# Contents.

- I Theory of the Homology of the Suprarenals, based on Observations. Journal of Anat. & Physiol. Oct. 1878
- (1) Obsolescence of Graafian Follicles
  - (2) Cortical Structures of the Suprarenals in the Horse and Dog
  - (3) Comparison between atretic Graafian Follicles and the Cortical Cylinders of the Suprarenal
  - (4) Limits of the Suprarenal Cortex and Medulla, and the Structure of the latter
  - (5) Deposit of Plasma-cells in the Foetal Ovary
  - (6) Structure of the Corpus luteum
  - (7) Structures resembling Corpora lutea in Senile Ovaries
  - (8) Suggestions toward a General Conclusion
- II Formation of the Placenta in the Guinea-pig  
Journ. of Anat. & Physiol. July 1878
- (1) General account of the Encapsulation of the Ovary
  - (2) Minute Structure of the primitive Decidual Tissue
  - (3) Connexion between the Blastoderm & the Maternal Surface
  - (4) Adaptation of the primitive Decidual Tissue to become the Decidua serotina
  - (5) Formation of a Secondary Placental Organ behind the Discoid Placenta
- III Further Observations on the Placenta in the Guinea-pig  
vaso-formative processes in the Secondary Placenta.
- IV Physiological Type of the Giant-cells of Tubercles and Granulations. Journ. of Anat. & Physiol. Jan. 1879  
vaso-formative significance of Giant-cells
- V A Pathological Function of Periosteum  
Journ. of Anat. & Physiol. April 1878  
Account of a periosteal and parosteal tumour of the metatarsus
