them, and cut them in thin Slices, mingle them with the Herbs, and put them into a Stew-pan, with as much new Milk from the Cow as will cover them all over; press the Herbs down that the Milk may be above them, so let them steep all Night, in the Morning distil them in an ordinary Still, with a very temperate Fire, lest the Milk burn to the Bottom of the Still, open the Still once or twice, and stir it with a Spoon, for it will be very apt to burn; you may distil two Still-fulls in a Day, if it be kept longer the Milk will grow sower.

Take six Spoonfuls of this Water, with as much White-Wine, some Nutmeg and Sugar, warmed, in a Morning Fasting, and eat nothing for an Hour after it, and also at Night when you go to Bed, three Days and Nights together, either before the Full or Change of the Moon. It is a general Opinion that it is not good to keep constantly to one Medicine for the Stone, therefore it is best to take one of these Waters at the Change, and the other at the Full of the Moon.

The first Snow that falls in the Beginning of the Winter is esteemed the best.

The Dose is two Spoonfuls at going to Bed, and two Spoonfuls in the Morning Fasting, but may be altered according to the Constitution and Strength of the Patient. dries up superfluous Humours in the Body, but not the Blood; it is admirable against the cold Palsy; sometimes it causes Bleeding, but very seldom, and purges by Stool, but not very often, and not dangerous at all; it strengthens Nature, purges Urine, helps Shortness of Breath, procures Appetite, kills Worms, cures Consumptions, and Dropsies.

251. *A Salve for a Strain.*

Boil Ale upon a gentle Fire, till it comes to the Consistence of a Salve or Plaister, spread it upon White Sheep or Lamb's Leaker, and so apply it.

It is excellent for any Bruise or Strain, especially if it is new done. If it be a Bruise, it will be necessary to take as much *Sperma Ceti*, or *Irish Slate*, as will lay on a Groat, in Posset-Drink, to drive the Humour outward.

252. *For a Felon or Whitloe.*

Take Red Sage and Rue, of each a like Quantity, beat them very well together, then take the White of a new-laid Egg, beat it with a Spoon 'till it comes to an Oil, Honey, and Wheat-Flour, as much as will make the Sage and Rue into a cold Poultice, mix or beat them well together, and so apply it, renewing it twice a Day, and it will cure it.

Dry them in a Room out of the Sun, without much Fire, turning them every Day, that they become not mouldy, nor musty; when they are well dried, put them up into Canvas Bags, or Paper Bags, severally.

When you make the Drink, take of each of the Herbs (if green) one Handful, or of all of them together (if so dried) three Handfuls; boil them in two Quarts of Running or Spring Water, until half the Water be consumed, strain the Liquor from the Herbs, and put to it a Quart of White-Wine, and a Pint of Honey, boil it again, taking away the Froth and Scum, then strain it, and keep it in Glass Bottles close stopped.

It will not keep good above three or four Weeks at the most. Take three or four Spoonfuls in the Morning Fasting, and late at Night. It cures old Sores, Green Wounds, Imposthumes, Fistulas, Sore Breast, Putrified Bones, Aches in the Stomach, Stauncheth Bleeding. Tent no Wound that you use it for, only search the Wound with a Tent to clean it, and cover it with a clean Cloth,

During the Time of the Cure, the Patient must keep a spare Diet, and abstain from Wine and strong Drink. Give it not to a Woman with Child, for it may cause her to miscarry.

254. *The Yellow-Salve.*

It is excellent good for Boils, to ripen and heal them.

If the Orifice be not large enough, or some proud Flesh grow in it, or Core, strew some Powder of burnt Allum and Precipitate on it, and let it lay for twenty-four Hours.

255. *An excellent Eye-Salve.*

Take a Lump of Salt, wrap it fast in a Paper, lay it in a red-hot Fire until it be as red-hot as the Coals, which it will be, and in a hard Lump, take it out of the Fire, and when it is cold, scrape off all the Black, and keep the white Lump for Use. When you use it, scrape it very fine, and bruise it with a Knife or Spoon, on a Plate or Marble, as fine as possibly you can; then take Liquid Honey if you have it, (if not) melt some Honey, take it by Spoonfuls into an Earthen or Pewter Porringer, and to every Spoonful put as much of this fine Powder as you can lay on a Groat for a Man, (if for a Horse, or any other Beast, as much as will lay on a Shilling) beat them very well with a Spoon for an Hour at the least.

Drop it into the Eye with a Goose-Quill, (or a Stick in the Shape of a Quill) stirring it well together with the Quill before you take it up to drop into the Eye. If you make it for a Horse or other Beast, you must put it into the Eye with a Feather. It will take off any Pearls, or Film, or Speck, or cure any Sore Eye in Man or Beast.

Cut the Hair from the Head so far as the Scald hath infected, then take White-Wine, Plantain Water, Sorrel Water, of each a like Quantity, and as much Juice of a Lemon as half of one of the other Waters; with these mixed together, wash the Head very well twice a Day for a Week together, anointing it after every Washing, with the Ointment before directed.

Then

Then use the Plaister following.

Take a Quarter of a Pound of Stone-pitch, an Ounce and half of *per* Rosin, melt them, and mix them well together, spread it on the Flesh Side of Allum Leather, apply it to the scald Head, shift it once in 24 Hours, and anoint the Head with the Ointment at every Shifting; when you take off the Plaister, take it up against the Hair, that it may take up the infected Hair. It will not be amiss, when the Plaister is off, to pick out of the Sore what Hairs you can, that are forked or double. Use the Plaister and Ointment until the Redness be gone, and that the Head be white, and no Corruption come. This Method will cure any scald Head.

When it is cold, role it out, and cut it into Pellets, as you please.

It is most excellent good in Defluxion or Rheum, holding a Pellet or two in your Mouth, then let it dissolve.

Tie a String about it as near the Root as you can, every Day tie it straiter, which you may do 'till it be ready to fall off, then cut it away.

To chuse Beef.

OX Beef has an open Grain, and the Fat, if young, is of a crumbling or oily Smoothness, except it be the Brisket and Neck Pieces, with such others as are very fibrous. The Lean ought to be of a pleasant Carnation Red, the Fat rather inclining to White than Yellow, and the Suet very white.

Cow Beef has a closer Grain, the Fat is whiter, the Bones less, and the Lean of a paler Colour. If it be young and tender, the Dent made by pressing it with the Finger will rise again in a little Time.

Bull Beef is of a deeper Red, a closer Grain, and firmer than either of the former, harder to be indented with your Finger, and rising again sooner. The Fat is gross and fibrous, and of a strong rank Scent. If it be old it will be so very tough, that your pinching it will scarcely make any Impression. If it be fresh it will be of a lively Colour, but if stale, of a dark dusky Colour, and very clammy. If it be bruised, the Part affected will look of a blackish or more dusky Colour than the Rest.

To chuse Mutton.

When upon pinching it between your Fingers it feels tender, and soon returns to its former Place, it is young; but if it wrinkle, and remain so, it is old. If it be young, the Fat will easily separate from the Lean, but if old, it will adhere more firmly, and be very clammy and fibrous. If it be Ram Mutton the Fat will be spongy, the Grain close, the Lean rough, and of a deep Red, and when dented with the Finger will not rise again. If the Sheep had the Rot, the Flesh will be palish, the Fat of a faint White, inclining to Yellow; the Meat will be loose at the Bone, and on your squeezing it hard, some Drops of Water, resembling a Dew or Sweat, will appear on the Surface. If it be a Fore Quarter, observe the Vein in the Neck, for if it looks ruddy,

94 *The Young Woman's best Companion.*

ruddy, or of an Azure Colour, it is fresh, but if Yellowish it is near tainting, and if Green it is already tainted. As to the Hind Quarter, smell under the Kidney, and feel whether the Knuckle be stiff or limber; for if the former has a faint or ill Scent, or the latter an unusual Limberness, you may be certain of its being stale.

To chuse Pork.

When upon pinching the Lean between your Fingers, it breaks and feel soft and oily, or if you can easily nip the Skin with your Nails, or if the Fat be soft and oily, it is young; but if the Lean be rough, the Fat very spungy, and the Skin stubborn, it is old. The Flesh of a Boar, or Hog, gelt at full Growth, feels harder and tougher than usual, the Skin is thicker, the Fat hard and fibrous, the Lean of a dusky Red, and rank Scent. That you may know it to be fresh or stale, try the Legs and Hands at the Bone, which comes out in the Middle of the fleshy Part, by putting in your Finger, for as they first taint in those Places, you may easily discover it by smelling to your Finger. When stale, the Skin will be clammy and sweaty; but when fresh, it will be smooth and cool.

To chuse dried Hams and Bacon.

Run a sharp-pointed Knife into the Middle of the Ham, on the Inside under the Bone, then drawing it out, smell to it, if its Flavour be fine and relishing, and the Knife little daubed, the Ham is sweet and good, but if the Knife be much daubed, has a rank Smell, and a Hogoo issues from the Vent, it is tainted. A Gammon of Bacon may be tried in the same Manner, and be sure to observe that the Flesh stick close to the Bones, and the Fat and Lean to each other; for if it does not, the Hog was not sound. Take care also, that the extreme Parts of the Fat near the Rind be White; for if it be of a darkish or dirty Colour, and the Lean pale and soft, it is rusty.

To chuse Brawn.

Brawn is known to be young or old by the Rind; for if this is thick and hard, it is old, but if soft, and of a moderate Thickness, it is young. If the Rind and Fat be remarkably tender, it is not Boar Brawn, but Barrow or Sow.

To chuse Veal.

The Flesh of a Bull Calf is firmer grain'd, and redder than that of a Cow Calf, and the Fat more curdled. Observe, if the Vein in the Shoulder be of a bright Red, it is new killed; but if greenish, yellowish, or blackish, or be more clammy, soft, and limber than usual, it is stale; and if it hath any greenish Spots about it, it is either tainting, or already tainted. If it be wrapped in wet Cloths it is apt to be musty; therefore always smell to it. The Loin taints first under the Kidney, and when stale, the Flesh will be soft and slimy. The Leg, if newly kill'd, will be stiff on the Joint; but if stale, limber, and the Flesh clammy, intermixed with green or yellowish Specks, the Neck and Breast are first tainted at the upper End, and when this is the Case, will have a dusky, yellowish, or greenish Appearance, and the Sweetbread on the Breast will be clammy.

To chuse Butter.

When you buy Butter, do not trust to the Taste they give you, lest you be deceived by a well-tasted Piece artfully placed in the Lump; but taste it yourself at a Venture. It is easier to distinguish Salt Butter by scenting than tasting it; therefore run a Knife into it, and put it immediately to your Nose. As a Cask may be purposely pack'd, do not trust to the Top alone, but unhoop it to the Middle, and thrust down your Knife close to the Staves of the Cask, and then you cannot be deceived.

To chuse Eggs.

When you buy Eggs hold them up against the Sun, or a Candle, and if the Whites appear clear and fair, and the Yolk round, they are good; but if muddy or cloudy, and the Yolk broken, they are nought. Or put the great End to your Tongue; if it feels warm, it is new; but if cold, it is stale. Or take the Egg and put it into a Pan of cold Water; the fresher it is the sooner it will sink to the Bottom; but if it be rotten, or addled, it will swim on the Surface of the Water. The best Way to keep them is in Bran or Meal.

To chuse Cheese.

If the Coat of an old Cheese be rough, rugged, or dry at the Top, it indicates Mites, or little Worms; or if spungy, moist, or full of Holes, it is subject to Maggots. If you perceive on the Outside any perished Place, be sure to examine its Depth.

To chuse a Cock or Hen Turkey, Turkey Poults, &c.

If the Legs of a Turkey-Cock are black and smooth, and his Spurs short, he is young; but if his Legs are pale and rough, and his Spurs long, he is old. If long killed, his Eyes will be sunk into his Head, and his Feet feel very dry; but if fresh, his Eyes will be lively, and his Feet limber. For the Hen, observe the same Signs. If she be with Egg, she will have an open Vent; but if not, a close hard Vent. The same Signs will discover the Newness or Staleness of Turkey-Poults.

*To know Fish, whether New or Stale, &c.**Of Sturgeon.*

If this Fish be not well cured, it will never have its true Goodness. To know this, cut it with a sharp Knife; and if it crumble and shiver, and feel rough and brittle between your Finger and Thumb, it is not for your Turn: But if it be good, it will be a little tough, and squeeze
oily

oily out, in a Manner like Wax, look white, and in some Places have blue Streaks or Veins, the Skin limber, feeling fat underneath, and emit a pleasant Scent.

Of Salmon.

If the Scales are bright and shining, of a light azure Colour, the Skin, when press'd down, rising again quickly, the Flesh of a blushing Colour, and of a pleasant Scent, then it is good: But if the Scales be cloudy, dark, easily slip off the Skin, rough and stubborn, the Flakes short, dry and brittle, then is the Goodness gone from it, and it is either decay'd Fish, or has been recovered by Pickle after Damage.

Turbots, Cod, Fresh Salmon, Carp, Pike, Bream, Roch, Trout, Grayling, Ruff, Chub, Tench, Eel, Barbel, Whiting, Smelts, &c.

These, and all such like Fish, if new, will be stiff, and their Eyes well standing, and of a lively Colour; but when they begin to taint, their cold slimy Substance makes them limber, the Moisture falling from the Brain renders the Eyes more dull, and, as it were, shrinking or sinking; their Fins, tho' often wetted by the Fishmongers to prevent it, will however crimple, and shew Signs of approaching Putrefaction.

Lobsters.

The Cock is usually smaller than the Hen, and of a deeper Red, when boiled; neither has it any Spawn or Seed under its Tail.

To know whether these be new or stale, unbind the Tail, and if it be stiff in opening, and snap to again, then it is new; but if limber and flagging, it is stale: If new, it has a pleasant Scent at that Part of the Tail which joins to the Body; if it is spent, a white Scurf will issue out among the Roots of the small Legs, and at the Mouth. To see whether it is full, open it with the Point of a Knife, on the Bend of the Tail, as it is tied down; and if it fill the Shell there, and be red, hard

and pleasant scented, it is good; but if sinking and soft, it is spent and wasted; for the Fishmonger, to deceive the ignorant Buyer, will only open them at the extreme Part of the Tail; and tho' they be wasted, they will appear well enough there. If you suspect the Claws filled with Water, to make them weighty, as sometimes they do, pull out a Plug you will find there, and the Water will gush out.

Crab Fish, great and small.

If stale, the Joints of their Claws will be limber, the Colour of their Shells of a dusky Red, and an ill Scent just under the Throat; their Eyes will be very loose, turn any Way with the Tip of your Finger, and sink inward.

Prawns and Shrimps.

If new, they will be hard and stiff, cast a pleasant Scent, and their Tails turn strongly inward: But if stale, they will be limber, and fade in their Colour, smell faintly, and feel clammy.

Salt Cod and Old Ling,

Are known to be good, when the Flakes rise well and oily, the Bone parts clean from the Flesh, and they are of a bright, natural Colour, and good Scent; but they are bad when they break short, are hard and dry, change Colour, the Skin rough, and sticking close, not well to be stirred or removed.

Pickled Herrings, and Pilchards.

Open the Back; if the Flesh be soft and mellow, kindly parting from the Bone, comes out in long Flakes, the Bone white, and somewhat inclining to a light Red, then are they new and good; but if the Flesh stick to the Bone, be brittle and rough, the Bone of a yellowish, blackish, or murry Colour, they are rusty, and of little Worth.

Red-Herrings.

If they carry a good Gloss, and the Flesh part kindly from the Bone, and they be of a light, bright Colour, they are good; but the contrary shews them decay'd or rusty.

Fresh Herrings, and Mackerel.

Their Newness or Staleness is known by their keeping or losing their lively shining Redness on their Gills; for a deadish, fading Colour, with an ill Scent, their Fins^s crimpling and limber, and their Eyes looking dry and dull, shew that they are stale, whereas the contrary denotes them new.

Plaife, or Flounders.

If their Eyes are any Ways sunk, or look very dull; if they be limber, and have an unusual cold, clammy Slime upon them, then are they stale; but if they be stiff, their Eyes clear and moderately dry, their Fins stiff, and not crimpling or shrivelling together, it is a Sign of Newness, or that they have not long been dead.

The Plaife has red or orange-colour'd Spots on her Back, her Fins more spreading, of a tawnyish or brown Colour on the Back, and a more earthy white Belly, her Mouth standing, as it were, more awry.

The Flounder is dusky, or cloudy on the Back, without Spots, thicker, and more compacted, and a Kind of an azurish white Belly.

Maids, and Thornbacks.

The Staleness appears in these, by their Eyes beginning to sink and look dull, their Flesh feeling flabby, their Lips beginning to hang, and the Corners of their Mouths to be corrupted: But when no such bad Signs appear, they may well enough pass for new.

Anchovies.

Open the Cork in the Middle of the Head of the Barrel, put in your little Finger, and taste the Pickle;
K 2 if

if it tastes mellow, has a good Relish, and looks of a dusky Red, then it is the natural Pickle, and they may prove well; but if it be whitish, watry, rough, and very brackish, it signifies new Pickle has been put to them. But to try the Fish, open the Backs of two or three of them; and if the Flesh be of a pleasant Red, soft and mellow, the Bone moist and oily, the Flesh easily parting to good Lengths, without breaking, then are they good; but if it be stiff, brittle, of a dusky Colour, the Bone dry, and of a whitish yellow, or blackish, then they are decay'd, or have been rusty, and artificially recovered, and consequently naught.

To preserve Fish a while when near tainted.

This is meant of fresh Fish: The best Way to do it, if they are not too far gone, is, take out their Guts, but do not wet them with Water; then sprinkle them within and without with Salt, and lay them in Rows, on Flags or Rushes, in a cool dry Cellar, but not to touch one another; then cover them with Hyssop, or Winter-savoury, and so they will keep 24 Hours pretty well, the Herbs drawing the Scent from them, and the Rushes the Moisture and Slime; but they will afterwards be better boiled or baked, than fry'd, stew'd or roasted, unless they are stew'd with Spice and Wine.

Instructions for Carving.

To unjoint a Bittern.

RAISE the Wings and Legs as a Hern, which see, and use no other Sauce but Salt.

To cut up a Bustard. See Turkey.

To unlace a Coney.

Turn the Back downward, and cut the Flaps or Apron from the Belly or Kidney; then put in your Knife between the Kidnies, and loosen the Flesh from the Bone on each Side; then turn the Belly downward, and cut the

the Back across between the Wings, drawing your Knife down on each Side the Back-bone, dividing the Legs and Sides from the Back: Pull not the Leg too hard, when you open the Side, from the Bone, but with your Hand and Knife neatly lay open both Sides from the Scut to the Shoulder; then lay the Legs close together.

To display a Crane.

Unfold his Legs, then cut off his Wings by the Joints; after this, take up his Legs and Wings, and sauce them with Vinegar, Salt, Mustard, and powder'd Ginger.

To unbrace a Duck, or Mallard.

Raise up the Pinions and Legs, but take them not off, and raise the Merry-thought from the Breast; then lace it down each Side of the Breast with your Knife. After the same Manner unbrace a Mallard.

To rear a Goose.

Take off both Legs fair, like Shoulders of Lamb; then cut off the Belly-piece round close to the End of the Breast; then lace your Goose down on both Sides of the Breast half an Inch from the sharp Bone; then take off the Pinion on each Side, and the Flesh you first laced with your Knife, then raise it up clean from the Bone, and take it off with the Pinion from the Body: Then cut up the Merry-thought; then cut from the Breast-bone another Slice of Flesh, quite through; then turn up your Carcase, and cut it asunder, the Back-bones above the Loin-bones.

To dismember a Hern.

Take off both the Legs, and lace it down the Breast on both Sides with your Knife, and open the Breast-pinion, but take it not off; then raise up the Merry-thought between the Breast-bone, and the Top of it; then raise up the Brawn; then turn it outward upon both Sides, but break it not, nor cut it off; then cut off the Wing-pinions at the Joint next the Body, and stick in each Side the Pinion in the Place you turn'd the Brawn

102 *The Young Woman's best Companion.*

out: But cut off the sharp End of the Pinion, and take the Middle-piece, and that will just fit in the Place. You may cut up a Capon or Pheasant the same Way.

To wing a Partridge, or Quail.

Raise the Legs and Wings, and sauce them with Wine, powder'd Ginger, and Salt.

To allay a Pheasant, or Teal.

Do this as you do a Partridge, but use no other Sauce but Salt.

To lift a Swan.

Slit the Swan down in the Middle of the Breast, and so clean through the Back, from the Neck to the Rump: Then part it into two Halves, but do not break or tear the Flesh; then lay the two Halves in a Charger, with the Slit Sides downwards; throw Salt upon it; set it again upon the Table; let the Sauce be Chaldron, and serve it in Saucers.

To cut up a Turkey.

Raise up the Leg fairly, and open the Joint with the Point of your Knife, but take not off the Leg; then with your Knife lace down both Sides of the Breast, and open the Breast-pinion, but do not take it off; then raise the Merry-thought betwixt the Breast-bone, and the Top of it; then raise up the Brawn; then turn it Outward upon both Sides, but break it not, nor cut it off; then cut off the Wing-pinions at the Joint next the Body, and stick each Pinion in the Place you turned the Brawn out; but cut off the sharp End of the Pinion, and take the Middle-piece, and that will just fit the Place. You may cut up a Bustard, a Capon, or a Pheasant, the same Way.

To thigh a Woodcock.

Raise the Wings and Legs as you do a Hen, only lay the Head open for the Brains; and as you thigh a Hen, so you must a Curlew, Plover, or Snipe, excepting that you have no other Sauce but Salt.
