LIST OF PUBLICATIONS
OF THE
PERMANENT CENSUS BUREAU

The following circulars of information concerning the Bureau of the Census will be sent upon request:

TENTATIVE PROGRAM,
1916-1919.LIST OF
PUBLICATIONS.THE STORY OF THE CENSUS:
1790-1916.FEDERAL POPULATION ESTIMATES AND
SUPERVISION OF LOCAL CENSUSES.

For list of Thirteenth Census publications, see back of cover.

Note.—The following is a complete list of the publications of the permanent Bureau of the Census. A limited number of some of the reports of the Tenth, Eleventh, and Twelfth Censuses are available for distribution, lists of which may be had on application. All census bulletins and reports are of quarto size (9½ by 11½ inches), but a number of the miscellaneous publications are of octavo (5½ by 9½ inches) or irregular sizes. Those publications marked with an asterisk (*) are not available for distribution by the Census Bureau, but generally may be purchased from the Superintendent of Documents, Washington, D. C. Publications available for distribution may be had on application to the Director of the Census, Department of Commerce, Washington, D. C.

REPORTS

Benevolent institutions: 1904 and 1910.
The blind and the deaf: 1900.
Blind population of the United States: 1910.
Cancer in the United States: 1914.
Central electric light and power stations: 1902, *1907, and 1912.
A century of population growth from the First Census of the United States to the Twelfth: 1790-1900.
Inns in the United States: 1910.
Electrical industries: 1909.
Express business in the United States: 1907.
Financial statistics of states: 1912.
Fisheries of the United States: 1909.
Insolvents in the United States: 1910.
Insane and feeble-minded in hospitals and institutions: 1904 and 1910.
Manufactures: 1905. (The results of the manufactures census of 1909 are contained in Volumes VIII, IX, and X of the Thirteenth Census reports, which are listed on page 4 of cover.)
Part I—United States by industries.
Part II—States and territories.
Part III—Selected industries: Including combined textiles, cotton, hosiery and knit goods; wool; silk; flax, hemp, and jute products; dyeing and finishing textiles; buttons; needles, pins, and hooks and eyes; cloth and linoleum; boots

and shoes; leather, tanned, carried, and finished; leather gloves and mittens; butter, cheese, and condensed milk; flour-mill and gristmill products; starch; canning and preserving; rice, cleaning and polishing; beet sugar; slaughter and meat packing; manufactured ice; salt; cottonseed products; tobacco; lumber and timber products; turpentine and rosin; paper and wood pulp; printing and publishing; pens and pencils; glass; clay products.
*Part IV—Selected industries: Including iron and steel; tin and terneplate; copper, lead, and zinc; smelting and refining; agricultural implements; electrical machinery, apparatus, and supplies; metal-working machinery; musical instruments, attachments, and materials; automobiles, bicycles and tricycles; carriages and wagons; shipbuilding; the steam and street railroad car industry; chemicals and allied products; coke; petroleum refining; power employed; earnings of wage earners.
Marriage and divorce: 1867-1906.
*Part I—Summary, laws, foreign statistics.
*Part II—General tables.
 Mines and quarries: 1902.

Mortality statistics: 1900-1904, 1905, 1906, 1907, *1908, 1909, *1910, 1911, 1912, 1913, and 1914.
Negroes in the United States: 1910.
Paupers in almshouses: 1904 and 1910.
Plantation farming in the United States.
Prisoners and juvenile delinquents in institutions: 1904 and 1910.
Religious bodies: 1906.
Part I—Summary and general tables.
Part II—Separate denominations: History, description, and statistics.
Statistics of cities having a population of over 30,000: 1905, 1906, 1907, *1908, 1909, *1910, 1911, 1912, and 1913. (The 1913 and 1914 statistics were issued as Bulletin 126.)
Street and electric railways: 1902, *1907, and 1912.
Telephones and telegraphs: 1902.
Telephones: 1907 (for Telegraph systems: 1907, see Bulletin 102).
Telephones and telegraphs and municipal electric fire-alarm and police-patrol signaling systems: 1912.
Transportation by water: 1904.
United States Life Tables: 1913.
Wealth, debt, and taxation: 1913—Volumes I and II. (The various subjects included in these volumes were also issued in a series of 4 bulletins.)
*Women at work, statistics of: 1900.

BULLETINS

Note.—The following is a complete list of the bulletins of the permanent Census Bureau. Many of these bulletins contain important statistical material not to be found in any other publications of the bureau. Many others are made up practically of literal extracts or chapters taken from forthcoming reports of the census, or of such important preliminary statistics as may be rapidly tabulated. Still others represent a condensation or summarization of material contained in the reports proper. These facts and figures are presented in this form in order that separate distribution may be made of material bearing on particular subjects, or for the purpose of more prompt presentation thereof.

Bull. No.	
322	Abstract of financial statistics of cities having a population over 30,000, 1915.
323	Abstract of special bulletins, Wealth, debt, and taxation, 1913 (unnumbered).
324	Agrostatistics, a discussion of: 1880, 1890, 1900, inclusive.
325	Assessed valuation of property and amounts and rates thereon: 1890-1912 (unnumbered).
326	Blind population of the United States: 1910.
327	*Central electric light and power stations: 1902.
328	Same, 1912.
329	*Child labor in the District of Columbia: Twelfth Census, 1910.
330	Child labor in the United States: Twelfth Census, 1910.
331	Children and apprentice in the United States: 1910.
332	Commercial valuation of railway operating property in the United States: 1904.
333	Cotton ginned in the United States: Crops of 1892 to 1902, inclusive.
334	Same, crops of 1903 to 1905, inclusive.
335	Same, crops of 1906 to 1909, inclusive.
336	Cotton production: 1915. (The statistics of cottonseed products, gathered at the quinquennial census of manufactures, are also shown in this bulletin.)
337	Same, 1910.
338	Same, 1905.
339	Same, 1900.
340	Same, 1904.
341	Same, 1910. (The statistics of cottonseed products, gathered at the quinquennial census of manufactures, are also shown in this bulletin.)
342	Same, 1911.
343	Same, 1912.
344	Same, 1913.
345	Cotton supply and distribution for the year ending August 31, 1905.
346	*Same, 1900.
347	Same, 1904.
348	Same, 1909.
349	Same, 1910.
350	Same, 1911.
351	Same, 1912.
352	Same, 1913.
353	Same, 1914.
354	Cotton production and distribution: 1914-15.
355	Same, 1915-16.
356	Census and municipal indebtedness, 1900-1912, and making land assets, 1912 (unnumbered).
357	County revenues, expenditures, and public property: 1913 (unnumbered).
358	Deaf and dumb population of the United States: 1910 (unnumbered).
359	Earnings of wage earners (a study based on census of manufactures, 1905).
360	Electrical industries of Porto Rico: 1907.
361	Estimated value of national wealth: 1890-1912 (unnumbered).
362	Estimates of population: 1904, 1905, 1906.
363	Same, 1910, 1911, 1912, 1913, 1914.
364	Same, 1910, 1911, 1912, 1913, 1914, 1915, 1916.
365	Estimates of population of the larger cities of the United States in 1901, 1902, and 1903.
366	Executive civil service of the United States, statistics of employee: 1901.

Bull. No.	
367	Executive civil service of the United States, statistics of employee: 1907.
368	Geographical distribution of population: 1880, 1890, and 1900.
369	Illiteracy in the United States to study based on reports of Twelfth and preceding censuses.
370	Increase of population: 1890 to 1900, and decrease.
371	Industrial districts: 1905 (manufactures and population).
372	Insane and feeble-minded in institutions: 1910.
373	Insular and municipal finances in Porto Rico for the fiscal year 1902-3.
374	Irrigation in the United States: 1902.
375	Marriage and divorce: 1867-1906.
376	Mining industries of Porto Rico: 1902.
377	Mines and quarries: 1902.
378	Mortality statistics: 1908.
379	*Same, 1909.
380	Same, 1910.
381	Same, 1911.
382	Municipal electric fire-alarm and police-patrol systems: 1912.
383	Same, 1912.
384	Municipal revenues, expenditures, and public properties: 1912 (unnumbered).
385	National and state indebtedness: 1893-1913 (unnumbered).
386	National and state revenues and expenditures, 1918 and 1903, and value of public properties, by states, 1913 (unnumbered).
387	*Negroes in the United States: 1900.
388	Same, 1910.
389	Paupers in almshouses: 1910.
390	Population of Oklahoma and Indian Territory: 1907.
391	Prisoners and juvenile delinquents: 1910.
392	Proportion of children in the United States (a study based on reports of the Twelfth and preceding censuses).
393	Proportion of the sexes in the United States (a study based on reports of the Twelfth and preceding censuses).
394	Religious bodies: 1906 (2d ed., revised and enlarged).
395	Statistics of cities having a population of 3,000 to 25,000: 1903.
396	Statistics of cities having a population of over 25,000: 1902 and 1903.
397	Statistics of cities having a population of over 30,000: 1904.
398	Same, 1907 (Abstract).
399	*Same, 1912.
400	Same, 1913.
401	Same, 1915 (Abstract).
402	*Street and electric railways: 1902.
403	Same, 1912.
404	Supervisors' districts for the Thirteenth Census: 1910.
405	Taxation and revenue systems of state and local governments (a digest of constitutional and statutory provisions relating to taxation in the different states in 1912) (unnumbered).
406	Teachers, statistics of (a study based on reports of the Twelfth and preceding censuses).
407	Telegraph systems: 1907.
408	Telephones and telegraphs: 1902.
409	Same, 1912.

(List of publications continued on page 3 of cover.)

Bull. No.	
410	Transportation by water, United States: 1903.
411	Vital statistics of the Twelfth Census: 1900.

MANUFACTURES, CENSUS OF 1905

(The bulletin presenting the 1909 census of manufactures will be found listed on page 3 of the cover.)

SPECIAL INDUSTRIES

(The statistics presented in these bulletins are reproduced in Parts III and IV of the Report on Manufactures: 1905.)

Bull. No.	
75	Agricultural implements.
76	Automobiles and bicycles and tricycles.
77	Boots and shoes, leather, and leather gloves and mittens.
78	Butter, cheese, and condensed milk, flour-mill and gristmill products, and starch.
79	Canning and preserving, rice cleaning and polishing, and the manufacture of beet sugar.
80	Carriages and wagons, and the steam and street railroad car industry.
81	Chemicals and allied products.
82	Copper, lead, and zinc, smelting and refining.
83	Coke.
84	Electrical machinery, apparatus, and supplies.
85	Glass and clay products.
86	Iron and steel and tin plate and terneplate.
87	Lumber and timber products.
88	Metal-working machinery.
89	Musical instruments, attachments, and materials.
90	*Paper and wood pulp.
91	Pens and pencils, buttons, needles, pins, and hooks and eyes, cloth and linoleum, and turpentine and rosin.
92	Petroleum refining.
93	Power employed in manufactures.
94	Printing and publishing.
95	Shipbuilding.
96	*Slaughter and meat packing, manufactured ice, and salt.
97	*Textiles.
98	Tobacco.

STATES AND TERRITORIES

(The statistics presented in these bulletins are reproduced in Part II of the Report on Manufactures: 1905.)

*United States.

Separate bulletins for each state were printed, and copies are still available for distribution.

MANUFACTURES, CENSUS OF 1914

SPECIAL INDUSTRIES

This series will comprise about 60 bulletins, and it is expected to issue all of the series during 1916. The following have been issued:

Power laundries: 28 p.

Rice cleaning and polishing: 9 p.

LETTER OF TRANSMITTAL.

DEPARTMENT OF COMMERCE,
BUREAU OF THE CENSUS,
Washington, D. C., August 21, 1916.

SIR:

I transmit herewith a monograph on the mortality from cancer and other malignant tumors in the registration area of the United States. In this monograph the seven titles of the International List of Causes of Death covering the subject of cancer have been subdivided, so that deaths from cancer and other malignant tumors are classified, according to location, under 29 separate headings.

I wish to acknowledge the advice and cooperation of the American Society for the Control of Cancer, and especially of its Statistical Advisory Board: Dr. F. L. Hoffman, chairman; Dr. Cressy L. Wilbur, Dr. William H. Guilfooy, Dr. Louis I. Dublin, and Mr. Curtis E. Lakeman, executive secretary; and also of Prof. Walter F. Willcox, of Cornell University, and Dr. William J. Mayo.

This monograph was prepared under the supervision of Mr. Richard C. Lappin, chief statistician for vital statistics, assisted by Mr. George H. Van Buren, expert chief of division.

Respectfully,

SAM. L. ROGERS,
Director of the Census.

TO HON. WILLIAM C. REDFIELD,
Secretary of Commerce.

MORTALITY FROM CANCER AND OTHER MALIGNANT TUMORS IN THE REGISTRATION AREA OF THE UNITED STATES: 1914.

INTRODUCTION.

This monograph presents, in greater detail than heretofore shown in the annual mortality reports of the Bureau of the Census, statistics of deaths occurring in the registration area of the United States during the calendar year 1914 and reported as due to cancer and other malignant tumors. The preparation of this monograph was authorized by the Director of the Census on October 17, 1914, in compliance with the suggestion of a number of the foremost students of the cancer problem and at the request of the American Society for the Control of Cancer. The request of this society was made in pursuance of the following resolution, adopted at a meeting of the executive committee on February 7, 1914:

Resolved, That the executive committee of the American Society for the Control of Cancer respectfully suggests to the Director of the United States Census that the division of vital statistics be instructed to publish hereafter, in the annual volume on mortality statistics, a more detailed statement of the deaths from cancer and other malignant tumors, as reported for the registration area of the United States, and in accordance with the details as given in the second revision of the Manual of the International List of Causes of Death, pages 63-66, inclusive.

It was deemed advisable, however, to publish this detailed statement in the form of a separate monograph, in order not to cause too great a delay in the publication of the annual report on mortality statistics.

CLASSIFICATION ACCORDING TO LOCATION.

In the preparation of the accompanying tables the bureau has subdivided the seven titles of the International List of Causes of Death, covering the subject of cancer, so that the statistics show the mortality from cancer and other malignant growths,¹ classified according to location, under 29 separate headings. It was suggested by a member of the Society for the Control of Cancer that two sets of statistics should be presented, showing (a) growths of which the existence and malignant nature were reasonably certain on the basis of autopsies, surgical operations, microscopical examinations, or accessibility to observation by reason of exposed situations; and (b) those of which identification as malignant tumors was uncertain, that is, internal cancers and other malignant growths, diagnoses of which were based on clinical findings only. This suggestion was adopted.

¹ The term "cancer," as used throughout this monograph, includes "other malignant tumors."

PROPORTION OF TRANSCRIPTS WHICH CONTAINED NEEDED INFORMATION.

The first step in preparation for the tabulation was to make an estimate of the percentage of the transcripts, as received by the Census Bureau, which contained the desired information. It was estimated that at least 50,000 deaths in the registration area would be reported during the year 1914 as due to cancer. About 2,000 transcripts from several registration states were examined and it was found that in less than 2 per cent of the cases was the fact of autopsy mentioned, that about 9 per cent of the transcripts contained the information that surgical operations had been performed, and that in practically no cases was it stated that the diagnosis was based on clinical findings. For the entire 50,000 cases, there would thus be, on the basis of the data on the 2,000 transcripts of death certificates examined, about 11 per cent, or approximately 5,500, in which surgical operations or autopsies had been performed. Using as a criterion the mortality statistics for 1913, it was estimated that about 8,500 deaths would be reported as due to cancer or malignant tumors of the buccal cavity, skin, and breast, all so situated that no mistake would be probable in diagnosis, and that these, therefore, could be classified as of reasonably certain malignancy. There would thus be a total of approximately 14,000 cases in which the diagnosis could be safely accepted as "reasonably certain," leaving some 36,000 in which it was necessary for the Bureau of the Census to communicate with the attending physicians in order to ascertain whether the diagnoses were based on clinical findings or on autopsies, or whether surgical operations had been performed.

CIRCULAR LETTER TO PHYSICIANS.

The following circular letter was, therefore, prepared and sent to over 35,000 physicians, and it is gratifying to be able to state that replies were received from about 80 per cent of them. In this connection it should be borne in mind that in many cases the deaths occurred nine or ten months prior to their receipt of the letters.

As a result of this investigation, the bureau was able to compile 30,555 deaths, or 58.3 per cent of the total, under the caption "Diagnosis reasonably certain"; 14,404, or 27.5 per cent, under "Diagnosis uncertain"; and 7,461, or 14.2 per cent, under "Diagnosis unknown."

DEPARTMENT OF COMMERCE,
BUREAU OF THE CENSUS,
WASHINGTON.

DEAR DOCTOR:

At the request of the American Society for the Control of Cancer the Bureau of the Census has decided to publish two sets of statistics covering the subject of deaths from cancer and other malignant tumors:

(a) Statistics of deaths in which the diagnoses were based on clinical findings.

(b) Statistics of deaths in which the diagnoses were confirmed by autopsies, or in which surgical operations were performed.

Will you kindly examine the accompanying transcript of a medical certificate of death, the original of which was made out by you, and note thereon whether the diagnosis was based on *clinical findings* or *autopsy*; also whether there was *surgical intervention*? In either case the *seat of the disease* should also be stated. Any further data which you care to give may be written on the reverse side of the transcript.

The information will be treated as strictly confidential and used for statistical purposes only. I feel assured that your interest in advancing the scientific study of this subject will prompt you to aid the bureau in this great work, the success of which is entirely dependent upon the cooperation of American physicians.

Prompt return of the information desired, by means of inclosed penalty envelope, which requires no postage, will be greatly appreciated, as we are now compiling these returns.

Very respectfully,

SAM. L. ROGERS, *Director*.

The Bureau of the Census takes this occasion to express its sincere appreciation of the interest and courtesy shown by so many thousands of physicians in their replies. It was necessary in many cases to consult records which were months old; in others certificates had been signed by doctors who had answered calls in the absence of the regular medical attendants, but who either referred the bureau to the latter or obtained from them the case histories. Many replies were accompanied by extracts from hospital records, nurses' charts, and even photographs of the growths. Deserving of special thanks are two cases in which widows of deceased physicians sent extracts from case histories as found in their records.

In editing the replies of the physicians a considerable number of cases were noted of which the following is an example: The return was "cancer of the liver." The physician replying to the Census Bureau inquiry as to basis of diagnosis stated that, so far as the liver was concerned, the diagnosis was purely clinical, but that prior to this a cancer of the breast had been excised; or that the decedent had suffered for years from a malignant tumor of the rectum, the uterus, the axilla, the face, or some other "visible or accessible" organ or member. The bureau in classifying such a case was therefore confronted with this situation: (a) The existence of cancer was certain or "reasonably certain" in the visible or accessible organ or member; (b) the existence of cancer in the inaccessible organ was confirmed by clinical symptoms only; (c) the executive council of the American Society for the Control of Cancer, in conjunction with representatives of other interested organizations and persons, had recommended "that all diagnoses of inaccessible cancer based on clinical findings alone should be referred to the 'uncertain

class' regardless of any strength of assertion by the physician that the diagnosis was correct."

Under these conditions it was decided to classify the death as one caused by cancer of the visible or accessible organ, it being deemed better to establish as nearly as possible the number of deaths in which it was "reasonably certain" that the cause was *cancer*, than to tabulate under the head of cancer of *any given organ* deaths which were declared by the society to be *uncertain as to cause* by reason of the fact that the diagnosis was based on clinical findings only. In former years, however, such a death, classified on the basis of the original unamended statement, would have been charged to cancer of the inaccessible organ; and it may be that the number of changes in this respect will be sufficient to influence the rate for Title 44 (Cancer of the skin) and Title 43 (Cancer of the breast).

CLASSIFICATION AS TO DIAGNOSIS.

Deaths covered by the following classes of cases were compiled under the caption, "Diagnosis reasonably certain":

- (a) All cases of external cancers, including those assignable to Title No. 43 (Cancer of breast); to Title No. 44 (Cancer of skin); and to the majority of the terms under subtitle X of Title No. 45 (Cancer of other organs or of organs not specified).
- (b) All cases of cancers in cavities of the body or in organs that can be seen and examined without operative measures; e. g., those assignable to Title No. 39 (Cancer of the buccal cavity); to Title No. 41, subtitle C (Cancer of rectum and anus); to Title No. 42, subtitle B (Cancer of the uterus); to Title No. 42, subtitle C (Cancer of vagina and vulva); to Title No. 45, subtitle A (Cancer of larynx); and to a few terms under subtitle X of Title No. 45 (Cancer of other organs or of organs not specified).
- (c) All cases in which diagnosis was confirmed by surgical intervention (including exploratory operations).
- (d) All cases in which diagnosis was confirmed by microscopic findings.
- (e) All cases in which diagnosis was confirmed by post-mortems, autopsies, or necropsies.

The following cases were compiled under "Diagnosis uncertain":

All cases in which death was ascribed to malignant growths of organs or parts of the body that are inaccessible except through operative measures, and in which no operative measures were employed, no microscopic examinations were made, and no post-mortems, autopsies, or necropsies were performed.

Under this heading are included cases where growths were inaccessible, no operative measures were employed, and the diagnoses were based on clinical findings only, even though they were concurred in by consultants, and even though physicians of most eminent professional standing positively asserted that they were sure of their diagnoses. This has been done on the earnest recommendation of the American Society for the Control of Cancer.

Under "Diagnosis unknown" were compiled—

All those cases concerning which correspondence with physicians was necessary to determine whether diagnosis was reasonably certain or was uncertain, and concerning which no replies were received to the communications of the Bureau of the Census.

LIST SHOWING TITLES AND SUBDIVISIONS OF TITLES OF INTERNATIONAL LIST, RELATING TO CANCER AND OTHER MALIGNANT TUMORS, AS USED IN THIS REPORT, TOGETHER WITH INCLUSIONS UNDER EACH TITLE.

- 39.—CANCER AND OTHER MALIGNANT TUMORS OF THE BUCCAL CAVITY.
- 39A.—*Cancer of the lip:*
Cancer of lip.
Smokers' cancer.
- 39B.—*Cancer of the tongue:*
Cancer of tongue.
Carcinoma linguae.
Lingual cancer.
- 39C.—*Cancer of the mouth (without further qualification):*
Cancer of mouth.
- 39D.—*Cancer of the jaw:*
Cancer of jaw.
Cancer of maxilla.
- 39X.—*Other cancers of this class:*
Cancer of buccal cavity (without further qualification).
Cancer of cheek.
Cancer of gum.
Cancer of palate.
Cancer of soft palate.
Cancer of tonsil.
- 40.—CANCER AND OTHER MALIGNANT TUMORS OF THE STOMACH, LIVER.
- 40A.—*Cancer of the pharynx:*
Cancer of pharynx.

GROWTH OF THE REGISTRATION AREA FOR DEATHS: 1880-1914,

NOTE.—In addition to the registration states (shaded in the cartograms) the registration area included certain cities in nonregistration states.

MORTALITY FROM CANCER.

THE REGISTRATION AREA.

GROWTH OF THE REGISTRATION AREA: 1880 TO 1914.

The series of annual mortality reports began with that for the calendar year 1900, following the series of decennial reports, which began with the report of the Seventh Census, for 1850, and terminated with that of the Twelfth Census, for the year ended May 31, 1900. These decennial reports were compiled from data obtained by the population enumerators and related to the United States as a whole; and for the years 1880 and 1890 additional reports, relating only to the registration area and based on returns from registration officials, were also published.

The registration area for deaths was established in 1880, and then comprised the states of Massachusetts and New Jersey, the District of Columbia, and a number of cities in nonregistration states, the population of the entire area being 8,538,366, or 17 per cent of the total population of the United States. Connecticut, Delaware, New Hampshire, New York, Rhode Island, and Vermont, and a number of cities in nonregistration states were added in 1890, nearly doubling the percentage of population included (31.4). In 1900, for the census year ended May 31, two more states, Maine and Michigan, and a number of cities in nonregistration states were brought into the area and Delaware was dropped, the percentage of population included being thereby increased to 37.9.

With the beginning of the annual mortality reports—the first of which, as already stated, related to the calendar year 1900—and the discontinuance of the decennial series, Indiana became a registration state, and the percentage of population included in the registration area was raised to 40.5.

Thereafter there was little or no increase in the area until 1906, when California, Colorado, Maryland, Pennsylvania, and South Dakota (since discontinued) were admitted, bringing the percentage up to 48.9. The next addition was in 1908, when Washington and Wisconsin became registration states, and at last over one-half of the population of the United States (52.5 per cent, according to the estimates for that year) was included in the area. The proportion continued to increase with the admission of Ohio in 1909; Minnesota, Montana, Utah, and the North Carolina municipalities which in 1900 had 1,000 or more inhabitants, in 1910; Kentucky and Missouri in 1911; Virginia in 1913; and Kansas in 1914, in which year the estimated population of the registration area represented 66.8 per cent of the total for the United States.

The following table shows the growth of the registration area in population and land area from 1880 to 1914, inclusive:

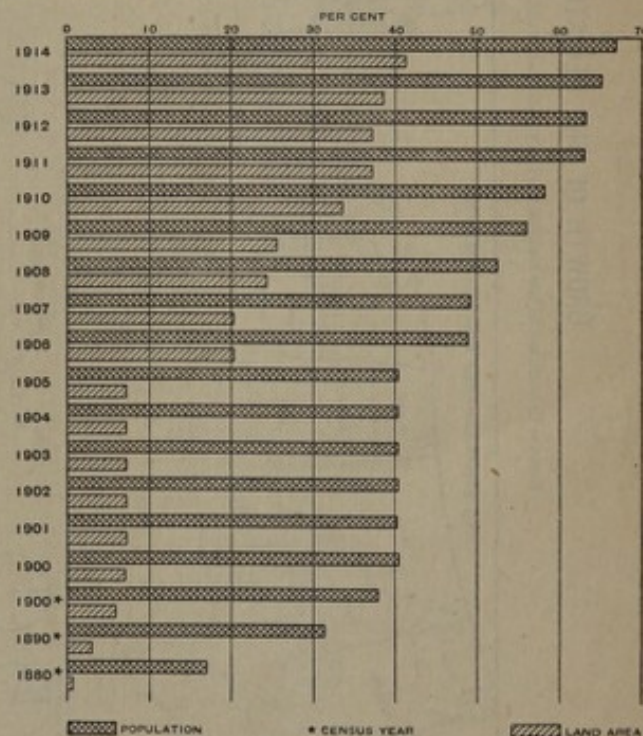

YEAR.	UNITED STATES.		REGISTRATION AREA FOR DEATHS.			
	Population.	Land area (square miles).	Population.		Land area.	
			Number.	Per cent of total.	Square miles.	Per cent of total.
Calendar year 1914.....	98,781,324	2,973,890	65,989,295	66.8	1,228,644	41.3

Calendar year 1901.....	77,747,402	2,974,159	31,370,932	40.3	212,770	7.2
Calendar year 1900.....	75,994,575	2,974,159	30,765,618	40.5	212,621	7.1
Census year 1900 ¹			28,807,299	37.9	176,878	5.9
Census year 1890 ²	62,622,250	2,973,965	19,659,440	31.4	90,695	3.0
Census year 1880 ²	50,155,783	2,973,965	8,538,366	17.0	16,481	0.6

¹ Net reduction of 269 square miles as compared with area stated by census of 1900, due to drainage of lakes and swamps in Illinois and Indiana, building of the Roosevelt and Laguna Reservoirs, and overflow of the Colorado River into the Salton Sea in California.

² Ended May 31.

The percentages which the population and the land area of the registration area formed of the total population and land area of the United States for the years 1880, 1890, and 1900 to 1914, inclusive, are presented in the following diagram:

PERCENTAGES WHICH THE POPULATION AND THE LAND AREA OF THE REGISTRATION AREA FORMED OF THE TOTAL POPULATION AND LAND AREA OF THE UNITED STATES FOR THE YEARS 1880, 1890, AND 1900 TO 1914, INCLUSIVE.

EXTENT OF THE REGISTRATION AREA IN 1914.

The registration area in 1914 was composed of 25 states, the District of Columbia, and 32 cities in non-registration states. Included among the registration states, however, is North Carolina, the returns from which relate only to the municipalities having 1,000 population and over in 1910. These states and cities were admitted to the registration area only after it appeared, from such evidence as was available, that their returns were approximately complete; that is to say, that at least 90 per cent of all deaths were properly recorded under state law or municipal ordinance and that transcripts of the records were furnished the Bureau of the Census.

The following states are included in the registration area for 1914:

California.	Minnesota.	Ohio.
Colorado.	Missouri.	Pennsylvania.
Connecticut.	Montana.	Rhode Island.
Indiana.	New Hampshire.	Utah.
Kansas.	New Jersey.	Vermont.
Kentucky.	New York.	Virginia.
Maine.	North Carolina (mu-	Washington.
Maryland.	nicipalities of 1,000	Wisconsin.
Massachusetts.	population and over	
Michigan.	in 1910).	

The entire area comprises the preceding states, the District of Columbia, and the following-named registration cities in nonregistration states:

Alabama:	Illinois:	South Carolina:
Birmingham.	Aurora.	Charleston.
Mobile.	Belleville.	Tennessee:
Montgomery.	Chicago.	Chattanooga.
Delaware:	Decatur.	Jackson.
Wilmington.	Evanston.	Knoxville.
Florida:	Jacksonville.	Memphis.
Jacksonville.	Quincy.	Nashville.
Key West.	Springfield.	Texas:
Pensacola.	Louisiana:	El Paso.
Georgia:	New Orleans.	Galveston.
Atlanta.	Nebraska:	San Antonio.
Augusta.	Lincoln.	West Virginia:
Savannah.	Omaha.	Wheeling.
	Oregon:	
	Portland.	

POPULATION OF REGISTRATION STATES, BY AGE AND SEX, IN 1914.

The following table shows the estimated midyear population, in 1914, of the registration states, exclusive of North Carolina, by sex, by single years of age from 0 to 4, and by five-year age periods from 5 to 100. The population at unknown ages has been distributed among the various ages and age groups according to the proportions which the numbers at those ages and in those age groups formed of the total population of known ages. The rates given in the table on page 16 are based on the figures in this table. The exclusion of North Carolina from this table is due to the fact that the deaths for that state were shown only for municipalities which in 1910 had 1,000 inhabitants or more, the population by sex and age for these localities not being available. The states included in the registration area for 1914 are listed on page 13.

SUMMARY AND ANALYSIS OF THE STATISTICS.

COLOR, NATIVITY, PARENT NATIVITY, AGE, AND SEX OF DECEDENT.

Of the 52,420 deaths reported in the registration area in 1914 as caused by cancer and other malignant tumors, 21,282, or 40.6 per cent, were of males, and 31,138, or 59.4 per cent, were females; and 50,515, or

96.4 per cent, were white, and 1,905, or 3.6 per cent, were colored persons. The deaths of colored persons comprised 1,824 Negroes (or 3.5 per cent of the total reported for both white and colored), 40 Chinese, 17 Japanese, and 22 Indians and 2 other colored.

Further comparisons of these groups may be made from the table on the following page.

DEATHS AND CRUDE DEATH RATES.

The total number of deaths due to cancer and other malignant tumors returned from the registration area of the United States for the year 1914 was 52,420. The estimated midyear population of this area was 65,989,295, or 66.8 per cent of the total estimated population of the United States. The cancer death rate for the year was therefore 79.4 per 100,000 of population, the highest on record since the establishment of the registration area in 1880.

The death rates given in this monograph, except in the table on page 16, are what are known as "crude" rates

per 100,000 population; that is, rates obtained by dividing the total number of deaths by the total (estimated) number of living inhabitants, no account being taken of sex and age distribution or of race, nativity, etc.

The following table shows, for the registration area as constituted in each year, the number of deaths and the death rates per 100,000 of population from cancer, for the census years ended May 31, 1880, 1890, and 1900, and for the calendar years 1900 to 1914, inclusive:

YEAR.	DEATHS FROM CANCER AND OTHER MALIGNANT TUMORS IN THE REGISTRATION AREA.		YEAR.	DEATHS FROM CANCER AND OTHER MALIGNANT TUMORS IN THE REGISTRATION AREA.	
	Number.	Rate per 100,000 population.		Number.	Rate per 100,000 population.
1914.....	52,420	79.4	1905.....	24,330	71.4
1913.....	49,928	78.9	1904.....	23,395	70.2
1912.....	46,531	77.0	1903.....	22,325	68.3

1908.....	33,465	71.5	1900 ¹	17,296	60.0
1907.....	30,514	70.9	1890 ¹	9,657	47.9
1906.....	29,020	69.1	1880 ¹	3,651	42.8

¹ Census year ended May 31.

The death rate from cancer for 1914, 79.4 per 100,000 population, represented a very slight increase over that for the preceding year, 78.9. This very slight increase, which prevailed in each of the main subdivisions of the registration area—that is, in registration states, in the rural territory in the registration states, taken as a whole, in the urban territory in the registration states, taken as a whole, in the registration cities outside the registration states, taken as a group, and in all registration cities, taken as a group—was not due to changes in the extent of the area, since the rate for Kansas, the only state added for 1914, was but 61.3, considerably less than that for the area as a whole.

High and low rates for states.—Among the registration states the highest rate (109.9) was that for Vermont, which state also had the maximum rate in 1913. In Maine the rate was 107.6; in Massachusetts, 101.2; in New Hampshire, 100.8; and in California, 97.9. The same five states showed the highest rates in 1913, although not in the same order. The lowest rate among the registration states in 1914 was that for Utah, 45.8; next in order were Kentucky, with 46; Virginia, with 48.9; Montana, with 51.5; and North Carolina, with 57.8. (For the last-named state the figures relate only to municipalities having 1,000 or more inhabitants in 1910.)

High and low rates for cities.—Among the cities of 100,000 population or over in 1910, the highest five death rates for cancer in 1914 were shown for the following: Albany, 146.7; San Francisco, 128.4; Boston, 118.7; New Haven, 113.5; and Worcester, 111.6. The lowest five rates were those for Birmingham, 46.3; Fall River, 55.8; Atlanta, 59.1; Scranton, 60.1; and Milwaukee, 69.4.

Crude rates for different localities noncomparable.—The bureau wishes to repeat in this report the warning which it has given in its annual mortality reports, with reference to the incomparability of the crude death rates for cancer in different localities, due to the fact that in the computation of these rates no account is taken of the sex, age, and color distribution of the population or of the matter of residence or nonresidence of decedents in the localities in which death occurred. The distribution according to residence or nonresidence is especially important, since a relatively high rate for a given city may be caused largely by deaths of non-residents who come to the city for hospital treatment. The color distribution also has a material effect on the rate, since colored persons are apparently less suscepti-

ble to cancer than are white persons, for which reason the states and cities in which the colored population is relatively large do not, as a rule, have as high rates as those places in which the population of this class is small or negligible.

Deaths and death rates in seven titles of International Classification: 1900-1914.—The following table presents, for the registration area, for each of the years 1900-1914, the estimated midyear population, the total number of deaths and the total death rate from cancer, and the number of deaths and death rate for each of the seven title headings of the detailed International Classification which relate to cancer and other malignant tumors:

CALENDAR YEAR.	REGISTRATION AREA.																	
	Estimated population, July 1,	Percent population of area formed of total population of the United States.	Deaths from cancer and other malignant tumors.	Deaths from cancer and other malignant tumors of the—							Death rate per 100,000 population from cancer and other malignant tumors. 1900.....	30,765,618	40.5	19,381	495	6,918	1,760	2,696	1,433	602	5,477	63.0	1.6	22.5	5.7	8.8	4.7	2.0	17.8

Of the 52,420 deaths caused by cancer, 19,889, or 37.9 per cent, were assigned to the title heading, "Cancer of the stomach and liver," and 8,152, or 15.6 per cent, to the heading, "Cancer and other malignant tumors of the female genital organs." It will thus be seen that well over half of all deaths classified as due to cancer resulted from cancers of the organs named.

Deaths, death rates, and per cent distribution, by location of disease: 1914.—The following table shows, for the registration areas, for 1914, the deaths and death rates per 100,000 population, and the per cent distribution from cancer, classified according to the organ or part of the body affected, as presented in this report:

CRUDE DEATH RATES AT ALL AGES AND SPECIFIC DEATH RATES FOR THIRTEEN AGE GROUPS, BY SEX, FROM CANCER AND OTHER MALIGNANT TUMORS, ACCORDING TO THE PART OF THE BODY AFFECTED, FOR THE REGISTRATION STATES: 1914.

The following table shows, for the registration states exclusive of North Carolina, the death rates, by sex and by age groups, per 100,000 population of the sex and in the age group specified, for the seven titles of the International Classification and for the subdivisions of these titles as presented in this report. The estimates of population on which these rates are based are given

in the table on page 13. The "age unknown" in both the population and the deaths has been distributed among the various groups according to the proportions which the population and the deaths, respectively, in these groups formed of the total population and total deaths at known ages.

North Carolina has not been included in the area covered by this table for the reason that the returns from that state relate only to municipalities having 1,000 population or over in 1910, for which it was not deemed feasible to make estimates of population by sex and age.

CRUDE DEATH RATES AT ALL AGES AND SPECIFIC DEATH RATES FOR THIRTEEN AGE GROUPS, BY SEX, FROM CANCER AND OTHER MALIGNANT TUMORS, ACCORDING TO THE PART OF THE BODY AFFECTED, FOR THE REGISTRATION STATES:¹ 1914.

[The rates in this table have not been "adjusted" so as to make the sum of the rates in any group conform in every case exactly to the rate given for the group as a whole. Each rate, however, is correct to the nearest tenth.]

¹ Exclusive of North Carolina.² "Age unknown" distributed.³ Less than one-tenth of 1 per 100,000 population.

MORTALITY FROM CANCER.

Of all deaths charged to cancer, 31,138 were those of females, as compared with 21,282 deaths of males. Under four of the seven headings deaths of males predominate; but those of females are so largely in excess among deaths assignable to the headings, "Cancer and other malignant tumors of the peritoneum, intestines,

and rectum" and "Cancer and other malignant tumors of the breast," that, taken with the 8,152 assigned to "Cancer and other malignant tumors of the female genital organs," they bring the total for females far in excess of that for males. This is a condition which prevails year after year.

DEATH RATES IN FOREIGN COUNTRIES: 1900-1914.

The crude death rates per 100,000 population from cancer, for each of the years 1900 to 1914, for the registration area of the United States and for certain foreign countries, are shown in the following table.

The rates for foreign countries were computed by the Bureau of the Census and were based on the population and deaths as given in the Annual Report of the Registrar-General of England and Wales, 1914.

¹ Figures not available.

² The rates for the years shown relate to the deaths for 24 of the 26 states of the Empire, representing 98.9 per cent of the total population in 1912.

³ Figures are provisional.

⁴ The figures for deaths from cancer are incomplete; only about 85 per cent were stated in 1901, 88 per cent in 1910, and 84 per cent in 1913.

⁵ The deaths from cancer include only those which were medically certified; the proportion of such certified deaths was 97 per cent in 1911.

SUMMARY AND RATE TABLES

SUMMARY AND RATE TABLES

SUMMARY AND RATE TABLES.

TABLE I.—POPULATION AND DEATHS AND DEATH RATES PER 100,000 POPULATION FROM CANCER AND OTHER MALIGNANT TUMORS IN THE REGISTRATION AREA AND ITS SUBDIVISIONS: 1914.

[All death rates are based upon the total deaths, including deaths of nonresidents and deaths in hospitals and institutions. Minor areas containing state insane asylums are designated by asterisks (*). Figures for white and colored are shown separately for minor subdivisions (except as indicated in the footnotes) only when the colored population of the subdivision formed at least 10 per cent of the total or numbered 10,000 or over in 1910. The term "cities" indicates municipalities of 10,000 inhabitants or over in 1910.]

MORTALITY FROM CANCER.

TABLE I.—POPULATION AND DEATHS AND DEATH RATES PER 100,000 POPULATION FROM CANCER AND OTHER MALIGNANT TUMORS IN THE REGISTRATION AREA AND ITS SUBDIVISIONS: 1914—Continued.

[All death rates are based upon the total deaths, including deaths of nonresidents and deaths in hospitals and institutions. Minor areas containing state insane asylums are designated by asterisks (*). Figures for white and colored are shown separately for minor subdivisions (except as indicated in the footnotes) only when the colored population of the subdivision formed at least 10 per cent of the total or numbered 10,000 or over in 1910. The term "cities" indicates municipalities of 10,000 inhabitants or over in 1910.]

¹ Including District of Columbia.² Less than one-tenth of 1 per 100,000 population.³ Includes only municipalities having a population of 1,000 or over in 1910.

MORTALITY FROM CANCER.

TABLE II.—DEATH RATES PER 100,000 POPULATION FROM CANCER AND OTHER MALIGNANT TUMORS, CLASSIFIED ACCORDING TO THE PART OF THE BODY AFFECTED, FOR THE REGISTRATION AREA AND FOR EACH REGISTRATION UNIT IN WHICH THERE WERE 50 OR MORE SUCH DEATHS: 1914—Continued.

[The population on which the rates are computed is shown in the table; for number of deaths classified in full detail according to the part of the body affected, see Table 2, p. 88. Minor areas containing state insane asylums are designated by asterisks (*).]

AREA AND COLOR.	Estimated population, July 1, 1914.	Death rate per 100,000 population from cancer and other malignant tumors.	DEATH RATE PER 100,000 POPULATION FROM CANCER AND OTHER MALIGNANT TUMORS OF THE—													Other organs or of organs not specified.
			Tongue.	Jaw.	Esophagus.	Stomach.	Liver and gall bladder.	Intestines.	Rectum.	Uterus.	Breast.	Skin.	Pancreas.	Prostate.	Bladder.

GENERAL TABLES

GENERAL TABLES

GENERAL TABLES.

TABLE 1.—DEATHS FROM CANCER AND OTHER MALIGNANT TUMORS, WITH STATEMENT OF DIAGNOSIS, AT SPECIFIED AGES, BY SEX AND COLOR, FOR THE REGISTRATION AREA, REGISTRATION STATES, AND FOR EACH REGISTRATION UNIT IN WHICH THERE WERE 50 OR MORE SUCH DEATHS: 1914.

[Figures for white and colored are shown separately for minor subdivisions (except as indicated in the footnotes) only when the colored population of the subdivision formed at least 10 per cent of the total or numbered 10,000 or over in 1910. The term "cities" indicates municipalities of 10,000 inhabitants or over in 1910. All cities and counties in registration states are shown in Table I, p. 21.]

AREA AND BASIS OF DIAGNOSIS.	All ages.	DEATHS FROM CANCER (ALL FORMS) AT AGE OF—														Deaths at un- known age.
		Under 25 years.	25 to 34 years.	35 to 39 years.	40 to 44 years.	45 to 49 years.	50 to 54 years.	55 to 59 years.	60 to 64 years.	65 to 69 years.	70 to 74 years.	75 to 79 years.	80 to 84 years.	85 to 89 years.	90 years and over.

LIST OF PUBLICATIONS OF THE PERMANENT CENSUS BUREAU—Continued

(Continued from page 2 of cover.)

WEALTH, DEBT, AND TAXATION

The various sections of the report on Wealth, Debt, and Taxation have been issued in bulletin form, there being eight bulletins in the series. The titles of the bulletins are as follows:

Taxation and revenue systems of state and local governments (a digest of constitutional and statutory provisions relating to taxation in the different states in 1912).
Assessed valuation of property and amounts and rates of levy: 1900-1912.

National and state indebtedness and funds and investments: 1870-1912.
County and municipal indebtedness, 1912, 1902, and 1890; and sinking fund assets, 1912.
National and state revenues and expenditures, 1913 and 1903; and public properties by states: 1913.

County revenues, expenditures, and public properties: 1912.
Municipal revenues, expenditures, and public properties: 1912.
Abstract of special bulletins—Wealth, Debt, and Taxation: 1913.

MISCELLANEOUS PUBLICATIONS

FOREST PRODUCTS

(These publications, of octavo size, issued yearly, were compiled in cooperation with the Forest Service, Department of Agriculture. The only publication of this series issued for 1912 was Lumber, hark, and shingles. The compiling of these statistics has been discontinued by the Bureau of the Census, but will be continued by the Forest Service in less comprehensive form.)
Pulp-wood consumption: 1907, 1908, 1909, 1910, and 1911.
Lumber, hark, and shingles: *1907, 1908, 1909, 1910, 1911, and 1912.

Slack coopers' stock: 1907, *1908, 1909, *1910, and 1911.
Tannark and tanning extracts: 1907, 1908, and 1909. (This pamphlet was not issued in 1910 and 1911.)
Excelsior: 1911.

Venery: 1907, 1908, 1909, *1910, and 1911.
Tight coopers' stock: 1907, *1908, 1909, *1910, and 1911.

Wood distillation: 1907, *1908, 1909, 1910, and 1911.
Cross-ties purchased: 1907, 1908, 1909, 1910, and 1911.
Poles purchased: 1907, 1908, 1909, 1910, and 1911.
Forest products of the United States: *1907, 1908, and 1909. (This pamphlet was not issued for 1910 and 1911.)

HEADS OF FAMILIES—FIRST CENSUS OF THE UNITED STATES: 1790

(These volumes, of quarto size, are for sale only, at \$1 for each state; remittance should accompany the request, addressed to the Director of the Census.)

The first Census covered the present states of Connecticut, Delaware, Georgia, Kentucky, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, North Carolina, Pennsylvania, Rhode Island, South Carolina, Tennessee, Vermont, and Virginia. The returns for Delaware, Georgia, Kentucky, New Jersey, Tennessee, and Virginia were destroyed.

The following volumes have been issued: Connecticut, Maine, Maryland, Massachusetts, New Hampshire, New York, North Carolina, Pennsylvania, Rhode Island, South Carolina, Vermont, and Virginia. The volume for Virginia contains the state enumerations only from 1782 to 1786.

PHILIPPINE ISLANDS, CENSUS OF 1903

(On September 25, 1902, pursuant to act of Congress approved July 1, 1902, the President directed that the census of the Philippine Islands be taken by the Philip-

pine Commission, and that the United States Census Bureau compile and tabulate the returns and print and distribute the completed reports. These reports were issued in English and Spanish; both editions are now exhausted.)

*Volume I—Geography, history, and population.
*Volume II—Population.
*Volume III—Mortality, defective classes, education, families and dwellings.
*Volume IV—Agriculture, social and industrial statistics.

(Bulletins, compiled from the reports, English only.)

No. 1—Population of the Philippines.
No. 2—Climate of the Philippines.
No. 3—Volcanoes and seismic centers of the Philippine Archipelago.

CUBA, CENSUS OF 1907

(The Cuban Census of 1907 was taken by order of the provisional government, and the material was compiled and published, under the direction of the director of the Cuban census, by the Bureau of the Census. The report was printed in Spanish. In order to meet the demand in the United States for information regarding Cuba, the provisional governor of the Republic authorized the director of the Cuban census of 1907 to prepare a compendium, printed in English. Both volumes are of octavo size.)

*Censo de la República de Cuba: 1907 (report).
*Cuba: Population, history, and resources: 1907 (compendium).

VITAL STATISTICS

*Extension of registration area for births and deaths; a practical example of cooperative census methods as applied to the state of Pennsylvania: 1909.

Federal registration service in the United States; its development, problems, and future: 1910.

International classification of causes of sickness and death: 1910.

Legal importance of registration of births and deaths: 1908.

Legislative requirements for registration of vital statistics: 1909.

*Manual of international classification of causes of death (adopted by the Census Office for compilation of mortality statistics): 1902.

Manual of international list of causes of death: 1911.

*Medical education in vital statistics: 1903.

Modes of statement of cause of death and duration of illness upon certificates of death: 1907.

Physicians' pocket reference to the international list of causes of death: 1915.
Practical registration methods: 1902.
*Registration of births and deaths: 1903.
*Relation of physicians to mortality statistics: 1903.
*Statistical treatment of causes of death: 1903.
*Tuberculosis in the United States: 1905.
Vital statistics of the United States: 1900. (Bulletin 15.)

MISCELLANEOUS

American census taking: 1904.
Census Office and coordination of statistical work.
Collaboration in Federal and state statistical work.
Cooperation and unification in Federal and state statistical work: 1903.

Cotton ginning reports: Issued in card form (4 by 4 inches) at intervals during the cotton ginning season. Federal population estimates and supervision of local censuses.

History and growth of United States Census: 1790-1890.

Index to occupations, alphabetical and classified.
Leaf tobacco: Reports on quantity held by dealers and manufacturers: April 1 and October 1 of each year since 1912.

List of publications.

Report of the Director of the Census to the Secretary of Commerce and Labor concerning the administration of the permanent bureau: 1903.

Reports of the Director of the Census to the Secretary of Commerce concerning the operations of the bureau for each fiscal year, *1903-4, 1904-5 to 1915-16.

Special population censuses: El Paso, Tex., January 15, 1915; Hamtramck, Mich., June 23, 1915; Hastings, Neb., December 21, 1915; Highland Park, Mich., November 15, 1915; St. Clair Heights, Mich., November 18, 1915; Tulsa, Okla., April 15, 1915.

Standard forms for reporting the financial statistics of public schools: 1911.

Story of the Census: 1790-1910.

Statistical atlas of the United States: 1914.

*Suggested standard forms for reports of the financial transactions and physical statistics of parks: 1912.

Summary of state laws relating to the dependent classes: 1913.

Tentative program 1916-1919.

Uniform accounts as a basis for standard forms for reporting financial and other statistics of health departments: 1912.

Uniform accounts for systems of water supply: 1911.

Uniform municipal accounting: *1904, and 1908.

For list of Thirteenth Census publications, see following page.

THIRTEENTH CENSUS (1910) PUBLICATIONS.

All of the volumes of the final census reports, giving the results of the Thirteenth Decennial Census of 1910, have been issued. The volumes, numbered I to XI (comprising 10,875 pages), constituting the complete reports of the census, which are listed below, were issued in limited editions, intended chiefly for libraries, institutions, and special students of statistics. Because of the restricted distribution, any individual who desires to receive any or all of the volumes is asked to accompany his request by an explanatory statement which will justify the Director of the Census in placing his name upon the mailing list. The following list gives the title or description of each of the reports and bulletins issued in connection with the Thirteenth Census:

FINAL REPORTS OF THE THIRTEENTH CENSUS.

- POPULATION.**
Vol. I.—General report and analysis. 1589 p.
(Each chapter of this volume was printed as a separate. The titles are listed below.)
Vol. II.—Reports by states, with statistics for counties, cities, and other civil divisions—Alabama to Montana. 1404 p.
Vol. III.—Same—Nebraska to Wyoming; Alaska, Hawaii, and Porto Rico. 1228 p.
Vol. IV.—Occupation statistics. 615 p.
AGRICULTURE.
Vol. V.—General report and analysis. 927 p.
(Each chapter of this volume was printed as a separate. The titles are listed below.)
Vol. VI.—Reports by states, with statistics for counties—Alabama to Montana. 877 p.
Vol. VII.—Same—Nebraska to Wyoming; Alaska, Hawaii, and Porto Rico. 1013 p.
MANUFACTURES.
Vol. VIII.—General report and analysis. 845 p.
Vol. IX.—Reports by states, with statistics for metropolitan districts. 1047 p.
Vol. X.—Reports for principal industries. 575 p.
(Each of the reports for the industries shown in this volume was printed as a separate bulletin. The titles are given below under the heading "Manufactures industry bulletins.")
MINES.
Vol. XI.—Mines and quarries. 560 p.

REPRINTS OF CHAPTERS OF FINAL REPORTS.

- Each of the chapters of Volume I of the final reports, which is the general report and analysis of the population statistics, was reprinted as a separate. The titles of the chapters are as follows:
I. Number of inhabitants. 104 p.
II. Color or race, nativity, and percentage. 122 p.
III. Sex distribution. 62 p.
IV. Age distribution. 313 p.
V. Marital condition. 182 p.
VI. State of birth. 92 p.
VII. Country of birth. 84 p.
VIII. Foreign white stock. 84 p.
IX. Mother tongue. 84 p.
X. Year of immigration. 16 p.
XI. Voting and militia ages. 64 p.
XII. School attendance. 88 p.
XIII. Illiteracy. 87 p.
XIV. Inability to speak English. 20 p.
XV. Dwellings and families. 8 p.
XVI. Ownership of homes. 71 p.

The following tables from Volume IV, Occupation statistics, have been reprinted as separate:
III. Occupations: Cities of 100,000 and over. 57 p.
IV. Occupations: Cities of 25,000 and over. 85 p.
V and IX. Occupation statistics: Alaska, Hawaii, and Porto Rico. 19 p.

The titles of the chapters of Volume V, the general report and analysis of the statistics of agriculture, each of which was reprinted as a separate, are as follows:

- I. Farms and farm property. 70 p.
II. Farm tenure. 60 p.
III. Farm mortgages. 12 p.
IV. Statistics of farms, classified by race, nativity, and tenure of farmers. 83 p.
V. Size of farms. 70 p.
VI. Live stock on farms and elsewhere. 145 p.
VII. Live-stock products and domestic animals sold or slaughtered on farms. 68 p.
VIII. Summary for all crops. 84 p.
IX. Individual crops. 170 p.
X. Agricultural statistics, by counties. 92 p.
XI. Irrigation. 59 p.
XII. Plantations in the South. 13 p.

The following tables of Volume VIII, the general report and analysis of the statistics of manufactures, have been reprinted as separate:

- Tables V and VI. 245 p. Table V.—Comparative summary.—Principal industries, by states, 1900, 1904, and 1909. Table VI.—Number of establishments, persons engaged, power, capital, expenses, and value of products.—Industries by states, 1909.
Chapter XV and Table I. Description of individual industries with principal statistics for each. 145 p.

The following section of Volume X, Reports for principal industries, has been reprinted as a separate: Statistics of manufactures for metropolitan districts, 1909. 77 p.

ABSTRACT OF THE CENSUS WITH STATE SUPPLEMENTS.

The Abstract of the Census, a volume of 569 pages, which is intended for general distribution, is prepared in such a way as to meet the needs of most persons desiring information concerning the results of the census. It contains in tabular form all important census statistics for the United States as a whole and for each state and principal cities, together with a brief text and diagrams and maps explaining the figures and their meaning. The Abstract, therefore, is a condensation of the complete census reports, both tables and text, and not merely a compilation of tables.

The Abstract is issued in special editions, one for each state, each edition containing a supplement of detailed statistics for counties, cities, and other divisions of the state to which it relates, designed to meet the needs of persons resident in that state, especially interested in it. The supplement contains both tables and text. The information thus printed in the Abstract is also given in a series of state bulletins noted below, entitled "Reports by States" (Volumes XII and IX).

As a compact reference work of general and local interest the Abstract is more convenient for most persons than the voluminous final reports.

The following list gives a summary of the chapters: INTRODUCTION.

- POPULATION.**
1. Number and distribution of inhabitants.
2. Color or race, nativity, and percentage; sex; population 21 years of age and over; males of militia age.
3. Age and marital condition.
4. State of birth of native population.
5. Population of foreign birth and foreign parentage, by country of origin.
6. Foreign-born population.—Date of immigration.
7. School attendance and illiteracy.
8. Dwellings and families.

- AGRICULTURE.**
9. Farms and farm property.
10. Tenure, mortgage indebtedness, color and nativity of farmers, and size of farms.
11. Live stock on farms and elsewhere.
12. Live-stock products and domestic animals sold or slaughtered on farms.
13. Farm crops.—Acreage, production, and value.
14. Irrigation and irrigated crops.

MANUFACTURES.

15. Statistics for states, cities, and industries.
MINES AND QUARRIES.
16. Mines and quarries.

STATE BULLETINS.

The state bulletins, of which a few copies are available for distribution, give, each for a particular state, detailed results of the census for the main branches of population, agriculture, irrigation, and manufactures. These fall into several distinct series, as follows:

POPULATION.

First series.—By counties and minor civil divisions. Gives the population of the state, the density of population, and the urban and rural population, with tables showing the population in 1910 and 1900 for each county and for each minor civil division within the county.

Second series.—Gives composition and characteristics of the population, statistics of color, nativity, percentage, sex, citizenship, illiteracy, school attendance, and dwellings and families, with tables for all counties, and for cities having 2,500 or more inhabitants.

The contents of these bulletins were printed as Volumes II and III of the final reports.

AGRICULTURE.

First series.—Number of farms, farm property, live stock, principal crops, and farm expenses.

Second series.—Reproduces the material for the first series, and gives additional information in regard to tenure, live-stock products, and minor crops, and presents a complete record for each state and for each county of all the agricultural data gathered at the census of 1910.

The contents of these bulletins were printed as Volumes VI and VII of the final reports.

IRRIGATION.

Statistics of irrigation, farms and acreage irrigated, irrigation works, cost of construction, cost of operation and maintenance, and crops irrigated, issued separately for the following states: Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, and Wyoming, and in a separate bulletin for Kansas, Nebraska, North Dakota, Oklahoma, South Dakota, and Texas.

The contents of these bulletins were printed in Volumes VI and VII in connection with the agricultural statistics of the states to which they relate.

MANUFACTURES.

Statistics for manufactures for the states and for principal cities and industries. The contents of these bulletins, which were issued for each state, and for principal industries, were reprinted as Volume IX, Reports by states, with statistics for principal cities, and Volume X, Reports for principal industries.

ABSTRACT BULLETIN.

Abstract bulletins give the general results of the census for the country as a whole by states, and, where applicable, by larger cities. All of the matter contained in them has been reprinted in greater detail in the final reports. The following bulletins were issued:

- POPULATION.**
Number and distribution of inhabitants. 55 p.
Color or race, nativity, percentage, sex, and males of voting and militia ages. 44 p.
School attendance and illiteracy. 39 p.
Age and marital condition. 47 p.
Country of birth. 32 p.
State of birth. 18 p.
Occupation statistics. 107 p.

AGRICULTURE.

- Farms and farm property. 20 p.
General farm crops. 24 p.
Live stock on farms and elsewhere. 34 p.
Tenure, mortgage indebtedness, color and nativity of farmers, and size of farms. 34 p.
Crops. 60 p.
Live-stock products. 16 p.

IRRIGATION.

- Irrigation in the United States. 12 p.

MANUFACTURES.

- Manufactures—States, cities, and industries. 66 p.

MINES.

- Mining industries in the United States. 24 p.
Coal mining. 55 p.
Iron mining. 25 p.

MANUFACTURES INDUSTRY BULLETINS.

All of the matter contained in these bulletins was reprinted without change in Volume X, Reports for principal industries, of the final volumes. Agricultural implement industry. 12 p.
Automobiles, including bodies and parts. 37 p.
Bicycles, motorcycles, and parts. 6 p.
Distilleries, steel works, and rolling-mill, wire, and tinplate and tinplate industries. 59 p.
Hosiery and shoes, including cut stock and findings. 20 p.
Butter, cheese, and condensed-milk industry. 23 p.
Canning and preserving. 21 p.
Carriage and wagon industry. 17 p.
Chemicals. 22 p.
Clay-products industry. 20 p.
Coke. 10 p.
Cordage and twine and lute and linen goods. 11 p.
Cotton goods, including cotton small wares. 20 p.
Dyeing and finishing textiles. 10 p.
Dressmaking and extracts. 7 p.
Electrical machinery, apparatus, and supplies. 17 p.
Essential oils. 6 p.
Explosives. 7 p.
Fertilizer industry. 13 p.
Flour-mill and gristmill industry. 24 p.
Fur-hat industry. 8 p.
Gas. 12 p.
Glass. 12 p.
Glucose and starch. 5 p.
Hosiery and knit-goods industry. 25 p.
Ice. 15 p.
Leather glove and mitten industry. 12 p.
Leather industry. 19 p.
Lumber industry. 24 p.
Musical instruments and phonographs and graphophones. 17 p.
Oilcloth and linoleum. 7 p.
Paint and varnish industry. 13 p.
Paper and wood-pulp industry. 16 p.
Petroleum refineries. 10 p.
Printing and publishing industry. 41 p.
Rice cleaning and polishing. 9 p.
Salt. 7 p.
Shipbuilding, including boat building. 19 p.
Silk manufactures. 23 p.
Slaughtering and meat-packing industry. 23 p.
Soap. 11 p.
Sugar. 15 p.
Sulphuric, nitric, and mixed acids. 6 p.
Steam laundries. 15 p.
Turpentine and rosin industry. 18 p.
Woolen, worsted, and felt goods, and wool hats, carpets and rugs, and shoddy. 45 p.

MISCELLANEOUS BULLETINS.

Besides abstract and state bulletins, which are designed for more general distribution, there have been issued the following bulletins containing additional data and discussion regarding selected topics. All of the matter contained in these bulletins appears in the final volumes to which they pertain.

- Population of counties and equivalent subdivisions. 30 p.
Total population and area of the United States, by states and territories. 15 p.
Population of cities of 25,000 inhabitants and over. 45 p.
Center of population and median lines, continental United States. 5 p.
Population of counties and minor civil divisions, 1910, 1900, and 1890. 509 p.
Cities and their suburbs. 6 p.
Population of incorporated places. 111 p.
Occupation statistics. 107 p. This bulletin contains the principal statistics for occupations, with explanation and analytical text shown in Volume IV.
Irrigation for rice growing—Louisiana, Texas, and Arkansas. 14 p.
Irrigation in Kansas, Nebraska, North Dakota, Oklahoma, South Dakota, and Texas (exclusive of irrigation for rice). 28 p.
Chemicals and allied products, 1909. 66 p. This bulletin is a combination of the separately issued bulletins for general chemicals; hats, carbon, and lampblack; dyestuffs and extracts; explosives; fertilizers; essential oils; paint and varnish; sulphuric, nitric, and mixed acids; and wood distillation.
Textiles, 1909. 175 p. This bulletin is a combination of the separately issued bulletins covering the textile industries: Cotton manufactures; hosiery and knit goods; woolen, worsted, and felt goods, and wool hats; carpets and rugs; shoddy; wool pulling; wool scouring; fire-felt hats; silk manufactures; cordage and twine and lute and linen goods; and the dyeing and printing of textiles.
Metropolitan districts, 1909. 77 p. This bulletin includes the statistics of manufactures for the following metropolitan districts: New York City; Chicago; Philadelphia; Pittsburgh; Boston; St. Louis; Cleveland; Buffalo; Detroit; Cincinnati; Baltimore; Minneapolis-St. Paul; and San Francisco-Oakland.

SPECIAL BULLETINS.

- The four bulletins named below contain statistical compilations not found in the final reports of the Thirteenth Census.
Population of New York City, by enumeration districts. 23 p.
Statistics of the Indian population, number, tribes, sex, age, fecundity and vitality. 25 p.
Age of farmers, by color of operator, character of tenure, and size of farm. 35 p.
Stability of farm operators, or term of occupancy of farms. 22 p.
