1915, the German employed poisonous gases, and the question of retaliatory measures was at once taken up. It was decided that immediate provision should be made for the use by our troops of gases which were no less harmful and deadly, but not much more so, than those employed by the enemy, and also that preparations for experiment with more deadly things should proceed with all speed. At the same time a quantity of liquid gas bombs was sent out for experiment. Meanwhile a large supply of asphyxiating and poisonous bombs of every description was expedited, and Sir John French was informed that 50 cylinders of gas to be used from our trenches would be sent out by the end of May. He did not, however, wish to operate with these machines until he could do so on a large scale. To do this a much larger number than 50 was necessary, and it was not expected that it would be possible before the end of June to supply the requisite number of 500.

A supply of shells containing irritant poisons was also arranged.

(e.) *Rifles and Small-Arm Ammunition.*

The rifle question has always been one which has caused the War Office the greatest anxiety, even more so than that of the production and supply of ammunition. We started the war with 750,000 rifles at a time when we were engaged in the introduction of the improved Mark VII. ammunition, which necessitated the re-sighting of the rifles with which it was used. The output of new rifles in England was in July, 1914, as normally, about 8,000 a month. Immediate steps were taken to increase largely the plant at our disposal, and the manufacture has steadily gone up. At the same time the re-sighting of rifles previously suitable for Mark VI. ammunition was going on on a large scale in our shops, while the repair of rifles damaged at the front was being carried out.

The losses in rifles during the war has been far greater than was at first contemplated and calculated for. All casualties have to be replaced by men fully equipped with rifles, and to this a very large proportion of the output of our shops had to be devoted, being thus not available for arming new troops. The hole in the bucket has been so large that, notwithstanding the production in this country, which from the

beginning of the war turned out either in repaired or new rifles a total of 475,000 by the end of May, 1915, the want of rifles left large numbers of the men training for the front still unequipped. In addition to the number mentioned, 250,000 long rifles were also re-sighted and issued.

The orders given at the beginning of the war outside our own usual peace factories had not yet materialized, as the rifle is the article of the soldier's equipment which takes the longest time to produce. These orders amounted to 3,860,000 rifles in addition to what we had at present; and it was hoped at the end of May, 1915, that the time was getting near when we might hope for the first productions from the American firms which had undertaken some of these large orders.

To meet the requirements of the defence of this country, we tried our utmost to buy rifles in all parts of the world of any description so long as they had a certain amount of ammunition available. These efforts, with the exception of 150,000 rifles from Japan, were practically or entirely abortive. No private firms, naturally, had large quantities of military rifles in their possession. These were all in the hands of Governments who, while prepared to part with their rifles, were met by German diplomatic threats, which in every case caused the neutral Power with whom we were dealing to withdraw from any negotiations and to withhold their rifles.

Small-arm ammunition gave us grave anxiety and at times our reserve was very low. We were obtaining, however, at the end of May, 1915, from 90 to 100 millions a month, while orders had been placed to raise this figure to 300 millions a month and even more.

The following is a comparison of the manufacture of rifles and small-arm ammunition before and during the earlier months of the war :—

(f.) *Rifles.*

Year.	New.	Repaired.	Total.
1912-13	103,000	81,000	184,000
1913-14	108,000	50,000	158,000
1914-15	418,000	491,000	909,000

Over 1,250,000 rifles were issued to the troops during 1914-15.

(g.) *Small-Arm Ammunition (in million rounds).*

Year.	Mark VI.	Mark VII.	Total.
1912-13	21	96	117
1913-14	3½	75	78½
1914-15	77	666	743

(h.) *Machine Guns.*

The scale of provision at the outbreak of war was, as in the case of the German Army, two for 1,000 men. This was raised in November, 1914, to four a unit, involving a provision of 2,214. Orders had been placed which should have given by July, 1915, 3,292 guns; on 10th July, however, Vickers had delivered 1,022 out of 1,792, and Lewis 621 out of 1,500 ordered, or a total of 1,643.

II

The following tables show the development of the output of munitions during the war.

NOTE.—Field guns, new pattern, include 13-pr., 18-pr., 4·5-inch howitzer.

Field guns, old pattern, include 15-pr., 5-inch howitzer.

Heavy guns, new pattern, include 60-pr., 6-inch 26-cwt. howitzer, 6-inch, 9·2-inch, 12-inch and 14-inch guns.

Heavy guns, old pattern, include 4·7-inch, 6-inch 30-cwt. howitzer.

SECTION 4.

GUNS LOST AND CAPTURED.

A.—FRANCE.

Guns Lost.

Before the battle of the Marne the records of our losses are incomplete. During the retreat from Mons many guns were abandoned, most of them probably in a damaged condition, but it cannot be definitely stated whether they were actually recovered by the enemy. The actual number of guns missing was as follows :—

13-pr.	7
18-pr.	68
4·5-inch howitzer	1
60-pr.	4
Total	80

Between the battle of the Marne and December, 1917, the only guns known to have been captured by the enemy were 4—4·7-inch guns belonging to the 2nd London Heavy Battery, which were lost during the second battle of Ypres, in May, 1915.

Guns lost between 2nd and 17th of December, 1917 :—

13-pr. A.A.	2
18-pr.	96
60-pr.	7
4·5-inch howitzers	15
6-inch howitzers, 30 cwt.	4
6-inch howitzers, 26 cwt.	44
9·2-inch howitzers	4
Total	172

Guns lost between 20th March and 7th July, 1918 :—

13-pr. R.H.A.	4
13-pr. A.A.	4
18-pr. Q.F.	524
60-pr. B.L.	63
6-inch guns	9
4·5-inch howitzers	154
6-inch howitzers	147
8-inch howitzers	39
9·2-inch howitzers	31
12-inch howitzers	6
Total	981*

Grand total ... 1,237

* Approximate.

The number of guns, machine guns, trench mortars, &c., captured and recovered by the British Expeditionary Force since the commencement of the war is as follows:—

Heavy Guns, Howitzers and Field Guns.

1914...	{ Captured	19
				{ Recovered	19
1915...	{ Captured	24
				{ Recovered	24
1916...	{ Captured	129
				{ Recovered	97
1917 to 2nd August, 1919...				{ Captured	2,565
				{ Recovered	2,537
<hr/>								
Total	{ Captured	2,737
				{ Recovered	2,677

Machine Guns.

Total up to 30th June, 1917	{ Captured	1,194
	{ Recovered	1,194
Remainder of 1917 to 31st July, 1919.	{ Captured	23,905
	{ Recovered	22,618
<hr/>					
Total	{ Captured	25,099
	{ Recovered	23,812

Trench Mortars, &c.

Total up to 30th June, 1917	{ Captured	576
	{ Recovered	576
Remainder of 1917 to 31st July, 1919.	{ Captured	3,498
	{ Recovered	3,273
<hr/>					
Total	{ Captured	4,074
	{ Recovered	3,849

Number of heavy guns, howitzers and field guns sent to England up to 31st July, 1919	2,437
Number of machine guns	23,624
Number of trench mortars, &c.	3,845

The above figures are summarised from returns rendered monthly by General Headquarters, France, showing in detail the number of guns, &c., captured, and the number actually recovered.

The delay in arriving at the exact total has been caused by the difficulty of verifying the reports and the recovery of some of the guns, &c.

B.—SALONICA.

Guns Lost.

18-pr.	8
Machine guns (Vickers)	11 (5 unserviceable).
Machine guns (Lewis)	13 (7 unserviceable).
Trench mortars	3 (one destroyed).

Guns Captured.

On 13th October, 1918, General Milne reported that since the offensive, which commenced on 15th September, the Allies captured over 800 guns.

C.—EAST AFRICA.

Guns Lost (British).

12-pr. Naval	2 (1 of which was recaptured).
3-pr. Naval	3
Machine guns	36 (6 of which were unserviceable).
Trench mortars	Nil.

A gun boat tug was captured from the enemy, recaptured by them, and finally captured by the Belgians.

Guns Lost (Belgian and Portuguese).

Heavy guns...	Nil.
Field guns, light guns and field howitzers	6
Machine guns	11
Trench mortars	Nil.

Guns Captured.

Heavy guns...	7
Heavy howitzers	Nil.
Field guns, light guns and field howitzers	36
Machine guns	54
Trench mortars	Nil.

One gunboat, 1 sea tug (60 tons), and 1 sea tug (24 tons) were captured, and 1 sea tug (24 tons) was destroyed.

D.—SOUTH-WEST AFRICA.

Guns Captured.

Q.F. guns	8	} Being used by South African Mounted Rifles.
Light field howitzers	4	
Mountain guns	6	
77 mm. field guns	16*	} Unserviceable.
57 mm. A.A. guns	3	
75 mm. mountain guns...	6	

E.—MESOPOTAMIA.

Guns Lost.

Machine guns	9 (2 since recaptured).
Field guns	1 (since recaptured).

Material destroyed in Kut El Amara :—

Heavy guns	10
Heavy howitzers	4
Field guns	21
† Machine guns	30

The Turks spent much time in salving these guns from the river, with the result that 21 field guns and 10 heavy guns were recaptured in Baghdad, whilst the remainder are probably still in the river, and there is every prospect of more being salvaged.

On the "Firefly" one heavy gun and two field guns were lost, which have since been recaptured.

* 4 sent home.

† Hotchkiss are included in machine guns.

Guns Captured from 1st July, 1916, to 1st October, 1917.

Heavy guns	22
Howitzers	6
Field guns	55
*Machine guns	52
Trench mortars	32
Cannon (of purely historical interest)†	62

Guns Captured during April, 1918.

Heavy guns	3
Field guns	10
Machine guns	64

Guns Captured during May, 1918.

Heavy guns	14
Mountain guns	2
Machine guns	26

Guns captured during October, 1918.

Heavy guns	} 50
Mountain guns	

F.—EGYPT AND PALESTINE.

In September, 1917, 2 German machine guns, 2 howitzers, 1 trench mortar and 55 rifles were captured.

General Allenby reported on 31st December, 1917, the capture of—

Guns	} with carriages	103
Howitzers		171
Machine guns	9,800
Rifles	

20,000,000 rounds of small-arm ammunition and over 58,000 rounds of gun and howitzer ammunition.

During April, 1918, 9—13-pr. guns, 6 cwt., R.H.A. were lost.

Between 1st January, 1918, and 8th August, 1918, 9 field guns, 1 trench gun, 1 pom-pom, 153 machine guns, 4,969 rifles and 13,800 rounds of ammunition have been reported as captured.

General Allenby reported on 8th October the capture since 18th September, 1918, of 350 guns, and a considerable stock of ammunition, together with the entire transport of the 7th and 8th Turkish Armies, and much railway rolling stock and material.

The following arms and ammunition were captured or found during September, 1918 : Guns, 349 ; machine guns, 509 ; rifles, 12,500 ; bayonets, 500 ; and large quantities of small-arm and gun ammunition.

The following arms and ammunition were captured or found during October, 1918 : Guns, 113 ; machine guns, 275 ; rifles, 1,300 ; large quantities of bayonets, gun and small-arm ammuniti .

* Hotchkiss are included in machine guns.

† Probably before 1st July, 1916.

PART VIII.

ROYAL AIR FORCE.

SECTION 1.

GROWTH OF THE ROYAL FLYING CORPS.

(a.) AUGUST, 1914, TO 31ST MAY, 1915.

The establishment of the Royal Flying Corps, sanctioned in the Estimates for 1914, was 165 officers and 1,264 other ranks.

At the outbreak of the war six squadrons were in process of formation, but all were under strength in aeroplanes and officers. On mobilization the available personnel and material went to mobilize four squadrons. These four squadrons took the field in August with 109 officers, 66 aeroplanes, and 95 mechanical transport vehicles, leaving behind them at home 38 officers, 113 aeroplanes and 23 mechanical transport vehicles. With the exception of about 20 at the Central Flying School nearly the whole of the aeroplanes at home were either worn out or unserviceable through accident.

At the outbreak of war, unfortunately, three of the standard Government designs of aeroplanes were in a state of transition; it had been decided to abandon the type in vogue for the past 2 years, and contractors had just received the drawings and specifications for orders of one of the new types. These orders were necessarily small as they had been placed under peace conditions; the designs and specifications were new to the contractors, who had not realized the difficulties of production, and the immediate placing of large orders was rendered difficult from the fact that, as only one experimental machine of this particular type had been flown before, it was possible that considerable modifications would be necessary after the first few machines then on order had been flown. The advantages accruing from the approved types, however, were so great that it was decided to push on with them in spite of the difficulties involved.

At the beginning of the war two contractors were building aeroplanes of Government design, four were building to private designs only, and two were building both. On 31st May, 1915, 23 contractors were building Government designed machines, five were dealing with private designs, and three more were producing both. Of the five which were building to private designs three were concentrated on one particularly good aeroplane. Since August, 1914, 530 aeroplanes were taken into the Service and about 300 were struck off as lost or worn out. On 31st May, 1915, orders for 2,260 aeroplanes were in progress, and of these 123 were delivered by that date.

The following figures show the position on 31st May, 1915:—

Aeroplanes available—

With squadrons abroad	156
With units at home	250
Under test at home	40
						— 446

Estimated deliveries—

June	90
July	120
August	170
						— 380
						— 826

The wastage from the beginning of the war up to 31st May, 1915, was about 10 per cent. per mensem.

NOTE.—On 1st April, 1918, the Royal Naval Air Service and the Royal Flying Corps were merged in the Royal Air Force, an arm of the Service separate from both the Navy and the Army. The change has been effected with a minimum of hindrance to the work of both services, which, in point of fact, have never reached a higher state of all-round efficiency than at present.

The outbreak of war found this country practically without an aeroplane engine industry. An engine competition for Government prizes was just concluding, but none of the competing firms had workshops thoroughly experienced or organized for rapid production. Consequently, during the first six months of the war, we had to rely entirely on France for our engine supply. On mobilization, orders were placed in England for French-designed engines and for British engines of both Government and private design. These orders were divided amongst 12 contractors, four of whom were manufacturing to Government designs only, five to private and French designs, and three were producing both Government and other designs. On 31st May, 1915, 2,953 engines were on order in England, of which 141 had been delivered.

In the manufacture of both aeroplanes and engines it was very difficult to get work done, owing to the very high specifications and small limits demanded in aviation work, and from the fact that few firms who understood anything about aeroplane manufacture had ever had sufficiently large orders during peace to enable them to organize for rapid production. Many firms have since been induced to assist, and on 31st May, 1915, 191 contractors were working direct for the Military Aeronautics Directorate in the manufacture of aviation equipment, whilst 721 sub-contractors were also employed on aviation work.

The mechanical transport required for the Royal Flying Corps also increased considerably. In May, 1915, there were 351 Royal Flying Corps mechanical transport vehicles with the Expeditionary Force, 370 at home, and 640 were on order.

From the beginning of the war applications for commissions in the Royal Flying Corps were very numerous, and there was in May, 1915, a waiting list of 500.

Instruction, during the first six months of the war, was much hampered by the paucity of experienced pilots available at home to act as instructors and by the shortage of serviceable aeroplanes, but matters improved considerably. In August, 1914, the Central Flying School provided accommodation for 20 military pupils, and was our only source of supply. On 31st May, 1915, training in flying was being carried out at 11 different stations, and 215 pilots and 19 observers were actually under instruction.

From August, 1914, to May, 1915, the Central Flying School turned out 109 finished military pilots, whilst 34 were trained at other stations. During the same period 153 officers gained the Aero Club certificate (the first step in the training of a pilot) at various stations. On 31st May, 1915, there were 213 officers, including 74 observers, serving with the Royal Air Force abroad, and 137 officers, in addition to those under instruction, were serving in various capacities at home.

Up to 31st May, 1915, the following casualties occurred:—

	Killed.	Wounded.	Prisoners and interned.	Sick (including accidents).
Officers of the Royal Flying Corps	20	16	12	41
Officers attached to the Royal Flying Corps for instruction as observers	10	8	6	21
Total	30	24	18	62

Casualties continued to increase, owing to the improved efficiency of hostile anti-aircraft guns.

The strength of the Royal Flying Corps on 31st May, 1915, had risen from 11 warrant officers and 1,086 other ranks to 33 warrant officers and 5,114 other ranks at home and abroad.

Eighteen service squadrons and five reserve squadrons had already been formed, and three more service squadrons were in course of formation.

Recruiting for the corps was brisk from the very commencement, but only the most carefully selected men were enlisted.

An increase in the number of Royal Flying Corps stations soon became necessary. In August, 1914, beyond the Central Flying School at Upavon, only four stations were in occupation, at which accommodation for a total of five squadrons existed. In May, 1915, 10 stations besides the Central Flying School were occupied, and shed accommodation for 14 squadrons was erected. Five more stations were under preparation, giving accommodation for seven more squadrons.

(b.) 1ST JUNE, 1915, TO 30TH SEPTEMBER, 1916.

Between 12th June, 1915, and 12th June, 1916, 2,568 aeroplanes were taken into service, and 1,427 were struck off.

Between 12th June, 1916, and 29th September, 1916, 1,725 were taken into service, and 1,195 struck off.

The number of military aeroplanes in existence on 31st May, 1916, was 713 abroad and 1,230 at home, whilst 25 machines were under test. On 29th September there were 1,035 abroad, 1,677 at home, and 30 under test.

The approximate percentage of wastage from 12th June 1915, to 12th June, 1916, was 47·7 per cent., and from 12th June, 1916, to 29th September, 1916, 64·6 per cent.

There were 1,921 mechanical transport vehicles with the Expeditionary Force on 12th June, 1916, and 1,445 at home. On 29th September, 1916, there were 2,267 abroad and 2,804 at home.

400 vehicles a month were on order on 12th June, 1916, and on 29th September, 1916, 713 a month.

On 31st May, 1916, 15 contractors were building aeroplanes of Government designs, 15 were building private designs, and three were building both; whilst on 29th September, 1916, 15 were building Government designs, 19 private designs, and three were building both.

On 31st May, 1916, 53 contractors were working direct on spares for aeroplanes, and 182 on miscellaneous work.

On 29th September, 1916, 87 were working direct on spares for aeroplanes and 216 on miscellaneous work.

On 31st May, 1916, orders for 8,403 aeroplanes were in progress, of which 2,970 had been delivered.

On the same date orders for 9,962 aeroplane engines were in progress, and of these 2,412 had been delivered.

On 29th September, 1916, orders for 11,345 aeroplanes were in progress, of which 5,011 had been delivered.

On the same date orders for 14,755 aeroplane engines were in progress, and of these 4,012 had been delivered.

The anticipated deliveries were :—

Month.	Aeroplanes.	Engines.
October, 1916	629	372
November, 1916.. .. .	636	348
December, 1916.. .. .	659	437

On 31st May, 1916, there were 15 Training Stations in existence for the accommodation of one or more squadrons and 10 under construction. On 29th September, 1916, 22 were in existence and 12 under construction.

On 31st May, 1916, there were 22 stations at which squadrons were stationed, either in huts or billets, or under canvas, and on 29th September there were 28.

There was shed accommodation for 20 squadrons on 31st May, 1916, and 32 squadrons on 29th September.

178 officers and 15 men were under instruction at the various flying schools on 31st May, 1916, whilst 909 officers and 54 men were under instruction on 29th September, 1916. There were in addition on 29th September 142 equipment officers and 200 cadets under instruction. These officers did not include the Balloon Training Wing, which had 18 officers under training on 31st May, and 87 on 29th September.

123 pilots graduated at the Central Flying School between 18th June, 1916, and 29th September, 1916, and 829 graduated at other stations.

About 200 pilots were on the waiting list on 12th June, 1916, and the same number on 29th September.

The number of officers serving overseas on 31st May, 1916, was 1,161, and the number at home was 1,457. On 29th September, 1916, 1,639 were serving overseas and 3,528 at home, and there were at home and abroad 42,482 other ranks.

On 29th September, 1916, there were 64 Service Squadrons and 33 Reserve Squadrons already formed, and three Service Squadrons and 20 Reserve Squadrons forming.

(c.) 1ST OCTOBER, 1916, TO 28TH FEBRUARY, 1917.

(A.)

Between 29th September, 1916, and 1st March, 1917, 2,844 aeroplanes were taken into service, and 1,425 were struck off.

On 1st March, 1917, the number of military aeroplanes in existence was 1,614 abroad and 2,799 at home.

The approximate percentage of wastage from 29th September, 1916, to 1st March, 1917, was 7.82 per cent. per month.

There were 2,932 mechanical transport vehicles with the Expeditionary Force on 1st March, 1917, 535 at other places abroad, and 3,518 at home.

662 vehicles a month were on order on 1st March, 1917.

On 1st March, 1917, 18 contractors were building aeroplanes of Government designs, 23 were building private designs, and 8 were building both.

On 1st March, 1917, 87 contractors were working direct on spares for aeroplanes, and 255 on miscellaneous work.

On 1st March, 1917, orders for 11,013 aeroplanes were in progress, of which 7,782 had been delivered.

On the same date, orders for 20,078 aeroplane engines were in progress, of which 6,505 had been delivered.

The anticipated deliveries were:—

Month.	Aeroplanes.	Engines.
October, 1916	629	372
November, 1916	636	348
December, 1916	659	437
January, 1917	625	375
February, 1917	711	451
March, 1917	731	701

(B.)

On 1st March, 1917, there were 32 Training Stations in existence for the accommodation of one or more squadrons, and 15 under construction.

On 1st March, 1917, there were 46 stations at which squadrons were stationed, either in huts or billets, or under canvas.

There was shed accommodation for 35 squadrons on 1st March, 1917.

3,353 officers and 54 men were under instruction at the various flying schools on 1st March, 1917. There were, in addition, 137 equipment officers and 857 cadets under instruction on the same date. These figures did not include the Balloon Training Wing, which had 122 officers under training on 1st March, 1917.

The number of pilots graduated at the Central Flying School between 29th September, 1916, and 1st March, 1917, was 1,193.

About 300 pilots were on the waiting list on 1st March, 1917.

On 1st March, 1917, the number of officers serving overseas was 2,121, and at home 2,966; and there were at home and abroad 57,356 other ranks.

On 1st March, 1917, there were 78 Service squadrons and 59 Reserve Squadrons already formed, and 3 Service and 9 Reserve Squadrons forming.

(d.) 1ST JANUARY TO 31ST DECEMBER, 1917.

The dominating feature of the year's statistics is expansion of personnel, equipment and operations.

The following table shows the development under the main items :—

Items.	January, 1917.	December, 1917.
Units	241	575
Personnel—		
Officers	5,982	15,522
Other ranks	51,915	98,738
Equipment—		
Aeroplanes serviceable during one month ..	1,491	3,238
Heavy and light tenders	4,005	5,749
P. & M. motor cycles	1,791	2,424
Weight of bombs dropped (tons) (estimated)	30	66

Details of the increase in the number of the principal classes of units are contained in the following table :—

Unit.	Number as at January, 1917.	Number as at December, 1917.
Brigade headquarters	6	12
Wing headquarters	25	51
Service squadrons	70	126
Training squadrons	50	109
Training depot stations (each equal to three training squadrons).	..	7
Depôts	8	14
Parks	11	38
Cadet units	1	8
Schools	3	26
Balloon units.. .. .	53	89

Comparative figures showing the growth in the number of squadrons in all parts of the world are as follows :—

(a.) *Service Squadrons.*

Theatre.	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.
Home	24	28	28	25	25	25	28	31	40	44	48	46
France and Italy	39	41	43	48	51	52	52	52	52	54	58	58
Other Theatres	7	7	7	7	7	7	8	10	10	11	11	11
Total	70	76	78	80	83	84	88	93	102	109	117	115

N.B.—Service squadrons commenced operations in Italy during November, 1917.

(b.) *Training Squadrons.*

Theatre.	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.
Home	47	48	54	54	59	64	67	69	66	67	73	78
Canada	11	14	15	15	15	15	15
Other Theatres	3	3	5	5	5	5	5	5	10	10	10	10
Total	50	51	59	59	64	80	86	89	91	92	98	103

The increase in the total officer personnel is apparent from the following table :—

Months.							Number of officers.
January	5,982
February	6,341
March	6,145
April	7,871
May..	8,369
June	9,523
July..	9,694
August	10,554
September	12,163
October	13,215
November	14,627
December	15,522

“ Other ranks ” have increased as shown in the subjoined table :—

Months.							Number of other ranks.
January	51,915
February	57,245
March	68,203
April	68,082
May..	72,251
June	75,742
July..	78,529
August	81,886
September	85,483
October	85,964
November	91,636
December	98,738

Owing to the impossibility of obtaining the requisite number of skilled men for the technical work of the corps, recruits, unskilled and partly skilled, have been and are being trained as armourers, acetylene welders, blacksmiths, coppersmiths, magneto repairers, fitters, wireless mechanics and operators, and in photography, camera repairing and rigging. Over 14,000 men have been trained during 1917. This figure includes some 5,500 fitters and 4,300 riggers.

To meet the increasing demand for labour, female and boy labour has also been introduced to the extent shown by the following table :—

Months.					Number of women employed.	Number of boys employed.
January	41
February	41
March	41
April	1,080	40
May	1,323	172
June	1,697	533
July	2,002	783
August	2,340	1,068
September	2,715	1,801
October	3,177	2,854
November	3,315	4,315
December	4,100	5,501

Female and boy labour has proved exceedingly and increasingly valuable. The trade instruction given will prove of national advantage independently of aeronautics.

A large proportion of the recruits who have now become skilled tradesmen would probably not have become skilled in any trade in normal circumstances.

Special efforts have been made in 1917 to meet the increasing demand for flying officers from the various theatres of war. Since March, 1917, in addition to the existing recruiting arrangements in England, special interviewing and recruiting officers have been operating in Scotland, Ireland, Canada and South Africa. Results have been satisfactory in Scotland, Canada and South Africa, but the project in Ireland has been discontinued.

As a result of these efforts and of transfers from other units the intake of potential cadets a month has risen from 227 in January to 1,821 in December, notwithstanding the more rigorous tests imposed by Medical Boards in the light of fuller knowledge of overseas requirements.

To deal with this influx there are now six Cadet Wings for the training of cadets (including one in Canada and one in Egypt), whereas there was only one in January, 1917.

Two Officers' Technical Training Wings have also been formed at home, where youths too young for admission to Cadet Wings receive preliminary training.

Subjoined is a statement by months of the number of cadets under instruction at Cadet Wings :—

Theatre.	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.
Home	300	487	680	683	1,062	983	932	2,036	2,897	3,512	3,947	4,210
Canada	52	121	79	274	658	658	742
Egypt	131	188	198
Total	300	487	680	683	1,062	1,035	1,053	2,115	3,171	4,301	4,793	5,150

On leaving Cadet Wings pupils continue their training in Schools of Military Aeronautics where the real aeronautical training is commenced. The following table shows the passage of cadets through the schools :—

Theatre.	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.
Home	937	751	864	1,135	1,179	1,421	1,648	1,465	2,158	2,276	2,259	2,659
Canada	123	176	311	270	322	611	561
Egypt	64	56	116	53	62	57	68	61	85	85	123	166
Total	1,001	807	980	1,188	1,241	1,601	1,892	1,837	2,513	2,683	2,993	3,386

Pupils proceed from schools to Training Squadrons for further instruction. The monthly figures of pupils with Training Squadrons are as follows :—

Theatre.	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.
Home	1,905	2,097	2,468	2,482	2,716	3,081	3,317	3,524	3,662	3,828	4,157	4,221
Canada	163	294	389	397	527	645	844
Egypt	173	277	224	230	190	163	194	184	180	240	300	496
Total	2,078	2,374	2,692	2,712	2,906	3,407	3,805	4,097	4,239	4,595	5,102	5,561

The foregoing tables, when summarized, indicate that the total number of cadets and pupils under instruction increased from 3,379 in January to 14,097 in December.

Pupils graduate as flying officers on completing their training with squadrons. The total number of graduated pilots, *i.e.*, flying officers, other than as observers, has

increased from 1,679 in January to 3,974 in December. The monthly figures are as follows :—

Theatre.	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.
Home	743	859	932	901	937	1,401	1,763	1,945	2,174	2,150	2,305	2,370
Canada	42	41	53	86	121	160	166
France	756	797	881	1,026	1,093	1,061	1,066	1,064	1,097	1,174	1,295	1,067
Other Theatres ..	180	179	197	201	205	203	211	235	270	319	339	371
Total	1,679	1,835	2,010	2,128	2,235	2,707	3,081	3,297	3,627	3,764	4,099	3,974

Not only has the number of pilots produced largely increased, but there has been an immense advance in the quality of their training. Pupils are kept longer in the air and they undergo special courses in aerial gunnery, aerial fighting tactics, bombing and photography. Of 23 special schools established for the purpose of teaching these subjects (in addition to sundry others now in being), only one existed in January, 1917. In April, 1917, pilots proceeded overseas after 17·5 hours of instruction in the air. By September, 1917, the average period of instruction in the air was 48·5 hours per pilot.

The expansion in personnel and equipment has necessitated a corresponding increase in the technical and equipment services. These are performed by equipment officers of whom there are now 2,002 as against 996 in January, 1917. All those not already specially qualified have undergone training at an Equipment Officers' School of Instruction, and the consequent enhanced quality of their services has notably contributed to the general efficiency of the corps. Many of these equipment officers are officers disabled by overseas service.

The following table gives particulars of the numbers of officers and other ranks drafted to the various theatres of war during the year 1917 :—

(1.) *By Land and Water transport.*

Theatre.	Officers.									Other ranks.
	Flying officers.	Observers.	Corps army observers.	Equipment officers.	Balloon officers.	For instruction.	Temporary duty.	Miscellaneous.	Total officers.	
France	3,478	82	1,639	321	132	..	454	195	6,301	12,799
Egypt	84	12	..	57	17	458	..	43	671	1,248
Salonika	1	8	10	6	25	114
India	11	4	15	18
Mesopotamia ..	8	9	2	19	54
East Africa ..	26	2	28	72
Canada	70	47	31	148	194
Total	3,678	94	1,639	448	161	458	454	275	7,207	14,499

(2.) *By Air.*

France	3,189	3,189	..
Grand total ..	6,867	94	1,639	448	161	458	454	275	10,396	14,499

The number of qualified balloon officers has increased during the year from 200 to 437.

As to the supply of *aeroplanes*, the numbers despatched to all theatres during 1917 are set forth in the following table:—

Months.	France.	Middle East Brigade.	Home units.	Total.
January and February	250	147	569	966
March and April	612	116	791	1,519
May and June	757	166	949	1,872
July and August	839	121	1,067	2,027
September and October	967	155	1,306	2,428
November and December	802	236	1,088	2,126
Total	4,227	941	5,770	10,938

The monthly increase in supplies of aeroplanes shown by the above table is reflected in the number of aeroplanes (serviceable) as shown by the subjoined table:—

Theatre.	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.
Home	666	667	794	938	836	968	995	1,268	1,467	1,569	1,594	1,841
Canada	73	102	90	121	143	176	215
France and Italy	691	641	858	805	804	794	786	834	864	899	912	934
Other Theatres	134	166	154	146	174	173	179	188	197	215	211	248
Total	1,491	1,474	1,806	1,889	1,814	2,008	2,062	2,380	2,649	2,826	2,893	3,238

N.B.—Serviceable aeroplanes for Italy from November only.

It should be noted that the foregoing numbers of serviceable aeroplanes do not include aeroplanes delivered but not erected, nor machines temporarily unserviceable.

With the development of co-operation of the Air Force with the artillery and infantry, wireless telegraphy has become increasingly important, and the training of operators has been thoroughly organized. Spare parts are made in the Royal Air Force workshops and stores.

There has been a similar development in aerial photography. Since January, 127,000 aerial photographs have been taken and 3,900,000 prints developed by the photographic personnel of the Royal Flying Corps.

The growth of the Royal Flying Corps at home has involved considerable work in the provision of aerodromes, schools, &c. Some idea of what has been done may be gathered from the fact that during 1917 nearly 10,000,000 square feet have been covered with buildings for training squadrons and depôt stations, and another 4,000,000 square feet for aircraft acceptance parks.

The mileage of motor vehicles within the United Kingdom has increased as follows:—

Class of vehicle.	Mileage.	
	November, 1916.	November, 1917.
Tenders and cars	881,687	1,417,691
Motor cycles	234,308	491,192

It may be mentioned that steps to ensure continued improvement in the future include the establishment of a school for motor drivers, capable of teaching 250 male and 200 female drivers a month, and the issue by the Inspector of Mechanical Transport of a book of "Instructions dealing with the use, maintenance, repair and inspection of Mechanical Transport."

The practical and effective result of the year's work as revealed by the foregoing notes can be gathered from the official communiqués. During 1917, in France, 1,073

enemy machines were brought down, 885 were driven down out of control by our aeroplanes, and 76 were brought down by anti-aircraft gunfire—a total of 2,034 machines. In addition, 45 enemy balloons were destroyed or captured. In September, 1917, no less than 125 tons of bombs were dropped by the Royal Flying Corps on the Western Front.

It is impossible to give accurate figures as to the total number of enemy batteries and movements of enemy troops located by aeroplanes in their work as the eyes of the Army, but the effectiveness of that work is vouched for by other branches of the Service.

SECTION 2.

(a.) CASUALTIES FROM 12TH JUNE, 1915, TO 1ST MARCH, 1917.

The casualties during the periods—

(A) 12th June, 1915, to 12th June, 1916,

(B) 12th June, 1916, to 29th September, 1916,

(C) 30th September, 1916, to 1st March, 1917,

were as follows:—

Location.	Killed over-seas.	Killed at home.	Wounded.	Prisoners.	Sick (including accidents).
Officers of the Royal Flying Corps (A)	66	25	63	43	150
" " " " (B)	59	17	104	49	196
" " " " (C)	80	43	96	34	380
Officers attached to the Royal Flying Corps for instruction or as observers. (A)	38	21	41	43	148
(B)	28	14	53	17	135
(C)	59	40	58	17	402
Totals	330	160	415	203	1,411

(b.) ROYAL AIR FORCE PERSONNEL.

Fatal casualties from 11th November, 1918, to April, 1920 (including deaths due to disease):—

	Deaths.			
	Officers.		Other ranks.	
	Flying casualties.	Non-flying casualties, disease, &c.	Flying casualties.	Non-flying casualties, disease, &c.
11th to 30th November, 1918 ..	71	37	41	216
December, 1918	38	38	13	193
January, 1919	32	8	12	68
February, 1919	12	49	4	156
March, 1919	16	24	2	132
April, 1919	15	5	4	55
May, 1919	29	6	5	30
June, 1919	8	4	..	19
July, 1919	16	4	7	34
August, 1919	12	3	1	22
September, 1919	5	1	..	24
October, 1919	5	1	..	31
November, 1919	1	9
December, 1919	2	3	1	10
January, 1920	1	1	6
February, 1920	4	2	..	9
March, 1920	1	..	7
April, 1920	2	..	3	4

(c.) CASUALTIES ON THE WESTERN FRONT ONLY, BY MONTHS, FROM JULY, 1916.

1. Number of killed and missing.
2. Number of hours flown.
3. The casualty rate, *i.e.*, the number of hours flown per pilot or observer killed or missing.

The casualties include only killed and missing in order that comparison may be made with the fatal accidents occurring in training.

For the last 6 months of 1916 the average number of hours flown per casualty was 206, whereas for the second 6 months of 1917 they were 172, showing that the casualty rate had increased; from January, 1918, onwards, the rate has continued to improve, and the average for the 6 months ending June, 1918, was 222, and this figure would probably have been much higher if it had not been for the exceptional activity in March and April, excluding these two months the average was 251.

Month.	Casualties (killed and missing), Western Front.	Hours flown, Western Front.	Hours flown per casualty (killed and missing), Western Front.
1916.			
July	75	17,000	226

			1,330
		Average for 6 months	222
July to 21st	200	41,272	206

SECTION 3.

WOMEN EMPLOYED.

On 4th March, 1918, 8,403 women were employed in the Royal Flying Corps, including 2,969 clerks, 1,322 storemen, 899 sailmakers, 263 fitters, 153 riggers, 436 Mechanical Transport drivers and 680 cooks.

SECTION 4.

DISTRIBUTION OF THE ROYAL AIR FORCE IN SQUADRONS,
AEROPLANES, AND PILOTS.

(From 23rd October, 1916, to 18th May, 1918.)

Location.	Squadrons.		Aeroplanes.			Pilots.	Remarks.

	84	79	1,966	718	334	2,525	22nd May, 1917.
	83	62	1,871	594	200	2,201	25th Apr., 1917.
	79	59	1,841	901	212	2,065	20th Mar., 1917.
	78	59	1,511	915	172	1,889	20th Feb., 1917.
	74	53	1,694	658	170	1,812	25th Jan., 1917.
	71	50	1,534	693	201	1,643	25th Dec., 1916.
	70	32	1,326	826	142	1,503	21st Nov., 1916.
	69	39	1,335	687	119	1,413	23rd Oct., 1916.

(a) Includes 10 Naval squadrons and one Headquarters communication flight.

(b) Including 10 (Night) Training Squadrons.

(c) Pilots (except pool pilots) and machines at Depôts are not included in these figures.

(d) Includes Nos. 93, 94, 95, 96 and 97 Training Squadrons in course of formation.

(e) Figures used as on 10th May, 1918.

In August, 1914, there were 147 officers and 179 aeroplanes of which about 86 were serviceable.

Pupil pilots.—In Egypt there are 214 under elementary instruction (including 112 at school); 142 under advanced instruction, 18 *en route*, 1 awaiting orders.

SECTION 6.

SURRENDER OF GERMAN AEROPLANES.

By 16th January, 1919, the Germans had handed over to the Allies—

Aeroplanes (in good condition)	1,781
Aeroplanes (in bad condition)	932
Total	2,713

SECTION 7.

PROCESS OF REDUCTION OF THE ROYAL AIR FORCE.
(1920.)

The estimate of the maximum number of men on the establishment of the Royal Air Force at home and abroad, exclusive of those serving in India on 12th March, 1919, was 150,000, and this number is in process of reduction to 79,570.

Exclusive of troops in course of demobilization, the Royal Air Force serving with the Armies of Occupation is distributed as follows:—

	Officers.	Men.
Army of the Rhine, France and Belgium	1,620	15,800
Italy	10	50
Egypt and Palestine	180	1,620
Mesopotamia and North Persia	160	1,160
Home and Colonial establishments, including units in Russia and with the Grand Fleet	4,300	54,670
Total, all ranks	79,570	

The number in course of demobilization is 70,430.

The figure of 79,570 represents the estimated total number of officers and other ranks to be retained during the period of occupation, exclusive of formations stationed in India.

- Notes.—(i.) For further details regarding Demobilization see Part XXV., p. 679.
(ii.) After the above estimates were made it was arranged to reduce still further the total numbers for retention during the period of occupation

PART IX.

PART X.

ARMY CONTRACTS, CLOTHING AND SALVAGE.

SECTION 1.

CONTRACTS, RAW MATERIALS, PRIORITY, SALVAGE AND CLOTHING STOCKS, &c., 1918.

EXTENT OF THE DEPARTMENT'S OPERATIONS.

The difficulty of expressing in statistical form the precise amount of purchases made by the Department has been increased during the period under review on account of the extension of the practice of placing running contracts to meet a steady demand, and of the large cancellation of orders after the Armistice. It has been necessary, therefore, to calculate expenditure on the following basis:—where contracts for fixed quantities are being considered the amounts provided for in the contract are taken as providing the requisite figure; where, however, current contracts are considered, the only figure which is trustworthy is that of the actual amount of deliveries month by month. The figures given below are a combination of these two.

During the portion of the financial year down to the Armistice, the total contract value of manufactured articles and food purchased by the Department amounted to approximately 205,000,000*l.*, or 6,500,000*l.* a week. From the date of the Armistice to the end of the financial year it was approximately 57,000,000*l.*, or less than 3,500,000*l.* a week. The total *contract* value of manufactured articles and food for the financial year was, therefore, approximately 262,000,000*l.*, but from this figure must be deducted 13,000,000*l.*, to represent cancellations of fixed quantity contracts. The net contract value of such articles must then be placed at about 250,000,000*l.* during the year (including some 20,000,000*l.* expended on behalf of our Allies) or an average of 4,750,000*l.* weekly. The amount spent on raw materials during this period was 114,000,000*l.*

The work of the Department in clothing the Army and the auxiliary forces was rendered doubly difficult after the beginning of 1918, on account of increased demands both for men and for clothing. Despite these impediments, however, the Department has purchased since March, 1918, 7,106,000 S.D. jackets, 7,814,000 S.D. trousers, and 2,999,000 S.D. pantaloons, at a total cost of nearly 18,000,000*l.* Over 15,000,000 flannel shirts, costing approximately 7,500,000*l.*, and 1,154,000 discharged soldiers' suits, costing over 2,500,000*l.*, have also been purchased up to 31st March, 1919.

Increased supplies have been required also by the American forces, and for this purpose contracts for 689,000 jackets, 1,204,000 pairs of trousers, 1,965,000 caps, and 1,340,000 shirts were placed at a total price exceeding 5,000,000*l.*

At the request of the Q.M.A.C., the Department undertook to contract for their heavy clothing, and about 150,000 outfits have been supplied for this corps. The experience gained from these contracts proved exceedingly useful when the Department was later asked to supply clothing for the W.R.A.F. to the number of about 30,000 suits. Other purchases for Women's Corps were Board of Agriculture, 60,000; Forage Committee, 17,000, and Timber Supply Department, 1,700.

The situation with regard to discharged soldiers' suits has also proved difficult. Up to October last, 650,000 suits and 250,000 overcoats were supplied. Discharges rapidly increased after the Armistice and though firms were ready on account of the reductions in their khaki clothing contracts to turn to discharged soldiers' clothing, stocks of suitable cloth were insufficient. The difficulty was met partly by the utilization of stocks of standard cloth which contractors had accumulated but had not been allowed to work up on account of the greater urgency for khaki clothing, and partly by requisitioning all stocks of Grade 3 standard cloth in the country and suits manufactured therefrom. The position is now much easier.

Another item of interest is cork helmets. The total number for which contracts were placed in 1918 was 669,075. This large figure is due to urgent demands received in February of that year. Many factories were unable to cope with the sudden rush, but with the consent of the Home Office, women in a factory at St. Albans worked on a night shift for six weeks. Production was so increased that all requirements were met and a reserve of 500,000 helmets was accumulated.

Reference was made in the last report to the great increase in production effected by the Directorate of Wool Textile Production at Bradford. The work of this branch was continued on the same scale during the period up to the Armistice, and the production for which it arranged was in many instances far in excess of the total pre-war output. During the war period over 250,000,000 yards of material, equivalent to 75 per cent. of the total output of the country, and including cloth, hosiery, blankets and flannel, were purchased yearly; and until hostilities ceased, the production of blankets in 1918 amounted to two-and-a-half times the pre-war output for a similar period.

Certain changes were made in the method of purchasing cotton goods during 1918. The industry as a whole was controlled by the Cotton Control Board set up by the Board of Trade, but the great increase in requirements of cotton goods compelled the Department to exercise a greater influence over the industry.

Until the end of 1917 these supplies were purchased by a business organization at a remuneration equivalent approximately to one-seventh of 1 per cent. on the net invoiced value of the goods bought. Owing, however, to the inability of the Department's agents to cope adequately with increased business placed with them, it was found advisable to set up in Manchester a branch of the War Office, the Cotton Textiles Office, which has since been responsible for the purchase of cotton goods for the Government. Under this organization the buying costs have been still further reduced; freight priority for cotton required for Government work has been arranged, and prices fixed for yarns used for Government textiles.

Another innovation was made during 1918 by the establishment of the Aircraft Fabric Department of the War Office at Manchester, which has been responsible for the supply, testing and distribution of "lighter-than-air" cotton fabric. Under the new system the available supply of aircraft fabric was materially increased, and arrangements were made which allowed of the execution of a greatly extended aircraft programme.

Throughout 1918 the position with regard to flax became more and more acute owing to the impossibility of securing supplies from Archangel. Rather less than one-third of the quantity purchased in 1917 was available, and the shortage resulted in an advance in price of approximately 30*l.* per ton. It was, therefore, necessary to restrict the amount of flax used for threads, and the administration of the Thread Orders was undertaken by the Department in co-operation with the Flax Control Board, care being taken to ensure that efficient substitutes were available before the supply of flax was wholly cut off. By these means, it is estimated, quite 50 per cent. of the flax formerly used for linen thread was saved for aircraft purposes.

The cost of directly made purchases in leather and the raw materials necessary for its production was not decreased during 1918-19, and 14,750,000*l.* has been expended in this connection. Nearly two tons of hides and tanning materials are required to produce one ton of leather, and in all about 360,000 tons of these raw materials were consumed during 1918. As only one-fourth of this quantity is produced in the United Kingdom, considerable restrictions on the use of leather have been necessary. Measures taken to meet this shortage are described elsewhere.

The Department's purchases of woodwork supplies during 1918-19 have been very extensive and are illustrated as follows:—

	£
Packing cases and crates	6,889,012 valued at 1,546,436
Tent pins	25,693,180 „ 95,103
Handles and helms	7,630,000 „ 355,570

With regard to the first of these supplies, it should be stated that contractors for Army food supplies are now provided with packing cases and crates by the Department, an arrangement which necessitates the supply of 150,000 crates weekly, and which in nine months effected a saving of 80,000*l.* The Department's efforts to organize the production of tool handles were so successful that the output of the trade was doubled within six months.

For use of the expedition to the Murman coast the Department arranged for the supply of 4,000 pairs of skis, 10,000 pairs of snow-shoes and 550 sledges.

Enormous purchases have been made from the metal industries during 1918, and the following figures illustrative of the Department's organization of two Midland trades which have been largely depleted of labour are striking. In the sheet metal trade the Department placed orders for 7,780,000 petrol cans, 3,782,000 water bottles, 169,000 camp kettles, 3,630,000 mess tins and 4,000,000 ration tins, to the total value of 1,807,500*l.* In the cutlery trade the Department's efforts to stimulate production

of urgent supplies was similarly successful, and contracts were completed for 5,400,000 clasp knives, 9,600,000 knives and forks, 4,000,000 spoons and 3,640,000 razors, valued in all at 1,090,000*l.* After the Armistice, the abnormal demands for cutlery did not for various reasons decrease, and the Department was faced with a serious situation, due to the request of the trade to be allowed to concentrate on manufacture for export. In view of the necessity of capturing depleted foreign markets in which American and Japanese competition threatened to be keen, every possible step was taken to meet this request, and efforts were made to secure preferential treatment for the trade in the release of pivotal men.

In the tool industry, largely on account of the organization of firms for big production by the Department's technical officers in the provinces, the abnormal demands for tools of every kind, aggregating many millions of articles, have been met, together with huge demands from other Government departments and from the Allies. The supply of over 5,500,000 entrenching tools, requiring more than 13,000 tons of steel, has been arranged.

The paramount importance attached to the provision of trench defence supplies has been fully appreciated, and no effort has been spared to meet demands in this connection. 565,000 miles (103,800 tons) of barbed wire and over 9,000,000 wire entanglement posts have been purchased during the year.

The extraordinary development of aerial photography and its allied branches has necessitated the organization of the photographic trade beyond anticipated requirements. In addition to arranging supplies of aerial mechanical cameras and camera guns, the department has purchased over 3,000,000 plates and 72,000,000 sheets of cut photographic paper for the Royal Air Force, while 15,000,000 feet of film are purchased annually for cinematographic instruction purposes.

It is gratifying to be able to record that in the metal and woodware trades, although military requirements have been so enormous, due partly to the reverses of November, 1917, and March, 1918, manufacturers and the Department have by mutual arrangement been able generally to maintain an adequate supply for all needs. Constant attention has been given to the question of simplification of specifications, and more particularly the adoption of trade patterns, wherever possible, has allowed of fuller organization of the industries and largely increased output. A further result from these measures has been that the transfer from war to peace-time production has been greatly facilitated, and certain stocks which might otherwise have been left on the manufacturers' or the Department's hands have become immediately available for the civil market.

Purchases of food supplies during the last financial year have again been enormous, and of the items contributing to the total expenditure special reference may be made to biscuits, of which 129,204,000 lb. were bought, at a cost of 3,394,000*l.*; margarine, 52,203,000 lb., at 3,163,000*l.*; sugar, 167,234,000 lb., at 2,281,000*l.*; meat and vegetable rations, 38,262,000 tins, at 2,190,000*l.*; and 168,745,000 rations of preserved meat at 8,916,000*l.*; 14,409,000 lbs. of tobacco and cigarettes have been supplied at a cost of 2,765,000*l.*; of this item two-thirds were cigarettes and one-third tobacco.

Much has been done to facilitate the purchase of Army food supplies by the appointment of liaison officers between this Department and the Ministry of Food as stated in the last report. The continuance of this arrangement has proved most satisfactory to both departments.

OPERATIONS IN RAW MATERIALS.

Purchasing operations.

Wool.—The control by the Department of essential raw materials was maintained without any substantial alteration in principle. Until the Armistice the Department's schemes for the control of the Imperial wool clip were maintained on the same basis as in former years. The British wool clip was purchased direct from the farmer, and agreements were made with the Australian and New Zealand Governments whereby the whole of the Australasian wool which was not required for the home mills was to be shipped to Great Britain, during the war period and one wool year thereafter. East Indian wool was allowed by the Indian Government to be exported to this country only, and was disposed of at auction sales at fixed prices against rationing certificates. As in 1917, the Department continued to have all tops combed on its account and also arranged for the scouring and blending of wool on commission.

The total expenditure by the Department on wool during the year 1918 amounted to approximately 92,000,000*l.*

Leather.—Among the measures necessitated by the wide control of leather supplies, it has been necessary to continue the organization of imports of all tanning materials required for the conversion of hides into leather, and over 1,000,000*l.* was spent in this connection during 1918. Complete control of hides, both native and imported, has been continued, and owing to the abnormal rise in the cost of certain types of uncontrolled leathers suitable for civilian purposes on account of the strict control of leathers fitted for military use, the Department found it necessary to control the former also; thus control was, for instance, exercised over leather made from calfskins and horsehides. The importation of hides was also watched and regulated, and arrangements made for the reasonable distribution of these supplies among the Allies. 350,000 tanned kips were imported from India monthly to a total value of 4,000,000*l.* during the years 1917-18, while the quantity of East Indian raw kips purchased for the Department by a Buying Committee in Calcutta, totalled 1,300,000, valued at approximately 750,000*l.*

Fibre.—In the matter of fibre raw materials, the Department has continued to be responsible for the purchase of Manila hemp and Maquey fibre, and the prices of these fibres, as well as of New Zealand, St. Helena and Sisal hemp remained fixed by Order. The existing arrangements for the purchase of jute also remained unchanged.

Officers' clothing scheme.—The working of the officers' clothing scheme, the inception of which was commented upon in the last report, was fully maintained during the war period of 1918. Lists of all firms engaged in the manufacture, merchandising and making up of cloths suitable for officers' clothing were compiled, and up to November, 1918, 105 manufacturers, 184 woollen merchants and approximately 4,000 tailors were thus registered on the authorized list. Those firms who were willing to co-operate signed an undertaking to observe certain conditions laid down by the Department, which in the case of tailors, included the Fair Wages Clause. Only five firms were registered in a dual capacity, and these were cases where the Department was satisfied that separate manufacturing and merchandising establishments were maintained. Wholesale clothiers were included in the category of tailors, and bought under the same terms.

Yarn was issued at fixed Government prices to the manufacturer, who was required to utilize it only for the fulfilment of the merchant's order specified in his application. Prices of all sales from mill to wearer were fixed on a flat rate basis, and both manufacturers and merchants were required to furnish monthly lists of all sales.

It was possible under this scheme to give officers the choice of 16 priority A. cloths. The selling prices of garments made from each of these were so fixed as to allow of the best class firms in the West End contributing their share to the output of officers' clothing, and though the rates were not excessive, it was found that over 85 per cent. of the registered tailors were selling below the maximum rates.

During 1918 the scheme was extended to include the control of officers' caps, with the result that whereas prices had previously ranged from 18*s.* 6*d.* to 30*s.*, it was found possible to produce a good quality cap at a standard price of 15*s.* Further control of officers' badges and buttons was undertaken. The cost of these articles, which had risen enormously previous to the fixing of prices by the Department, was decreased in some instances by over 75 per cent.

On the cessation of hostilities, a considerable reduction in demands allowed the withdrawal of the control effected by these several schemes at the end of November last.

Measures necessitated by Tonnage Situation.

Wool.—During 1917, the shortage of tonnage had rendered the position of wool stocks sufficiently acute to necessitate the setting up of a system of rationing to distribute equitably any surplus wool that the Army Council could release over and above the amount required for military and naval Allied contracts. During 1918, and especially as a result of the entire stoppage of shipments during February, stocks declined rapidly, and considerable reductions were made on the amounts available for civilian trade during the successive rationing periods. The greatest difficulty was experienced in regard to combing wools, and it was feared at one time that unemployment would result from the curtailment of the Department's combing programme. A scheme was accordingly put into operation to provide for unemployment benefit in the combing trade, and a general scheme for the whole industry was formulated in addition. As a result, however, of the Armistice and the out-of-work donation, this scheme is at present suspended. As far as stocks are concerned, the lowest figure on record during Government control was shown by the December census. Large shipments were,

however, arranged at the beginning of the year, with the result that instead of being unable to open the London auctions till the end of June, as was first feared, it was found possible to bring together wool for re-opening them in April.

Fibres.—The question of supply of various fibres used in War Office contracts was one of increasing difficulty owing to the shortage of freight, but, generally speaking, military demands were met, and a certain surplus remained in the civilian market whereby manufacturers were enabled to keep together their business connections.

The difficulty was, however, severely felt in the jute trade where for several months it was necessary to limit the consumption of raw fibre to the equivalent of a 40-hours' working week. The position was somewhat eased in September last, and restrictions on future consumption became unnecessary.

Prices of all fibres as well as of Raffia, stocks of which were sufficient to meet military demands without further purchase, continued to be controlled until some months after the Armistice, but arrangements were made for their release from control during the months of March and April, 1919, and steps have already been taken to liquidate Government stocks in hand.

Leather.—The shipping situation and the exigencies of foreign exchange made the strictest economy in leathers and raw materials for their production essential. The Departmental Leather Control Board therefore took practical measures under the Defence of the Realm Act and otherwise to ensure the elimination of waste and the most advantageous use of profitable material.

In this connection new methods of repairing Army boots have been adopted, involving a saving of about 55,000*l.* weekly. Four feet of upper leather are required for a pair of Army boots, and economies in material resulting from this scheme allowed the Department to build up satisfactory reserves, and even to undertake the supply of large quantities for the American Army. Further measures included a prohibition of the manufacture of women's boots with uppers exceeding 7 inches in length, and the wide circulation of posters in civilian workshops urging economy in the use of leather for boot repairs.

The most important measure to counteract the shortage of shipping was, however, the adoption on 1st April, 1918, of a Certificate Scheme, under which the supply of raw materials allocated to manufacturers of leather goods was strictly rationed. That part of the leather supplied under certificate which was unsuitable for Army purposes was also to be disposed of according to the Department's instructions only.

The War-time Boot Scheme, which was instituted late in 1917 in order to provide efficient footwear at reasonable prices to civilians, proved very satisfactory. Suitable leather was purchased at favourable prices in the United States of America, and goatskins were requisitioned and tanned on commission into glacé kid for the higher grade boots. 20,000,000 pairs have been manufactured in all, including 14,319,823 pairs made in 1918, and the output and demand are still steadily increasing.

Co-operation in the purchase of River Plate hides for Army sole leather was arranged with the United States and France, and the prices to be paid by these countries were fixed. Arrangements were also made for supplying Italy with upper leathers direct from India.

As a result of negotiations arising out of the activities of the Allied Transport Maritime Council an International Agreement was drawn up a week before the Armistice between the United States, France, Italy and the United Kingdom; this provided for co-operative purchase of hides at fixed prices, the proper allocation of raw materials and freight among the signatories and the appointment of an International Executive to meet in Washington in order to secure the efficient working of the scheme. This executive, however, never met, as the United States held that the altered conditions after the Armistice removed the necessity for such co-operation.

In so far as freight accommodation allowed the resources of the British Empire have been fully utilized. Tanning bark and extract have been obtained for British manufacturers from South Africa at fixed prices arranged between the two countries, while the tanning of upper leather in India has been so developed to meet this country's requirements that it is hoped that the industry is now established on a sufficiently firm basis to prevent a return to the old conditions whereby the majority of Indian hides were exported untanned to enemy countries.

SHORTAGE OF MATERIAL AND MEASURES TAKEN IN CONSEQUENCE.

The shortage of material suitable for war purposes has necessitated continued watchfulness over the distribution of available supplies and the provision of substitutes wherever possible.

Food containers.—In 1917 the Department after extensive experiments found and perfected a suitable substitute for tins for the packing of Army food supplies. Many factors had contributed to the shortage of tins, not least among which was the industrial unrest in South Wales. The trade fully co-operated in the scheme, and as a result the Department purchased in 1918 over 200,000,000 containers; this, it is estimated, resulted in a direct saving of not less than 16,000 tons of steel plate which was desperately needed for more essential purposes.

These measures, together with measures taken by the National Salvage Council for the re-utilization of spoilt tins, have effected a considerable increase in the available supply of metal containers for purposes for which the pulp container is unsatisfactory.

The cardboard container has also been adopted with complete success for the packing of supplies for civilian use, such as syrup. Measures to effect this substitution have been undertaken by arrangement with the Ministry of Food.

Packing cases, &c.—Exhaustive inquiries have also been undertaken by the Department into the practicability of dispensing with wooden cases and crates for the packing of certain supplies. Where it has been impossible to effect this, less expensive patterns have been adopted, which it is estimated resulted during the 9 months previous to the Armistice in a saving of over 26,000*l*.

Soap.—The shortage of oils and fats necessitated drastic reductions in the allowances available for soap manufacture, and steps had to be taken to simplify requirements. By arrangement therefore with other departments, and after consultation with the trade, a common specification was adopted, and the supply of soap from such materials as were available was greatly facilitated by these means. During the few months that the scheme has been in operation over 13,500,000 lb. of hard soap have been purchased for War Department use, exclusive of large quantities of different kinds for other services.

LIQUIDATION OF CONTRACTS AND MEASURES TAKEN TO ASSIST INDUSTRIAL RECONSTRUCTION.

Food supplies, &c.—At the time of the Armistice the Department had been purchasing 7,000,000 tins of pork and beans a month in United States of America and a large quantity was outstanding. On account of the lack of tonnage facilities, and of the accumulated stocks in France and this country, storage was arranged temporarily in United States of America, but stocks are now being forwarded. As an alternative to supplies from America, rations were obtained from British packers, and of these 261,000 rations of beef and beans or pork and beans, valued at 8,500*l*., were cancelled. No further contracts for preserved meat were placed and open contracts were curtailed to the following extent:—

	lb.	f.o.b. value. £
Definite quantities	9,628,920	537,706
Monthly quantities from and including March, 1919 (one firm)	6,000,000	325,231
Monthly quantities from and including April, 1919 (one firm)	3,420,000	184,875

Surplus stocks of the above supplies are being disposed of to occupied areas.

The average value of meat and vegetable rations purchased during the three months ended 30th November, 1918, was 140,000*l*. weekly; and approximately 2½ million rations were cancelled, equal in value to a week's supply.

All supplies from biscuit manufacturers were stopped on 20th November last to the value of approximately 54,000*l*. per week. In addition undelivered quantities valued at about 60,000*l*. were cancelled.

The large stocks of rum on hand at the cessation of hostilities permitted of the Department selling to the trade 893,195 proof gallons at an approximate profit of 90,000*l*.

Tea had been purchased for the Department by the Ministry of Food and it was found possible to transfer to that Department over 12 million pounds weight to the value of 353,202*l*.

In November, 1918, the shipping programme allowed of the import of 93,100 tons of oats per month for use in the United Kingdom, France and Italy. Supplies were reduced, as occasion allowed, until on 10th March last shipments to France amounted to 25,000 tons and to Italy 900 tons monthly; supplies to this country had ceased in

January. These reductions allowed of the release of five ships for other purposes, while the more rapid demobilization of Army horses permitted further concessions in the release of tonnage. Sufficient stocks are now held in this country and France to cover requirements until September when purchases of Army oats will, in accordance with War Cabinet instructions, be made from home supplies.

On 11th November the quantity of flour shipped to France, Italy, Salonica and Egypt was 35,790 tons per month. Quantities have generally been reduced and the programme of shipments is now :—

France—					
May	7,500 tons.
June	6,600 "
July	6,300 "
Rotterdam	2,500 "
Italy	350 "
Black Sea	2,100 "
Egypt	7,500 "

Supplies of condensed milk shipped from America direct to the theatres of war were terminated by 9 months' notice as from 30th June, 1918, in anticipation of the termination of the war, and delivery of the balance has been spread out to 31st December next. Similar slowing down of deliveries of jam due in October last, together with surplus quantities becoming available from the Eastern war zones, and further contracts for 7,000,000 lb. of marmalade will cover requirements until the present year's fruit crop is gathered.

Steps were also taken towards cancelling quantities of foundry and gas coke not needed by the various Ordnance factories. Arrangements were made with the Coal Controller by Waltham and Woolwich for the diversion of surplus supplies or the diminution of reserves of steam coal.

None of the contracts for food and forage supplies contained the Break Clause, and in view of the universal utility of the supplies and the world shortage of food, no steps have been needed to facilitate transference to peace-time production.

Local Contracts.—Little change has as yet been effected in the administration of local contracts since the Armistice. Many of the products, *e.g.*, meat, bread, forage and hospital food supplies, which in peace time were purchased locally, have during the war been purchased by a central authority, and only gradually will it be possible to revert to the former practice. In the same way contracts for "services" have on the whole remained steady, though contracts for gas and water supplies have been slightly diminished. The ability to terminate these local contracts at short notice has obviated the necessity for a Break Clause; and the effect of the demobilization of troops is generally to decrease the volume of work under the contract rather than to allow of its complete cancellation.

Medical and surgical dressings.—During the four weeks previous to the Armistice a special scrutiny was held of all fresh demands put forward. On the 9th November last manufacturers of surgical dressings, who had been previously warned that outstanding quantities might not be required, were notified that production should cease forthwith, and were requested to furnish full particulars concerning stock in hand or commitments and the amount of undelivered quantities under contract which could be cancelled.

A small minority of these contracts were subject to the Break Clause, and in the few cases where it was applied, payments on claims were generally less than those to which contractors were entitled under the clause. Thus, as a result of the cancellation of contracts to the value of 96,594*l.*, only 3,670*l.* has been awarded as compensation, although a few claims are as yet undecided.

Of yearly contracts placed during the war for groups of items of surgical or medical supplies, the majority have now lapsed, and by 1st July next the only contract still current will be that for the supply of medicines for the Army Veterinary and Army Medical Departments.

No special steps have been required in order to place contractors again on a peace footing.

Clothing, &c.—On the cessation of hostilities steps were at once taken wherever possible to reduce contracts for clothing. Not only were almost all these contracts terminable at four weeks notice, but an additional proviso allowed of the immediate cessation of cutting in cases where Government materials were supplied. Immediate advantage was taken of this in the case of articles of which large stocks were held, in

particular in the officers' and khaki drill sections. The labour situation of each firm was considered; reductions of contracts were made progressive, and contractors were allowed to spread the month's deliveries over a period of eight weeks at their discretion. To some extent, where firms were unable to revert to civilian work at once, the reduction of khaki clothing contracts was compensated for by the increased demands for discharged soldiers' clothing, though stocks of suitable cloth were small; preference was as far as possible given to purely war firms in the matter of cancellations.

In few cases only was the Break Clause applied, as it was found more economical to close contracts by giving the usual notice of termination. Few claims for compensation were, therefore, received.

The liquidation of clothing contracts presented little difficulty, as the situation had been thoroughly considered beforehand by the Department in consultation with the Advisory Committees in the Clothing and Shirt Trades.

The only serious difficulty experienced in assisting manufacturers to revert to their peace-time trade was in the Hebden Bridge district, which had been exclusively engaged on corduroy and other cotton clothing. Military demands ceased abruptly, and manufacturers held no stocks of material for private trade. An attempt was therefore made to secure cloth for them through the Cotton Textiles Office, but as the manufacturers were not prepared to pay the current Government prices, it met with but little success.

All the principal Government departments were asked to refer to this Department before making clothing and similar purchases, in order not only to utilize surplus Army stocks, but also to leave manufacturers free as far as possible to revive their private trade.

Wool.—English wool merchants working on behalf of the Department were prepared, after the 1918 clip was exhausted, to purchase the present year's clip on their own account. The Department continued to give out wool to topmakers, blenders, carbonisers and scourers to work up on a commission basis until the 31st May, and work on Government account will be completed during June. The manipulation of wool on private account has, however, been permitted since March last, and firms have been enabled to resume their normal trade without difficulty. A general fear is now expressed that, so far from a shortage of work, firms will have more orders than they can satisfactorily execute for some time to come.

Woollen textiles.—As soon as the Armistice was signed, the Royal Army Clothing Department cancelled various demands for cloths, flannel, &c., which necessitated contracts being wholly cancelled or reduced. This was done in all cases possible, care being taken to avoid hardship and unemployment. The amount of work involved in this cancellation or reduction of requirements was very considerable. The placing of all fresh contracts is now being done in London, the staff remaining in Bradford being engaged on fixing up final prices in connection with some 1,750 interim price contracts, and approximately 4,000 other contracts which require attention under the Wages Clause.

Many manufacturers have been concerned about surpluses which they require the Department to accept. On the other hand, the Royal Army Clothing Department have ample stocks, and a judicious and tactful handling of the cases is essential, especially in view of the fact that the trade is aware of the Department's practice, which was to allow a margin of 5 per cent. to be delivered over and above the actual quantity ordered.

The Break Clause has been put into operation only in the few cases where no other course has been possible. The total value of claims for compensation which have been met by the Department has not exceeded 3,000*l.*

It has been found possible to reduce the Department's liability to manufacturers by 5,300,000*l.*, which sum represents the value of contracts cancelled partially or wholly.

Cotton Textiles and Equipment.—Contracts for cotton textiles and equipment have in some cases been placed to meet requirements 9 months ahead. A general revision of the contract situation was, therefore, essential after the Armistice, in view of the restricted demands, and this involved a great increase in work on the part of the Department.

The cotton textiles contracts contained the Break Clause, but after careful consideration it was decided that greater economy would result from fixing a period to the contracts by mutual agreement between manufacturers and the Department than from exercising the arbitrary powers granted under the clause. By means of negotiation the Department was enabled to avoid the acceptance of large quantities of fabrics which were in arrears, and the enormous reductions in supplies which resulted fully justified the action taken. Negotiations were undertaken by the Cotton Textiles Office at

Manchester, and the results were confirmed from headquarters. By these means orders for 5,000,000 lbs. of cotton yarn were cancelled without payment of compensation.

In trades supplying made up articles, such as nose-bags, covers, haversacks, and rubber goods, notice of termination was given under the Break Clause. Difficulty was, however, experienced in some cases on account of the quantity of arrears. In many cases of made up goods of this kind, it was found advisable to limit the contract quantities to those already delivered, and to negotiate with the manufacturer concerning the amount of compensation to be paid. This method of liquidation often proved lengthy, and in some cases required prolonged investigation by Costings Accountants before final settlement was reached.

As the cotton trade was not controlled, except in the matter of yarn prices, no special steps were required towards reconstruction. The control prices of yarn were arranged between the Trade and the Government, and were renewable every 3 months; when, therefore, the agreement came up for revision the first time after the Armistice, the arrangement was dropped. Practically the whole of the outstanding balances in the jute trade were cancelled, manufacturers being able to turn forthwith to civilian orders, and though a little more difficulty was experienced in restricting production of flax goods on Government account, yet, as in the jute trade, compensation was not found necessary. Manufacturers of indiarubber goods of all descriptions had great quantities of civilian orders unfulfilled, and were glad to be released from their contractual obligations without recompense.

Leather.—After the Armistice no further arrangements were made to secure supplies of East India tanned kips, raw hides, sheepskins or goatskins. In none of these cases was it found necessary to utilize the Break Clause. The 3 months' notice of cancellation necessary in connection with the purchase of India kips was given by the Indian Government to the Indian tanners; arrangements with them thereby terminate on 30th June. Surplus stocks of both rough and dressed leathers and of raw hides are being disposed of through pre-war trade channels. The dressing of all raw woolled skins on Government account was immediately stopped on the cessation of hostilities; contracts for raw goatskins are now practically all completed, and negotiations are in progress for the sale of raw stocks to tanners who are operating freely in their civilian trade.

On account of the shortage of upper leathers, and the high price of boots, steps were taken to effect purchases of these materials in America with Treasury sanction to the amount of approximately 4,000,000*l.* These are being allocated direct to boot manufacturers with the least possible delay. Such stocks of these leathers as are already in the country are being realized at good prices through the regular trade channels and will be used for civilian purposes. Surplus stocks of sole leather are being disposed of in the same manner.

No further contracts for tanning materials were placed after the Armistice. Contracts for 500 tons of chestnut extract and 50 tons of hemlock placed in the United States were cancelled. All other contracts are already completed or on the point of completion, the outstanding amounts being about 650 tons liquid 25 per cent. chestnut and 25 tons powdered hemlock. Importers are now allowed to deal freely in all tanning extracts, except American chestnut, purchases of which were allowed only on licences granted by the Department. It is, however, anticipated that all restrictions on these supplies will be removed very shortly.

Saddlery, harness and leather goods.—For some weeks previous to the Armistice, purchases of saddlery, harness, and general leather goods had been small and unimportant, and ceased almost wholly from that date. In the main the supplies purchased were similar to those made in peace time by the trades concerned, and manufacturers were quite prepared to turn immediately to private trade. In the majority of cases no compensation was claimed on account of the cancellation or gradual reductions of contracts, and where compensation was granted the amounts were always less than those to which firms would have been entitled under the Break Clause.

Gloves.—Within a week of the Armistice 1 month's notice was given to terminate contracts for three of the principal kinds of gloves. Contracts for motor cyclists' gloves had already been terminated before the cessation of hostilities as sufficient reserves had been accumulated. About the same time steps were taken to cancel orders for aviators' gauntlets, which had been important supplies, the necessary notice in this case being 2 months.

In the case of sheepskin fingerless gloves, a circular was issued to the trade requesting that, where possible, no more skins should be cut up, and giving notice of

termination after 1 month. Letters were also issued to the makers of anti-gas gloves instructing them to stop manufacture.

Firms on anti-gas and fingerless gloves were anxious to return to their private trade at the earliest moment, while in the case of the higher class gloves, makers were enabled on account of the one month's notice to deliver all goods in process of manufacture and simultaneously to arrange for a transition to peace-time production, save in the very few instances where requirements still continued, and there was therefore no necessity of using the Break Clause in this connection.

The only claims received were those on account of tape used in fingerless and anti-gas gloves, and on account of basils to be specially dressed for the latter of these supplies. The amounts claimed were small.

The marked shortage of gloves for civilian use prevented any unemployment in the trade, which was glad to revert to civilian work.

Repair materials and grindery.—Ten days after the Armistice notice was given to cancel all orders which were on a requisition basis. As, however, the Department still required certain quantities, the Break Clause was not put into operation; and as the Department's requirements necessitated little change from peace-time production, no claims for compensation were received. Some difficulty was experienced in assisting the manufacturers of half soles to continue their businesses. The manufacture of half soles was almost unknown in this country before the war, and the industry had been extended by the Department's efforts to very large dimensions. It therefore became necessary to adjust carefully the actual termination of contracts. Quantities due on 1st January last were reviewed, and while in some cases extra quantities were ordered, in others firms were allowed to slow-time deliveries until 31st March. As, however, at that date large reserves had been accumulated, the Department could not render further assistance. The majority of the firms established businesses in the boot trade, but in the case of the largest firm, unemployment undoubtedly resulted. As a temporary measure, therefore, the Department supported the manufacturer's application for a quantity of offal in the hands of the Ministry of Munitions Disposal Board pending arrangements for the sale of the factory to a combination of boot manufacturers.

One month's notice was given to terminate contracts for hobs and studs a week before the Armistice; though firms were given permission to reduce their rates of delivery, few availed themselves of the offer, as they were able to turn immediately to civilian trade. It was found necessary about the middle of December to place a fresh requisition for tips and tip nails, and thus the Department was able to provide work for those firms which were principally dependent on the trade. Before the Armistice the Department had reduced its orders of rivets by one half in order to allow of supplies being available for repairers. The moiety was required without reduction until the end of January, and up to the present date orders have been reduced by only one-third.

The hobnail and rivet trades have been very fully employed since they were allowed to revert to private trade, and are only now approaching a position in which they will be able to satisfy civilian demands. In no case was the Break Clause applied, and no compensation claims have been received.

Boots, &c.—The Armistice had practically no effect for some time on army boot and shoe requisitions. As from 1st January, however, cadets' boot orders were reduced from 1,450 pairs weekly to 700 pairs, and did not terminate until 10th April, while officers' boot orders were not reduced till 9th March or terminated till 18th May. The supply of 15,500 pairs of canvas shoes was reduced in January by 50 per cent. and terminated on 15th March.

The principal army boot (that known as the B. 5), has been ordered in the same quantities as before the Armistice. Although large reserves had been built up, they were greatly depleted to meet the increased needs of the American Army, and any surplus quantities received were set aside to build up these reserves again. Indeed, some months after the Armistice, stocks reached their lowest point, both on account of the refitting of the British Army and of the necessity for equipping the Russian forces. In March last arrangements were made with the trade to complete the requisition, providing that final deliveries of about 1,600,000 pairs were made by 30th June. A quantity of 100,000 pairs which would then be outstanding will be delivered during July.

In the case of high-class boots like officers' boots, firms have been only too glad to revert to civil trade in view of the high prices obtaining, and the same attitude is shown with regard to the near completion of the heavier boot requisitions. In the latter case the final quantities have been known so long that the majority of firms have been able to complete their plans. Some 40 firms are desirous of continuing Government orders, but it is impossible to meet their wishes in this respect. They are now turning to

civilian orders, and are taking steps to pledge their production to their customers for a period of 6 months. Firms in the district of Raunds, however, which were wholly devoted to the manufacture of hand-sewn army boots before the war, present a greater difficulty, and it is probable that special provision will have to be made for them. It has already been found necessary to place orders for 50,000 pairs in the district, although the boots supplied are considered inferior in quality to those obtained elsewhere.

In August last large orders for 240,000 pairs of rubber boots placed with one firm, and 10,000 pairs with another, were in an early stage of work. The cotton materials, which were half in store and half in course of manufacture, were purchased by the Department. It was agreed with both firms that supplies should cease at the earliest possible date, and as a result only about one week's supply in each case was delivered after the Armistice. The agreement was in effect an application of the Break Clause, but by delaying the completion of boots already in hand, firms were enabled to turn over without much difficulty. Civilian orders in great quantities were awaiting execution, and firms transferred to civilian trade with remarkable ease.

A large claim has, however, been received from one firm for loss on sale of cloth for trench boots, as the boots have no market in this country; and claims have also been made by the cloth manufacturers who were unwilling to have their contracts wholly cancelled.

Metal, Woodworking, Paint and Allied trades.—Preliminary action with regard to these trades had been taken shortly before the Armistice by the review and suspension of many demands in action, and the issue of instructions to contractors to restrict consumption of material to that requisite for current needs.

Immediately after the Armistice all demands in action as well as running contracts and fixed quantity contracts where uncompleted portions were considerable, were referred to the demanding branch for review. It was possible by these means to suspend the operation of contracts, e.g., for camouflage paint where deliveries were required at an early date.

The fall in the weekly value of running contracts placed with these industries, and the savings effected are strikingly illustrated as follows:—

					£
30th November, 1918	425,269
28th December, 1918	333,330
29th March, 1919	117,187
31st May, 1919	69,255

At the date of the Armistice, the total number of contracts placed in these trades by the Department was approximately 5,000. Four months later the figure had fallen to 932; while at the end of May last only 634 such contracts remained open.

In some directions however, though new demands were few, and were partly fulfilled from surplus stores already in the country, the work of the Department was increased, as a result of the cessation of the activities of other Departments. A notable instance of this is the winding up of the Petroleum Pool Board which had undertaken during the war the handling of the Department's stocks of petrol in this country.

The Break Clause was included in few of the contracts placed for articles of this description. Negotiation was in every way preferable, and special care had to be taken to mitigate as far as possible the unemployment which was bound to result from an abrupt termination of contract work. The majority of these orders were either running contracts terminable at short notice, or for delivery over periods not greater than three months. Where however the Break Clause was applied, its operation presented no special difficulties.

Since the Armistice 1,070 contracts to a total value of 883,222*l.*, and 517 running contracts of a weekly value of 223,470*l.* have been cancelled up to date. On this account approximately 48,655*l.* has been paid in compensation. Manufacturers generally, however, have been ready to release the Department from taking over unwanted balances of deliveries, and where this has been impracticable a noteworthy spirit of concession has been displayed by contractors with regard to compensation claims.

Compensation for cancellation of contracts placed on behalf of the United States Government was fixed on the same basis as for War Department contracts; but as in many instances deliveries on the former class of contracts were considerably overdue at the time of the Armistice, delivery instructions having been delayed after completion of

the balances, the average percentage of compensation payable was higher than in the case of our own contracts, as is illustrated by the following figures for paint supplies :—

Contracts cancelled.		Value.	Compensation paid.	
		£	£	
W.D.—29 continuity contracts	...	14,820 monthly	...	—
38 fixed quantity	59,969 total	...	731
U.S.A.—21 fixed quantity	7,969 total	...	722

Though in practice it has been found difficult to refuse compensation on account of arrears in delivery due to shortage of labour and raw materials, it has in numerous instances been found practicable to accept supplies where consumption is possible within a reasonable time. In other cases the fact that in the main it has been possible to meet the war time demands for supplies of this nature by the purchase of articles of commercial pattern has obviated the necessity of special measures for reconstruction. Thus it was ascertained that jam manufacturers were in need of large quantities of packing cases, and they were supplied with the names of case manufacturers who had contracted with the Department.

BUILDING AND BUILDING MATERIALS.

After the Armistice all outstanding demands and contracts were reviewed and restricted to the minimum; in certain cases new demands, which have been extremely small, have been fulfilled from surplus stocks.

As most of the contracts requiring cancellation were terminable at short notice the Break Clause was utilized to a very small extent. The Clause had been included in a number of Building Works Contracts, and cancellations were effected on this basis without difficulty.

About 200 orders were terminated by notice or cancelled, and where immediate cancellations were made negotiations were generally carried through without any claim being put forward for compensation. The principal contracts which were allowed to run on were those for partly completed hospitals and east coast defence works which formed part of a permanent scheme.

No difficulty was experienced in the case of controlled materials such as cement, roofing felt, asbestos sheeting and tiles. The general shortage of cement made the disposal of outstanding quantities easy, and the removal of the control of roofing felt, which was based on contract by negotiation, was effected by notice of termination and the substitution of running contracts without commitment as to quantity. Similar action was taken with regard to asbestos-cement sheeting.

The difficulties which might have been experienced in placing firms on a peace footing have been largely removed by the Government Housing Scheme, the supply of materials for which has been entrusted to the Department. Most of the building trades had been hard hit by the war, and in the brick, slate and stone industries particularly, production had been reduced to an almost negligible quantity. The output of the cement industry had been greatly stimulated for war purposes, and the effect of this is being felt in the transference of the industry to a peace basis.

The above remarks apply to a smaller extent to the brick-making industry. During the latter part of the war bricks had to be substituted for timber in the aviation and other military building programmes. Though there were over 2,000 brickyards in the country with a maximum peace-time output of 6,000 million bricks per annum, the war output was reduced to one-sixtieth of that amount. Steps are, however, being taken to provide technical experts and facilities for labour, plant and fuel, and in addition financial assistance is being rendered by means of the purchase of output as produced, and the payment of 90 per cent. on account pending delivery for the Housing Schemes. Similar steps are being taken to assist the slate-quarrying and to a lesser extent the stone-quarrying industry. It is anticipated that local enterprise, assisted by the new Housing Schemes, will in most cases be capable of restoring the minor industries.

In the sections of the metal industries subsidiary to the building trade, it has been found expedient to negotiate with the principal trade associations in order to regulate and standardize output; strict control of prices has been arranged by mutual consent, and the chaotic and uneconomical production which would have resulted from unrestricted private enterprise has been thereby avoided.

ECONOMIES IN PURCHASE.

7. Considerable economies in prices paid have been effected through investigations made by the Costings Branch under Mr. N. E. Waterhouse, Director of Costings. Under his direction, work has been allocated to sub-sections composed of three or more Investigators in such a manner as to ensure their specialising in particular trades, such as woollen textiles, hosiery, leather and clothing, and dealing with these trades at the centre of the industry in each case.

Besides the general survey work of certain sub-sections in connection with the revision of flat rates and claims under wages awards of the Ministry of Labour and Ministry of Munitions, some 15,000 contracts have been submitted to the Branch, of which about 11,000 have been investigated at the contractor's premises; the remaining 4,000 have been examined at Headquarters, and recommendations have been made in these cases based on data acquired by means of previous investigations.

In regard to certain kinds of purchases such as the following, it is almost impossible to give any figures which would indicate the money values of the economies obtained, though it may be that costings investigations have been a most important factor in the fixing of prices.

- (1.) Purchases under running contracts, where the quantities to be supplied are not fixed but fluctuate according to the current requirements of the Department, *e.g.*, bricks.
- (2.) Articles purchased under requisition orders, the prices for which are assessed on a costings basis, without the submission of a quotation by the manufacturer.

Neither can it be readily ascertained how far the system of costings investigations has acted as a deterrent to extravagant tendering, although it is reasonable to assume that further reductions in prices have been obtained indirectly by this means. Moreover, in the case of certain supplies which are widely purchased by Government Departments, the savings effected by costings investigations on War Office contracts has resulted in other Government Departments being supplied, often in much larger quantities, on similarly advantageous terms. Only such savings, however, are recorded as apply to War Office purchases.

The following figures will, however, give some idea of the economies which are estimated to have been effected on certain classes of articles up to 31st March, 1919:—

	£
General Stores	4,232,000
Foodstuffs	4,475,000
Building Materials	330,000
Clothing (from April, 1918)	251,000
Medical Stores	429,000
Wool Textiles... ..	1,472,000
Tanning and Leather Goods... ..	4,187,000
Cotton and Jute Goods, &c.... ..	1,045,000

making a total saving of 16,421,000*l.* This figure is, however, exclusive of savings resulting from recommendations concerning changes in specifications.

The economies effected by the technical costings sections at the Cotton Textiles Office at Manchester, and the Jute and Flax Offices at Dundee, are not included in this statement, as these sections, though they work in conjunction with the Director of Costings, report to the purchasing section concerned.

It should be mentioned that the expenses of the Costings Branch, including travelling expenses, salaries, &c., are computed at less than one-third per cent. of the estimated savings.

LABOUR PROBLEMS.

The labour problems with which the Department has had to deal fall under two main heads. The first comprises questions concerning the maintenance of a minimum supply of labour sufficient to ensure the timely completion of War Office contract work; the second, questions relating to wages and to the conditions of employment under which such work is carried out.

Labour Supply.—The fact that the Department has during the war absorbed the output of established industries, and has not, like the Ministry of Munitions, been

compelled to create new industries, has largely obviated the necessity for extensive measures to increase the labour supply in those trades. On the other hand, the urgent demands for men put forward by the military authorities in the early months of the war necessitated increased watchfulness to prevent the removal of essential men from Army contract work.

During the last year of the war, many of the younger operatives whose services, as in the jute and boot trades, were indispensable, became liable for military service under the Decertification Orders of the Ministry of National Service, or on account of the general lowering of age limits at the time of the revision of the Certified Occupations list in September, 1918, and it was found that the method of securing their exemption by means of correspondence from Headquarters was inadequate.

Accordingly five regional representatives were appointed to negotiate locally with the eleven regional officers of the National Service Ministry. This system, which continued until the time of the Armistice, not only greatly expedited the performance of the work, but also enabled the Department to furnish the National Service Ministry with fuller information concerning the trades in which it was interested. These officers also acted in liaison with the Divisional Officers of the Ministry of Labour, and secured for the Department a fair share of such unemployed labour as was suitable for Army contract work.

After the cessation of hostilities the Divisional Representatives, as they were re-named, acted in conjunction with the Ministry of Labour Divisional Officers in order to obviate distress caused by possible ill-advised cancellation or reduction of Army contract work in districts where unemployment was, or was likely to become, acute. Particulars of all proposed cancellations of contracts were submitted to the Divisional Officers, and on representations from them the various purchasing sections of the Department were consulted with a view to the placing of fresh contracts or the prolongation of existing orders to find employment for displaced labour. It was, however, generally found that difficulty did not arise from the cancellation of War Office contracts to anything like the same extent as from the numerous discharges of unskilled women workers on munitions work; and after careful consideration the scheme was abandoned on 12th January last.

Until 1st February, when new regulations governing the demobilization of men from the Forces became operative, the Department concentrated its energies on securing the release from military service of pivotal men in order to decrease unemployment, and the particulars of 2,810 such men were submitted to the Ministry of Labour.

Wages Questions.—As the cost of living increased the number of applications for advances in wages were maintained, and industrial unrest, though somewhat less prominent in 1918 than in the previous year, was still a cause for anxiety. A large number of consequential demands for the $12\frac{1}{2}$ per cent. increase were put forward by a variety of trades, and there was some dissatisfaction with the wages obtaining in the heavy clothing and allied trades, in which increases in wages had not been commensurate with those in "munitions" industries. The number of industrial disputes referred to the Ministry of Labour from 1st January, 1918, to 10th March last was 140, of which 61 involved the stoppage of work. Generally speaking, however, the Department was able to secure the speedy reference of disputes on contract work to arbitration, and by close contact with labour organizations to maintain production in the interval before the issue of the arbitrator's award; so that, despite the necessity for greatly increased production owing to the Department's obligations to undertake much of the equipment of the American Army, Army contract work suffered but little from strikes.

In conjunction with the Ministry of Labour and trade organizations, the Department made during 1918 a determined effort to secure some degree of uniformity in the wages paid on its work, notably in the building and tanning trades. These attempts, though only partially successful in the case of the former trade, certainly bore fruit in the case of the latter; and whereas hitherto various non-craft unions, each with its separate sphere of influence limited by geographical or industrial demarcations, had out-bidden one another in application for wages advances, all expressed their willingness to combine in order to secure some common reference to arbitration such as was made periodically in the engineering trade.

Much of the Department's administration of wages questions has been taken away by the Wages (Temporary Regulation) Act, which lays on the Ministry of Labour the responsibility for maintenance of the "prescribed" or "substituted" rates provided for under the Act. A few cases have, nevertheless, been referred to this Department by the Ministry of Labour for settlement on a Fair Wage basis, and it appears likely, now that the war pressure is relaxed, that a general reversion to this principle in the administration of wages problems will take place.

IRISH BRANCH.

In accordance with the instructions of the Secretary of State, a Receipt and Inspection Depôt was formed in Dublin with a view to developing the manufacturing resources of Ireland for Army purposes and to organizing the rapid examination and delivery of stores manufactured in Ireland. This largely reduced the difficulties with which Irish contractors were faced, and which has been the cause of numerous complaints.

The organization was placed in charge of an officer appointed by, and representing, the Surveyor-General of Supply, and in addition to the performance of administrative duties as directed by the Surveyor-General of Supply, has carried out executive work in conformity with the instructions of, and in direct communication with the various departments concerned, Contracts, D.D.O.S. Woolwich, C.I.R.E.S. and R.A.C.D.

Weekly reports have been rendered by this officer concerning general questions of principle and policy in the administration of contracts placed in Ireland, and the utilization of the resources of that country.

In the autumn of 1918 the Department found it necessary to carry out a close investigation of the conditions prevailing in the hosiery trade in Ireland, particularly into the economic results of the employment of cottage workers in the western counties. The information furnished by the Irish branch was of considerable assistance in dealing with this most troublesome question.

ARMY SALVAGE DEPARTMENT.

Previous to the formation of the Army Salvage Department at the end of 1917, steps had been taken by the various military authorities at home and abroad to deal with Army stores discarded as worn out or surplus to requirements, but the measures taken were both unco-ordinated and incomplete.

The new Department therefore undertook to organize collection of surplus and waste products and to endeavour, as far as possible, to supply the needs of one service from the material rejected by another, and to dispose of that which had become wholly useless for Army purposes to the best financial advantage.

It was not proposed that the Department should relieve the various military authorities of their existing functions in regard to salvage operations, but that under its direction surplus stores which could not be dealt with locally should be collected, and if immediately available for re-issue should be forwarded rapidly to a pre-determined destination. In order to secure the maximum of utility from such stores, close co-operation has been maintained between the Salvage Department and the various purchasing sections, and no new stores have been purchased until it has been ascertained that the War Office has no supply on its hands of returned stores suitable for the purpose contemplated.

In order to further the supply of such materials from the home areas, a Deputy Assistant Quartermaster-General (Salvage) was appointed in each Command in March, 1918, to organize the collection of waste products from the various military centres and camps, and to forward the material collected for disposal by the Department or, with its concurrence, to effect sales locally. These officers, besides performing the functions specified, have devoted their energies with considerable success towards solving problems of interior economy in their respective areas.

Salvage depôts have been set up in various parts of the country for the treatment of material which is either unfit for Army purposes or requires renovation before re-issue. In the case of the former class, such portions of the materials as can be re-utilized, *e.g.*, the waist-belt hooks or worn out tunics, are removed, and the remainder reduced to a marketable condition for disposal commercially.

The Department has also undertaken the purchase from contractors of waste cuttings and of stores which have never passed into service, but which have been rejected on inspection, and have treated them in a similar matter. This arrangement has proved beneficial both to the contracting firms and to the Department.

Periodical sales have been held, with full co-operation with the industries concerned, of products which, though useless for Army purposes, have still some commercial value, and have proved most successful from the financial standpoint.

The above measures, which were necessitated by the enormous demands for supplies and the difficulties experienced in meeting them owing to shortage of raw materials, shipping space and labour, have made possible the provision of greatly increased supplies to the British Army, the Allies and to industry generally.

Some idea of the extent of the Department's activities both in the collection and disposal of surplus material may be gathered from the following figures:—

Collections.—The amount of salvage collected in France during 22 weeks previous to 1st February last was approximately 13,724,840*l.*, while the weight of empties and salvage materials exported from France to the United Kingdom during the 24 weeks previous to the 15th March last was as follows:—

	Dead weight tons.
Ammunition empties	26,086
Army Service Corps empties, &c.	7,752 $\frac{1}{2}$
Textiles and paper-making materials	11,283 $\frac{1}{2}$
Rubber	1,937 $\frac{1}{2}$
Leather	451 $\frac{1}{2}$
Metals	1,988
Miscellaneous salvage	2,152 $\frac{3}{4}$
	<hr/> 51,651 $\frac{3}{4}$ <hr/>

Disposals.—The amounts realized from sales of principal items dealt with by the Department at home during 1918 were:—

	£
First quarter	705,389
Fourth quarter	888,221

Of total sales since the work of the Department commenced, the under-mentioned items, for which statistics are available down to 31st January last, are the most interesting:—

	£
Boots	626,405
Rags	3,175,993
Woollen cuttings	946,435

while during the same period sales of the less important items have been as follows:—

	£
Cotton cuttings	54,272
Canvas sacks	323,824
Gunny	66,492
Metals	179,722
Paper	124,464
Rubber	55,548
Sheepskin cuttings	20,913
Timber	18,221
Leather	11,603
Overseas hides and horse bye-products	27,850
Miscellaneous	31,810

The total sales effected by the Department from its inception till the end of January last have realized the enormous figure of 5,722,910*l.*

The following illustrations will serve to show the progress made in the sale of stores by the Department at home:—

	Weekly average, January, 1918.	Weekly average, Fourth Quarter, 1918.
	£	£
Boots	2,859	9,093
Cotton cuttings	643	1,493
Canvas sacking, &c.	499	3,995
Metals	41	4,743
Woollen rags and cuttings	20,965	35,932
Waste paper	Nil	6,717

In addition to the organization of sales of surplus materials at home, the Department has arranged for the disposal of unserviceable stores in the various theatres of war to the following amounts:—

France—					£
October, 1918	11,310
November, 1918	9,621
December, 1918	10,281

* The figures shown do not include any rubber returned to or sold by the Ministry of Munitions.

NATIONAL SALVAGE DEPARTMENT.

The functions of the National Salvage Department are of two kinds, firstly to take direct action in the conversion of waste matter into useful material, and secondly to a much greater extent to stimulate salvage work throughout the country by means of suggestion, propaganda, and technical advice. It is not intended that the Department shall relieve other Government Departments, municipal authorities and similar bodies of their existing duties in respect of the elimination of waste, but shall only take direct action where such bodies are unable or unwilling to undertake the work of collection and disposal or special needs call for drastic action.

The Department's activities of this kind have therefore been confined to the formation of a company with a capital of 50,000*l.*, allowed by the Treasury from Army funds. This Company, controlled by the National Salvage Council, was called National Waste Products, and absorbed Army Waste Products, Ltd., which had dealt only with army waste products. It was run on wholly commercial lines, and possessed both research laboratories and factories in various parts of Great Britain for treating such waste material as condemned foodstuffs and butchers' offal and converting them into foods for stock, or extracting valuable raw materials from them for future use. A considerable amount of successful experimenting has also been carried out by the Department, as for instance, in the matter of economy in household fuel, and information concerning the results of these experiments has been placed at the disposal of municipal authorities and the general public.

Certain municipal authorities had, of course, schemes for the utilization of household and factory refuse before the formation of the National Salvage Council, but since the inception of the National Salvage Scheme, local activities in this direction have enormously increased, and machinery for sorting and treating such material has been purchased or ordered in far greater quantities than before. This it may be claimed is a direct result of the Department's activities.

Where local authorities have embarked on schemes of their own, the Department has kept in close touch with them, and has been ready to offer advice concerning the installation of plant, and the general perfection of the schemes. It is obvious that the results obtained from these activities cannot easily be recorded in statistical form, but without doubt a great amount of wealth has been conserved for the country by means of salvage operations of this kind. Of the returns accruing from direct undertakings, those from the National Waste Products factory in Scotland, which extracted great quantities of oil from condemned herrings, were the most profitable.

Campaigns to urge diminution of wastage in such articles as tins, rags, coal and glass, have been carried out in the Press by wide-spread advertisement. The Publicity Department has kept in close touch with the Municipal and Trade Journals, and has made arrangements with the Ministry of Information for the circulation throughout the country of a number of cinematograph films illustrative of the results obtained by salvage. Despite the restrictions on the quantity of paper available for newspapers, the Department has been able to give wide publicity to its various schemes for the elimination of unnecessary waste; appeals have been put forward for the collection of fruit stones and nut shells in order to provide material for anti-gas requisites; and arrangements have been made for the publication of half a column of salvage propaganda weekly in about 50 of the principal provincial newspapers. It is estimated that during the last 10 months at least 5,000 references to the salvage campaign have appeared in the Press.

The objects of the Department were furthered by a salvage exhibition held at the Annual Savoy Fair, and this proved of great interest both to municipal engineers and to the general public.

Salvage in rural districts have been organized, and the Rural Section of the Department under Lady Amherst of Hackney, has done much useful work in this direction. Voluntary collectors in other districts have also co-operated, and in all the number of collectors has considerably exceeded 1,000. All proceeds have been devoted to the Red Cross or other charities.

Careful investigations have been made into the relative costs of various methods of disposing of household refuse, and it has been decided that even for small towns of 10,000 inhabitants, screening and sorting refuse is more economical than any other method. By this method, paper, tins, bones and rags, besides enormous quantities of cinders with a very high calorific value can be recovered and re-utilized. Conferences have been held to consider the problem of the economical treatment of sewage, and it is apparent that a wide field is laid open for further exploration in this direction with promising prospects of success.

The Department has carried out successful experiments with various methods of de-rusting and re-conditioning metal tools, machines, and milk-churns, and has also taken the initiative in designing a machine for the handling and baling of derelict barbed wire used for entanglements. Experiments with this machine, carried out in France, proved wholly satisfactory.

Further experiments for the recovery of potash and nicotine from tobacco stalks which have hitherto been destroyed or sold for export at a low price have now been concluded, and facilities are being given to manufacturers in this country to benefit by the results.

Markets have been found for a multiplicity of waste products, but the savings effected by these means can only be partially estimated. It must be borne in mind that the Department has cognizance of only the first transaction, while the nature of salvage is such that the process of buying and selling products formerly accounted of no value, and often composite in character, may be repeated indefinitely, and, particularly when a new source of supply is opened out to buyers, the market will be extended gradually by the operations of other traders in the same industry.

Experience has, however, proved that, owing to wide-spread appeals and facilities for instruction, not only have municipalities, Government offices and trade and industry generally been induced to give closer attention to the potential results of salvage, but the advantages of thrift and economy in the general management of the household have been demonstrated and habits inculcated in the public which will tend to add permanently to the national wealth.

DEMobilIZATION AND REDUCTION OF STAFF.

The following figures show the comparative numbers of staff in the various Directorates at the date of the Armistice, the date of transfer to the Ministry of Munitions (Supply), and for the week ending 5th May last:—

	11th November, 1918.	10th March, 1919.	5th May, 1919.
Directorate of Contracts	733	515	472
Directorate of Raw Materials	1,890	1,536	541
Directorate of Army Priority.. .. .	115	50	33
Directorate of Costings	56	45	35
Directorate of Army Salvage	166	167	35*
Directorate of National Salvage	37	36	17
Total	2,997	2,349	1,133

In addition, it should be stated that the Directorate of Army Priority was wound up on the 31st May, 1919, and arrangements have been made to transfer such portions of the Directorate of National Salvage as still remain to the Local Government Board at the end of the present month. The sections of the Army Salvage Branch which were placed under the Ministry of Munitions in March last have been distributed among the Disposal Board. Reductions which have taken place in other sections of the branch have been due to a decrease in the volume of work undertaken, and not to reorganization.

* This staff remains under the War Office, not having been transferred to the Ministry of Munitions.

SECTION 3.

A BRIEF RECORD OF THE "ARMY SALVAGE BRANCH" NOW
CONSTITUTED AS "THE SURPLUS STORES AND SALVAGE BRANCH."

(October, 1919.)

FORMATION OF THE ARMY SALVAGE BOARD.

1. Consequent on visits by the Surveyor-General of Supply to France and Richborough, in November, 1917, a meeting of Members of Council and Directors was arranged, at which the Surveyor-General of Supply proposed that a Board should be formed called the "Army Salvage Board," of which the Quartermaster-General was to be the Chairman. It was explained at the meeting that the object was to save for the purpose of re-manufacture the very considerable quantities of unserviceable stores which were, at that time being dumped and deteriorating both in theatres of war and at home, and thus relieve the urgent demand for raw materials for the purpose of munitions of war, the greater part of which had to be imported.

The Board was constituted, and in addition to Members of Council, included some civilians.

ARMY SALVAGE DIRECTORATE.

2. An organization set up to act as the Executive of the Board was called the "Army Salvage Branch." This was composed of a Controller of Salvage, with the rank of Major-General, an Assistant Director as personal assistant to the Controller; a Deputy Director in charge of Foreign Theatres of War, assisted by an Assistant Director; and a Deputy Controller, who was in charge of the disposal of Salvage materials. It was designed that the latter Deputy Director should have under him a number of Assistant Directors representing Army Ordnance Department, Supplies and Transport, Royal Engineers, Air Force and the Ministry of Munitions. The only paid Assistant Directors, who were appointed, were the representatives of the Army Ordnance Department and Supplies and Transport, and in addition there was appointed a civil Assistant Director who was to be entirely in charge of the actual disposals, and his sub-section became known as Salvage 3. (Disposals).

DEPUTY-ASSISTANT QUARTERMASTER-GENERALS (SALVAGE) APPOINTED IN COMMANDS.

3. In March, 1918, another Deputy Director was appointed for the purpose of Salvage in Home and Foreign Commands, other than Theatres of War. At the same time Deputy-Assistant Quartermaster-Generals (Salvage) were appointed in the seven Home Commands, and later a Staff Captain in the London District.

CONTROLLERS OF SALVAGE.

4. The first Controller of Salvage was Major-General L. W. Atcherley, who was succeeded in June, 1918, by Major-General Sir John Steevens, who again was succeeded in May, 1919, by Brigadier-General A. A. McHardy.

SALVAGE 2.

5. The functions of Salvage 2 extended to transport of salvage materials to British ports, and later was authorized by the Army Council to undertake control of the whole of the transport of stores to England on behalf of the Ministry of Munitions.

FUNCTIONS OF SALVAGE 3. (DISPOSALS).

6. The first definite task undertaken by the Salvage Branch was the clearing up of the accumulations at Richborough. The section known as Salvage 3. (Disposals) was extended into an organization which undertook the duty of receiving, sorting and conditioning salvage materials for redistribution for direct use, or for manufacture, to the public by sale, or by issue to Government Contractors.

7. The original intention was that this portion of the Army Salvage Branch should be entirely civilian in character. In fact it borrowed a few Civil Servants and other civilians from various contract branches; but a regular establishment was never authorized, consequently the greater part of the work had to be undertaken by disabled and unfit officers.

8. The salvage of woollen rags, sorting and distribution of them was already conducted by the Army Ordnance Department at and from its principal centre of Dewsbury, but the Army Salvage Branch exercised an administrative control over the operations. So far as figures are applicable, the greater amount would be represented by transactions in woollen rags.

9. The next most important item was represented by the handling, conditioning, repair and sale of unserviceable boots. The boots were subject to selection in the first case by the Army Ordnance Department for the purpose of retrieving those boots which were still in a condition for re-issue to the troops; the remainder were divided into five grades, of which some were offered for sale without repairing, some with slight repairs, others as "repairable" and the lowest, or fifth grade, were practically only scrap leather. The value of boots so sold amounted to a very substantial amount. For the purpose of treating the boots, the section had two main depôts—Southall and Irlam respectively—but conducted subsidiary operations at the White City, Regent's Canal Dock, Leeds, Southampton and other Ordnance establishments. During the time of its existence Salvage 3. (Disposals) disposed of salvage materials which were valued at £6,000,000.

TRANSFER TO THE MINISTRY OF MUNITIONS OF THE FUNCTIONS OF DISPOSALS.

10. On 10th March, 1919, Salvage 3. (Disposals) and the depôts and personnel were transferred to the Disposal Board of the Ministry of Munitions, and on 1st April the remainder of the Section of Salvage 3. followed them. Coincidentally with the transfer of the functions of Disposals to the Ministry of Munitions, the Army Council imposed on the Branch the duty of co-ordinating all reports of all surplus stores to the Ministry of Munitions, and its organization was modified and adapted to that purpose.

The charter governing the work of the Branch at this epoch was Army Council Instruction 304, dated 8th May, 1919, which made it clear that though the Ministry of Munitions were responsible for all disposals, the Army was to be responsible for handling, storage and movement of all surplus stores.

FUNCTIONS OF CONTROLLER OF SALVAGE AND SURPLUS STORES MODIFIED.

12. These were amplified as far as the Branch was concerned by a War Office Memorandum Instruction of April, 1919, which defined the functions of the Controller of Salvage and Surplus Stores relating to—

- (a.) Responsibility for notifying surplus stores to the Disposal Board.
- (b.) The position of the Controller of Salvage and Surplus Stores as liaison between the War Office and the Disposal Board.
- (c.) Responsibility for statistics.

13. At this juncture, salvage work at home began to fall away—partly because the accumulations were less, partly because no personnel was available for salvage, and partly because the market preferred to get new raw material rather than to recondition salvaged scrap, as, for instance, in the case of old biscuit tins.

REDUCTION OF STAFF.

14. The establishment at this juncture consisted of—

One Controller,
Two Deputy Controllers,
Three Assistant Controllers,

and two attached officers.

At the end of May, 1919, it was found possible to dispense with one Deputy Controller who had specialized on Salvage in Commands.

The Branch was then reconstituted as follows:—

Salvage 1.—An officer dealing with personnel and general questions.

Salvage 2.—Two officers dealing with all surplus stores abroad.

Salvage 3.—Two officers dealing with all surplus stores at home.

Salvage 4.—Two officers dealing with salvage and statistics.

REMOVAL OF LIMIT ON SALES IN COMMANDS.

15. Up to this time Deputy-Assistant Quartermaster-Generals (Salvage) and Directorates in Commands had only been authorized to conduct sales up to £20 for any one transaction. It was becoming obvious that to clear dumps, camps and accumulations quickly and satisfactorily a higher limit was necessary; and after some discussion with the Disposal Board it was settled that Deputy-Assistant Quartermaster-Generals (Salvage) and Directorates in Commands could sell up to £100 for any one transaction. This considerably expedited the work of clearing accumulations.

16. In June, 1919, it became apparent that work in connection with surplus stores, including their statistical records, was to be the feature of the Branch.

METHOD OF DISPOSAL OF SURPLUS STORES.

The process of declaring stores as surplus was roughly as follows:—

Directorates at the War Office telegraphed—at the instigation of the Controller of Salvage and Surplus Stores—declaring all stores of certain classes or under certain Vocabulary Sections, as surplus. When in doubt Directorates abroad referred cases to Directorates at home. The Director at home notified the Disposal Board, through the Controller of Salvage and Surplus Stores, and this constituted the “throwing-up” as it was officially called.

At home the process was simple and “throws-up” from home and abroad came in very rapidly.

WORK OF THE STATISTICAL SECTION.

17. The question of Statistics loomed very largely in June, 1919, and much time was devoted to ensuring that details of all stores and installations which had ever been “thrown-up” at home or in any theatre of war abroad came to be recorded in the Controller of Salvage and Surplus Stores.

Statistics included valuations of “throws-up,” all items; stores given to other Departments and other Governments, and overhead charges incident on the ruling that the Military Authorities remained responsible for storage, handling and guarding all Surplus Stores.

LIAISON BETWEEN THE WAR OFFICE AND THE MINISTRY OF MUNITIONS.

18. Before the creation of the Branch, the various questions of policy or detail arising in connection with stores becoming surplus not only within the Empire, but as far off as the Trans-Caucasus, Vladivostok, and even in America, had been dealt with, by whichever branch or section was most interested; consequently such questions had seldom got settled. The Quartermaster-General, being in close touch with the Ministry of Munitions and understanding the working, created this Branch to be the bottle-neck between the War Office and the Ministry of Munitions.

It was difficult at first to persuade all sections and Directorates that this process was essential for efficiency, but by the beginning of July a very close and friendly liaison had been established, policies and precedents settled and recorded; in fact, the Secretary of the Disposal Board personally informed the Controller of Salvage and Surplus Stores that the system was so efficient and satisfactory that the Ministry of Munitions had asked all the other Government Departments to follow it. Particularly was the system satisfactory as regards “throws-up” in that it prevented stores being thrown-up by different people and so avoided the scandal and inconvenience of the same article of store being sold twice over. It was recommended that a similar system should be followed after all future wars where disposals on a big scale become necessary.

FURTHER REDUCTIONS OF STAFF.

19. In August, 1919, further changes took place and at the beginning of September the staff stood as follows:—

1 Controller.

Salvage 1.—1 Assistant Director, 1 Deputy-Assistant Director, dealing with all surplus stores at home and abroad.

Salvage 2.—1 Assistant Director, 1 Deputy-Assistant Director, dealing with personnel, salvage at home, and statistics.

20. The situation as regards "throws-up" had been rendered further secure by laying down certain signatures which alone authenticated throws-up. The signatures given were those of the officers composing Salvage 1. and Salvage 2.

21. Early in September, 1919, the Deputy-Assistant Quartermaster-Generals (Salvage) at home began to diminish, and in cases where replacement was not asked for officers were not replaced.

Their work had been to collect all salvage; of this such as pertained to Directorates was returned to them, and such as no one claimed was sold by the Deputy-Assistant Quartermaster-Generals (Salvage), who were temporary officers and commercial men.

22. Such then was the position in the middle of September, 1919, and such was the probable future policy of the branch.

APPENDICES.

23. Appendix A. shows the nature of articles salvaged and handed over for re-manufacture or re-conditioning during the war.

The Memorandum for the Public Accounts Committee, 1918, entitled "Report on the Work of the Department of the Surveyor-General of Supply," dated May, 1918, gives an exhaustive account of the salvage work carried out by the section known as Salvage 3. (Disposals) before transfer to the Ministry of Munitions.

Appendix B. shows the amount of sales in Commands carried out by Deputy-Assistant Quartermaster-Generals (Salvage) and Directorates at our instance.

Appendix C. gives interesting records regarding surplus stores.

APPENDIX A.

NATURE OF ARTICLES SALVED AND HANDED OVER FOR RE-MANUFACTURE OR RE-CONDITIONING DURING THE WAR.

Tins.	Nutshells and fruitstones.
Waste Paper.	Millboards.
Bottles and jars, glass.	Wax food containers.
Jars, stone.	Dry batteries and cells, electric.
Scrap iron.	Chestnuts.
Tips, boot, iron.	Hoof parings.
Wire.	Horse shoes.
Lead.	Horse hair.
Brass, scrap.	Horse clippings.
Leather, old.	Food cards and surplus forms.
Leather filings and parings.	Tooth paste tubes.
Rags.	Hospital and surgical dressings.
Cloth cuttings.	Broken crockery.
Old sacking, canvas and sandbags.	Straw
Rope and string.	Stencil wax.
Old rubber.	Steel girder.
Soap.	Oil waste.
Cork.	Steel scrap.
Broken glass.	Grocery ration tins.
Enamelled ironware.	Wooden boxes, containers, &c.
Oily rags and waste.	

APPENDIX B.

SALES.

1. Total sales from 11th November, 1918, to 31st July, 1919, in Home Commands, including sales by Deputy-Assistant Quartermaster-Generals (Salvage) and all administrative services except Inspector-General and Quartermaster-General Services—

	£	s.	d.
Aldershot Command	14,281	9	6
Eastern Command	53,802	9	5
Irish Command	1,956	13	6
Northern Command	23,062	8	2
Scottish Command	5,269	16	5
Southern Command	29,712	11	10
Western Command	13,596	0	7

London District (complete figures are not yet available, but are known to be small).

2. Total sales by Deputy-Assistant Quartermaster-Generals (Salvage) only, from 11th November, 1918, to 31st July, 1919—

	£	s.	d.
Aldershot Command	7,205	17	4
Eastern Command	1,005	13	7
Irish Command	3,600	3	8
Northern Command	1,299	9	10
Scottish Command	1,075	16	3
Southern Command	1,896	19	11
Western Command	1,973	1	5
London District	178	17	10

APPENDIX C.

1. Total sales (excluding animals) carried out by the Army at home and abroad from the date of the Armistice (11th November, 1918), to 1st September, 1919, amount to £ 2,124,095

2. Total sales of animals at home and abroad from 11th November, 1918, to 1st September, 1919, amount to 16,820,817

3. Total number of lists "thrown up" to Disposal Board from 11th November 1918, to 1st September, 1919, amount to 10,495 lists. (Treating 5,000l. as the maximum for one list.) Articles are recorded under about 10,000 headings.

4. Total tonnage of "produce" and "unserviceable stores" reported to the Disposal Board from 11th November, 1918, to 1st September, 1919, amounts to—

Metals, ferrous	tons	59,066½
Metals, non-ferrous	"	4,767¾
Miscellaneous	"	12,286¾
Boots, unserviceable	pairs	607,092

PART XI.—WAR HONOURS.

POWERS OF IMMEDIATE AWARD UNDER PARAGRAPH 1775, KING'S REGULATIONS, OF ORDERS, DECORATIONS AND MEDALS DELEGATED TO GENERAL OFFICERS COMMANDING-IN-CHIEF WHICH WERE IN FORCE ON THE 11TH NOVEMBER, 1918 (ARMISTICE).

FRANCE (Normal Powers).

As from 1st April, 1917, 200 D.S.Os. and 500 Military Crosses each month. This limit, however, was removed by War Office telegram, dated 3rd May, 1918, provided the standard of award was maintained.

D.C.Ms., Military Medals, Meritorious Service Medals, Indian Order of Merit, and Indian Distinguished Service Medals without limit.

EGYPT.

25 D.S.Os. and 60 Military Crosses a month from 1st November, 1917 (increased from 10 D.S.Os. and 20 Military Crosses, the allotment in force from 1st August, 1916).

D.C.Ms., Military Medals, Meritorious Service Medals, Indian Order of Merit, and Distinguished Service Medals without limit.

SALONICA.

10 D.S.Os. and 20 Military Crosses a month from 1st September, 1916.

D.C.Ms., Military Medals, Meritorious Service Medals, Indian Order of Merit, and Distinguished Service Medals without limit.

EAST AFRICA.

3 D.S.Os. and 6 Military Crosses a month from 1st July, 1916 (increased from 1 D.S.O. and 2 Military Crosses, the allotment in force from 1st January, 1916).

D.C.Ms., Military Medals, Meritorious Service Medals, Indian Order of Merit, and Distinguished Service Medals without limit.

MESOPOTAMIA.

20 D.S.Os. and 40 Military Crosses a month dating from 1st January, 1918 (increased from 10 D.S.Os. and 20 Military Crosses, the allotment before that date).

D.C.Ms., Military Medals, Meritorious Service Medals, Indian Order of Merit, and Distinguished Service Medals without limit.

ITALY.

6 D.S.Os., 15 Military Crosses a month as from 1st March, 1918 (reduced from 20 D.S.Os. and 50 Military Crosses, the allotment in force from 1st November, 1917).

D.C.Ms., Military Medals and Meritorious Service Medals without limit.

ADEN AND ADJACENT TERRITORY.

2 Military Crosses, 5 D.C.Ms. and 10 Military Medals a month as from 1st November, 1917.

Authority was also delegated, with the consent of the India Office, for the award of a proportional number of Indian decorations.

NOTE.—All immediate powers of award set out above terminated automatically with the Armistice.

NORTH RUSSIAN EXPEDITIONARY FORCE.

Monthly powers of immediate awards as from 1st August, 1918, and so long as hostilities continue—

10 D.S.Os. and 20 M.Cs.

D.C.Ms., Military Medals and Meritorious Service Medals—

100 a month, but not more than 30 D.C.Ms. to be awarded each month.

Powers of award are delegated in respect of British troops and of Allied personnel *under the Command of the G.O.C. the Force.*

These monthly powers of immediate awards were sub-divided as from 1st December, 1918, as under—

					D.S.Os. and M.Cs.			D.C.Ms., M.Ms. and M.S.Ms.
G.O.C., Archangel	50	60
G.O.C., Murmansk	12	40

In each case not more than one-third to be D.S.Os. in each month, the total of D.C.Ms. awarded not to exceed 30 per cent., and the number of Meritorious Service Medals not to exceed 20 per cent.

NOTE.—Immediate powers of award terminated on the evacuation of Archangel and Murmansk.

EAST RUSSIAN EXPEDITIONARY FORCE.

(Major-General Knox.)

Monthly powers of immediate awards as from 1st April, 1919, and so long as hostilities continue—

D.S.Os. and M.Cs., 36 (not more than 12 to be D.S.Os.).

Medals.—D.C.Ms., 45; M.Ms., 75; M.S.Ms., 30. Total, 150.

NOTE.—Immediate powers of award cancelled by War Office telegram, dated 20th April, 1920.

SOUTH RUSSIAN EXPEDITIONARY FORCE.

(Major-General Holman.)

Monthly powers of immediate awards as from 1st April, 1919, and so long as hostilities continue—

D.S.Os. and M.Cs., 36 (not more than 12 to be D.S.Os.).

Medals.—D.C.Ms., 45; M.Ms., 75; M.S.Ms., 30. Total, 150.

NOTE.—Immediate powers of award cancelled by War Office telegram, dated 4th May, 1920.

INDIA.

The Commander-in-Chief in India in connection with operations of the North-West frontier force and Baluchistan force.

Monthly as from 1st May, 1919 :—

D.S.O.	2
M.C.	6
D.C.M.	Unlimited.
M.Ms.	(Powers for award delegated to commanders of North-West frontier and Baluchistan force respectively.)

THE NUMBER OF OFFICERS, OTHER RANKS, NURSES AND CIVILIANS MENTIONED IN DESPATCHES AND REWARDS GIVEN IN THE SOUTH AFRICAN WAR, OCTOBER, 1899, TO NOVEMBER, 1900.

War Office,
Prince's Chambers, Pall Mall, S.W.,
1st August, 1902.

Statement showing the total numbers of officers and other ranks (of the Regular, Auxiliary and Colonial Forces), army nurses, and civilians who were mentioned by Field-Marshal Earl Roberts, V.C., K.G., G.C.B., &c., in his despatches, and rewarded for services rendered in South Africa up to 29th November, 1900, as published in the *London Gazette* of the 8th February, 1901; 16th and 19th April, 1901; 10th and 27th September, 1901; and 17th and 26th June, 1902; together with a statement showing the percentage of rewards to the number of troops employed.

April 1st, 1917, to March 31st, 1918	725,832,879	19	5
April 1st, 1918, to March 31st, 1919	824,759,300	4	1
Estimated expenditure 1st April, 1919, to 31st March, 1920	398,000,000	0	0

(b.) AVERAGE DAILY EXPENDITURE OF THE WAR.

(Army, Navy, Munitions, Shipping, &c.)

	£
October 8th to December 9th, 1916	5,714,000
April 1st to May 5th, 1917	7,457,000
April 1st to September 29th, 1917	6,648,000
November 1st, 1917, to January 19th, 1918	7,517,000
December 1st, 1917, to February 9th, 1918	6,107,000
April 1st, 1918, to June 8th, 1918	6,846,000
April 1st to November 9th, 1918	7,443,000
November 10th, 1918, to March 31st, 1919	6,476,000

(c.) WAR EXPENDITURE (DOMINIONS).

Total War Expenditure (partly estimated) up to 31st March, 1919 (in the case of Newfoundland up to 30th April, 1919):—

Canada	\$1,277,273,000
	(about £255,454,600)
Commonwealth of Australia	£288,000,000
New Zealand	£75,750,000
Union of South Africa	£32,950,000
Newfoundland	\$9,800,000
	(about £1,880,000)

The capitalized cost of pensions due to the war is given as follows:—

Canada	\$440,000,000
	(about £88,000,000)
Commonwealth of Australia	£100,000,000
New Zealand	£12,000,000
Union of South Africa	£2,250,000
Newfoundland	\$16,000,000
	(about £3,200,000)

The total direct expenditure of the Colonies and Protectorates has been estimated at some 10,000,000*l.*, to which must be added contributions amounting to over 15,000,000*l.* to the war expenditure of His Majesty's Government, and some 12,000,000*l.*, the ultimate incidence of which, as between this country and the Protectorates concerned, has not yet been determined.

(d.) VOTES OF CREDIT.

The complete list of War Votes of Credit is as follows:—

Date.	1914-15.	Amount. £
August 6th	100,000,000
November 15th	225,000,000
March 1st	37,000,000

Smaller States	127,000,000
	<hr/>
	1,465,000,000

During the war there was an all round increase of various classes of work in the War Office. In some instances the increase was an essential one, and certain new classes of work arising out of the war were necessitated by the employment of large staffs. Examples are given in Table H.

Considerable reductions of staff have been effected since the armistice (for figures see Table A) and reductions are still proceeding. The largest War Office unit that engaged upon Conscription duties, has been disbanded, and the large staffs employed on Casualty and Repatriation work have now practically disappeared. Conscription reductions have also been effected in the staffs engaged upon the distribution of soldiers' effects, demobilisation, transport of troops and stores and registration of graves.

Under a reduction scheme now completed the staff of the War Office has been reduced from 15,417 in August, 1918, to 7,434 on 1st April, 1920, and further reductions are dependent upon the rate of shrinkage in the volume of work in other

PART XIII.

WAR OFFICE (MILITARY AND CIVIL) STAFF
AND CORRESPONDENCE.

(April, 1920.)

At the outbreak of war the staff of the War Office, including the Audit Offices, Chelsea Hospital (Secretary's Department) and the Royal Army Clothing Department (Clerical Staff) was 1,926, and this staff began to expand very rapidly. By August, 1915, it totalled 6,522, and but for the fact that the Office was relieved of contract work connected with munition supplies upon the formation of the Ministry of Munitions in June, 1915, this staff would have been greater. By August, 1916, the staff was 12,672. In the early part of 1917 roughly 2,000 (400 to Air Board Office and 1,494 to Pensions Ministry) members of the War Office staff were transferred to other (newly formed) Government Departments. Despite these reductions the staff had increased to 16,624 by August, 1917. In the autumn of 1917 the Recruiting Staff (454) was transferred to the Ministry of National Service and the remainder of the staff of the Military Aeronautical Department (about 700) was transferred to the Air Ministry in the early part of 1918. The staff of the War Office, however, continued to increase, and at the date of the Armistice (11th November, 1918) was at its maximum, viz., 22,279 (*i.e.*, War Office and Audit Offices, 21,836; Prisoners of War Information Bureau, 393; Chelsea Hospital (Secretary's Department), 37; and Royal Army Clothing Department (Clerical Staff), 13).

Detailed figures as to the military and civilian staffs of the War Office at various dates, including 1st August, 1914, 11th November, 1918, and 1st April, 1920, the given in Table A.

Classes of Work Mainly Responsible for the Large Increase of Staff.

During the war there was an all round increase of various classes of work in the Office. In some instances the increase was an abnormal one, and certain new classes of work arising out of the war also necessitated the employment of large staffs. Examples are given in Table B.

Reduction of Staff.

Considerable reductions of staff have been effected since the armistice (for *net* figures see Table A) and reductions are still proceeding. The largest War Staff, viz., that engaged upon Censorship duties, has been disbanded, and the large staffs employed on Casualty and Separation Allowance work have now practically disappeared. Considerable reductions have also been effected in the staffs engaged upon the distribution of soldiers' effects, demobilization, transport of troops and stores and the registration of graves.

Under a reduction scheme now completed the staff of the War Office has been reduced from 13,477 in August, 1919, to 7,434, on 1st April, 1920, and further reductions are dependent upon the rate of shrinkage in the volume of work in the office.

Military Staff.

Table A gives information as to the military staff of the War Office at various dates, and in the following table details are given as to the numbers of staff and other officers on various rates of pay:—

	Staff Officers. With yearly rates of pay of—						Attached officers, with additional pay under Art. 150, Pay War- rant.	Others, mostly on regimental pay and allowances.	Grand total (of columns A, B and C).

* The proportion of fit to unfit was roughly 2 to 5.

† Based on figures for last day of preceding month.

† Allowances are issuable in addition.

|| Transfers from C to B held up temporarily.

Correspondence.

The numbers of papers dealt with by the Central Registry at various dates are given in the following Table. The figures do not include the large amount of correspondence dealt with by the Censorship staffs (now disbanded) and the Mobilization Directorate, nor the correspondence of the Audit Offices and the Prisoners of War Information Bureau.

The Table shows that, disregarding the Censorship, &c., correspondence, the number of registered papers dealt with in the Office at the date of the Armistice was more than 20 times the number in August, 1914. The further increase by November, 1919, was mainly due to the large accession of work during 1919 in connection with the distribution of the war gratuities due to the estates of deceased officers and soldiers. This work having now been practically completed, the figures show that there has been a sensible reduction in the volume of correspondence since the Armistice period. The volume of correspondence received in the Office is still declining steadily, but it will be years before it will be down to the pre-war level.

Date.	Number of papers dealt with.		
	Registered.	Unregistered. (Roughly 2½ times the number of registered papers during the war).	Total.
	a week.	a week.	a week.
August, 1914	3,500	6,500	10,000
November, 1918	72,472	181,000	253,472
November, 1919	103,203	258,000	361,203
December, 1919	48,598	121,000	169,598
January, 1920	46,852	117,000	163,852
February, 1920	36,052	90,000	126,052
March, 1920	36,184	90,000	126,184
April, 1920	30,943	77,000	107,943

Employment.

In September, 1914, an Employment Bureau was instituted at the War Office for the purpose of dealing with the numerous applications for employment received from retired officers and others. Up to 1st September, 1918, about 12,500 applications had been classified and circulated. Some 5,700 candidates were employed by the War Office and the Ministry of Munitions, and many others were taken up by other Government departments.

Applications for civil employment by officers invalidated out of the Service to the number of 1,392 were received and passed to the Officers Employment Department of the Ministry of Pensions; of this number 670 at least were found employment. Since March, 1918, these applications have been dealt with by the Ministry of Labour, Officers' Employment Department.

TABLE A.

Military and Civilian Staff at the War Office at various dates.

Date.	Military staff.			Civilian staff.			Total.	Net reductions during previous month.	Net reductions since 11th Nov., 1918 (excluding transfers to Ministry of Munitions).	Remarks.

1st March, 1920.	688	190	878	4,767	2,231	6,998	7,876	484	10,962	
1st April, 1920.	638	177	815	4,583	2,036	6,619	7,434	442	11,404	

The above figures include the staffs of the Audit Offices, Chelsea Hospital (Secretary's Department), Royal Army Clothing Department (clerical staff), and the Prisoners of War Information Bureau.

TABLE B.

Class of work.	Staff at outbreak of war.	Largest staff engaged at the War Office on the work during the war.	Remarks.
<i>Abnormal expansions of work.</i>			
Military aeronautics ..	19	1,100	Staff transferred to the Air Ministry.
Contracts ..	55	2,818	Transferred with 623 others (financial, &c., staff) to the Ministry of Munitions in March, 1919.
Pensions ..	17	1,500	Practically all transferred to Pensions Ministry.
Recruiting ..	18	454	Transferred to Ministry of National Service. This Ministry is now disbanded and its remaining functions retransferred to War Office.
Distribution of soldiers' effects.	10	1,852 (1st Nov., 1919)	This staff was reduced to 527 by 8th April, 1920.
Transport of troops and stores.	19	690	This staff has been reduced to 183 by 1st April, 1920, and the Movements and Railways Department created on 25th September, 1916, to deal with this work has been amalgamated with the Movements Directorate.
Medals ..	2	281 (now 450)	This staff will be fully engaged for at least 3 years.
Separation allowances ..	2	405	The staff engaged on this work was reduced to 41 by 1st April, 1920.
Registration and custody of War Office Papers.	63	614 (Sept., 1919)	Staff reduced to 362 on 1st April, 1920, and further reductions will be affected <i>pari passu</i> with the decreases in the volume of work and in the numbers of staff throughout the office.
Typing section ..	55	957 (Nov., 1918)	Staff reduced to 406 on 1st April, 1920. Further reductions dependent upon the general reduction in the volume of work in the office.
<i>New classes of work upon which large staffs have been engaged.</i>			
Casualties ..	New work	1,267 (plus a large "overtime" staff).	The staff of the Casualty Branches has been reduced to 87, and will have practically disappeared by the end of May, 1920.
Censorship	5,678	Staff now disbanded.
Graves registration	393	Staff reduced to 214 by 1st April, 1920.
Demobilization	1,228	This staff was reduced to 204 by 1st April, 1920.
Prisoners of War Information Bureau.	..	472	The staff of the Bureau totalled 126 on 1st April, 1920, and is now attached to the Secretary's Department.

The above figures include the staff of the Audit Office, Ordnance Department, Royal Army Clothing Department (clothing staff), and the Prisoners of War Information Bureau.

PART XIV.

SEPARATION ALLOWANCES AWARDS OF PENSIONS AND
SOLDIERS' EFFECTS.

(a.) SEPARATION ALLOWANCES.

Amount of Separation Allowance issued during each month since the beginning of the war, and number of families and dependants in receipt of Separation Allowance at the dates opposite which the numbers are given below:—

Month.	Estimated amount of separation allowance issued (allotment from soldier's pay not included).	Number of families and dependants in receipt of separation allowance.
1914.		
August	£ 600,000	..
September	900,000	..
October	1,300,000	..
November	1,700,000	531,500
December	1,850,000	..
1915.

June	9,405,000	2,969,800
July	11,927,000	2,987,900
August	9,668,000	3,033,400
September	10,964,000	3,048,800
October	11,287,000	3,048,700
November	10,216,700	3,013,800
December	11,094,700	2,953,200
1919.		
January	10,582,600	2,795,100
February	9,943,000	2,294,600
March	8,415,000	1,788,300
Total	124,571,000	
April	5,251,800	1,520,000
May	4,196,800	1,134,500
June	3,589,200	1,007,700
July	3,138,500	933,500
August	2,649,700	889,300
September	3,235,300	755,200
October	2,253,400	554,400
November	1,864,400	403,100
December	1,673,400	348,500
1920.		
January	1,048,800	282,400
February	937,400	243,200
March	1,003,300	191,800
Total	30,842,000	
Grand total	414,413,000	

The apparent discrepancy between the rise in numbers and the fall in payments is due to the fact that payments for wives being made on Mondays and for dependants on Tuesdays, the actual amount disbursed in each month depends upon the number of payment days falling within that month.

				Approximate numbers in payment.		Deaths reported.			
Month.				Wives and children.		Dependants.	Total.	Number.	Death rate per 1,000 per annum.
				Wives.	Children.

* Since September, 1919, additional allowances have been granted to the wives of disabled pensioners, and on 31st December, 1919, there were approximately 400,000 wives receiving these allowances; they are not included in this total.

(e.) SUMMARY.

Estimated number of persons in receipt of Army and Navy allowances paid by the Post Offices during the quarter ending 31st December, 1916.

Country.	Number of allowances.	Estimated population as at 30th June, 1914.	Percentage of allowances to population.
England and Wales (including Channel Islands and Isle of Man):—			
London	358,494	4,518,000	7.9
Provinces	2,238,210	32,443,000	6.9
Ireland	113,316	4,381,000	2.6
Scotland	311,165	4,747,000	6.6
Total	3,021,185	46,089,000	6.6

The persons included in this return are those paid allowances at Post Offices by means of the Special Allowance Forms. The bulk of the persons are in receipt of Army Family Allowances, but nearly 200,000 of the number draw Army Pensions and about 275,000 receive Navy Separation Allowances or Pensions.

(f.) SOLDIERS' EFFECTS.

At the outbreak of war the staff of the "Effects" branch of the War Office rapidly increased, and by the Armistice had reached a total of 777. Subsequently, owing mainly to the labour involved in the issue of the war gratuity in cases where the account was already closed, there were further large increases in the staff, the number on the 3rd November, 1919, being 1,852.

The following is a statement of "Effects" transactions for the past 10 years:—

Year.	Deceased and insane officers.		Deceased and insane soldiers.		Unclaimed effects handed over to the Royal Patriotic Fund Corporation.*
	New estates dealt with.	Issued on account of these and prior years.	New estates dealt with.	Issued on account of these and prior years.

* The amounts shown in this column represent stock which had been purchased with balances unissued years previously and transferred (plus dividends accrued) to the Royal Patriotic Fund Corporation, under section 10 of the Regimental Debts Act, 1893.

† Dividends only.

PART XV.

RESERVES OF SUPPLIES.*

(1st April, 1920.)

The following shows the supply situation and reserves, both at home and abroad :—

General.—The War Office are feeding at Home 186,000 mouths, and overseas 540,000 (including 280,000 in Mesopotamia, partly fed by us and partly by India), and 122,000 animals.

We have commitments in France, on the Rhine, in Egypt, Black Sea, Mesopotamia,

Home.—The Supply Reserve Depot, which is now the only main supply depot under the direct administration of the War Office, has an authorized reserve of 5,000,000 rations for men and 150,000 grain rations.

Commands have been instructed to hold 14 days' reserves to cover all requirements, 10 days of which should be independent of rail transit.

The Irish Command holds a 21 days' reserve.

France and Rhine.—The authorized reserve for France is 14 days, and that for the Rhine 30 days, to be held at Cologne. Stocks are satisfactory. Shipments are made from Deptford as and when required.

The stock of frozen meat in France will, it is anticipated, be more than sufficient to meet the diminishing requirements of the troops in that country until the final evacuation. As no more shipments are contemplated the General Officer Commanding, France and Flanders, has been directed to hand back to the owners of the Boulogne Cold Store such portion of the store as is in excess of his requirements. Steps are also being taken to transfer to the French some 700 tons of frozen meat now surplus to requirements.

A conference was recently held at the War Office to consider a revision of the rates to be paid to the owners for storage of Army meat, the proposal being that the rate as from 1st January, 1920, should be 30s. per ton per month. This proposal has now been agreed to by the financial authorities with retrospective effect from the date named.

As regards the Rhine supply, direct shipment to Antwerp will eventually be necessary, but at present the stock on hand at Cologne is sufficient for a considerable time to come.

Plebiscite areas.—Supplies for the British troops stationed in the plebiscite areas are forwarded periodically from Cologne, demands being submitted by the General Officer Commanding, Allied Forces, Danzig, to the General Officer Commanding-in-Chief, Rhine Army. Stocks are satisfactory. The question of coal supply for Danzig is at present engaging attention, the local supply being insufficient for the requirements of the troops. With a view to relieving traffic congestion from the Rhine, a suggestion has been made to the French Mission in London that possibly the French military authorities in Silesia might be in a position to forward coal to Danzig, for the use of the British troops, from Silesia. Pending a reply, the General Officer Commanding-in-Chief, Rhine Army, has been instructed to continue the supply by rail from Cologne.

Italy.—This theatre has now been evacuated.

Egypt.—In Egypt, as before, 60 days' reserve for the Egyptian Expeditionary Force are maintained. Egypt also acts as a base for the Black Sea Army and a separate 15 days' reserve is held for this purpose. Stocks are satisfactory.

* See also p. 841.

Black Sea.—The reserves authorized are—

15 days for the whole of the Black Sea Army, to be held in Egypt.
 45 days to be held between Constantinople and Chanak, } for the forces based
 45 days to be held by Caucasus, } on them.

Present stocks are satisfactory.

For the supply of frozen meat for Constantinople the Ministry of Shipping have allocated the s.s. "Mourino," to ply between Port Said and Constantinople, but in view of the increased consumption at Constantinople, the capacity of this vessel to maintain the supply is now under discussion. As regards Salonica, British requirements are very small, and by arrangement with the French, are obtained from French stocks.

Mesopotamia.—In Mesopotamia a reserve of 60 days is maintained. Stocks are satisfactory. The supply of frozen meat has previously been maintained from Egypt, but owing to freight difficulties the Board of Trade now propose to maintain it by diverting an occasional vessel from the Port Said route. The first diversion under this scheme has already been made, and Mesopotamia is now supplied with sufficient frozen meat to provide requirements up to June.

French.—Arrangements have now been made whereby the French lift their requirements of frozen meat for Constantinople and Salonica in their own tonnage from Port Said, supply being made from British Army stocks at that place. To facilitate matters at Constantinople the General Officer Commanding, Army of the Black Sea, has transferred to the French authorities at that place 150 tons cold storage space, retaining a similar capacity for his own requirements.

In addition to the supply for their Army of the East, the French also draw from British Army stocks at Port Said frozen meat for their Army at Beyrout. This is conveyed from Port Said in refrigerated trawlers belonging to the French Government.

PART XVI.

MESSING, RATIONS AND CANTEENS.

(April, 1920.)

SECTION 1.

MESSING AND ECONOMIES.

As the result of special administrative measures, very considerable savings and improvements have been effected in regard to the messing of the troops at home.

Schools of Cookery, established during the war in the United Kingdom, have now been closed, with the exception of the schools in the Aldershot, Eastern and Irish Commands, which are being retained pending the formation of a Central School of Administration, where the training will be continued for all Commands.

At the Schools of Cookery at home and abroad (including those already closed) the number of cooks trained to date is as follows:—

	Cooks trained.
At home	67,350
During the war, Schools of Cookery were established in France with each Army, and five schools on Lines of Communication, viz., Boulogne, Calais, Etaples, Havre and Rouen. Cooks trained at these schools	25,277
Cooks trained at School of Cookery established at Cologne for the Army of the Rhine	1,191
Schools trained at School of Cookery, Egypt	3,260
Schools of Cookery were also formed in Italy, Salonica, Constantinople and Mesopotamia, the last-named being still carried on. Approximate number of cooks trained	2,500
Total	99,578

As an outcome of the experience gained in these schools and its practical application to the feeding of units, combined with inspections by Inspectors of Quartermaster-General's Services and careful instruction by Instructors in Catering (in order to meet the exigencies of the food situation) it was found possible, in 1916 and onwards, to reduce the ration without detriment to the adequate feeding of the soldier. At the same time considerable savings to the State were effected, representing some millions of pounds per annum.

Early in 1917 it was decided to issue rabbits as an occasional substitute for the meat ration, and in this connection the Army Rabbit Skin Committee was subsequently formed for the disposal of the skins by units to approved buyers, and during the period of operations as many as 5,649,797 skins were disposed of, representing a cash value of 123,192*l*.

Instructors in catering were appointed to the armies in France, Egypt, Salonica, Italy and Mesopotamia to give instruction in the best way of dealing with the ration supplied.

In 1917, owing to the necessity for the closest supervision of all matters in connection with the messing of the soldier, officers in charge of messing were appointed, receiving a short course of instruction at a School of Cookery.

Women were extensively employed during the war as cooks and waitresses at convalescent hospitals, and officer cadet formations and large numbers of women cooks were also employed with units and formations throughout the country.

The system of unified messing, which was for some considerable period successfully applied to certain large centres in the Eastern, Southern and Western Commands, having fulfilled the purpose for which it was originated, has been discontinued.

The treatment of by-products of the ration has received special consideration. Since March, 1916, the collection and disposal of all bones, drippings, fats, &c., has been carried out through contractors appointed by the Committee for the Purchase of Army Camp Refuse. The fats were sold to soap makers, who during the war extracted the

crude glycerine required by the Ministry of Munitions for the manufacture of propellant explosives. The cash proceeds of the sales of these by-products were credited to the units concerned, and appropriated towards the improvement of the men's messing and the provision of increased pay for the regimental cooks. Other waste products, unfit for human consumption, were sold for animals' food. In former days broken meat and other table refuse were generally thrown into the swill tub and sold for a relatively small sum, but the systematic collection and disposal of this refuse has resulted in a very considerable increase in the amounts received.

The Committee for the Purchase of Army Camp Refuse ceased to operate on 31st March, 1920, but in view of the economies effected during the war in connection with the conservation of by-products of the ration, and the necessity for its continuance under peace conditions, the collection and disposal of all by-products of the ration is now being carried out under the direct administration of the War Office, in consultation with a representative of the trade.

In order to deal more efficiently with by-products at large camps, the erection of degreasing plants was sanctioned. Plants were established at Catterick, others at Winchester, Brocton (Cannock Chase), Larkhill, Tidworth, Aldershot, Upton Lovell and Grateley; small plants were also established at Fovant, Bulford and Portsmouth.

The establishment of these plants was determined by the satisfactory results achieved at Catterick Camp, where a plant was set up in May, 1916. Degreasing plants were erected at Etaples, Calais, Boulogne, Dieppe, Rouen, St. Omer, Havre, Kantara (Egypt), Salonica and in Mesopotamia.

The crude glycerine extracted from the fats collected from camps in the United Kingdom and from the British Armies in France during the year 1917, amounted to approximately 1,500 tons, sufficient to provide the propellant charge for 15,000,000 18-pr. (M.D.) cartridges. In 1918, 869 tons of crude glycerine were produced. This drop may largely be accounted for by the decrease in the meat ration and the substitution of sausages and rabbits for the meat ration. 17½ tons of glycerine were produced at Salonica during 12 months and shipped to the Ministry of Munitions.

The following return shows the results from economies in messing and the sale of by-products. Attention is drawn to the generally progressive character of the results, taking into consideration the great increase in the price of commodities which seriously affects the purchasing power of the 5½d. (now 6½d. as from 1st May, 1918) per diem messing grant.

Military Gardens and Farms.

With the object of making the Army self-supporting as far as possible in regard to vegetables, and of saving transport from place to place, units and formations were specially encouraged to extend the area and scope of their cultivations. During the spring of 1918 great efforts were made in many directions, with the result that the amount of land under garden and farm cultivation by the Army was increased from 610 acres at the end of 1916, and 3,492 acres in 1917, to approximately 6,500 acres in 1918. Many units produced the whole of their green vegetables, roots and potatoes, and a certain amount of grain and forage was also raised on Army farms.

Arrangements were made for assistance as regards finance and expert advice through the Command Agricultural Committees, one of which has been appointed in each Command to supervise the work generally.

SECTION 2.

SCALES OF RATIONS ISSUABLE TO THE TROOPS IN FRANCE AND AT HOME.

TABLE (i.).—STATEMENT SHOWING THE SCALE OF RATIONS ISSUABLE TO BRITISH AND DOMINION TROOPS IN FRANCE, WITH THE REDUCTIONS EFFECTED FROM THE BEGINNING OF THE WAR TO 21ST FEBRUARY, 1918.

Daily scale unless otherwise stated.

Article.	Field Ration (full scale) for fighting troops at the Front.						Rations for troops on Lines of Communication.

SECTION 4.

CANTEENS.*

(July, 1919.)

All Military and Air Force Canteens at Home Stations and in Egypt, Gibraltar, Malta, and Bermuda, with the exception of a very few which are still managed regimentally, are conducted by the Navy and Army Canteen Board. This system has been in force since January, 1917, when the Board, then the Army Canteen Committee, was given power to take over all canteens which were conducted by contractors. Naval canteens were taken over at the request of the Admiralty in June, 1917.

The Navy and Army Canteen Board conducted the canteens for the Expeditionary Forces in North Russia for the duration of the two campaigns, and on 1st July, 1919, assumed the conduct and control of the Officers Clubs, Canteens and Associated Enterprises, previously conducted by the Expeditionary Force Canteen Committee in France, Germany, Italy, Salonica, Constantinople and Mesopotamia. Statistics connected with the Board's undertakings are given herein and cover the period from 1st January, 1919, to 31st July, 1919.

Immediately following the Armistice in November, 1918, the Board was instructed to make special arrangements for feeding repatriated prisoners of war and troops arriving in the United Kingdom from the armies overseas for demobilization, and organizations under the charge of specially selected officers, were immediately established at the following ports: Leith, Hull, Harwich, Tilbury, Dover, Folkestone, Southampton, Weymouth, Devonport, Avonmouth, Liverpool, Holyhead, Stranraer, and Glasgow.

All returning prisoners of war were issued with a sit down hot meal on landing, where accommodation allowed for this, consisting of—

- 1 pint tea,
- $\frac{1}{2}$ lb. hot meat and potato pie,
- 3 oz. rock cake.

In cases where suitable accommodation was not available, a disembarkation ration was issued consisting of—

- 1 pint tea,
- 3 oz. rock cake,
- 1 bar of chocolate,

and on entraining a train ration consisting of—

- 8 oz. pork pie,
- $\frac{1}{4}$ lb. sweet biscuits,
- 2 ozs. cheese,
- 2 bars chocolate,
- 3 oz. rock cake,

for a journey of 6 hours. For a journey of 12 hours this ration was duplicated, and for a journey of 18 hours this ration was triplicated.

In addition to the foregoing, all repatriated prisoners of war were issued with a luxury parcel, the gift of the Expeditionary Force Canteen, consisting of—

- 1 pipe,
- 1 oz. tobacco,
- 20 cigarettes,
- $\frac{1}{4}$ lb. sweetened biscuits,
- 1 packet of chocolate or toffee.

These arrangements worked with admirable smoothness, and 162,793 prisoners were dealt with in the course of the operations. Troops arriving for demobilization were, and still are, issued with disembarkation and train rations on the scale as laid down for the repatriated prisoners of war, and to date 1,931,352 troops have been issued with these rations without any important hitch. This figure represents approximately the issue of 3,862,704 train rations. The number of ports at which these operations are carried out, has, in the course of the year, been reduced, and are now confined to Holyhead, Southampton, Dover, and Harwich, but recently organizations have been established at Liverpool, Glasgow, Leith, Newcastle and Hull, for the issue of disembarkation and train rations to troops evacuated from the North Russian Expeditionary Force bases at Archangel and Murmansk.

December, 1918	2,717
July, 1919	1,560

Average monthly revenue of the Board is as follows :—

				Average a month (approximately).
To 30th June, 1917, 6,796,000 <i>l.</i>	1,132,000 <i>l.</i>
To 31st December, 1917, 13,261,000 <i>l.</i>	2,210,000 <i>l.</i>
To 30th June, 1918, 17,604,000 <i>l.</i>	2,934,000 <i>l.</i>
To 31st December, 1918, 15,750,000 <i>l.</i>	2,625,000 <i>l.</i>
To 31st July, 1919, 14,007,495 <i>l.</i>	2,001,070 <i>l.</i>

The Board employ a staff of approximately 13,000 people in the United Kingdom. The Board also provide theatrical and cinematograph entertainments in the camps. The numbers of these establishments is given below :—

				Theatres.				Cinemas.
June, 1917	3	2
December, 1917	8	9
June, 1918	15	7
January, 1919	16	9 (2 mobile).
July, 1919	10	9 (1 mobile).

During the week ending 26th July, 1919, about 66,000 officers and men attended the various places of entertainment conducted by the Board.

(b.) *Canteens in Egypt, Palestine, and Sudan.*

Estimated number of canteens, hotels, mineral water factories, bakeries, &c., as at 31st July, 1919...	...	59
Approximate average weekly sales from 31st December to 31st July, 1919	...	55,750 <i>l.</i>
Tonnage of goods despatched to Egypt during 7 months ending 31st July, 1919	...	14,959 shipping tons.
Estimated retail value of goods despatched	...	860,356 <i>l.</i>

Hotels for officers on duty and on leave.—The Board conduct or have conducted hotels for officers at Jerusalem, Alexandria, and Cairo. They are or were conducted in every respect as first-class hotels, under the direction of experienced officers and civilians. The popularity of these hotels is manifested by the use made of them.

Refreshment rooms were conducted during hostilities at certain stations on the Palestine military railway, where hot and cold meals were provided.

Mineral water factories.—The Board operate six mineral water factories—three in Palestine and three in Egypt. The output of these factories at its height was 5,000 dozen a day, equal to 420,000 bottles per week, and at present it is approximately 250,000 bottles a week. The whole of the mineral waters required by the canteens and by the hospitals of the Egyptian Expeditionary Force are supplied from these factories.

Bakeries.—The Board operate their own bakeries and produce the bulk of their requirements of bread, rolls and cakes.

Breweries.—The Board control the output of three breweries, and provide approximately 10,000 barrels of beer a month. During hostilities the output was 16,000 barrels a month.

Motor transport.—The Board operated during hostilities a fleet of 60 motor vehicles, with their own mechanical transport depôts and repairing shops. Mobile canteens on lorries operated with front line troops.

Central canteens (shops) are conducted by the Board in Cairo and Alexandria, for the use of unattached officers, other ranks, officers' wives and nursing sisters.

(c.) *Canteens at Malta.*

Number of canteens, including mineral water factories and institutes at hospitals as at 31st July ...	41
Approximate average weekly sales ...	2,100 <i>l.</i>
Tonnage of goods despatched during 7 months to 31st July, 1919 ...	1,186 shipping tons.
Estimated retail value ...	75,425 <i>l.</i>

(d.) *Canteens at Gibraltar.*

Number of canteens, bakery and mineral water factories, &c., as at 31st July...	16
Approximate average weekly sales ...	2,200 <i>l.</i>
Tonnage of goods despatched for 7 months ended 31st July, 1919 ...	1,443 shipping tons.
Estimated retail value ...	57,234 <i>l.</i>

(e.) *Canteens at Bermuda.*

Number of canteens as at 31st July ...	6
Approximate average weekly sales ...	370 <i>l.</i>
Tonnage of goods despatched during 7 months ...	58 shipping tons.
Estimated retail value ...	1,818 <i>l.</i>

NOTE.—The bulk of supplies for Bermuda is obtained from Canada and the U.S.A.

(f.) *Russia.*

For the duration of the campaign in North Russia the Board conducted a full service of wholesale and retail canteens for the benefit of the North Russian Expeditionary Force. The following figures reflect the importance of the service rendered to this small force:—

(1.) *Murmansk.*

Tonnage of goods despatched to Murmansk during 7 months ended 31st July, 1919 ...	1,461 shipping tons.
Estimated retail value ...	89,154 <i>l.</i>

NOTE.—1,504 shipping tons, approximate retail value 162,000*l.*, were shipped by the Board to Murmansk during 1918.

(2.) *Archangel.*

Tonnage of goods despatched to Archangel during 7 months ended 31st July, 1919 ...	2,507 shipping tons.
Estimated retail value ...	185,267 <i>l.</i>

NOTE.—8,693 shipping tons, approximate retail value 1,086,000*l.*, were shipped by the Board to Archangel during 1918.

(g.) *France, Italy and Germany.**France and Italy.*

Number of canteens, bakeries, mineral water factories, officers' clubs, cinemas, &c. ...	234
Approximate average weekly sales (including officers' clubs) ...	206,898 <i>l.</i>
Tonnage of goods despatched for 7 months ended 31st July, 1919 ...	57,040 shipping tons.
Estimated retail value of goods despatched ...	6,474,026 <i>l.</i>

Germany.

Number of canteens, bakeries, mineral water factories, officers' clubs, &c. ...	13
Approximate average weekly sales (including officers' clubs) ...	59,070 <i>l.</i>
Tonnage of goods despatched for 7 months ended 31st July ...	3,347 shipping tons.
Estimated retail value ...	1,263,481 <i>l.</i>

Officers' clubs, rest houses and rest hostels.—The large extent to which these are used by officers clearly indicates that they have supplied an urgent need and are much appreciated.

In addition to running the canteens, clubs and rest houses already referred to, the organization has supplied meals to troops in leave billets to numbers exceeding 20,000 daily.

Meals are also being supplied on a similarly large scale to troops in demobilization camps on their passage through to England.

Bakeries, laundries, farms, piggeries and mineral water factories are conducted.

In regard to mineral waters, France is now, and has been for some time, practically self-supporting.

The entertainment of the troops is ensured by the provision of stationary and mobile cinemas, and since the demobilization of the troops commenced this branch has been largely developed.

The needs of the Army of Occupation on the Rhine have been specially studied by the Board, by the provision of special clubs for officers, and the taking over of appropriate buildings in which large and comfortable wet and dry canteens are conducted for other ranks.

Recently a first-class hotel was acquired for the special purpose of accommodating married officers with their wives.

(h.) *Constantinople and Salonica.*

Number of canteens, officers' clubs, bakeries, cinemas, &c.	21
Approximate average weekly sales	39,018 <i>l</i> .
Tonnage of goods despatched for 7 months ended	
31st July	4,134 shipping tons.
Estimated retail value	198,501 <i>l</i> .

The organization runs its own bakeries and also controls the brewing and output of two local breweries, with the result that the supply of beer to the troops has been well maintained and the prices charged the lowest possible.

The mineral water factories in this area have now been running satisfactorily for some time and are practically self-supporting.

(i.) *Mesopotamia.*

Number of canteens, officers' clubs, cinemas, &c. ...	32
Approximate average weekly sales	31,848 <i>l</i> .
Tonnage of goods despatched for 7 months ended	
31st July	2,873 shipping tons.
Estimated retail value	386,963 <i>l</i> .

In addition to the canteens, officers' clubs and associated enterprises mentioned above, a bakery and hairdresser's and tailor's shops have been continuously and successfully carried on.

SECTION 5.

(1.) THE UNITED SERVICES FUND.

The United Services Fund has its origin in the large funds which accumulated as a result of canteen trading during the war.

The policy of the Army Council during the war was to prevent any hasty or unnecessary spending of these funds, and to safeguard them for the general and individual good of all for whom or by whom they have been contributed. Their object was to maintain the original purposes for which the funds have accumulated, whether they were Central, Command, Regimental, or other funds, and to ensure that such monies, which are the property of the Army, should not be expropriated for other than Army uses, and to arrange for their proper employment in the interests of service and ex-service men and their dependants.

The funds in question were mainly derived from two sources:—

- (i.) The rebates payable to central funds from the gross takings of Regimental Institutes at Home. This central fund was known as "The Central Regimental Institutes Fund."
- (ii.) Profits from Expeditionary Force Canteens.

During the war grants to various charities and institutions organized in the interests of soldiers were made by the Army Council on the advice of a "Central Funds Representative Committee," which contained representatives of all ranks of the Army.

As, when demobilization was complete, the officers and men who contributed to the large funds accruing from canteen trading would be swallowed up in civil life, it was decided by the Government in July, 1919, to form a new organization representative of the interests of ex-service men and women, independent of any Government Department, to administer the funds derived from the accumulated profits of canteen trading for the benefit of the men who had served in the Army and the Royal Air Force but who have now returned to civil life, and their dependants. This organization became known as the "United Services Fund."

The Navy prefer to deal with their share of canteen profits independently and are not associated with the fund; similarly, the Dominions and Colonies retain their appropriate proportion of the total profits.

General Lord Byng was appointed Chairman of the new organization, and the funds derived from canteen trading up to 31st December, 1919, and the Central Regimental Institutes Fund were placed at the disposal of the United Services Fund to deal with at their discretion. The Fund was administered by a Council of Management of fifteen members, three nominated by the three chief ex-service men's associations (*i.e.*, The Comrades of the Great War, the National Association of Discharged and Demobilized Sailors and Soldiers, and the National Federation of Discharged and Demobilized Sailors and Soldiers), three nominated by the Chairman to represent ex-service men not members of an association, and three women representing ex-service women. The activities of the fund were divided into local areas, each with its local committee, and money was devoted to schemes propounded for the interests of the ex-soldier, as approved by the Council of Management.

The fund was incorporated by a Royal Charter, under which the beneficiaries in the fund are ex-service men and women and their dependants, the interests of serving soldiers and airmen, so far as current canteen profits are concerned, being under the care of the War Office and the Air Ministry.

(2.) THE UNITED SERVICES TRUSTEE.

By Army Order 19 of 1919, a trustee was appointed by the Army Council known as the Army Trustee, in order to provide a recognized and permanent custodian for Central, Regimental and other funds, the property of Army units or formations. The Trustee is a non-profit sharing corporation under the Companies Acts, with powers to act as temporary or permanent agent, custodian or trustee for monies or securities transferred to it by the Army Council and other military authorities.

The Directorate of the Trustee consists of three Directors nominated by the King, the Army Council and the Master of the Rolls, and four additional Trustees. The first nominated Directors were the Right Hon. Viscount Harcourt, General Sir Archibald Hunter, G.C.B., G.C.V.O., D.S.O., A.D.C., and Sir William Plender, G.B.E. The first additional Directors were the Right Hon. Lord Weir, the Right Hon. Sir John Simon, K.C.V.O., K.C., Major-General Sir Gerald Ellison, K.C.M.G., C.B., and Major R. L. Barclay, O.B.E. The Trustee has power to charge fees, and if the Trustee's income exceeds his expenditure, the money can be devoted to the benefit of the Army, as directed by the Army Council. The primary object of the institution of this Trustee was to provide for the safe custody of funds which, not being public money, exist for the benefit of the Army. The funds chiefly held by him are Regimental funds of disbanded units, and the funds which have accumulated as a result of the system of canteen trading by which a percentage of the gross takings (hitherto 2 per cent.) is paid into Central Funds for the benefit of the Army. He also holds, at the disposal of the United Services Fund, unexpended profits which have accrued from canteen trading up to 31st December, 1919.

In order to enable the Army Trustee to undertake similar work on behalf of the Navy and Air Force, the necessary powers were granted by the High Court, and the name changed to "The United Services Trustee."

In May, 1920, the United Services Trustee held the following amounts on behalf of:—

- (i.) The Army Council, approximately, 370,000/.
- (ii.) The Admiralty, approximately, 10,000/.
- (iii.) The Air Ministry, approximately, 31,600/.
- (iv.) The United Services Fund, approximately, 2,000,000/.
- (v.) Disbanded units, approximately, 400 such units had placed trusts of a temporary nature with the United Services Trustee, and about another 200 trusts of a permanent nature.

PART XVII.

MECHANICAL TRANSPORT ABROAD AND AT HOME.*

* These figures are for 4th November, 1918.

Note.—Pioneer battalions are not included under the headings "Battalions" and "Rifles."

PART XXI.

ENEMY PRISONERS OF WAR.

SECTION 1.

CAPTURED BY THE BRITISH FORCES.

TABLE (i).—PRISONERS OF WAR CAPTURED ON LAND AND AT SEA AND INTERNED.
(2nd September, 1919.)

Military.

Rank.	Western Front.		Other Fronts.				Total.
	Germans.	Austrians.	Germans.	Austrians.	Turks.	Bulgars.	
Officers	7,260	271	540	32	7,751*	95	15,949
Other ranks	311,878	10,158	9,428	571	142,290	8,815	483,140
Total	319,138	10,429	9,968	603	150,041	8,910	499,089

Naval.

Rank.	Throughout the whole war area.	
	Germans.	Austrians.
Officers	411	3
Other ranks	5,999	6
Total	6,410	9

From the monthly official returns the greatest number of prisoners of war and civilians interned at home and abroad at any one time was 491,131. These figures are taken from the return dated 20th January, 1919. Details as follows:—

TABLE (ii.) (a).

Nationality.	Military.		Naval.		Civilians.	Total.
	Officers.	Other ranks.	Officers.	Other ranks.		
<i>At Home.</i>						
German	6,282	93,759	70	1,332	18,204	119,647
Austrian	52	1,701	3,442	5,195
Turkish	1	..	96	97
Bulgarian	2	20	22
Other nationalities	5	126	131
Total	6,334	95,467	71	1,332	21,888	125,092

* Naval and Military are included in these figures

Nationality (including natives).					Military.		Naval.		Civilians interned (including women and children.)	Total.
					Officers.	Men.	Officers.	Men.		
<i>In France.</i>										
German	19	198,253	198,272
Austrian	4,144	4,144
Total	19	202,397	202,416
<i>Other Places.</i>										
German	511	7,769	69	800	12,402	21,551
Austrian	45	443	3	11	2,620	3,122

Bulgarian	81	6,921	47	7,049
Other nationalities	977	18,564	4	1	2,402	21,948
Total	7,246	136,522	89	852	18,914	163,623
SUMMARY.										
German	6,812	299,781	139	2,132	30,606	339,470
Austrian	97	6,288	3	11	6,062	12,461
Turkish	5,632	102,825	14	40	1,539	110,050
Bulgarian	81	6,923	67	7,071
Other nationalities	977	18,569	4	1	2,528	22,079
Grand total	13,599	434,386	160	2,184	40,802	491,131

Since the return of 20th January, 1919, was published, further returns in detail for an earlier date were received, in which it was shown that a number of prisoners of war had not been included. This applied more especially to Egypt, the previous figures having omitted 16,645 Turks who were captured in the Hedjaz. The following table is compiled from these returns, and is approximately correct:—

TABLE (ii.) (b).—RETURN SHOWING, BY NATIONALITIES, THE TOTAL NUMBER OF ENEMY PRISONERS OF WAR IN BRITISH HANDS JANUARY, 1919.

	Germans.	Austrians.	Turks.	Bulgars.	Others.*	Total.
United Kingdom	122,121	5,644	97	23	158	128,043
France	199,840	199,840
Italy	6,600	6,600
Egypt and Cyprus	7,821	735	77,911	131	13,057	99,655
Malta	1,301	318	312	23	124	2,078
Salonica	20	..	10,592	6,882	18	17,512
Mudros	700	700
Mesopotamia	11	..	18,387	1	794	19,193
India	1,941	356	11,126	..	7,193	20,616
Aden	3	..	85	88
Africa	3,649	160	6	..	281	4,096
Canada	1,767	589	11	8	16	2,391
Australia	4,402	895	9	2	369	5,675
New Zealand	429	57	1	2	11	500
West Indies	210	14	4	228
Total	343,512	15,366	119,159	7,072	22,106	507,215

Total combatants, 463,907. Total civilians, 43,308. Grand total, 507,215.

The number of *naval* prisoners of war was at its highest in July, 1919, after the sinking of the German Fleet at Scapa Flow; there were then 201 officers and 2,710 other ranks interned at Home, independent of those interned in other places.

The actual number of prisoners of war who passed through British hands during the war, including those who died, were repatriated, released, or passed from our charge in any other way, could only be ascertained by a prolonged search in the records of the Prisoners of War Information Bureau.

* "Others" include Arabs, Syrians, other non-Ottoman Turks and men of friendly nationalities such as Poles, Czecho-Slovaks, &c.

TABLE (iii).—PRISONERS OF WAR TAKEN BY THE BRITISH IN FRANCE.

Period.	Officers.	Other ranks.	Totals.
4th August to 31st December, 1914	101	6,266	54,047

Grand total	7,715	321,096	328,811

Salonica.

The total number of prisoners and deserters taken by the Allies on the Macedonian front between 1st January, 1916, and 30th June, 1917, was as follows:—

Bulgarian	12,739, including 2,871 deserters.
German	2,334 " 135 "
Austrian	174 " 27 "
Turkish	180 " 144 "

From 1st July, 1917, to 1st September, 1918 880

General Milne reported on 12th October, 1918, that during the recent offensive 90,000 prisoners were captured by the Allies, making a grand total of over 105,000.

Egypt and Palestine.

General Allenby reported on 28th December, 1917, that he captured during recent operations nearly 14,000 prisoners including 10 Germans.

1,975 prisoners were captured between 1st January, 1918, and 30th April, 1918.

Telegraphing on 8th October, 1918, General Allenby reported that his troops had captured, since 18th September, 1918, over 75,000 prisoners and over 350 guns.

This figure was apparently exclusive of something over 8,000 prisoners reported by the Arab Army of King Hussein, and include over 206 officers and 3,000 other ranks German and Austrian prisoners.

Besides these, smaller numbers of prisoners were taken in the course of the advance.

A considerable quantity of railway materiel and rolling-stock, aeroplanes, engineer stores, ammunition, &c., was also captured.

Information from General Headquarters, Egypt, dated 1st March, 1919, gives the number of prisoners captured by the Egyptian Expeditionary Force as follows:—

					Officers.	Other ranks.
Turks	4,611	74,355
Greeks	82	2,527
Arabs	606	14,536
Jews	13	286

Employed in France.

On 1st June, 1919, 198,652 prisoners were employed in Prisoners of War Companies, the bulk of them road making and quarrying. This was the greatest number working at any given date.

The general repatriation of prisoners commenced in September, 1919, and was completed on 1st November, 1919.

Employed in the United Kingdom.

On 7th November, 1918, about 64,250 prisoners of war were employed on agriculture, trench filling, dismantling of camps, Royal Engineer Services military working parties, &c., this was the greatest number working at any given date.

The general repatriation of prisoners of war commenced on 24th September, and was completed on 19th November, 1919.

The following table shows numbers and names of the ports from which prisoners of war were repatriated between 24th September and 20th November:—

					Officers.	Other ranks.
<i>In British ships.</i>						
<i>Via</i>	Harwich—	Rotterdam	9,850
<i>Via</i>	Dover—	Calais—	Cologne	31,736
<i>In German ships.</i>						
From	Hull	3,692	14,699
From	Newcastle	13,446
From	Tilbury, &c.	469	1,612
From	Southampton*	231
From	Jersey*	1,047
From	Harwich*	497
Total	4,161	73,118

* Special arrangements made during the railway strike.

Since 19th November, 1919, the following prisoners of war have been repatriated, who were retained for various reasons:—

26th November, 1919.—97 Austro-Hungarian officers; 607 Austro-Hungarian other ranks.

9th December, 1919.—9 officers, 300 other ranks, 2 civilians (medical cases).

27th December, 1919.—373 officers, 452 other ranks.

29th January, 1920.—144 officers, 1,640 other ranks (crews of German ships sunk at Scapa Flow).

9th April, 1920.—3 officers, 9 other ranks (specially retained).

India, Egypt, Mesopotamia.

Owing to the situation in the East during the past few months and the lack of shipping, repatriation of Turkish prisoners of war, &c., has been very slow.

India.—Several ships have now been allocated, and it is hoped to complete the repatriation of prisoners of war (in India) by the middle of July, 1920.

Egypt.—The repatriation of prisoners of war is proceeding gradually as ships become available.

Mesopotamia.—The general repatriation of prisoners of war (in Mesopotamia) began as soon as shipping became available.

PART XXII.

THE BRITISH LINE IN FRANCE.

(a.) THE VARIATIONS IN THE LENGTH OF LINE HELD BY THE BRITISH FORCES IN FRANCE AND FLANDERS.

Date.	Frontage.	Length of line, allowing for salients and re-entrants.	Remarks.
1914.		Miles.	
23rd August ..	Conde—Mons—Binche	25 ..	Aisne position.
16th September ..	Soissons—Paissy	20 ..	After the first battle of Ypres.
20th November ..	North-east of Kemmel—East of Festubert.	24 ..	
1915.			
20th April	Ypres (Poelcapelle Road)—Bethune (La Bassée Road).	36 ..	
25th September ..	(a.) Boesinghe—Grenay	40 ..	The battle of Loos began.
	(b.) Monchy-aux-Bois, south of Arras—Vermandovillers.	30 ..	
1916.			
22nd February ..	(a.) Boesinghe—just south of Loos	42 ..	The German attacks on Verdun began.
	(b.) Wailly—River Somme	25 ..	
30th June	Boesinghe—Maricourt	80-90 ..	The battle of the Somme began on 1st July. The British line continuous from north to south.
31st December ..	Boesinghe—Bouchavesnes	85-90 ..	
1917.			
25th February ..	Boesinghe—Amiens—Roya Road ..	105-110 ..	
25th April	Boesinghe—St. Quentin	90 ..	
20th June	(a.) Sea—South of Nieuport	4 ..	
	(b.) Boesinghe—Omignon River ..	86 ..	
9th December ..	S.W. corner of Houthulst Forest—Omignon River.	95 ..	
1918.			
4th February ..	S.W. corner of Houthulst Forest—Barisis—St. Gobain Railway.	123 ..	
20th March	S.W. corner of Houthulst Forest—Barisis—St. Gobain Railway.	123 ..	
2nd April*	S.W. corner of Houthulst Forest—Hangard.	102 ..	The French took over Hangard.
9th April*	S.W. corner of Houthulst Forest—Hangard.	105 ..	Includes salient made by German attack on this day.
17th April*	From junction with Belgians—Ypres—Staden Railway—Hangard.	101 ..	Includes readjustment of line in Ypres salient and our line on the 17th in the battle of Lys.
21st May*	From junction with Belgians (Kitchen Wood) to Monument.	88 ..	Does not include the three division front held by British divisions on the French quiet front (Berry au Bac). Includes the front held by the French (Meteren to Lacytte).
16th June	From junction with Belgians (Kitchen Wood) to Monument.	88 ..	Includes the front held by the French (Meteren to Lacytte).
22nd July	From junction with Belgians (Bellewarde Beek, east of Ypres), to Monument.	93 ..	
11th August	From junction with Belgians (Bellewarde Beek, east of Ypres), to Amiens—Roya road.	101 ..	Extension for the Battle of Amiens.
28th August	From junction with Belgians (Bellewarde Beek, east of Ypres), to Lihu north of Libons.	90 ..	The French having extended their left flank.
18th September ..	From junction with Belgians (Bellewarde Beek, east of Ypres), to Holnon.	83 ..	
16th October	From junction with Belgians (Harlebeke) to Andigny.	93 ..	
11th November ..	From junction with Belgians (west of Schendelbeke) to S.W. of Mont Bliart.	64 ..	At cessation of hostilities.

NOTE.—At the time that hostilities concluded, the Allied line ran approximately as follows:—Along the Côtes de Meuse to Damvillers—Remonville, thence west to the Meuse at Mouzay; thence along the left bank of the river to Charleville. From here the line ran as follows:—Rocroi—Seloignes—Consoire—Villers St. Ghislain—Havré about 5 miles east of Mons—Chievres—Lessines—along the River Dendre to Grammont—Boucle St. Denis—Sievverghem—Ghent—along the Terneuzen Canal to the Dutch frontier.

* These figures owing to the constant change of line must be regarded only as approximate.

(b.) APPROXIMATE DATES OF THE PRINCIPAL BRITISH BATTLES ON THE WESTERN FRONT.

Mons	23rd August, 1914.
Le Cateau I.	26th August, 1914.
Marne I.	6th September—10th September, 1914.
Aisne I.	13th September—28th September, 1914.
La Bassée	10th October—31st October, 1914.
Ypres I.	19th October—21st November, 1914.
Neuve Chapelle	10th March—13th March, 1915.
Ypres II.	22nd April—24th May, 1915.
Fromelles	9th May, 1915.
Festubert	15th May—25th May, 1915.
Loos	25th September—15th October, 1915.
Somme I.	1st July—17th November, 1916.
Arras	9th April—16th May, 1917.
Messines	7th June—14th June, 1917.
Ypres III.	31st July—6th November, 1917.
Cambrai I.	20th November—7th December, 1917.
Somme II.	21st March—5th April, 1918.
Lys	9th April—29th April, 1918.
Aisne III.	27th May—2nd June, 1918.
Marne II.	15th July—4th August, 1918.
Amiens	8th August—12th August, 1918.
Bapaume	21st August—31st August, 1918.
Scarpe	26th August—3rd September, 1918.
Epehy	12th September—18th September, 1918.
Cambrai II.	27th September—5th October, 1918.
Flanders	28th September, 1918.
Le Cateau II.	6th October—12th October, 1918.
Selle	17th October—25th October, 1918.
Sambre...	1st November—11th November, 1918.
(Mons retaken... ..)	11th November, 1918.)

(c.) COMPARISON BETWEEN THE BATTLES OF THE SOMME I AND ARRAS.

Gain of ground in first 24 days—

On the Somme we advanced to a depth of $3\frac{1}{2}$ miles on a front of 6 miles.
At Arras we advanced to a depth of 2 to 5 miles on a front of 20 miles.
This represents about four times as much ground as we gained on the Somme.

Casualties in first 24 days—

On the Somme	136,217
At Arras	83,970

Prisoners and guns captured in first 24 days—

	Prisoners.	Guns.	Remarks.
On the Somme	11,119	56	These prisoners and guns were captured between the La Bassée Canal and the Nord Canal on the fronts of 1st, 3rd and 5th Armies.
At Arras.. .. .	18,128	230	

Number of German divisions engaged and withdrawn in first 24 days—

	Total engaged.	Number withdrawn into reserve.
On the Somme	16	8
At Arras	32	16

Ammunition expenditure during first 24 days—

						Rounds.
On the Somme	4,500,000
At Arras	6,466,239

Number of British guns in action in first 24 days—

On the Somme	2,090
At Arras	3,500 (approximate).

*Comparison of number of aeroplanes engaged and losses of machines during
July, 1916, and April, 1917.*

July, 1916.—730 aeroplanes were on charge of the Expeditionary Force. The wastage during the month was 148.

April, 1917.—1,318 machines were on charge of the Expeditionary Force. The wastage during the month was 441.

These losses were principally incurred in the period previous to the opening of the offensive.

PART XXIII.

DISCIPLINE.

SECTION 4.

AIR RAIDS ON GERMANY.

Copenhagen, 15th March, 1919.—A Berlin telegram states that according to official figures 720 persons were killed and 1,754 injured in enemy aerial attacks on German territory up to 11th November, 1918.

Amsterdam, 14th March, 1919.—A Berlin telegram states that according to official computations the damage caused to German territory by enemy air attacks since the beginning of August, 1914, to 8th November, 1918, amounts to 23,500,000 marks (nominally £1,175,000).

PART XXV.

NOTES ON SCHEMES OF DEMOBILIZATION OF THE ARMY AND THE ROYAL AIR FORCE.

(MAY, 1920.)

SECTION 1.

ARMY.

1. In January, 1915, Sir H. Llewellyn Smith (Secretary of the Board of Trade), and Sir Reginald Brade prepared for the consideration of the Cabinet a paper containing suggestions intended to meet certain difficulties likely to be experienced at the conclusion of the war by the release of the large numbers of men serving in the Army, and their return to civil life. The suggestions included the grant of furlough with pay and allowances, and the issue of free travelling warrants from the place of demobilization to the men's homes, in order to minimize the possible distress consequent upon the sudden disbandment of men having little means and no immediate prospect of earning money. In this the precedents of former wars were followed. The present war, and the consequent disturbance of peace conditions, have been on such a vast scale that something more was thought to be necessary, and a new feature was therefore introduced, namely, the addition to the above benefits of a free insurance against unemployment. Also, the comparatively recent introduction of the Labour Exchanges, Territorial Force Associations and similar organizations led to the suggestion that use should be made of these for fitting the men into suitable employment, and a scheme was framed for effecting this resettlement. The proposals received a provisional approval by the late Government, but, in view of the paramount necessity of secrecy, they were ordered to be pigeon-holed for the time being.

2. Later, the Government appointed a Committee of Cabinet Ministers—called the Reconstruction Committee—which was instructed to find solutions for the various problems, in regard to the re-settlement of the nation, which were likely to arise after the war. This Committee appointed, in its turn, an Army Demobilization Committee, under the chairmanship of Mr. E. S. Montagu, M.P., consisting of representatives of the Departments of State concerned and of other interests involved, such as labour, shipping, &c. The Sub-Committee commenced their work by consideration of the proposals referred to above, and, in the main, endorsed them. These were briefly:—

Each soldier to be granted—

(a.) A furlough, with pay, separation allowances, &c., of 4 weeks from the date of being demobilized.

(b.) A railway warrant to his home.

(c.) A 12-months' policy of insurance against unemployment, with benefit at the rate of 10s. a week for 20 weeks, reckoning from the expiration of 1 month from the date of cessation of the furlough under (a).^{*} It was also proposed that the Civil Liabilities Committee should be kept in being in order to assist non-insurable cases such as those of shop-keepers and professional men.

(d.) A money gratuity (in addition to the ordinary Service gratuity, which is at the rate of 1*l.* a year) to be given to men who have served in a sphere of active operations, referring for further consideration the question of giving any gratuity to men who have not so served.

3. Mr. Montagu's Sub-Committee also discussed briefly the plan on which, in the nation's interest, the order of return should be determined. The main principle decided upon was that men should be released from the Forces in accordance with civil rather than military requirements.

4. A War Office Demobilization Committee was thereupon appointed "to consider questions requiring settlement in connection with the demobilization of the Army, in so far as they would fall within the province of the War Department; to act as a link with the Sub-Committee of the Reconstruction Committee, and to prepare a draft scheme of demobilization."

5. At the outset of their deliberations it was felt by the War Office Demobilization Committee that much progress in considering the detailed plans for demobilization could not be made without some idea of the Regular Army that the Government would decide should be maintained after the war. They therefore approached the Montagu Committee to move the Government to give a decision on this point. The Government declined, however, to make any decision, but laid down, for the guidance of the Reconstruction Sub-Committee on Army Demobilization, that "the War Office was to prepare as soon as possible a scheme for the return of 1,000,000 men from France, and their demobilization." The War Office Committee then proceeded with their investigations. It at once became evident that the regimental depôts were wholly unequal to the task of carrying out the military procedure in regard to demobilization. A system was therefore devised by means of which men were dispersed through a series of Dispersal Stations (hutted camps in most cases). Provisionally, one Dispersal Station was allotted to each regimental district, except Nos. 1 and 12, which were sub-divided by units and allotted two Dispersal Stations each; an extra station was allotted to London, giving a total of 26.

6. The question of regulating the flow of men to these discharge centres was next considered. It having been decided that the best interests of the nation could not be adequately met by disbanding by complete military units or formations, it was further decided that a cadre, or skeleton formation, should be laid down for every type of unit, and that the surplus personnel over and above the cadre should be depleted by dispersal drafts made up of men selected by their industrial occupation in accordance with the requirements of the country.

7. The procedure at the Dispersal Stations was then considered, and it was decided to issue to each man a Protection Certificate covering the period of his furlough. This certificate was to be made out at the Dispersal Station in quadruplicate, one copy for the man, one for the Record Office, one for the Pay Office, and one to be retained at the Dispersal Station as a record. At the Dispersal Station the man was to hand in his arms and equipment, receive an advance of pay, a railway warrant to his home, and to leave the Dispersal Station in his military uniform, which he was entitled to wear for 28 days. Every effort was made to simplify the procedure and expedite release.

8. Subsequent consideration of the details of the scheme gave rise to improvements in the procedure. Under the method of dispersal agreed upon a preliminary period of at least 3 weeks was necessary to perform the clerical work essential for the resorting of the personnel of the drafts before they were started on their through journey to the appropriate Dispersal Station. This difficulty was, of course, non-existent should it happen that an armistice be agreed upon, and that consequently there was an interval between the cessation of hostilities and the commencement of demobilization. The Director of Mobilization then put forward a scheme for usefully employing the preparatory period of 3 weeks, even should there be no interval between the cessation of fighting, and the process of disbandment. He suggested that steps should be taken for—

(a.) Ear-marking of the personnel required for the purposes of demobilization, i.e.—

20,000	{	Demobilization units	...	from Home	...	} To be taken		
		Civil and Military Police	...	from Home and Abroad	...		} for military	
		Army Pay clerks	...	from Home and Abroad	...			} or civil duty
		Civil servants	...	from Home and Abroad	...			

- (b.) Ear-marking of railway employees not employed in a technical capacity.
- Ear-marking of dock employees not employed in a technical capacity.
- Ear-marking of shipping employees not employed in a technical capacity.
- Ear-marking of county, borough and city employees not employed in a technical capacity.
- At Home and Abroad. } To be taken for military or civil duty at once.

- (c.) Reinforcements and convalescents at Bases to be returned in order to clear accommodation.

From the discussion arising out of this suggestion, a scheme was developed for securing men who would be required to facilitate the actual process of demobilization ("demobilizers") and key men in industry ("pivotal men").

9. While the military procedure was being carefully considered, sight was not lost of the functions that would have to be fulfilled by the civil authorities. Close touch was therefore maintained with the Employment Department Demobilization Committee, which was set up to advise the Minister of Labour on the resettlement in employment of ex-Service officers and men. In agreement with this department, it was decided that every man in the Forces should fill up a "Civil Employment Form," stating the name of his former employer and giving every information regarding his capacity to undertake civil work. The Civil Employment Form included a tear-off slip, which, when the Employment Department had consulted the prospective employer in each case, was to be returned to the unit as a voucher for the fact that the man had employment awaiting him, and as a *prima facie* justification for his release immediately military requirements permitted it.

10. Further consideration suggested further refinements in the order of priority of the selection of men for release, and, as laid down in Army Demobilization Regulations, paragraph 729, Unit Commanders would, in making up drafts for dispersal, be guided by the following rules:—

- (a.) Ninety per cent. of any draft for dispersal should consist of men selected in the following order of priority:—
- (i.) Soldiers remaining with the Colours who had more than two years unexpired colour service or who had extended their service and engaged in the after war Army.
 - (ii.) Soldiers who had employment awaiting them and for whom the release slips, detached from their Civil Employment Forms, had been received from the Ministry of Labour.
 - (iii.) Soldiers who belonged to industrial groups in which labour was required, but for whom release slips had not been received.
- (b.) The remaining 10 per cent. of any draft would consist of time expired and long service soldiers, provided that the numbers of time expired soldiers did not exceed 3 per cent. of the whole draft.

When the supply of soldiers under (b) was exhausted, drafts for dispersal would be made up in accordance with the priority laid down under (a) (i.), (ii.) and (iii.). In all cases (other considerations being equal) married men and widowers would be selected in preference to single men.

In order to facilitate the selection of men according to their industrial groups, the civil occupation of every soldier was to be noted in his A.B. 64, which is a book carried by him when overseas, containing full particulars concerning himself, his unit, and a record of the pay received by him. In the case of soldiers at home, these entries are made on the A.F.B. 103.

Before any soldiers falling within the above categories were dispersed, the demobilizers and pivotal men referred to in paragraph 8 would be dealt with.

It was decided that a system of industrial priority should be applied to the demobilization of officers, and entries would be made accordingly in A.B. 439 (Officer's Record of Service).

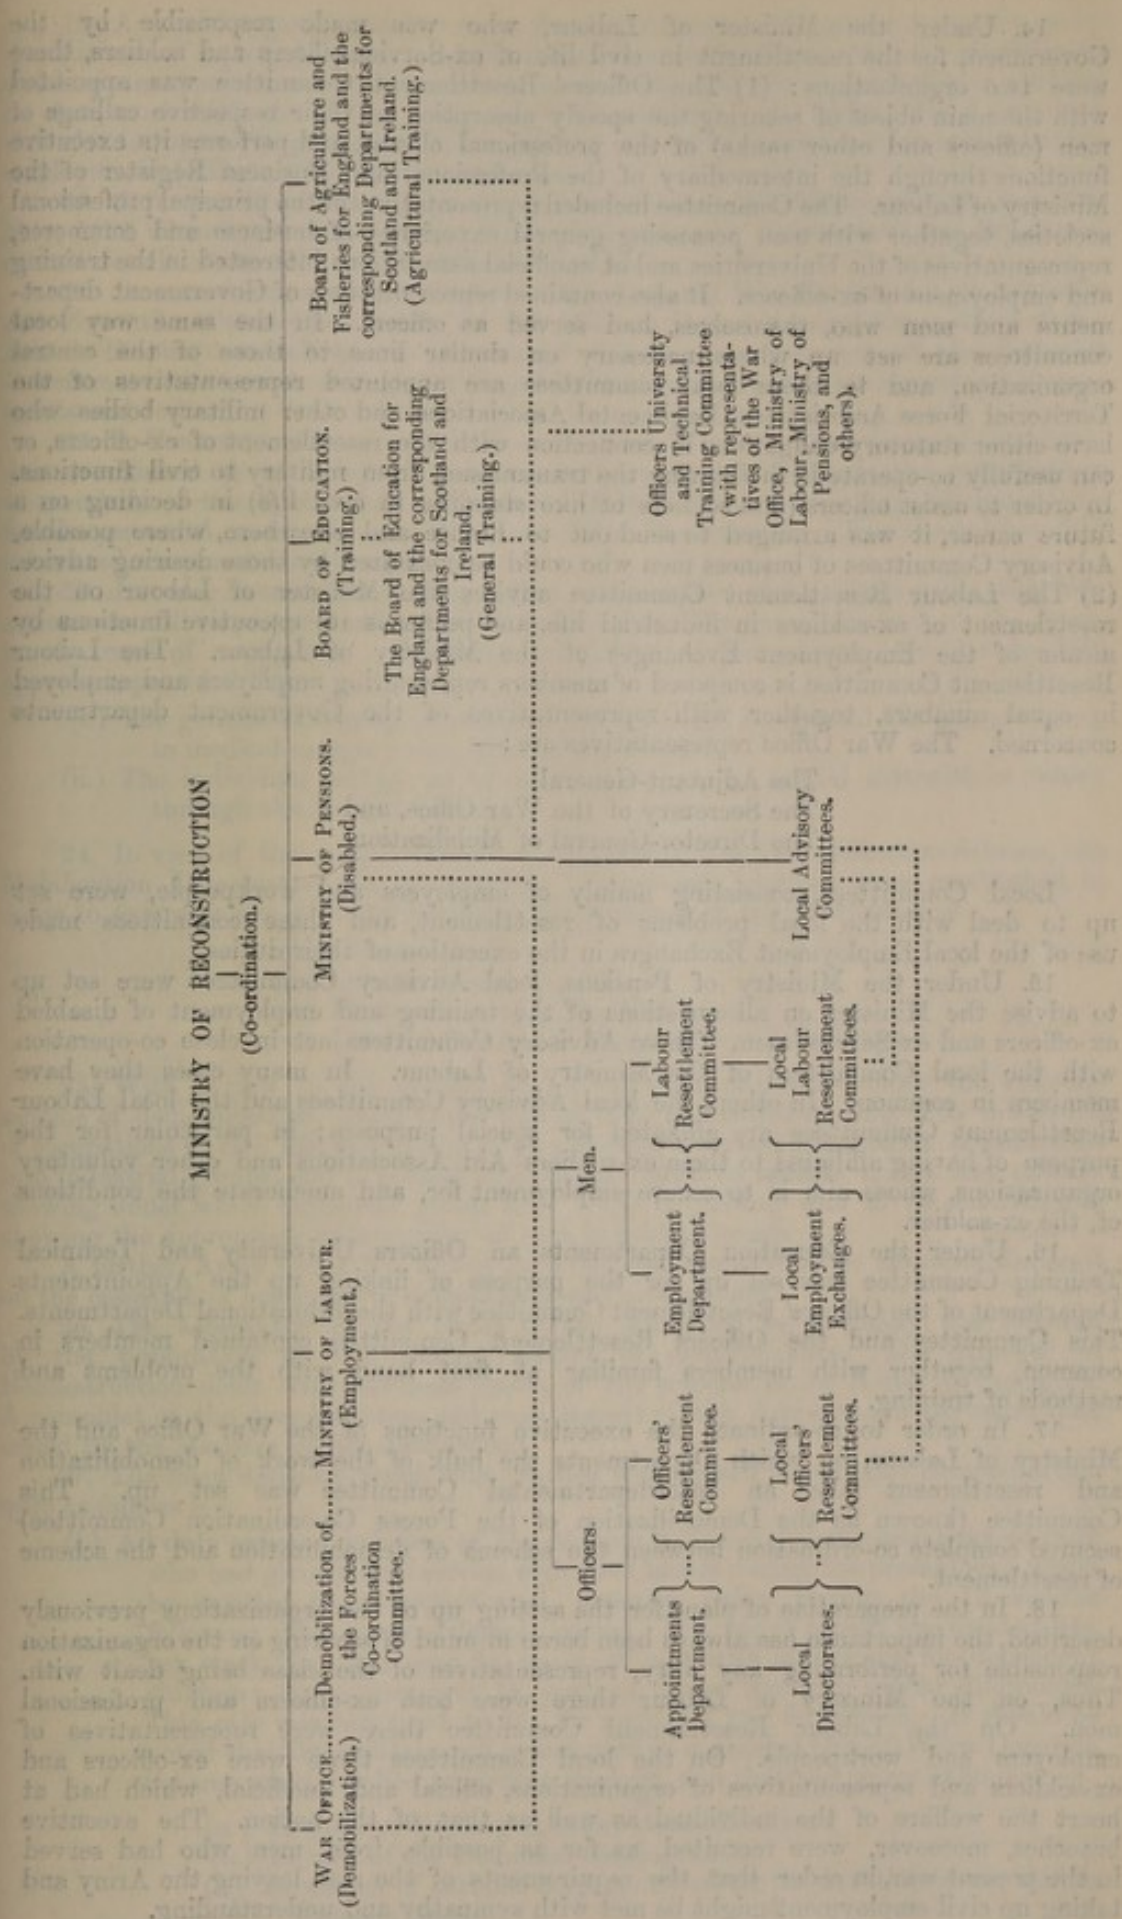

11. Further modifications were adopted in order to secure more expeditious release and more precise correlation of military and civil requirements. Further, the question of possible remobilization was taken into account in its relation to demobilization. For example, in order to obtain the necessary statistics required, either by the civil or the military authorities, it was decided that the Dispersal Certificates of all officers and soldiers, from which the Protection Certificate was to be prepared at the Dispersal Station, should be transmitted from the Dispersal Station to a Statistical Department, where the necessary returns would be provided by suitable machinery.

12. A rehearsal of demobilization took place, and at Purfleet on 7th February, 500 men went through the whole of the procedure that would have to be carried out at a Dispersal Station. The experience gained at this rehearsal resulted in certain modifications in the details of the scheme.

13. The broad principles of the scheme were then accepted by the Government, and the following Departments of State are primarily responsible for the transition of the Members of the Forces from military to civil status:—

- (i.) The War Office (Demobilization).
- (ii.) The Ministry of Labour (Employment and Workshop Training).
- (iii.) The Ministry of Pensions (Disabled).
- (iv.) The Board of Education for England and the corresponding Departments for Scotland and Ireland (General Training).
- (v.) The Board of Agriculture and Fisheries for England and the corresponding Departments for Scotland and Ireland (Agricultural Training).
- (vi.) The Ministry of Reconstruction (Co-ordination).

In order to secure close co-operation amongst the departments concerned, a series of Interdepartmental and Local Committees were set up. The correlation of these organizations is shown in the following chart:—

14. Under the Minister of Labour, who was made responsible by the Government for the resettlement in civil life of ex-Service officers and soldiers, there were two organizations: (1) The Officers' Resettlement Committee was appointed with the main object of securing the speedy absorption in their respective callings of men (officers and other ranks) of the professional classes, and performs its executive functions through the intermediary of the Professional and Business Register of the Ministry of Labour. The Committee included representatives of the principal professional societies, together with men possessing general experience of business and commerce, representatives of the Universities and of unofficial associations interested in the training and employment of ex-officers. It also contained representatives of Government departments and men who, themselves, had served as officers. In the same way local committees are set up where necessary on similar lines to those of the central organization, and to these local committees are appointed representatives of the Territorial Force Associations, Regimental Associations and other military bodies who have either statutory obligations in connection with the resettlement of ex-officers, or can usefully co-operate in facilitating the transmission from military to civil functions. In order to assist officers (and soldiers of like standing in civil life) in deciding on a future career, it was arranged to send out to France and elsewhere, where possible, Advisory Committees of business men who could be consulted by those desiring advice. (2) The Labour Resettlement Committee advises the Minister of Labour on the resettlement of ex-soldiers in industrial life, and performs its executive functions by means of the Employment Exchanges of the Ministry of Labour. The Labour Resettlement Committee is composed of members representing employers and employed in equal numbers, together with representatives of the Government departments concerned. The War Office representatives are:—

The Adjutant-General,
The Secretary of the War Office, and
The Director-General of Mobilization.

Local Committees, consisting mainly of employers and workpeople, were set up to deal with the local problems of resettlement, and these committees made use of the local Employment Exchanges in the execution of their duties.

15. Under the Ministry of Pensions, local Advisory Committees were set up to advise the Minister on all questions of the training and employment of disabled ex-officers and ex-Service men. These Advisory Committees act in close co-operation with the local Committees of the Ministry of Labour. In many cases they have members in common. In others the local Advisory Committees and the local Labour Resettlement Committees are affiliated for special purposes; in particular for the purpose of having affiliated to them ex-soldiers' Aid Associations and other voluntary organizations, whose aim is to secure employment for, and ameliorate the conditions of, the ex-soldier.

16. Under the Education Departments an Officers University and Technical Training Committee was set up for the purpose of linking up the Appointments Department of the Officers' Resettlement Committee with the Educational Departments. This Committee and the Officers Resettlement Committee contained members in common, together with members familiar at first hand with the problems and methods of training.

17. In order to co-ordinate the executive functions of the War Office and the Ministry of Labour, on which Departments the bulk of the work of demobilization and resettlement falls, an Interdepartmental Committee was set up. This Committee (known as the Demobilization of the Forces Co-ordination Committee) secured complete co-ordination between the scheme of demobilization and the scheme of resettlement.

18. In the preparation of plans for the setting up of the organizations previously described, the importance has always been borne in mind of securing on the organization responsible for performing any duty, representatives of the class being dealt with. Thus, on the Ministry of Labour there were both ex-officers and professional men. On the Labour Resettlement Committee there were representatives of employers and workpeople. On the local Committees there were ex-officers and ex-soldiers and representatives of organizations, official and unofficial, which had at heart the welfare of the individual as well as that of the nation. The executive branches, moreover, were recruited, as far as possible, from men who had served in the present war, in order that the requirements of the man leaving the Army and taking up civil employment might be met with sympathy and understanding.

19. A special organization known as the Appointments Department was set up by the Minister of Labour to provide advice and assistance to officers requiring professional and business appointments on their return to civil life, and the organization is working in close touch with the Military Secretary's Department. An India Office Committee was also set up to place disabled and invalided officers in communication with possible employers in India and the Eastern Colonies.

20. A further Dispersal Rehearsal was carried out at Wimbledon on 15th and 16th May, 1918, when 2,000 men were nominally dispersed. As the result of this Rehearsal, certain details of the Scheme had to be readjusted.

21. In accordance with a resolution of the Imperial War Conference, an Advisory and Executive Committee, known as the Military Demobilization Committee of the British Empire, was set up to co-ordinate with the arrangements of the Imperial Government the various schemes of demobilization prepared by the Dominion Governments and India.

22. A Committee, known as the Women's War Workers Resettlement Committee, was established to investigate the steps to be taken to facilitate the resettlement of members of the Q.M.A.A.C., W.R.N.S., W.R.A.F., and other organizations with female personnel under the control of the War Departments. This Committee duly submitted a report to the Council.

23. In order to meet the contingency of a resumption of hostilities while demobilization was still in progress schemes were prepared for the remobilization of the Army in the case of emergency. The main principles of the scheme, which were duly approved, provided for—

- (i.) The general calling up of personnel in commands by Annual Classes, according to medical category and Arms of the Service.
- (ii.) The individual calling up of cadre personnel by special instructions issued through the Record Offices.

24. In view of the magnitude and complexity of the Demobilization Scheme, the Mobilization Directorate was re-organized. Four new sections were established in order to secure liaison with the following Departments of the War Office:—

- (i.) General Staff.
- (ii.) Quartermaster-General.
- (iii.) Master-General of the Ordnance.
- (iv.) Director-General of Movements and Railways.

25. With a view to the preparation of the data necessary under the existing scheme of demobilization, Army Order 329 of 1918 was issued dealing with the record of occupations in civil life, and giving as an appendix a revised classification of industries into industrial groups, and a revised alphabetical index of specific trades and callings showing under which industrial group each trade or calling was to be entered, and showing the appropriate code number of each industrial group.

A further Army Order No. 355 of 1918 detailed the scheme for the early dispersal on the cessation of hostilities of demobilizers and pivotal men.

26. The acceptance of the terms of the Armistice by Germany was followed by the publication of the general scheme of demobilization. The Minister of Reconstruction dealt with the main points of the scheme in the House of Commons. A pamphlet on the demobilization and resettlement of the Army was at the same time issued by the Ministry of Reconstruction.

27. The main decisions which were reached with regard to military demobilization were as follows:—

- (i.) All duly enlisted members of His Majesty's Forces below commissioned rank who had given actual service with the Colours during the present war, would be entitled to an out-of-work donation policy during the 12 months following their personal demobilization. The rate of benefit was fixed at 24s. per week for men over 18 years of age with allowances for dependent children; for women over 18 years of age at 20s. with similar allowances. This rate was increased to 29s. for men, and 25s. for women. It should be noted that the military policy was part of a general Out-of-Work Donation Scheme which applied to civilian workers, and that the policy extended:—

- (a.) To soldiers discharged before demobilization;
- (b.) To men of the Dominion contingents;
- (c.) To women of enrolled corps, enrolled for the duration of the war on a mobile basis.

- (ii.) With regard to apprentices a scheme had been arranged for State assistance to those whose period of apprenticeship had been interrupted by war service.
- (iii.) The Government had further accepted certain general principles with regard to the resettlement of officers. From the beginning of demobilization and for a year after, permanent appointments in the Civil Service will be reserved for ex-officers and ex-soldiers. Certain recommendations had also been adopted with regard to the training of ex-officers and soldiers of like standing for suitable employment.
- (iv.) The Government had also accepted responsibility for financial assistance for the repatriation of the families of British subjects from overseas who had served in the war. The scheme for the repatriation of men from overseas serving in the Imperial Forces and their dependents in the United Kingdom was already in operation.
- (v.) It was also intended that the Military Service (Civil Liabilities Department), with an Advisory Committee, should be continued in existence after the war so that financial assistance, subsequent to demobilization, might be given to officers or men who might be unable by reason of undertaking military service to meet their financial obligations after demobilization. The question of one-man businesses would come within the scope of this department.
- (vi.) It had further been decided that a special gratuity would be payable to the warrant officers, non-commissioned officers and men of the Army and the Royal Air Force. The private who had served overseas would get 5*l.* for the first year with 10*s.* a month in addition after the first year. The different non-commissioned and warrant ranks would be granted correspondingly increased amounts for the first year but the same additions of 10*s.* for subsequent months. Certain lower rates were apportioned for men with home service only, and special clauses dealt with men drawing pay and service pensions concurrently, and excluded from the gratuity conscientious objectors and the medically unfit who were discharged within 6 months as unfit to be soldiers. It should be noted that the issue of this gratuity was to be dependent on the recovery of deficiency charges from soldiers for the loss of equipment during demobilization.

28. The scheme of military demobilization was made public by the issue with a covering Army Order No. 7 of 1919 of Parts I and II of Army Demobilization Regulations, which comprises a complete code of regulations to be observed during the process of demobilization, both by those who are engaged in carrying out such process, and also by those who are being demobilized. These regulations have been divided into three parts in such manner that Part I has a general application, Part II applies to demobilization units in the United Kingdom, and Part III applies to certain corps only, and is issued in separate chapters.

29. The Demobilization Army Forms required were circulated to E.F.s. and Commands in the United Kingdom and Overseas. The requisite numbers were forwarded to each of the emergency Prisoners of War Reception Camps which had been formed at Dover and Ripon and Canterbury, and also to the dispersal units which had been opened in the various commands. All forms of immediate importance were despatched to France, Italy, Salonica, Egypt, and Palestine, and arrangements were completed for the necessary forms to be sent to India and Mesopotamia. The Demobilization Railway Guide and the Officers' and Soldiers' Booklets were then issued, and the Instructions for Dispersal Draft Officers and Instructions for Embarkation Commandants and Staffs were prepared for issue as required.

30. Dispersal stations were then opened throughout the United Kingdom. The staff and electrical machinery necessary for statistical work on demobilization were secured, and a Daily Bulletin showing the progress made was issued.

31. It was found necessary to make various minor amendments in the Demobilization Scheme with regard to soldiers' clothing. The issue of civilian clothing, or 52*s.* 6*d.* in lieu, was authorized for men being released. This clothing was to be forwarded to the men as soon as possible, but in any case within the period of their 28 days' furlough. It was decided that soldiers demobilized were to be asked to sell their uniforms to the State during their furlough at a flat rate, but this arrangement under further

consideration was abandoned. All soldiers demobilized were entitled to retain their uniform with the exception of those discharged from hospital. Men arriving from overseas with steel helmets in their possession were allowed to retain them.

32. Owing to the possibility of an emergency re-mobilization becoming necessary, it was regarded as undesirable that men should be finally discharged from the Army on their demobilization. Such a course would have rendered it practically impossible to recall men to the Colours in case of emergency. A new Class Z of the Reserve was accordingly established by Army Order of the 3rd December, 1918, into which all men released from service with the Colours were passed on the expiration of their demobilization furlough, with the exception of soldiers on Territorial Force engagements and those finally discharged in accordance with recognized practice. Provision was also made under Army Order of 16th December, 1918, for the disembodiment of men of the Territorial Force, as the exigencies of the Service permit, in accordance with the provisions of the Territorial and Reserve Forces Act, 1907. Authority was given for the final discharge from the Army of various classes of soldiers and reservists who had been released during the war to return to civil life. All reservists of Classes P and P (T.) were to be discharged irrespective of the terms of their engagement. All reservists of Classes W and W (T.) serving on a duration of the war engagement or on a normal engagement which had expired were to be discharged, with the exception of conscientious objectors.

33. A Demobilization Committee of the War Cabinet was set up to deal with the question of demobilization, and a Controller-General of Civil Demobilization was appointed. The War Cabinet authorized the speeding up of the process of demobilization by the release of certain classes other than those registered as demobilizers and pivotal men. A large number of coal miners had been released, and authority was given for the demobilization of the following classes:—

- (i.) Coal miners (Group 3) and agriculturalists (Group 1) were to compose 50 per cent., but not more, of this remainder in each dispersal draft, preference being given to coal miners so long as any were available.
- (ii.) Civil demobilizers, pivotal men and those ordered for special release on Army Form Z 56.
- (iii.) Those for whom offers of employment endorsed by a District Director of the Appointments Department, Ministry of Labour, or by a Local Advisory Committee of an Employment Exchange, of the Ministry of Labour, i.e., "contract men" and those for whom Army Form Z 15A or 16A had been received, i.e., "slip men."
- (iv.) Group 45 as orders were issued (*vide* paragraph 7 below).
- (v.) Those who were 41 years of age or over.
- (vi.) Officers and soldiers from hospitals, command depôts, and convalescent camps, after 28 days' treatment in hospital, in accordance with special instructions issued to General Headquarters, Expeditionary Forces and Headquarter Commands.
- (vii.) Non "contract men" and non "slip men" who belonged to the industrial groups which were then open and which are specified in paragraph 6, page 514.
- (viii.) Others eligible for demobilization under Army Order XIV., dated 29th January, 1919.

34. In addition to the selection of pivotal men then in progress and the use of the Civil Employment Form then being filled up by members of the Forces, and the Post Cards (E.D. 406) and R.C.V. Forms which employers had been invited to fill up, a new procedure was authorized to hasten the identification for demobilization of those members of the Forces who had pre-war employment awaiting them. The employer was to make out a form of contract for any man who was in his employment before 4th August, 1914, which, having been verified by the Local District Director of the Appointments Department in the case of officers, and the Local Advisory Committee in the case of other ranks, was to be forwarded to the man concerned. This form, if accepted by the man and handed on to his Commanding Officer, was sufficient to register him as a "contract man" and place him on the same footing as a "slip" man for demobilization.

35. All ranks on leave in this country from Expeditionary Forces other than France, with definite employment awaiting them and within the industrial groups or classes open for demobilization were to be demobilized without restriction. With regard to

future conditions of leave, it was laid down that leave was only granted on the distinct understanding that men were not demobilized on any pretext whatsoever during the period of leave. The imposition of this condition was found to be necessary owing to the disorganization which had occurred in units in France consequent upon many men who were indispensable in their military capacity having been demobilized whilst on leave in this country.

36. With the advance of demobilization industrial requirements called for a revision of the classes eligible for dispersal. The following classes and groups were thereupon made open for demobilization throughout the Forces at Home and Overseas :—

- No. 1. Agriculture.
- No. 2. Seamen and fishermen.
- No. 3. Coal and shale mining.
- No. 5. Slate mines and quarries.
- No. 6. Quarries, other than slate and iron.
- No. 10. Paper printing and bookbinding.
- No. 18. Clothing trade operatives, tailors, &c., and other workers in dress.
- No. 21. Coopers, coach builders, wheelwrights, and other wood workers (including workpeople in construction of vehicles).
- No. 22. Shipbuilding.
- No. 23. Iron and steel manufacture, tube making, &c.
- No. 24. Tin plate manufacturers.
- No. 28. China, glass and pottery trades.
- No. 29. Brick, cement, &c., manufacturers.
- No. 30. Building trades and construction of works, including navvies.
- No. 31. Railway workers.
- No. 33. Carters, carmen, &c., of horsed vehicles.
- No. 35. Employees of public and local authorities and of public utility companies.
- No. 42. Professional men not included in previous Industrial Groups.
- No. 43. Students and teachers.

The above industrial groups are arranged in numerical order and were to be regarded as of equal priority.

In the case of certain transportation and administrative services which were indispensable for the maintenance of the Army and for purposes of demobilization, dispersal was to be more gradual for the time being than in the case of the rest of the Army, but men of the specified classes were to be released as circumstances permitted.

37. For the same reasons that it was considered necessary to form Class Z Reserve for the reception of men on Demobilization, it was decided that until the termination of the war, officers would not be gazetted out of the Service, but would be released from military duty without pay and allowances in accordance with Army Order 10 of 16th December, 1918. No Regular officers were to be demobilized except for the following reasons :—

- Disciplinary.
- Medical unfitness.
- Age.
- Inefficiency.

A supplementary Army Order was published on 26th March, 1919, detailing the method of procedure in the demobilization of officers and pointing out that officers holding commissions in the Special Reserve would be demobilized, while officers holding commissions in the Territorial Force would be disembodied. In each case notice should be given to the officers concerned as early as practicable.

Officers holding temporary commissions in the Regular Army would be dealt with as follows :—

- (a.) Those willing to be demobilized under the provisions of the Royal Warrant published in Army Order 10 of 1919, would be released.
- (b.) Those unwilling to be demobilized under that Royal Warrant would have their temporary commissions terminated under the provisions of the Royal Warrant published in Army Order 9 of 1919.

38. In consequence of the increase in the numbers and classes of men being demobilized, and to provide for the maintenance, pending the reconstruction of the

Regular Army, of the Home Army, and of the Armies of Occupation required in the various theatres of war, and of the Overseas garrisons, it was decided, and was published as part of Army Order No. 55 of 1919, to regulate demobilization in the following way :—

(a.) All officers are liable to be retained with the following exceptions :—

- (i.) Officers entitled to wear three or more wound stripes.
- (ii.) Officers duly certified by the Ministry of Labour, before 1st February, 1919, on Army Form Z 32, as civil demobilizers or pivotal men, or officers whose special release has been recommended by that Ministry on Army Form Z 56, excepting those whose retention in the Army is essential for demobilization purposes.
- (iii.) Officers whose release on extreme compassionate grounds is approved by the Army Council.
- (iv.) Officers whose claims to return to their pre-war homes or business overseas have been, or may be, approved by the Officer i/c Repatriation Records, Winchester, on Army Form Z 6.
- (v.) Officers over 51 years of age.

(b.) No officer, being under 37 years of age, who is liable to retention, will be released who was either directly commissioned on or after 1st January, 1916, or, if commissioned from the ranks joined for immediate service with the Colours on or after 1st January, 1916.

(c.) Officers who have been, or shall be, passed to the Reserve immediately on receiving a commission from a cadet unit, shall not be retained, either voluntarily or compulsorily.

(d.) All warrant officers, non-commissioned officers and men may be demobilized with the exception of :—

- (i.) Warrant officers, non-commissioned officers and men serving under pre-war conditions of service who have not completed their term of Colour service.
- (ii.) Warrant officers, non-commissioned officers and men of the Non-Combatant Corps (N.C.C.).
- (iii.) Those who are temporarily required for the military machinery of demobilization until they can be individually substituted or dispensed with.
- (iv.) Those detained in overseas garrisons pending relief.

(e.) The following are to be demobilized as soon as the exigencies of the Service permit :—

(i.) All warrant officers, non-commissioned officers and men who—

- (a.) Were attested and joined for immediate service with the Colours prior to 1st January, 1916.
- (b.) After being attested or deemed to be enlisted and posted to the Reserve, were called up or joined the Colours for continuous service, prior to 1st January, 1916.

(ii.) All warrant officers, non-commissioned officers and men of the Territorial Force who were attested prior to 1st January, 1916.

(iii.) All warrant officers, non-commissioned officers and men serving under pre-war conditions of service who have completed their term of Colour service.

(iv.) All warrant officers, non-commissioned officers and men who have attained the age of 37, and those who subsequently attain that age.

(v.) All warrant officers, non-commissioned officers and men entitled to wear three or more wound stripes.

(vi.) All warrant officers, non-commissioned officers and men duly certified by the Ministry of Labour before 1st February, 1919, as civil demobilizers or pivotal men, for whom orders for demobilization have been or may be issued by the War Office on Army Form Z 32.

(vii.) All warrant officers, non-commissioned officers and men whose special release was recommended to the War Office by the Ministry of Labour before 1st February, 1919, and for whom orders of demobilization have been or may be issued by the War Office on Army Form Z 56.

(viii.) All warrant officers, non-commissioned officers and men whose release on extreme compassionate grounds has been, or may be ordered by the War Office on Army Form Z 56, or whose release on extreme compassionate grounds is approved by General Officers Commanding-in-Chief in accordance with instructions issued to them.

(ix.) All warrant officers, non-commissioned officers and men whose claims to return to their pre-war home or business overseas have been, or may be approved by the Officer i/c Repatriation Records, Winchester, on Army Form Z 6.

(f.) Warrant officers, non-commissioned officers and men who are qualified for demobilization may be permitted to volunteer for the Armies of Occupation provided they are considered generally suitable. If they are accepted they may be called upon to serve in any corps or arm of the Service and in any of the Armies of Occupation, but as far as possible will be posted with their own corps. Acting rank will be relinquished and the term of enlistment will be for one year.

39. Simultaneously with the publication of the above Army Order it was announced that extra remuneration would be granted to all those retained on military service in the Armies of Occupation and all those whose demobilization might be delayed owing to the exigencies of the Service.

This remuneration was in the form of a bonus and was issued as from the 1st February, 1919, at the rates and as set forth in Royal Warrant XIII. published as an Army Order, No. 54 of 1919, and was issued to officers and men definitely retained for the period during which it was found necessary to maintain Armies of Occupation in the various occupied territories.

The bonus would not be taken into account in the assessment of any gratuity under Article 497 of the Royal Warrant for Pay, &c., and it would be subject to the same rules for issue, forfeiture and stoppage, public claims, &c., as regimental pay.

Members of the Non-combatant Corps, and men employed on civil rates of pay as defined by the Army Council, would not be eligible for the benefits of the bonus.

A further Army Order was published on the 15th March, 1919, whereby officers, non-commissioned officers and men eligible for demobilization, but not actually demobilized by 1st May, would, as from that date, receive the full bonus granted to personnel retained in the Armies of Occupation in lieu of the half rate provided in the 4th Clause of the Royal Warrant of the 1st February, 1919.

40. It was decided to recognize the war service of officers holding permanent Commissions on the Active List of the Regular Army. This recognition took the form of a gratuity to be paid for war service with the periods beginning from 4th August, 1914, inclusive, and ending at the date of the termination of the war as defined by statutory authority or 3rd August, 1919, whichever came first, at the rates laid down in Royal Warrant IV., published as Army Order No. 85 of 1919.

The gratuity would in no case be issuable in addition to any gratuity under Article 497 of the Royal Warrant for Pay, &c. Any officer who might have received a gratuity under that Article on relinquishment of a Special Reserve, Territorial Force, or temporary Commission or on demobilization, and who had been or might be appointed to a permanent Commission in the Regular Forces within 6 months of such relinquishment or demobilization would, as a condition of the grant of the permanent Commission, be held liable, at the discretion of the Army Council, to refund the difference between that gratuity and the gratuity for which he would be eligible under this Warrant as a permanent officer of the Regular Forces.

An officer who had been placed on the Retired List since 4th August, 1914, and had subsequently been re-employed, would, if eligible, be granted gratuity under Article 497 (a), Royal Warrant for Pay, &c., for the period of his re-employment, or gratuity under this Warrant for the whole of his war service, whichever was the more advantageous.

An officer who had rendered previous war service in the ranks would be eligible to receive a gratuity for such service under the conditions laid down in the Royal Warrant of 17th December, 1918, as amended by this Warrant, in addition to any gratuity admissible under this Warrant, or, in the case of an officer holding a Special Reserve, Territorial Force, or Temporary Commission in addition to that admissible under Article 497 of the Royal Warrant for Pay, &c.

The gratuity would not be issuable under this Warrant in the case of an officer—

- (a.) Whose services were dispensed with or who resigned his Commission for misconduct or for other causes which, in the opinion of the Army Council, disqualify him for the grant of the gratuity.
- (b.) Who had relinquished his Commission on account of ill-health due to his own misconduct.
- (c.) Who, prior to 11th November, 1918, voluntarily resigned his Commission after less than 2 years' commissioned service.
- (d.) Who had relinquished his Commission on account of ill-health not caused by military service after less than 6 months' commissioned service.
- (e.) Who was granted a Commission subsequent to the date of this Warrant.

The gratuity would be subject to Articles 8 and 22, the Royal Warrant for Pay, &c.

41. Provision was made by Army Order 139 of 1919, for the demobilization of time expired soldiers (including soldiers of the Territorial Force), who, having enlisted or re-engaged for the normal period of service which has expired, are now serving for the additional year under Section 87 of the Army Act or Section IX of the Territorial and Reserve Forces Act, 1907. These soldiers will not be selected for compulsory retention in the Armies of Occupation if other suitable men are available, and provided they can be given the 28 days demobilization furlough before their extra year expires. The Army Order does not apply to soldiers who volunteered for service with the Armies of Occupation or to those who re-enlisted under Army Order 124 of 1919.

42. In view of the progress of demobilization it was considered appropriate to make some modification in the conditions of release on extreme compassionate grounds. During the continuance of hostilities such a release would only be granted in very exceptional circumstances and then only by the War Office. Army Council Instruction No. 287 of 1919 was therefore published on 2nd May, 1919, which provided for the de-centralization of the machinery under which warrant officers, non-commissioned officers and men might be released on extreme compassionate grounds. The cases in which releases on these grounds might be granted were defined as those falling within one or more of the following categories :—

- (i.) *Son*, who has a widowed mother in necessitous circumstances with two or more children dependent upon her; no child being capable of earning and the mother herself being incapable of earning.
- (ii.) *Grandson*, who has a grandparent or grandparents in necessitous circumstances with two or more great-grandchildren or grandchildren dependent upon him, her, or them; no great-grandchild or grandchild being capable of earning and being wholly dependent on the grandparent or grandparents, and the grandparent or grandparents being incapable of earning and dependent on grandson.
- (iii.) *Husband*, whose wife is in necessitous circumstances and is a chronic invalid and wholly dependent on the soldier, either without children or, if with children, no child being capable of earning.
- (iv.) *Widower*, with two or more children under 14 years of age and no near relation to look after them. The expression "near relation" for this purpose shall be interpreted as parent, grandparent, brother and sister of the soldier.

The provisions of the instruction did not, without special reference to the War Office, apply to soldiers serving on regular attestations whose period of Colour service had not expired, or to soldiers who volunteered for the Armies of Occupation.

43. Army Order 236 of 1919 was published on 11th June, 1919, by way of regulating the disposal of Aliens serving in the British Army on demobilization. By this Army Order it was provided that Aliens as defined by Army Council Instruction 859 of 1918 (with the exception of enemy aliens), including those who have been called up under the Military Service (Conventions with Allied States) Act, 1917, who have not already been demobilized will not be retained for service with the Armies of Occupation, but are to be discharged through Discharge Centres as soon as practicable after the ratification of peace. They will receive all the usual benefits which are accorded to soldiers on demobilization.

44. Special provision was made by Army Order 239 of 1919, for the award of War Gratuity to all soldiers who after serving in the Army were appointed to Commissions in the Army, Royal Navy, Royal Marines or Royal Air Force, or joined or were appointed to Commissions in the Dominion or Colonial Forces, granting them the same amount in respect of their service in the Army as was granted by Royal Warrant of 17th December, 1918, to other soldiers with similar service therein.

45. Army Order 243 of 1919 was published on 27th June, 1919, making certain modifications in the scheme of demobilization, which were to be put into operation contingently upon the signature by the German Government of the preliminary peace terms, and which were as follows:—

- (1.) Except in the case of personnel serving in India and the detachments of the Far North and of Siberia, the following were to be released with all possible despatch after the date referred to above in accordance with the condition specified in paragraph 3:—

All warrant officers, non-commissioned officers and men who were eligible for demobilization under sub-paragraphs (i.) to (ix.) of paragraph 3 of Army Order 55 of 1919, and who had not volunteered for service with the Armies of Occupation under paragraph 4 of that Army Order, but had been temporarily detained—

- (a.) On account of being required for the military machinery of demobilization, or
- (b.) In overseas garrisons pending relief.

- (2.) In order to give effect to the modifications outlined in paragraph 1, the undermentioned amendments came into force from the date referred to above, viz.:—

- (a.) Paragraph 3 (c) of Army Order 55 of 1919, and the schedule attached thereto was cancelled.
- (b.) Paragraph 3 (d) of Army Order 55 of 1919 was amended by the substitution of the words "India and detachments of the Far North and of Siberia" for the words "Overseas garrisons," and was renumbered "3 (c)."
- (c.) Army Order 87 of 1919 was cancelled.

- (3.) The despatch for release of all personnel eligible for demobilization under paragraph 3 of Army Order 55 of 1919, as amended by paragraph 2 of the present Army Order (with the exception of such as had volunteered under paragraph 4 of Army Order 55 of 1919), was to be completed by the dates and in the order stated below, viz.:—

- (a.) *Firstly*.—The despatch from their present stations or theatres of all men coming under the above description enlisted prior to 1st January, 1915, to be completed within 1 month of the signature by the German Government of the preliminary peace terms, subject to the necessary transport being available.
- (b.) *Secondly*.—The despatch from their present stations or theatres of all men coming under the above description enlisted in 1915, or who, having enlisted at any date since the 31st December, 1915, were over 37 years of age, to be completed within 2 months of the signature by the German Government of the preliminary peace terms, subject to the necessary transport being available.
- (c.) *Thirdly*.—The despatch from their present stations or theatres of all men eligible for demobilization under sub-paragraphs (v.) to (ix.) of paragraph 3 of Army Order 55 of 1919, who, not having volunteered under paragraph 4 of that Army Order, did not come within the conditions of sub-paragraphs (a) or (b) above, to be completed within 3 months of the signature by the German Government of the preliminary peace terms, subject to the necessary transport being available.

- (4.) Nothing in the Army Order was to prejudice the continuance of releases, under the arrangements and instructions then in force, until such time as the modifications contained in the present Army Order came into force.

46. With reference to paragraph 1 of Army Order 243 of 1919, Preliminary Peace Terms having been signed by the German Government on 28th June, 1919, Army Order 264 of 1919 gave effect to that Army Order as from the 28th June, 1919. The same order further provided for the despatch for release of personnel eligible for demobilization referred to in paragraph 4 of Army Order 243 of 1919, in accordance with sub-paragraphs (a), (b) and (c) of that paragraph, subject to the conditions therein specified to be completed by the following dates:—(a) 28th July, 1919; (b) 28th August, 1919; (c) 28th September, 1919.

47. An Army Council Instruction No. 421 of 1919 was published on 4th July, 1919, for the purpose of extending the operation of Army Council Instruction No. 287 of 1919, by providing for the demobilization of proprietors of one man businesses on compassionate grounds.

For the purpose of this Instruction a soldier was to be deemed to be the proprietor of a one man business if for a consecutive period of at least 12 months immediately previous to the date when he first joined the Colours for immediate service, he was the sole owner of, and carried on, on his own account, any profession, calling or business for gain, other than that of clergyman, dentist, doctor, physician or surgeon.

No such proprietor of a one man business was to be released unless each of the three following conditions was fulfilled:—

- (a.) He joined the Colours for immediate service on or before the 1st January, 1917.
- (b.) He was over 30 years of age at the date of the application.
- (c.) The resumption or continuance of his business was jeopardized owing to his absence.

48. By the Memorandum of the Secretary of State for War, published on 17th July, 1919, the following rules were laid down for demobilization as from that date:—

- (i.) Definite orders were issued that all 1914 men, except those in India and any there might be in Russia, should begin their journey home within 1 month of the signature of peace, namely, by the 28th July, and that all 1915 men and men over 37 years of age, except those in India and Russia, should start for home within 2 months of the signature of peace, namely, by the 28th August. All other men who were then desirous and eligible for demobilization under existing regulations would start for home within 3 months of the signature of peace, namely, by the 28th September. The above programme of releases would apply equally to men who, although demobilizable, had hitherto been retained for essential purposes usually described as "Machinery of Demobilization," but would not of course apply to men who, although eligible for demobilization, had volunteered to stay on for a period with the Armies of Occupation.
- (ii.) All Derby men who joined the Colours for service before the 1st July, 1916, excepting those in India and Russia, would have begun their journey home by the 1st November.
- (iii.) All 1914, 1915 men, and all Derby men who joined the Colours before the 1st July, 1916, who are in India, will similarly have started for home by the 1st December, if not released earlier, provided always that no unexpected trouble occurs in that country.
- (iv.) All troops in Russia, who had not volunteered to join the missions, would have started for home before the winter.
- (v.) As from 1st July, no conscript soldier would be sent to India or Mesopotamia, and no Derby man would be sent further from home than the Army of the Rhine.

The Memorandum further stated that it was hoped that it might be found possible to release in the early spring of next year all the remaining men, of all classes, who fought in the war—that is to say, embarked for any theatre of war or garrison abroad before the Armistice was signed—excepting always such as might have volunteered to continue serving. It was impossible, however, at that distance of time to make any definite plans in this respect. It was provided, however, that, if Peace were not ratified, or if the ratification were delayed, or if the Germans broke out

again, or if there were risings in India or Egypt, or serious trouble in Turkey, the above programme would have to be modified; and here and there shipping delays might possibly occur. But assuming all went well there was every hope and intention of being able to give effect to it.

49. Army Council Instruction No. 468 of 1st August, 1919, amends previous instructions as to demobilization during the period of leave, and lays down the action to be taken by Headquarters or Unit Commanders in the United Kingdom, in the case of soldiers who apply to be demobilized when on leave. If the soldier is on leave from overseas, other than from the Army of the Rhine, or France and Flanders, or Russia, and proves to be :—

- (i.) Demobilizable under Army Order 55 of 1919, and has not undertaken any obligation to continue in the Service, he will be demobilized.
- (ii.) Not demobilizable under Army Order 55 of 1919, but—
 - (a.) Was attested under Lord Derby's scheme;
 - (b.) Is 35 years of age or will have attained that age before 30th April, 1920;
 - (c.) Is under 18 years of age;
 - (d.) Is serving on a regular attestation and has less than 1 year's Colour service to complete;

in which cases he will be ordered to report at the expiration of his leave at his appropriate place of rejoining and posted to a unit at home.

- (iii.) Serving in a Dominion contingent, he will be ordered to report in writing to the Headquarter Office of his contingent in London and ask for instructions.

- (iv.) Soldiers on leave from North Russia, *i.e.*, Archangel or Murmansk (other than those who (a) volunteered for special service in North Russia; or (b) landed in Murmansk on or after 1st February, 1919; or (c) embarked from the United Kingdom for Archangel after the 14th May, 1919; or (d) while in North Russia volunteered to remain there after 31st August, 1919), and all those on leave from Siberia or General Denikin's area of South Russia, will be dealt with as follows :—

- (a.) Those eligible for demobilization under Army Order 55 of 1919 will be demobilized.
- (b.) Those not eligible for demobilization under Army Order 55 of 1919 will be ordered to report at the expiration of their leave at their place of rejoining and posted to a unit serving at home.

50. Army Order 287 of 1919, amplified previous Army Orders dealing with gratuities for officers and nurses and provided as follows :—

- (i.) With reference to Army Order 54 of 1919, the gratuities due under Article 497 of the Royal Warrant for Pay, &c., would in all cases become issuable on the 4th August, 1919, notwithstanding that the officers concerned might be continued in military service.
- (ii.) Similarly the gratuity granted to Regular officers by Army Order 85 of 1919, and to members of the Military Nursing Services by Army Order 194 of 1919 would become due on the 4th August, 1919.
- (iii.) The appointment or rank which would determine the gratuity would be that held on the 3rd August, 1919, or on the 11th November, 1918, if more advantageous, with the concession of assessment on paid *acting* rank, held prior to 5th August, 1919, under the conditions stated in Army Order 117 of 1919.
- (iv.) The gratuity would be issuable by the Army agents or Command Paymaster by whom pay for the 4th August was issued. In the case of officers who had proceeded to Indian payment, the gratuity would, therefore, be issuable by the Army agents if the 4th August fell within the authorized period for which the agents continued to issue pay after embarkation. Officers returning from Indian payment would draw the gratuity from the Army agents if the date of embarkation was on or before the 4th August.

The Army Order further pointed out that the object of the gratuities, other than those given to members of the permanent Army, was to assist the recipients to resettle

themselves in civil life, and officers were earnestly advised, in their own interests, not to spend their gratuities before they left the Service. Commanding officers were enjoined to use their influence for the exercise of prudence in this matter by officers serving under them.

Similarly Army Order 290 of 1919 dealt with war gratuities to soldiers, and provided as follows :—

- (i.) With reference to paragraph 7 of the Army Council's Instructions in Army Order 54 of 1919, war gratuities under Army Order 17 of 1919 became issuable on the 4th August, 1919. In paragraph 30 of the Army Council's Instructions in Army Order 17 of 1919 the words *after* "assessed" in line 4 would accordingly be deleted.
- (ii.) The gratuity would be credited in the first instance to the soldier's account, but, if he so desired, the whole or any portion of it would be invested for him under the usual conditions in War Savings Certificates, or (unless he was serving at a Home station) deposited for him in the Post Office Savings Bank.
- (iii.) The gratuity would be assessed and charged by the paymaster in whose payment the soldier was on the 4th August, except that where the last pay certificate of a soldier returning from a Colonial station, or from Indian payment after the 3rd August, contained a certificate that the gratuity had not been and would not be issued by the Command Paymaster or the Military Accounts Department of India, as the case might be, the issue would be made by the paymaster to whose payment the soldier was transferred.

The procedure to be followed in the case of soldiers proceeding for dispersal was as follows :—

- (a.) Where the gratuity of a soldier who had proceeded on dispersal furlough, terminating after the 4th August, had already been notified for deposit in the Post Office Savings Bank, the deposit would not be cancelled, but the Controller of the Post Office Savings Bank would arrange for the issue of the deposit book on the 4th August or as soon thereafter as possible.
- (b.) Where the gratuity due to a soldier who had proceeded on dispersal furlough had not already been notified to the Post Office Savings Bank, the deposit would not be made. The gratuity, less dispersal equipment stoppages, and less 1*l.* withheld in respect of the military greatcoat, would be paid by separate money order.
- (c.) For a soldier who proceeds for dispersal after the 4th August, 1919, stoppages made in respect of arms or equipment lost on the journey to the dispersal station will be recovered from any emoluments (other than ration allowance) that may become due to him. Similarly, the sum of 1*l.* in respect of the military greatcoat, taken by the soldier when he goes on dispersal furlough, will be withheld from his general furlough or terminal emoluments.

The same Army Order further laid down that the Service gratuity granted by Articles 1117 to 1119 of the Royal Warrant for Pay, &c., where admissible in addition to the War Gratuity, was not issuable while a soldier continued to serve with the Colours. Gratuities such as those given by Army Orders 283 of 1914, 209 of 1916, and 222 of 1918, would remain issuable, as laid down in the respective regulations under which they were granted.

Finally, Commanding Officers were instructed to explain to their men the object of the War Gratuity, and to point out the desirability of investing the amount or placing it on deposit until their release from the Colours.

51. An extension of Army Order 55 of 1919 was made by Army Order 292 of 1919 in favour of warrant officers, non-commissioned officers and men attested under Lord Derby's scheme, and who joined for service with the Colours prior to 1st July, 1916. This Army Order provides that such personnel shall be eligible for demobilization as soon as the exigencies of the service permit. The appendix to Army Order 243 of 1919 was similarly extended by Army Order 293 of 1919.

52. Paragraph 4 of Army Order 243 of 1919 was extended by Army Order 293 of 1919, so as to include the despatch from their present stations, or theatres, of

all men eligible for demobilization under sub-paragraph (x.) of Army Order 55 of 1919, who, not having volunteered under paragraph 4 of that Army Order, did not come within the conditions of sub-paragraph (a), (b) or (c). The despatch of these men was to be completed by the 1st November, 1919, subject to the necessary transport being available.

53. Army Council Instruction No. 485 of 1919, published on 14th August, 1919, amends paragraph 1218 of Army Demobilization Regulations, Part I., and provides for the procedure to be followed regarding applications by officers, soldiers and their families for deferment of their repatriation beyond 6 months. Deferment will not be granted—

- (a.) Beyond the 31st December, 1920.
- (b.) Unless such application is submitted within 6 months from the date of release.
- (c.) Unless the applicant is in Group 45 (A), or if in Group 45 (B) agrees to transfer to 45 (A) at once, and signs a certificate to that effect.

Subject to the above conditions, applications will be dealt with as follows :—

- (i.) On educational grounds.
- (ii.) On account of training.
- (iii.) On medical grounds.
- (iv.) On business grounds.

54. Army Council Instruction No 491 of 1919, published 19th August, 1919, amends paragraph 1202, Chapter XII., Army Demobilization Regulations, Part 1, and extends the privilege of repatriation at Government expense to those officers to whom regular commissions were granted during the war, provided they—

- (i.) Were given regular commissions when they only asked for temporary commissions.
- (ii.) Did not receive emoluments at the higher rate under paragraph 673, Allowance Regulations, having been promoted from the ranks under footnote to Article 208A, Pay Warrant.
- (iii.) Are willing to be transferred to the Reserve of Officers and such transfer has been approved by the War Office.

55. Army Order 55 of 1919, as amended by Army Order 292 of 1919, was further extended by Army Order 298 of 1919, in favour of all warrant officers, non-commissioned officers and men who enlisted voluntarily and joined for continuous service with the Colours prior to 1st July, 1916. This Army Order provides that such personnel shall be eligible for demobilization as soon as the exigencies of the Service permit, and excludes those called up under the Military Service Act. The appendix to Army Order 243 of 1919, as amended by Army Order 293 of 1919, was similarly extended by Army Order 299 of 1919.

56. Paragraph 4 of Army Order 243 of 1919, as amended by Army Order 293 of 1919, was further extended by Army Order 299 of 1919, so as to include the despatch from their present stations or theatres, of all men eligible for demobilization under sub-paragraph (xi) of Army Order 55 of 1919, who, not having volunteered under paragraph 4 of that Army Order, did not come within the conditions of sub-paragraphs (a), (b), (c) or (d). The despatch of these men was to be completed by 1st November, 1919, subject to the necessary transport being available.

57. By Army Order 321, published on 3rd September, 1919, further classes were opened for demobilization, and the undermentioned amendments accordingly were made to Army Order 55 of 1919, as amended by Army Orders 243, 292 and 298 of 1919, viz. :—

- (a.) Delete sub-paragraph (c) of paragraph 3.
- (b.) After sub-paragraph (xi) of paragraph 3 add the following new sub-paragraphs :—
 - (xii.) All warrant officers, non-commissioned officers and men who attested under Lord Derby's Scheme and joined for continuous service with the Colours on or after 1st July, 1916.
 - (xiii.) All warrant officers, non-commissioned officers and men who enlisted voluntarily and joined for continuous service with the Colours on or after 1st July, 1916.

- (xiv.) All warrant officers, non-commissioned officers and men who had attained the age of 36 years by the 30th April, 1919.
- (xv.) All warrant officers, non-commissioned officers and men entitled to wear two wound stripes.

The despatch for release laid down in paragraph 4, Army Order 243, is now to be amplified so that the despatch for release of all personnel eligible for demobilization under paragraph 3 of Army Order 55 of 1919, excepting those who have undertaken, or may undertake, any further obligation to continue in the Service, will be completed as soon as possible, but in any case not later than the dates stated below, viz :—

- (a.) *Firstly.*—The despatch from their present stations or theatres, except India (see sub-paragraph (e)), of all men coming under the above description enlisted prior to 1st January, 1915, to be completed by the 28th July, 1919, subject to the necessary transport being available.
- (b.) *Secondly.*—The despatch from their present stations or theatres, except India (see sub-paragraph (e)), of all men coming under the above description enlisted in 1915, or who, having enlisted at any date since the 31st December, 1915, were over 37 years of age, to be completed by the 28th August, 1919, subject to the necessary transport being available.
- (c.) *Thirdly.*—The despatch from their present stations or theatres, except India (see sub-paragraph (e)), of all men eligible for demobilization under sub-paragraphs (v.) to (ix.) of paragraph 3 of Army Order 55 of 1919 who, not having volunteered under paragraph 4 of that Army Order, did not come within the conditions of sub-paragraphs (a) or (b) above, to be completed by 28th September, 1919, subject to the necessary transport being available.
- (d.) *Fourthly.*—The despatch from their present stations or theatres, except India (see sub-paragraph (e)), of all men eligible for demobilization under sub-paragraphs (x.) and (xi.) of paragraph 3 of Army Order 55 of 1919 who, not having volunteered under paragraph 4 of that Army Order, did not come within the conditions of sub-paragraphs (a) (b) or (c) above, to be completed by the 1st November, 1919, subject to the necessary transport being available.
- (e.) *Fifthly.*—The despatch from India of all men eligible for demobilization under sub-paragraphs (i.) to (xi.) of paragraph 3 of Army Order 55 of 1919 to be completed by the 1st February, 1920, subject to the necessary transport being available.
- (f.) *Sixthly.*—The despatch from their present stations or theatres of all men eligible for demobilization under sub-paragraphs (xii.), (xiii.), (xiv.) and (xv.) of paragraph 3 of Army Order 55 of 1919, to be completed by 1st February, 1920, subject to the necessary transport being available.

The phrase "despatch from their present stations or theatres" is in the case of troops serving overseas to be applied as meaning "despatch from a port of embarkation in the theatre concerned *en route* to the United Kingdom for the purpose of being demobilized."

58. With reference to Army Order 55 of 1919, the expression "extreme compassionate grounds" as used in paragraph 3 (viii.) therein, is made applicable to, and is limited to, warrant officers, non-commissioned officers and men falling within one or more of the following categories by Army Council Instruction No. 537 of 1919, published 11th September, 1919 :—

I.—Domestic grounds—

- (i.) Son, who has one parent (both parents) in necessitous circumstances, the parent (parents) being wholly dependent on the soldier.
- (ii.) Only son, of a widow or widower who is in necessitous circumstances and over sixty years of age.
- (iii.) Sole surviving son of a widow in necessitous circumstances where one or more sons have been killed in action or have died on active service.
- (iv.) Brother, who has one or more sisters in necessitous circumstances, the sister or sisters being incapable of earning and wholly dependent on the soldier.
- (v.) Grandson, who has a grandparent or grandparents in necessitous circumstances with two or more great-grandchildren or grandchildren dependent upon him, her or them; no great-grandchild or grandchild

being capable of earning and being wholly dependent on the grandparent or grandparents, and the grandparent or grandparents being incapable of earning and dependent on the grandson.

(vi.) Husband, whose wife is in necessitous circumstances and is a chronic invalid and wholly dependent on the soldier, either without children or with children, no child being capable of earning.

(vii.) Widower, with two or more children under 14 years and no near relation to look after them. The expression "near relation" for this purpose shall be interpreted as parent, grand-parent, brother and sister of the soldier.

II.—Business grounds.

(viii.) Proprietor of a one-man business as defined below:

A soldier shall be deemed to be the proprietor of a one-man business, if, for a consecutive period of at least 12 calendar months immediately previous to the date when he first joined the colours for immediate service, he was the sole owner of, and carried on, on his own account, any profession, calling or business for gain.

(ix.) Son who, through the death of his parent, has become the sole proprietor of a business as defined in, and which has been conducted for a period corresponding to that laid down in, sub-paragraph (viii.) above.

(x.) Son whose parent is conducting a business as defined in, and which has been conducted for a period corresponding to that laid down in sub-paragraph (viii.) above, and whose health, through strain, is breaking down, the son being right hand man to his parents, and, if not actually, virtually, his parent's partner.

(2.) No such proprietor of a one-man business or assistant to a parent as defined in paragraph 1 (viii.) (ix.) and (x.) shall be released unless each of the three following conditions is fulfilled:—

(a.) The soldier served with an Expeditionary Force overseas for an aggregate period of not less than 6 calendar months

(b.) The soldier is over 30 years of age at the date of the application referred to in paragraph 5 below.

(c.) The resumption or continuance of his, or his parent's business, is jeopardised owing to his absence.

(3.) It is further notified that a release on extreme compassionate grounds shall not be extended to—

(i.) Soldiers serving on regular engagements whose period of Colour Service has not expired.

(ii.) Soldiers who volunteered for service in the Armies of Occupation, without reference to the War Office.

This Army Council Instruction was substituted for Army Council Instructions 287 and 421 of 1919, which were cancelled.

59. Owing to the cessation of the period of emergency it was considered that it was no longer possible to retain in active employment any Regular retired officers, unless they held commissions in the Territorial Force or the Special Reserve, and accordingly Army Council Instruction 556 of 1919 was published on 20th September, 1919. This Army Council Instruction provided that all retired officers serving in the United Kingdom were to be sent for demobilization by 15th October, 1919, and all retired officers serving abroad were to be despatched to the United Kingdom for demobilization by 1st November, 1919. In cases where it was considered necessary in the interests of the public service to retain temporarily the services of a retired officer beyond the above-mentioned dates, an immediate application for his retention had to be forwarded to the War Office, and such applications would only be approved in cases where the period for which retention was asked was so short as to make it undesirable to train another officer for the appointment.

60. By Army Council Instruction 559 of 1919, published on 25th September, 1919, the following amendments were made to Army Council Instruction 468 of 1919, viz.:—

(1) If a soldier is on leave from overseas other than from the Army of the Rhine or France and Flanders, or Russia, and proves to be not demobilizab

under Army Order 55 of 1919, he will be ordered to rejoin his unit overseas on the conclusion of his leave, unless—

- (a.) He is 35 years of age, or will have attained that age before 30th April, 1920.
- (b.) He is under 18 years of age.
- (c.) He is serving on a regular normal attestation and has less than one year's Colour service to complete.
- (d.) He comes under the terms of Army Order 236 of 1919, in which cases he will be ordered to report at the expiration of his leave at his appropriate place of rejoining and posted to a unit at home.

(2) All soldiers who, while in North Russia have volunteered to remain there after 31st August, 1919, and those who have joined the British Military Mission to General Denikin under the special conditions laid down for that force, and who have been given short leave to the United Kingdom on that account, are to return overseas on conclusion of their leave, in accordance with orders already issued.

(3) All other soldiers on leave from North Russia and also those on leave from Siberia, will be dealt with as laid down in Army Council Instruction 468 of 1919.

61. In order to open further classes for demobilization the following amendments were made by Army Order 365 of 1919, published on the 17th October, 1919, to Army Order 55 of 1919, as amended by Army Orders 243, 292, 298 and 321 of 1919, viz. :—

- (1) (a.) Delete sub-paragraph (b) of paragraph 3.
- (b.) After sub-paragraph (xv.) of paragraph 3 add the following new sub-paragraphs :—

(xvi.) All warrant officers, non-commissioned officers and men who joined for continuous service with the Colours prior to the 1st July, 1919, or who have attained the age of 34 years by 30th April, 1919.

(xvii.) All warrant officers, non-commissioned officers and men who joined for continuous service with the Colours prior to the 1st July, 1918, or who have attained the age of 32 years by the 30th April, 1919, or who are entitled to wear one wound stripe.

(xviii.) All warrant officers, non-commissioned officers and men who joined for continuous service with the Colours on or after 1st July, 1918.

(2) The programme of despatch for release laid down in paragraph 3 of Army Order 321 of 1919, will now be amplified so that the despatch for the release of all personnel eligible for demobilization under paragraph 3 of Army Order 55 of 1919,* excepting those who have undertaken or are permitted to undertake any further obligation to continue in the service, will be completed as soon as possible, but in any case not later than the dates stated below :—

(g.) *Seventhly.*—The despatch from their present stations or theatres of all men eligible for demobilization under sub-paragraph (xvi.) of paragraph 3 of Army Order 55 of 1919, to be completed by 1st March, 1920, subject to the necessary transport being available.

(h.) *Eighthly.*—The despatch from their present stations or theatres of all men eligible for demobilization under sub-paragraph (xvii.) of paragraph 3 of Army Order 55 of 1919, to be completed by the 15th March, 1920, subject to the necessary transport being available.

(i.) *Ninthly.*—The despatch from their present stations or theatres of all men eligible for demobilization under sub-paragraph (xviii.) of paragraph 3 of Army Order 55 of 1919, to be completed by the 1st April, 1920, subject to the necessary transport being available.

* Such warrant officers, non-commissioned officers and men will be despatched from their present station or theatre immediately on the expiration of the period for which they have volunteered, subject to the necessary transport being available. They may be despatched for demobilization at their own request, or compulsorily as soon as their services are no longer required, owing to reduction in establishments or to replacements becoming available from regular or re-enlisted soldiers.

62. (1.) Army Council Instruction No. 2 was published on 1st January, 1920, altering the procedure for dispersal of troops in order to allow of immediate reductions being effected in establishments of dispersal units; the procedure as regards demobilization was varied by said Army Council Instruction as follows:—

Troops serving in the United Kingdom.

(2.) On and after 15th January, 1920, officers and other ranks serving in units in the United Kingdom will not pass through a Dispersal Station, but will be dispersed direct to their homes from their units after the unit has received the demobilization documents through the post from the "Officers' Dispersal Unit, London," or the "Soldiers' Dispersal Unit, London," respectively.

The address of the Officers' Dispersal Unit is Knaresborough House, Knaresborough Place, London, S.W. 5.

The address of the Soldiers' Dispersal Unit is 22, Warwick Square, London, S.W. 1.

(3.) In the case of *officers*, the procedure will be as follows:—

(a.) The Unit Commander will cause the officer to be medically examined in accordance with paragraph 742, Army Demobilization Regulations, and will forward Army Form Z 22 to the Secretary, War Office (F. 3, Cornwall House, Stamford Street, S.E. 1).

(b.) The Unit Commander will also cause the following certificates to be prepared:—

Dispersal Certificate, Army Form Z 1.

Allowance Certificate, Army Form Z 41.

Clearance Certificate, Army Form Z 42 or Z 42A.

Officers Commanding Units *in the United Kingdom* will ensure that each officer, when his Dispersal Certificate is made out, is questioned to ascertain whether he belongs to any of the following categories:—

(i.) *Previously dispersed since 11th November, 1918.*

(ii.) *Previously gazetted out since 11th November, 1918.*

(iii.) *Not serving in the Army on 11th November, 1918.*

Where applicable, the appropriate heading (as shown in italics) will be endorsed in red ink on the top of the Dispersal Certificate.

(c.) The Unit Commander, after detaching the two counterfoils of the Dispersal Certificate, Army Form Z 1 will forward the remainder of the Dispersal Certificate to the Commandant, Officers' Dispersal Unit, London, and will dispose of the counterfoils as directed on the form.

(d.) On receipt of Army Form Z 1 the Commandant, Officers' Dispersal Unit, London, will cause a Protection Certificate, Army Form Z 3, to be prepared in triplicate. The "date of dispersal" entered on the Protection Certificate will be a date *three* days later than the date of *despatch* of the Protection Certificate from London, the Commandant, Officers' Dispersal Unit, London, will then dispose of the three copies of the Protection Certificate, as under:—

Send one copy to the Unit Commander.

Send one copy to the Secretary, War Office (M.S. 6).

Send one copy to the Agents or Command Paymaster concerned.

(e.) On receipt of the Protection Certificate the Unit Commander will demobilize the officer on the date preceding that entered on the Protection Certificate as the "date of dispersal." The Allowance Certificate, Army Form Z 41, will be stamped with the orderly room stamp of the unit, and will be dated for the same date as the "date of dispersal" on the Protection Certificate.

(f.) When leaving his unit on demobilization the officer will forward his Allowance Certificate, Army Form Z 41, to the Command Paymaster from whom he draws his allowances and his Clearance Certificate, Army Form Z 42 or 42A, to the Agents or Command Paymaster from whom he draws pay.

(g.) Army Book 471 (Demobilization and Civil Employment Officer's Booklet) and a Demobilization Ration Book will be issued to each officer by his unit on demobilization.

(h.) If, owing to sickness or other casualty, the officer cannot be demobilized on the date originally intended, the Unit Commander will destroy the Protection Certificate, or, if the delay is only of a temporary nature, will amend the "date of dispersal" shown on the Protection Certificate. In either case the Unit Commander will be responsible for notifying the Secretary, War Office (M.S. 6), the Secretary, War Office (Mob. XI), Park Buildings, St. James's Park, London, S.W. 1, and the Agents or Paymaster concerned, of any such cancellation or amendments of date of dispersal, with an explanation of the cause.

(4) In the case of *soldiers*, the procedure will be as follows:—

(a.) The Unit Commander will cause the soldier to be medically examined in accordance with paragraph 743, Army Demobilization Regulations, and will forward Army Form Z 22 to the Officer in charge of Records concerned.

(b.) The Unit Commander will also cause the following Army Forms to be prepared:—

Dispersal Certificate, Army Form Z 10 (duplicate copy not required).

Plain Clothes Voucher, Army Form Z 44.

Army Form O 1809z (except where the soldier is paid on the Acquittance Roll and Pay Book).

Certificate of Employment, whilst in the Army (Army Form Z 18), to be disposed of as directed in paragraph 706, Army Demobilization Regulations.

In the case of a soldier belonging to one of the following categories:—

(i.) *Previously dispersed since 11th November, 1918,*

(ii.) *Previously discharged since 11th November, 1918,*

(iii.) *Not serving in the Army on 11th November, 1918,*

the Officer Commanding his Unit will record the appropriate heading (as shown in italics) in red ink on the top of the Soldier's Dispersal Certificate (Army Form Z 10).

(c.) The Unit Commander, after detaching the counterfoil of the Dispersal Certificate, will forward the remainder of Army Form Z 10 to the Commandant, Soldiers' Dispersal Unit, London, accompanied by Army Form Z 44 and Army Form O 1809z, where necessary (*see* paragraph 4 (e)). In the case of the latter, any charges incurred (*e.g.*, barrack damages) after the date of its despatch will be immediately notified by the Unit Commander direct to the Fixed Centre Paymaster concerned, the documents being headed in *red ink* "Demobilized Soldier."

(d.) On receipt of the Dispersal Certificate, Army Form Z 10, the Commandant, Soldiers' Dispersal Unit, London, will cause a Protection Certificate, Army Form Z 11, to be prepared in quadruplicate. The "date of dispersal" entered on the Protection Certificate will be a date *three* days later than the date of *despatch* of the Protection Certificate from London. The Commandant, Soldiers' Dispersal Unit, London, will then dispose of the four copies of the Protection Certificate, Army Form Z 11, as under:—

Send copy No. 1 to the Soldiers' Unit Commander.

Hand copy No. 2 to the Dispersal Paymaster for transmission to the Fixed Centre Paymaster concerned.

Send copy No. 3 to the Officer i/c Records concerned.

Retain copy No. 4 for reference.

The Commandant, Soldiers' Dispersal Unit, London, will also attach a stamped Greatcoat Voucher, Army Form Z 50, to No. 1 copy of the Protection Certificate.

(e.) Subsequent to the date of despatch of the documents referred to in paragraph 4 (c) (*see* also paragraph 5), the Unit Commander will—

(i.) Issue a Dispersal Advance of pay of 3*l.* as follows:—1*l.* on the normal pay day and 2*l.* on the day the soldier leaves his unit for demobilization. If the date of dispersal falls on the normal pay day the soldier will receive the 3*l.* Separate receipts should be obtained from the soldiers for the

dispersal advances. The receipts should support the charges in the accounts of the Unit Commander. Under no circumstances is the soldier to receive more than 8*l.* from the Unit Commander after the Army Form O 1809*z* has been rendered. The Fixed Centre Paymaster will be responsible for transmitting further payments to the soldier on demobilization. The Army Form O 1809*z* will clearly show the cash issues made to the soldier up to the date of despatch of the Dispersal Certificate, &c., as well as the 3*l.* Dispersal Advance. *The latter will, however, be shown separately in all cases.* In cases where the soldier is in receipt of family allowance the usual issue of the allowance will be made on the normal pay day in addition to the 1*l.* (or 3*l.*) advance of pay. The last day for which family allowance will be issued by the Unit Commander will be shown on Army Form O 1809*z*.

- (ii.) Demobilize the soldier on the date preceding that entered on the Protection Certificate as the "date of dispersal," handing him—

No. 1 copy of the Protection Certificate (Army Form Z 11). The soldier's receipt for the dispersal advances should be inserted in No. (1) copy of the certificate and the reference to an advance of 2*l.* should be amended to 3*l.*

Army Form Z 50 (Greatcoat Voucher).

Army Book 472 (Soldiers' Booklet).

Demobilization Ration Book.

Army Form Z 18 (Certificate of Employment whilst in the Army).

- (iii.) Give the soldier the unexpended portion (if any) of the day's ration.

- (iv.) Inform him that he will obtain an Out-of-Work Donation Policy on presentation of his Protection Certificate at his local Employment Exchange.

(5.) With reference to paragraph 4 (c) above, the Unit Commander will post the Dispersal Certificate and other documents to London *six* days prior to the date on which it is intended the individual shall leave his unit on demobilization. Thus, for personnel who are for dispersal on 15th January, 1920, the Dispersal Certificates will be despatched to London on 9th January. Protection Certificates will then be posted from London in sufficient time to enable the unit to issue them on 15th January. The "date of dispersal" shown on the Protection Certificate will, however, be 16th January, as it is desirable that the individual shall be able to reach his home before his demobilization furlough begins; but where documents are sent incomplete to the Commandant, Soldiers' Dispersal Unit, London, they will be returned to the Unit Commander for fresh forms to be compiled, the intended date of dispersal being fixed 6 days from the date the *new* documents are despatched.

(6.) If, owing to sickness or other casualty, the soldier cannot be demobilized on the date originally fixed, the Unit Commander will send the Protection Certificate to the Secretary, War Office (Mob. XI.), Park Buildings, St. James's Park, London, S.W. 1, endorsed in red ink as follows:—"Cancelled (with reason)," e.g., "(admitted to Hospital)." He will immediately notify the Fixed Centre Paymaster, the Officer i/c Records and the Commandant, Soldiers' Dispersal Unit, London, of such cancellation, with an explanation of the cause. When a Protection Certificate has been cancelled, a new Dispersal Certificate, new Army Form O 1809*z*, and a new Army Form Z 44, must be sent to the Commandant, Soldiers' Dispersal Unit, London, before another Protection Certificate can be issued by him.

Troops Serving Overseas.

(7.) On 15th January, 1920, the Dispersal Units at Prees Heath, Ripon and Fovant was disbanded, but a small Rest Camp Unit was substituted at Prees Heath and at Fovant.

On and after that date, dispersal drafts for Dispersal Areas IX. (a), IX. (b), X. (a), X. (b) and X. (c), will be sent to Purfleet Dispersal Station as heretofore. Dispersal

drafts for dispersal areas other than those mentioned above, if disembarking at Devonport or Southampton, will be sent to Fovant Rest Camp, and if disembarking at Liverpool, will be sent to Prees Heath Rest Camp. Dispersal drafts disembarking at Dover, Folkestone, or on the Thames will all be sent to Purfleet Dispersal Station, irrespective of the dispersal areas for which the individuals are destined. On arrival at Devonport, Southampton or Liverpool, dispersal drafts for dispersal areas other than IX. (a), IX. (b), X. (a), X. (b), X. (c), will proceed direct to the appropriate Rest Camp. Immediately on arrival at the Rest Camp the original Dispersal Certificates will be collected and handed to an officer detailed by Command Headquarters, who will proceed to London as rapidly as possible, where he will hand in the Officers' Dispersal Certificates to the "Officers' Dispersal Unit, London," and the Soldiers' Dispersal Certificates to the "Soldiers' Dispersal Unit, London."

Protection Certificates will then be prepared and the officers will return immediately to the Rest Camp, where the dispersal drafts will be dispersed to their homes in accordance with paragraph 4 (e) above, the duties of "Unit Commander" being carried out by the Commandant, Rest Camp, except that an advance of 2*l.* only will be made to the soldier by an officer of the Army Pay Department, who will receive Army Book 64, or Army Form O 1809z, as the case may be, and transmit it with his other documents to the Fixed Centre Paymaster concerned. In the event of an officer or soldier becoming a temporary casualty owing to sickness (not involving admission to hospital) or other cause after arrival at the Rest Camp, the Commandant will proceed as directed in paragraph 3 (h), or 6, of the Instruction, whichever is applicable. If necessary the Commandant, Rest Camp, will obtain imprests from the Command Paymaster to enable him to make small cash issues to the men whilst awaiting demobilization. Such cash issues will be accounted for on Acquittance Rolls (or Army Form N 1510) and will be duly recorded in the soldiers Army Book 64 (or on Army Form O 1809z, as the case may be), the "station" and date of advance being clearly shown. In the event of Army Book 64 or Army Form O 1809z not being available, a manuscript form showing the amount advanced will be duly signed by the officer making the advance and attached to the Fixed Centre Paymaster's copy of the Protection Certificate.

The Commandant, Rest Camp, will arrange for any other necessary clerical staff to be furnished by the dispersal drafts. Arms and personal equipment of dispersal drafts will be collected and disposed of at the Rest Camp under arrangements to be made by the Headquarters Commands concerned. Specimen suits of plain clothes will also be provided to enable the soldier to exercise his option on Army Form Z 44 of having a suit of plain clothes or the money allowance of 52*s.* 6*d.* in lieu.

(8.) *Personnel for Repatriation.*—The above instructions are not applicable to personnel who claim repatriation overseas. The latter, whether serving in the United Kingdom, or arriving in the United Kingdom from overseas, will be sent to the Repatriation Centre, Winchester, in accordance with current instructions.

63. Army Council Instruction 63, which was issued on 5th February, 1920, explained to Officers in charge of Records the action which should be taken when it was discovered that a Regular soldier with uncompleted Colour service had been demobilized in error.

64. Army Council Instruction No. 100 was published 20th February, 1920, respecting the issue of civilian clothes to men on dispersal as follows:—

(1.) With reference to Army Council Instruction 2 of 1920, the following instructions should be followed in the preparation of Army Form Z 44 by Officers Commanding units.

(2.) Where a special size suit is necessary the instructions already given on Army Form Z 44 should be followed. In ordinary cases it will be sufficient if the height and breast measurements are accurately given.

The breast measurement should be taken close up under the arms and over the waistcoat.

(3.) The suits are supplied in one pattern, and in the following colours:—

(a.) Blue. (b.) Dark grey. (c.) Light grey. (d.) Dark brown.
(e.) Light brown.

- (4.) As it is not practicable to supply units with samples of the suits it will be sufficient if the soldier is asked to make his selection in accordance with paragraph 3.

65. Army Order 98 was published on 29th March, 1920. Part I. dealt with the Termination of Compulsory Service in the Army as follows:—

Abolition of Class Z of the Army Reserve.—1. All soldiers in Class Z of the Army Reserve will be deemed to have been discharged as from the 31st March, 1920. Army Form Z 21 in possession of a Class Z reservist, serving on a duration of the war engagement, will constitute a final discharge certificate (except as provided for in sub-paragraph (b) (ii) of paragraph 415, King's Regulations, as amended by Army Order 384 of 1919, which is republished for information as an Appendix to this Army Order), and the date of discharge will be inserted on that Army Form if returned to the Officer i/c Records by any man who so desires.

Part II. set out arrangements for Termination of Compulsory Service in the Army:—

- (1.) All warrant officers, non-commissioned officers and men serving on duration of war engagements, or who were called up under the Military Service Acts, will be despatched from their present station or theatre by 31st March for demobilization, subject to the necessary transport being available, with the exception of those who—
 - (i.) Have deferred their demobilization by volunteering (*see* paragraph 2);
 - (ii.) Are undergoing hospital treatment;
 - (iii.) Are undergoing sentences of imprisonment or detention (*see* paragraph 3).
- (2.) Those falling under paragraph 1 (i.) above, that is, warrant officers, non-commissioned officers and men who have volunteered for the Armies of Occupation under Army Order 55 of 1919, or deferred their demobilization (unless any of these have been allowed to extend their service under Army Order 120 or 192 of 1919, or Army Order 8 of 1920, or under Section 78 (1) (c) of the Army Act under War Office instructions), will be dealt with as follows:—
 - (i.) Men serving at home will be demobilized on completion of the period for which they volunteered or deferred their demobilization, but in no case later than 31st July, 1920, and will be discharged on completion of demobilization furlough.
 - (ii.) Men serving west of Suez (*i.e.*, in stations from which the voyage does not necessitate a journey through the Suez Canal and Red Sea) will be despatched for demobilization from their present theatre on completion of the period for which they volunteered or deferred their demobilization, but in no case later than 31st July, 1920, and will be discharged on completion of demobilization furlough.
 - (iii.) Men serving east of Suez (*i.e.*, in stations from which the voyage necessitates a journey through the Suez Canal and Red Sea) will be despatched for demobilization from their present theatre on completion of the period for which they volunteered or deferred their demobilization, but in no case later than 30th April, 1920, and will be discharged on completion of demobilization furlough.
- (3.) Those falling under paragraph (1) (iii.) will be dealt with as follows:—

If serving sentences of imprisonment or detention outside the United Kingdom they will, if circumstances do not in the opinion of the General Officer Commanding concerned warrant their release on or before the 31st March, be forthwith committed:—

 - (a.) If their offences are of a military nature, to detention barracks in the United Kingdom.
 - (b.) If their offences are of a civil nature, to civil prisons in the United Kingdom.

SECTION 2.

STATISTICAL STATEMENT OF RETURNS.

The following Demobilization Report gives the latest available returns up to noon, 12th May, 1920 :—

The number demobilized since 11th November, 1918, to noon, 12th May, 1920, as reported by telegram is—

	Officers.			Other ranks.		
Army	162,313	3,592,476
R.A.F.	25,104*	255,919*
Total	187,417	3,848,395

Royal Naval Division (572 officers, 11,887 other ranks) are included in "Army."

The following is the analysis of the total shown below only, and is taken from Dispersal Certificates received by post.

(NOTE.—The "Repatriated from the United Kingdom" now included in Returns A, B, D and E are the numbers that have sailed. Men "awaiting repatriation" are not included.)

ANALYSED RETURNS TO NOON, 12TH MAY, 1920.

(a.) RETURN of Demobilizations by Theatres of War and Commands, including personnel of the Royal Air Force and the Royal Naval Division.

I.—ANALYSED.				Analysed during previous 14 days.		Total to date since 11.11.18.

Events in, November, 1918, to August, 1920	32184	7th January, 1921.

PART XXVII.

TIMBER SUPPLY FOR WAR REQUIREMENTS.

At the beginning of the war the supply of timber for war requirements devolved upon the Office of Works. In the autumn of 1915, when it was found necessary to supplement the supply from Home sources, the Home-Grown Timber Committee was appointed under the Board of Agriculture for the purpose of assisting in the supply of timber for war purposes in France.

Early in 1917, in view of the restriction of tonnage and the consequent necessity for a large measure of control, the Home-Grown Timber Committee was merged with the appropriate staff of the Office of Works in the Directorate of Timber Supplies under the War Office, until May, 1917, when it was transferred to the Board of Trade as the Timber Supplies Department, under a Controller.

The following table shows the imports of foreign wood and the production of home-grown timber :—

Year.	Imports.—Loads.	Production of home-grown timber (estimated).
	(50 cubic feet).	Tons (50 cubic feet).
1913	11,589,811	900,000
1914	8,432,646	900,000
1915	7,665,524	900,000
1916	6,318,872	1,000,000
1917	2,875,143	3,000,000
1918 (estimated).	2,400,000	4,250,000

The estimated requirements for the year 1918 are—

Government	...	1,005,576 standards (165 cubic feet) sawn timber.
Civil	...	222,000 " " "
Collieries	...	3,000,000 tons (50 cubic feet) mining timber.

Labour.—The labour employed in the service of the Department on 1st November, 1918, was as follows :—

British	8,296
Canadian Forestry Corps...	7,160
Newfoundland Forestry Corps	429
New Englanders	(ceased working.)
Portuguese	2,288
Finns	940
Prisoners of war	3,695
Miscellaneous	410
Women cutters and measurers	1,683
Total	24,901

The Canadian Forestry Corps working in Great Britain consists of 40 companies of about 179 men each, under the command of Brigadier-General A. McDougall, C.B. The first draft landed on 28th April, 1916. The corps is well equipped with first class mills, and plays a very important part in the production of timber. Attached labour includes 342 Portuguese, 283 Danes and 1,397 German prisoners of war.

The Newfoundland Forestry Corps commenced operations in July, 1917, in Scotland.

The New England saw-mill units are a civil organization equipped and fitted out with mills and transport by public subscription in the New England States. They commenced operations in Scotland in July, 1917, and finished in July, 1918.

Transport.—On 1st June, 1918, the Department owned 946 horses and 203 lorries and wagons, excluding those employed by the Canadian Forestry Corps.

Sawmills.—The number of Departmental mills established on 1st June, 1918, was:—

Departmental	227
Canadian Forestry Corps	42
New England	10
Newfoundland	1
Total	280

Production by the Department.

Year.	Tons (50 cubic feet).
1916 ...	250,000
1917 ...	500,000
1918 ...	1,000,000 (estimated).

The production by the Trade is estimated for the year 1918 at about 3,500,000 tons, showing an enormous increase on that of pre-war days, and is capable of still further expansion if greater facilities could be given in respect of skilled labour and transport.

Acquisitions of Standing Timber by the Department up to 30th November, 1918.

England and Wales	99,000,000 cubic feet.
Scotland	43,000,000 "
Ireland	4,700,000 "
		<hr/>
		146,700,000

In August, 1918, the Canadian Forestry Corps operating in France under the Directorship of Lord Lovat comprised 11,500 Canadians, with 7,766 attached labourers. They are equipped with machinery of their own type.

Note.—The Timber control was discontinued on 31st March, 1919.

PART XXVIII.

ARMISTICES.

(i.) TERMS OF ARMISTICE WITH BULGARIA.

(Signed 29th September, 1918.)

MILITARY CONVENTION REGULATING THE CONDITIONS OF THE SUSPENSION OF HOSTILITIES BETWEEN THE ALLIED POWERS AND BULGARIA, WHICH CAME INTO FORCE AT 1200 HOURS ON 30TH SEPTEMBER, 1918.

1. Immediate evacuation, in accordance with a scheme to be evolved, of all the occupied territories in Greece and Serbia. From this territory neither cattle, grain nor supplies of any sort will be removed. No damage will be caused upon evacuation. The Bulgarian authorities will continue to administer those parts of Bulgaria actually in the occupation of the Allies.

2. Immediate demobilization of the whole Bulgarian Army, except for a group of all arms which will be maintained in a fit condition for action, and will comprise three divisions, each of 16 battalions, and four cavalry regiments, which will be employed as follows :—

Two divisions for the defence of the eastern frontier of Bulgaria and the Dobrudja, and one division to guard the railways.

3. Depôts will be established at points to be indicated by the High Command of the Armée d'Orient, of arms, munitions and military vehicles belonging to the demobilized units, which material will afterwards be put into store by the Bulgarian authorities, under the supervision of the Allies. The horses will also be handed over to the Allies.

4. Return to Greece of the material of the 4th Greek Army Corps taken from the Greek Army on the occupation of Eastern Macedonia in so far as it has not been sent to Germany.

5. The Bulgarian troops which are now west of the longitude of Uskub and belong to the XI German Army, will lay down their arms and will be considered until further orders as prisoners of war. Officers will retain their arms.

6. The employment until the conclusion of peace of Bulgarian prisoners of war in the east without the reciprocal rights as regards prisoners of war belonging to the Allied forces. These latter will be handed over without delay to the Allied authorities and deported civilians will be absolutely free to return to their homes.

7. Germany and Austria-Hungary will be given a period of 4 weeks in which to withdraw their troops and military authorities from Bulgaria. Within the same period the diplomatic and consular representatives of the Central Powers and their nationals will quit the territory of the Bulgarian kingdom. The orders for the cessation of hostilities will be given by the signatories of this Convention.

SECRET ARTICLES.

1. The eventual passage of the Allied military forces through Bulgarian territory, as well as the use of railways, roads, waterways and ports will be the subject of a special convention between the Bulgarian Government and the High Command of the Army of the East. The negotiations to this effect will begin immediately, within a period of 8 days at the most. They will also deal with the control of the telephones, telegraphs and wireless stations.

2. A certain number of strategic points will be occupied in the interior of Bulgarian territory by the Great Allied Powers. The occupation will be provisional and will serve purely as a guarantee; it will not give rise to coercion or arbitrary requisitioning. The Commander-in-Chief of the Allied Armies gives the assurance that, except under special circumstances, Sofia will not be occupied.

3. The Commander-in-Chief reserves to himself the right to insist on the absolute cessation of all relations between Bulgaria and her former Allies, in case of necessity.

4. The opening of Bulgarian ports to Allied and neutral vessels.

(ii.) TERMS OF ARMISTICE WITH TURKEY.

(Signed 30th October, 1918. Came into force 31st October, 1918.)

Conditions of an armistice agreed to and concluded between—

Vice-Admiral the Honourable Sir Somerset Arthur Gough-Calthorpe, British Commander-in-Chief of the Mediterranean Station, acting under authority from the British Government, in agreement with their Allies,

and

His Excellency Raouff Bey, Turkish Minister of Marine,

His Excellency Rechad Hikmet Bey, Turkish Under-Secretary for Foreign Affairs,

Lieutenant-Colonel Saadullah Bey, Turkish General Staff, acting under authority from the Turkish Government.

1. Opening of Dardanelles and Bosphorus and secure access to the Black Sea. Allied occupation of Dardanelles and Bosphorus forts.
2. Positions of all minefields, torpedo-tubes, and other obstructions in Turkish waters to be indicated, and assistance given to sweep or remove them as may be required.
3. All available information as to mines in the Black Sea to be communicated.
4. All Allied prisoners of war and Armenian interned persons and prisoners to be collected in Constantinople and handed over unconditionally to the Allies.
5. Immediate demobilization of the Turkish Army, except for such troops as are required for surveillance of frontiers and for the maintenance of internal order. Number of effectives and their disposition to be determined later by the Allies after consultation with the Turkish Government.
6. Surrender of all war vessels in Turkish waters, or in waters occupied by Turkey. These ships to be interned at such Turkish port or ports as may be directed, except such small vessels as are required for police or similar purposes in Turkish territorial waters.
7. The Allies to have the right to occupy any strategic points in the event of any situation arising which threatens the security of the Allies.
8. Free use by Allied ships of all ports and anchorages now in Turkish occupation, and denial of their use by enemy. Similar conditions to apply to Turkish mercantile shipping in Turkish waters for purposes of trade and demobilization of the army.
9. Use of all ship repair facilities at all Turkish ports and arsenals.
10. Allied occupation of the Taurus tunnel system.
11. Immediate withdrawal of Turkish troops from North-west Persia to behind the pre-war frontier has already been ordered, and will be carried out. Part of Transcaucasia has already been ordered to be evacuated by Turkish troops, the remainder to be evacuated if required by the Allies after they have studied the situation there.
12. Wireless telegraph and cable stations to be controlled by the Allies, Turkish Government messages excepted.
13. Prohibition to destroy any naval, military, or commercial material.
14. Facilities to be given for the purchase of coal, oil-fuel, and naval material from Turkish sources after the requirements of the country have been met. None of the above material to be exported.
15. Allied Control Officers to be placed on all railways, including such portions of Transcaucasian railways now under Turkish control, which must be placed at the free and complete disposal of the Allied authorities, due consideration being given to the needs of the population. This clause to include Allied occupation of Batum. Turkey will raise no objection to the occupation of Baku by the Allies.
16. The surrender of all garrisons in Hejaz, Assir, Yemen, Syria, and Mesopotamia to the nearest Allied Commander and the withdrawal of troops from Cilicia, except those necessary to maintain order, as will be determined under Clause 5.

17. Surrender of all Turkish officers in Tripolitania and Cyrenaica to the nearest Italian garrison. Turkey guarantees to stop supplies and communication with these officers if they do not obey the order to surrender.

18. Surrender of all ports occupied in Tripolitania and Cyrenaica, including Misurata, to the nearest Allied garrison.

19. All Germans and Austrians, naval, military and civilian, to be evacuated within one month from Turkish dominions. Those in remote districts as soon after as may be possible.

20. Compliance with such orders as may be conveyed for the disposal of the equipment, arms, and ammunition, including transport, of that portion of the Turkish Army which is demobilized under Clause 5.

21. An Allied representative to be attached to the Turkish Ministry of Supplies in order to safeguard Allied interests. This representative to be furnished with all information necessary for this purpose.

22. Turkish prisoners to be kept at the disposal of the Allied Powers. The release of Turkish civilian prisoners and prisoners over military age to be considered.

23. Obligation on the part of Turkey to cease all relations with the Central Powers.

24. In case of disorder in the six Armenian vilayets the Allies reserve to themselves the right to occupy any part of them.

25. Hostilities between the Allies and Turkey shall cease from noon, local time, on Thursday, 31st October, 1918.

Signed in duplicate on board His Britannic Majesty's ship "Agamemnon," at Port Mudros, Lemnos, the 30th October, 1918.

(iii.) TERMS OF ARMISTICE WITH AUSTRIA-HUNGARY.

(Signed 3rd November, 1918; came into force 4th November, 1918.)

MILITARY CLAUSES.

1. The immediate cessation of hostilities by land, sea and air.
2. Total demobilization of the Austro-Hungarian Army and immediate withdrawal of all Austro-Hungarian forces operating on the front from the North Sea to Switzerland. Within Austro-Hungarian territory, limited as in Clause 3 below, there shall only be maintained as an organized military force a maximum of twenty divisions, reduced to pre-war peace effectives. Half the Divisional, Corps and Army artillery and equipment shall be collected at points to be indicated by the Allies and United States of America for delivery to them, beginning with all such material as exists in the territories to be evacuated by the Austro-Hungarian forces.
3. Evacuation of all territories invaded by Austria-Hungary since the beginning of war. Withdrawal within such periods as shall be determined by the Commander-in-Chief of the Allies forces on each front of the Austro-Hungarian Armies behind a line fixed as follows:—

From Piz Umbrail to the north of the Stelvio it will follow the crest of the Rhaetian Alps up to the sources of the Adige and the Eisack, passing thence by Mounts Reschen and Brenner and the heights of Oetz and Ziller; the line thence turns south, crossing Mount Toblach, and meeting the present frontier of the Carnic Alps. It follows this frontier up to Mount Tarvis, and after Mount Tarvis the watershed of the Julian Alps by the Col of Predil, Mount Manhart, the Tricorno (Terlön), and the watershed of the Cols di Podbordo, Podlanischam, and Idria. From this point the line turns south-east towards the Schneeberg, excluding the whole basin of the Save and its tributaries; from the Schneeberg it goes down towards the coast in such a way as to include Castua, Mattuglie, and Volosca in the evacuated territories.

It will also follow the administrative limits of the present province of Dalmatia, including to the north Lisarica and Tribanj, and to the south territory limited by a line from the shore of Cape Planka to the summits of the watershed eastwards, so as to include in the evacuated area all the valleys and watercourses flowing towards Sebenico, such as the Cicola, Kerka, Butisnica, and their tributaries. It will also include all the islands in the north and west of Dalmatia. From Premuda, Selve, Ulbo, Scherda, Maon, Pago, and Puntadura in the north up to Meleda in the south, embracing Sant' Andrea, Busi, Lissa, Lesina, Tercola, Curzola, Cazza, and Lagosta, as well as the neighbouring rocks and islets and Pelagosa, only excepting the islands of Great and Small Zirona, Bua, Solta, and Brazza.

All territories thus evacuated will be occupied by the troops of the Allies and of the United States of America.

All military and railway equipment of all kinds (including coal), belonging to or within these territories, to be left *in situ*, and surrendered to the Allies according to special orders given by the Commanders-in-Chief of the forces of the Associated Powers on the different fronts. No new destruction, pillage, or requisition to be done by enemy troops in the territories to be evacuated by them and occupied by the forces of the Associated Powers.

4. The Allies shall have the right of free movement over all road and rail and waterways in Austro-Hungarian territory, and of the use of the necessary Austrian and Hungarian means of transportation. The Armies of the Associated Powers shall occupy such strategic points in Austria-Hungary at such times as they may deem necessary to enable them to conduct military operations or to maintain order. They shall have the right of requisition on payment for the troops of the Associated Powers wherever they may be.

5. Complete evacuation of all German troops within fifteen days, not only the Italian and Balkan fronts, but from all Austro-Hungarian territory. Internment of all German troops which have not left Austria-Hungary within that date.

6. The administration of the evacuated territories of Austria-Hungary will be entrusted to the local authorities under the control of the Allied and Associated Armies of Occupation.

7. The immediate repatriation without reciprocity of all Allied prisoners of war and interned subjects, and of civil populations evacuated from their homes, on conditions to be laid down by the Commanders-in-Chief of the forces of the Associated Powers on the various fronts.

8. Sick and wounded who cannot be removed from evacuated territory will be cared for by Austro-Hungarian personnel who will be left on the spot with the medical material required.

NAVAL CONDITIONS.

1. Immediate cessation of all hostilities at sea, and definite information to be given as to the location and movements of all Austro-Hungarian ships. Notification to be made to neutrals that freedom of navigation in all territorial waters is given to the Naval and Mercantile Marines of the Allied and Associated Powers, all questions of neutrality being waived.

2. Surrender to the Allies and United States of America of fifteen Austro-Hungarian submarines, completed between the years 1910 and 1918, and of all German submarines which are in or may hereafter enter Austro-Hungarian territorial waters. All other Austro-Hungarian submarines to be paid off and completely disarmed, and to remain under the supervision of the Allies and United States of America.

3. Surrender to the Allies and United States of America, with their complete armament and equipment, of three battleships, three light cruisers, nine destroyers, twelve torpedo boats, one minelayer, six Danube monitors, to be designated by the Allies and the United States of America. All other surface warships (including river craft) are to be concentrated in Austro-Hungarian naval bases to be designated by the Allies and the United States of America, and are to be paid off and completely disarmed and placed under the supervision of the Allies and United States of America.

4. Freedom of navigation to all warships and merchant ships of the Allied and Associated Powers to be given in the Adriatic and up the river Danube and its tributaries in the territorial waters and territory of Austria-Hungary. The Allies and Associated Powers shall have the right to sweep up all minefields and obstructions, and the positions of these are to be indicated. In order to ensure the freedom of navigation on the Danube, the Allies and the United States of America shall be empowered to occupy or to dismantle all fortifications or defence works.

5. The existing Blockade conditions set up by the Allied and Associated Powers are to remain unchanged, and all Austro-Hungarian merchant ships found at sea are to remain liable to capture, save exceptions which may be made by a Commission nominated by the Allies and United States of America.

6. All Naval aircraft are to be concentrated and immobilized in Austro-Hungarian bases to be designated by the Allies and United States of America.

7. Evacuation of all the Italian coasts and of all ports occupied by Austria-Hungary outside their national territory, and the abandonment of all floating craft, naval materials, equipment, and materials for inland navigation of all kinds.

8. Occupation by the Allies and the United States of America of the land and sea fortifications and the islands which form the defences and of the dockyards and arsenal at Pola.

9. All merchant vessels held by Austria-Hungary belonging to the Allies and Associated Powers to be returned.

10. No destruction of ships or of materials to be permitted before evacuation, surrender, or restoration.

11. All naval and mercantile marine prisoners of war of the Allied and Associated Powers in Austro-Hungarian hands to be returned without reciprocity.

(iv.) CONDITIONS OF THE ARMISTICE CONCLUDED WITH GERMANY.
(Signed 11th November, 1918.)

A.—CLAUSES RELATING TO THE WESTERN FRONT.

1. Cessation of hostilities by land and in the air six hours after the signing of the Armistice (viz., at 11 a.m. 11th November, 1918).

2. Immediate evacuation of the invaded countries—Belgium, France, Luxembourg, as well as Alsace-Lorraine—so ordered as to be completed within 15 days from the signature of the Armistice.

German troops which have not left the above-mentioned territories within the period fixed will be made prisoners of war.

Occupation by the Allied and United States Forces jointly will keep pace with the evacuation in these areas.

All movements of evacuation and occupation will be regulated in accordance with a Note (Annexe 1) determined at the time of the signing of the Armistice.

3. Repatriation, beginning at once, to be completed within 15 days, of all inhabitants of the countries above enumerated (including hostages, persons under trial, or condemned).

4. Surrender in good condition by the German Armies of the following equipment:—

5,000 guns (2,500 heavy, 2,500 field).

25,000 machine guns.

3,000 *Minenwerfer*.

1,700 aeroplanes (fighters, bombers—firstly D.7's—and night-bombing machines).

The above to be delivered *in situ* to the Allied and United States troops in accordance with the detailed conditions laid down in the Note (Annexe 1) determined at the time of the signing of the Armistice.

5. Evacuation by the German Armies of the districts on the left bank of the Rhine. These districts on the left bank of the Rhine shall be administered by the local authorities under the control of the Allied and United States Armies of Occupation.

The occupation of these territories by Allied and United States troops will be assured by garrisons holding the principal crossings of the Rhine (Mainz, Coblenz, Cologne), together with bridgeheads at these points of a 30-kilometre [about 19 miles] radius on the right bank, and by garrisons similarly holding the strategic points of the area.

A neutral zone shall be reserved on the right bank of the Rhine, between the river and a line drawn parallel to the bridgeheads and to the river and 10 kilometres [$6\frac{1}{4}$ miles] distant from them between the Dutch frontier and the Swiss frontier.

The evacuation by the enemy of the Rhine districts (right and left bank) shall be so ordered as to be completed within a further period of 16 days, in all 31 days after the signing of the Armistice.

All movements of evacuation and occupation will be regulated according to the Note (Annexe 1) determined at the time of the signing of the Armistice.

6. In all territories evacuated by the enemy, evacuation of the inhabitants shall be forbidden; no damage or harm shall be done to the persons or property of the inhabitants.

In the case of inhabitants no person shall be prosecuted for having taken part in any military measures previous to the signing of the Armistice.

No destruction of any kind to be committed.

Military establishments of all kinds shall be delivered intact, as well as military stores of food, munitions and equipment, which shall not have been removed during the periods fixed for evacuation.

Stores of food of all kinds for the civil population, cattle, &c., shall be left *in situ*.

No measure of a general or official character shall be taken which would have, as a consequence, the depreciation of industrial establishments or a reduction of their personnel.

7. Roads and means of communication of every kind, railroads, waterways, roads, bridges, telegraphs, telephones shall be in no manner impaired.

All civil and military personnel at present employed on them shall remain.

5,000 locomotives and 150,000 wagons in good working order, with all necessary spare parts and fittings, shall be delivered to the Associated Powers within the period fixed in Annex II. (not exceeding 31 days in all).

5,000 motor lorries are also to be delivered in good within 36 days.

The railways of Alsace-Lorraine shall be handed over within 31 days, together with all personnel and material belonging to the organization of the system.

Further, working material in the territories on the left bank of the Rhine shall be left *in situ*.

All stores of coal and material for upkeep of permanent way, signals and repair shops shall be left *in situ* and kept in an efficient state by Germany, so far as the means of communication on the left bank of the Rhine are concerned.

All lighters taken from the Allies shall be restored to them. The Note attached as Annex II. defines the details of these measures.

8. The German Command shall be responsible for revealing within 48 hours of the signing of the Armistice, all mines or delay-action fuzes disposed on territories evacuated by the German troops, and shall assist in their discovery and destruction.

The German Command shall also reveal all destructive measures that may have been taken (such as poisoning or pollution of wells, springs, &c.), under penalty of reprisals.

9. The right of requisition shall be exercised by the Allied and United States armies in all occupied territories, save for settlement of accounts with authorized persons.

The upkeep of the troops of occupation in the Rhine districts (excluding Alsace-Lorraine) shall be charged to the German Government.

10. The immediate repatriation, without reciprocity, according to detailed conditions which shall be fixed, of all Allied and United States prisoners of war, including those under trial and condemned. The Allied Powers and the United States of America shall be able to dispose of these prisoners as they think fit. This condition annuls all other conventions regarding prisoners of war, including that of July, 1918, now being ratified. However, the return of German prisoners of war interned in Holland and Switzerland shall continue as heretofore. The return of German prisoners of war shall be settled at the conclusion of the Peace preliminaries.

11. Sick and wounded, who cannot be removed from territory evacuated by the German forces, will be cared for by German personnel, who will be left on the spot with the material required.

B.—CLAUSES RELATING TO THE EASTERN FRONTIERS OF GERMANY.

12. All German troops at present in any territory which before the war formed part of Austria-Hungary, Roumania or Turkey, shall withdraw within the frontiers of Germany as they existed on 1st August, 1914, and all German troops at present in territories which before the war formed part of Russia must likewise return to within the frontiers of Germany as above defined, as soon as the Allies shall think the moment suitable, having regard to the internal situation of these territories.

13. Evacuation by German troops to begin at once, and all German instructors, prisoners and civilians, as well as military agents now on the territory of Russia (frontier as defined on 1st August, 1914) to be recalled.

14. German troops to cease at once all requisitions and seizures, and any other coercive measures with a view to obtaining supplies intended for Germany in Roumania and Russia (frontier as defined on 1st August, 1914).

15. Annulment of the treaties of Bucharest and Brest-Litovsk and of the supplementary treaties.

16. The Allies shall have free access to the territories evacuated by the Germans on their Eastern frontier, either through Danzig or by the Vistula, in order to convey supplies to the populations of these territories or for the purpose of maintaining order.

C.—CLAUSE RELATING TO EAST AFRICA.

17. Evacuation of all German forces operating in East Africa within a period specified by the Allies.

D.—GENERAL CLAUSES.

18. Repatriation, without reciprocity, within a maximum period of one month, in accordance with detailed conditions hereafter to be fixed, of all interned civilians, including hostages and persons under trial and condemned, who may be subjects of other Allied or Associated States than those mentioned in Clause 3.

Financial Clause.

19. With the reservation that any future concessions and claims by the Allies and United States of America remain unaffected, the following financial conditions are imposed :—

Reparation for damage done.

While the Armistice lasts, no public securities shall be removed by the enemy which can serve as a pledge to the Allies to cover reparation for war losses.

Immediate restitution of the cash deposit in the National Bank of Belgium and, in general, immediate return of all documents, specie, stock, shares, paper money, together with plant for the issue thereof, affecting public or private interests in the invaded countries.

Restitution of the Russian and Roumanian gold yielded to Germany or taken by that Power.

This gold to be delivered in trust to the Allies until peace is concluded.

E.—NAVAL CONDITIONS.

20. Immediate cessation of all hostilities at sea, and definite information to be given as to the position and movements of all German ships.

Notification to be given to neutrals that freedom of navigation in all territorial waters is given to the Navies and Mercantile Marines of the Allied and Associated Powers, all questions of neutrality being waived.

21. All Naval and Mercantile Marine prisoners of war of the Allied and Associated Powers in German hands to be returned, without reciprocity.

22. To surrender at the ports specified by the Allies and the United States all submarines at present in existence (including all submarine cruisers and minelayers), with armament and equipment complete. Those that cannot put to sea shall be deprived of armament and equipment, and shall remain under the supervision of the Allies and the United States. Submarines ready to put to sea shall be prepared to leave German ports immediately on receipt of wireless order to sail to the port of surrender, the remainder to follow as early as possible. The conditions of this Article shall be completed within 14 days of the signing of the Armistice.

23. The following German surface warships, which shall be designated by the Allies and the United States of America, shall forthwith be disarmed and thereafter interned in neutral ports, or, failing them, Allied ports, to be designated by the Allies and the United States of America, and placed under the surveillance of the Allies and the United States of America, only care and maintenance parties being left on board, namely :—

6 battle cruisers.

10 battle ships.

8 light cruisers, including two minelayers.

50 destroyers of the most modern type.

All other surface warships (including river craft) are to be concentrated in German Naval bases, to be designated by the Allies and the United States of America, completely disarmed and placed under the supervision of the Allies and the United States of America. All vessels of the Auxiliary Fleet are to be disarmed. All vessels

specified for internment shall be ready to leave German ports seven days after the signing of the Armistice. Directions for the voyage shall be given by wireless.

Note.—A declaration has been signed by the Allied delegates and handed to the German delegates to the effect that, in the event of ships not being handed over owing to the mutinous state of the Fleet, the Allies reserve the right to occupy Heligoland as an advanced base to enable them to enforce the terms of the Armistice. The German delegates have on their part signed a declaration that they will recommend the Chancellor to accept this.

24. The Allies and the United States of America shall have the right to sweep up all minefields and destroy all obstructions laid by Germany outside German territorial waters, and the positions of these are to be indicated.

25. Freedom of access to and from the Baltic to be given to the Navies and Mercantile Marines of the Allied and Associated Powers. This is to be secured by the occupation of all German forts, fortifications, batteries and defence works of all kinds in all the routes from the Cattegat into the Baltic, and by the sweeping up and destruction of all mines and obstructions within and without German territorial waters without any questions of neutrality being raised, and the positions of all such mines and obstructions are to be indicated by the Germans.

26. The existing blockade conditions set up by the Allied and Associated Powers are to remain unchanged, and all German merchant ships found at sea are to remain liable to capture. The Allies and United States contemplate the provisioning of Germany during the Armistice as shall be found necessary.

27. All Aerial forces are to be concentrated and immobilized in German bases to be specified by the Allies and the United States of America.

28. In evacuating the Belgian coasts and ports, Germany shall abandon, *in situ* and intact, the port material and material for inland waterways, also all merchant ships, tugs and lighters, all Naval aircraft and air materials and stores, all arms and armaments and all stores and apparatus of all kinds.

29. All Black Sea ports are to be evacuated by Germany; all Russian warships of all descriptions seized by Germany in the Black Sea are to be handed over to the Allies and the United States of America; all neutral merchant ships seized in the Black Sea are to be released; all warlike and other material of all kinds seized in those ports are to be returned, and German materials as specified in Clause 28 are to be abandoned.

30. All merchant ships at present in German hands belonging to the Allied and Associated Powers are to be restored to ports to be specified by the Allies and the United States of America without reciprocity.

31. No destruction of ships or of materials to be permitted before evacuation, surrender or restoration.

32. The German Government shall formally notify the neutral Governments, and particularly the Governments of Norway, Sweden, Denmark and Holland, that all restrictions placed on the trading of their vessels with the Allied and Associated countries, whether by the German Government or by private German interests, and whether in return for special concessions, such as the export of shipbuilding materials or not, are immediately cancelled.

33. No transfers of German merchant shipping of any description to any neutral flag are to take place after signature of the Armistice.

F.—DURATION OF ARMISTICE.

34. The duration of the Armistice is to be 36 days, with option to extend. During this period, on failure of execution of any of the above clauses, the Armistice may be repudiated by one of the contracting parties on 48 hours previous notice.

It is understood that failure to execute Articles 3 and 18 completely in the period specified is not to give reason for a repudiation of the Armistice, save where such failure is due to malice aforethought.

To ensure the execution of the present convention under the most favourable conditions, the principle of a permanent International Armistice Commission is recognized. This Commission will act under the supreme authority of the High Command, Military and Naval, of the Allied Armies.

The present Armistice was signed on the 11th day of November, 1918, at 5 o'clock a.m. (French time).

WINTERFELDT.
VANSELOW.

Annexe No. 1.

1. The evacuation of the invaded territories, Belgium, France and Luxembourg, and also of Alsace-Lorraine shall be carried out in three successive stages according to the following conditions:—

1st stage.—Evacuation of the territories situated between the existing front and line No. 1 on the map opposite page 498, to be completed within 5 days after the signing of the Armistice.

2nd stage.—Evacuation of territories situated between line No. 1 and line No. 2, to be carried out within 4 further days (9 days in all after the signing of the Armistice).

3rd stage.—Evacuation of the territories situated between line No. 2 and line No. 3 to be completed within 6 further days (15 days in all after the signing of the Armistice).

Allied and United States troops shall enter these various territories on the expiration of the period allowed to the German troops for the evacuation of each.

In consequence the Allied troops will cross the present German front as from the sixth day following the signing of the Armistice, line No. 1 as from the tenth day and line No. 2 as from the sixteenth day.

2. *Evacuation of the Rhine district.*—This evacuation will also be carried out in several successive stages:—

(1.) Evacuation of territories situated between lines 2 and 3 and line 4, to be completed within 4 further days (19 days in all after the signing of the Armistice).

(2.) Evacuation of territories situated between lines 4 and 5 to be completed within 4 further days (23 days in all after the signing of the Armistice).

(3.) Evacuation of territories situated between lines 5 and 6 (line of the Rhine) to be complete within 4 further days (27 days in all after the signing of the Armistice).

(4.) Evacuation of the bridgeheads and of the neutral zone on the right bank of the Rhine to be completed within 4 further days (31 days in all after the signing of the Armistice).

The Allied and United States Army of Occupation shall enter these various territories after the expiration of the period allowed to the German troops for the evacuation of each, consequently the Army will cross line No. 3 twenty days after the signing of the Armistice, it will cross line No. 4 as from the twenty-fourth day after the signing of the Armistice. Line No. 5 as from the twenty-eighth day. Line No. 6 (Rhine) the thirty-second day in order to occupy the bridgeheads.

3. *Surrender by the German Army of war material specified by the Armistice.*—This war material shall be surrendered according to the following conditions: The first half before the tenth day, the second half before the twentieth day. This material will be handed over to each of the Allied and United States Armies by each tactical group of the German Armies in the proportions which may be fixed by the permanent Armistice Commission.

Annexe No. 2.

Conditions of communications regarding railways, waterways, roads, river and sea ports, and telegraphic and telephonic communications.

1. All communications as far as the Rhine, inclusive, or comprised, on the right bank of this river, within the bridgeheads occupied by the Allied Armies will be placed under the supreme authority of the Commander-in-Chief of the Allied Armies, who will have the right to take any measure he may think necessary to assure their occupation and use. All documents relative to communications will be held ready for transmission to him.

2. All the material and all the civil and military personnel at present employed in the maintenance and working of all lines of communication are to be maintained in their entirety upon these lines in all territories evacuated by the German troops.

All supplementary material necessary for the upkeep of these lines of communication in the districts on the left bank of the Rhine will be supplied by the German Government throughout the duration of the Armistice.

3. *Personnel.*—The French and Belgian personnel belonging to the services of the lines of communication, whether interned or not, are to be returned to the French and Belgian Armies, during the

15 days following the signing of the Armistice. The personnel belonging to the organization of the Alsace-Lorraine railway system are to be maintained or reinstated in such a manner as to ensure the working of the system.

The Commander-in-Chief of the Allied Armies will have the right to make all changes or substitutions that he may desire in the personnel of the lines of communication.

4. *Material.*—(a.) *Rolling stock.*—The rolling stock handed over to the Allied Armies in the zone comprised between the present front line and line No. 3 (not including Alsace-Lorraine) will amount at least to 5,000 locomotives and 150,000 wagons. This surrender will be carried out within the period fixed by Clause 7 of the Armistice, and under conditions, the details of which shall be settled by the permanent International Armistice Commission.

All this material is to be in good condition and in working order, with all the ordinary spare parts and fittings. It may be employed together with the regular personnel or with any other upon any part of the railway system of the Allied Armies.

The material necessary for the working of the Alsace-Lorraine railway system is to be maintained or replaced for the use of the French Army.

The material to be left *in situ* in the territories on the left bank of the Rhine, as well as that on the inner side of the bridgeheads elsewhere, should permit of the normal working of the railways in these districts.

(b.) *Permanent way, signals and workshops.*—The material for signals, machine, tools and tool outfits taken from the workshops and depôts of the French and Belgian lines will be replaced under conditions the details of which are to be arranged by the permanent International Armistice Commission. The Allied Armies are to be supplied with railroad material, rails, incidental fittings, plant, bridge-building material and timber necessary for the repair of the lines destroyed beyond the present front.

Fuel and maintenance material.—The German Government shall be responsible throughout the duration of the Armistice for the release of fuel and maintenance material to the depôts normally allotted to the railways in the territories on the left bank of the Rhine.

5. *Telegraphic and telephonic communications.*—All telegraphs, telephones and fixed W/T stations are to be handed over to the Allied Armies, with all the civil and military personnel and all their material, including all stores on the left bank of the Rhine.

Supplementary stores necessary for the upkeep of the system are to be supplied throughout the duration of the Armistice by the German Government according to requirement.

The Commander-in-Chief of the Allied Armies will place this system under military supervision and will ensure its control, and will make all changes and substitutions in personnel which he may think necessary.

He will send back to the German Army all the military personnel who are not in his judgment necessary for the working and upkeep of the railway.

All plans of the German telegraphic and telephonic systems shall be handed over to the Commander-in-Chief of the Allied Armies.

CONVENTION PROLONGING THE ARMISTICE WITH GERMANY,

13TH DECEMBER, 1918.

CONVENTION.

The undersigned, in virtue of the powers with which they were endowed for the signing of the Armistice of the 11th November, 1918, have concluded the following additional agreement:—

1. The duration of the Armistice signed on the 11th November, 1918, has been prolonged for a month, *i.e.*, till 5 a.m. on the 17th January, 1919.

The one month's extension will be further extended until the conclusion of Peace preliminaries, provided this arrangement meets with the approbation of the Allied Governments.

2. The clauses of the Convention (11th November) which have been incompletely fulfilled will be carried out during the period of extension, according to the conditions laid down by the Permanent International Armistice Commission following the orders given by the Allied Generalissimo.

3. The following clause is added to the Convention of the 11th November, 1918:—

"From now onwards the Generalissimo reserves to himself the right of occupying (when he deems it advisable), as an additional guarantee, the neutral zone on the right bank of the Rhine, north of the bridgehead of Cologne, and as far as the Dutch frontier.

"Six days' notice will be given by the Generalissimo before the occupation comes into effect."

Trèves, 13th December, 1918.

Signed—

F. FOCH.

R. E. WEMYSS, ADMIRAL.

ERZBERGER,

A. OBERNDORFF,

WINTERFELDT,

VANSELOW.

INFRACTIONS OF THE ARMISTICE CLAUSES.

ARTICLE IV.

Delivery of War Material.

On the 9th December the following were delivered or abandoned in good condition:—

Heavy guns.—1,635 heavy guns instead of 2,500, which should have been delivered on 1st December.

Minenwerfer.—2,000 instead of 3,000, which should have been delivered on 1st December.

(9343)

Machine guns.—18,000 instead of 25,000, which should have been delivered on 1st December, 1918.

Aeroplanes.—A maximum of 730 fighting and bombing planes delivered, of which only 25 are bombing planes; 1,700 should have been delivered on 1st December.

A total of 1,999 aeroplanes has certainly been either delivered or abandoned, but this number includes about 200 observation aeroplanes, of which more than 1,000 are in bad condition, and 600 absolutely unfit for use.

ARTICLE VI.

Safeguarding of inhabitants and property.

Numerous infractions have been reported which are at present under investigation and for which the question concerning reparation is reserved.

Two distinct infractions have been clearly proved:—

1. Region of Charleroi.—Explosions instigated by the Germans after the 11th November. (Vouched for by a written statement from the Burgomaster of Charleroi.) (Copy attached.)
2. Outrages against persons and property in Belgium, verified by the Belgian Consulate in Maastricht. (Copy attached.)

ARTICLE VII.

A. Delivery of rolling stock.

1. *Rolling stock to be delivered in Belgium and France.*—Out of 5,000 locomotives to be delivered, 810 were given up, of which only 206 were accepted.

Out of 150,000 wagons, 15,720 were delivered and only 9,098 were accepted.

2. *Material on Alsace-Lorraine railways.*—Out of 1,442 locomotives belonging to the Alsace-Lorraine railway system, 1,420 are on the track.

Out of 41,449 wagons, belonging to this system, only 22,428 (accruing from all the German systems) are at present on the track.

B. Restoration of material of depôts and workshops.

Machinery tools and stocks of tools taken from certain depôts and workshops in France and Belgium have not yet been delivered.

C. Delivery of motor lorries.

Out of 5,000 lorries, only 460 (in good condition) have been delivered.

ARTICLE VIII.

Indication of position of delay-action fuzes.

It has been officially reported that at Poix-Terron (Ardennes) a delay-action fuze, placed in a German saw-mill (the situation of which was not indicated by the Germans), exploded on the 23rd November, killing a woman and causing serious material damage.

ARTICLE X.

Repatriation of prisoners of war.

Up to the 9th December, 264,000 Allied prisoners (not including 23,000 Russians and 1,300 Poles) have been repatriated.

A very large number of these prisoners were set free *en masse* and sent across the Allied lines without means of obtaining shelter or food—thus rendering it most difficult for the Allies to receive them. A number of these prisoners died from exhaustion.

In spite of protests from the English and French Governments this inhuman procedure was continued.

Moreover, repatriated civilians report that on the 27th November, 16 prisoners (9 Frenchmen, 3 Englishmen, 2 Italians and 2 Russians) were killed and 24 others wounded in the Langensalza Camp. In the same camp there are a thousand prisoners in hospital without medicaments or medical attention.

ARTICLE XI.

Care of sick and wounded unfit to be moved.

An official report issued on the 13th November by the Spanish Consul at Charleroi states that, when the German troops evacuated that town, French and English wounded were left uncared for and without food. (Copy of report attached.)

ARTICLE XIX.

Financial clauses.

The Germans have permitted a large number of securities to leave German territory, thus diminishing the guarantees given to the Allies.

They have also substituted jewellery and valuables for the gold reserve in the Reichsbank, and at the same time greatly increased the issue of paper money.

They have not yet delivered any of the securities and documents confiscated by Germany, nor have they furnished the Allies with a list of such securities, &c.

NAVAL CLAUSES.

ARTICLE XXII.

Submarines U. 80, U. 82, U.B. 77, have still to be towed into Harwich. 5 submarines in Spain, one in Norway and one in Holland have yet to be delivered.

ARTICLE XXIII.

The battle cruiser "Mackensen" has not yet been interned.

ARTICLE XXV.

Free access to the Baltic is not yet assured.

ARTICLE XXVIII.

The French sailing vessel, re-named "Bremen" by Germany, was sent to Holland after the Armistice was signed.

A number of tugs and barges are stated to have arrived at Nillingen (German—Dutch frontier) on the 21st November.

All these vessels came from Antwerp.

ARTICLE XXX.

(a.) Preparations for the departure of Allied vessels to be sent back to the Entente and the United States' ports are progressing very slowly. None have yet been delivered.

(b.) The German Government has refused to give up the boats condemned by the Prize Court. This action may be regarded as in direct contradiction to the terms of the Armistice.

TRANSLATION.

German Armistice Commission.

President:

Erzberger, Secretary of State.

Trèves,

12th December, 1918.

To Marshal Foch, Generalissimo.

I have the honour of enclosing (in attached document) the German reply to the Note received this

morning, relating to infractions of the Armistice terms by the Germans. I should be obliged if an enquiry regarding the details still in dispute (particularly those concerning delivery of transport material) could be held to-morrow morning.

(Signed) ERZBERGER,

Secretary of State.

REPLY TO THE NOTE SENT BY MARSHAL FOCH ON THE 12TH DECEMBER RELATING TO THE GERMAN VIOLATION OF THE TERMS OF ARMISTICE SIGNED ON THE 11TH NOVEMBER, 1918.

ARTICLE IV.

Delivery of War material.

The further execution of the Armistice conditions will be entrusted to the Permanent Armistice Commission at Spa. Every endeavour will be made to deliver the whole of the war material demanded.

ARTICLE VI.

Safeguarding of inhabitants and property.

With reference to alleged infractions, we must await the result of enquiries. Regarding the two cases in question (of which there is definite proof) a German enquiry will be held.

It may be noted, however, that several cases have already been dealt with by the International Commission at Spa, when it was clearly proved that several hundred inhabitants of Alsace-Lorraine were compelled to leave the country with as little delay as possible, and were forced to abandon all their belongings. Officials were dismissed without pension. In the Palatinate also, as well as in the district of Sarrebruck, infractions of the clause guaranteeing freedom to persons are reported. All cases brought to our notice constitute distinct infractions of the clearly worded text of Article VI. It is requested that this violation of the Armistice terms be speedily terminated. The institution of a fixed rate of exchange for the German mark in Alsace-Lorraine is also considered an infraction of Article VI. (first and last paragraphs) owing to the fact that it is prejudicial to the property of a large number of people.

ARTICLE VII.

Delivery of rolling stock.

A probable event mentioned at the time of the conclusion of the Armistice in the Forest of Compiègne, has become fact:

It has been impossible to deliver the material demanded in the given time limit. The sub-committee which conferred this afternoon has been unable to suggest a realisable scheme.

At the conference to be held to-morrow, the President of the German Armistice Commission will reserve to himself the right of putting forward a new proposal in accordance with the Allied demands, which, taking into consideration the whole situation in Germany, is likely to be effective.

ARTICLE VIII.

Indications of position of delay-action fuzes.

We must await proofs to show that the explosion which occurred in a saw-mill at Poix-Terron (Ardennes) on the 23rd November was actually due to a German delay-action fuze.

Moreover, it was already pointed out during negotiations at Compiègne that, although details regarding the situation and explosion of fuzes were communicated, no guarantee could be given that troops or isolated units had not themselves made arrangements for explosions, and that, owing to the sudden evacuation they were unable to comply with orders from Headquarters, to the effect that information regarding such arrangements must be given. Moreover, the German Armistice Commission refers with satisfaction to the fact that in view of the rapidity with which evacuation was effected during the retreat of millions of men armed with every kind of modern explosive, only one isolated case of this kind can be brought forward.

ARTICLE X.

Repatriation of Prisoners of War.

The number of repatriated prisoners of war given by Headquarters, i.e., 264,000, is not correct, and is considerably less than that given in official German statements, which on the 10th December gave the number as about 350,000.

(9343)

The repatriation of these thousands of men with so little delay and under particularly difficult conditions (well-known to the Allies) is remarkable, and gives ample proof of the good faith of the German Military Administration. The statement that, especially during the first few days of the Armistice, a considerable number of prisoners reached the Allied lines in disorder and in a deplorable condition is correct, but this may be attributed to the fact that a good many of these prisoners left of their own accord; the incident may also be attributed in part to the lack of supervision occasioned by the political situation in Germany which engendered a relaxation of discipline, and also by the sudden evacuation, which made it very difficult to deliver prisoners who were with the armies and in lines of communication.

The German Military Administration greatly regrets these incidents and has used every endeavour to put a stop to them.

A series of very regrettable occurrences must be attributed to the fact that prisoners of war in Germany (since the Armistice and since the beginning of the Revolution) have displayed complete lack of discipline. The German Government has done its best to obviate excesses which were inevitable amongst so many prisoners. Germany is the only belligerent nation which has instituted a Commission for enquiring into all doings reported by her adversaries. This Mission has been given full power to bring the culprits to justice. Its work has already begun.

The German Military Administration has issued orders authorizing prisoners of different nations to collaborate with the Camp authorities (through the intermediary of committees elected by themselves) in all matters concerning work and food. They have also been given the privilege of assisting in the maintenance of discipline among themselves by means of special rules formulated in concert with the Camp authorities, such as the infliction of disciplinary penalties determined by themselves. The German people would be very pleased if similar treatment were granted to German prisoners of war.

Germany has a right to expect that, after the liberation of enemy prisoners, her own prisoners will be permitted to return to their country, and that in any case married men over 40 years of age with more than two children should be sent back to their families at latest by Christmas.

ARTICLE XI.

Care of wounded and those too ill to be moved.

It cannot be disputed that, owing to the sudden evacuation, isolated cases of Allied wounded being left without food or attention may have occurred.

The case quoted from Charleroi will be subjected to enquiry. But in relation to this question it must be emphasized that sick and wounded Germans who were left behind have on various occasions been very badly treated.

ARTICLE XIX.

Financial Clauses.

The statement concerning the considerable number of securities sent abroad (contrary to the terms of the Armistice) can only refer to the following:—

Owing to the recent fall in the rate of exchange, the State Bank was compelled to call in its securities deposited with neutral countries, as it has been agreed that in case of this event complementary payments would be effected. The result of this has been merely to maintain guarantees given abroad at their previous value. Consequently, it is incorrect to state that securities which guaranteed the Allies the recovery of war indemnities have been with-

Terms of Armistice, Germany.

732

drawn. The State Bank has only restored those jewels and valuables which it guaranteed to give up when the same were deposited.

The maximum amount in question is a million-and-a-half marks.

The issue of paper money has undoubtedly been largely increased. This measure was compulsory in order to pay pressing demands. This state of affairs is due (in the first place) to the undertaking stipulated in the Armistice terms relating to the restoration of the paper money taken from Belgium.

On the other hand, according to the Armistice terms, Germany has to provide maintenance for the Armies of occupation, and, up to the present, the expenses have increased to upwards of 120 million marks, which has to be found at very short notice. Moreover money is very scarce in Germany at the present time.

The report stating that neither the securities or documents taken, nor the list of securities, had been replaced, is incorrect.

The German Government supplied the lists as soon as possible, and if they have not yet been received it is due to the sudden evacuation of Belgium and the hasty departure of the Government. A complete list will be sent to the Allies as soon as possible. A great many securities and documents taken from Belgium and the north of France have already been restored.

Where in certain cases it has been found impossible to do so, the Belgian and French financial delegations at Spa have already been informed of the reasons in detail.

It is, therefore, incorrect to state that financial guarantees have depreciated since the Armistice.

NAVAL CLAUSES.

ARTICLE XXII.

We are still ignorant of the reason which prevented the internment of submarines U. 80, U. 82, U.B. 77.

Inquiries have been instituted with a view to their immediate delivery. With reference to submarines interned in Spain, Norway and Holland, Germany has no power to dispose of them. Moreover, Germany will not protest against the violation of neutrality if at the request of the Allies the submarines interned in Spain, Norway and Holland are delivered to the Entente.

In any case, the fact that these boats have not been given up cannot be accepted as an infringement of the Armistice conditions by the Germans.

ARTICLE XXIII.

After the Armistice was signed, the list of ships which had to be handed over was sent to us, and we informed the representative of the British Admiralty at Compiègne on the 11th November that the "Mackensen" would not be finished for a long time and consequently it could not be taken into port. In view of this statement it was agreed not to intern the "Mackensen," and therefore in this case there has been no infringement of the Armistice conditions.

ARTICLE XXV.

This grievance must be due to a misunderstanding, as a free passage has been made through mines and nets so that the Baltic is accessible even to vessels of deep draught.

German pilots are available when it is required to have the position of mines indicated.

ARTICLE XXVIII.

So far, it has been impossible to obtain the precise details necessary for the examination of this complaint. The names and particulars of ships which have arrived at Nillingen are required.

If it were proved that these ships (in direct opposition to the precepts of this Article) came from Antwerp, they would receive orders to return to that port.

ARTICLE XXX.

(a.) Orders for the execution of this clause were issued by the central authority, but their fulfilment was delayed owing to political disturbances in the ports. Further instructions will be given for the immediate fulfilment of this clause.

(b.) According to the law of nations, the judgment pronounced by a properly constituted Prize Court, transfers an enemy vessel to the State that captured it; consequently, the condemned ships do not come under Article XXX. ("belonging to the Associated and Allied Powers").

What has occurred does not constitute any infraction of the Armistice terms by the Germans, and the demand of the Allies really exceeds even the

literal meaning of the Armistice conditions. In the interest of a speedy conclusion of peace Germany accepts this new demand on the understanding that restitution of German ships condemned by Allied Prize Courts will be considered in the Peace Treaty.

It follows from the above argument that there are no grounds at present for demanding fresh guarantees for the carrying out of the Armistice terms.

The German Armistice Commission has been pleased to take note of the following declarations made by Marshal Foch on the 12th December:—

1. Communication between the occupied zone and other parts of Germany is restricted in order to ensure the safety of the Allied armies of occupation.

It would be impossible to assume "peace" relations while the Allies are still at war with Germany.

All matters relating to communication and economic questions will be considered from a broad-minded point of view.

Marshal Foch will arrange an early meeting at Spa between the technical representatives of the Allies and the Germans in order to settle these matters.

2. Marshal Foch is not personally qualified to deal with the import of food into Germany, but he will again lay the case before the Allied Governments.

Moreover, Admiral Wemyss agreed to consider sympathetically the question whether the high seas might be used by the German fishing boats when they return from searching for mines. He will decide whether the zone included within the Borkum—Horns Riff line may be used by German fishing boats.

In conclusion, the German Armistice Commission feels obliged to call attention to the following point: In accordance with the evacuation map appended to the Armistice agreement, the territories of Sarrebruck and Sarrelouis are separated from the rest of the Rhine Province. Now that evacuation is an accomplished fact, it may be admitted as self-evident that, in accordance with the literal terms of the Armistice agreement, the whole of the territory of the Rhine Province on the left bank of the Rhine should be considered, in all matters, as constituting a single unity.

Therefore, it is fair to request that all ordinances of the authorities in occupation which violate this point of view should be immediately cancelled, as contravening the literal terms of the Armistice convention; and that the Prussian territory of the Sarre should no longer remain arbitrarily separated from the rest of the Rhine Province, to which it organically belongs.

(Signed) ERZBERGER,
Secretary of State.

German Armistice Commission

PROTEST AGAINST VERBAL REQUEST CONCERNING ARTICLE XXIII.

Germany cannot be held responsible for the non-interment of the battle cruiser "Mackensen"; nor can she be regarded on these grounds to have failed to comply with the terms of the Armistice.

When the list of ships for internment was handed to Rear-Admiral Hope on the 11th November, he was informed that the "Mackensen" could not be interned. At the time, it was not deemed necessary to ask for compensation.

In spite of extraordinary difficulties due to the Revolution, the German Navy endeavoured to fulfil the conditions of the Armistice to the best of its ability.

In the controversy which has arisen, the German Navy cannot be accused of any direct breach of the Armistice conditions.

Consequently, the verbal demand for the internment of the battle cruiser "Baden" instead of the "Mackensen" is considered an arbitrary action.

Post-Captain.

CONVENTION PROLONGING THE ARMISTICE WITH GERMANY.

(16th January, 1919.)

CONVENTION.

The undersigned Plenipotentiaries (Admiral Browning taking the place of Admiral Wemyss), vested with the powers in virtue of which the Armistice Agreement of the 11th November, 1918, was signed, have concluded the following supplementary Agreement:—

1. The Armistice of the 11th November, 1918, which was prolonged until the 17th January, 1919, by the Agreement of the 13th December, 1918, shall be again prolonged for one month, that is to say, until the 17th February, 1919, at 5 a.m.

This prolongation of one month shall be extended until the conclusion of the Peace preliminaries, subject to the approval of the Allied Governments.

2. The execution of those clauses of the Agreement of the 11th November which have not been entirely carried out shall be proceeded with and completed during the prolongation of the Armistice, in accordance with the detailed conditions fixed by the Permanent International Armistice Commission on the instructions of the Allied High Command.

3. In substitution of the supplementary railway material specified by Tables 1 and 2 of the Spa Protocol of the 17th December, i.e., 500 locomotives and 19,000 wagons, the German Government shall supply the following agricultural machinery and instruments:—

400 two-engined steam plough outfits, complete, with suitable ploughs
6,500 drills,
6,500 manure distributors,
6,500 ploughs,
6,500 Brabant ploughs,
12,500 harrows,
6,500 scarifiers,
2,500 steel rollers,
2,500 Croskill rollers,
2,500 mowing machines,
2,500 hay-making machines,
3,000 reapers and binders,

or equivalent implements, according to the scale of interchangeability of various kinds of implements considered permissible by the Permanent International Armistice Commission. All this material, which shall be either new, or in very good condition, shall be delivered together with all accessories belonging to each implement, and with the spare parts required for 18 months' use.

The German Armistice Commission shall, between the present date and the 23rd January, supply the Allied Armistice Commission with a list of the material that can be delivered by the 1st March, which must, in principle, constitute not less than one-third of the total quantity. The International Armistice Commission shall, between now and the 23rd January, fix the latest dates of delivery, which shall, in principle, not extend beyond the 1st June.

4. The officers in Germany delegated by the Allied and Associated Powers to organize the evacuation of the prisoners of war belonging to the armies of the Entente, together with representatives of the Relief Associations of the United States, France, Great Britain and Italy, shall form a Commission charged with the care of Russian prisoners of war in Germany.

This Commission, the headquarters of which shall be in Berlin, shall be empowered to deal with the German Government direct, upon instructions from the Allied Governments, regarding all questions relating to Russian prisoners of war.

The German Government shall accord the Commission all travelling facilities necessary for the purpose of investigating the housing conditions and food supply of such prisoners.

The Allied Governments reserve the right to arrange for the repatriation of Russian prisoners of war to any region which they may consider most suitable.

5. *Naval Clauses.*—Article XXII of the Armistice Agreement of the 11th November, 1918, shall be supplemented as follows :—

“In order to ensure the execution of such clause, the German authorities shall be bound to carry out the following conditions, viz. :—

All submarines capable of putting to sea, or of being towed, shall be handed over immediately and shall make for Allied ports. Such vessels shall include submarine cruisers, mine-layers, relief ships and submarine docks. All submarines which cannot be surrendered shall be completely destroyed or dismantled, under the supervision of the Allied Commissioners.

Submarine construction shall cease immediately, and all submarines in course of construction shall be destroyed or dismantled, under the supervision of the Allied Commissioners.”

Article XXIII of the Armistice Agreement of the 11th November, 1918, shall be supplemented as follows :—

“In order to ensure the execution of such clause, the German Commission shall furnish the Interallied Naval Armistice Commission with a complete list of all surface vessels constructed or in course of construction (launched or on the stocks), specifying probable dates of completion.”

Article XXX of the Armistice Agreement of the 11th November, 1918, shall be supplemented as follows :—

“In order to ensure the execution of such clause, the Allied High Command informs the German High Command that all possible measures must be taken immediately for delivery, in Allied ports, of all Allied merchantmen still detained in German ports.”

6. *Restitution of Material carried off from Belgian and French Territories.*—As restitution of material carried off from French and Belgian territory is indispensable for setting factories once more into working order, the following measures shall be carried out, viz. :—

(a.) All machinery, machinery parts, industrial or agricultural plant, accessories of all kinds and, generally, all industrial or agricultural articles carried off by German military or civilian authorities or individuals, under any pretext whatever, from territories formerly occupied by the German armies on the Western Front, shall be placed at the disposal of the Allies for the purpose of being returned to their places of origin, should the French and Belgian Governments so desire.

These articles shall be returned without further alteration and undamaged.

(b.) In view of such restitution, the German Government shall immediately furnish the Armistice Commission with all official or private accounts, agreements for sale or hire, or correspondence relating to such articles, together with all necessary declarations or information regarding their existence, origin, adaptation, present condition and locality.

(c.) The delegates of the French or Belgian Government shall cause inventories or examinations of such articles to be made on the spot in Germany, should they think fit.

(d.) The return of such articles shall be effected in accordance with special instructions to be given as required by the French or Belgian authorities.

(e.) With a view to immediate restitution, declarations shall more particularly be made of all stocks of driving belts, electric motors and parts thereof, or plant removed from France or Belgium and existing in depôt parks, railways, ships and factories.

(f.) The furnishing of the particulars referred to in Articles 3 and 6 hereof shall commence within 8 clear days from the 20th January, 1919, and shall be completed in principle before the 1st April, 1919.

7. As a further guarantee, the Supreme Allied Command reserves to itself the right to occupy, whenever it shall consider this desirable, the sector of the fortress of Strassburg formed by the fortifications on the right bank of the Rhine, with a strip of territory extending from 5 to 10 kilometres in front of such fortifications, within the boundaries defined on the map appended hereto.

The Supreme Allied Command shall give 6 days' notice prior to such occupation, which shall not be preceded by any destruction of material or of buildings.

The limits of the neutral zone will, therefore, be advanced by 10 kilometres.

8. In order to secure the provisioning of Germany and of the rest of Europe, the German Government shall take all necessary steps to place the German fleet, for the duration of the Armistice, under the control and the flags of the Allied Powers and the United States, who shall be assisted by a German delegate.

This arrangement shall in no wise affect the final disposal of such vessels. The Allies and the United States shall, if they consider this necessary, replace the crews either entirely or in part, and the officers and crews so replaced shall be repatriated to Germany.

Suitable compensation, to be fixed by the Allied Governments, shall be made for the use of such vessels.

All questions of detail, as also any exceptions to be made in the case of certain types of vessel, shall be settled by a special agreement to be concluded immediately.

Trèves, 16th January, 1919.

AGREEMENT TO PROLONG THE ARMISTICE.

(16th February, 1919.)

CONVENTION.

The undersigned Plenipotentiaries, possessed of the powers in virtue of which the Armistice Agreement of 11th November, 1918, was signed, have concluded the following additional agreement :—

Admiral Wemyss being replaced by Admiral Browning, General v. Winterfeldt, by General v. Hammerstein, and the Minister Plenipotentiary Count v. Oberndorff by the Minister Plenipotentiary v. Haniel.

I.—The Germans are to cease all hostilities against the Poles at once, whether in the district of Posen or any other district. With this end in view, they are forbidden to allow their troops to cross the following line—the old frontier between East and West Prussia and Russia as far as Louisenfelde, from thence the line west of Louisenfelde, west of Gr. Neudorff, south of Brzoza, north of Schubin, north of Exin, south of Samotschin, south of Chodziesen, north of Czarnikau, west of Miala, west of Birnbaum, west of Bentschen, west of Wollstein, north of Lissa, north of Rawitsch, south of Krotoschin, west of Adelnau, west of Schildberg, north of Doruchow, to the Silesian frontier.

II.—The Armistice of 11th November, prolonged by the Agreements of 13th December, 1918, and 16th January, 1919, until 17th February, 1919, is further prolonged for a short period, the date of expiry not being given, the Allied Powers and those associated with them reserving to themselves the right to terminate the period at 3 days' notice.

III.—The carrying out of those clauses of the Agreement of 11th November, 1918, and of the additional Agreements of 13th December, 1918, and 16th January, 1919, the terms of which have not yet been fully carried into effect, will be continued and completed during the prolongation of the Armistice, according to detailed arrangements made by the Permanent Armistice Commission, acting on instructions issued by the Supreme Allied Command.

(Sd.) FOCH.
BROWNING.

ERZBERGER.
FREIHERR v. HAMMERSTEIN.
VON HANIEL.
VANSELOW.

TRÈVES,

16th February, 1919

PROTOCOL.

Article 16 of the Armistice of 11th November, 1918, imposes on Germany the obligation of allowing the passage of Allied forces *via* Danzig, and in consequence, according to the view of the Allies, that of General Haller's troops.

The German Government has proposed new means of transportation, viz. :—

1. From Stettin, *via* Kreuz towards Posen and Warsaw.
2. From Pillau—Königsberg and Memel, *via* Korschen—Lyckrajewo.
3. By Coblenz—Giessen—Cassel—Halle—Eilenburg and by Frankfurt-on-the-Main—Bebra—Erfurt—Leipzig—Eilenburg, thence by Kottbus, Lissa and Kalisch.

The German Government guarantees the absolute security of these methods of transportation. In addition, measures will be taken to ensure that the troops passing through German territory avoid everything which might provoke unrest among the population.

The transportation of the troops will commence about 15th April and will continue for about two months.

The Polish troops which are to be transported are destined for the maintenance of order in accordance with Article 16 of the Armistice of the 11th November, 1918.

The execution of the transportation will be carried out as shown in the Annexe to this Protocol.

In the event of the employment of these new methods of transportation proposed by the German Government leading to serious difficulties, which the German Government after having been warned by the Allied and Associated Governments, was not in a position to overcome, Marshal Foch, Commanding-in-Chief the Allied Armies, reserves the right of having recourse to the transportation allowed for in Article 16 of the Armistice of 11th November, 1918, under conditions and guarantees to be fixed by the Permanent International Armistice Commission at Spa.

(Sd.) FOCH.

(Sd.) ERZBERGER.

SPA,

4th April, 1919.

ANNEXE TO PROTOCOL OF 4TH APRIL, 1919.

1. The transportation will be carried out by one of the following routes :—

- (a.) Coblenz—Cassel—Halle—Frankfurt—Leipzig.
Eilenburg—Cottbus—Lissa—Kalisch.
- (b.) Stettin—Kalisch.
- (c.) Pillau—Königsberg—Korschen—Lyck—Grajewo.

Six trains ("marches") every 24 hours may be made over each line (in the case of (a) above, half on each branch) under the reserve that in the case of the simultaneous use of the lines (b) and (c), the total number of trains used on both of these lines together does not exceed 10.

The Field-Marshal Commanding-in-Chief will first make use of the line (a).

The date of the commencement of the movement will be published as soon as possible and at least four days in advance to the German authorities through the medium of the Permanent Inter-Allied Armistice Commission, in the case of the employment of one or other of the lines. Particularly, the date of departure of the ships from the ports of embarkation, their size and numbers will immediately be notified to the Commission. The transportation will be able to commence from the 15th April and will last about two months.

2. The organization of the details of the transportation will be settled by a mixed commission at Spa composed of the French and German Presidents of the Sub-Commission for Transportation on the C.I.P.A.

This Commission must be immediately advised of any incident which arises out of the transportation and particularly of deviations from the route laid down necessitated by *force majeure*.

Staff officers from the Allied Army together with the German authorities concerned will control the transportation by routes (b) and (c) at Stettin and Königsberg. These officers will give the necessary orders to the Polish troops.

3. *Military measures.*—The troops will be transported in complete trains with their ammunition and supplies. The men will not carry ammunition on the person. The ammunition will be stored in one coach on the train and this coach will be sealed.

Liaison between the technical railway personnel, which is solely responsible for technical work on the lines of transportation, and the officers commanding the trains will be carried out through the medium of (a) officers from the Allied Armies accompanying each train; (b) officers from the Allied Armies (two officers with the necessary staff) at the stations where long halts are made.

These officers will also insure the liaison between the troops and the German military authorities.

Standing orders in four languages (French, English, Polish and German) will be drawn up by Major Courtillet and Major von Boetticher.

All measures will be taken by the Allied High Command to prevent incidents between the troops and the population. The German authorities on their part will take all the police measures necessary with regard to the population to avoid manifestations and disorder.

Long halts will be made about every 6 hours (a halt of at least 1 hour alternating with a halt of at least half-an-hour), to allow water to be distributed, and to allow the troops to leave the train. The troops will not be allowed to leave a certain area which will be fixed by the Allied officer in agreement with the German authorities.

The German authorities will have ready the water facilities and the necessary latrines. The food prepared on the train will be distributed at these long halts.

At the ports of Stettin and Pillau—Königsberg, a certain area will be kept free around the quays, outside which the fatigue parties employed for the disembarkation will not be allowed to move. The remainder of the troops will be kept on board.

The sick will be attended to by the doctors of the railway if there are no doctors with the troops; in case of need they will be attended to in hospitals on German territory and can be visited there by an officer delegated by the Allied military authorities. Transportation of supplies of food and ammunition subsequent to the passage of the divisions will be carried out *via* Stettin.

Telegraphic and telephonic communications on Service matters to and from the Allied officers attached to the convoys will be transmitted by the German authorities under the same conditions as German official communications.

4. *Technical measures.*—The transportation will be carried out in principle in trains of a standard type of 50 trucks (100 axles), comprising in particular one first or second-class coach for officers and closed trucks with benches, or passenger coaches, for the troops.

These rakes must not be split up or damaged either in course of transportation or when the troops are detrained or when the material is returned empty; they must be returned after the detraining of the troops as soon as possible and by the same route. The Allies will supply rolling stock for route (a), the Germans for routes (b) and (c).

Every coach forming part of a loaded train, damaged on the German railways, shall be immediately replaced by the railway system concerned.

The necessary entrainment gear at the ports will be found by Germany; however, the troops must provide themselves with the necessary cordage for the rail journey.

The gear used for transportation on line (a) will, after detraining, be stored in sealed wagons when the empty material is sent back.

Germany will provide engines on railways systems run by German personnel. Coal and grease will be provided by Germany. Train personnel will be furnished by Germany on the systems worked by German personnel.

5. *Payment.*—Germany will be allowed (i.) costs of transportation fixed according to the military tariff in force on the German railways, after deducting the cost of the hire of rolling stock, where the latter is supplied by the Allies.

(ii.) The amount of the expenses actually incurred by the transportation through Germany at the express request of the Allies, it being understood that the normal installations along a line of transportation will remain at the charge of Germany.

(iii.) The amount of damage caused by the troops proved and agreed by both parties.

The Sub-Commission for Transportation of the C.I.P.A. will be responsible for assessing the above expenses and for carrying out all the necessary investigations for these assessments.

PART XXIX.

MILITARY EFFORT OF THE BRITISH EMPIRE IN THE
GREAT WAR.

These notes on the military effort of the British Empire have been compiled for the purpose of showing its contribution in man power, and in other ways in the various theatres of war in which operations took place, whether these were conducted in conjunction with the Allied Forces or entirely by our own troops. The efforts of the various Dominions and Colonies have also been detailed as far as possible.

SECTION 1.

BRITISH MILITARY CONTRIBUTION DURING THE WAR.

(January, 1919.)

The following tables give details as to:—

(a.) Employment of personnel.

(b.) Casualties.

(c.) Railway work.

(d.) Inland water transport.

(a.) *Employment of personnel.*

Theatre.	Maximum strength.	Total employed.	Officer-days.	Other ranks-days.
France	2,046,901	5,399,563	79,125,002	2,018,325,535
Italy	132,667	145,764	1,257,246	26,943,867
Salonica	285,021	404,207	6,237,896	176,285,249
Dardanelles	127,737	468,987	1,033,299	27,697,399
Mesopotamia.. .. .	447,531	889,702	9,946,727	324,959,703
Egypt and Palestine	432,857	1,192,511	12,090,798	337,184,848
German South-West Africa	40,000	60,000	297,000	11,963,000
German East Africa.. .. .	211,525	372,950	3,381,430	126,769,000
Togoland and Cameroons	21,300	22,000	100,000	2,936,000
North Russia and Vladivostock	16,187	16,187	72,500	2,240,000
Australasia	4,083	4,083	2,100	81,900
Total		8,975,954	113,543,998	3,055,486,501

(b.) *Casualties in all Theatres for the period up to 11th November, 1918.*

Theatre.	(i.) Killed, including died of wounds and disease.		(ii.) Missing and prisoners.		(iii.) Wounded.		(iv.) Total casualties.	
	Officers.	Other ranks.	Officers.	Other ranks.	Officers.	Other ranks.	Officers.	Other ranks.
France	32,815	527,520	10,848	316,114	83,362	1,753,787	127,025	2,597,421

Total	3,109	481

(e.)—*The provision of men for the armed Forces of the Crown (as far as the Army is concerned).*

Strength of the Regular Army, Reserve and Territorial Force on 4th August, 1914, was					733,514
England has since recruited					4,006,158
Wales and Monmouthshire have since recruited					272,924
Scotland has since recruited					557,618
Ireland has since recruited (excluding those enlisted out of Ireland)					134,202
Canada has since recruited					628,964
Australia has since recruited					416,809
New Zealand has since recruited					220,099
South Africa has since recruited					136,070
Newfoundland has since recruited					11,922
Other Colonies, &c., have since recruited					12,000
Total, white enlistments					7,130,280

In addition to the above there were in India at the outbreak of the war:—

Indian, other ranks	239,561
The total recruiting up to 30th September, 1918, was, other ranks	1,161,789

In addition South Africa contributed in coloured troops	92,837
The West Indies	10,000
Other Colonies	20,000

Total	8,654,467
-------	-----------

In addition to the above, Chinese and other labour units have been raised in Egypt, Mesopotamia and Salonica.

The following figures show the losses to the British Army (white troops only) and excluding Dominion troops up to January, 1919 :—

	Officers.	Other ranks.	Total.
Killed, died of wounds, and died other causes	30,665	463,695	494,360
Missing and prisoners	11,775	314,506	326,281
Totals	42,440	778,201	820,641

In addition to the above there have been the following losses :—

Discharged as medically unfit	588,396
Not likely to become efficient	131,781
Time expired	42,176
Other causes	88,126
To Army Reserve (ordinary)	46,447
Total discharges	896,926
Died at home	37,179
Deserted (many rejoined)	114,670
Total	1,048,775

In addition to the above 22,684 officers have been lost to the Army.

The total permanent losses were therefore :—

Officers	22,684
Killed, died, missing and prisoners overseas	820,641
Discharged, died, deserted at home	1,048,775
Total	1,892,100

The total number of wounded (British only) was 1,527,711.

There were 901,705 of these evacuated from France to England, and in addition 1,088,110 sick were also evacuated from France to England.

Of the total sick and wounded who were evacuated from France during 1918, there were 198,000 who became fit again to return to fighting units.

FRANCE.

The campaign in France has been by far the greatest military effort of Great Britain during the war. The first British contingent had landed by 16th August, 1914, and since that date the British Army in France has grown larger and larger until at the time of the Armistice it represented nearly one-third of the total Allied forces in the Western Theatre.

The campaign, commencing with the retreat of the whole of the Allied Army to the immediate neighbourhood of Paris and the Seine, was retrieved by the battle of the Marne, which drove back the enemy behind the Aisne, his further attempts to out-flank the Allied left were victoriously repulsed, and a connected front established from the sea to the Swiss frontier. The situation continued thus from November, 1914, to March, 1918. Various attacks on a large scale by both sides—in 1915 in Artois and Champagne by the Allies; in 1916, at Verdun by the Germans, and on the Somme by the Allies; in 1917, at Arras, east of Rheims, and in Flanders by the Allies—effected little material change in the situation. In March, 1918, the enemy, reinforced by large contingents from the Eastern Theatre, attempted several large scale breaks through, but was unsuccessful in defeating the Allies before the arrival of large American forces, coupled with the serious decline of enemy man power, and the unity of command which had been realized, enabled the Allies to strike a succession of heavy blows, beginning from the middle of July, which in five months compelled the enemy to consent to a cessation of hostilities.

Man Power.

The maximum strength at any one time in this theatre was 1,264,660 combatants, and 782,241 non-combatants, a total of 2,046,901 men.

The total casualties amounted to:—

Killed or died of wounds	560,335
Missing and prisoners	326,952
Wounded	1,837,149

The total numbers employed up to 11th November, 1918, were 3,790,553 combatants, and 1,609,010 non-combatants, a total in all of 5,399,563.

The number of officer-days amount to 79,125,002 and the number of other ranks-days to 2,018,325,535.

Railways.

The railway network of France, already very complete, has been still further amplified and improved in the zone of the British Army in France. During the course of the war 2,075 miles of broad and metre gauge track have been laid, and 944 miles reconstructed after destruction by the enemy in the territories recovered by the British. Besides, 1,904 miles of light 60 cm. railway have been laid. A very large amount of rolling stock has been sent across the Channel from Great Britain for the purpose of working these lines, and at the time of the Armistice we had running on the standard gauge railways 1,394 locomotives, 7 tractors, 49,687 wagons, or in 10 ton units 65,287. On the 60 cm. railways there were in service at the same date 392 locomotives, 823 tractors, and 5,616 wagons, and the state of efficiency to which the railway service had been brought at this date is evinced by the fact that only 1.5 per cent. of the standard gauge wagons were out of service, and only 53 light railway locomotives and 74 tractors had been evacuated to England.

Water Transport.

The excellent canal system of Northern France and Belgium was taken full advantage of by the British Armies, and the use of these waterways was of considerable help in relieving the strain on the railways and in assisting the supply of all kinds of material to the Army Zone. By the 9th November, 1918, the total of craft, including tugs, barges of all kinds, dredgers, launches, cargo boats and oil tanks, was 950, while a further 70 were in construction and 22 had been purchased but not delivered.

Home and Cross-Channel Service.

For this service, up to the date of the Armistice, a total of 386 vessels were in use and 178 were either delivered or building. Among the vessels delivered were 241 cross-channel barges, 67 tugs, 4 dredgers and 4 train-ferry steamers.

THE DARDANELLES.

The operations on the Gallipoli Peninsula were undertaken with the object of forcing the Dardanelles and enabling the British and French Navies to effect an entry into the Sea of Marmora. An attempt by the warships to destroy the forts at the mouth of the Straits and to force the passage without the aid of troops having failed on 18th March, 1915, it was decided to land a force of British and French troops on the Gallipoli Peninsula and by clearing that side of the Straits to enable the Fleet to pass through.

The landing was carried out by the 29th Division and two Australian divisions on 25th April at two places, at Helles, the most southerly point of the peninsula, and at a point known subsequently as Anzac Cove on the western shore of the peninsula, about 14 miles north of Cape Helles. These operations, demanding as they did a series of landings on an open beach in face of a determined and fully prepared enemy and, in the case of the Australians at Anzac Cove, the climbing of almost precipitous cliffs after the landing had been effected, was a task of extraordinary difficulty which only succeeded owing to the remarkable endurance and resolution shown by the troops.

The plan of operations subsequent to the landing was a combined advance by both forces from south and west, and heavy fighting ensued, especially at Cape Helles, where a determined effort was made to capture the commanding height of Achi Baba, but the desperate resistance of the enemy, their increasing numbers, and the exposed nature of the ground held by our troops prevented further material progress being made, although a number of heavy Turkish counter-attacks were repulsed and some ground was gained at various points.

During the next few months the Turkish forces were reinforced by several divisions which had been freed owing to the abandonment by Russia of her project for co-operating from the coast of the Black Sea, and in spite of the arrival of the 52nd British Division our troops were relatively no stronger than before. Under these circumstances it was decided to send out three more regular divisions and the infantry of two Territorial divisions, and with these it was proposed to effect a landing at Suvla Bay, 18 miles north of Cape Helles, and by a combined advance from that point and from Anzac to secure the Sari Bair heights and cut the communications of the Turks on the peninsula.

These operations commenced on 6th August. They consisted of an advance from Anzac on the Sari Bair heights, combined with a landing at Suvla, and an advance inland from there with a view to effecting a junction with the Anzac forces. Very heavy fighting took place. The former operation, in the course of which the troops had to fight their way forward through a country consisting of deep ravines, was only partially successful. The summits of the ridge could not be held against the enemy's counter-attacks, while the force allotted to Suvla Bay, although it had been safely landed without serious opposition from the enemy, could not effect any material progress in view of difficulties of water supply, combined with the intense heat and the inevitable disorganization of a landing carried out at night. After this check it became impossible to capture the main Turkish positions on the peninsula which would have enabled us to clear the western side of the Straits; operations on a large scale were abandoned, and a period of trench warfare intervened which lasted until the evacuation took place in the following December and January. This period involved great hardships owing to the nature of the climate. Sickness, resulting from the strain of incessant fighting throughout the summer, took a heavy toll of men, while the intense cold, rain and snow which was encountered in the autumn and winter entailed great suffering, but perhaps the most trying feature of this campaign was the continuous shelling to which the troops were subjected, there being no place on the peninsula where the troops in reserve could find any rest or relief or avoid constant casualties from this cause.

This campaign, although it failed to attain the object with which it was undertaken, had proved so severe a strain on the Turkish Army and had resulted in such heavy losses that that Army, except for a temporary success gained in the following Spring over a small British force in Mesopotamia, was thenceforth powerless to resist the steady pressure of the British and Russian forces in Mesopotamia, Palestine and Armenia. Moreover, our initial successes in Mesopotamia and those of the Russians in Armenia could never have been gained had not the bulk of the Turkish Army and the flower of their troops been engaged in the defence of the Dardanelles.

The maximum strength at any time in this theatre of war was 85,175 combatants and 42,562 non-combatants, making a total of 127,737.

The total casualties were as follows :—

Killed and died of wounds	30,456
Missing and prisoners	8,443
Wounded...	73,928

The total numbers employed in this campaign were 327,606 combatants and 141,381 non-combatants, making a total of 468,987, or more than four times the maximum number of men employed at any one time, showing how heavy was the wastage.

The total number of officer-days was 1,033,299, and other ranks-days amounted to 27,697,399.

ITALIAN CAMPAIGN.

Operations.

The campaign commenced on 2nd November, 1917, shortly after the opening of the great Austro-German offensive. Five British divisions arrived in Italy before the end of the year, and their presence was an important moral factor in restoring the situation. Two of these divisions were withdrawn to France in March, 1918, to meet the threatened German offensive. During the Austrian offensive of May, 1918, the British forces were on the Asiago Plateau, where they repulsed the enemy's attack with heavy loss.

In the Allied offensive of October, 1918, they took a prominent part in the crossing of the Piave and in the subsequent operations which culminated, on 4th November, in the signing of the Armistice with Austria.

Man Power.

The maximum strength of British forces in Italy at any one time was 91,102 combatants and 41,565 non-combatants, amounting in all to 132,667 men.

The casualties up to 11th November, 1918, were as under :—

Killed and died of wounds	1,057
Missing and prisoners	670
Wounded	4,971

The total numbers employed in Italy to the same date were : combatants, 101,880 ; non-combatants, 43,884 ; or a total of 145,764.

The number of officer-days amount to 1,257,246, and the other ranks-days is 26,943,867.

Railways.

The railway network in the plains of Northern Italy was so excellent as to afford very little need for new construction. Nevertheless, for the building of 60-cm. gauge railways in the neighbourhood of the Asiago Plateau there were despatched to Italy in all 31 locomotives and tractors, 240 wagons and 80½ miles of track.

Water Transport.

Water transport was not used in this theatre so far as concerns the interior of the country. A certain number of craft were sent over to Taranto, the totals being 12 tugs, 1 water tank boat, 15 launches (of which 1 was wrecked) and 90 barges.

SALONICA CAMPAIGN.

Operations.

The campaign commenced on 5th October, 1915, and ended on 30th September, 1918, when hostilities with Bulgaria ceased.

Of the six divisions which have served on the Salonica front four have been in that theatre continuously for almost 3 years. In order to maintain the quality of our forces on the Western Front we have not (until this year, when some 19,000 malarial cases were sent from Salonica to France), adopted the policy of bringing men away from this theatre after a certain period of service.

The number of admissions of patients suffering from malaria in this theatre up to 7th December was 160,381, being a ratio of 325 per 1,000 ; of these cases 693, or 1·45 per 1,000, proved fatal.

Our forces at Salonica have consequently suffered greatly, both from malaria and from the tedium of monotonous and uncomfortable surroundings, where billets are unknown, amusements few and leave rare. Moreover during a large portion of the campaign we have held a front of 90 miles with four divisions, so that no complete division, and on the Struma front no brigade, could be withdrawn into reserve.

Although severe fighting has been rare, the attacks which have been undertaken have been made against mountainous positions of great strength, defended by the enemy's best troops and by the bulk of his reserves. It is worthy of remark that positions of such a kind, west of Lake Doiran, were three times attacked—in April, 1917, May, 1917, and September, 1918—by the same division, and although on each occasion the division suffered extremely heavy losses, the third and last of the three attacks was conducted with such dash and gallantry that the strong Bulgarian reserves behind this sector of the front were completely immobilized, and the advance of the Serbians to the Vardar was thereby greatly assisted.

Man Power.

The maximum British strength in this theatre at any one time totals up to 137,236 combatants, and 147,785 non-combatants, in all 285,021.

The casualties up to 11th November amounted to:—

Killed and died of wounds	7,948
Missing and prisoners	1,921
Wounded	16,881

The total number of British troops employed to the same date were: combatants, 180,321; non-combatants, 223,886; in all, 414,207.

The officer-days during the campaign amount to 6,237,896 and other ranks-days to 176,285,249.

Railways.

The British sector on the Salonika front was almost entirely devoid of railways, and a large railway programme of construction had therefore to be undertaken. All the material for this had to be carried, at great risk and at considerable expense of cargo room, either from England or from Egypt, but despite all this the total railway stores lost at sea was surprisingly small. The largest item in this respect was that of 60 cm. trolley wagons, 1,188 being shipped, of which 294 were lost at sea, but all cases of loss were made good by replacement orders. On the other hand, 1,996 normal gauge wagons were transported and 364 miles of track without any loss whatever. Up to the Armistice 140 miles of 60 cm. and 30 miles of normal gauge line had been constructed on this front. A summary of the rolling stock delivered for the Salonika front is as under—

—	Locomotives.	Tractors.	Wagons.	Trollies.	Rail motor cars.	Coaching stock.
60 cm.	69	45	1,777	1,188
4 feet 8½ inch gauge ..	59	..	1,996	..	5	65
Total ..	128	45	3,773	1,188	5	65

Water Transport.

There was very little scope for the use of water transport on the Salonika front, and the only item sent out was six motor launches, of which one was lost *en route*.

SIBERIA.

In May, 1918, it was decided to despatch a British battalion to Vladivostock to keep the Port open for the evacuation of the 2nd Czecho-Slovak Division, which was *en route* from Russia, and to protect the vast accumulation of war material and stores in the district. Forces of other Allies were subsequently added to these. It was later decided to organize a mixed brigade of all arms to co-operate with the Czech and Siberian troops to enable the latter to be extricated and to cover the vast resources of Siberia from German-Bolshevik penetration. The command and organization of this force was delegated to the Canadians, who were also to find the bulk of the troops. A second British battalion arrived in December, 1918, and the Canadian forces are now concentrating at Vladivostock.

In addition, a powerful British Military Mission was despatched to show our sympathy with the Siberian efforts to maintain an orderly Government, to help it to train its forces and to distribute the material supplied from Vladivostock and from the United Kingdom. Complete clothing and equipment for a force of 100,000 men were despatched from this country in October and November, 1918, and a similar quantity is now in preparation for despatch early in 1919.

NORTH RUSSIA.

Operations in North Russia were undertaken for five reasons:—

- (1.) To prevent further movements of German troops from the Eastern to the Western Front.
- (2.) To assist the 1st Czecho-Slovak Division, which was then moving from South Russia towards Archangel.
- (3.) To deny the enemy the use of Murmansk and Archangel as submarine bases.
- (4.) To deny the enemy the remains of the valuable military stores still lying at Archangel.
- (5.) To act as a rallying point to all pro-Entente elements in Russia.

At Murmansk we had maintained a battleship for a considerable period, and in April, 1918, in order to preserve order in the town, a small detachment of Marines was landed, which was joined by Serbian and French detachments from the interior of Russia. On 23rd June a small force of British troops was landed here and at Pechenga, with the rôle of assisting the inhabitants to resist the Germano-Finnish drive northwards. On 2nd August, at the request of the Anti-Bolshevik Government of Archangel, a small Allied force, escorted and protected by battleships, landed at Archangel.

Later, the forces both at Murmansk and Archangel were largely increased; at Murmansk, owing to the imminent danger of an attack by the German troops which from July to October were massing in Finland; and at Archangel, owing to the strenuous efforts of the Bolsheviks, with whom were German staff and instructional officers, to prevent our advancing southwards. Our troops were joined at Murmansk by an Italian contingent, and at Archangel by Americans and French.

The results of our occupation were *firstly*, the retention in Russia of large German forces in spite of the heavy fighting on the Western Front, and *secondly*, the establishment of orderly governments under whom local forces are being raised, equipped and trained with our assistance. Complete equipment for 25,000 local troops have been supplied, including clothing, rifles, guns, ammunition, aeroplanes, accoutrements, entrenching tools, &c.

This being the first time that British or Western European troops had been employed in arctic climates, a large amount of organization was required to produce the necessary warm clothing and equipment. The latter has included the provision of material to render a certain proportion of the troops mobile under snow conditions, such as skis, snow shoes, sleighs, arctic tents, special sledging rations and teams of dogs. All the burden of providing supplies for maintaining the Allied and local troops fell on the British Government, and as in addition it was necessary (in default of the American ability to redeem their promises in this respect) to provide food for the civilian population to the number of 100,000 at Murmansk and 600,000 at Archangel. The consequent drain on our shipping resources has also been very heavy.

As the railway and harbour organization at both places were in a very unsatisfactory condition, large quantities of material and a considerable number of technical personnel have also been provided. It has been necessary, in the case of the Murmansk Command, to supply hutting or other accommodation for a very large proportion of the forces, as the resources of the country in this direction are very small indeed.

The maximum strengths up to the present are:—

12,140 combatants and 4,047 non-combatants, making a total of 16,187 men. This is also the present strength of the forces in the North Russian and Siberian Theatres.

Further administrative troops are now in preparation, and it is estimated that the British numbers will eventually be:—

At Murmansk	8,000
At Archangel	6,500
In Siberia	8,000

The casualties up to 11th November, 1918, amounted to:—

Killed and died of wounds	48
Missing and prisoners	75
Wounded	64

The total number of officer-days for North Russia and Siberia amount to 72,500 and other ranks-days to 2,340,000.

PALESTINE.

The first actual collision with the enemy in this theatre of war appears to have taken place on 20th November, 1914, in a patrol encounter east of the Suez Canal, but the first fighting of importance took place at the end of January, 1915, when the Turks made an attack on the Canal itself. These operations have demanded a serious military effort and involved enormous expenditure in men, money and shipping. Great hardships have been encountered in the Sinai Desert owing to heat and lack of water, while during the advance in Palestine our troops have had to encounter severe cold and wet in the hilly country of Judæa and east of the Jordan, where little shelter has been obtainable, and owing to difficulties of transport the troops have frequently been placed on half rations. In the Jordan Valley intense heat and malaria were encountered. During the early part of the campaign a large army had to be maintained in a waterless desert at a distance of about 150 miles from their base. All the water for the force had to be brought by pipe line from Egypt, and the fact that these difficulties were successfully overcome constitutes a remarkable achievement both as regards the endurance of the troops and as regards the efficiency of the administrative services.

The maximum number of troops employed at any one time in this theatre has been 228,927 combatants and 203,930 non-combatants, making a total of 432,857.

The casualties incurred have been as follows:—

Killed and died of wounds	16,366
Missing and prisoners	3,882
Wounded	38,090

The above bears little relation to the total wastage for the total numbers employed on the campaign, up to 1st October, 1918, were 717,853 combatants and 474,658 non-combatants, making a total of 1,192,511.

In Egypt and Palestine the number of officer-days amount to 12,090,798 and other ranks-days to 337,184,848.

Administration and Development.

A railway has been constructed connecting the Egyptian system with the Syrian and Hedjaz Railways. Up to 9th November, 1918, the following railway construction has been carried out:—77 miles of single line has been constructed west of the Suez Canal; 126 miles of double and 217 miles of single line has been constructed east of the Canal, as well as a large number of light railways. Kantara, on the Canal, has been developed into a port of great importance, capable of serving as the main base for our army in Palestine. Road communications throughout Palestine have been greatly improved, and the whole administration of the country has been placed on a sound footing. The population is contented and prosperous, education is being encouraged, the areas under cultivation are being increased, prices are falling, up-to-date sanitation has been introduced in many of the towns, and the rate of sickness and mortality has decreased. A new water supply has been provided for the city of Jerusalem, which has been brought from the neighbourhood of Hebron.

Effects of British Occupation.

The main features of the situation resulting from the expulsion of the Turks from Palestine and Southern Syria has been the removal of the desert barrier which has hitherto protected Egypt on the east. This is a most serious matter in connection with the defence of the Suez Canal, an artery vital to our Indian Empire. We could not regard with equanimity the possibility of the creation of a modern army in Syria, which might be used against us. In connection with this question, it must be remembered that the Arabs possess a population of about 3,000,000, which might allow them to place in the field a force of 300,000 fighting men.

Another result of the operations in Egypt has been that the Nile Valley has on the west been brought into contact with North African territory likely to fall under the domination of a European Power.

The general result is that, whilst we have done pioneer work which will benefit the surrounding countries, our immense expenditure in blood and treasure has actually weakened our strategic position by breaking down natural barriers.

MESOPOTAMIA.

The campaign commenced on 6th November, 1914, and lasted practically 4 years, during which our forces have inflicted a series of crushing defeats on the Turks and have occupied the whole country as far north as the Lesser Zab and Hit on the Euphrates, while during the past year they have extended their right flank to the Caspian Sea at Enzeli.

The difficulties met with in this campaign have been very great; the climate is tropical and of a peculiarly trying nature; few, if any, parts of the world are hotter in summer, while in winter intense cold is encountered. Diseases peculiar to the tropics are prevalent, especially malaria, sand-fly fever and dysentery; little shelter is obtainable, and drinking water is very scarce except in close proximity to the rivers. All these evils were aggravated during the early period of the campaign, owing to the inadequacy of the previous preparations which had been made; and the suffering and hardship inflicted on the troops was proportionately great.

Military operations have also been hampered by the fact that there were no roads, and the tracks which existed ran over alluvial soil liable to be flooded for long periods and to become a quagmire during rain. Rivers and waterways afforded the main means of communication, and these have a very tortuous course, shifting channels, and depth varying in accordance with the season, so that to navigate the rivers at all seasons of the year, specially constructed vessels are necessary. The base port of Basra was unsuited for ocean-going steamers, and in every way inadequate for the maintenance of a large force. To add to all our other difficulties there were, when the campaign began, no maps available of the country in which it was to be conducted.

The maximum number of troops employed in this theatre during any one time was 168,829 combatants and 278,702 non-combatants, making a total of 447,531.

The following casualties have been sustained :—

Killed and died of wounds	31,758
Missing and prisoners	15,350
Wounded	51,156

The total numbers employed on the campaign up to 11th November, 1918, were : 400,905 combatants and 488,596 non-combatants, making a total of 889,702, or nearly double the numbers employed at any one time. The wastage is largely due to heavy casualties from sickness.

The number of officer-days amount to 9,946,727 and other ranks-days to 324,959,703.

The extent to which the country has been developed, the railway construction, development of harbours and inland water transport, may be appreciated from the following figures.

Agriculture.

In the Spring of 1918, the Army and the civilian population needed large supplies of grain, other foods, fodder and firewood from India, and a large amount of transport was being used for this purpose. In May of this year a scheme was approved for expenditure upon irrigation works, machinery and seeds, including advances to local inhabitants, amounting in all to approximately 1,800,000*l*. The result of this is expected to be that 1,500,000 acres, otherwise derelict, will be cultivated either directly by the army or indirectly by the inhabitants; and the total production therefrom will be from 75,000 to 150,000 tons of wheat, 300,000 to 600,000 tons of barley, and 375,000 to 750,000 tons of bhoosa. The scheme is being worked through a Directorate of Agriculture and with assistance from India. By the summer of 1918, the army was already reported to be self-supporting in vegetables, and large crops of fodder are also being raised. By October, 1918, 450,000 tons of grain were reported as the approximate results of the last harvest, but owing to the influx of refugees and the extension of occupied territory, supplies from India will be necessary, although the quantity required will be very greatly reduced, as also the transport necessary.

During 1918 the whole of the country has been organized by the Directorate of Agriculture, arrangements being made with local tribes and farmers on various terms for the cultivation of land. Nine flour mills have been sent out from England, baling presses and crushers have been supplied from India, together with a large amount of other machinery. Canals have been cleaned out, pumps supplied and erected, and irrigation improved in a great many directions.

Basra Port.

With regard to harbours and inland water transport, no landing facilities were available at the port of Basra in 1916, sea transports discharging to native craft for landing on temporary jetties along the narrow strip of foreshore.

In 1918 there were 1,500 feet of wharfage, and, in addition, a new port was opened at Nahr Umah in 1917, 25 miles north of Basra, which includes two berths of 350 feet each.

The wharves at Basra were equipped with 50 Gantry cranes, also runways, elevator conveyors, and all necessary mechanical appliances to render Basra a first-class port.

In 1916 the capacity of the port had been developed to 50,000 tons monthly. In July, 1918, the capacity was nearly 130,000 tons, and the ultimate capacity for which provision is being made is 150,000 tons monthly.

An extensive dockyard has been established at Mahgil, formerly a swamp, including 12½ acres wet basin with berthage of 6,000 feet, three slipways (largest capable of taking steamers up to 250 feet long). There are workshops fully equipped for the erection and maintenance of fleet, including power station and up-to-date power driven machinery.

From August, 1917, to 11th November, 1918, approximately 1,800,000 tons have been discharged at Basra.

River Fleet.

In 1916 the river fleet consisted of 195 craft (exclusive of native craft). In October, 1918, the fleet was over 1,600 (exclusive of native craft). The greatest difficulty has been experienced in obtaining suitable shallow draft vessels capable of navigating the Tigris and towing barges. Enquiries have been made practically all over the world, and India, Burma, Singapore, Egypt, Canada, South America and West Africa have contributed to the supply of craft. Expert advice has been obtained and special designs prepared for vessels capable of navigating one of the most difficult waterways of the world.

A large craft construction programme was undertaken in England and India, and shallow draft river craft successfully navigated on long deep sea voyage with insignificant loss. In November, 1918, 164 of these craft were built or building. In this large programme were included, in order to make the fleet self-supporting and to provide every possible comfort,

- 15 refrigeration barges,
- 10 ice barges,
- 4 filtration barges,
- 2 wrecking barges,
- 14 water barges.

Nine fire floats have been supplied and several fast craft designed on the hydroplane principle for rapid despatch work, telegraph and telephone repairs, &c.

In addition, a large fleet of hospital craft was specially designed and constructed. These include vessels of 1,000 horse-power, with cot accommodation for nearly 5,000 cases, fitted with operating theatres and every up-to-date medical and surgical appliance.

Fleet Construction and Maintenance Locally.

In 1916 the repair facilities were of the crudest and practically negligible. Large engineering workshops, in addition to those at Mahgil already mentioned, have been established at various points up the river as far as Baghdad, capable of executing running repairs. Every facility now exists for the maintenance of this large fleet of over 1,600.

River Traffic Control.

In 1916 the limit of river operations was Sheik Saad (243 miles). The river was uncharted unsurveyed and unbuoyed. Pilots were few in number and inefficient. River operations are now extended beyond Baghdad (500 miles). Pilots, who have been specially trained for individual sections, number several hundreds. The river has been completely surveyed, 700 buoys laid, and beacons erected. "The Narrows,"

21 miles of specially difficult river, are electrically lighted from a plant specially installed.

River conservancy work has been carried out, including extensive training of river channels, revetments of banks, damming of canals and provision of bye-passes, &c., by which the depth of water has been increased during low season from about 3 feet to a minimum of 5 feet.

Hammar Lake is being dredged; the River Euphrates is being opened up and over 900 craft placed on this river to carry crops locally grown, estimated at half a million tons, for the season 1918. Thirty-five sub-depôts have been established on the Euphrates.

The river now forms the main line of communication.

Oil Fuel.

Many oil-fuel burning vessels were supplied, and where possible other craft converted from steam to oil-fuel burning in order to take advantage of the unlimited supplies of oil available in the country. Oil fuel has been largely substituted for coal in workshops, &c. The general use of oil has resulted in a corresponding large reduction in coal imports. Oil fuel stations, including large tanks and storage, have been established at many points up river, served by a fleet of 56 specially constructed river tankers.

General Construction Work.

There has been extensive swamp reclamation, at Basra, at Mahgil and elsewhere. Camps, bungalows, stores, &c., have been built at various stations along the river.

A pontoon bridge, 750 feet in length, with 20 feet roadway, has been constructed across the Tigris at Amara, and various other pontoon bridges erected elsewhere.

Shujair Bund, south of Baghdad, wrecked by the Turks, was repaired, involving excavation of 15,000 cubic metres of soil and filling in of 44,000 cubic metres.

Personnel.

In 1916 there was a serious scarcity of labour, there being only 7,000 employed. Coolie labour was imported from India, China and Singapore; labour corps were brought from Egypt, and specialized labour from India, West Africa and British Honduras, under supervision of trained white personnel from England. By 1918 the number employed had risen to 45,000.

River Tonnage carried.

In July, 1916, the tonnage carried was 1,500 tons weekly, and in 1918 nearly 35,000 tons weekly; while from June, 1916, to November, 1918, 2,920,000 tons were carried up river by the Inland Water Transport.

Railway Construction.

Before our arrival in Mesopotamia there were no railways, except that between Baghdad and Samarra, a distance of 75 miles.

Up to 9th November, 1918, we had constructed (excluding the above 75 miles):—

155 miles of 4-ft. 8½-in. gauge and
421 „ metre gauge main-line railway.

Total ... 576 miles main-line railway.

Including sidings, this amounts to nearly 800 miles of railway track construction.

In addition to this about 200 miles of light 2-ft. 6-in. gauge lines were laid from time to time for temporary service during various stages of the military operations.

A large proportion of the railways was constructed through country subject to floods, and this entailed heavy earthwork and extensive bank protection.

Two main branches of the Euphrates were bridged, the Dialha River was twice crossed, and in addition irrigation canals and river "spills" necessitated the construction of a large number of bridges and open culverts.

For the equipment of the lines the following locomotives and rolling stock were supplied, mostly from India :—

Standard gauge, 4 ft. 8½ in. locomotives	22
Metre gauge	144
2 ft. 6 in.	25
Standard gauge vehicles	200
Metre	3,523
2 ft. 6 in.	237

Well equipped workshops were established to keep the locomotives and rolling stock in good repair.

India has supplied nearly all the permanent way material and rolling stock for these railways, and this has entailed the transportation by sea of some 225,000 tons dead weight.

With the exception of unskilled local labour, employed chiefly on earthworks, all the personnel, to the number of about 20,000, was imported from India.

Civil Administration.

The whole of Mesopotamia as far northward as Kifri and Tekrit and westward to Hit is enjoying tranquility and prosperity, in spite of the war being still in progress, to a degree which has been unknown for centuries. Even the turbulent tribes on the Hai have responded to our efforts to reorganize the country. The existing laws are being administered with fairness and firmness, and where modifications are necessary due regard has been paid to local traditions and customs. Particular care has been taken not to disturb the religious susceptibilities of Mohammedans in such centres as Nejef. The following telegram was sent by the Civil Commissioner, Mesopotamia, on the 4th October, 1918 :—

"Special prominence has naturally been given here to recent victories and deputations of notables in every town have called on local Political Officers to express their satisfaction. Telegrams of congratulation have been received from all over Irak and many local notables have paid calls or written with same object. Jewish community contemplate giving an official banquet in honour of the occasion shortly. United States and French Consuls and American Relief Commission have called to express satisfaction. I am telegraphing *en clair* text of telegram sent to Nejef in reply to telegram of congratulation from inhabitants of that town."

The outstanding result of our conquest of Mesopotamia is that we have defeated the German scheme of establishing herself on the Persian Gulf by means of the "Baghdad Railway." If the ambitions which depended on the realization of this scheme had matured, Germany would have been in a strong position for dominating the whole of the Middle East, which would have had a correspondingly adverse effect on the Indian Empire. Moreover, a strong naval power established in the Persian Gulf would be a standing menace to our sea communications with India, Australia and the Far East. Had Germany achieved her aim it would have compelled us to readjust our land defence of India, and would most probably have forced us to maintain in that country a much larger army than has hitherto been necessary, and, in addition, our naval forces in the Indian Ocean would have had to be increased.

The menace of a German advance to the Persian Gulf and of German and Turkish penetration into the countries bordering on India are for the time being removed, but it is noteworthy that the necessities of the military situation have compelled us to abandon to a great extent the policy previously adhered to by us for the defence of our Indian Empire. That policy was based on preventing any access by a European Power to the Persian Gulf, and it was for this reason that railway development south of Baghdad had, prior to this war, been consistently opposed. The whole of Mesopotamia has, however, now been opened up, and any great military power which is in a position to secure these railways could in a very short space of time secure access to the Persian Gulf. The work which we have performed would be of immense assistance to any such Power in menacing our position in India, the safety of which consequently depends on our control of Mesopotamia and the Persian Gulf.

COLONIAL CAMPAIGNS.

TOGOLAND.

Operations commenced on 7th August, 1914, when a detachment of the Gold Coast Regiment, West African Frontier Force, effected a landing unopposed at Lome, the German troops and administration retiring inland along the railway. The campaign ended on 26th August, 1914. It was conducted with especial energy and initiative, which resulted after 14 days' fighting in the unconditional surrender of the German forces in the vicinity of Kamina. The brunt of the operations was borne by British troops. French troops co-operated in the invasion of German territory from north-west, north and north-east. The terrain presented the usual difficult features of a bush country. Our main objective was the powerful wireless telegraph station at Kamina, forming a link between Nauen and Windhuk in German South-West Africa, which was situated far inland and therefore relatively inaccessible. Maximum number of British troops employed at any one time was about 60 Europeans and 2,540 natives, exclusive of Royal Navy and Royal Marine details and followers. (Many of these were employed later in the Cameroons.)

Administration.

About three-eighths of the country, say 12,630 square miles, remain in British occupation and is garrisoned by detachments of the Gold Coast Regiment, West African Frontier Force. The remaining five-eighths, say 21,028 square miles, is under French administration.

Development of the Country.

No railway connections with adjoining British or French territory have been planned and there have been no rail or road developments of any importance in either British or French adjoining territory towards the former German frontier.

Effects of Occupation.

Though economically valuable, the territory possesses little or no strategical value and its short coast line has no harbour, Lome being an open roadstead, though it might possibly form a submarine base. The hills in the interior have an elevation of from 600 to 1,000 metres and might be useful as a West African health resort.

CAMEROONS.

Operations commenced on 24th August, when our Nigerian troops crossed the Cameroon border at various points. A Franco-British expedition under General Dobell effected its disembarkation at Duala Harbour on 26th September, 1914. Hostilities concluded on 18th February, 1916, when the only remaining German detachment, which had been besieged in the hill station of Mora, surrendered to the Allies. The remainder of the enemy's forces had a short time previously retired into Spanish territory and been disarmed. This campaign was of a peculiarly arduous nature. In addition to the hardships incidental to operations in a tropical climate, the troops had to contend with great natural difficulties in the fall of thick bush, wide rivers, swamps, as well as rugged hilly country in the north of the Colony.

The maximum number of troops employed at any one time in the Cameroons was 9,300 combatants and 12,000 non-combatants, making a total 21,300.

Administration.

About one-tenth of the country, say 30,500 square miles, is in British hands, and about nine-tenths, say 274,440 square miles, is in French hands.

The total number of officer-days for Togoland and Cameroons amount to 100,000 and other ranks-days to 2,936,000.

Development of the Country.

No development has taken place since the occupation. Plantations, &c., have been conserved as far as possible, and order maintained.

Effects of Allied Occupation.

The most important result of this campaign, from a strategical point of view, is the possession of the fine and easily defensible harbour of Duala, which would form in enemy hands an ideal submarine base. This has now been virtually abandoned to the French. A further important result, which it is hoped will be secured, will be the restoration to the Nigerian Sultanate of Bornu of the areas incorporated in German territory.

GERMAN SOUTH-WEST AFRICA.

Hostilities commenced on 20th August, 1914, when a German force crossed the Union border at Nakob. The campaign concluded by the surrender of the German Protectorate troops on 9th July, 1915. This vast German territory, embracing an area of over 322,450 square miles, was peculiarly difficult of access, owing to the fact that, whilst it possessed no good harbour, it was shut off from Cape Colony by a difficult belt of waterless country. Moreover, all lines of advance inland from the coast had to traverse a waterless belt of 70 to 80 miles wide, presenting serious difficulties to an invading force.

The maximum numbers employed at any one time in this campaign were 38,000 to 40,000 all ranks (exclusive of native auxiliaries), making a total of 60,000.

The casualties were as follows:—

Killed and died of wounds	427
Missing and prisoners	782
Wounded	560

Administration and Development of the Country.

Through railway communication has been established between the railway system of Cape Colony and that of the German Protectorate. Under the administration of the Union of South Africa, the evils incidental to German rule have been abolished, the country is quiet, the natives are contented and prosperous, and the area under cultivation is constantly increasing. The number of miles of railway constructed since the occupation is 430, although a part of this is in Union territory.

Effects of British Occupation.

In itself, the territory possesses little military value, but it formed a grave danger to the territory of the Union so long as it was in German hands, providing, as it did, a base for operations for an incursion into British territory, and forming a constant source of encouragement to the disloyal element in South Africa. Not the least important result is the abolition of a rule which was notorious for its barbarity and which had almost resulted in the extermination of the Herrero population.

GERMAN EAST AFRICA.

The campaign began almost immediately after the outbreak of war on 4th August, 1914, and continued up to 25th November, 1918, the date of the surrender of the enemy forces in accordance with the terms of the armistice on 11th November. On that date the numbers of the enemy forces were reduced to about 155 Europeans and 1,168 natives. This campaign against the largest and most highly developed of the German overseas possessions was remarkable as having involved a serious military effort and very great hardships, owing to the enormous size of the territory, the unhealthy nature of much of the country, and the formidable resistance of a force mainly composed of natives, which was commanded by an enterprising and skilful leader. The maximum number of troops employed at any one time in this theatre was 24,156 combatants and 187,369 non-combatants, making a total of 211,525. The total number of casualties (exclusive of Indian and African followers), and exclusive of casualties in the forces operating on the Southern—Nyasaland side, up to 15th December, 1918, were—

	Officers.	Other ranks.
Killed and died of disease	397	9,051
Wounded	480	7,294
Missing and prisoners	30	911
Total	907	17,256

Casualties among the followers in the same period (again excluding those operating from Nyasaland), were—

Killed, died, &c. {	Indian	286
	African	42,318
Wounded ... {	Indian	11
	African	1,322
Missing, &c. ... {	Indian	13
	African	622
Total		44,572

The total numbers employed in the campaign up to 1st October, 1918 (again excluding the forces operating from Nyasaland), were 112,052 combatants and 260,898 non-combatants, making a total of 372,950. The total number of officer-days amounts to 3,381,430, and other ranks days 226,769,000.

Administration and Development of the Country.

The territory is to be held under the mandate, a part (approximating to the old German provinces of Ruanda and Urundi) is to be under Belgian administration, and the remainder (except for a few square miles at the mouth of the Rovuma River, which are to be administered by Portugal) under British administration. In the British area, which is now known as "The Tanganyika Territory," a civil administration was set up on 1st January, 1917, and by the end of 1920 had been organized on the lines of a British Protectorate.

The Effects of British Occupation.

The occupation of this territory safeguards British Imperial sea-routes by depriving an enemy of all opportunities of establishing naval bases in the Indian Ocean.

GROWTH OF KING'S AFRICAN RIFLES DURING THE WAR.

Strength of King's African Rifles.

Mounted Infantry, K.A.R., pre-war.
K.A.R. Signal Company, 3rd August, 1917.

KIAU-CHAU.

This campaign opened with the disembarkation of a British force in co-operation with the Japanese in Lo-Shan Bay on 23rd September, 1914. It was concluded by the surrender of the fortress on 17th November, 1914.

The British force employed included one battalion South Wales Borderers and half battalion of the 36th Sikhs.

The administration of the occupied territory has been assumed solely by Japan.

AUSTRALASIA.

These operations involved the occupation of the following islands :—

- (a.) Samoa group ;
- (b.) German New Guinea.
- (c.) Bismarcks Archipelago—Neu Pommern, Neu Mecklenburg, Neu Hanover, Admiral Islands, Bougainville and other smaller islands.
- (d.) Islands north of the Equator—Mariana Islands, East Caroline Islands, West Caroline Islands, Palau Island, Marshal Island, Nauru Island.

These were all seized with little difficulty, only slight opposition being encountered. Operations in each case were only of a few days duration. Samoa was occupied by a force despatched from New Zealand, supported by ships of the Royal Navy and the Royal Australian Navy ; the remainder of the German possessions south of the Equator by naval and military forces despatched from Australia ; and the islands north of the Equator were occupied by the Japanese. Samoa was surrendered on 29th August, 1914, German New Guinea on 24th September, 1914, and the Bismarck Archipelago on 21st September, 1914. The Island of Nauru was surrendered on 6th November, 1914.

The maximum numbers employed in these operations were : by New Zealand, 1,383, all ranks, and by Australia, 2,700, all ranks, exclusive of His Majesty's and His Majesty's Australian ships.

Effects of British Occupation.

The occupation of these territories has prevented the possible development of hostile sea power in the Pacific in proximity to the main sea routes from north to south and east to west. Their value is due rather to their geographical position than to special natural advantages.

VOLUNTARY ORGANIZATIONS FOR THE BENEFIT OF THE TROOPS.

Results achieved from the Army Council's scheme for the co-ordination, under the Director-General of Voluntary Organization, Sir Edward Ward, of voluntary effort on behalf of the troops :—

- (a.) 267 County and Borough Associations with 2,983 branches and groups of workers attached to them, received official recognition under the scheme.
- (b.) The total number of workers in connection with the movement was approximately 400,000.
- (c.) 88,000,000 clothing and surgical comforts were provided, which figure included the following specific articles :—
 - 1,742,947 mufflers.
 - 1,574,155 mittens (pairs).
 - 435,580 helmets.
 - 3,607,059 socks (pairs).
 - 123,666 sweaters.
 - 523,032 pyjamas.
 - 325,188 bed jackets and helpless-case jackets.
 - 351,762 bed socks.
 - 154,142 operation stockings.
 - 6,145,673 hospital bags.
 - 12,258,536 bandages of all kinds.
 - 45,503,001 dressings of all kinds.
 - 516,408 woodwork articles of all kinds.
- (d.) In addition, amongst the luxuries supplied were :—
 - 16,000,000 books (issued by Camps' Library).
 - 232,599,191 cigarettes.
 - 256,487 tobacco (lbs.).
 - 62,193 games.
- (e.) The estimated money value of these gifts at wholesale prices was 5,134,656*l*.

THE BRITISH SHARE IN VICTORY.

Pride of place, so far as man-power is concerned, belongs to France, though the actual figures of the strength of her Armies are not available for comparison. Great Britain, the Dominions, India and the Colonies between 4th August, 1914, and 11th November, 1918, passed more than 8,000,000 men through the ranks of their Armies, occupies the second place in respect of the contingents contributed for military service. The third largest contribution was made by the United States, who sent close on 2,000,000 men to fight in France.

In regard to Table 3 it should be explained that "ration strength" comprises the total number of men (excluding coloured labour and prisoners of war) who were being fed from Army stocks in France. The figures under this heading include thousands of men whose duty it was not to fight, but to supply, equip, and in other ways assist the fighting men. The "combatant strength" includes all fighting troops, together with the troops in divisional or base depôts, while the "rifle strength" is that of the officers and men of the infantry battalions alone.

(1.) TOTAL of British, Dominion, Indian and Colonial Troops.

British Isles	5,704,416
Canada	628,964
Australia...	412,953
New Zealand	128,525
South Africa	136,070
India	1,440,437
Other Colonies†	134,837
Total	8,586,202

(2.) TOTAL CASUALTIES.

	Approximate killed, died of wounds, died.	Approximate missing and prisoners.	Wounded.
British Isles	662,083	140,312†	1,644,786
Canada	56,119	306‡	149,733
Australia	58,460	164‡	152,100
New Zealand	16,132	5‡	40,749
South Africa	6,928	33‡	11,444

(3.) BRITISH Army in France, 1918.

	Ration strength.	Combatant strength.	Rifle strength.
11th March	1,828,098	1,293,000	616,000
1st April	1,667,701	1,131,124	528,617
23rd September	1,752,829	1,200,181	493,306
11th November.. .. .	1,731,578	1,164,790	461,748

† Includes coloured troops recruited from South Africa, West Indies, &c.

‡ Prisoners repatriated not shown. Men now known to be killed shown under heading of "killed."

§ Includes coloured troops from South Africa, &c., but excludes 44,262 African native followers, i.e., died and killed, 42,318; wounded, 1,322; missing, 622. The deaths were due mainly to epidemics.

The following are the comparable figures for the United States drawn up from official sources :—

(4.) UNITED STATES Army in France, 1918.

	Ration strength.	Combatant strength.	Rifle strength.
11th March	245,000	123,000	49,000
1st April	319,000	214,000	51,000
25th September	1,641,000	1,195,000	341,000
11th November.. .. .	1,924,000	1,160,000	322,000

(5.) COMPARISON of Captures.

The captures of prisoners and guns in France during the victorious offensive against the German Army between 18th July and 11th November were as follows :—

	Prisoners.	Guns.
British Armies	200,000	2,540
French Armies	135,720	1,880
American Armies	43,300	1,421
Belgian Armies	14,500	474

BRITISH IN OTHER THEATRES.

In addition there were 80,000 British combatant troops in Italy, who co-operated most effectively in the final defeat of the Austrian Army at Vittorio-Veneto, capturing 30,000 prisoners, and in the Eastern theatres of war, Palestine and Mesopotamia, where about 400,000 British troops on an average throughout 1918 were fighting, the complete defeat and destruction of the Turkish Army was affected by the British alone, and a total of 85,000 prisoners taken.

SECTION 2.

CANADA'S MILITARY CONTRIBUTION DURING THE WAR.

(January, 1920.)

1. At the outbreak of war the strength of the Army in Canada was—

Permanent force	3,000
Non-permanent (partly trained)	60,000

2. (a.) Grand total recruited in Canada for Canadian Expeditionary Force during the war up to 31st December, 1918 (exclusive of those enlisted for Naval Service, Royal Air Force, Imperial Mechanical Transport, Inland Water Transport, and exclusive of British and Allied reservists)

591,472

- (b.) Enlisted in England up to 31st December, 1918

1,733

- (c.) Enlisted in Canada for overseas service, other than Canadian Expeditionary Force

21,169

- (d.) British and Allied reservists (exclusive of (c))

14,590

Nett total 628,964

3. NUMBER sent on service overseas from Canada up to 31st December, 1918.

	Officers.	Other ranks.	Total.
Direct to England	17,281	397,736	415,017
To Bermuda and St. Lucia	198	3,367	3,565
To Siberia	237	3,586	3,823
Total	17,716	404,689	422,405

Of the numbers shown above as proceeding to Bermuda and St. Lucia, 109 officers and 2,912 other ranks later proceeded to England.

4. NUMBER sent on service overseas from England up to 31st December, 1918.

	Officers.	Other ranks.	Total.
To France	22,373	377,434	399,807
To Salonica	162	357	519
To Palestine	6	250	256
To North Russia	36	552	588
To Mesopotamia	15	6	21
Total	22,592	378,599	401,191

5. TOTAL Canadian casualties suffered during the war up to 31st December, 1919.

	Officers.	Other ranks.	Total.
France—			
Killed in action and died of wounds	2,595	49,074	51,669
Died, other causes	296	4,660	4,956
Wounded	6,347	148,385	149,732
Prisoners of war	236	3,693	3,729
Missing	6	6
Total	9,474	200,618	210,092
Canada, died other causes	3,055
Siberia—			
Died other causes	1	18	19
Wounded	1	1
Deaths in Canada (on strength of the Soldiers' Civil Re-establishment).	1,020

SECTION 3.

AUSTRALIA'S CONTRIBUTION IN THE WAR.*

(July, 1919.)

MILITARY.

Since the opening of the war Australia has mobilized, enlisted or trained 412,953 military and 3,856 naval men, making a total of 416,809, or nearly one-twelfth of its population.

By far the greater part of this, the Australian Force, i.e., 331,781 men, was sent abroad into the opposite hemisphere for active service.

The equipment, transport and maintenance of the forces abroad and at home were organized and paid for by Australia.

After the withdrawal from Gallipoli, the Commonwealth of Australia maintained a total of five divisions and one Cavalry division, and by voluntary enlistment for overseas service kept all cadres up to strength, notwithstanding the unprecedented wastage. All the troops from Australia were front line troops and were constantly employed in the heaviest fighting.

At the outbreak of the war Australia was in a position through its previous institution of compulsory service for Home Defence, to mobilize a considerable number of men who had had more or less military training.

Though not under obligation for service abroad a requisite number of these men were immediately available, with the aid of Australia's naval equipment, to reduce and occupy Germany's colonial possessions in the Pacific.

Expeditions were sent for this purpose to:—

- (a.) The Bismarck Archipelago, under which name are comprised the islands of New Britain, New Ireland and various small islands, as well as the greater part of New Guinea, known as Kaiser Wilhelm's Land.
- (b.) The Solomon Islands.
- (c.) The Marshall, Carolines, Pelew and Ladrões Groups.
- (d.) And the operations of the Australian Navy cleared the way for the occupation of the Samoan Islands by the forces from New Zealand.

Military and naval contingents from Australia took possession and hoisted the British flag in all these territories, and some of them were afterward administered by the Federal Government with smoothness and efficiency.

In addition to these operations, the declaration of war on Germany by Great Britain in August, 1914, was almost coincident with an offer by the Australian Government of a contingent of 20,000 men for service abroad as they might be required.

This offer was accepted and in a very short time an infantry division and a brigade of Light Horse were *en route* for Egypt. The first contingent was speedily followed by others, and in a few months upwards of 70,000 Australians were either at the front, on the way, or in training in the various States.

In Egypt, Australian troops assisted in repelling the early attacks by the Turks and the Germans on the Suez Canal and in securing the safety of the country.

Later the bulk of the Australian troops participated in the Dardanelles campaign and with comrades from New Zealand, landed at Anzac Bay on the Gallipoli Peninsula, in close proximity to Helles, where the French troops made their landing.

The Australian casualties in these operations were approximately 26,000 battle casualties and 24,000 sick.

After the withdrawal from Gallipoli in April, 1916, the bulk of the Australian Infantry and Engineers were sent to France, where they were soon vigorously engaged in the campaign on the Somme, and the capture of the Hindenburg line in that region.

By this time Australia had five divisions on active service—a position which was maintained until the end of the war—and there was also the major parts of two divisions of cavalry on active service in Palestine.

Since their entrance into the fighting on the Western front, there have always been large numbers of Australians in France and Flanders. Sappers and tunnellers took part in the operations prior to the mining and capture of the ridge at Messines.

Their Infantry was on active service in the region of Armentières and other points.

* Based on information supplied by the High Commissioner for Australia.

In the fighting of 1917 Australian divisions were engaged as front line troops in the great offensive which resulted in the Battle of Menin Road, and the tremendous fighting for the ridges with which the names of Polygon Wood, Broodseinde, &c., are associated, on 20th September, 26th September, 4th October, 9th October and 12th October.

They assisted in the subsequent operations at Passchendaele, &c.

A feature of their later work in the Ypres Salient was the advance in efficiency of their artillery arm, and the entrance into active service in France of Australian aviators. A squadron had been in Palestine from early in 1916. A school for the training of the latter was established and provision was made for the construction of aircraft.

In the East, Australian troops rendered great assistance in the defence of Egypt and the Suez Canal, and later in the expedition into Palestine, where they were conspicuous for good work in El Arish, Gaza and other localities.

During the campaigns of 1918 the forces of Australia were conspicuous in the fighting, both in France and in Palestine.

In the great advance on the Western front against the enemy, which was begun in July, Australian divisions were frequently used as the spearhead of the British attacks and their performances were duly recorded in the official communiqués, and their work was subsequently continued. It will suffice to note for special mention the capture of Mont St. Quentin in August.

In Palestine, Australian Cavalry were consistently successful. General Sir Edmund Allenby placed the whole of his Cavalry arm, including British, Indian and Australian squadrons, under Lieut-General Sir H. G. Chauvel, of the Australian Imperial Force.

SUPPLIES OF PROVISIONS AND MATERIALS.

By special war legislation the Australian Government took steps to put at the disposal of the British and Allied Governments all its products and materials, and its enormous mineral resources.

MUNITIONS OF WAR.

Besides sending these contingents of fighting men to the front the Commonwealth took an active part in supplying munitions of war. Works were established in Australia for the manufacture of explosives, small arms, ammunition, harness, clothing, &c., and these were subsequently enlarged and subsidized, and their output greatly increased. They included the manufacture of field guns, shell and other munitions appertaining to artillery.

Further, upwards of 3,000 operating hands, comprising skilled and unskilled workmen, were sent from Australia at the expense of the Federal Government for war work in Great Britain.

It may be mentioned that where the current rate of wage in Great Britain falls below the sum of 2*l.* 6*s.* a week, the Australian Government paid a sum sufficient to increase the unskilled workman's pay to that sum.

ARMY SERVICE, MEDICAL AND NURSING SERVICES.

The Australian forces were fully equipped with their own Army Service Corps and Medical Corps and Nursing Service, all supported by the Commonwealth.

TRANSPORT.

The whole of the transport of Australian troops both to and from the scene of war, was arranged and paid for by the Australian people, through the Federal Government.

REPATRIATION AND PENSIONS.

It is proposed to bear the whole of the cost of reconveyance of Australian soldiers after the war, and to bear the expense of their pensioning and resettlement.

83,000 war pensions have already been granted involving an annual liability of 5,509,000*l.*

Upwards of 2,500,000*l.* have also been voted for the resettlement of soldiers already returned, and it is estimated that 30,000,000*l.* more will be required.

AUSTRALIAN RED CROSS.

This Society is represented by Commissioners in England, France and Egypt who administer the funds sent overseas under a Finance Committee. Through their operations the needs of the sick and wounded members of the Australian forces were

attended to and supplies of foodstuffs and clothing were despatched to the prisoners of war. About 5,000,000*l.* was raised in Australia by voluntary subscription in aid of it, and the funds which it administered.

NAVAL.

The Royal Australian Navy founded in 1909, consisted when war was declared of 1 battle-cruiser, 4 light cruisers, 9 smaller vessels, in all 14 vessels—a number nearly doubled during the war—the whole of which force was at once placed at the disposal of the British Admiralty, and was available for service in all parts of the world as an integral part of the Imperial Fleet.

In the early days of the war the Australian Fleet was employed in the operations entailed by the presence of the German squadron in the Pacific, in the occupation of German New Guinea, New Pomerania, Samoa and the islands in the Pacific, in escorting transports conveying New Zealand troops to Samoa, and Australian and New Zealand troops to Europe, during which service the German cruiser "Emden" was destroyed by H.M.A.S. "Sydney" in the Indian Ocean.

Subsequently the Royal Australian Navy, except ships required for local defence in the Pacific and Indian Oceans, operated in conjunction with the Grand Fleet of the Empire.

The personnel of the Royal Australian Navy consisted of about 9,000 officers and men of whom some 1,500 were lent by the Royal Navy and some 3,000 belonged to the Royal Australian Naval Reserve.

The Commonwealth Government maintained fully equipped dockyards and complete training establishments for officers and men of the Royal Australian Navy.

The entire cost of the Australian Navy was borne by Australia alone, and is included in the total shown in the Financial Report under the general heading of War Expenditure.

The Australian Commonwealth took active steps in the direction of shipbuilding. In its home dockyards ships both for the naval and mercantile marine were constructed under Government auspices with the utmost expedition.

WAR FINANCE OF THE AUSTRALIAN COMMONWEALTH.

The subjoined statement shows that the actual War Expenditure from the public funds of the Commonwealth up to the end of the financial year 1917-1918 was 184,813,207*l.*

The amount expended during the financial year of 1917-1918 was 66,958,360*l.*, of which 11,863,251*l.* was paid out of revenue and 55,095,109*l.* out of loan funds.

In addition, 5,900,605*l.*, was paid out of loan funds in 1917-1918, representing loans to the States Governments and is accounted an expense of the war, since the grant of these loans was a measure designed to enable the States to meet obligations created by the war.

WAR EXPENDITURE OF THE AUSTRALIAN COMMONWEALTH.

						Totals.
						£

SUBSCRIPTIONS TO VARIOUS WAR FUNDS.

7,356,000*l.* Subscribed.

Up to June, 1917, the people of Australia had contributed upwards of 7½ millions sterling (*viz.*, 183,900,000 francs) by voluntary subscription to various funds raised for war purposes.

The following table gives the greater part of these in detail :—

	Victoria.	New South Wales.	Queensland.	South Australia.	Western Australia.	Tasmania.	Total.
	£	£	£	£	£	£	£
Australian Red Cross	650,116	557,051	145,406	78,000	207,000	78,982	1,716,555
Belgian Relief	312,431	685,056	193,890	134,000	71,000	68,300	1,464,677

Polish Relief	7,463	103,113	110,576
Serbian Relief	21,318	52,500	73,818
General Patriotic Purposes ..	408,864	1,018,543	658,921	574,593	34,000	34,068	2,728,989

NOTE.—The latter includes the Commonwealth Button Day Fund, 156,778*l.*; War Chest, 162,729*l.*; Sydney Chamber of Commerce Food Fund, 110,659*l.*

The above figures are approximately to 31st March, 1917, for Victoria and to 30th June for other States.

The subscriptions to Allies' relief funds by some States are shown under General Patriotic Purposes.

Additional subscriptions to the France Day and Australia Day Funds have since been made.

In addition, also, a grant of 100,000*l.* was voted by the Federal Parliament in the early days of the war for the relief of Belgium.

TOTAL AUSTRALIAN ENLISTMENTS, INCLUDING NEW GUINEA EXPEDITIONARY FORCE.

LIST OF IMPORTANT BATTLES IN WHICH THE AUSTRALIAN IMPERIAL FORCE HAVE
TAKEN PART IRRESPECTIVE OF THE CAMPAIGN OF OUR FORCES IN PALESTINE.

1915.

The Landing at Anzac—25th April.
Kaba-Tepe—4th May.
Helles—8th May.
Turkish attack on Anzac—19th May.
The Sorties—4th and 29th June.
Quinn's Post—2nd, 9th, 13th, 29th May, and other dates.
Turkish attack at the Nek—29th June.
Leanes Trench—31st July and 5th August.
Lone Pine and the Nek—6th-10th August.
The night attack and fighting on Sari Bair—6th-10th August.
Hill 60—21st, 22nd and 27th August.
The Evacuation—18th-20th December.

1916.

Fromelles—19th July.
Pozières—22nd July to August.
Mouquet—14th August-5th September.
Flers—4th-16th November.
The Somme winter—October, 1916-February, 1917.

1917.

Stormy Trench—1st and 22nd February.
Le Barque Thillo, Sunray Trench—25th February, 2nd March.
Malt Trench—25th February-2nd March.
Advance through Grevillers (13th March), and Bapaume (17th March).
Beaumont—21st-25th March.
Lagnicourt—26th March.
Doignes and Louveral—2nd April.
Boursies, Demicourt and Hermies—9th April.
Bullecourt—11th April.
German attack through Lagnicourt—15th April.
Bullecourt—3rd-23rd May.
Messines—7th June.
Third Battle of Ypres (Australian Artillery with British from 31st July).
The Windmill—31st July.
The Menin Road—20th September.
Polygon Wood and Zonnebeke—26th September.
Broodesinde—4th October.
The First Battle of Passchendaele—9th October.
The Second Battle of Passchendaele—12th October.
The later battles near Passchendaele—November.

1918.

Dernacourt—27th March-5th April.
Morlancourt—27th March to end of July.
Defence of Villers-Bretonneux—4th April.
Actions before Hazebrouck—13th-17th April and Strazeele.
Counter-attack at Villers-Bretonneux—24th-25th April.
Monument Wood (Villers-Bretonneux)—3rd May.
Ville-sur-Ancre (6th Brigade)—19th May.
Hamel—4th July.
Patrol actions before Merris and Meteran—11th July and other dates.
Taking of Merris (10th Bn., 12.15 a.m.)—30th July.
The offensive before Amiens—8th August.
Vauvillers—9th August.
Lihons—9th, 10th, 11th August.

1918—*continued*.

Action near Ethinheim (13th Brigade), two attacks—

(a.) Village—night 10th/11th August.

(b.) Spur—night 12th/13th August.

First attack on Proyart—(37th Bn.) 12th August.

Battles of Bray—22nd August and later.

Battle of Proyart and Herleville—23rd August.

Battle of Barleux—29th September.

Battles of Clery (10th Brigade)—night 29th/30th August.

Mont St. Quentin—31st August, 1st and 2nd September.

Peronne—1st and 2nd September.

Action near Templeux—10th September.

Battle of Hindenburg Outpost Line—Le Verguier—Hargicourt.

Joancourt—18th September.

Battle of Hindenburg Line—29th–30th September.

Battle of Beaunovoir Line—3rd October.

Montbrahain—5th October.

Australian Artillery with Americans—Battle of Bohnin—8th October.

" " " Battle of Landrecies—4th November.

LIST OF ENGAGEMENTS IN WHICH AUSTRALIAN IMPERIAL FORCES TOOK PART DURING THE PALESTINE CAMPAIGN.

- Operations in Sinai from the 22nd April, 1916, to 9th January, 1917, including—
 Romani—4th/9th August, 1916.
 Occupation of El Arish—21st December, 1916.
 Magdhara—23rd December, 1916.
 Rafa—9th January, 1917.
- Operations in neighbourhood of Gaza—
 26th/27th March, 1917.
 19th April, 1917.
- Operations in Palestine, including capture of—
 Beersheba—31st October, 1917.
 Khuweilfeh—1st/3rd November, 1917.
 Sheria—6th November, 1917.
 Huj—8th November, 1917.
 Junction Station—13th/14th November, 1917.
 Ayun Kara—14th November, 1917.
 Ramleh—16th November, 1917.
 Ludd—16th November, 1917.
 Jaffa—16th November, 1917.
 Nahr el Auja—24th/25th November, 1917.
 Jerusalem—9th December, 1917.
- Occupation of the Jordan Valley from 2nd April, 1918, to 23rd September, 1918, including—
 Capture of Jericho—21st February, 1918.
 Ghoraniyeh—11th April, 1918.
 Abu Tellul—14th July, 1918.
- Operations in Moab Hills, including—
 Raid on Hedjaz Railway at Amman—21st March/2nd April, 1918.
 Es Salt raid—30th April/4th May, 1918.
- Operations in Syria by Australian Mounted Division, including—
 Battle of Sharon—19th September, 1918.
 Battle of Mount Ephraim—19th/20th September, 1918.
- And actions at—
 Tulkeram—19th September, 1918.
 Jenin—20th September, 1918.
 Semakh—25th September, 1918.
 Tiberias—25th September, 1918.
 Jisr Benat Yakub—27th September, 1918.
 Sasa—29th/30th September, 1918.
 Kaukab—30th September, 1918.
 Capture of Damascus—1st October, 1918.
 *Baalbek—13th October, 1918.
 *Homs—16th October, 1918.
 *Aleppo—26th October, 1918.
- Operations in Jordan Valley and Moab Hills by Australian and New Zealand Mounted Division, including capture of—
 Jisr ed Damieh—22nd September, 1918.
 Es Salt—23rd September, 1918.
 Amman—25th September, 1918.

* No. 1 Australian Light Car Patrol, in conjunction with other British Light Car Patrols and Armoured Motor Batteries moving in advance of the 5th Cavalry Division.

Atlantic.		

Some representatives of Australian Navy took part in the actions in—

Falkland Islands. Jutland. Zeebrugge.

SECTION 4.

NEW ZEALAND'S MILITARY CONTRIBUTION DURING THE WAR.*

(January, 1920.)

The following figures have recently been received from New Zealand, and have been compiled in the Defence Department there:—

(a.) Total number of all ranks attested for service in New Zealand Expeditionary Force, including Samoan Expeditionary Force	117,175
(b.) Total sent from Dominion to British units, including Imperial Reservists and Naval Flying Cadets ...	944
(c.) Number known to have left New Zealand to join British and Imperial forces	3,370
(d.) Number enlisted and employed on Home Service in New Zealand from time to time	7,036
Grand total... ..	128,525

With reference to (c) the figures showing number of New Zealanders serving with the Canadian and South African forces are not available.

Of the number attested in the New Zealand Expeditionary Force, 98,950 served overseas.

The total number of volunteers and those called up under the New Zealand Military Act of August, 1916, was 231,439, of which over 102,000, obtained as the result of balloting, had not proceeded to training camps by 11th November, 1918.

SECTION 6.

NEWFOUNDLAND'S NAVAL AND MILITARY CONTRIBUTION
DURING THE WAR.*

(January, 1920.)

1. At the outbreak of war there was no military force in Newfoundland. There was, however, a pre-War Establishment of 580 Naval Reservists, besides local boys' brigades.

Newfoundland contributed to the fighting forces of the Empire 11,922 all ranks, consisting of 9,326 men for the Army, 2,053 men for the Royal Naval Reserve, 500 men for the Newfoundland Forestry Corps, and 43 nurses.

The Royal Newfoundland Regiment furnished a battalion for the Gallipoli campaign, and sent 4,253 men to France and Belgium, suffering the following casualties:—

Killed in action and died of wounds	1,082
Died from other causes	95
Missing	18
Prisoners of war	152
Wounded	2,314
Total	3,661

3,000 Newfoundlanders enlisted in the Canadian and other forces (outside Newfoundland) but there is no statistical record of casualties regarding them, although it is known they were heavy.

Money, &c.

Total receipts—

	\$
Cot Fund† ...	129,200.52
Aeroplane Fund ...	53,487.45
Red Cross Fund ...	151,500.00
Patriotic Fund... ..	166,687.16

A War Loan of \$6,000,000.00 was raised by Newfoundland.

A large quantity of Red Cross material, &c., was sent from the Dominion during the war to the various organizations overseas in addition to many thousands of dollars worth of comforts for the troops.

Newfoundland provided the pay and allowances of the Royal Newfoundland Regiment (6,326 all ranks) and made up the difference in pay to bring the Royal (Newfoundland) Naval Reserve to the same scale as that of the Royal Newfoundland Regiment, besides equipping the Royal Newfoundland Regiment before proceeding overseas.

2. Grand totals of Newfoundlanders raised for the war up to 11th November, 1918:—

	All ranks.
(a.) The Royal Newfoundland Regiment	6,264
(b.) The Royal Newfoundland Regiment, recruited in Great Britain	62
(c.) The Newfoundland Forestry Corps (non-combatant)	498
(d.) The Newfoundland Forestry Corps, recruited in Great Britain	2
(e.) The Royal Naval Reserve (Newfoundland) (pre-War Establishment)	580
(f.) The Royal Naval Reserve (Newfoundland) raised since August, 1914	1,473
(g.) Enlisted in other units in Canada and elsewhere (estimated)	3,000
(h.) Nurses serving overseas	43
	<hr/> 11,922

* Based on information supplied by the High Commissioner for Newfoundland.

† Instead of maintaining a hospital overseas, Newfoundland supported 301 beds in addition to 32 in Newfoundland.

3. Number on Active Service, up to 11th November, 1918 :—

The Royal Newfoundland Regiment	5,046
The Newfoundland Forestry Corps (non-combatants)	477
The Royal Naval Reserve (Newfoundland)...	2,053
In Canadian and other units (estimated)	3,000
Nurses...	43
					<hr/> 10,619 <hr/>

4. Of the Royal Newfoundland Regiment, 183* officers and 5,248* other ranks proceeded from the United Kingdom to theatres of war, of whom 38 officers and 1,140 other ranks served in Gallipoli.

145 officers and 4,108 other ranks served in France or Belgium.

NOTE.—The latter does not include officers and men who were transferred from Gallipoli to France or Belgium in 1916.

5. Casualties in the Royal Newfoundland Regiment (*see next page*).

6. In the Newfoundland Forestry Corps two men were accidentally killed.

7. In the Royal (Newfoundland) Naval Reserve there were :—

Killed in action	167
Invalided out	124
Sent home for discharge on completion of term of service						279

8. There are no figures available for casualties in regard to Newfoundlanders in forces not administered by the Newfoundland Government, *i.e.*, 2 (g).

The above figures exclude 42,430 British ranks sent from India to England, all, or nearly all, of whom doubtless proceeded on service from the United Kingdom.						42,430
								1,381,050

* Based on information supplied by the India Office.

PART XXX.

WAR TROPHIES.

15TH APRIL, 1920.

The War Trophies Committee was formed in November, 1916, the terms of reference being "to deal with all questions in regard to the distribution of trophies and to watch the interests of the Imperial War Museum." The Under Secretary of State was the Chairman, and it was composed of representatives from the departments concerned, from India and the various overseas contingents. The word "Trophy" was defined as including all articles of captured enemy equipment, but such articles were only to be considered as trophies for distribution during the war, if unserviceable or not required for conversion. A large number of trophies, especially guns, had rival claimants, and the rule was laid down that substantiated claims for trophies by units were to be only those having received War Office authority.

When a claim for a gun, &c., had been substantiated, the unit in question was asked its views as to the destination of the trophy, with a proviso that it went to a Regimental Dépôt, a recognized public body, or museum; up to the present some 3,595 guns, 15,044 machine guns, 75,824 small arms and 7,887 other trophies have been distributed.

Large numbers of applications were received for allotment from County Authorities, Mayors and Corporations of cities and towns, Urban and Parish Councils and various other communities. The Committee decided that allotment of the trophies to which no claim had been substantiated, had to be recommended by the Lord Lieutenant of the County.

A few trophies were received from Salonica, Egypt, Palestine and Mesopotamia. Trophies from France and Flanders were issued to the India Office for distribution to the Native Indian Regiments that served on the Western Front.

PART XXXI.

OUTLINE DIARY

OF THE

MAIN EVENTS IN THE VARIOUS THEATRES OF WAR.

For the dates of entry of the various Powers into the War, of the principal naval events, of the capture of Germany's Pacific and Far Eastern possessions, and of the signing of the Armistices and Treaties, see pp. 830-832.

DATE OF THE SIGNING OF THE ARMISTICES AND TREATIES

1918.

Armistice between the Allies and Germany	11th November
Armistice between the Allies and Austria-Hungary	13th November
Armistice between the Allies and Bulgaria	18th September
Armistice between the Allies and Turkey	24th July

PART XXXII.

SUPPLY SERVICES DURING THE WAR.

(AUGUST, 1914, TO MARCH, 1919.)

Note by the Quartermaster-General to the Forces (the Late General Sir J. S. Cowans, G.C.B., G.C.M.G.).

(i.) QUARTERING.*

The sudden increase of the Army in the autumn of 1914 threw a great strain upon the resources of the Quartering Directorate in accommodation, and the period of greatest difficulty was perhaps during the great influx of recruits in August and September, 1914. As the numbers steadily increased the strain continued with varying intensity, new conditions being constantly introduced by the arrival of large drafts of troops from the Colonies and from India, the formation of division after division, besides the countless new training formations, reserve brigades and units, and locally raised troops, schools of instruction of every description, remount depôts, command depôts for officers as well as men, and convalescent hospitals. Added to this, there were the changes in location and formation due to the exigencies of Home Defence, movements of troops from one part of the area to another, or overseas to France, the Mediterranean and Ireland, all of which maintained the stress of the quartering, and required constantly increasing vigilance.

The accommodation in barracks at the time of mobilization was sufficient only for 174,800 single men, so that at first the excess numbers arriving had to be dealt with under local conditions, while the general policy was being formulated at the War Office.

At the outset in 1914 it was decided to clear the barracks of married families, and for the purpose of barrack rooms to make use of every accessory building which could be made available. By this means accommodation was provided in barracks for 262,000 men. This, however, was only a small portion of the total numbers to be provided for, as, besides the New Armies, the largely increased numbers of the Special Reserve and the increase and constant production of new units in the Territorial Force required accommodation also on an extensive scale. Large numbers of troops were placed for a time under canvas, while others were accommodated in schools and institutions and in specially hired buildings; the bulk, however, had to be billeted on the population, as many as 800,000 being quartered in this way at one time. In this case accessory buildings in addition had frequently to be erected to give the necessary accommodation, while, for special defence of communications, accommodation on a considerable scale had to be arranged. The cubic space allowed per man was reduced from 600 cubic feet to 400 cubic feet, and special reduced war scales were also laid down for the accommodation of officers.

The regulations for billeting had never anticipated the conditions which evolved and the whole question had to be investigated and elucidated, after careful inspection in all parts of the country and much correspondence with the Commands. As a result, new rules were produced and printed, to be again overhauled and reissued, whilst the rates for billeting, which were in the first instance based on the assumption of largely increased cost of living in war time, were, after much discussion, lowered, to be later on again raised. The services connected with complaints, damages, losses and claims generally from billeting and hiring became a very large service in itself in the business of the department, and out of it was evolved a wide organization of quartering committees and machinery for hiring and assessing loss.

Area quartering committees were set up in the different Commands. Each of these committees was under a Permanent President, who supervised and co-ordinated all arrangements for the provision of accommodation other than in barracks and hutments. His main duties were (a) to be prepared with schemes for quartering troops in any locality in his area, (b) to arrange for the assessment of rent, drawing up agreements, keeping registers, requisitioning for engineer services, making records of the condition of premises, issuing notices to quit, assessment of dilapidations, and making inspection of premises in military occupation, and (c) to be responsible for economy. To each Area Committee was attached a War Department Valuer who was

* See also p. 622.

responsible for all the technical details. Under each Permanent President there were local, &c., formation quartering committees, who acted as sub-committees for the different districts.

It was desired to avoid the heavy expenditure on billeting under the Act, by hiring buildings wherever possible, and in this connection an immense amount of work was originated and carried through successfully. When billeting was resorted to it was as far as possible without subsistence, central messes being provided when circumstances allowed of it, which was again an economy, besides being more satisfactory generally.

The selection of billets and the question of the exemption of particular houses required close scrutiny, the difficulty of obtaining suitable billets being accentuated as the war progressed and as the male members of families were removed, it being undesirable to quarter men in houses occupied only by the wives or wives and children of absent soldiers and sailors.

Schemes were produced for the location of training centres in hutted camps and any suitable buildings and for the expansion of all draft-producing units and depôts, as well as for remount centres and detachments. This brought about the decision to build a great number of small and large hutted camps sufficient to accommodate approximately 850,000 men, which was, it is understood, the largest scheme that had ever been attempted in the time in this or any other country.

The selection and examination of sites, with all the contingent questions of water, sanitation and ready communication, opened up another large branch of the operations.

The inherent difficulties of the undertaking were aggravated by bad weather in the fall of the years 1914 and 1915, while the shortage of labour and congestion of traffic on roads and railways did much to delay the completion of the huts.

During 1916 the influx of very large reinforcements of Australians and New Zealanders, in addition to Canadians, gave a specially anxious turn to the problem of quartering, owing to the fact that it was impossible to forecast the numbers arriving, and well nigh impossible to keep accommodation available for even the numbers computed, whereas the actual numbers arriving were often greatly in excess.

Considerable difficulty arose owing to the numbers of fresh troops requiring accommodation. In the first place, owing to the great scarcity of timber, building new huts was so restricted as to be practically negligible, and so many of the larger buildings, schools and hotels had already been taken (not only by the War Office, but by other Government Departments) as to make it undesirable to take over more. On the other hand, the demand for accommodation increased continually. The very large expansion of the Royal Air Force and Tank Corps, and the formation of the Women's Army Auxiliary Corps among our own troops occasioned large demands; while accommodation had also to be found for foreign troops passing through or being trained in this country, among which may be mentioned Portuguese Artillery, Forestry Corps, United States of America troops, Jewish battalions, escaped Russians and prisoners of war awaiting repatriation. Further temporary accommodation was provided for men of the Royal Navy, and also for a large rest camp in connection with the extended scheme for men on leave from France, which, together with accommodation for prisoners of war, and for men and women employed on agricultural and road schemes, formed a serious addition to the problems which had to be faced.

Arrangements with other Government Departments were made to co-ordinate the methods by which they acquired buildings, and, by the use of our Quartering Committee to prevent clashing.

Many women, both of the W.A.A.C. and A.M.F.C., required accommodation for small isolated parties; these could not be billeted, and were too small in number to provide with hostels.

Arrangements for general hospitals, and extensions, and for auxiliary and private hospitals were made on a vast scale. Amongst these, special hospitals for enterics, for dysentery, for orthopaedics, for limbless soldiers, for neurasthenics, and for mental cases required special preparation and consideration for ever increasing numbers. It was also unfortunately necessary to take special measures to meet the constant increase of venereal disease in all the Commands, whilst the outburst of cerebro-spinal meningitis caused the preparation of specially large camps for contacts and allotments of hospital accommodation for persons so affected. Again, arrangements under all these heads for the Colonial troops required particular and special arrangements. Connected with the hospital services was that of accommodation for the medical and nursing staffs. In all this provision, the most loyal assistance was rendered by the Local Government Board, the Board of Education, the Board of Control, the General Board of Control for Scotland, the London County Council, and

the Metropolitan Asylums Board, and by the local authorities and private owners throughout the country.

In sequence to the primary hospitals it was found desirable in the interest of man-power to establish large convalescent hospitals and command depôts, in which convalescents could be brought on rapidly by training of every description, electric massage, gymnasia, swimming and other methods, and the siting and arrangement of these throughout the United Kingdom and Ireland was a matter of considerable difficulty.

From the first, immense assistance was given by the Territorial Force Associations, the Red Cross Society and St. John Ambulance Association, whilst the corporations and citizens of many large towns patriotically and generously contributed buildings and large sums of money.

All such assistance required co-ordination, consultation with departments and correlation with the general schemes.

Throughout the war the movements of the officers of the branch to each point of the areas occupied in the United Kingdom was necessary until the commands and armies were able to assume larger control, whilst in the later phases of the war the special technical services required similar assistance.

As the war progressed the influx of prisoners of war and the large increase of wounded prisoners made that department of the accommodation administration a specially pressing one. The location of this class of hospital was complicated in every case by objections, more or less robust, on the part of the civil population, as in the case of hospitals for special diseases.

Another large branch of the work was concerned with storage for every class of munitions, ordnance stores, equipments, clothing, supplies and transport, mechanical and otherwise.

The large question of the disposal of sewage in hutment camps, types and methods of incineration, organization of personnel and methods of carriage, with the incidental inspection of areas, required closest scrutiny, and very large economies were effected by elimination and replacements of contracts for removal and disposal of night soil.

The mushroom rapidity of the growth of large military cantonments called for special attention in the matter of the fire services, the preparation of scales of equipment and appliances, the completion and publication of rules, and the inspection of all hutments, stores, hospitals and military buildings, &c., with the incidental correspondence. For the betterment of this service the fire prevention services were brought definitely under the Quartermaster-General, an Inspectorate appointed, and a War Office Fire Committee, with all branches concerned included, was formed, with expert advisers, for the consideration of all fire prevention questions. Very great assistance in this branch of the work was offered and given by public and voluntary bodies connected with fire services, such as the National Fire Brigade Union and the British Fire Prevention Committee.

During 1917, a proper establishment of personnel for the custody of fire appliances and the training of fire picquets was approved and raised, and the whole of the non-commissioned officers and men were trained in regular courses by the Fire Inspectors, at a temporary School at Aldershot.

The equipment of the buildings of the Royal Air Force and of the stores and stock yards of the Forage Committee, and of the Royal Army Service Corps, was taken up and provided. The necessary orders being drawn up and personnel arranged.

Allowances for the officers and troops at home and abroad produced, as was inevitable with such numbers, a large mass of questions on lodging, fuel and light, and field allowances.

At the end of June, 1917, some 1,750,000 troops were accommodated in the United Kingdom, not including the Volunteer Force, for which, however, accommodation had to be provided when finding guards on buildings, communications, and on prisoners of war.

During the year the number of hospital beds provided in the United Kingdom reached 320,000.

The exercise of the Defence of the Realm Act and Regulations, in the acquisition of all land and buildings, other than those offered freely by Government Departments, public bodies and private individuals, added very largely to the work of this directorate; especially since the great increase and scope of the Flying Services opened up locations for aerodromes, &c., over a far wider area than had been hitherto undertaken, and demanded sites for schools, parks and formations.

During 1918 the work of providing quartering for the troops was one of great

difficulty, and at times of very serious anxiety. There were on an average over 1½ millions of troops and labour formations still to be dealt with in the country, and, besides this, the hospital population.

Of the 1,313,636 units of accommodation available in the country, over 400,000 were permanently allotted to troops of the Dominions, the Royal Air Force, the Tank Corps, Machine Gun Corps, the Q.M.A.A.C., the various training schools, convalescent hospitals and Command Depôts, and arrangements had also to be made for the transit of up to 40,000 American troops. For a time this latter number was increased by the prospect of 75,000 American troops training in the country, but this eventuality was put aside by the march of events. American aviation personnel to the extent of 15,000 had also to be provided for.

The necessity to provide winter accommodation for Americans, other than the camps of marquees (with floor-boards and stoves), was urged by the American authorities, these troops being specially susceptible to cold and inclement weather. A large hutted camp was, therefore, undertaken to provide for 10,000 men at Liverpool, with the necessary hospital accommodation, and hutments at Winchester and Codford were also allotted.

During the early part of the summer of 1918, when the pressure in France reached its height, at one time demands arrived from General Headquarters, British Forces in France, that accommodation should be held in readiness for the evacuation of 125,000 wounded from their hospitals, 65,000 prisoners of war, and the whole of the 3rd Echelon and its records and pay offices, and schemes were accordingly prepared to meet these emergent measures, camps being actually prepared for the prisoners, of whom 16,000 at once came over.

There was also a question of temporarily accommodating the British population from Paris, and considerable correspondence was involved, and measures were taken to meet the case.

After the tide of war had turned, the question of hospital accommodation for British and Dominion wounded from overseas, and also for prisoners of war, became very urgent. There were at the close of hostilities about 364,000 equipped beds in this country for all classes of hospitals, but at one time in October the available beds for overseas wounded reported at the port fell as low as 3,697, while, approximately, 6,000 wounded were coming over day by day. It may be claimed, therefore, that, though throughout the war there was sufficient provision for all the needs of the wounded and sick, provision was never in excess of requirements, and at the final stage just sufficed for the daily needs.

Billeting of suitable cases and other emergency measures were again adopted for the short time the great stress continued, and all the time every possible method of dealing with the increasing need was put into effect. The matter required the closest watching day by day to prevent grave conditions occurring, and at the same time avoid waste of public funds by over-provision.

During this time also American demands became insistent, and 20,000 beds in specially provided hospitals were arranged for, some taking effect in hospitals readily available, and others being designed to be added as rapidly as the limitations of building, &c., rendered possible.

The establishment of special hospitals, convalescent hospitals and Command Depôts was again an urgent necessity, and certain changes were involved in location of Command Depôts and hospitals on account of the tactical disposition of troops in Great Britain and in Ireland.

Neurological centres and many orthopaedic hospitals had to be formed to deal with a large and increasing class of patients, and for those neurological centres special buildings with agricultural facilities had to be obtained.

Some of these were the Seale Hayne Agricultural College, at Newton Abbot, another at Blackpool, and others at East Preston, Bristol, Oxford, &c., whilst a large Command Depôt for officers was opened at Scarborough.

Hospitals elsewhere were remodelled to take officers, as at Epsom, where two large first-class hospitals in asylums were devoted to this purpose.

For prisoners of war, of whom 9,000 wounded at one time were in the United Kingdom, and 7,000 more awaiting transfer from hospitals in France, the available accommodation was limited to the use of hutment camps, on account of the impossibility of providing any more ordinary hospital accommodation, and also to avoid difficulty in dealing with outbreaks of local feeling, the opposition to the location of prisoners of war in localities generally running very high, and specially where hospitals originally designed for wounded British troops were involved.

As regards orthopaedic centres, the War Department assisted and acted for the Ministry of Pensions in arranging annexes and other accommodation by means of which discharged men were enabled to share in the advantages of the military establishments, and be provided for after the war was over.

Late in 1918, however, the Ministry of Pensions notified their inability, at least for a period of six months, to deal with the medical and surgical treatment of discharged and dischargeable men. This necessitated a revision of estimates of accommodation, and in particular an extension of provision for orthopaedic cases.

In consequence of the signing of the Armistice and the cessation of hostilities, steps were at once taken to reduce the number of equipped hospital beds, and a scheme for closing down some 50,000 beds was put in train. At the same time due regard was paid to the necessity for meeting the demands of educational interests throughout the country by arranging for a priority release from military occupation of schools and similar buildings.

Considerable assistance was given to the Claims Commissions in France, and more especially in Italy, where arrangements for the selection of the personnel, &c., were largely carried out through the Directorate of Quarterming.

During the greater part of 1918 the housing of the Royal Air Force still remained to a considerable extent in the hands of the Directorate of Quarterming, and their demands were very large. Amongst other demands, the Air Ministry asked for the Blandford hutments for their recruit training, and these hutments were handed over. They also insisted on the necessity of their obtaining a large cantonment for cadets, so that disciplinary and training arrangements could be properly supervised. After considerable discussion, the whole of the Shorncliffe, Sandling and Dibgate hutments were allotted to this purpose on loan, the Canadians assenting to their removal from Shorncliffe on the understanding that the Bordon hutments should be given to them, as well as a large allotment at Rhyl. This necessitated many changes in the location of troops involved.

The expansion of the Tanks Corps, the Machine Gun Corps and the Motor Transport establishments also accentuated the normal difficulties connected with provision of accommodation. For the Tank Corps the whole of the hutments at Wareham, Bovington and Swanage were allotted and added to, and a special hutment at Lulworth was started.

The business of hirings and of acquisition of buildings for the accommodation of troops, and for the Royal Air Force, was constant throughout the period, as well as the obtaining of office accommodation and storage. During the last quarter of the year, the Air Ministry assumed responsibility for their own hirings.

The administration thus caused plainly justified the principle of having Area Quarterming Committees, with permanent presidents, to supervise all arrangements in connection with hired accommodation.

The services of these Area Quarterming Committees were to co-ordinate all demands of the various Government Departments for accommodation in the provinces, thereby affecting a considerable saving of public funds by eliminating the element of competition which necessarily placed an enhanced though fictitious value on premises in great request. Similarly, as regards London, machinery was set up to avoid overlapping, all proposals for the taking of accommodation for office purposes being first submitted to the War Cabinet Committee on Accommodation prior to any action being taken.

The method of quarterming troops by billeting was reduced to the lowest limit possible, in view of the disadvantage attaching thereto from the point of view both of discipline and economy, and, as a result of the food restrictions, billeting with subsistence was discontinued.

The use of compulsory powers in the acquisition of property was guarded as far as possible, each application receiving careful consideration before the employment of the Defence of the Realm Regulations was, as a last resource, decided on. Experience showed that in the very large majority of cases property which it was essential to acquire could be hired under agreement on the loss basis. As soon as the Armistice was signed, the use of the Defence of the Realm Act was curtailed as far as possible.

More complete records of hirings, &c., were kept, and the returns of the cost of thus accommodating troops in various localities were rendered periodically to the War Office.

A very large number of cases in the acquisition under Defence of Realm powers of lands and buildings for the Royal Air Force and other departments came daily to the Directorate of Quarterming for the sanction of the Army Council.

The Army (Annual) Act was amended to enable women enrolled in any of the auxiliary corps to be billeted, when necessary, on the same terms as soldiers.

The assistance rendered by the Board of Control, Local Government Board, London County Council, the Metropolitan Asylums Board and Board of Education largely assisted to meet the demands of both special and general accommodation, and, although the national importance of education was fully realized, it was found impossible to acquiesce to the full extent in the requests of Local Education Authorities for the release from military occupation of certain school buildings.

Subsequently the difficulty of finding accommodation for storage purposes became increasingly great. In the London area, particularly, suitable premises containing any large amount of storage accommodation were, for the most part, already utilized by Government departments or by firms engaged on work of national importance, and, consequently, the labour involved in meeting this demand was much greater than hitherto.

The large numbers of women enrolled in the Q.M.A.A.C. and W.R.A.F. created an extensive demand for hostel accommodation which, owing to the special conditions to be satisfied, it was not possible to supply without resort, in some cases, to the acquisition of hotels.

In close connection with the Director-General of Mobilization, the questions of accommodation of all kinds which would be required on demobilization received consideration. These included:—

- Rejoining places.
- Assembly centres for Dominion troops.
- Collecting stations and dispersal stations for troops.
- Dispersal stations for repatriated British prisoners of war and interned civilians.
- Embarkation camps for Dominions and prisoners of war awaiting repatriation.
- Dispersal hospitals.
- Storage accommodation for regimental equipment.
- Disembarkation camps for released British prisoners of war.
- Horse demobilization requirements.
- Collecting places, &c.

Command Inspectors of Fire Services were appointed at the various Command Headquarters, and the whole of the command areas were sub-divided into fire areas under superintendents.

Further courses for personnel at the Central School at Aldershot were arranged, both for Army Fire Services and for the Air Ministry.

The question of the proper measures for the prevention of fire in forage yards, rickyards and dumps was closely considered, and the necessary orders issued and embodied in the Manual.

The Fire Manual was re-written, and a new edition published.

On the signing of the Armistice, circular letters were sent to all Commands enjoining the strictest economy in all quarterming expenditure, and reduction of all quarterming services which could be dispensed with.

The return of prisoners of war immediately after the Armistice from all enemy countries caused a heavy strain in the necessary immediate clearance of barrack and hutted accommodation for the reception of military ex-prisoners and civilians who had been interned. Complete staffs to deal with the numbers arriving had to be arranged and accommodated, and the matter of the reception of the returning prisoners of war was complicated by their exit from Germany being from ports and frontiers leading to their collection in unexpected numbers at Copenhagen, Rotterdam, the Belgian and French frontiers and in Switzerland. They were ultimately collected and disposed of at Ripon (*via* Leith and Hull) and at Dover and Canterbury. After the first few days, the machinery worked satisfactorily, and repatriation rapidly continued. Before repatriation of prisoners was completed, demobilization centres were opened, and preliminary demobilization commenced. A heavy strain was put on the resources of the London district by the enormous number of officers and men visiting London on leave, chiefly from the troops of Overseas Dominions in France and the United Kingdom, and from the Fleet and Army of America. The loyal co-operation of the Y.M.C.A., Church Army, and Salvation Army enabled this difficulty to be successfully dealt with by the formation of hostels for men, whilst the housing of officers was materially assisted by the generous entertainment offered by many private individuals.

Subsequent to the Armistice, and in particular after the composition of the Armies of Occupation had been definitely settled by the War Cabinet, the contraction of military accommodation proceeded apace.

The policy adopted by the Directorate of Quartering was to surrender accommodation in the British Isles in the following order of priority :—

- (i.) Industrial buildings, *i.e.*, those essential to the re-establishment of the industries of the nation.
- (ii.) Educational establishments.
- (iii.) Poor Law and similar institutions.
- (iv.) Premises lent free by the owners or lessees to the War Department and whose return is urgently required by owners or lessees.
- (v.) Private dwellings held by agreement, or under Defence of the Realm Regulations.
- (vi.) Hutments on land held by agreement, or under Defence of the Realm Regulations.
- (vii.) Hutments on War Department land.

Special cases of proved hardship were dealt with on their merits and regardless of the above order of priority. Thousands of such cases were scrutinized, and after inquiry relief afforded in the majority of cases. The practice of sending a staff officer from the Directorate to inquire into difficult cases on the spot was found most advantageous. The procedure in these cases was for the staff officer detailed to preside over a small committee, assembled at the premises concerned. This committee consisted as a rule of representatives of the command, of the owners or lessees, and of any other government department concerned. By these means many difficulties were quickly brushed aside and much correspondence avoided.

The closing of hospital beds was taken in hand immediately after the declaration of the Armistice, and a total of 139,183 beds was closed. The total number of premises used as hospitals for military patients closed up to the end of March, 1919, was 1,090. These comprised War Department hospitals, Red Cross and V.A.D. hospitals. It was anticipated that early in 1919 the Ministry of Pensions would be in a position to take over the majority of the orthopaedic patients being cared for by the War Department. However, that Ministry did not find itself in a position to do so, and the War Department continued to carry on this work.

Considerable difficulty was experienced in finding accommodation for the vast number of mechanical transport vehicles in the country without interfering with the re-establishment of private industries. The owners of the various garages and industrial premises used for accommodation of mechanical transport vehicles naturally desired to restart their businesses. The urgent need for some large depôt, such as that at Slough, where such vehicles could be stored and dealt with, was made very obvious to the Directorate of Quartering.

During the first three months of 1919 the Quartering Directorate had to arrange for the accommodation of 14 cavalry regiments, 37 artillery brigades, 27 R.E. units, 74 infantry battalions, all regularly returning from expeditionary forces to be reformed for foreign service. Approximately the same number of units returning for Home Service also had to be arranged for.

In addition the storage of the mobilization equipment of 30 divisions was satisfactorily arranged.

The danger of a "hold-up" on the railways, or of the cross-Channel service having been lessened, it was found practicable to reduce the number of hostels reserved for leave officers and men passing through London as well as the emergency camps reserved for the same purpose in Kent.

Early in 1919 the War Department acted as the agents of the Disposals Board, Ministry of Munitions, in dealing with the disposal of surplus huts and hutting material. The policy adopted was to attempt to attract the small purchaser by calling for tenders for individual huts. After the end of February, 1919, the Disposals Board took over the work of disposing of these huts. By the end of March, 1919, approximately 3,000 huts, or their equivalent in hutting material, were disposed of or reported to the Ministry of Munitions as available for disposal. In the first place only isolated huts could be dispensed with, but latterly, as the military population decreased, it was found possible to dispense with certain large hutment camps, *e.g.*, Nigg, north of Cromarty Firth, Hursley Park, Winchester, &c.

At the beginning of the war the cubic space allowed for each man in hutments, barracks and billets was reduced from 600 to 400 cubic feet. This was restored to 600 cubic feet, and it is thought that the health of the troops has been improved thereby.

During the war the married quarters of permanent barracks were misappropriated to increase the accommodation for officers and men and Q.M.A.A.C. In the case of those barracks occupied by units enlisted on a voluntary basis, and having a fixed married establishment, such married quarters were reappropriated to their correct use. This ensured that warrant officers, non-commissioned officers and men married "on the strength" could be rejoined by their wives and families on the return of their units from abroad. Married quarters for units accommodated in hutment camps presented much difficulty.

Furniture rendered surplus by the reduction of hospitals was used to complete hutment camps occupied by units returning from abroad to the same scale approximately as permanent barracks, it being considered essential that such units should be made as comfortable as practicable and the success of voluntary enlistment thus assured.

The powers conferred by the Defence of the Realm Regulations were only exercised in a few isolated cases during the year 1919.

(ii.) SUPPLY.*

1. *Organization.*—In accordance with arrangements for mobilization, steps had been taken to meet first requirements of the Expeditionary Force and to establish certain reserves to maintain these requirements, also to feed the troops remaining in the United Kingdom.

When war broke out these arrangements were put into force. Supply depôts were established at various places in the United Kingdom, selected with a view to shipment for the forces abroad, for supplying troops quartered at home and for supplying troops engaged in active operations. Supplies to fill these depôts were obtained through the Director of Contracts at the War Office, so that there should be no question of competition between Commands. A fixed reserve was decided upon for each depôt and these reserves were completed within about one month of the outbreak of war.

The supply organization was devised so as to be sufficiently elastic to meet altered circumstances and to admit of immediate expansion should such be necessary. A test of the efficiency of the system was provided almost at once, in that as soon as the depôts in Northern France were evacuated it was possible by drawing upon home depôts at Liverpool and Avonmouth to establish reserves at Nantes and St. Nazaire without any delay whatever. Again at later periods as expeditions in other theatres of war were undertaken there was never the slightest check in allotting one or other of our home ports to maintain supply.

2. *Scale of rations.*—Under the regulations for mobilization a scale of rations had been fixed after elaborate experiment, and the scale finally arrived at was considered to be sufficient to keep the troops under active service conditions in a proper state of health. The scale applied to all troops whether at home or in France. It was soon found, however, that as regards troops at home some variation was necessary. It was, therefore, decided to introduce a ration allowance of $4\frac{1}{2}d.$ per man per day to take the place of part of the rations and to be spent under the directions of officers of units. The cash allowance was later increased to $5\frac{1}{2}d.$ and the ration in kind still further reduced. In April, 1918, a further revision of the ration scale was made, the cash allowance at the same time being raised to $6\frac{1}{2}d.$ In June of that year a scale of rations for soldiers under 19 years of age was introduced, supplemented by a daily cash allowance of $5\frac{1}{2}d.$

In February, 1919, both scales were again amended as regards the ration in kind, an all-round increase in the items of the ordinary ration and the addition of one ounce of bacon to the scale of soldiers under 19 being made. The cash allowance in each case remained unaltered.

The scale for field service in France remained unchanged for a considerable period, but as the world shortage increased and provision became more difficult, it became necessary to revise this scale, and in 1917, with the concurrence of the medical authorities, two scales were introduced, viz., one for troops at the front and another, a smaller ration, for General Headquarters and troops on the lines of communication. These two scales remained in force until after the Armistice, when, owing to the altered conditions and the fact that troops on the lines of communication were performing duties as arduous as those above railhead, one universal scale was adopted. This scale was also made applicable to the troops following the Army of Occupation in Germany.

In other theatres of war the original scale was altered from time to time to suit facilities of supply and climatic conditions.

Instructions were issued from time to time, as necessary, that units should underdraw any article which was in excess of their actual requirements, a considerable saving being thereby effected. These instructions and the resultant economies were applicable to all troops whether at home or abroad.

3. *Main articles of supply.*—(a.) *Meat.*—To facilitate collection, handling and storage, and to reduce expense, it was decided that the meat supply should be in the form of frozen meat; certain reserves of preserved meat being maintained to provide against a breakdown in supply and for issue should circumstances arise to make the use of frozen meat impracticable. Meat ships were at the outset permanently allotted to each of our base ports overseas for use as store ships, and the supply maintained by shipments from home. Subsequently in many places cold storage was erected.

* See also p. 578.

Supplies to meet initial requirements were obtained, partly by requisition and partly by purchase from stocks available in the country, and to assist in the purchase and inspection two highly qualified inspectors were engaged by the War Department. Towards the end of 1914 it was thought advisable to take steps to further safeguard the required supply of frozen meat, and with this object the principal American firms were approached by the Board of Trade on behalf of the War Office. Contracts were made by the Board of Trade for regular shipments of certain quantities of meat from the Plate at fixed prices; the Army undertook to take such of the meat as was found to be acceptable on delivery *ex store* in this country. This system was in force with certain modifications until the end of the war.

During the first few months of the war, when the numbers to be fed were comparatively small, the meat was shipped to England, inspected and re-shipped to France; early in 1915, however, as the strength of the Expeditionary Force increased, the extra work of double handling made it necessary to ship the meat direct from the Plate to the base ports in France, and inspection was made overseas instead of at home. Store ships at each port being still maintained.

Troops in other theatres, as well as our Allies, were eventually supplied under Board of Trade arrangements, by whom all available freight was taken up (through the Admiralty) and allotted to each country according to requirements. The whole of the output of meat from Australia and New Zealand was made available for the Army, in addition to all frozen meat from the Plate; only chilled meat and certain cattle meat and offal was left for civilian consumption. Supplies of frozen meat were also obtained from the United States, Canada, Brazil, Patagonia and South Africa.

A large increase in requirements, and the loss of some of the refrigerated ships, made economy in freight imperative, so that the holding up of ocean-going vessels as store ships was stopped. Regularity of supply was to some extent safeguarded by the establishment of cold stores at Boulogne and Havre, though the uncertainty of sailing, in spite of the cold storage, made a guarantee of uninterrupted supply almost impossible.

Apart from the reduction in the ration, a considerable economy in the consumption of meat at home was effected by the substitution of sausages, fish, rabbits and brawn. Sausage factories, entirely under War Office control, were established at London, Liverpool and Aldershot. One issue per week to troops at home was at first made, which was later on increased to two issues per week. Experimental shipments of frozen sausage and sausage meat were made to France with only partial success.

The monetary saving to the public as a result of manufacturing and issuing sausages to troops in lieu of meat was considerable. More important, however, was the large saving in meat at a time of great scarcity of the commodity throughout the country.

Cutting-up establishments were instituted under the direct management of the War Department at London and in Liverpool, so that, instead of local contracts for the provision of hospital meat, joints, &c., were cut up as required and sent direct in hampers from the above-named establishments to all hospitals in the United Kingdom. This scheme not only ensured the quality of the meat, but had the effect of a saving to the public of some 200,000*l.* a year.

Preserved meat.—Preserved meat was obtained under an arrangement made by the Director of Contracts from the packers in Canada, North America and Australia. Meat and vegetable rations manufactured in many establishments in England and pork and beans obtained from the United States and Canada supplemented the supply and varied the diet of preserved meat.

To ensure the quality of preserved meat manufactured abroad, two expert food inspectors, loaned to the War Department by the Local Government Board, were permanently employed in North and South America; two inspectors were also sent to Australia to examine and report upon the conditions under which the canning industry was conducted there, while at home the whole of the Local Government Board inspecting staff was at the disposal of the War Department for inspection of all articles of supply throughout manufacture.

(*b.*) *Bread.*—Field bakeries were established from the first at each of our base ports in France, and a regular supply of bread to the troops was always maintained. Similarly, in other theatres an almost uninterrupted supply of bread was made. At Helles the bakery was established on the Peninsula and maintained within some four miles of the Turks during the whole of the period of occupation.

The form of oven originally used in field bakeries was the Aldershot pattern, but early in 1915 steam ovens were introduced at each of the bakeries in France, effecting a saving of fuel and greatly facilitating the work of the bakers.

At home, owing to the lack of equipment and personnel, most of the bread was at first supplied under contract; gradually, however, War Department bakeries were established, so that, with a few exceptions, the troops in the United Kingdom were supplied from Army bakeries.

With a view to saving man-power and effecting financial economy, automatic machinery of the type supplied by Messrs. Baker and Sons, of Willesden, was introduced into the largest bakeries in France and the United Kingdom. Eventually the number of such bakeries in the United Kingdom grew to 22, each with an average daily output of 50,000 lb. bread. The advantage gained thereby is best illustrated by the fact that—

- (i.) The output of bread per man employed in hand bakeries prior to the introduction of the machine bakeries averaged 246 lb., as compared with an average output in the machine bakeries during 1918 of 731 lb.; this resulted in a saving in the United Kingdom alone of 3,000 tradesmen during the year 1918.
- (ii.) The cost of production decreased from 3s. 6d. per 100 lb. bread in hand bakeries to 1s. 2d. in the machine bakeries.
- (iii.) A close analysis of the cost of running War Department bakeries in the United Kingdom was made, and the result showed that, during the year 1918, a total saving of 381,060*l.* was effected as the direct result of the introduction of these automatic bakeries, combined, to a certain extent, with more efficient working in the hand bakeries.
- (iv.) The estimated total expenditure on the whole of the automatic bakeries installed in the United Kingdom amounts to less than 100,000*l.*, but putting it at that figure, it is apparent that the capital outlay was recovered every three to four months during the period they were in use.

In addition to this, a substantial figure was recovered when the plant was sold.

Consequent upon the introduction of the compulsory use of "straight run" flour, an experiment was made by the War Department in the milling of its own flour, and for this purpose a mill was taken over in London. The experiment, so far as it went, proved a success, but an urgent demand for the installation of a mill, with modern machinery, at Baghdad, in order to deal with the increased production of wheat in that country, intervened, and it was decided to close the mill and ship the machinery to Mesopotamia. This was done, and the machinery was in course of erection when the Armistice was signed.

When the bread ration in France was reduced from 1½ lb. to 1 lb., the medical authorities demanded an issue of 2 oz. rice daily and 2 oz. oatmeal three times a week. In due course of time it was ascertained, however, that the troops would not eat more than 1 oz. rice a day, and the latter scale for rice and 6 oz. oatmeal weekly was adopted.

(c.) *Bacon*.—Bacon was throughout the war very popular with the troops. The supply was obtained through a firm of brokers, and the excellent quality was consistently maintained.

(d.) *Cheese*.—Cheese formed part of the ration for troops in the field (except in very hot weather in certain theatres) from the beginning of the war. As, however, the demand increased, it was at various times difficult to maintain the supply, especially after the supply of Dutch cheese was cut off. It was later decided, with the consent of the medical authorities, to reduce the cheese ration from 3 oz. to 2 oz., troops actually in the trenches being given certain extras to make up for the loss of 1 oz. of cheese.

The cheese for the supply of the Army was arranged by the Board of Trade in much the same way as meat. They took over the whole of the supply from New Zealand, Australia and Canada, and gave the Army what it required, leaving the balance for the civil populace.

(e.) *Sugar*.—Despite the shortage of supply, it was for some time considered inadvisable to reduce the allowance to the troops in the field below 3 oz., but a slight saving in sugar was effected by the reduction of the jam ration from 4 oz. to 3 oz. Later, when the general scale of rations was revised, the allowance of sugar in France was amended to 2½ oz. for troops at the front and to 1 oz. for troops on the lines of communication, General Headquarters. At the same time, owing to partial failure of the fruit crop, the allowance of jam was reduced to 2 oz. for both scales of rations. This was subsequently again raised to 3 oz. in each case.

(f.) *Oats*.—Oats were originally supplied under arrangements made by the Director of Contracts with a firm of brokers, supplemented by an arrangement under which Canada undertook to ship certain quantities direct from Canada. Eventually our requirements, about 85,000 tons per month, were procured from Canada, United States, Central America and the Plate, of which only the Canadian supplies were bagged, the remaining shipments being in bulk. To cope with the bulk shipments, floating pneumatic suction plants were erected early in 1917 at each of the base ports in France, and it is estimated that the saving in freight and stowage, together with the increased speed in loading and discharge, amounted in money value to some 10,000*l.* per day.

A proposal was made early in the war by the Quaker Oats Company to provide a form of compressed oats made in cakes, consisting of a mixture of oats and molasses, to take the place of ordinary oats. Exhaustive trials were made, with the result that this form of forage was not altogether recommended. The importance of shipping brought the question under consideration at various times, and subsequently the Shipping Control Committee again urged the matter on the War Office. It was pointed out, however, that with the introduction of the pneumatic plants there would be no saving in shipping oats in compressed form (the cost of compressed oats being incidentally very high). The Quaker Oats Company persistently asserted that 9 lb. of their compressed oats was equivalent to 12 lb. of ordinary oats; this was not admitted by the Army Veterinary Authorities, and unless the point could be proved there did not appear to be any object in shipping this form of forage.

For forces in the Mediterranean, Mesopotamia and East Africa, grain was procured from the nearest theatre of supply, such as India and Egypt, arrangements being altered to meet the crops in the various countries in rotation. In 1918, owing to the failure of the Indian crop, it became necessary to import maize from South Africa and barley from Algiers until the Egyptian grain crop matured.

Towards the end of 1916 the War Office suggested that it might be possible to increase the production of oats in this country, and with this object an expert was appointed (with the approval of the Board of Agriculture) to inquire to what extent oats could be grown on War Department and other grass lands. It was found upon inquiry that there was not much War Department land available, but a number of contracts were made with farmers throughout the country to break up grass lands and to hand over the resulting crop to the War Department at a fixed price. Later, however, the President of the Board of Agriculture raised a doubt as to the advisability of ploughing grass lands, and as a result the whole scheme was dropped. Large quantities were bought in Ireland, however, and utilized for home consumption and to supplement shipments to France, and the subsequent requirements of the forces were met from United Kingdom production. For the North Russian forces a certain quantity of oats was procured from Siberia, but it was found necessary to supplement by occasional shipments from the United Kingdom.

(g.) *Hay*.—At the outbreak of war all our requirements in this commodity were obtained under contract, supplemented, as in the case of oats, by direct supplies from Canada.

Hay had necessarily to be shipped in compressed form, and the only pressing establishment under War Office control was the existing one at Woolwich, which was capable of pressing only limited quantities. Fortunately, for about the first six months of the war, nearly the whole of the requirements of the Expeditionary Force in France were obtainable by local purchase, so that the lack of pressing facilities in England were not at first acutely felt.

In September, 1914, the War Department were approached by the Board of Agriculture with a view to stimulating the production of farm produce at home, and an Organizing Committee was appointed by the Board of Trade with the object of facilitating the purchase of forage by the military authorities direct from the farmer. At about the same time a Forage Department was established and Advisory Committees were formed in each of the counties. The purchase and pressing of hay under the supervision of officers of the Forage Department was then commenced, and very shortly a large quantity of hay was forthcoming.

The Organizing Committee, having completed its work of bringing the War Department into direct touch with the farmers, was afterwards dissolved and another committee was appointed by the Army Council, with the Parliamentary Secretary of the Board of Trade as chairman, and farmers, dealers and consumers, representing various parts of the country, as members. Brigadier-General Morgan and a

representative of the War Office were also members of the Committee. The terms of reference of this Committee were as follows:—

“To keep in touch with and advise the Farm Produce County Committees on all questions arising in connection with the acquisition of farm produce for His Majesty's Forces, and on all matters relating to the constitution of the said Committee, and to the regulation of the scheme in general.

“To assist, deal with and advise on all matters relating to the purchase of farm produce for His Majesty's Forces that may be referred to them by the War Office either for consideration or execution.”

County Committees remained as before, as well as the Forage Reference Committees for Scotland and the Advisory Committees for Ireland.

The administrative and executive work in connection with the purchase and distribution of forage was carried out by the Forage Department, which had its headquarters in London, with area administrators in various parts of the country. Each area was divided into districts, and the purchasing was undertaken by district and assistant purchasing officers.

As difficulties in shipping increased, it became necessary to eliminate, as far as possible, all shipments of hay from abroad, and to increase the quantity shipped from this country. With this object, the whole of the crop of 1916, amounting to something over fourteen million tons, was taken possession of by the War Department. Rather more than one million tons of this total quantity were actually required by the Army, the remainder being released for use by the farmers themselves, and distribution to the public, each county forming a committee of representatives of farmers, dealers and consumers, with a central council in London, who allocated the supply as required. The 1917 and 1918 crops were also similarly controlled, but the control was lifted from the 1919 crop.

Only a small quantity of hay was imported into France from Algiers, the production of the United Kingdom being found to be sufficient.

In theatres, other than France, hay, or its equivalent, was obtained from India, Egypt and the south of France and Algiers.

With the hay press in use, it was found that the greatest density to which the hay could be brought would not give a better shipping measurement than 175 cubic feet to the ton. In 1916, a scheme for the establishment of hydraulic presses in various parts of the country was brought into operation by which the cube of the bales was reduced to 100 cubic feet per ton. By 1918, one hundred of these presses were working, and approximately $\frac{4}{5}$ ths (four-fifths) of the hay shipped was hydraulically pressed, giving a great saving in shipping. Presses were also erected in India, Egypt, Algiers and South France, and an agreement with the French entered into, by which we were allowed to export hay from South France to Salonica, and replace in kind to North France from England, resulting in further saving of tonnage.

(h.) *Potatoes*.—The Forage Committee met the requirements of the Expeditionary Force in France in potatoes as well as hay. For some months there was a difficulty in getting the full quantities. The Committee were, however, able to make such arrangements in Ireland and Jersey as to ensure the supply. Large quantities of potatoes were also obtained from Italy.

For Egypt and Salonica seeds were sent from home, and arrangements made for the cultivation of potatoes locally. By this means all local requirements were met.

(i.) *Fuel*.—In 1918 great difficulty was met in supplying the Army coal and coke requirements, and, in conjunction with the Coal Controller, reserves were cut down to 7 days in the United Kingdom. Experiments were carried out for the substitution of anthracite for bituminous coal, and it was found that a proportion of 60 per cent. anthracite and 40 per cent. bituminous coal gave ample satisfaction in closed stoves. The Coal Controller was able to place a fairly large supply of anthracite at the Army's disposal, which relieved the critical position. A peat fuel briquette factory was also converted for Army use to provide fuel to act as a substitute for charcoal for use as a trench fuel. All oversea requirements were shipped from the United Kingdom and, despite a great shortage due to lessened output from the mines, it was found possible to keep the supply normal.

(j.) *Grain and Flour*.—A general pool was formed early in 1918, both in France and at Salonica, by which grain and flour requirements for all the Allies were arranged by the War Office, the Allied forces drawing their quota as desired.

(k.) *Petrol*.—Supplies to meet first requirements were obtained by contracts under

the terms of which the War Department had a lien on the stocks of certain petroleum companies in the country. The requirements were, at first, only some 250,000 gallons a month.

The best form of pack for petrol was a matter for considerable discussion throughout the war. In the early months of the war, arrangement was made for lorries to be supplied with petrol packed in 50-gallon steel drums, while cars and light vehicles continued to be supplied with petrol in 2-gallon tins packed in wooden cases. In practice it was soon found that the weight of the drums made it difficult to deal with this form of pack, and it was then decided to pack petrol for all services in 2- or 4-gallon tins. The latter type of tin was thin, cheap and non-returnable, and, as such, had its advantages so long as petrol continued to be decanted in England and shipped to France.

The 2-gallon tin, on the other hand, was capable of being refilled several times. The exact wastage in the case of the 2-gallon tin was very difficult to determine. As nearly as available figures will show, 20 per cent. of these tins were either lost or rendered unusable on each round trip during the time petrol was decanted in England, and 15 per cent. when it was packed in France. Corresponding wastage of the wood cases was 10 per cent. and 7 per cent. respectively.

These figures cover the whole period of the war, excluding a short period during which the original specification petrol case was departed from at the urgent request of the Timber Control Department. Experience quickly showed that the adoption of a weaker form of petrol case was false economy as the wastage rose to between 40 per cent. and 50 per cent.

With slight modification the original specification, therefore, was reverted to.

Until the middle of 1916, all the petrol consumed by the Expeditionary Force in France was filled in England—the principal centre being Portishead, near Bristol—whence all shipments were made to the oversea bases.

With the increase of the forces in France the quantity of petrol consumed grew to an enormous extent; so that, by the autumn of 1918, instead of being 250,000 gallons, it stood at 10,500,000 gallons a month, or rather more than 40 times as much.

Early in 1916, consumption having then risen to over 2,000,000 gallons a month, it was evident that, if shipment from England in tins and cases was continued, the point would soon be reached at which requirements would exceed the landing facilities of the "petrol discharging" berths available at our base ports in France. In order to overcome this difficulty, and at the same time economize both freight and labour, arrangements were made to start filling installations in France and to arrange for a direct service of tank steamers from the U.S.A. to France.

For this purpose tank storage was acquired at Rouen and Calais and the necessary filling machines (also tin and case manufacturing plant) were transferred from Portishead to Rouen. The latter was the first installation to commence operating, filling started at Rouen in July, 1916, and at Calais six weeks later.

A complete 4-gallon filling and manufacturing plant happened to be available at Portishead—it was consequently transferred to Rouen to meet the immediate situation. Generally speaking, the 4-gallon tin is not a economical form of pack when the return of empty petrol packages is a practicable proposition as it was in France. Though not suitable for refilling with petrol these 4-gallon tins were used, to a certain extent, for refilling with paraffin oil. On the whole the 2-gallon tin was undoubtedly more satisfactory for use in France and for this reason the 4-gallon filling plant was the first section of the Rouen installation to be closed down when reduced demands rendered a reduction in output possible.

Tank storage.—It was soon found that the available tank storage at Calais (about 8,000 tons) was inadequate. By agreeing to supply all the local French requirements (civil and military) and the Belgian Army, based on Calais, we were able to obtain the use of an additional 10,000 tons of tank storage. This addition was out of all proportion greater than the increased liabilities incurred, and thereafter enabled the Ministry of Shipping to arrange for the maintenance of regular supplies in large tank vessels.

The Rouen and Calais installations from their commencement were constructed and organized in sections. As demands upon them increased, additional sections could be added, therefore, without difficulty. In this way these installations were expanded as consumption arose.

The shipment from England of filled M.T. petrol practically ceased from the autumn of 1916, except for the occasional replenishment of reserve stocks, diminished as the result of sudden and unexpected increases in consumption.

The filling of aviation spirit, requiring, as it did, special supervision, continued to be done at Portishead until, in the spring of 1918, consumption rose to such a figure as necessitated its being carried out in France, as in the case of M.T. petrol. Consequently an inspecting staff was appointed by the Aeronautical Inspection Department of the Air Ministry at both Rouen and Calais. From then onwards all petrol consumed in France (and Italy), whether M.T. or aviation, was filled and distributed from these installations, the monthly total eventually reaching the 10½ million gallons above referred to.

Bulk distribution.—Early in 1917, when the supply both of tinplate for petrol tins and timber for petrol cases threatened to become increasingly difficult, and when economy of rail haulage was becoming particularly urgent, arrangements were made for the distribution of a portion of the petrol consumed in France to be carried out in bulk, from the bases. During the summer of 1917, 180 railway tank wagons (capacity 3,000 gallons each) and 200 road tank lorries (capacity 600 gallons each), were sent over to France. This method of distribution was applied only to certain of the larger petrol consuming units. The contents of the railway tank wagons were pumped into the road tank lorries at railheads and conveyed by the latter vehicles to unit headquarters. Experience showed, however, that direct filtration from the road tank lorries into the consumption tanks of M.T. vehicles was really practicable. Consequently the units concerned were supplied with specially strong and durable 2-gallon tins, and these were refilled from the tank lorries, under arrangements made by the units.

By this system of "bulk distribution" considerable economy in rail haulage, timber and tinplate was effected.

Aviation petrol for the Independent Air Force.—The formation of the Independent Air Force, with its large bombing machines, requiring 300 gallons per aeroplane tank, necessitated special arrangements for petrol distribution to the southern aerodromes. The "Shell" Marketing Company, acting as agents of the War Department, set up inland tank storage, both at the aerodromes and at the nearest points on the railway. These installations included overhead filling tanks, fitted with piping and leads, from which the aeroplane tanks could be rapidly filled by gravity. The petrol was pumped into these tanks from larger storage tanks on the ground. The latter were replenished from still larger storage tanks, installed at the railway sidings, the petrol being conveyed either by pumping through underground pipelines or by means of road tank lorries, according to the nature of the ground and the distance. The tanks at the railway sidings were in turn refilled by railway tank wagons, despatched from Rouen in complete trains of 30 wagons.

In carrying all the above complicated and technical arrangements into effect the War Department received valuable advice and assistance from Mr. Waley Cohen, the Managing Director of the Asiatic Petroleum Company, and the engineers in his firm. Mr. Waley Cohen was appointed, in 1917, Petroleum Adviser to the War Office.

Source of supply.—Down to 1917 all the petrol consumed by the armies in France and the forces at home was obtained by means of contracts with the principal distributing firms in the United Kingdom. The supply to France was obtained under contracts with the Asiatic Petroleum Company, amounting ultimately to 2,000,000 gallons of M.T. and 600,000 gallons of aviation petrol per month—any balance required being obtained by direct purchase in the U.S.A. In the autumn of 1917 the Government assumed the control of all imports of petrol, and from then onwards it was bought and shipped under arrangements made between the War Office, Ministry of Shipping and the American Purchasing Board. These arrangements led to a general re-routing of tank steamers, which was adopted by the Allied Governments in order to economize tank tonnage. One of the results of this re-routing, so far as we were concerned, was that American aviation spirit had to be adopted in lieu of eastern spirit. This change was eventually agreed to by the Air Ministry, and the American spirit began to come into use early in 1918.

Petrol for Egypt and Salonica was obtained under contract with the Asiatic Petroleum Company; the spirit was shipped from the East, canned at Suez and distributed in cans and cases *via* Alexandria and Salonica. The quantities consumed in the Mediterranean amounted to some 2,000,000 gallons a month.

For Mesopotamia, petrol was obtained from the Persian Oil Company, and for East Africa from the Asiatic Petroleum Company.

Home requirements.—The Government having thus undertaken its own purchasing necessitated a change in the distribution system at home. In place of "contract

supply," contracts were made with the principal distributing companies for the provision of covering for and the distribution of Government-owned spirit. Supply was obtained as required from any of the Contractors' Agencies in the United Kingdom in exchange for a special form of voucher. Under this system it was not necessary for the War Department to hold any material stocks of petrol inland because in all towns of any importance agencies existed at which reasonable supplies could always be relied upon.

This method of supply proved both an economical and elastic one for meeting the varying home requirements throughout the war.

4. *Supply Depôts.*—As mentioned in paragraph 1, depôts were established on the outbreak of war in various parts of the country. The supply to troops was maintained continuously from these depôts. It was always realized that the feeding of the troops was the first consideration. Economy in working was, of course, also considered. At first regular officers were necessarily placed in command, but as temporary officers gained experience it was found possible gradually to replace the regular officers by men of known business capacity. Each depôt eventually had a business man at the head and junior officers with a thorough knowledge of railway work, shipping, labour, accounting, &c., so that the whole of the work was carried out, as far as possible, on business lines. As a further safeguard to the method under which our home depôts were worked, the services of an officer with experience in some of the largest London stores were utilized in an advisory capacity. He visited each depôt in turn and advised the Director of Supplies and Transport at the War Office as to any possible improvement. At the reserve depôt at Deptford, which was the most important of the home depôts, it was necessary to retain a regular officer in command. There were, however, business men at the head of each department into which the depôt was divided, so that the commanding officer had expert advice always at his disposal.

Considerable saving in labour was obtained in the introduction of gravity rollers, elevators and piling machines, &c., where such could be usefully and economically employed.

5. *Packing.*—The shortage of shipping affected this question as well as others. The necessity for reducing imports largely restricted the importation of timber, and it became necessary to consider in what way the packing of the various commodities could be altered to avoid or reduce the use of wood. A Committee sat at the Reserve Supply Depôt at Deptford early in 1917 to inquire into the matter and, with the advice of experts in the trade, recommended that for many commodities cases should be lightened, and for some, substitutes should be used to take the place of wood packing. During the first 6 months of 1917 the supply of tin plate began to run short. Arrangements were at once made to pack certain supplies, *e.g.*, jam in *papier maché* containers instead of tin. Trials were also made with paper packing for biscuits, but this proved a failure, as the biscuits soon deteriorated. The lightening of cases, of course, reduced the strength; it has not been found possible to obtain sufficiently accurate data to judge how far these lighter cases stood the tough handling in the field.

6. *Mesopotamia.*—In August, 1916, it was decided that supply and transport, as well as other services in this theatre of war, should be undertaken by the War Office.

Selected Army Service Corps officers were therefore sent to Mesopotamia to take over control from the officers of the Indian Supply and Transport Corps. Supplies continued to be taken in the first instance from India by the War Office, who became responsible for the service and undertook to meet any requirements which India could not supply.

Further to safeguard supplies, two senior Army Service Corps officers were sent to India to watch the War Department's interests in that country, and to keep the War Office informed on all questions of stocks, forward arrangements, shipping and other details connected with direct supply from India.

The necessity for utilizing local resources to the utmost extent was always impressed upon officers in Mesopotamia, and from reports received it is shown that considerable quantities of supply were obtained by this method.

7. *Mediterranean Expeditionary Force.*—When the Dardanelles expedition started arrangements were at once made for shipping supplies from home. A supply depôt was established at Alexandria and an intermediate depôt at Mudros, and as a footing was made on the Peninsular supply depôts under the different corps were formed at the beaches. Reserves were established at each stage; the base at Alexandria being maintained from home and from local resources in Egypt, and the supplies were pushed

forward to Mudros and the Peninsular under the direction of Director of Supplies and Transport.

When the Salonica expedition commenced it was thought necessary, in order to relieve the War Office to a certain extent, to establish a supply base in Egypt. Egypt, Salonica and the Dardanelles were to demand on this base, and not as heretofore on the War Office; the base would only deal with the War Office. This arrangement was in force for some months. When, however, the Dardanelles were evacuated and the Headquarters of the Mediterranean Expeditionary Force moved to Egypt, it was thought that such a base was unnecessary; Salonica was made independent and the base as such abolished.

Subsequently, supplies for Salonica were demanded through Egypt to supply what was available and request the War Office to make up the balance by direct shipment.

The supply of hay and grain, both for Egypt and Salonica, were met to a large extent by shipments from India, as being the place of production nearest the theatre of operations.

It was decided to close the base at Salonica and to establish a base in Egypt under the General Officer Commanding, Egypt. This base maintained 30 days' reserves for General Milne's force. The question of supplies for Serbians, Greeks and Italians was also a matter for consideration. The French were responsible for the supply of the Greeks in South Russia, but equivalent quantities of supplies were handed over by us at Salonica to the French.

8. *North Russia*.—A universal scale of rations was adopted for both Allied and local troops in Murmansk and Archangel.

Supplies were shipped to Archangel in the summer of 1918 to feed the troops until the end of June. The port re-opened early in that month, and arrangements were made for further supplies. A small consignment of medical comforts and other urgent demands was despatched on the "War Down," which was taken into Archangel by an ice breaker, and was discharged.

At Murmansk continuous shipments of supplies were made in accordance with demands. An ample reserve according to feeding strengths was held.

Civilians at Archangel were fed until the end of June on a scale suggested by General Poole.

Large quantities of Army supplies were advanced to the Foreign Office for the purpose of feeding civilians at Murmansk.

At a Conference held at the Foreign Office, Mr. Sheldon of the American Embassy, was given the monthly food-stuffs required from January onwards. Mr. Sheldon undertook to discuss the situation with Mr. Hoover in Paris, with a view to these demands being met. In part satisfaction of these demands, a shipment of flour, rice, tea and sugar arrived in the United Kingdom from America for transshipment to Murmansk, and a further consignment was sent later. The civilian population was provided for up to the end of June.

9. *Vladivostock*.—One or two individual reports were received from men of the Middlesex Regiment as to the inadequacy of the ration. This was taken up by cable with the General Officer Commanding, who reported that there was absolutely no foundation for these complaints.

The Canadian military authorities were asked to continue to make arrangements for the maintenance of the British troops in this theatre after all Canadian troops had been withdrawn. The number of British troops was estimated not to exceed 3,000 men.

10. *Italy*.—The supply of the British Force in Italy was made mainly by rail from French bases, the quantities thus sent being replaced by shipment from England. Certain items, such as flour, grain and preserved meat were provided by direct shipment to Genoa. The frozen meat supply was arranged through the Italian Government, the quantities thus provided being replaced in kind under arrangements made by the Board of Trade.

11. *Army of the Rhine*.—In the initial stages the Army of the Rhine was supplied from France. At the same time a supply dépôt at Cologne was built up by bulk despatches from French bases and by direct shipment from England through Rotterdam, the object being to make the Rhine Army self-supporting at as early a date as possible. A supply dépôt at Antwerp, under the direct administration of the General Officer Commanding-in-Chief, was also formed and a nine days' reserve collected at that port.

A cold store existed at Cologne, and from this frozen meat was shipped from England to Antwerp and thence railed to Cologne.

12. *General remarks.*—From a very early period of the war, strenuous efforts were made to economise resources and this applies, not only to the question of expenditure in money, but also to tonnage and the actual supply resources of the Empire. The intention had always been, firstly, to ensure that sufficient supplies should be forthcoming for the maintenance of our armies at the right place and at the right time, but subject to this, the conservation of resources, whilst at the same time assuring sufficiency for the troops, was never lost sight of. This involved careful watching of markets and production generally, not only in the United Kingdom, but also in all countries accessible to us.

To give a few examples, it may be stated that in the early summer of 1915, the War Office realized that the meat resources of the world would in course of time become more restricted. Steps were therefore taken to cut down consumption by the Army forthwith by one-fifth, an issue of milk being substituted for the portion of the meat issue so reduced. This, apart from the immediate annual saving of 1,250,000*l.*, effected a considerable saving of the nation's meat resources, whilst at the same time improving the ration of the soldier by an issue of milk.

Not long afterwards it was ascertained from the Ministry of Blockade that it was desirable to restrict the export of fish from Norway to Germany. Arrangements were at once made to draw upon the sardine supply of Norway, sardines being substituted for a small portion of the meat ration, again with the effect of improving the ration by affording variation in the diet, whilst at the same time, not only conserving our own meat supply, but also restricting that of the enemy.

Further savings in the meat supply were also effected by varying the contents of the meat and vegetable ration by reducing the meat portion and increasing the vegetable portion without affecting the dietary value of the ration. This alone meant a saving of some 7,000 tons of meat annually. The conservation of our meat supply by the substitution of sausages, fish, rabbits and brawn has already been mentioned.

What was done in the case of meat was also done in the case of other supplies, wherever and whenever possible. For example, in the summer of 1916 it was thought that in the early part of 1917 there might be a shortage of potatoes in the United Kingdom. Efforts were at once made to enable the Expeditionary Forces in the Mediterranean to grow their own supply of potatoes, and this, after overcoming certain difficulties in connection with export permits, was successfully accomplished by means of shipping seed potatoes to these countries from Italy.

The necessity for saving tonnage was obvious for a very long time, and early efforts were therefore made to procure supplies in countries as near as possible to the theatres of operations where consumption took place. General Officers Commanding the various Expeditionary Forces were urged to encourage local cultivation and to increase local resources as much as possible. Thus, in Mesopotamia large tracts were put under cultivation for the production of grain, fresh vegetables and fruits, and local dairies also established. Similar action was taken at Salonica and in Egypt, and the General Officer Commanding-in-Chief entered into close relations with the Ministry of Agriculture and other important Government departments, with a view to reaping the fullest advantage of all resources at our disposal in Egypt.

In France the creation in 1916 of the Supplies Purchase Department, with its headquarters in Paris, achieved a very remarkable success. Started originally with a view to exploiting the local resources of France, the department rapidly expanded, branches being established in Spain, Italy, Portugal, Algeria, Bouches du Rhone and Orne.

The operations of the department resulted in the purchase of large quantities of supplies of all kinds, among which may be cited hay and straw, dried fruits, onions, brandy, champagne, pigeon food, chemicals of various kinds and linseed cake. These purchases were primarily intended for the requirements of the Army in France, but other theatres, *e.g.*, Salonica and Italy also benefited by the activities of the department.

Appendix I. gives a comparison between the strength of the forces fed prior to the war, and the numbers being fed on 11th November, 1918. It may safely be asserted that eventually nothing was shipped from the United Kingdom to the distant theatres of operations which could by any possible means be obtained locally, or from sources in which the food supply of the United Kingdom was not dependent.

After the conclusion of the Armistice, adequate supply arrangements were made for feeding the returning/repatriated prisoners of war. Army rations were placed on

board all vessels employed on this service. Arrangements were also made for the provision of food on arrival at the ports of disembarkation and for the train journey to the reception camps; further, a special ration was drawn up to enable an exceptionally good meal to be provided on arrival at the reception camps. These arrangements applied equally to officers and men. Adequate staffs were sent both to Rotterdam and Copenhagen for dealing with the rations sent to those ports.

Rations on practically the same basis as those supplied to British prisoners of war were supplied at Rotterdam and Copenhagen for the French prisoners of war, the French authorities sending their own staff to deal with the supplies.

Supply arrangements were made to feed men demobilized from overseas and units at home. At first numerous problems arose in connection with this service, but these gradually disappeared as the demobilization scheme was more fully developed.

Subsequent to the signing of the Armistice steps were taken to scrutinize all existing supply contracts with a view to avoiding the creation of unnecessary reserves of perishable supplies. This scrutiny was most searching, but the variations and changes in the rate of demobilization made any accurate forecast extremely difficult.

Large surplus supplies of many articles of the ration, such as biscuits, preserved meat, meat and vegetables, and pork and beans, &c., were reported to the Disposal Board of the Ministry of Munitions for disposal, as, owing to the troops objecting to eat them under peace conditions, the usual procedure of gradually consuming these surplus stocks could not be pursued. These and many other articles of supply, the stocks of which had accumulated under war conditions, were brought to the notice of the Government departments concerned, with a view to their disposal for the relief of Allied and enemy territories or by sale. In this manner, considerable quantities of surplus supplies were disposed of. A list of surplus supplies was circulated weekly after March, 1919, to the Surplus Government Property Disposal Board, Ministry of Food, and through the latter to the Supreme Economic Council in Paris, and every endeavour to dispose of surplus supplies to the best advantage was taken.

(iii.) MECHANICAL TRANSPORT.*

Provision and disposal of vehicles.—The outstanding feature of mechanical transport was its phenomenal growth, as shown in Appendix II.

Only some 80 mechanical transport vehicles were actually owned by the war department at the outbreak of hostilities, and in order to provide for the very large number of vehicles which would be required on mobilization, two subsidy schemes had been originated during peace, the first known as the provisional subsidy scheme and the second as the main subsidy scheme.

The main subsidy scheme had as its object the standardization of a lorry for military purposes, the vehicle at the same time being suitable for civilian use. Designs were drawn up and certain civilian manufacturers arranged to build and sell these vehicles as one of their ordinary types. This scheme naturally took some considerable time to produce anything like the numbers that would be required, so in order to fill up the gap between the initiation of the scheme, the provisional scheme was introduced, which took the form of a register of all mechanical transport vehicles in the country. A small subsidy fee was paid to all owners of vehicles who agreed to allow their vehicles to be taken on the outbreak of war, and arrangements were made under the subsidy scheme for periodical inspections of these vehicles to be carried out.

On the outbreak of hostilities, all subsidized vehicles were immediately called in and the balance which were traceable by the subsidy scheme register were impressed, the machinery and personnel of the subsidy scheme being employed for this purpose. The vehicles required for the Expeditionary Force were obtained within 9 days of the outbreak of hostilities.

In order to meet the demand for mechanical transport for the new armies, steps were at once taken to control and increase the output of the vehicle manufacturers in this country. Makers were restricted to one or two definite types and the country was divided into areas, in which resident inspectors maintained liaison between various manufacturers and so hastened production.

Originally the weekly output of suitable vehicles amounted to about 90. By July, 1915, the weekly output had increased to 250 and by October, 1915, the production had increased sufficiently to allow for the release of vehicles to Government contractors to assist them in their work and to relieve the railways. These released vehicles formed a valuable reserve which could be called up again when required. About 1,000 of these vehicles were so released by the 31st December, 1915.

In the summer of 1916, in order to meet an abnormal demand from overseas, 400 of the above vehicles were impressed. More were required and could have been withdrawn, but it was realised that too large a withdrawal would interfere with the production of munitions.

In addition to the output from the manufacturers at home, contracts were placed in America for large numbers of vehicles, but in 1916, for financial reasons, pressure was brought to bear to cancel the American contracts. The inadvisability thereof was pointed out, but the advantages were considered to outweigh the disadvantages and for the time being the American contracts were cancelled. However, in 1916, it was found absolutely necessary to re-open these contracts to the extent of some 70 lorries per week.

Contracts for Holt caterpillar tractors and four-wheeled-drive lorries which had been placed in America were not cancelled, as similar machines were not produced in this country. Attempts were made in 1916 to manufacture these tractors in this country but the numbers produced were small and were not employed in the British Army owing to the lack of interchangeability of the parts.

As time went on it was found that others were cutting into the field of mechanical transport production owing to the increased requirements for aero engines, tanks, &c., and overlapping was found to be taking place between the Mechanical Transport Directorate and the Ministry of Munitions. The result was that the whole of the provision of mechanical transport vehicles was handed over to the Ministry, the personnel of the Transport Directorate dealing with this work, going over to the Ministry.

The War Office continued to be responsible for the allocation of the mechanical transport to the Army, Air Force and all other Government departments, the Ministry of Munitions being responsible for the provision on periodical bulk demands forwarded to them by the War Office. This procedure continued throughout, but at no time did supply meet demand.

* See also p. 593.

As demobilization came into operation and the armies decreased in size, a considerable amount of mechanical transport vehicles and stores became surplus to Army requirements. The arrangement for the disposal of these surpluses was undertaken by the Ministry of Munitions, who appointed representatives in all theatres for this purpose.

Reception of vehicles.—Soon after the despatch of the original Expeditionary Force a vehicle reception dépôt was established at Aldershot. The accommodation there soon became insufficient and the reception dépôt was moved to the L.G.O.C. garage at Camberwell. This in turn became inadequate and vehicles had to be parked on public highways, which was unsuitable for many reasons.

Search was then made for a suitable site, and the considerations governing the choice of the site were, that it should be close to London (in order to save time and petrol in despatching vehicles to and from the body builders); it should be near the personnel reception dépôt, which was at Grove Park; it also had to be near a main line of railway and main road for easy access to the mobilization and embarkation dépôts.

It was also essential that the vehicles should be enclosed in a ring fence in order that the numbers required for guarding might be cut down to the lowest possible minimum. It was desirable too, that, as far as possible, covered accommodation should be provided for the vehicles.

Large numbers of sites were viewed, and the majority of them were found to be lacking in most, if not all, of the requirements above mentioned. It was ascertained that covered accommodation for such a large number of vehicles could not be obtained, and it was, therefore, decided to take over Kempton Park Racecourse, which of all the sites inspected, fulfilled the greatest number of the foregoing conditions. This choice was justified, and the dépôt worked successfully throughout. So far as labour and material was available, covered accommodation was provided for as many vehicles as possible.

Mobilization.—To carry out the mobilization of all mechanical transport units, a mobilization dépôt was established on Salisbury Plain at Bulford. All vehicles personnel and stores were collected at this dépôt, formed into units and dispatched from there to the various embarkation dépôts.

The growth of this dépôt was very rapid, and early in 1916 it was reorganized and re-named "the Mobilization and Embarkation Area," and the various staffs of mechanical transport personnel at the embarkation ports, and the Caterpillar Workshop and Training School at Avonmouth were incorporated in it.

Personnel.—Previous to the outbreak of war, in connection with the subsidy scheme, a reserve of mechanical transport personnel had been formed, and wherever possible the driver of a subsidized vehicle was enrolled in this reserve, with the result that when the vehicle was called up on mobilization the original driver came with it. This scheme worked very successfully and sufficient personnel was forthcoming to meet the requirements of the Expeditionary Force.

Mechanical transport personnel which was originally enlisted under the voluntary system was paid at the rate of 6s. per day. This rate was only paid to skilled drivers and mechanics who passed a high test. Later on a lower rate was introduced for less skilled men, and when conscription came into force the 6s. rate was dropped.

The supply of skilled men soon fell far below the demand. It was therefore found necessary to set up training schools for both drivers and artificers. The main school for drivers training was established at Osterley Park, Hounslow, and the artificers schools at Aldershot, Grove Park and Birkenhead. These schools continued in operation, and large numbers were trained not only to meet the increasing demands of the mechanical transport service, but also to replace large numbers of mechanical transport men of high category from time to time transferred to the fighting arms.

In order to economise in man power, experiments were made in the employment of women to replace men on the lighter types of Army vehicles. These experiments were found to be successful, and large numbers of women were taken on and were enrolled in the motor driving section of the Womens' Legion.

As time went on and the supply of skilled women drivers grew too small to meet requirements, a special training school was established for instructing women drivers, and this was incorporated in the mens' school at Osterley Park.

The general man-power shortage led from time to time to a large number of mechanical transport men being transferred to the fighting arms and in all some 30,000 were transferred. This led to a very considerable dilution in mechanical transport personnel, which was reflected in increased casualties amongst the vehicles

and consequent strain on repairing facilities, together with a certain amount of disorganization through sickness amongst the low category men, as it was not realized that lorry driving in the forward areas imposed considerable mental and physical strain. Nevertheless, by judicious dilution, high category men were reserved for the forward areas and the low category men for the lines of communication, bases and work in the United Kingdom.

Demobilization.—Before demobilization took place it was realized that mechanical transport men would not be able to be released at the same rate as the fighting arms, as so much transport would be required for salvage work and to carry on the machinery of demobilization generally. Arrangements were, therefore, made that the demobilization of mechanical transport men should be carried out concurrently with that of other arms on a percentage basis.

Later on, however, owing to misrepresentations of the situation on the part of the Press, it was decided for a time to demobilize mechanical transport personnel at the same rate as other arms. The effect of this was that establishments of mechanical transport organizations were so reduced that the work could not be carried on in spite of the fact that large numbers of civilians were taken on to try and make good the shortage. The rate of demobilization was, therefore, slowed down, but still continued on a considerable scale and great difficulty was encountered in meeting the transport requirements.

Native personnel.—During the war, in order to save man power, wherever possible great attention was paid to the employment of natives. Special schools were set up in all theatres both for native drivers and artificers. The result, so far as economy in man power was concerned, was excellent; but from a purely mechanical transport point of view, there is no doubt that the native is not as efficient as the white man for the work, and vehicles suffered considerably and repairs were not so efficiently carried out.

Stores.—In 1914 the Mechanical Transport spare part organization was set up at Aldershot. The accommodation there soon became insufficient, and the stores were transferred to Shorts Gardens, London. This organization rapidly grew until no less than six sub-depôts were formed in London, and known as the Home Mechanical Transport Depôt, with its headquarters in the Holborn Restaurant. This organization developed into the largest stores of its kind in the world, and issued stores not only for the Mechanical Transport vehicles in the army, but also for the Royal Air Force and all other government departments.

The Home Mechanical Transport Depôt provided the demands from all overseas bases, but, owing to the shortage of supplies due to priority given to aircraft and tank programmes and the losses of stores through the enemy submarine activity, the greatest difficulties were encountered in meeting the demands. The loss of the majority of the stores at the Base Mechanical Transport Depôt, Calais, in August, 1918, due to fire, had a severe effect on the supplies to all theatres, as a re-allotment of consignments had to be made, in addition to depleting the stocks at home. It was only possible to maintain the Mechanical Transport vehicles with a sufficient supply of spares in the various theatres by very careful distribution from the main stocks at Home Mechanical Transport Depôt.

Repairs.—A central repair organization was originally set up at the London General Omnibus Company Garage, Camberwell, and various sub-depôts were taken over from time to time as the work increased. However, in August, 1917, it was found absolutely necessary to obtain a larger workshop, and this was set up at Longhedge Works, Battersea.

However, at that time it was fully realized that much larger premises would be required, and that a central stores and repair organization was badly needed. No suitable premises could be found, and it was therefore decided to build, and a site of some 700 acres was obtained at Slough, and plans for the establishment were drawn up.

For various reasons there was considerable delay in getting the work of construction pushed through as speedily as was necessary, and its delay had far-reaching effects, one of the most important being that vehicles requiring repair or for disposal as no longer being required for the Army, which were returned from overseas in large numbers, had to be accommodated at Kempton instead of being sent to Slough, where proper provision had been made in the scheme for their storage. It was fully realized that Kempton was not altogether a suitable place for storing this vast quantity of vehicles, as very little hard standing ground or covered accommodation was available. By means of a careful drainage scheme, and the removal and storage of all parts that would be depreciated by damp, all possible precautions were taken to prevent them

deteriorating while standing in the open. Unfortunately, however, in December, 1918, pressure was brought to bear for Kempton Park to be evacuated in order that racing might be resumed. It was pointed out at the time that the movement of these vehicles at a time when the ground was in a very wet condition was undesirable, but in spite of this it was decided that the evacuation must be proceeded with with all possible speed.

As was anticipated, the ground was very badly cut up and the drainage system destroyed, with the result that the vehicles became bogged and considerable damage was done in extricating them. Further, this evacuation took place at a time when demobilization had so reduced the personnel of mechanical transport that there were not sufficient skilled men left to do the work, with the result that semi-skilled men had to be employed, all of which tended to impede the work and damage the vehicles. However, these difficulties were eventually overcome, and vehicles were evacuated to Slough in large numbers, where good standing ground had been constructed.

General notes on mechanical transport.—Up to the time of the Armistice and on the 15th March, 1919, the total numbers of vehicles and personnel employed were as follows:—

	On 11th Nov., 1918.	On 15th March, 1919.
Personnel	173,570	125,021
4 wheeled vehicles	85,138	86,029
Motor cycles	34,711	35,805

No radical change in the organization of mechanical transport was found necessary during the period under review, but considerable detailed improvements were adopted, such as the limitation of the numbers of types of vehicles employed, elimination of unserviceable and out-of-date types, the improvement of existing designs and the creation of new types of vehicles for special purposes.

In 1918 a bureau of technical intelligence was formed to collect and classify all technical data on the working of mechanical transport under war conditions. It is considered that the experience gained during the war in the design and running of the various types of mechanical vehicles will be of immense value not only to the war department but to manufacturers generally.

Mechanical transport vocabulary.—In the early days great difficulty was experienced by units in demanding accessories and consumable stores, as it was never quite clear whether demands should be made on mechanical transport, Royal Army Service Corps, supplies or ordnance. To meet this difficulty steps were taken to publish a mechanical transport vocabulary of accessories and stores, and this was duly brought out in the middle of 1918. This had the result of putting the whole matter on a satisfactory footing, the number of items stocked was considerably reduced, and, as every item was given a part number, the demanding and issuing of miscellaneous mechanical transport stores was greatly simplified.

Road Transport Board.—In February, 1918, the Road Transport Board was formed to co-ordinate all civilian transport in the United Kingdom. An officer of the War Office Transport Directorate was nominated a member. Subsequently consideration was given to the transfer of the functions of this Board to the Ministry of Ways and Communications.

Mechanical Transport Board.—This Board was formed in 1917 and consisted of four military members and four civilians, under the chairmanship of the Quartermaster-General.

It met frequently and its counsels on matters of policy were invaluable. Three sub-committees were formed, each with a member of the Board as chairman, dealing respectively with:—

- (a.) Technical matters.
- (b.) Lands and buildings.
- (c.) General administration, efficiency and economy of working of mechanical transport.

Administration.—Owing to the enormous growth of mechanical transport during the period under review, it was found that in January, 1918, the then present administrative staff was totally inadequate to deal with the work and in January, 1918,

on the recommendation of the Mechanical Transport Board, the staff was considerably augmented. Subsequent to the Armistice, however, certain reductions took place and further reductions were made as the work decreased.

Throughout the war the War Office was called upon to provide a large amount of transport for other than military services, examples of which are as follows :—

Ministry of Munitions.
Post Office.
Office of Works.

Road Board.
Railways.

After the Armistice, however, steps were taken to reduce the amount of non-military transport, and arrangements were come to for the other Government departments to take over the Army vehicles and employ civilians.

In addition to the above-mentioned services, at a time when the food situation in this country was critical, the War Office undertook the work of receiving large numbers of agricultural tractors, which were sent from America in parts, and reconstructed them and trained personnel to drive them. A company was formed at Liverpool for the purpose, and large numbers of tractors with trained crews were despatched all over the country to assist the Board of Agriculture in their work of increasing the food supply of the country. The work done by this company was invaluable and was carried on for about a year, at the end of which time the whole of this service was handed over to the Board of Agriculture.

The following are the outstanding features of the working of mechanical transport in the various theatres :—

France.—The experience gained in the working of mechanical transport in this theatre led to a certain reorganization of units in December, 1917, the most important of which was that the Divisional Supply Columns and Ammunition Sub-Parks were abolished, and a new organization known as a Divisional Mechanical Transport Company took their place. This brought about a considerable saving in both vehicles and personnel and has worked very satisfactorily.

During the March offensive the fifth repair shop had to be evacuated, and the third repair shop had to be moved from St. Omer. This necessarily seriously affected the mechanical transport repair organization and the output of repaired vehicles was considerably reduced at a time when the wastage in mechanical transport was exceptionally high. However, this deficiency was made good by the despatch of a large number of vehicles from home reserves and no breakdown occurred.

Throughout the war one of the greatest difficulties which had to be met was the inability to obtain a sufficient supply of new and repaired vehicles to enable a stock to be held at home to meet sudden emergencies of the above nature. As previously mentioned, the supply of new vehicles never completely met the demand and the necessity for an increased output of repaired vehicles to supply the deficiency was one of the strongest arguments in favour of the large central repair organization at Slough, which had been so strongly advocated.

The operations up to the time of the Armistice put a very heavy strain on mechanical transport and reduced the reserve in this country to a dangerously low figure, and undoubtedly, if operations had continued on the same scale, great difficulty would have been experienced in maintaining the mechanical transport services. This difficulty was foreseen and every effort was made to increase the output of existing repair shops and to press on with the completion of the Slough shop.

The reduction of the armies overseas, however, altered the situation considerably, and it was decided that Slough should be used partly to maintain the vehicles in the Army of Occupation and also to recondition for sale all the vehicles no longer required by the War Department.

The tendency to substitute mechanical transport for horse transport has been more and more marked throughout the period under review, and experiments in the transportation of field guns and machine-gun battalions by mechanical transport have been made. This change was about to take place just prior to the signing of the Armistice, but it was ultimately decided to proceed no further with this alteration.

Just prior to the Armistice the question of provision of a large number of cross country tractors for use in the special operations in the spring of 1919 was under consideration. For some time prior to this the mechanical transport experimental section had produced various types of tractors, and comparative tests were about to be carried out between these and tractors of a similar nature built in America. Owing to the

cessation of hostilities it was decided not to proceed further with this project, but the experiments are still being continued with the view to producing a type of tractor which would be suitable for this special work.

Italy.—When the operations in Italy first commenced, a large amount of mechanical transport was sent overland from France, but owing to the wear and tear caused by the overland journey and to the fact that the particular conditions of road in Italy were not suitable for the heavy type of vehicle used in France, arrangements were made for the purchase of Italian mechanical transport vehicles, particularly Fiat lorries and cars. This saved considerable delay and loss which would have occurred if the vehicles had been sent from home, and, in addition, a type of vehicle more suitable for the mountainous country than those built in England was secured for the British forces.

The heavy vehicles originally sent from France were gradually withdrawn and replaced by the above-mentioned lighter type. This of course necessitated a certain amount of re-organization in the existing companies and a slight increase in personnel, which, however, was found to be justified, as the wear and tear on both vehicles and roads was found to be much less than with the heavier type.

The mechanical transport in Italy subsequent to the Armistice was gradually closed down, and a large number of the vehicles were transferred to Salonica and other theatres.

Eastern theatres.—The outstanding feature of the mechanical transport in Eastern theatres was the way that it was worked successfully under conditions which were thought impossible in pre-war days. The absence of roads, long distances travelled, and climatic conditions generally, made the successful employment of mechanical transport a very difficult problem. However, these difficulties were overcome, and much valuable experience was gained in the working of self-propelled vehicles in tropical and undeveloped countries.

Mechanical transport was used in many ways other than in the supply of food and ammunition and the haulage of guns. Lorries were adapted to work on rails, Ford cars were used as light armoured cars, and in various other ways mechanical transport contributed greatly to the success of the operations.

(iv.) HORSE TRANSPORT.*

Personnel, horse transport and supply units to 19th March, 1919.—As in the case of the mechanical transport the expansion of the horse transport and supply services was immediate and far-reaching. With the growth of the Army, the Royal Army Service Corps was called upon to supply personnel for services outside the scope of their ordinary activities. Horse transport drivers were provided as 1st Line transport drivers for various units. Clerks were supplied for the headquarters of formations, such as armies, corps, &c., and for headquarters of Commands at home.

Whereas at the outbreak of war the total strength of the Royal Army Service Corps comprised 450 officers and 9,976 other ranks, on the date of the Armistice the strength had increased to 11,564 officers and 314,824 other ranks. Demobilization reduced these figures to 8,704 officers and 201,313 other ranks at 19th March, 1919.

It must be remembered that the formation of a large number of additional divisions not only entailed the mobilization of numerous horse transport, mechanical transport and supply units, but that arrangements had rapidly to be made to deal with the supply and transport arrangements for the large number of troops under training in this country.

Officers.—The mobilization of the Special Reserve, Royal Army Service Corps and the re-calling to the active list of retired officers of the Royal Army Service Corps was totally inadequate for the fulfilment of the large demand for officers, and therefore, on the outbreak of war, immediate steps were taken to grant a considerable number of "direct" temporary commissions to gentlemen whose experience in civil life fitted them for work in either horse transport, mechanical transport or supply branches.

These officers were given a short course at Aldershot (horse transport and supply), Park Royal, Blackheath or Woolwich (horse transport), and at Grove Park (mechanical transport), and then sent overseas, either as reinforcements to relieve Regular officers who were sent home to form new units or to assist in the training of recruits, or else on the staff of new units being despatched from this country.

This scheme worked well in the early days, when the material from which to select was readily forthcoming. But later, when the difficult period was tided over, officer Cadet companies were formed, at Aldershot for horse transport and supply and at Grove Park for mechanical transport. At the time of the Armistice some 4,170 Cadets had been granted commissions.

These Cadet companies were subsequently closed down.

During the early part of the War it was not found possible to spare many Royal Army Service Corps officers to go to fighting arms, but as the war progressed, arrangements were made to allow such young Royal Army Service Corps officers who volunteered and could be spared to transfer to fighting branches.

This system obtained until May, 1917, when, on a proposal put forward by the Quartermaster-General, all such officers of the Royal Army Service Corps horse transport and supply serving in France and at home who were born after the 1st May, 1887, and who could be spared without impairing the efficiency of the Service were compulsorily attached to fighting arms for the period of the War. The proposal was approved by the Army Council. Later this system was extended to the other fronts and to some extent to the mechanical transport branch. It resulted in the provision of 1,225 young officers for fighting arms.

At this period it was decided to consider no candidates for a commission in the Royal Army Service Corps under the age of 35, though exceptions were made in the case of those certified as medically unfit for fighting arms, and of those who possessed highly technical qualifications for mounted transport duties.

Labour.—To provide the necessary labour at the ports of disembarkation a large number of labourers were specially enlisted into the Royal Army Service Corps, and thirty-eight Royal Army Service Corps Labour Companies were formed, with an approximate strength of 19,000. The majority of these companies worked in France.

With two exceptions, consisting of naval labourers subsequently transferred to the Royal Marines, all these companies were transferred *en bloc* to the Labour Corps in August, 1917.

Territorial Force, Royal Army Service Corps.—In September, 1916, the whole of the Territorial Force, Royal Army Service Corps, was merged into the Regular Royal Army Service Corps, thus facilitating the repostings and redistributions of personnel in the corps as a whole.

* See also p. 181.

Horse transport personnel.—All mobilization arrangements had been based on an establishment for an expeditionary force of six divisions, which, to mention the more important units only, meant the provision of—

- 6 divisional trains.
- 6 reserve parks.

Subsequently the following units were formed :—

- 72 divisional trains.
- 36 auxiliary horse transport companies.
- 28 local service companies.
- 23 reserve parks.

The reserve parks in most cases lost their identity and became auxiliary horse transport companies or local service companies. The mobilization of these units and the provision of trained personnel to complete them and reinforce them in the field necessitated the provision of large horse transport depôts. These were originally No. 1 and No. 2 Reserve Horse Transport Depôts at Deptford and Islington respectively. They were moved in February, 1915, to Park Royal and Blackheath. No. 2 Depôt Company, Woolwich, and No. 3 Depôt Company, Bradford, became in due course Nos. 3 and 4 Reserve Horse Transport Depôts, dealing with smaller numbers of recruits but on similar lines to Nos. 1 and 2. The strengths of these Reserve Depôts remained very high throughout the war, as, owing to the policy of transferring fit men to the infantry and cavalry, training was being carried out continuously until the Armistice to enable the provision of drafts of the lower categorized men for substitution purposes. The category "A" men were assembled in the depôts moreover for purposes of transfer.

After the Armistice, it was decided to reduce Nos. 1 and 2 Depôts as speedily as possible. Shortage of retainable personnel, combined with a certain restlessness which became apparent among the troops in the depôts rendered it inadvisable to continue training, and on 2nd January, 1919, Expeditionary Forces were notified that no reinforcements would be dispatched from this country. Training was later resumed in the training establishments at Woolwich, Aldershot and Bradford. Park Royal was disbanded, while Blackheath was maintained mainly for the reception of cadres from overseas and the mobilization of such units as might be required from time to time. No. 1 Depôt Company for service at Aldershot and No. 1151 H.T. Company, R.A.S.C., for duty at the Supply Reserve Depôt, Deptford, were formed there. The strength of No. 2 Reserve Horse Transport Depôt at 19th March, 1919, was 39 officers and 532 other ranks.

Supply personnel.—As regards supply personnel "K" Company, Aldershot, carried out the functions of mobilization and training for supply units and drafts; but the large increase in the numbers of men required necessitated its removal to Bath where it was reorganized and enlarged and its nomenclature changed to the reserve supply personnel depôt. After a short sojourn in Bath, the unit was moved to Prees Heath and finally to Hastings where it was finally disbanded. Sufficient personnel was taken from it to re-constitute "A" supply company, Aldershot, which will act in future as a training and reception depôt for all supply personnel at home.

The following will give some idea of the expansion of the supply branch of the Royal Army Service Corps.

The units formed on mobilization were :—

- 6 field butcheries.
- 6 field bakeries.
- 8 railway supply detachments.
- 30 depôt units for supply (5 per division).

The field butcheries and bakeries were later reorganized to economize personnel on a basis of 1 per 3 divisions and the depôt units of supply (so far as the main theatres of war were concerned) were absorbed into lines of communication supply companies at 1 per 3 divisions.

There were in existence at the date of the Armistice :—

- 20 field butcheries.
- 31 field bakeries.
- 37 lines of communication supply companies.

Railhead supply detachments took the place of railway supply detachments, for the purpose of controlling the issue of supplies off rail, at the railhead.

Of these 71 were in existence on the 11th November, 1918.

Difficulties arose later in the administration of the supply personnel in commands at home. Supply companies were therefore formed in each command to hold on their strength all the supply personnel in the command, not already borne on the establishment of a Royal Army Service Corps unit. "C" supply company was at the time working on these lines at Aldershot.

Central bakeries largely superseded field bakeries and resulted in a great saving of personnel.

Economy in personnel.—The increasing importance of economy in man power resulted in a series of steps being taken to relieve men of higher medical categories for the fighting arms and to substitute them in the Royal Army Service Corps where possible by men of lower categories, women and natives.

In November, 1916, it was decided that a start should be made by the substitution in this country of all Royal Army Service Corps privates and drivers of Category "A," who were not technically skilled tradesmen, by "B" and "C" men; the "A" men thus relieved being transferred to the infantry, artillery and machine gun corps.

This was of necessity a slow process, as on the one hand it was important not to cause serious dislocation in the administrative services by the sudden withdrawal of large numbers of trained men, while on the other hand no withdrawals could take place until "B" and "C" recruits to replace them became available and had been trained.

However, on the date of the Armistice, other ranks, to the number of 82,638, had been so transferred to fighting arms. Other steps to this end were taken as follows :—

- (a.) It was insisted that all home supply depôts should employ not less than 75 per cent. women clerks.
- (b.) All increases of clerks at Command Headquarters and in the Royal Army Service Corps administrative offices were filled, whenever possible, by civilians over age or by women.

In France, "A" men in the lines of communication and where possible in field units were "combed out." The arrival of eight Cape Boy Auxiliary Horse Companies from South Africa released approximately 2,300 men.

Wherever possible at the bases, men were replaced by women.

In Egypt, all Royal Army Service Corps horse transport establishments were organized on a basis of 50 per cent. native strength.

In Salonica a considerable number of Macedonians, Cypriotes and Maltese are employed in divisional trains and field ambulances.

Large drafts of low category men were sent out to France and Egypt during 1918 for substitution purposes, resulting in the release of 6,220 category "A" men for fighting arms.

Reduction of units.—Over and above those units whose disbandment has been mentioned above, the following units were disbanded between the date of the Armistice and 19th March, 1919 :—

The Command Dépôt, Royal Army Service Corps.
540th Company, Dublin.
69th Railhead Supply Detachment.

Personnel from 4 divisional trains, 7 mixed brigade trains and 3 local auxiliary horse transport companies attached to Territorial Force Reserve Brigades were formed into 10 horse transport companies for duty with reserve infantry brigades, and the disappearance of the parent units was undertaken later.

Overseas, the following units had been disbanded at the date in question :—

22nd Divisional Train, Salonica.
361st (21st Auxiliary) Horse Transport Company, Salonica.
854th Auxiliary Park Transport Company, 28th Divisional Train, Salonica.
855th Auxiliary Park Transport Company, 28th Divisional Train, Salonica.
856th Auxiliary Park Transport Company, 28th Divisional Train, Salonica.
20th Field Bakery, Constantinople.
163rd Horse Transport Company, Constantinople.
799th Horse Transport Company, Constantinople.

(v.) REMOUNTS.*

The immediate problem contemplated before the outbreak of war was to mobilize horses within some 10 days for the whole of the Expeditionary Force and the whole of the Territorial Force, and further to provide three months' supply in order to replace casualties in reserve units behind the armies. This demanded a total number of 165,000 horses, whereas the peace establishment was 25,000, with a horse reserve (subsidized and registered) of 25,000. The remainder of the horses required, approximately 115,000, were obtained by impressment under a decentralized scheme which had been elaborated during the preceding two years. Further arrangements existed for immediately despatching a Remount Commission to North America to provide for the maintenance of horses in the Armies during the war; similar arrangements for purchase existed in the United Kingdom.

The establishment of horses was raised from 25,000 to 165,000 in 12 days. Immediately, however, the policy of raising new armies was decided on, an increase of the horse purchasing arrangements, both overseas and in the United Kingdom, became necessary. The horse purchasing Commission in Canada and United States was largely increased. Arrangements were made to purchase mules in Spain and in the United States; while the Indian Government was asked to undertake horse purchasing on our behalf as well as their own in Australia, and purchasers from England were sent out to augment those available from India.

By these means 467,973 horses were purchased in the United Kingdom, and 617,935 horses and mules were imported from Canada and the United States of America; 28,000 horses were brought to Egypt and France as remounts for the Imperial Government from Australia and New Zealand. An attempt was made early in the war to purchase mules in Spain, but only 3,000 were obtained, and subsequently purchase in that country was found to be impossible. 700 mules were bought in Portugal. South America was drawn on for 6,819 horses and cobs, and 1,630 mules were sent from there to East Africa.

The number of horses and mules landed in the United Kingdom up to and including 2nd December, 1918, was as follows:—

				Horses.	Mules.	Total.
Canada and United States of America	411,206	206,729	617,935
South America, Argentine and Uruguay	6,148	..	6,148
India	331	..	331
Spain	2,889	2,889
Total	417,685	209,618	627,303

On the 30th November, 1918, there were 791,696 animals in the Army, of which 735,409 were horses and mules; the distribution is shown in Appendix III.

The supply of horses and mules for India and Mesopotamia was arranged for by the Indian Government, as far as possible by purchase in India, Australia and China, respectively.

The number of mules to be obtained in China and India was limited, and had to be supplemented from South America, and all arrangements for the purchase of the latter as also for the shipment to India of the animals from these various countries were made by the War Office direct with the Ministry of Shipping.

As a great majority of the animals came from the Southern Hemisphere they required a considerable time in India for acclimatization. As shipment was impossible during the summer months, India had, therefore, to estimate her requirements nearly two years in advance.

529,564 horses and mules were cast and sold, died, destroyed and missing in all theatres. The percentages of wastage are shown in Appendix IV.

* See also p. 396.

The number of horses and mules in the Army at different dates were as follows :—

On mobilization	25,000
On completion of mobilization	165,000
On 31st December, 1915	660,000
On 31st December, 1916	797,174
On 31st December, 1917	809,248
On 30th November, 1918	735,409

(On 30th November, 1918, there were also 56,287 camels, bullocks and donkeys in the various theatres.)

When the bulk of the Australian and New Zealand contingents were transferred to Europe, the Imperial Government undertook the supply of horses and, in January, 1915, the supply of the Canadian contingents was similarly taken over. In March, 1916, the supply of animals for the Belgian Army was also undertaken.

Some 18,000 animals were supplied to American divisions in France.

When the Food Production Department of the Board of Agriculture was inaugurated, they required a number of horses for work on the land. The organization of the Remount Department was placed at their disposal with the result that 6,792 horses were purchased for them, and 3,200 Army horses, no longer suitable for military purposes, were transferred.

Further, arrangements were made for the loan to the department of draught horses to be conditioned by them at their prisoners of war ploughing camps. These horses were returned to the remount depôts when fit and replaced by others.

Extensive depôt accommodation was necessary for the reception and conditioning of animals imported into and purchased in the United Kingdom. In August, 1914, remount depôts held 1,695 animals; on 31st October, 1917, there were 47,371, and 31,667 on 30th November, 1918. Military depôts were from time to time augmented by local civilian organizations employing labour which was ineligible for enlistment. The increasing competition of better paid employments made these civilian depôts difficult to maintain. The strength in military personnel of the Remount Department on 1st August, 1914, was 351 officers and other ranks; on 30th November, 1918, it consisted of 18,766 officers and other ranks.

Owing to the necessity of releasing from remount squadrons at home all personnel fit for more active service, and their replacement by men of low category, inferior physique, and generally without previous knowledge of horses, the work of training and conditioning horses and maintaining the rate of output became one of increasing difficulty. The turnover of men was continuous during the last 2 years of the war; during the 6 months, 1st January to 30th June, 1918, 2,534 of all ranks were transferred to other units, and 816 were released for coal mining, shipbuilding, &c., i.e., the personnel was changed at the rate of some 40 per cent. per annum.

Soon after the signing of the Armistice the sale of surplus animals commenced under arrangements made for demobilization. All animals were divided under a veterinary classification as follows :—

- (a.) 5 to 8 years of age.
- (b.) 8 to 12 years of age.
- (c.) Over 12 years of age.
- (d.) For destruction;

and the *c* and *d* class animals were disposed of first.

Repatriation of animals from France commenced on 9th January, 1919, and by 15th March the number of animals reported as disposed of in all theatres was 225,812, for a total of 7,639,560*l*.

(vi.) VETERINARY SERVICES.*

The establishment of the pre-war Army Veterinary Corps was too small to provide trained personnel for cadres of all veterinary units required on mobilization.

The number of officers required for the Expeditionary Force on mobilization was 192; only 109 were available.

The deficiency was made up, after considerable delay and difficulty, by engaging civilian veterinary surgeons and giving them temporary commissions: while home requirements were met to some extent by employing veterinary surgeons locally at civilian rates of pay.

By dint of constant advertisement, appeals both through professional organizations and individually to every eligible veterinary surgeon in the United Kingdom, by the assistance of the Colonies in sending home suitable graduates in response to our requests, and by means of the Military Service Acts, it was ultimately found possible on a minimum basis to meet all demands for veterinary officers required to complete the establishments of Expeditionary Forces, India and Home Commands.

Early in 1918 the distribution of officers was very carefully reviewed, and many changes were carried out in order to economize personnel and increase professional efficiency. By this redistribution it was possible to increase considerably the number of officers in India, Mesopotamia and the Sudan, without adding to the existing officer cadre of the corps. At the same time the number of civil veterinary practitioners employed in the United Kingdom and Ireland was greatly reduced.

In July of 1918, the supply of young graduates from the British schools was practically exhausted, but there were still a certain number of veterinary practitioners who might be made available for military duty. In order to deal with these a Veterinary Tribunal was formed in September, 1918, and had only begun to function, when the Armistice was declared. During the short duration of its activity the Tribunal was able to place a few practitioners at the disposal of the Military authorities, and there can be no doubt that had it been formed earlier in the war the difficulty in obtaining suitable candidates for Commissions in the Royal Army Veterinary Corps might have been greatly lessened.

The systematic training, both technical and military, of young officers was carefully reorganized. On 11th November, 1918, there were serving as officers of the Royal Army Veterinary Corps, 1,100 Civil Veterinary Practitioners holding Territorial Force, Special Reserve, or Temporary Commissions. On the 15th March, 1919, about 130 of these had been demobilized, disembodied, or gazetted out, and steps had been taken to release the majority of the remainder who were anxious to return to civil life.

The number demobilized would have been greater, but for the circumstances that sales of animals in Army areas in France were all carried out through veterinary evacuating stations and mobile veterinary sections, necessitating the maintenance of these units at full strength long after they had ceased to be required for dealing with sick and wounded animals. Similarly, veterinary hospitals, although they only had few patients, were carrying out sales and holding a good many animals awaiting sale; all of which delayed their break-up and meant holding officers.

The number of warrant and non-commissioned officers and men available on mobilization was 322; the number serving on 11th November, 1918, was 26,146.

During the war the policy of transferring to combatant arms all available non-commissioned officers and men of suitable age and medically fit was rigorously carried out. The position was reviewed monthly and no case was overlooked.

These transfers threw a considerable strain on reserve veterinary hospitals at home, which had to train men in replacement amounting to nearly 50 per cent. of their establishment. This work of training proceeded in conjunction with the normal work of veterinary hospitals, where no extra establishment was allowed for training purposes.

Between 11th November, 1918, and 15th March, 1919, nearly 7,000 men were demobilized or discharged.

The maximum number of patients under treatment at one time in veterinary hospitals and convalescent depôts at home and overseas during the war reached 90,000. This figure fell considerably before hostilities ceased and on 11th November, 1918, it was under 60,000, including about 3,000 camels. On 15th March, 1919, only about 22,500 animals remained under treatment. This reduction in the number of sick

* See also p. 187.

enabled corresponding reductions to be made in the Royal Army Veterinary Corps personnel employed in veterinary hospitals and convalescent horse depôts.

At the outbreak of war the following Royal Army Veterinary Corps units were formed and proceeded overseas with the original Expeditionary Force :—

Veterinary sections for 250 patients each	8
Mobile veterinary sections...	14
Base depôt of veterinary stores	1

These were expanded in size, varied in form, and increased in number, until they reached the following totals spread over all theatres of active operations :—

Veterinary hospitals for 2,000 patients each	18
Veterinary hospitals for 1,250 patients each	10
Camel hospitals for 1,250 patients each	4
Veterinary convalescent depôts for 1,200 patients each	5
Veterinary evacuating stations	16
Mobile veterinary sections	80
Field veterinary detachments	2
Base depôts of veterinary stores	6
Veterinary field bacteriological laboratories	4

In addition the following veterinary units were provided from India :—

Indian field veterinary sections for 250 patients each	15
Indian veterinary convalescent d-pôt for 800 patients	1
Indian veterinary convalescent depôt for 400 patients	1
Indian mobile veterinary sections	15
Indian base depôt of veterinary stores	1
Indian field veterinary detachments	3

It will be seen that an entirely new unit termed a Veterinary Evacuating Station appeared during the war. One of these units was allotted to each corps headquarters in France and Italy. It received sick and wounded animals from the mobile veterinary sections, attended to them more carefully than could formerly be done, and undertook their evacuation and care *en route* to veterinary hospitals. These veterinary evacuating stations greatly facilitated the evacuation of sick animals and saved animal wastage and suffering.

The value of the assistance rendered by the Royal Society for the Prevention of Cruelty to Animals was very considerable. In 1914, the Society released its inspectors in order that they might enlist in the Royal Army Veterinary Corps (where most of them proved valuable as non-commissioned officers), and in addition did much to obtain suitable recruits for the corps by canvassing, and by the judicious selection of likely volunteers. The Society purchased and supplied in large quantities the material for buildings and horse tents for the purposes of veterinary hospitals with the British Expeditionary Force in France; also a number of horse ambulances, both motor and horse drawn. Other important gifts were: several complete sets of engines and machinery for chaff cutting and corn crushing in veterinary hospitals; installations for horse-carcase economiser plants; electrically-driven apparatus for clipping and grooming; the purchase of the necessary equipment for the Central Veterinary Research Laboratory at Aldershot. The total money expended in these gifts amounted to 150,000*l*.

As the number of animals increased with the expansion of the various Expeditionary Forces, the demand for farriers far exceeded the number available from the civil trade, and necessitated large numbers being trained. This training was carried out by the Royal Army Veterinary Corps, who were able to keep the army supplied with farriers and shoeing-smiths during the war. For this purpose four Army Schools of Farriery were established, one in France and three at home. At the height of their activity in 1916-1917, these schools had as many as 1,200 men of all arms in training at one time.

A reform gradually introduced by the aid of the School of Farriery, and now solidly established, was the abolition of the insufficiently trained "cold shoer" and his replacement by a competent shoeing smith.

There was no breakdown in the arrangements for the supply of veterinary equipment and medicines to meet all the requirements of the war, although at times

the difficulties were very serious. During the war the equipment was modified, and those improvements in medical and surgical science which are applicable to the lower animals were as far as possible introduced.

During 1918 an exhaustive examination was made of the whole system under which veterinary stores were issued and expended, and considerable economy was effected. This saving was brought about chiefly by insisting upon the utilization to the full of existing supplies before issuing fresh material, and by substituting drugs of proved value for many expensive preparations of doubtful utility.

The centre of all this work was the Army Veterinary Stores at Woolwich, which, owing to the foresight shown when they were originally built in 1908, were capable of expansion to meet the constantly increasing demands for veterinary equipment.

In 1915 the Army Veterinary Service undertook the manufacture and supply of mallein required for military purposes, and up to 15th March 2,624,776 doses were issued. Before 1915 all mallein was purchased from civil sources at more than six times the cost of its production under the above arrangements. After deducting all cost of manufacture, including pay of personnel, the saving is estimated at more than 28,000*l*.

The health of the animals at home and in all theatres was maintained throughout at a higher standard than in any former War. This standard showed a steady improvement in the later stages of the War, with the result that after the demobilization of animals began, there was no check, on account of disease, in the disposal of surplus animals.

The decrease in contagious disease, that became so marked in the middle of 1918, continued. Glanders and mange, the principle scourges of animals in former campaigns, were kept under control. The loss from glanders was negligible, and the ascendancy in control of mange is best illustrated by the fact that the percentage of animals affected or isolated under suspicion in France and the United Kingdom declined from about 3 per cent. in March, 1918, to under 1 per cent. in March, 1919.

The average annual mortality from disease and injuries of all animals of British Forces at Home and with the Expeditionary Forces was less than 14 per cent. for the whole period under review.

The prevention of equine pneumonia, a cause of heavy wastage among newly purchased animals, was placed on a greatly improved basis with a proportionate reduction of mortality.

A large amount of research was carried out during the War, and in order to co-ordinate this work and provide for its continuance there was established in 1918 the Central Veterinary Research Laboratory at Aldershot, which proved the greatest value in investigating animal diseases and dietetics.

Although due credit must be given to the part played by scientific research in the successful veterinary work during the war, nevertheless the low mortality and high standard of health of the animals was largely the result of the constant training in animal management fostered by all ranks of the Army Veterinary Services, and constant representations on all matters connected with health and disease. This is the basis of veterinary preventive medicine, and is the most important of the many duties of the Veterinary Service with an army, either in peace or war.

The mortality figures of the British Remount Commission in Canada and America which, during the earlier stages of its operations, compared unfavourably with results obtained elsewhere, showed a marked improvement during 1918-19, as the result of a thorough re-organization with more effective veterinary control of the arrangements, and the adoption of more scientific methods.

The average mortality from all causes in horse and mule freight ships and transports conveying animals on ocean routes was under 1 per cent. for the whole war; this is a very remarkable record, and may fairly be attributed to the adequate measures taken by the Army Veterinary Service to ensure the health of the animals when shipped and their care on board ship. To illustrate the perfection to which arrangements were brought it may suffice to mention that out of 196 ships which carried animals from Canada and America to England during 1918, 76 completed the voyage without losing a single animal.

An important economic development of the work of the Army Veterinary Service during the war was the organization of arrangements for the disposal of army horses and mules under the following headings:—

- (1.) Sale of animals for work in France.
- (2.) Sale of animals to horse butchers in France and Italy for slaughter under proper inspection for purposes of human food.

- (3.) Slaughter of animals for human food by Royal Army Veterinary Corps personnel in France and the United Kingdom.
- (4.) Conservation of fats and the manufacture, by means of special apparatus, of fertilizers and animal foods from the carcasses of those animals which were unfit for human food. Under this heading also are included arrangements for salving and sale of horse hides.

By means of the foregoing arrangements during the three years 1915-1918 many millions of pounds sterling were saved to the State, largely in actual cash, and partly by providing food and munitions of War, which otherwise would have had to be bought, and in many instances would not have been obtainable.

The following figures relate to animal-disposal work carried out by the Army Veterinary Service from 11th November, 1918, to 15th March, 1919, and are suggestive of the effect of these arrangements on demobilization generally:—

- (a.) Thirty-five thousand animals were disposed of for purposes of human food, either by sale or issue to prisoners of war, representing a financial return of approximately 780,270*l.*, i.e., an average of 22*l.* per animal. This monetary saving does not represent the real value of the work which was carried out when there was a world-shortage of animal food.
- (b.) By-products from animal carcasses to the value of over 35,000*l.* were sold.

The decrease in contagious diseases, and the consequent saving of animals to the State, is another important factor. The loss from disease was not negligible, and the arrangements for disposal of animals were of great importance in the control of disease. The loss from disease was not negligible, and the arrangements for disposal of animals were of great importance in the control of disease.

The average annual mortality from disease was about 1 per cent. of the animals in the Army Veterinary Service, and with the arrangements for disposal of animals the loss from disease was not negligible, and the arrangements for disposal of animals were of great importance in the control of disease.

A large amount of research was carried out during the War, and it was found that the arrangements for disposal of animals were of great importance in the control of disease.

Although the work of the Army Veterinary Service was of great importance in the control of disease, the arrangements for disposal of animals were of great importance in the control of disease.

The arrangements for disposal of animals were of great importance in the control of disease, and the arrangements for disposal of animals were of great importance in the control of disease.

The arrangements for disposal of animals were of great importance in the control of disease, and the arrangements for disposal of animals were of great importance in the control of disease.

An important economic development of the work of the Army Veterinary Service during the war was the organization of arrangements for the disposal of army horses, and under the following headings:—

- (1.) Sale of animals for work in France.
- (2.) Sale of animals to home districts in France and Italy for slaughter under proper inspection for purposes of human food.

(vii.) EQUIPMENT AND ORDNANCE.*

The duties of the Royal Army Ordnance Corps embrace the storage, issue, maintenance and repair of practically all war material other than food, forage and medical stores. These duties involved the maintenance of numerous depôts, workshops and other technical establishments both at home and in the field, and the employment of large numbers of men (and women) with special qualifications.

As with other branches of the Service, there was a considerable expansion of the personnel of the corps, which rose from a peace strength of 248 officers and 2,273 other ranks to 2,253 officers and 38,193 other ranks at the time the Armistice was signed.

Immediately after the outbreak of war steps were taken to procure and train officers and men for the more technical branches, while the other branches were augmented by the appointment of officers from the retired lists of both the Army and Indian Ordnance Department, and of civilians whose previous professional or commercial experience was considered likely to fit them for the duties in which they were to be trained. It must, however, be remembered that, with the exception of the retired officers, the new staff was wholly inexperienced in the duties of the Department—inspectors of ordnance machinery, armourer-serjeants and armament artificers, being skilled grades for which special technical qualifications are necessary, were especially difficult to obtain.

The carrying on of the work of the corps both at home and in the various theatres of war was not rendered any easier by the continual surrender of large numbers of its male employees, both military and civilian. In the case of the former, the clerks and storemen amongst the Royal Army Ordnance Corps were continuously "combed out," and "A" men under the rank of serjeant transferred to the fighting line, in exchange for men of lower medical categories. The general body of Corps tradesmen was not, from the nature of the employment, so adversely affected.

As regards civilian employees at home, all the eligible men who were not, after very careful scrutiny, adjudged indispensable were given up for military service.

The losses in numbers of both soldiers and male civilians were to a large extent made good by the employment of women.

Thus, in France, the places of some 700 soldier clerks and others were taken by members of the Q.M.A.A.C., and in practically all cases the results were most successful.

In the storehouses and workshops at the bases were to be found some 4,000 women and girls drawn from the local population.

In a similar manner the civilian establishments of the depôts and other organizations at Home had a quota of women allotted to them, and this was increased until it stood at 50 per cent. of the total. In this way the Corps was employing about 1,500 clerks and 15,000 in the storehouses and workshops.

The foregoing remarks show the steps taken to provide the personnel required by the Corps to enable it to carry out the functions allotted to it during hostilities. But while the signing of the Armistice brought an immediate relaxation in the efforts of the fighting troops, no such lightening of their labours accrued to the Royal Army Ordnance Corps. The process of demobilizing the armies in the various theatres, while producing a change in its character, did not lessen, but rather increased, the volume of the work to be performed. When it is realized that a very large percentage of the ranks of the Corps consisted of men of low medical category, and seeing that comparatively large numbers of even these men were among the first to be demobilized, the strain on the resources of the Royal Army Ordnance Corps can be appreciated.

As far as the work at home was concerned, the difficulty was met by the widely extended employment of civilian labour, largely drawn from the ranks of demobilized soldiers. Little or no such relief could be looked for in the Expeditionary Forces, with the result that the dispersal of releasable Royal Army Ordnance Corps serving therein was delayed. No efforts were spared to provide non-releasable men to take their places, but the resources of the Royal Army Ordnance Corps in this respect were by no means commensurate with the demands made upon it, namely, on account of the aforesaid low medical standard to which the corps as a whole had been reduced.

The same causes which occasioned the expansion of the personnel necessitated a very large increase in the accommodation occupied by the department for storage, inspection and other purposes.

* See also p. 195.

For equipment and general stores large warehouses were hired or built at or near various docks and railway centres, and, in particular, a very large dépôt was constructed at Didcot for handling general stores and equipment. All the existing ordnance dépôts throughout the kingdom were enlarged and new dépôts were constructed at or in the vicinity of the new hatted encampments. The national filling factories of the Ministry of Munitions at Georgetown, Aintree and Chilwick were taken over to form the Central Ordnance Dépôts for reception of guns, vehicles and general stores from theatres of war and from commercial premises and docks at home, and these dépôts were rapidly filled.

Arrangements were made to take over all ammunition from the productive factories of the Ministry of Munitions, and ordnance dépôts were formed at each factory. Ammunition was, by this means, taken over by the Army immediately it was ready; its storage or distribution, as necessary, being carried out by this department. The original agreement by which the Ministry engaged to hand over ammunition in completed rounds to the Army failed, and at the request of the Ministry it was taken over in components, the duty of completing them into rounds being arranged by the Army. The storage provided at each factory was originally planned as being sufficient to take a month's output, but owing either to increased output or other causes the accommodation never equalled this requirement. It was found necessary, therefore, to arrange for a large augmentation of magazine storage. Magazine dépôts at Bramley and Altrincham were completed, capable of holding 240,000 tons, but these proved insufficient and the former dépôt was later extended so as to accommodate a further 125,000 tons. The Didcot dépôt was increased by about 100,000 tons capacity, and numerous smaller ammunition dépôts were opened elsewhere. The site of the Bramley dépôt, owing to the necessity of spacing between explosive buildings, covered an area of about $1\frac{1}{2}$ miles in length and over $\frac{1}{2}$ mile in width. The store shed for filled shell at one of the filling factories had an area of over 9 acres.

For the handling of clothing and boots, additional accommodation was obtained immediately after the outbreak of war by the construction of buildings in Battersea Park and by the hiring of large premises in London (such as Olympia, Commercial Buildings, Aldgate, White City, Great Central Goods Dépôt, &c.), at Manchester, Southampton, York and other places. A clothing dépôt was also opened at Leeds, with sub-dépôts at Glasgow, Edinburgh and Sheffield, and storehouse accommodation at Bradford, Shipley, Huddersfield, Manchester, &c. The total floor space in Royal Army Clothing dépôts on the 30th June, 1918, exceeded 2,000,000 square feet.

The war reserves of clothing at the outbreak of war served for little more than the fitting out and upkeep for a few weeks of the original Expeditionary Force of six divisions and a cavalry division. During normal times the manufacture of clothing had been practically confined to a few firms, the requirements being small and insufficient to attract a wide field of production. Large expansion could only be obtained gradually and, moreover, before clothing could be obtained the materials had to be manufactured. Trivial as this item may appear it is an example of the difficulties obtaining that the trade was wholly unable to meet the sudden call for buttons.

Mere expedients had, therefore, to be resorted to in order to clothe the men during the first rush of recruits. A supply of 500,000 suits of blue serge uniform was obtained, this material being the only colour procurable in sufficient quantities, and these uniforms were delivered at the rate of 10,000 suits a day. Greatcoats of blue and grey were obtained, and some four or five hundred thousand greatcoats of civilian patterns were purchased from ready-made stocks in the country. In addition, 1,300,000 jackets, the same number of trousers and 900,000 greatcoats were, in the early stages of the war, obtained from Canada and the United States. A contract was placed with members of leading clothing firms to organize smaller workers throughout the country, from whom a large output was obtained, but in this contract, until drab cloth became procurable, resort still had to be made to blue and grey material. Quantities of the former were obtained from the Post Office from stocks which that department had in hand. As a further expedient it was also decided to give the sum of 10s. to each recruit coming up with a greatcoat, boots and good suit of clothes, which he was required to wear after enlistment until uniform became available. Authority, and express orders, were given that all Officers Commanding should take steps to provide by local purchase boots, necessaries, mess utensils and other necessities for the use of their units. This resulted in supplies being purchased of whatever pattern or quality could be obtained.

Although in peace it was laid down that the maintenance of clothing of the

Territorial Force should, on embodiment, be taken over by the War Department, that was not possible, as the money necessary for the purchase of the required reserves, viz., over 200,000*l.*, had not been available from Army Estimates, and the equipment of the New Armies made the position even more difficult. Territorial Force Associations were, therefore, called upon to carry out this work for the units under their peace administration, a task which they performed on the whole with success. This inevitably put many purchasing and competing bodies in the field trying to obtain articles of the same description, but apart from this disadvantage it extended the possibilities and sources of supply.

The exceptional difficulty experienced in the provision of clothing for the greatly expanded forces can best be realized by a glance at the following table, which deals with a few items only :—

Article.	Provision during the year from 1st April, 1918, to 31st March, 1919.	Total provision from 4th August, 1914, to 31st March, 1919.
Boots pairs	9,163,000	46,973,000
Shirts	15,105,000	57,421,000
Socks	27,096,000	136,396,000
Jackets	7,106,000	31,764,000
Trousers	7,814,000	28,297,000
Cardigans	2,226,000	20,059,000
Great coats, dismounted	1,905,000	8,733,000
Caps	4,746,000	23,549,000
Pantaloon	2,998,500	9,874,000
Leather jerkins and fur undercoats (lined and unlined)	975,000	4,362,500
Boots, I.R. trench { short	95,000	*
thigh	350,000	*

* Figures not available at present.

Gross.	Appropriations in Aid.	Net.
£	£	£
(a) 91,685,000	15,000,000	76,685,000
(b) 294,457,000	28,492,000	265,965,000

The provision of this involved the purchase of some 360,800,000 yards of cloth, serge, flannel, and other material from which the garments were manufactured.

Sixty-nine divisions were equipped for service with the various Expeditionary Forces, in addition to other divisions sent to India and troops which replaced Regular units withdrawn from garrisons abroad, &c., for service in the field.

The liability incurred for clothing from the beginning of the war to the end of March, 1919, amounted to 295,000,000*l.*, the normal peace expenditure under this head being 850,000*l.* per annum. In addition to this the appropriations in aid of Allies amounted to 29,000,000*l.*

In addition to the provision of normal clothing and stores for the Expeditionary Force, special requirements had to be met, such as fur and other winter garments, footgear and warm clothing for the trenches, none of which had been anticipated or provided for until practically the moment for their use had arrived. All these additional requirements involved the handling of enormous quantities of goods of a very varied description; for example, 3,000,000 goat and other skins, and many million square feet of sheep-skin leather, had to be obtained for the manufacture of fur and leather undercoats, and large numbers of long fur-lined coats were obtained from Canada and the United States. Large issues were also made from stocks to the Serbians and other Allied Governments, and to India.

During the war we had added to our clothing supply in France the troops of the Australian, New Zealand and Portuguese Forces, and were called upon to supply both clothing and equipment to the United States Army. Many items of their clothing differed from British patterns, necessitating new and varied provision. The introduction of labour companies from China, of Kathir boys from the Cape, and of other South African natives, as well as Indians and Egyptians, furnished a still more varied field for which clothing had to be found.

During the 12 months ending 30th June, 1918, 80,160 tons (weight) of clothing were issued from the Clothing Department to the bases of the various Expeditionary Forces.

The number of boots required annually for the peace establishment was about 245,000 pairs, which were produced by about 25 firms in the County of Northamptonshire. From the commencement of the war to March, 1919, about 47,000,000 pairs were ordered, exclusive of orders placed for Allied Governments. Boots were also procured from Northampton, Kettering, Rushden and the smaller towns and villages of Northamptonshire, from Leicester, Bristol, Leeds, Scotland and Ireland.

This result was only achieved by enlisting the aid of a civilian expert, to whom was entrusted the task of organizing the whole resources of the country, and of inducing fresh manufacturers to turn out boots of the Regulation Army pattern. The figures given above show the success which attended his efforts.

The war reserves of general equipment, as of clothing, were small, being designed only to meet the upkeep of the Expeditionary Force for a few months. Consequently the mobilization, within a few months of the despatch of the original Expeditionary Force of 19 complete Regular and Territorial divisions, together with individual units equivalent roughly to five divisions, threw a great strain on our resources, then not fully developed. Practically the whole of the initial receipts of equipment, harness, &c., were utilized for these divisions as they came in from the manufacturers, and to this extent the completion of the equipment of the New Armies was inevitably postponed.

The following paragraphs illustrate some of the difficulties which were met with in the provision of equipment and other stores. They are, however, only examples, as the different items separately enumerated in the Vocabulary of Stores amount to over 30,000; and in the majority of cases the normal supply was obtained from a very small number of firms:—

The standard pattern of infantry equipment was the "1908 Web Equipment." Prior to mobilization, all our annual requirements could be supplied by the only two firms possessing machinery capable of making the material. Subsequent to mobilization, a certain number of additional firms began to learn the process, but no firm except these two possessed or could obtain the special machinery required for certain portions of the equipment. Consequently the number of complete sets procurable was limited by the capacity of these two firms, and a modified form of equipment had to be devised and procured, made partly of leather and partly of webbing. This was done, and large orders were placed both in this country and in America.

The sudden increase in the demand for articles of equipment such as waterbottles, mess tins, picks, shovels and artificers' tools was far in excess of the supply, and, as in other cases, large quantities were obtained from Canada and America, large business houses being employed as organizing agents for the War Office.

The purchase of equipment and clothing in Canada and the United States necessitated the despatch of Inspecting Officers and Technical Viewers to those countries to examine the supplies, both in course of manufacture, and, as far as possible, on completion.

In dealing with the enormous amount of harness and saddlery required, two difficulties arose. First, the shortage of leather; and, secondly, the very limited number of firms capable of making the military pattern of harness and saddlery, more particularly the leather required to stand the hard wear of active service. Moreover, the completion of sets of harness depended not only upon the leather workers, but also upon the makers of the steel rapid release furnishings (peculiar to our military harness), which are made by two distinct trades, viz., stamping firms and finishing firms. The output of these at the beginning of the war was infinitesimal compared with our requirements after mobilization, and both trades had to be organized and expanded. Moreover, there was a strong temptation for firms to continue to secure foreign or private orders at the beginning of the war.

It was, therefore, necessary to go again to America and Canada for harness (and also to India for saddlery), and organize supplies from there. At one time harness and saddlery was being manufactured in 24 different cities in the States, extending from San Antonio in the south, to St. Paul in the north and to Omaha in the west; but it was not until the end of February, 1915, that any large supplies came in from America. Even so, the rapid mobilization of successive divisions prevented for some considerable time the accumulation of any reserve. Moreover, the congestion of the ports and the railways further delayed the distribution of the supplies arriving in this country. From August, 1914, the sets of harness in use had increased from 40,000 to 518,000 in December, 1915, but by that date difficulties of supply had been overcome.

As an illustration of the inter-dependence of the various trades upon one another, it may be mentioned that on the suggestion of a civilian flax dealer special measures were taken to procure a heavy flax crop in Ireland in 1915, in order to provide the flax thread used in the manufacture of harness, saddlery and clothing, as the supplies normally obtainable from Belgium were not, of course, forthcoming.

Ordnance stores generally.—The salient features of 1916, apart from the ever-increasing requirements of ordnance stores in France as the strength of the British forces in that theatre increased, were :—

- (a.) The taking over of practically the whole of the maintenance of the forces in Mesopotamia, which were supplied with equipment and stores through the base at Alexandria.
- (b.) The increase of the forces at Salonica and their equipment upon a pack basis, which entailed the provision of large quantities of packsaddlery.

Development of output at home rendered unnecessary further purchases in America of accoutrements, harness, &c. The enormous demand for hand tools of all descriptions, however, exceeded the quantities obtainable at home in a reasonable time, and orders had still to be placed in America and Canada for many varieties.

In addition to supplying our own forces in France, Egypt, Mesopotamia, Salonica and East Africa, many thousands of sets of artillery harness were supplied to Russia, as well as 36,000 sets of machine-gun packsaddlery and 30,000 sets of saddlery. The Serbians were also supplied with some thousands of sets of packsaddlery.

The development of the campaign in France led to demands for many stores, the requirements of which could not have been foreseen. Millions of yards of Hessian canvas and hundreds of tons of paint, cordage, iron and other materials were demanded for camouflage purposes. Some 100,000 Yukon packs, a device for carrying ammunition and stores on men's backs in the trenches, were provided.

Special carriers for taking field gun ammunition on riding horses over shell-pitted ground, over which it was found impossible to take vehicles, had to be devised, and over 100,000 were supplied.

At the same period a very large increase in the requirements of tents arose in France, and between 1st April and 30th June, 1917, some 50,000 were despatched.

Mosquito nets for the whole of the Salonica forces were supplied, entailing the provision of some 3½ million yards of netting.

Exclusive of ammunition, the quantity of ordnance stores and clothing despatched quarterly from depôts in this country to overseas theatres of operations averaged 300,000 tons, or say, 440 railway wagon loads daily.

The following comparative statement shows the provisions made of a few items of equipment and tools, which gives an idea of the large increase due to the war :—

Description.	Normal average annual provision.	Numbers provided since August, 1914.
Personal equipment, infantry sets	10,000	6,813,000
Personal equipment, other arms.. .. . "	1,000	3,250,000
Haversacks, anti-gas "	..	16,484,000
Bottles, water "	45,000	12,621,000
Mess tins "	75,000	17,650,000
Axes, felling and hand "	330	1,270,000
Axes, pick "	1,300	5,866,000
Shovels and spades "	2,500	10,638,000
Implements, intrenching (carried on the man).. .. . "	5,000	5,766,000
Harness single sets	1,000	694,000
Packsaddlery sets	35	226,000
Saddlery sets (inclusive of numbers required for sets of harness).	1,150	550,000
Ground sheets "	57,000	15,715,000
Tents (hospital marquees, store and small tents) "	14,700	1,691,000
Hospital bedding sets	285	536,000
Blankets "	148,000	41,063,000
Canvas duck and dowlas yards	880,000	200,529,000
Mosquito netting "	..	7,797,000
Flannelette, cleaning rifles "	2,368,000	52,833,000
Horse and mule shoes "	353,049	62,715,000
Oils gallons	137,808	29,741,000
Rope and cordage fathoms	214,970	40,659,000

The despatch of British Divisions to the Italian front necessitated the provision of special equipment, such as ice axes, ice creepers, alpenstocks and snow shoes, not hitherto employed by our troops.

Repairs.—One of the most outstanding developments of the activities of the Army Ordnance Department was the reclamation and repairs of equipment of all kinds, and clothing which had been rendered temporarily defective and unserviceable. A special feature in this work was the institution of light, medium and heavy mobile workshops for the maintenance of artillery equipment at the front. Of these 6 heavy, 26 medium and 62 light workshops were formed and equipped. The light shops worked close up behind the line of our artillery and rendered first aid to the artillery material based on them. Behind them were the medium shops with a wider scope, and behind these were the heavy shops capable of dealing with extensive repairs and the manufacture of certain spare parts which were in constant demand.

Large organizations were built up at the bases and in back areas in every theatre of war where very large quantities of material, which would otherwise have had to be replaced by new supplies from England, were cleaned, repaired and rendered fit for re-issue. Some idea of the magnitude of these operations may be gained from the fact that at one of such organizations alone over 4½ million items, including over 1,000,000 blankets and 500,000 greatcoats and leather jerkins, were cleaned and repaired during the period of six months up to 30th June, 1918, while at another, between 25,000 and 30,000 pairs of boots were repaired weekly.

Over and above the work which is done at the overseas bases, large quantities of material, mainly harness, saddlery, accoutrements and other equipment were returned to this country owing to their requiring extensive repairs, or to the bulk being beyond the capacity of the overseas workshops. They were dealt with in the establishment of the Chief Inspector of Equipment and Stores, where some 200,000 items were handled monthly by a staff of 450 men ineligible for military service, 1,025 women and 80 boys.

A large quantity of tallow was required for renovating the leather articles, and the greater proportion of this was obtained by extraction from old mutton cloths handed over by the Army Service Corps Supply Reserve Depot, the cloths being subsequently sent to store for issue as cleaning rags.

Quantity provided in 1917	Quantity provided in 1918	Quantity provided in 1919	Quantity provided in 1920
1,000,000	1,000,000	1,000,000	1,000,000
2,000,000	2,000,000	2,000,000	2,000,000

(viii.) INSPECTION OF QUARTERMASTER-GENERAL'S SERVICES.

A special branch of the Quartermaster-General's Department was instituted in May, 1916, charged with the development, administration and inspection of Quartermaster-General's Services. As a result, the messing of the troops greatly improved and substantial economies were effected in many directions.

Inspections.—Inspections of maintenance services, including supply, transport and barrack services, throughout the country were carried out personally by the Chief Inspector from the War Office, and showed that there had been a marked improvement in the efficiency of the personnel employed in carrying out the above services.

Accuracy in accounting and uniformity of procedure steadily approached the standard required under normal Peace conditions, and this was particularly noticeable upon return visits to units or depôts to which criticism had been directed on a previous occasion.

Inspections of messing and internal administration were continuous throughout Commands, the principal object in view being the prevention of waste, the best use of the Service ration; and the most efficient expenditure of the $5\frac{1}{2}d.$ and $6\frac{1}{2}d.$ messing grants to ensure a good and varied diet for the soldier, combined with economy.

The results achieved may be attributed largely to the inspections by the Chief Inspector of Quartermaster-General's Services and his assistants, also to the work of Inspectors, Instructors in Catering and Messing Auditors in the several Commands. The successful carrying out of the system was also due to the hearty co-operation of the General Officers Commanding and Officers Commanding units throughout the kingdom.

Messing.—The appointment of Inspectors of Quartermaster-General's Services, Officers in charge of Messing, Instructors in Catering and Command Messing Auditors resulted in considerable improvement in every direction without in any way impairing the sufficiency and food value of the soldiers' messing, and in face of the greatly increased prices of commodities upon which the $5\frac{1}{2}d.$ and $6\frac{1}{2}d.$ messing grant was spent. Mainly as a result of measures taken to promote the better use of food, it was found possible to reduce the meat ration from 1 lb. to $\frac{3}{4}$ lb. in 1916 and the bread ration from 16 oz. to 14 oz. (except for young soldiers under the age of 19) in 1917. In 1918 the meat ration was further reduced to 10 oz. and again to 8 oz., the tea ration to $\frac{3}{8}$ oz. and the sugar ration to $1\frac{1}{2}$ oz. In 1919 the meat ration was subsequently raised to 10 oz., the bread to $15\frac{1}{2}$ oz. and the sugar to $1\frac{1}{2}$ oz. Army Schools of Cookery were established and, including those with various British Expeditionary Forces, 86,733 cooks were trained therein, in addition to a large number of men instructed at technical institutions under the London County Council and under local authorities in Scotland. A unified system of central preparation and distribution of food was started as an experiment and satisfactory results achieved.

By-products.—The efficient treatment of the by-products of the Army ration received careful attention with the view of utilizing for the nation everything of value in the refuse which in former days was almost invariably destroyed or consigned to the swill tub. The chief items dealt with were dripping, other greases, bones and swill; in addition, scraps of soiled bread unfit for human food and bakery sweepings, jars, tins and rabbit skins were sold. The number of rabbit skins sold from November, 1917, to January, 1919, was, including those from Royal Air Force, 5,649,797, and realized 123,192*l.*, being approximately one half of the original cost of the carcase. To further promote the most economical recovery of fats, eliminator plants were established in various large camps, and several plants were erected in France with good results.

The glycerine obtained from the fats sold which was, during the war, earmarked for the Ministry of Munitions amounted to approximately 2,800 tons, or sufficient to provide propellant charges for 28,000,000 18-pr. shells.

Financial economies.—The financial economies effected were substantial, and the following is the value in round figures calculated upon actual results, including British Expeditionary Force Lines of Communication area, up to 31st December, 1918 :—

	£
Proceeds of by-products sold	1,953,549
Amount of $5\frac{1}{2}d.$ and $6\frac{1}{2}d.$ messing allowance unspent (estimated)	748,000

£

The following is a statement of complaints received from all sources regarding soldiers' messing from 1915 to 1918 inclusive :—

									Number of complaints
1915	359
1916	144
1917	116
1918	58

(ix.) CANTEENS.*

Navy and Army Canteen Board.—Without going into full details of the changes in the canteen arrangements of the Forces at Home, it may be stated that the Army Canteen Committee originally appointed in April, 1916, as a supervisory body was subsequently formed into a trading corporation under authority of the Army Council, and on 1st January, 1917, assumed complete responsibility for supply to, and administration of, canteens and regimental institutes, in substitution for the tenant system which was abolished.

The object of the change was to promote better administration of the canteen service generally, and the retention of all profits from trading for the benefit of the Army at large.

In June, 1917, the Board of Admiralty requested the Army Canteen Committee to take over supply of Naval canteens, and the Committee was accordingly reconstituted under the style of "Navy and Army Canteen Board."

The financial advantages accruing from bulk purchases of supplies by the Navy and Army Canteen Board are evident; an additional merit was the improvement in the quality of the goods retailed, which was unquestionably superior to that which obtained under the old tenant system.

Further, regimental institutes were greatly improved in appearance and comfort, with the result that the trading turnover substantially increased, and approximated at the end of 1918, 33,500,000*l.* per annum.

The rebate of 10 per cent., calculated upon the value of trade in canteens accruing from the spending of the 6½*d.* messing grant and from the private expenditure of the troops was set aside, and allocated in accordance with Army Council Instructions; four-fifths of the rebate was remitted direct to officers commanding for regimental funds, the remaining one-fifth being credited to the Central Regimental Institutes Fund administered by the Army Council for the benefit of the Army generally. During the year 1917 a total of 1,177,000*l.* was returned in rebate to units and an amount of 263,000*l.* credited to the Central Regimental Institutes Fund. In the year 1918, the total amount of rebate paid to commanding officers was 1,779,826*l.*, and 318,283*l.* was retained on behalf of the Army Central Regimental Institutes Fund, an amount of approximately 51,000*l.* being retained on behalf of the Air Force Central Regimental Institutes Fund.

The balance sheet for the first year's working was issued in Army Council Instruction No. 7 of 1919, and showed a total profit of 531,095*l.* 8*s.* 8*d.* This total including the proportion for the Admiralty, Royal Air Force, Overseas Forces, &c.

The balance sheet for the 6 months ending 30th June, 1918, showed an approximate credit balance of 730,000*l.*, to be divided in the same way. No later balance sheet was issued up to March, 1919.

The Navy and Army Canteen Board also conducted canteens in Egypt, Malta, Gibraltar and Bermuda, and the total turnover of these four countries during the year 1918 was approximately 5,000,000*l.* sterling. In the autumn of 1918, the Board further undertook the provision of canteen stores to the Expeditionary Forces in North Russia, and stores to a total value of approximately 1,086,000*l.* were shipped to Archangel. The necessity for this large amount was due to the closing of the port during the winter months.

To Murmansk, during 1918, goods to an approximate value of 162,000*l.* were sent, and further additional amounts were subsequently despatched.

After demobilization commenced, the Board undertook the whole of the feeding arrangements for repatriated prisoners of war, and also arranged the feeding arrangements for the whole of the troops arriving in this country for demobilization. This work proceeded without a hitch of any kind.

Expeditionary Force Canteens.—The Expeditionary Force Canteens commenced operations in November, 1914, and their work in France, Salonica, Mesopotamia and Italy was of the highest importance in adding to the comfort of all ranks of the overseas forces. Their total turnover increased as the magnitude of their operations expanded, as is shown by the following values of goods shipped:—

	£
Value of goods shipped during 1915	1,350,000
Value of goods shipped during 1916	7,740,000
Value of goods shipped during 1917	16,207,000
Value of goods shipped during 1918	20,200,000

* See also p. 587.

In addition to these shipments, large quantities of goods were purchased locally for resale in canteens, amounting during the year 1918 to over 2,000,000*l.* sterling.

The Expeditionary Force Canteens also conducted in France and Italy officers' clubs, rest houses, and rest hostels, and supplied, during the latter part of 1918, an average of 20,000 meals daily to troops in leave billets. This organization was also entirely responsible for the meals supplied to troops in Demobilization Camps and their passage through to England. The Expeditionary Force Canteens conducted its own bakeries, laundries, farms, piggeries, and mineral water factories in France, and also ran an ice plant and mineral water factory at Taranto.

Subsequent to the Armistice, officers' rest houses were opened in Constantinople and Cologne.

In June, 1917, the Board of Administration reported the Army Canteen Committee to take over supply of rest houses, and the Committee was accordingly reconstituted under the name of "Army and Army Canteen Board".

The financial advantages arising from the purchase of supplies by the Army and Army Canteen Board are evident, and additional work was the responsibility of the Board, which was immediately superior to that which existed under the old system.

Further experimental work was greatly improved in appearance and character with the result that the trading business was extremely successful, and approximately at the end of 1918, 25,000,000 *l.* sterling was realized.

The balance of 10 per cent. realized upon the year's business was set aside from the spending of the 10 per cent. grant and from the profits of the trading business was not realized, and amounted to approximately 10,000,000 *l.* sterling.

Four-fifths of the balance was retained direct to officers' canteens, the remaining one-fifth being credited to the Central Expeditionary Force Fund administered by the Army Council, i.e. the benefit of the Army generally.

During the year 1917 a total of 1,175,000 *l.* was retained in return for goods, an amount of 200,000 *l.* credited to the Central Expeditionary Force Fund, the year 1918 the total amount of goods sold to commanding officers was 1,175,000 *l.* and 215,000 *l.* was retained on behalf of the Army Canteen Board, i.e. the Central Expeditionary Force Fund, being retained on behalf of the Army Canteen Board.

The balance sheet for the year 1918 was as follows:—

Instruction No. 7 of 1918, and showed a total profit of 251,000 *l.* 8*s.* 6*d.* The total including the proportion for the 10 per cent. grant was 251,000 *l.* 8*s.* 6*d.* 10*s.*

The balance sheet for the 6 months ending 30th June 1918 showed an approximate credit balance of 750,000 *l.* to be divided in the same way. No further balance sheet was prepared in March, 1919.

The Army and Army Canteen Board also conducted canteens in Egypt, Malta, Gibraltar and Bahrain, and the total turnover of these canteens during the year 1918 was approximately 2,000,000 *l.* sterling. In the autumn of 1918 the Board for the first time undertook the provision of canteen stores to the Expeditionary Force in North Russia, and there to a total value of approximately 1,000,000 *l.* was supplied to the troops.

The necessity for this large amount was due to the fact that the winter months, and during 1918 goods to an approximate value of 100,000 *l.* were sent, and further additional amounts were subsequently despatched.

After demobilization commenced the Board undertook the whole of the trading arrangements for the whole of the troops arriving in the country for demobilization. This work proceeded without a hitch of any kind.

Approximate Force Canteens.—The Expeditionary Force Canteens continued operations in November, 1918, and their work in France, Belgium, Luxembourg and Italy was of the highest importance in relation to the comfort of all ranks of the overseas forces. Their total turnover amounted to the magnitude of their operations expanded as is shown by the following values of goods shipped:—

Value of goods shipped during 1918	1,800,000
Value of goods shipped during 1917	1,710,000
Value of goods shipped during 1916	1,600,000
Value of goods shipped during 1915	2,000,000

APPENDICES TO PART XXXII.

APPENDIX I.

STATEMENT SHOWING STRENGTH OF FORCES BEING FED PRIOR TO THE WAR.

					Men.	Animals.
At Home	120,000	23,500
Abroad	44,000	4,000
Total	164,000	27,500

RATION STRENGTH, 11TH NOVEMBER, 1918.

(Exclusive of Army in India and permanent garrisons overseas.)

Theatre.					Men.	Animals.
France	2,360,400	404,000
Egypt	480,000	167,000
Salonica	385,000	120,000
East Africa	111,731	1,459
Mesopotamia	413,406	88,145
Italy	97,822	20,482
Home	1,514,933	34,644
Total	5,363,352	895,770

APPENDIX II.

TOTAL MOTOR VEHICLES IN USE AS AT 11TH NOVEMBER, 1918, IN ALL THEATRES OF OPERATIONS.

	Available on Peace Establishment of 1914.	Balance provided on Mobilization.	France.	Italy.	Salonica.	Egypt.	Mesopotamia.	East Africa.	Malta and Gibraltar.	India.	Home companies.	Home depôts.	Total, all theatres.	Future weekly receipts.
