have made peritoneal
ligature still ^{unaltered} securing
viz. the middle of the

The arrow indicates the course of
the blood. A branch came
off just by the thick ligature
& prevented any clot from
forming there: yet the
tied part had withstood
all the strain of the
blood bumping against it.
The two fine ligatures (ministering
part) are bound with one band
of pink fibrous tissue; but the
new tissue is tattooed with the specks of

GLASGOW

the
absorbing action of the
opening being of
mineral nature
not for their part.
The ligatures
have been seen
of the
crossed of the
& carbolic acid
was in compound
fracture cases, &
the replaced by limit
of the. The thing could
be made perfect in a second case with all

will be anxious
to know what I
have found in the
calf's neck. Well,
at first on dissecting
down on the artery
I was much disappointed
to see that the
