TO THE RIGHT HONOURABLE HERBERT JOHN GLADSTONE, M.P., HIS MAJESTY'S PRINCIPAL SECRETARY OF STATE FOR THE HOME DEPARTMENT.

Sir, Home Office, March, 1909.

The Factory and Workshop Act, 1901, (s. 132) requires that every Medical Officer of Health shall in his annual report to the District Council report specifically on the administration of that Act in workshops and workplaces, and shall send a copy of the report to the Secretary of State. As in earlier years, tabular forms were forwarded in December, 1907, through the Local Government Boards, to the Medical Officers of Health, for their guidance and convenience in preparing the statistical part of their reports for 1907; and in order to secure uniformity of method, these forms provide for detailed records with regard to outwork.

The Reports for 1907, received up to 17th March, 1909, are summarised in the following tables. Out of 1,848 reports due from England and Wales, 1,795 were received by the date mentioned above; for Scotland the corresponding figures were 325 and 319, and for Ireland 769 and 227. As regards Ireland the large number of reports outstanding is probably due to the fact that only the 20 Superintendent Medical Officers of Health are under obligation to make an annual report to the Local Authorities on the administration

of the Public Health Acts.

Table 1 contains a general summary of the administration of the Act by Local Authorities. Tables 2 and 3 show their recorded action with regard to outwork (1) for the United Kingdom as a whole in the various industries, and (2) in each county and principal borough, without distinction of industry. The distribution of outworkers for

the same areas according to industry is approximately shown in Table 4.

In recent years the Home Office has, by circular and otherwise, directed the attention of Local Authorities and their officers to the outwork provisions of the Factory Act, and the statistics for 1907 are more satisfactory than those of earlier years. The recorded inspections of outworkers' premises increased from 54,259 in 1905 to 77,138 in 1906, and 102,549 in 1907; notices as to unwholesome premises (section 108) from 70 in 1905 to 816 in 1906, and 1,948 in 1907; and orders relating to infected premises (section 110), which had fallen from 499 to 334 in 1906, rose again to 640 in 1907. The increase in prosecutions for non-compliance with the requirements as to lists of outworkers was not fully maintained (114, 181, 169), but there was a marked advance in the number of lists received (14,845, 16,565, 21,066). Some of this increase must be attributed to the Homework Order of May, 1907, which added the following trades:—artificial flower making, tent and sack making, making of nets (except wire nets), covering of racquet or tennis balls, cardboard box making, pea picking, feather sorting, carding of buttons, &c., and basket making.

There were again many discrepancies in the figures recorded. Thus, the numbers of addresses of outworkers referred to and from other local authorities (columns 13 and 14 of Table 3), which in the United Kingdom as a whole should be equal, differ by over 11,000. As regards this, however, it has to be remembered that the statistics are not complete (see column 4 of Table 3), and further that the same outworker may receive work from employers in different districts. Also, the same names will often appear in each of the half-yearly lists, and while it is incumbent on the forwarding authority to forward the names on both occasions, it is not necessary for the receiving authority to enter the names so received twice over, and it may be assumed that in many cases they do not. A second discrepancy arises in the recorded number of outworkers' lists received twice in the year (column 7 of Table 3), which should be an even number,

but is found to be odd in several instances.

Instructions on both these points, which arose on the reports for 1906, have been

added to the tabular forms for 1908, issued in December last.

In some instances (e.g., St. Marylebone, Worcester, Leicester, Nottingham) a relatively small number of recorded inspections of outworkers' premises is explained on the ground that visits paid for purposes other than outwork, (e.g., ordinary "house to

house" sanitary inspection) are excluded.

It has been ascertained further than several authorities (e.g., Camberwell, Bradford) have been able to secure compliance as regards outwork on unwholesome premises by means of verbal instructions, and hence the absence of record of written notices in column 19 of Table 3. The same explanation applies also to the entries in column 22, as to infected premises in certain of the returns (e.g. Camberwell, Islington, Leicester), while in others (e.g., Westminster, Poplar) the issue of formal orders under section 110 was found unnecessary, owing to disinfection being carried out by the local authority.

I am, &c.,

Arthur Whitelegge, Chief Inspector of Factories.

* This Table refers to workmen only (not contractors). The figures are obtained by the addition of (a) the number of workmen included in the lists received once in the year, and (b) half the number included in the lists received from employers who sent them twice in the year (ar cols. 4 and 7 of Table 2). No correction is made for addresses referred to or from other Local Authorities. The numbers are therefore those of workmen who receive work from premises situated in the areas mentioned, although the work may be done in other areas.

"This Table refers to workmen only (not contractors). The figures are obtained by the addition of (a) the number of workmen included in the lists received once in the year, and (b) half the number included in all the lists received from employers who sent them twice in the year (see cols. 4 and 7 of Table 2); for Beffast and Dublin, however, the figures supplied fail to distinguish between the returns made once and twice standards of from the stated totals) on the assumption that the proportions were as in the previous year. No correction is not addresses referred to or from the receive work from premises situated in the areas mentioned, although the work may be done in other areas.
