GALVANIC AND MAGNETO-ELECTRIC MACHINES.

	£ s. d.
GROVE'S three-cell battery, with conducting cords, cautery, handle, and platinum wire, in case, complete	... 6 0 0

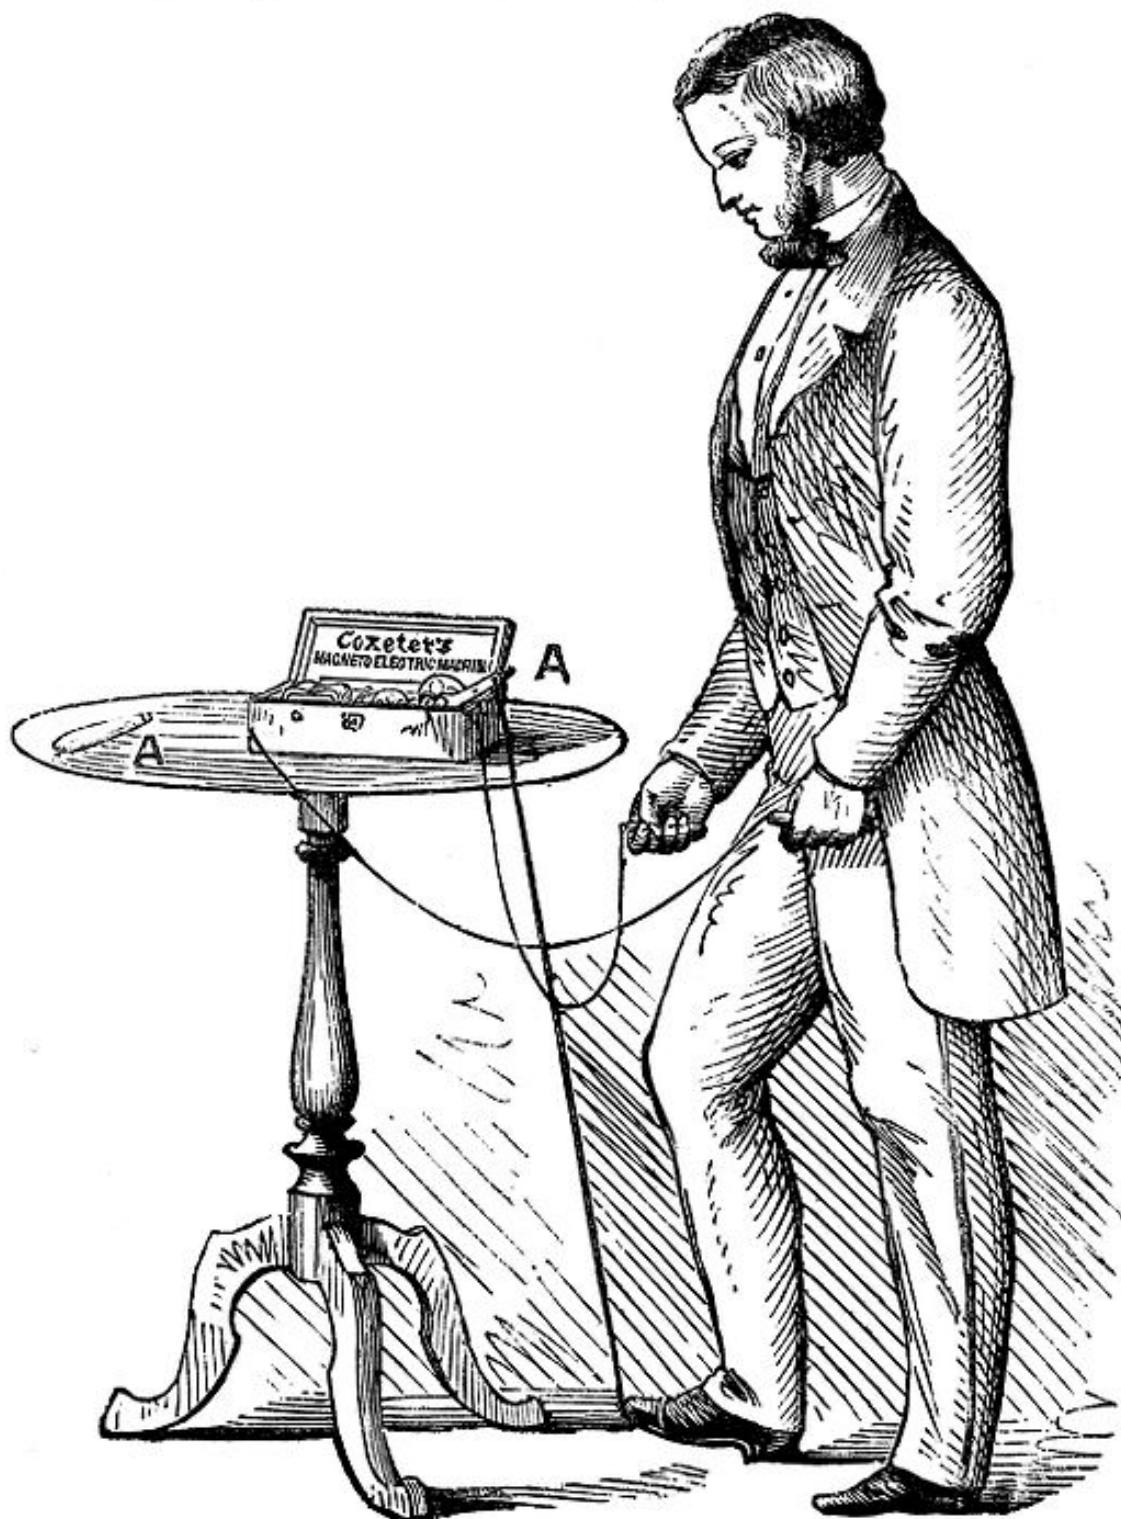

Fig. 215.

This machine is worked by means of the foot; it has also the advantage of the LEVER MOTION by the hand—a much more convenient one than the usual circular motion, as it enables the operator to apply electricity to himself with great ease.
