A. GENERAL

The main provisions of the Food Safety Act 1990 came into force on 1 January 1991. The Act covers Great Britain and provides the framework for all its food legislation.

B. Key Provisions of the Food Safety Act 1990

PART I: PRELIMINARY

Section 1 defines "food" and other basic expressions used in the Act such as "food business", "food premises" and "food source". **Section 2** extends the meaning of sale to include food supplied in the course of a business and **Section 3** sets out presumptions applying to food and food ingredients, for instance that food commonly used for human consumption found on certain food premises is presumed to be intended for sale.

PART II: MAIN PROVISIONS

Section 7 describes the offence of rendering food injurious to health and **Section 8** sets out the offence of selling or possessing for sale food that does not comply with food safety requirements. This is food that has been rendered injurious to health, which is unfit for human consumption or is so contaminated that it would not be reasonable to expect it to be used for human consumption. **Section 8** also states that if any part of a batch of food does not comply with food safety requirements the whole batch is presumed not to comply, unless the contrary is proved.

Section 14 makes it an offence to sell food which is not of the "nature or substance or quality" demanded by the purchaser and **Section 15** creates an offence of falsely describing, advertising or presenting food.

General Enforcement Provisions

Section 9 of the Food Safety Act gives enforcement officers powers to inspect any food intended for human consumption and to detain and seize food suspected of not complying with food safety requirements. It allows a Justice of the Peace to condemn food when he or she is satisfied that food safety requirements are not met. **Section 10** provides for improvement notices to be issued where food hygiene or food processing regulations have been contravened. **Section 11** provides for prohibition orders to be issued by the courts where there is a risk of injury to health and the proprietor of the food business has been convicted of an offence under food hygiene or food processing regulations. **Section 12** provides emergency prohibition powers for use by authorised officers where there is an imminent risk of injury to health. **Section 13** gives Ministers powers to make emergency control orders prohibiting commercial operations in relation to food, food sources or contact materials when there is an imminent risk of such food causing such injury to health.

Defences

Section 20 enables an enforcement authority to "by-pass" the immediate offender and to prosecute the real offender. Section 21 provides for a defence if defendants can prove to a court that they took all reasonable precautions and exercised all due diligence to avoid committing an offence. The defendant is deemed to have satisfied this due diligence defence in certain circumstances. These deemed due diligence defences are not available to a defendant who manufactured or imported the food. Section 22 contains a special defence for businesses which publish an advertisement in good faith.

PART III: ADMINISTRATION AND ENFORCEMENT

Section 32 sets out who may enter premises to enforce the Act and explains what they can do while on premises. It also makes unauthorised disclosure of information obtained when using such powers an offence. **Section 33** makes it an offence intentionally to obstruct a person enforcing the Act or to provide false or misleading information.

Section 34 provides time limits for prosecutions.

Penalties and Modes of Trial

Section 35 sets out the penalties for offences. For most offences a Crown Court may impose a prison sentence of up to two years and/or unlimited fines. Magistrates' Courts generally may impose a fine of up to £5,000 and a prison sentence of up to six months. For the most serious offences Magistrates' Courts may impose a maximum fine of £20,000. Magistrates' Courts may also impose penalties for obstructing an enforcement officer. In Scotland equivalent penalties may be imposed by the Sheriff.

Section 36 provides that someone in authority in a corporate body is liable for prosecution where they are proved to have acted negligently or consented to the alleged offence. **Sections 37 and 39** provide for appeals against decision of an enforcement authority to serve an improvement notice, and to refuse certificates under **Section 11(6) or 12(8)**. The appeal is to a Magistrates' Court or, in Scotland, to the Sheriff, and further appeals are available to the Crown Court for the cases referred to in **Section 38**.

Offences against regulations and mode of trial may be detailed in the individual regulations having effect under the Act. Penalties and modes of trial in individual regulations having effect under the Act have been altered by specific penalty Regulations. These are the Food (Revision of Penalties) Regulations 1982 and the Milk and Dairies (Revision of Penalties) Regulations 1982 which lay down the mode of trial and the Food (Revision of Penalties) Regulations 1985 and the Milk and Dairies (Revision of Penalties) Regulations 1985 which lay down the maximum fines for summary convictions for offences under the regulations. Existing regulations with offences and penalties have also been amended by Consequential Modifications Orders made under the Act (see pages 3- 5).

PART IV: MISCELLANEOUS AND SUPPLEMENTAL

Section 54 provides for the Act to apply to the Crown and to Crown premises subject to special arrangements and certain exemptions. The Section came into effect on 1 April 1992. **Section 55** amends the Water Act 1989 to extend its controls on the quality of water used for domestic purposes to cover water used in food production.

PART 2 FOOD LABELLING AND THE MARKING OF FOOD

A: FOOD LABELLING REGULATIONS

SI Number

1996 No 1499

THE FOOD LABELLING REGULATIONS 1996 - implement Council Directive 79/112/EEC (OJ No. L33 8.2.79) on the approximation of the laws of the Member States relating to the labelling, presentation and advertising of foodstuffs for sale to the ultimate consumer (excluding the provisions relating to net quantity, and except in relation to certain additives), as now amended by Council Directive 85/7/EEC (OJ No. L2, 3.1.85), 86/197/EEC (OJ No. 144, 29.5.86) and 89/395/EEC (OJ No. L186, 30.6.89) and Commission Directives 91/72/EEC (OJ No. L42, 15.2.91) and 93/102/EEC (OJ No. L291);

They also implement Commission Directive 87/250/EEC (OJ No. L113, 30.4.87) on the indication of alcoholic strength by volume in the labelling of alcoholic beverages for sale to the ultimate consumer;

Council Directive 89/398/EEC (OJ No. L186, 30.6.89) on the approximation of the laws of the Member States relating to foodstuffs intended for particular nutritional uses;

Council Directive 90/496/EEC (OJ No. L276, 6.10.90) on nutrition labelling for foodstuffs;

Commission Directive 94/54/EC (OJ No. L300, 23.11.94), as now amended by Council Directive 96/21/EC (OJ No. L88), concerning the compulsory indication on the labelling of certain foodstuffs of particulars other than those provided for in Council Directive 79/112/EEC.

The Regulations, which apply to Great Britain, consolidate and replace the Food Labelling Regulations 1984, the Food Labelling (Scotland) Regulations 1984 and the Milk Labelling (Scotland) Regulations 1983. The principal provisions of the Regulations are that all food which is ready for delivery to the ultimate consumer or to a catering establishment, subject to certain exceptions, be marked or labelled with:

- (a) the name of the food;
- (b) a list of ingredients;
- (c) the appropriate durability indication, that is to say;
 - (i) in the case of a food other than one specified in subparagraph (ii) of this paragraph, an indication of minimum durability (a "best before" date);
 - (ii) in the case of food which, from the microbiological point of view is highly perishable and in consequence likely after a short period to constitute an immediate danger to health, a "use by" date;

- (d) any special storage conditions or conditions of use;
- (e) the name or business name and an address or registered office of the manufacturer or packer, or of a seller established within the European Community;

and in certain circumstances:

- (f) particulars of the place of origin of the food, if failure to give such particulars might mislead and;
- (g) instructions for use if it would be difficult to make appropriate use of the food in the absence of such instructions;

(NB - There are certain exemptions and additional requirements listed in the main regulations.)

There are less onerous rules for foods which are non-prepacked or pre-packed for direct sale.

These Regulations also attach conditions to the use of claims for foods for particular nutritional uses, reduced or low energy value claims, protein claims, vitamin or mineral claims, cholesterol claims, other nutrient claims and claims dependant on other foods; they prohibit medicinal claims. They also lay down a prescribed format for the nutritional labelling of foodstuffs.

The Regulations will be amended in 1998 to introduce quantitative ingredient listing for certain foods.

B: DECLARATION ON ADDITIVES

This note provides a general description of the requirements for additives used as ingredients in foods as required by the Food Labelling Regulations 1996.

1. Additives used as ingredients in prepacked foods to perform certain functions must be declared in the labelling by the appropriate category name of the function. This must be followed by their specific name or serial number. The categories are:

Acid	Flour treatment agent
Acidity regulator	Gelling agent
Anti-caking agent	Glazing agent
Anti-foaming agent	Humectant
Antioxidant	Modified starch
Bulking agent	Preservative
Colour	Propellant gas
Emulsifier	Raising agent
Emulsifying Salts	Stabiliser
Firming agent	Sweetener
Flavour enhancer	Thickener

2. Flavourings may be declared by either that name alone or by a more specific name.

3. In the case of acids, if the specific name includes the word "acid", the category name may be omitted.

4. In the case of modified starches, neither the specific name nor the serial number need be indicated.

5. If an additive serves more than one function in a food the category name which represents its principal function must be used to describe it. Where no category name is available for the function performed by an additive in a food, the additive must be declared in the ingredients list by its specific name. A serial number cannot be used on its own.

6. Non-prepacked foods and foods which are prepacked on the premises where they are sold are exempt from the above requirements. Exceptions to this exemption are that any additive used in the food to perform the function of an antioxidant, artificial sweeteners, colour, flavour enhancer or preservative must be indicated next to the name of the food, or on a ticket or notice displayed in immediate proximity to the food using the category name. However, in the case of edible ices and flour confectionery there need only be an indication that these additives may be present on a notice displayed near the food.

C: Lot Marking Regulations

1996 No 1502

THE FOOD (LOT MARKING) REGULATIONS 1996 - set out the lot marking requirements to be applied to all foodstuffs sold for human consumption (unless specifically exempted) including wines and spirits. These revoke and replace the Food (Lot Marking) Regulations 1992. They apply to Great Britain and came into force on 1 July 1996. Like the previous Regulations, these Regulations implement Council Directive 89/396/EEC (OJ No. L186, 30.6.89) on indications and marks identifying the lot to which a foodstuff belongs, as amended by Council Directives 91/238/EEC (OJ No. L107, 27.4.91) and 92/11/EEC (OJ No. L65, 11.3.92). The Directive establishes a framework for a common lot (or "batch") identification system throughout the Community in order to facilitate product recall along the whole of the food chain, for example where a product constitutes a health risk to consumers.

|--------------|---|
| 1988 No 2264 | The Zoonoses Order 1988, made under the Animal Health Act 1981, came into force on 22 December 1988. The Order designated BSE as a zoonosis, enabling powers under the Act to be used to reduce any risk to human health from BSE. |
| 1994 No 2627 | The Bovine Spongiform Encephalopathy (Miscellaneous Amendments) Order 1994, made under the Animal Health Act 1981, came into force on 2 November 1994. It implemented Commission Decision 94/381/EC and Commission Decision 94/474/EC. The Order extended the ban on use of SBO's in animal feed, banning the use of mammalian protein in ruminant feedingstuffs and making notifiable laboratory suspicion of spongiform encephalopathies in species other than cattle, sheep and goats. |
| 1996 No 1125 | The Fertilisers (Mammalian Meat and Bone Meal) Regulations 1996, made under the Agriculture Act 1970, came into force on 19 April 1996. The Regulations prohibit the use of meat and bonemeal as, or in, fertiliser used on agricultural land. It is only permitted for use in private gardens, and within greenhouses and glass or plastic structures. These Regulations were subsequently amended by SI 1996/2473, which replaced the definition of mammalian meat and bone meal with that used in the Bovine Spongiform Order 1996 (SI 1996/2007). |
| 1996 No 1193 | The Bovine Animals (Enforcement of Community Purchase Scheme) Regulations 1996, made under the European Communities Act 1972, came into force on 1 May 1996. They make provision for the enforcement of certain new requirements of Commission Regulation 716/96. The new legislation creates offences in respect of breaches of the provisions of these Regulations and specifies the penalties involved. They apply to approved operators of incinerators or rendering plants, approved under the Specified Bovine Material (No2) Order 1996 and to licensed operators of slaughterhouses licensed under the Fresh Meat (Hygiene and Inspection) Regulations 1995, whose premises are designated under the terms of Commission Regulation 716/96. |

- 1996 No 2097 The Fresh Meat (Beef Controls) No. 2 Regulations 1996, made under the Food Safety Act 1990, came into force on 1 September 1996. The Regulations prohibit the sale for human consumption of meat from any bovine animal slaughtered after 28 March 1996 in which, at the time of slaughter, there were more than two permanent incisors erupted, unless it can be proved by reference to documentary evidence that the animal was no more than two years and six months old. The Regulations provide an exemption from this prohibition for meat from certain third countries and meat from eligible cattle from herds registered under the Beef Assurance Scheme. The Regulations also set out the operating rules of the Beef Assurance Scheme.
- 1996 No 2264 The Heads of Sheep and Goats Order 1996, made under the Animal Health Act 1981, came into force on 15 September 1996. The Order prohibits the sale for human consumption of any product derived from the heads of sheep and goats of all ages, excluding those born, reared and slaughtered in New Zealand and Australia. The Order regulates the disposal of heads in the same manner as specified bovine material.
- 1996 No 2522 The Fresh Meat (Beef Controls) (No 2) (Amendment) Regulations 1996, made under the Food Safety Act 1990, came into force on 4 October 1996. The Regulations amend provisions on the Beef Assurance Scheme contained in the Fresh Meat (Beef Controls) (No 2) Regulations 1996. The Beef Assurance Scheme provisions on feed are amended to:
- i) allow herds which have used feed from any mills which have not had any mammalian meat and bonemeal on the premises in the previous four years to be eligible; and
 - ii) no longer restrict use of feed to specified sources.
- The Regulations also clarify that the feed requirements are concerned with mammalian meat and bonemeal.
- The Regulations also provide an exemption from the rule that the herd shall have been established for at least four years, where new herds are established entirely from animals in herds already registered under the Scheme.
- 1996 No 2458 The Bovine Spongiform Encephalopathy (Amendment) Order 1996, made under the Animal Health Act 1981 came into force on 24 September 1996. They control the despatch to other Member States of meat and other products from bovine animals slaughtered outside the UK. They make provision for registering and controlling the production of gelatin, tallow and other by-products for food, feed, pharmaceutical, medical and cosmetic uses. They also regulate the consignment of bovine vertebral column to establishments registered under these regulations. |
| 1997 No 617 | The Specified Bovine Material Order 1997, made under the Animal Health Act 1981, consolidates the SBM (No. 3) Order 1996, the SBM (No. 3) Amendment 1996, and the SBM (No. 3) Amendment (No. 2) Order 1996. It introduces further controls in relation to the use of SBM in cosmetic, pharmaceutical and medical products, in relation to staining requirements of SBM, and in relation to the definition of premises which can use SBM for manufacturing processes. |

PART 8: FOOD CONTROL

A: OFFICIAL CONTROL OF FOODSTUFFS

The Official Control of Foodstuffs Directive (89/397/EEC) was a key framework directive for the harmonisation of aspects of food law between EC member states. Adopted in 1989, it aimed to help establish the Single Market in Europe by achieving a consistent approach in the level of food law enforcement between EC member states in the run up to establishing the intended Single Market in 1992. The Directive did this by laying down the general principles to be followed by the national enforcement authorities of each EC member state. It established the main principles that:

- food should be inspected regularly at the point of production to avoid the need for border controls between member states;
- inspection procedures should be harmonised between member states;
- there should be mutual recognition of standards within the European Community; and
- details of member states' food law enforcement programmes should be submitted annually to the European Commission.

This Directive was implemented in the UK through the Food Safety Act 1990 and through statutory the Codes of Practice that guide UK enforcement authorities and which are made under that Act.

B: ADDITIONAL FOOD CONTROL MEASURES

The Official Control of Foodstuffs Directive was supplemented in October 1993 by the adoption of the Additional Food Control Measures Directive (93/99/EEC). This Directive continued the theme of harmonising food law enforcement between member states by:

- requiring that all member states have, or have access to, a sufficient number of qualified and experienced food control officials;
- setting standards for food control laboratories, and criteria for validating methods of analysis;

- establishing a small Commission Food Inspectorate;
- improving the exchange of information between member states and between the European Commission and member states.

Note: Enquiries relating to the legislation listed in Parts 8A & B should be addressed to the Ministry of Agriculture, Fisheries and Food, Food Labelling and Standards Division, Branch B, Room 325b, Ergon House c/o Nobel House, 17 Smith Square, London SW1P 3HX. (Telephone 0171-238-6762).

A: THE FOOD AND ENVIRONMENT PROTECTION ACT 1985

Part I of the Act empowers Ministers to make emergency orders where they consider that circumstances exist, or may exist, which are likely to create a hazard to human health through the consumption of contaminated food. Such orders prohibit the distribution of affected produce from an area where foodstuffs have, or may have, been contaminated. In practice these powers are used only where there are no other statutory means of dealing with contaminated food (e.g. sector-specific legislation under the Food Safety Act 1990).

Part I of the Food and Environment Protection Act was amended by Section 51 of the Food Safety Act 1990. The Act also applies in Scotland and Northern Ireland.

B: FOOD HYGIENE (GENERAL)

EC Directive 93/43 on the hygiene of foodstuffs lays down general rules of hygiene and procedures for verification of compliance with these rules. The Directive covers the preparation, processing, manufacturing, packaging, storing, transportation, distribution, handling and offering for sale or supply of foodstuffs not covered elsewhere by product-specific hygiene Directives. It also covers gaps in the product-specific hygiene Directives. For example, few of these Directives cover the sale or supply of their foodstuffs, and where they do not then Directive 93/43 does. EC Directive 96/3/EEC grants a derogation from certain dedicated transport provisions of Directive 93/43 above, as regards the transport of bulk liquid oils and fats by sea.

It contains Order making powers to require that goods bear or be accompanied by specific information in the course of their supply, and to define terms for the purposes of the Act. The Act prohibits the unauthorised use of devices or emblems signifying Royal approval or award.

The Consumer Protection Act 1987 (Part III) makes it an offence for a consumer to be given a misleading indication, by any means, of the price at which goods, services, accommodation or facilities are available. Guidance on how the requirements of Part III might be met is contained in The Code of Practice for Traders on Price Indications, available from the address below. The Act also contains powers to regulate specific price indications practices.

The Price Indications (Food and Drink on Premises) Order 1979, made under the Prices Act 1974, requires prices to be displayed on any premises where food and drink is or may be for sale for consumption by the public. The Order contains provisions on the number of prices to be shown, the inclusion of VAT and the circumstances under which the requirements differ, for example, whether the food or drink is supplied by self-service or not.

PART 14: WEIGHTS AND MEASURES LEGISLATION

THE WEIGHTS AND MEASURES ACT 1985

Section 28 of the 1985 Act makes short weight an offence. Orders made under Section 22 require prepacked food to carry on the container an indication of the net quantity of the contents. When sold other than prepacked, food is required to be sold either by quantity or, in certain circumstances, the seller has to make the quantity known to the customer. Orders also limit the quantities in which certain goods (the prescribed quantity goods) may be prepacked when offered for retail sale.

Part V of the 1985 Act provides for the "average" system of quantity control for prepacked goods.

The average system is designed primarily for application at the point of production or importation and requires the packer or importer to ensure that packages will pass an Inspector's reference test.

The Act is amended by the Weights and Measures Act 1985 (Metrication) (Amendment) Order 1994 and the Units of Measurement Regulations 1994.
