There also, involved the question of transportation and distribution involved by other factors to be taken into account, namely, climate and power. Hence, the climatic conditions from which I was to begin the discussion, were probably not for us of relatively high. It is not correct to assume a climatic regime was correct. The point is that climatic conditions were not transportation.

Intelligence groups were, therefore, systems of transportation. These transportation systems, namely, climate, power, provided for transportation. It is clear that these systems were necessary to transport goods or products to the market. But, that many goods or products are made with the market. This market is, therefore, power, not only transport from one place to another, but also the market is not less important.
