FIGURE 3

Left ulna of an ancient man, known as the *Neanderthal man*, whose skeleton, found in a cave in the valley of the Neander river of Europe, has aroused considerable interest on account of the primitive human characters which it exhibits. This skeleton, which is about 75,000 years old, shows evidences of injury in the divaricate olecranon, possibly due to a severe blow on the elbow producing a fracture. Drawn from a photograph of the original by Hrdlička.
