Et ne faut toucher ny presser sur les apophyses qui sont au milieu, de peur qu'on ne les rompe. On cognoistra la vertebre estre reduite, quād elle sera egale aux autres qui luy sont proches. Apres la reductiō faut lier & presser la partie, & y mettre des astelles, ou platines de plomb accommodees à ce faire : lesquelles seront si bien appropriees, qu'elles ne pressent nullement sur la reste des spondyles, mais seulement aux costez.
