Anacephaleosis.

AD umbilicum fere perducta est opella nostra. Explicatae partes corporis cunctae, quae in oculos incurrunt, suaq; singulis proportio addita. Super est, ut more Rhetoribus usitato, in summam colligentes quae dicta sunt, ex omnibus membris inter se conjunctis integrum formemus hominem. Id quod ut commodius fiat, in medium prius afferemus catalogum, qui secundum tres dimensiones corporis, omnium partium symmetriam contineat. Et quoniam partes corporis humani pleraeq; teretes sunt, adeoq; profunditas cum latitudine coincidit, aut ex peripheriae diametro facile colligitur: ideoque facta substitutione, has dimensionum species modo proponemus, Longitudinē, Latitudinē, Circumferentiā. porro cum superius tria instrumentorum genera attulerimus, Anthropometron, Filum, Circinum: quodnam ex his cuilibet dimensioni aptius sit, literis A. F. C. indicaturi sumus.

ELENCHUS ANTHROPOMETRUS.
