Circa Collectionem priorem.

9. *Callisiam dixiti*; an pace tua est certe *Tradescantia*; filamenta VI, villosa, &c.
- 14 *Alchemilla aphanoides*. Semper dubium habebam, cuiam horum generum adscriberem plantam istam. Est planta vere digyna, staminibus III instructa. Semina duo.
- Alchemilla* possides facie *Alchemilla*. Est etiam digyna; sed stamina duo tantum habet; semina itidem duo.
- 13 Gaudeo tibi etiam vidisse pro genere novo habendam. *Erantia*. Nomen imponam.
- 16 *Rhexia Bogotensis* in diarijs meis. Non bene memini cuiusnam sit Tabula 6; an illius cuius flosculum includo; an vero hujus cuius specimen mitto sub n. 114. Antherae hujus versatiles sunt, et perianthio exteriori destituta est; illius anthera erecta, et perianthio interiori bivalvi. De *Rhexijs* non paucae mihi occurrunt difficultates. Omnes hactenus à me visa antheras habent perforatas, praeter speciem singularissimam, quam haec loci vidi, cuius stamina aequalia seorsum posita; interiora breviora sunt: anthera longitudinaliter per medium dehiscens. (In *Brownia* Hb. cum alijs)
- 17 Tibi ignota ignoto fucru maturo. Plantae iconem includo n. 1. *Datura*
- 20 Est proculdubio *Datura arborea*. icones 2. 3. 4. *anthera glabra*
- 21 Gratias abitis ago pro genere singularissimo meo nomini consecrato. Ab anno 1762 plantam istam jam novi, et descripsi.
- 22 Videretur esse *Bassella*.
26. 27. *Viburnum proculdubio*.
